(b) BLM may suspend your operations on any lease in the interest of conservation.

(c) A suspension under this section may include leases committed to an approved unit agreement. If leases committed to a unit are suspended, the unit operator must continue to satisfy unit terms and obligations, unless BLM also suspends unit terms and obligations, in whole or in part, under subpart 3287.

**§ 3212.12 How long does a suspension of operations or a suspension of operations and production last?**

(a) BLM will state in your suspension notice how long your suspension of operations or operations and production is effective.

(b) During a suspension, you may ask BLM in writing to terminate your suspension. You may not unilaterally terminate a suspension that BLM ordered. A suspension of operations and production that we approved upon your request will automatically terminate when you begin or resume authorized production or drilling operations.

(c) If we receive information showing that you must resume operations to protect the interests of the United States, we will terminate your suspension and order you to resume production.

(d) If a suspension terminates, you must resume paying rents and royalty (see § 3212.14).

**§ 3212.13 How does a suspension affect my lease term and obligations?**

(a) If BLM approves a suspension of operations and production:

(1) Your lease term is extended by the length of time the suspension is in effect; and

(2) You are not required to drill, produce geothermal resources, or pay rents or royalties during the suspension. We will suspend your obligation to pay lease rents or royalties beginning the first day of the month following the date the suspension is effective.

(b) If BLM orders you to suspend your operations;

(1) Your lease term is extended by the length of time the suspension is in effect; and

(2) Your lease rental or royalty obligations are not suspended, except that BLM may suspend your rental or royalty obligations if you will be denied all beneficial use of your lease during the period of the suspension.

**§ 3212.14 What happens when the suspension ends?**

When the suspension ends, you must resume rental and royalty payments that were suspended, beginning on the first day of the lease month after BLM terminates the suspension. You must pay the full rental amount due on or before the next lease anniversary date. If you do not make the rental payments on time, BLM will refund your balance and terminate the lease.

**§ 3212.15 Will my lease remain in effect if I cease production and I do not have an approved suspension?**

In the absence of a suspension issued under § 3212.11, if you cease production for more than one calendar month on a lease that is subject to royalties and that has achieved commercial production (through actual or allocated production), your lease will remain in effect only if the circumstances described in paragraphs (a), (b), or (c) of this section apply:

(a)(1) For leases issued on or after August 8, 2005 (other than leases issued in response to applications pending on that date for which no election is made under § 3200.8(b)(1)), and for leases issued before August 8, 2005, for which an election is made under § 3200.7(a)(2), your lease will remain in effect if, during the period in which there is no production, you continue to pay a monthly advanced royalty under MMS regulations at 30 CFR 218.305. This option is available only for an aggregate of 10

## § 3212.16

years (120 months, whether consecutive or not).

(2) For leases issued before August 8, 2005, for which no election is made under § 3200.7(a)(2), and for leases issued in response to applications pending on August 8, 2005, for which no election is made under § 3200.8(b)(1), your lease will remain in effect if, during the period in which there is no production you:

(i) Continue to make minimum royalty payments as specified in § 3211.21(b) of this part;

(ii) Maintain a well capable of production in commercial quantities;

(iii) Continue to make diligent efforts to utilize the geothermal resource; and

(iv) Satisfy any other applicable requirements.

(b) The Secretary:

(1) Requires or causes the cessation of production; or

(2) Determines that the cessation in production is required or otherwise caused by:

(i) The Secretary of the Air Force, Army, or Navy;

(ii) A state or a political subdivision of a state; or

(iii) Force majeure.

(c) The discontinuance of production is caused by the performance of maintenance necessary to maintain operations. Such maintenance is considered a production activity, not a cessation of production, and maintenance may include activities such as overhauling your power plant, re-drilling or re-working wells that are critical to plant operation, or repairing and improving gathering systems or transmission lines, that necessitate the discontinuation of production. You must obtain BLM approval by submitting a Geothermal Sundry Notice if the activity will require more than one calendar month, for it to be classified as maintenance under this paragraph. The BLM must receive the Geothermal Sundry Notice before the end of the first calendar month in which there will be no production.

## 43 CFR Ch. II (10–1–08 Edition)

### § 3212.16 Can I apply to BLM to reduce, suspend, or waive the royalty or rental of my lease?

(a) You may apply for a suspension, reduction, or waiver of your rent or royalty for any lease or portion thereof. BLM may grant your request in the interest of conservation and to encourage the greatest ultimate recovery of geothermal resources, if we determine that:

(1) Granting the request is necessary to promote development; or

(2) You cannot successfully operate the lease under its current terms.

(b) BLM will not approve a rental or royalty reduction, suspension, or waiver unless all rental or royalty interest owners other than the United States accept a similar reduction, suspension, or waiver.

### § 3212.17 What information must I submit when I request that BLM suspend, reduce, or waive my royalty or rental?

(a) Your request for suspension, reduction, or waiver of the royalty or rental must include all information BLM needs to determine if the lease can be operated under its current terms, including:

(1) The type of reduction you seek;

(2) The serial number of your lease;

(3) The names and addresses of the lessee and operator;

(4) The location and status of wells;

(5) A summary of monthly production from your lease; and

(6) A detailed statement of expenses and costs.

(b) If you are applying for a royalty or rental reduction, suspension, or waiver, you must also provide to BLM a list of names of royalty and rental interest owners other than the United States, the amounts of royalties or payments out of production and rent paid to them, and every effort you have made to reduce these payments.

### § 3212.18 What are the production incentives for leases?

You will receive a production incentive in the form of a temporary 50 percent reduction in your royalties under MMS regulations at 30 CFR 218.307 if:

(a) Your lease was in effect prior to August 8, 2005;

(b) You do not convert the royalty rates of your lease under § 3212.25;

(c) By August 7, 2011, production from or allocated to your lease is utilized for commercial production in a:

(1) New facility (see § 3212.22); or

(2) Qualified expansion project (see § 3212.21); and

(d) The production from your lease is used for the commercial generation of electricity.

**§ 3212.19 How do I apply for a production incentive?**

Submit to BLM a written request for a production incentive describing a project that may qualify as a new facility or qualified expansion project. Identify whether you are requesting that the project be considered as a new facility (see § 3212.22) or as a qualified expansion project (see § 3212.21) and explain why your project qualifies under these regulations. The request must be received no later than August 7, 2011.

**§ 3212.20 How will BLM review my request for a production incentive?**

(a) BLM will review your request on a case-by-case basis to determine whether your project meets the criteria for a qualified expansion project under § 3212.21 or a new facility under § 3212.22. If it does not meet the criteria for the type of project you requested, we will determine whether it meets the criteria for the other type of production incentive project.

(b) If BLM determines that you have a qualified expansion project, we will, as part of our approval, provide you with a schedule of monthly target net generation amounts that you must exceed to qualify for the production incentive. These amounts will quantify the required 10 percent increase in net generation over the projected net generation without the project. The schedule will be specific to the facility or facilities that are affected by the project and will cover the 48-month time period during which your production incentive may apply.

(c) If BLM determines that you have met the criteria for a new facility, we will provide you with written notification of this determination.

**§ 3212.21 What criteria establish a qualified expansion project for the purpose of obtaining a production incentive?**

A qualified expansion project must meet the following criteria:

(a) It must involve substantial capital expenditure. Examples include the drilling of additional wells, retrofitting existing wells and collection systems to increase production rates, retrofitting turbines or power plant components to increase efficiency, adding additional generation capacity to existing plants, and enhanced recovery projects such as augmented injection. Projects that are not associated with substantial capital expenditure, such as opening production valves and operating existing equipment at higher rates, do not qualify as expansion projects.

(b) The project must have the potential to increase the net generation by more than 10 percent over the projected generation without the project, using data from the previous 5 years. If 5 years of data are not available, it is not a qualified expansion project.

**§ 3212.22 What criteria establish a new facility for the purpose of obtaining a production incentive?**

(a) Criteria for determining whether a project is a new facility for the purpose of obtaining a production incentive include:

(1) The project requires a new site license or facility construction permit if it is on Federal lands;

(2) The project requires a new Commercial Use Permit;

(3) The project includes at least one new turbine-generator unit;

(4) The project involves a new sales contract;

(5) The project involves a new site or substantially larger footprint; and

(6) The project is not contiguous to an existing project.

(b) Generally, a new facility will not:

(1) Be permitted only with a Geothermal Drilling Permit;

(2) Be constructed entirely within the footprint of an existing facility; or

(3) Involve only well-field projects such as drilling new wells, increasing injection, and enhanced recovery projects.

## § 3212.23

### § 3212.23 How will the production incentive apply to a qualified expansion project?

(a) The production incentive will begin on the first day of the month following the commencement of commercial operation of the qualified expansion project. The incentive will be in effect for up to 48 consecutive months, applicable only to those months in which the actual generation from the facility or facilities affected by the project exceeds the target generation established by BLM. The amount of the production incentive is established in MMS regulations at 30 CFR 218.307.

(b) The production incentive will apply only to the increase in net generation. The increase in generation for any month in which the production incentive is in effect will be determined as follows:

$$\Delta G_i = G_{a,i} - \frac{G_{t,i}}{1.1}$$

where:

$i$  is a month for which a production incentive is in effect;

$\Delta G_i$  is the increase in generation for month  $i$  to which the production incentive applies;

$G_{a,i}$  is the actual generation in month  $i$ ;

$G_{t,i}$  is the target generation in month  $i$ , as provided in § 3212.19(b).

### § 3212.24 How will the production incentive apply to a new facility?

(a) If BLM determines that your project qualifies as a new facility, the production incentive will begin on the first day of the month following the commencement of commercial operations at that facility, and will be in effect for 48 consecutive months. The incentive applies to the entire commercial generation of electricity from the new facility.

(b) The amount of the production incentive is established in MMS regulations at 30 CFR 218.307.

### § 3212.25 Can I convert the royalty rate terms of my lease in effect before August 8, 2005, to the terms of the Geothermal Steam Act, as amended by the Energy Policy Act of 2005?

(a) If a lease was in effect before August 8, 2005, the lessee may submit to

## 43 CFR Ch. II (10–1–08 Edition)

BLM a request to modify the royalty rate terms of your lease to the applicable royalty rate or direct use fee terms prescribed in the Geothermal Steam Act as amended by the Energy Policy Act of 2005. You may withdraw your request before it is granted, but once you accept the new terms, you may not revert to the earlier royalty rates. If your request to modify is granted, the new royalty rate or direct use fees will apply to all geothermal resources produced from your lease for as long as your lease remains in effect. A modification under this section does not affect the royalty rate for byproducts.

(b)(1) The royalty rate for leases whose terms are modified and production from which is used for commercial generation of electricity is prescribed in § 3211.17(b).

(2) The direct use fees or royalty rate for leases whose terms are modified and production from which is used directly for purposes other than commercial generation of electricity is prescribed in § 3211.18(a) of this part and MMS regulations at 30 CFR 206.356.

### § 3212.26 How do I submit a request to modify the royalty rate terms of my lease to the applicable terms prescribed in the Energy Policy Act of 2005?

(a) You must submit a written request to BLM that contains the serial numbers of the leases whose terms you wish to modify and:

(1) For direct use operations, any other information that BLM may require; or

(2) For commercial electrical generation operations, for each month during the 10-year period preceding the date of your request (or from when electrical generation operations began if less than 10 years before the date of your request):

(i) The gross proceeds received by you or your affiliate from the sale of electricity;

(ii) The amount of royalty paid;

(iii) The amount of generating and transmission deductions subtracted from the gross proceeds to derive the royalty value if you are using the geothermal netback procedure under MMS regulations to calculate royalty value; and

## Bureau of Land Management, Interior

## § 3213.12

(iv) Any other information that BLM may require.

(b) BLM must receive your request no later than:

(1) For leases whose geothermal resource production is used directly for purposes other than commercial generation of electricity, 18 months after the effective date of the schedule of fees established by MMS under 30 CFR 206.356(b); or

(2) For leases whose geothermal resource production is used for commercial generation of electricity, December 1, 2008.

### **§ 3212.27 How will BLM or MMS review my request to modify the lease royalty rate terms?**

After you submit your request to modify the royalty rate terms under § 3212.25, BLM will:

(a) Review your application, and if BLM determines that:

(1) Your application is complete and contains all necessary information, we will notify you of the date on which your complete request was received; or

(2) Your request is not complete or does not contain all necessary information, we will notify you of the additional information that is required;

(b) Analyze the data you submitted to establish a royalty rate if the geothermal resources are used for commercial electrical generation;

(c) Consult with MMS and any state or local governments that may be affected by the change in royalty rate terms; and

(d)(1) No later than 140 days after the day on which we determine a complete request with all necessary information was received, BLM will send you written notification of the proposed royalty rate that BLM determines to be revenue neutral.

(2) If you reject the proposed rate, we must receive written notification from you no later than 30 days after the date of your receipt of our notification. BLM will accept a faxed notification received within the 30-day time limit. However, following the fax, you must submit to BLM written notification which BLM must receive no later than the 179th day following the day on which BLM determines we received your complete request.

(3) If you reject the proposed royalty rate on a timely basis:

(i) BLM will not issue a decision modifying the royalty rate terms of your lease;

(ii) The existing royalty rate terms in your lease continue to apply; and

(iii) You may not reapply for a royalty rate term conversion under § 3212.25.

(4) Unless timely written notification is received from you rejecting the proposed rate, BLM will issue a decision modifying the royalty rate terms of your lease no later than 180 days after the day on which we determine a complete request was received. The effective date of the new royalty rate is the first day of the month following the date on which the decision was issued. For example, a decision issued on July 21, will become effective on August 1.

## **Subpart 3213—Relinquishment, Termination, and Cancellation**

### **§ 3213.10 Who may relinquish a lease?**

Only the record title owner may relinquish a lease in full or in part. If there is more than one record title owner for a lease, all record title owners must sign the relinquishment.

### **§ 3213.11 What must I do to relinquish a lease?**

Send BLM a written request that includes the serial number of each lease you are relinquishing. If you are relinquishing the entire lease, no legal description of the land is required. If you are relinquishing part of the lease, you must describe the lands to be relinquished. BLM may require additional information if necessary.

### **§ 3213.12 May BLM accept a partial relinquishment if it will reduce my lease to less than 640 acres?**

Except for direct use leases, lands remaining in your lease must contain at least 640 acres, or all of your leased lands must be in one section, whichever is less. Otherwise, we will not accept your partial relinquishment. BLM will only allow an exception if it will further development of the resource. The size of direct use leases is addressed in § 3205.07.

### **§ 3213.13**

#### **§ 3213.13 When does relinquishment take effect?**

(a) If BLM determines your relinquishment request meets the requirements of §§ 3213.11 and 3213.12, your relinquishment is effective the day we receive it.

(b) Notwithstanding the relinquishment, you and your surety continue to be responsible for:

(1) Paying all rents and royalties due before the relinquishment was effective;

(2) Plugging and abandoning all wells on the relinquished land;

(3) Restoring and reclaiming the surface and other resources; and

(4) Complying with § 3200.4.

#### **§ 3213.14 Will BLM terminate my lease if I do not pay my rent on time?**

(a) If MMS does not receive your second and subsequent year's rental payment in full by the lease anniversary date, MMS will notify you that the rent payment is overdue. You have 45 days after the anniversary date to pay the rent plus a 10 percent late fee. If MMS does not receive your rental plus the late fee by the end of the 45-day period, BLM will terminate your lease.

(b) If you receive notification from MMS under paragraph (a) of this section more than 15 days after the lease anniversary date, BLM will reinstate a lease that was terminated under paragraph (a) of this section if MMS receives the rent plus a 10 percent late fee within 30 days after you receive the notification.

#### **§ 3213.15 How will BLM notify me if it terminates my lease?**

BLM will send you a notice of the termination by certified mail, return receipt requested.

#### **§ 3213.16 May BLM cancel my lease?**

(a) BLM may cancel your lease if it was issued in error.

(b) If BLM cancels your lease because it was issued in error, the cancellation is effective when you receive it.

#### **§ 3213.17 May BLM terminate my lease for reasons other than non-payment of rentals?**

BLM may terminate your lease for reasons other than non-payment of

### **43 CFR Ch. II (10–1–08 Edition)**

rentals, after giving you 30 days written notice, if we determine that you violated the requirements of § 3200.4, including, but not limited to the non-payment of royalties and fees under 30 CFR parts 206 and 218.

#### **§ 3213.18 When is a termination effective?**

If BLM terminates your lease because we determined that you violated the requirements of § 3200.4, the termination takes effect 30 days after the date you receive notice of our determination.

#### **§ 3213.19 What can I do if BLM notifies me that my lease is being terminated because of a violation of the law, regulations, or lease terms?**

(a) You can prevent termination of your lease if, within 30 days after receipt of our notice:

(1) You correct the violation; or

(2) You show us that you cannot correct the violation during the 30-day period and that you are making a good faith attempt to correct the violation as quickly as possible, and thereafter you diligently proceed to correct the violation.

(b)(1) You may appeal the lease termination. You have 30 days after receipt of our notice to file an appeal (see parts 4 and 1840 of this title). We will stay the termination of your lease while your appeal is pending.

(2) You are entitled to a hearing on the violation or the proposed lease termination if you request the hearing when you file the appeal. The period for correction of the violation will be extended to 30 days after the decision on appeal is made if the decision concludes that a violation exists.

### **Subpart 3214—Personal and Surety Bonds**

#### **§ 3214.10 Who must post a geothermal bond?**

(a) The lessee or operator must post a bond with BLM before exploration, drilling, or utilization operations begin.

(b) Before we approve a lease transfer or recognize a new designated operator, the lessee or operator must file a new bond or a rider to the existing bond,

## Bureau of Land Management, Interior

## § 3214.18

unless all previous operations on the land have already been reclaimed.

### § 3214.11 Who must my bond cover?

Your bond must cover all record title owners, operating rights owners, operators, and any person who conducts operations on your lease.

### § 3214.12 What activities must my bond cover?

Your bond must cover:

- (a) Any activities related to exploration, drilling, utilization, or associated operations on a Federal lease;
- (b) Reclamation of the surface and other resources;
- (c) Rental and royalty payments; and
- (d) Compliance with the requirements of § 3200.4.

### § 3214.13 What is the minimum dollar amount required for a bond?

The minimum bond amount varies depending on the type of activity you are proposing and whether your bond will cover individual, statewide, or nationwide activities. The minimum dollar amounts and bonding options for each type of activity are found in the following regulations:

- (a) Exploration operations—see § 3251.15;
- (b) Drilling operations—see § 3261.18; and
- (c) Utilization operations—see §§ 3271.12 and 3273.19.

### § 3214.14 May BLM increase the bond amount above the minimum?

(a) BLM may increase the bond amount above the minimums referenced in § 3214.13 when:

- (1) We determine that the operator has a history of noncompliance;
  - (2) We previously had to make a claim against a surety because any one person who is covered by the new bond failed to plug and abandon a well and reclaim the surface in a timely manner;
  - (3) MMS has notified BLM that a person covered by the bond owes uncollected royalties; or
  - (4) We determine that the bond amount will not cover the estimated reclamation cost.
- (b) We may increase bond amounts to any level, but we will not set that

amount higher than the total estimated costs of plugging wells, removing structures, and reclaiming the surface and other resources, plus any uncollected royalties due MMS or moneys owed to BLM due to previous violations.

### § 3214.15 What kind of financial guarantee will BLM accept to back my bond?

We will not accept cash bonds. We will only accept:

- (a) Corporate surety bonds, provided that the surety company is approved by the Department of Treasury (see Department of the Treasury Circular No. 570, which is published in the FEDERAL REGISTER every year on or about July 1); and
- (b) Personal bonds, which are secured by a cashier's check, certified check, certificate of deposit, negotiable securities such as Treasury notes, or an irrevocable letter of credit (see §§ 3214.21 and 3214.22).

### § 3214.16 Is there a special bond form I must use?

You must use a BLM-approved bond form (Form 3000-4, or Form 3000-4a, June 1988 or later editions) for corporate surety bonds and personal bonds.

### § 3214.17 Where must I submit my bond?

File personal or corporate surety bonds and statewide bonds in the BLM State Office that oversees your lease or operations. You may file nationwide bonds in any BLM State Office. File bond riders in the BLM State Office where your underlying bond is located. For personal or corporate surety bonds, file one originally-signed copy of the bond.

### § 3214.18 Who will BLM hold liable under the lease and what are they liable for?

BLM will hold all interest owners in a lease jointly and severally liable for compliance with the requirements of § 3200.4 for obligations that accrue while they hold their interest. Among other things, all interest owners are jointly and severally liable for:

- (a) Plugging and abandoning wells;

#### **§ 3214.19**

- (b) Reclaiming the surface and other resources;
- (c) Compensatory royalties assessed for drainage; and
- (d) Rent and royalties due.

#### **§ 3214.19 What are my bonding requirements when a lease interest is transferred to me?**

(a) Except as otherwise provided in this section, if the lands to be transferred to you contain a well or any other surface disturbance which the original lessee did not reclaim, you must post a bond under this subpart before BLM will approve the transfer.

(b) If the original lessee does not transfer all interest in the lease to you, you may become a co-principal on the original bond, rather than posting a new bond.

(c) You do not need to post an additional bond if:

- (1) You previously furnished a state-wide or nationwide bond sufficient to cover the lands transferred; or
- (2) The operator provided the original bond, and the operator does not change.

#### **§ 3214.20 How do I modify my bond?**

You may modify your bond by submitting a rider to the BLM State Office where your bond is held. There is no special form required.

#### **§ 3214.21 What must I do if I want to use a certificate of deposit to back my bond?**

Your certificate of deposit must:

(a) Be issued by a Federally-insured financial institution authorized to do business in the United States;

(b) Include on its face the statement, "This certificate cannot be redeemed by any party without approval by the Secretary of the Interior or the Secretary's delegate;" and

(c) Be payable to the Department of the Interior, Bureau of Land Management.

#### **§ 3214.22 What must I do if I want to use a letter of credit to back my bond?**

Your letter of credit must:

(a) Be issued by a Federally-insured financial institution authorized to do business in the United States;

#### **43 CFR Ch. II (10–1–08 Edition)**

(b) Be payable to the Department of the Interior—Bureau of Land Management;

(c) Be irrevocable during its term and have an initial expiration date of no sooner than 1 year after the date we receive it;

(d) Be automatically renewable for a period of at least 1 year beyond the end of the current term, unless the issuing financial institution gives us written notice, at least 90 days before the letter of credit expires, that it will no longer renew the letter of credit; and

(e) Include a clause authorizing the Secretary of the Interior to demand immediate payment, in part or in full:

(i) If you do not meet your obligations under the requirements of § 3200.4; or

(ii) Provide substitute security for a letter of credit which the issuer has stated it will not renew before the letter of credit expires.

### **Subpart 3215—Bond Release, Termination, and Collection**

#### **§ 3215.10 When may BLM collect against my bond?**

If you fail to comply with the requirements listed at § 3200.4, we may collect money from the bond to correct your noncompliance. This amount can be as large as the face amount of the bond. Some examples of when we will collect against your bond are when you do not properly or in a timely manner:

- (a) Plug and abandon a well;
- (b) Reclaim the lease area;
- (c) Pay outstanding royalties; or
- (d) Pay assessed royalties to compensate for drainage.

#### **§ 3215.11 Must I replace my bond after BLM collects against it?**

If BLM collects against your bond, before you conduct any further operations you must either:

- (a) Post a new bond equal to the value of the original bond; or
- (b) Restore your existing bond to the original face amount.

#### **§ 3215.12 What will BLM do if I do not restore the face amount or file a new bond?**

If we collect against your bond and you do not restore it to the original

## Bureau of Land Management, Interior

## § 3216.14

face amount, we may shut in any well(s) or utilization facilities covered by that bond and may terminate affected leases.

### § 3215.13 Will BLM terminate or release my bond?

(a) BLM does not cancel or terminate bonds. We may inform you that your existing bond is insufficient.

(b) The bond provider may terminate your bond provided it gives you and BLM 30-days notice. The bond provider remains responsible for obligations that accrued during the period of liability while the bond was in effect.

(c) BLM will release a bond, terminating all liability under that bond, if:

(1) The new bond that you file covers all existing liabilities and we accept it; or

(2) After a reasonable period of time, we determine that you paid all royalties, rents, penalties, and assessments, and satisfied all permit and lease obligations.

(d) If an adequate bond is not in place, do not conduct any operations until you provide a new bond that meets our requirements.

### § 3215.14 When BLM releases my bond, does that end my responsibilities?

When BLM releases your bond, we relinquish the security but we continue to hold the lessee or operator responsible for noncompliance with applicable requirements under the lease. Specifically, we do not waive any legal claim we may have against any person under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601 *et seq.*), or other laws and regulations.

## Subpart 3216—Transfers

### § 3216.10 What types of lease interests may I transfer?

You may transfer record title or operating rights, but you need BLM ap-

proval before your transfer is effective (see § 3216.21).

### § 3216.11 Where must I file a transfer request?

File your transfer in the BLM State Office that handles your lease.

### § 3216.12 When does a transferee take responsibility for lease obligations?

After BLM approves your transfer, the transferee is responsible for performing all lease obligations accruing after the date of the transfer, and for plugging and abandoning wells which exist and are not plugged and abandoned at the time of the transfer.

### § 3216.13 What are my responsibilities after I transfer my interest?

After you transfer an interest in a lease you are still responsible for rents, royalties, compensatory royalties, and other obligations that accrued before your transfer became effective. You also remain responsible for plugging and abandoning any wells that were drilled or existing on the lease while you held your interest. You must carry out this responsibility upon the BLM's determination at any future time that the wells must be plugged and abandoned.

### § 3216.14 What filing fees and forms does a transfer require?

With each transfer request you must send BLM the correct form and pay the transfer fee required by this section. When you calculate your fee, make sure it covers the full amount. For example, if you are transferring record title for three leases, submit \$225 with the application.

Use the following chart to determine the number and types of forms required. The applicable transfer fees are in the fee schedule in § 3000.12 of this chapter.

Type of transfer	Form required?	Form No.	Number of copies
(a) Record Title .....	Yes .....	3000-3 .....	2 executed copies.
(b) Operating Rights .....	Yes .....	3000-3(a) .....	2 executed copies.
(c) Estate Transfers .....	No .....	N/A .....	1 List of Leases.
(d) Corporate Mergers .....	No .....	N/A .....	1 List of Leases.
(e) Name Changes .....	No .....	N/A .....	1 List of Leases.

## **§ 3216.15**

### **§ 3216.15 When must I file my transfer request?**

(a) File a request to transfer record title or operating rights within 90 days after you sign an agreement with the transferee. If BLM receives your request more than 90 days after signing, we may require you to re-certify that you still intend to complete the transfer.

(b) There is no specific time deadline for filing estate transfers, corporate mergers, and name changes. File them within a reasonable time.

### **§ 3216.16 Must I file separate transfer requests for each lease?**

File two copies of a separate request for each lease for which you are transferring record title or operating rights. The only exception is if you are transferring more than one lease to the same transferee, in which case you file two copies of one transfer request.

### **§ 3216.17 Where must I file estate transfers, corporate mergers, and name changes?**

(a) If you have posted a bond for any Federal lease, you must file estate transfers, corporate mergers, and name changes in the BLM State Office that maintains your bond.

(b) If you have not posted a bond, you must file estate transfers, corporate mergers, and name changes in the State Office having jurisdiction over the lease.

### **§ 3216.18 How do I describe the lands in my lease transfer?**

(a) If you are transferring an interest in your entire lease, you do not need to give BLM a legal description of the land.

(b) If you are transferring an interest in a portion of your lease, describe the lands that are transferred in the same way they are described in the lease.

### **§ 3216.19 May I transfer record title interest for less than 640 acres?**

Except for direct use leases, you may transfer record title interest for less than 640 acres only if your transfer includes an irregular subdivision or all of the lands in your lease are in a section. We may make an exception to the min-

## **43 CFR Ch. II (10–1–08 Edition)**

imum acreage requirements if it is necessary to conserve the resource.

### **§ 3216.20 When does a transfer segregate a lease?**

If you transfer 100 percent of the record title interest in a portion of your lease, BLM will segregate the transferred portion from the original lease and give it a new serial number with the same terms and conditions as those in the original lease.

### **§ 3216.21 When is my transfer effective?**

Your transfer is effective the first day of the month after we approve it.

### **§ 3216.22 Does BLM approve all transfer requests?**

BLM will not approve a transfer if:

- (a) The lease account is not in good standing;
- (b) The transferee does not qualify to hold a lease under this part; or
- (c) An adequate bond has not been provided.

## **Subpart 3217—Cooperative Agreements**

### **§ 3217.10 What are unit agreements?**

Under unit agreements, lessees unite with each other, or jointly or separately with others, in collectively adopting and operating under agreements to conserve the resources of any geothermal reservoir, field, or like area, or any part thereof. BLM will only approve unit agreements that we determine are in the public interest. Unit agreement application procedures are provided in part 3280 of this chapter.

### **§ 3217.11 What are communitization agreements?**

Under communitization agreements (also called drilling agreements), operators who cannot independently develop separate tracts due to well-spacing or well development programs may cooperatively develop such tracts. Lessees may ask BLM to approve a communitization agreement or, in some cases, we may require the lessees to enter into such an agreement.

## Bureau of Land Management, Interior

## § 3250.11

### **§ 3217.12 What does BLM need to approve my communitization agreement?**

For BLM to approve a communitization agreement, you must give us the following information:

- (a) The location of the separate tracts comprising the drilling or spacing unit;
- (b) How you will prorate production or royalties to each separate tract based on total acres involved;
- (c) The name of each tract operator; and
- (d) Provisions for protecting the interests of all parties, including the United States.

### **§ 3217.13 When does my communitization agreement go into effect?**

- (a) Your communitization agreement is effective when BLM approves and signs it.
- (b) Before we approve the agreement:
  - (1) All parties must sign the agreement; and
  - (2)(i) We must determine that the tracts cannot be independently developed; and
  - (ii) That the agreement is in the public interest.

### **§ 3217.14 When will BLM approve my drilling or development contract?**

BLM may approve a drilling or development contract when:

- (a) One or more geothermal lessees enter into the contract with one or more persons; or
- (b) Lessees need the contract for regional exploration of geothermal resources;
- (c) BLM has coordinated the review of the proposed contract with appropriate state agencies; and
- (d) BLM determines that approval best serves or is necessary for the conservation of natural resources, public convenience or necessity, or the interests of the United States.

### **§ 3217.15 What does BLM need to approve my drilling or development contract?**

For BLM to approve your drilling or development contract, you must send us:

- (a) The contract and a statement of why you need it;
- (b) A statement of all interests held by the contracting parties in that geothermal area or field;
- (c) The type of operations and schedule set by the contract;
- (d) A statement that the contract will not violate Federal antitrust laws by concentrating control over the production or sale of geothermal resources; and
- (e) Any other information we may require to make a decision about the contract or to attach conditions of approval.

## **Subpart 3250—Exploration Operations—General**

### **§ 3250.10 When do the exploration operations regulations apply?**

- (a) The exploration operations regulations contained in this subpart and subparts 3251 through 3256 apply to geothermal exploration operations:
  - (1) On BLM-administered public lands, whether or not they are leased for geothermal resources; and
  - (2) On lands whose surface is managed by another Federal agency, where BLM has leased the subsurface geothermal resources and the lease operator wishes to conduct exploration. In this case, we will consult with the surface managing agency regarding surface use and reclamation requirements before we approve the exploration operations.
- (b) These regulations do not apply to:
  - (1) Unleased land administered by another Federal agency;
  - (2) Unleased geothermal resources whose surface land is managed by another Federal agency;
  - (3) Privately owned land; or
  - (4) Casual use activities.

### **§ 3250.11 May I conduct exploration operations on my lease, someone else's lease, or unleased land?**

- (a) You may request BLM approval to explore any BLM-managed public lands open to geothermal leasing, even if the lands are leased to another person. A BLM-approved exploration permit does not give you exclusive rights.
- (b) If you wish to conduct operations on your lease, you may do so after we

## § 3250.12

have approved your Notice of Intent to Conduct Geothermal Resource Exploration Operations. If the lands are already leased, your operations may not unreasonably interfere with or endanger those other operations or other authorized uses, or cause unnecessary or undue degradation of the lands.

### § 3250.12 What general standards apply to exploration operations?

BLM-approved exploration operations must:

- (a) Meet all operational and environmental standards;
- (b) Protect public health, safety, and property;
- (c) Prevent unnecessary impacts on surface and subsurface resources;
- (d) Be conducted in a manner consistent with the principles of multiple use; and
- (e) Comply with the requirements of § 3200.4.

### § 3250.13 What additional BLM orders or instructions govern exploration?

BLM may issue the following types of orders or instructions:

- (a) Geothermal resource operational orders that contain detailed requirements of nationwide applicability;
- (b) Notices to lessees that contain detailed requirements on a statewide or regional basis;
- (c) Other orders and instructions specific to a field or area;
- (d) Conditions of approval contained in an approved Notice of Intent; and
- (e) Verbal orders that BLM will confirm in writing.

### § 3250.14 What types of operations may I propose in my application to conduct exploration?

(a) You may propose any activity fitting the definition of “exploration operations” in § 3200.1. Submit Form 3200-9, Notice of Intent to Conduct Geothermal Resource Exploration Operations, together with the information required under § 3251.11, and BLM will review your proposal.

(b) The exploration operations regulations do not address drilling wells intended for production or injection, which is covered in subpart 3260, or geothermal resources utilization, which is covered in subpart 3270.

## 43 CFR Ch. II (10–1–08 Edition)

### Subpart 3251—Exploration Operations: Getting BLM Approval

#### § 3251.10 Do I need a permit before I start exploration operations?

BLM must approve a Notice of Intent to Conduct Geothermal Resource Exploration Operations (NOI) before you conduct exploration operations. The approved NOI, including any necessary conditions for approval, constitutes your permit.

#### § 3251.11 What information is in a complete Notice of Intent to Conduct Geothermal Resource Exploration Operations application?

To obtain approval of exploration operations on BLM-managed lands, your application must:

- (a) Include a complete and signed Form 3200-9, Notice of Intent to Conduct Geothermal Resource Exploration Operations that describes the lands you wish to explore;
- (b) For operations other than drilling temperature gradient wells, describe your exploration plans and procedures, including the approximate starting and ending dates for each phase of operations;
- (c) For drilling temperature gradient wells, describe your drilling and completion procedures, and include, for each well or for several wells you propose to drill in an area of geologic and environmental similarity:
  - (1) A detailed description of the equipment, materials, and procedures you will use;
  - (2) The depth of each well;
  - (3) The casing and cementing program;
  - (4) The circulation media (mud, air, foam, etc.);
  - (5) A description of the logs that you will run;
  - (6) A description and diagram of the blowout prevention equipment you will use during each phase of drilling;
  - (7) The expected depth and thickness of fresh water zones;
  - (8) Anticipated lost circulation zones;
  - (9) Anticipated temperature gradient in the area;
  - (10) Well site layout and design;
  - (11) Existing and planned access roads or ancillary facilities; and

## Bureau of Land Management, Interior

## § 3252.11

(12) Your source of drill pad and road building material and water supply.

(d) Show evidence of bond coverage (see § 3251.15);

(e) Estimate how much surface disturbance your exploration may cause;

(f) Describe the proposed measures you will take to protect the environment and other resources;

(g) Describe methods to reclaim the surface; and

(h) Include all other information BLM may require.

### **§ 3251.12 What action will BLM take on my Notice of Intent to Conduct Geothermal Resource Exploration Operations?**

(a) When BLM receives your Notice of Intent to Conduct Geothermal Resource Exploration Operations, we will make sure it is complete and signed, and review it for compliance with the requirements of § 3200.4.

(b) If the proposed operations are located on lands described under § 3250.10(a)(2), we will consult with the Federal surface management agency before approving your Notice of Intent.

(c) We will check your Notice of Intent for technical adequacy and we may require additional information.

(d) We will notify you if we need more information to process your Notice of Intent, and suspend the review of your Notice of Intent until we receive the information.

(e) After our review, we will notify you whether we approved or denied your Notice of Intent and of any conditions of approval.

### **§ 3251.13 Once I have an approved Notice of Intent, how can I change my exploration operations?**

Send BLM a complete and signed Form 3260-3, Geothermal Sundry Notice, which fully describes the requested changes. Do not proceed with the change in operations until you receive written approval from BLM.

### **§ 3251.14 Do I need a bond for conducting exploration operations?**

(a) You must not start any exploration operations on BLM-managed lands until we approve your bond. You may meet the requirement for an exploration bond in two ways:

(1) If you have an existing nationwide or statewide oil and gas exploration bond, provide a rider in an amount we have specified to include geothermal resources exploration operations; or

(2) If you must file a new bond for geothermal exploration, the minimum amounts are:

(i) \$5,000 for a single operation;

(ii) \$25,000 for all of your operations within a state; and

(iii) \$50,000 for all of your operations on public lands nationwide.

(b) See subparts 3214 and 3215 for additional details on bonding procedures.

### **§ 3251.15 When will BLM release my bond?**

BLM will release your bond after you request it and we determine that you have:

(a) Plugged and abandoned all wells;

(b) Reclaimed the land and, if necessary, resolved other environmental, cultural, scenic, or recreational issues; and

(c) Complied with the requirements of § 3200.4.

## **Subpart 3252—Conducting Exploration Operations**

### **§ 3252.10 What operational standards apply to my exploration operations?**

You must keep exploration operations under control at all times by:

(a) Conducting training during your operation to ensure that your personnel are capable of performing emergency procedures quickly and effectively;

(b) Using properly maintained equipment; and

(c) Using operational practices that allow for quick and effective emergency response.

### **§ 3252.11 What environmental requirements must I meet when conducting exploration operations?**

(a) You must conduct your exploration operations in a manner that:

(1) Protects the quality of surface and subsurface waters, air, and other natural resources, including wildlife, soil, vegetation, and natural history;

(2) Protects the quality of cultural, scenic, and recreational resources;

## **§ 3252.12**

(3) Accommodates other land uses, as BLM deems necessary; and

(4) Minimizes noise.

(b) You must remove or, with our permission, properly store all equipment and materials not in use.

(c) You must provide and use pits, tanks, and sumps of adequate capacity. They must be designed to retain all materials and fluids resulting from drilling temperature gradient wells or other operations, unless we have specified otherwise in writing. When they are no longer needed, you must properly abandon pits and sumps in accordance with your exploration permit.

(d) BLM may require you to submit a contingency plan describing procedures to protect public health, safety, property, and the environment.

## **§ 3252.12 How deep may I drill a temperature gradient well?**

(a) You may drill a temperature gradient well to any depth that we approve in your exploration permit or sundry notice. In all cases, you may not flow test the well or perform injection tests of the well unless you follow the procedures for geothermal drilling operations in subparts 3260 through 3267.

(b) BLM may modify your permitted depth at any time before or during drilling, if we determine that the bottom hole temperature or other information indicates that drilling to the original permitted depth could directly encounter the geothermal resource or create risks to public health, safety, property, the environment, or other resources.

## **§ 3252.13 How long may I collect information from my temperature gradient well?**

You may collect information from your temperature gradient well for as long as your permit allows.

## **§ 3252.14 How must I complete a temperature gradient well?**

Complete temperature gradient wells to allow for proper abandonment, and to prevent interzonal migration of fluids. Cap all tubing when not in use.

## **43 CFR Ch. II (10–1–08 Edition)**

## **§ 3252.15 When must I abandon a temperature gradient well?**

When you no longer need it, or when BLM requires you to.

## **§ 3252.16 How must I abandon a temperature gradient well?**

(a) Before abandoning your well, submit a complete and signed Sundry Notice, Form 3260-3, describing how you plan to abandon wells and reclaim the surface. Do not begin abandoning wells or reclaiming the surface until BLM approves your Sundry Notice.

(b) You must plug and abandon your well for permanent prevention of interzonal migration of fluids and migration of fluids to the surface. You must reclaim your well location according to the terms of BLM approvals and orders.

## **Subpart 3253—Reports: Exploration Operations**

## **§ 3253.10 Must I share with BLM the data I collect through exploration operations?**

(a) For exploration operations on your geothermal lease, you must submit all data you obtain as a result of the operations with a signed notice of completion of exploration operations under § 3253.11, unless we approve a later submission.

(b) For exploration operations on unleased lands or on leased lands where you are not the lessee or unit operator, you are not required to submit data. However, if you want your exploration operations to count toward your diligent exploration expenditure requirement (see § 3210.13), or if you are making significant expenditures to extend your lease (see § 3208.14), you must send BLM the resulting data under the rules of those sections.

## **§ 3253.11 Must I notify BLM when I have completed my exploration operations?**

After you complete exploration operations, send to BLM a complete and signed notice of completion of exploration operations, describing the exploration operations, well history, completion and abandonment procedures, and site reclamation measures. You

## Bureau of Land Management, Interior

## § 3255.13

must send this to BLM within 30 days after you:

- (a) Complete any geophysical exploration operations;
- (b) Complete the drilling of temperature gradient well(s) approved under your approved Notice of Intent to conduct exploration;
- (c) Plug and abandon a temperature gradient well; and
- (d) Plug shot holes and reclaim all exploration sites.

### Subpart 3254—Inspection, Enforcement, and Noncompliance for Exploration Operations

#### § 3254.10 May BLM inspect my exploration operations?

BLM may inspect your exploration operations to ensure compliance with the requirements of § 3200.4 and the regulations in this subpart.

#### § 3254.11 What will BLM do if my exploration operations are not in compliance with my permit, other BLM approvals or orders, or the regulations in this part?

(a) BLM will issue you a written Incident of Noncompliance and direct you to correct the problem within a set time. If the noncompliance continues or is serious in nature, we will take one or more of the following actions:

- (1) Correct the problem at your expense;
- (2) Direct you to modify or shut down your operations; or
- (3) Collect all or part of your bond.

(b) We may also require you to take actions to prevent unnecessary impacts on the lands. If so, we will notify you of the nature and extent of any required measures and the time you have to complete them.

(c) Noncompliance may result in BLM terminating your lease, if appropriate under §§ 3213.17 through 3213.19.

### Subpart 3255—Confidential, Proprietary Information

#### § 3255.10 Will BLM disclose information I submit under these regulations?

All Federal and Indian data and information submitted to the BLM are

subject to part 2 of this title. Part 2 includes the regulations of the Department of the Interior covering public disclosure of data and information contained in Department records. Certain mineral information not protected from disclosure under part 2 may be made available for inspection without a Freedom of Information Act (FOIA) request.

#### § 3255.11 When I submit confidential, proprietary information, how can I help ensure it is not available to the public?

When you submit data and information that you believe to be exempt from disclosure by 43 CFR part 2, you must clearly mark each page that you believe contains confidential information. BLM will keep all data and information confidential to the extent allowed by 43 CFR 2.13(c).

#### § 3255.12 How long will information I give BLM remain confidential or proprietary?

The FOIA (5 U.S.C. 552) does not provide a finite period of time during which information may be exempt from public disclosure. BLM will review each situation individually and in accordance with part 2 of this title.

#### § 3255.13 How will BLM treat Indian information submitted under the Indian Mineral Development Act?

Under the Indian Mineral Development Act of 1982 (IMDA) (25 U.S.C. 2101 *et seq.*), the Department of the Interior will hold as privileged proprietary information of the affected Indian or Indian tribe:

(a) All findings forming the basis of the Secretary's intent to approve or disapprove any Minerals Agreement under IMDA; and

(b) All projections, studies, data, or other information concerning a Minerals Agreement under IMDA, regardless of the date received, related to:

- (1) The terms, conditions, or financial return to the Indian parties;
- (2) The extent, nature, value, or disposition of the Indian mineral resources; or
- (3) The production, products, or proceeds thereof.

#### § 3255.14

##### **§ 3255.14 How will BLM administer information concerning other Indian minerals?**

For information concerning Indian minerals not covered by § 3255.13, BLM will withhold such records as may be withheld under an exemption to the FOIA when it receives a request for information related to tribal or Indian minerals held in trust or subject to restrictions on alienation.

##### **§ 3255.15 When will BLM consult with Indian mineral owners when information concerning their minerals is the subject of a FOIA request?**

(a) We use the standards and procedures of § 2.15(d) of this title before making a decision about the applicability of FOIA exemption 4 to information obtained from a person outside the United States Government.

(b) BLM will notify the Indian mineral owner(s) identified in the records of the Bureau of Indian Affairs (BIA), and BIA, and give them a reasonable period of time to state objections to disclosure. BLM will issue this notice following consultation with a submitter under § 2.15(d) of this title if:

(1) BLM determines that the submitter does not have an interest in withholding the records that can be protected under FOIA; and

(2) BLM has reason to believe that disclosure of the information may result in commercial or financial injury to the Indian mineral owner(s), but is uncertain that such is the case.

#### **Subpart 3256—Exploration Operations Relief and Appeals**

##### **§ 3256.10 How do I request a variance from BLM requirements that apply to my exploration operations?**

(a) You may submit a request for a variance for your exploration operations from any requirement in § 3200.4. Your request must include enough information to explain:

(1) Why you cannot comply with the regulatory requirement; and

(2) Why you need the variance to control your well, conserve natural resources, or protect public health and safety, property, or the environment.

(b) BLM may approve your request orally or in writing. If we give you an

#### 43 CFR Ch. II (10–1–08 Edition)

oral approval, we will follow up with written confirmation.

##### **§ 3256.11 How may I appeal a BLM decision regarding my exploration operations?**

You may appeal a BLM decision regarding your exploration operations in accordance with § 3200.5.

#### **Subpart 3260—Geothermal Drilling Operations—General**

##### **§ 3260.10 What types of geothermal drilling operations are covered by these regulations?**

(a) The regulations in subparts 3260 through 3267 establish permitting and operating procedures for drilling wells and conducting related activities for the purposes of performing flow tests, producing geothermal fluids, or injecting fluids into a geothermal reservoir. These subparts also address redrilling, deepening, plugging back, and other subsequent well operations.

(b) The operations regulations in subparts 3260 through 3267 do not address conducting exploration operations, which are covered in subpart 3250, or geothermal resources utilization, which is covered in subpart 3270.

##### **§ 3260.11 What general standards apply to my drilling operations?**

Your drilling operations must:

(a) Meet all environmental and operational standards;

(b) Prevent unnecessary impacts on surface and subsurface resources;

(c) Conserve geothermal resources and minimize waste;

(d) Protect public health, safety, and property; and

(e) Comply with the requirements of § 3200.4.

##### **§ 3260.12 What other orders or instructions may BLM issue?**

BLM may issue:

(a) Geothermal resource operational orders for detailed requirements that apply nationwide;

(b) Notices to Lessees for detailed requirements on a statewide or regional basis;

(c) Other orders and instructions specific to a field or area;

## Bureau of Land Management, Interior

## § 3261.13

(d) Permit conditions of approval; and

(e) Oral orders, which will be confirmed in writing.

### Subpart 3261—Drilling Operations: Getting a Permit

#### § 3261.10 How do I get approval to begin well pad construction?

(a) If you do not have an approved geothermal drilling permit, Form 3260-2, apply using a completed and signed Sundry Notice, Form 3260-3, to build well pads and access roads. Send us a complete operations plan (see § 3261.12) and an acceptable bond with your Sundry Notice. You may start well pad construction after we approve your Sundry Notice.

(b) If you already have an approved drilling permit and you have provided an acceptable bond, you do not need any further permission from BLM to start well pad construction, unless you intend to change something in the approved permit. If you propose a change in an approved permit, send us a completed and signed Sundry Notice so we may review your proposed change. Do not proceed with the change until we approve your Sundry Notice.

#### § 3261.11 How do I apply for approval of drilling operations and well pad construction?

(a) Send to BLM:

(1) A completed and signed drilling permit application, Form 3260-2;

(2) A complete operations plan (§ 3261.12);

(3) A complete drilling program (§ 3261.13); and

(4) An acceptable bond (§ 3261.18).

(b) Do not start any drilling operations until after BLM approves the permit.

#### § 3261.12 What is an operations plan?

An operations plan describes how you will drill for and test the geothermal resources covered by your lease. Your plan must tell BLM enough about your proposal to allow us to assess the environmental impacts of your operations. This information should generally include:

(a) Well pad layout and design;

(b) A description of existing and planned access roads;

(c) A description of any ancillary facilities;

(d) The source of drill pad and road building material;

(e) The water source;

(f) A statement describing surface ownership;

(g) A description of procedures to protect the environment and other resources;

(h) Plans for surface reclamation; and

(i) Any other information that BLM may require.

#### § 3261.13 What is a drilling program and how do I apply for drilling program approval?

(a) A drilling program describes all the operational aspects of your proposal to drill, complete, and test a well.

(b) Send to BLM:

(1) A detailed description of the equipment, materials, and procedures you will use;

(2) The proposed/anticipated depth of the well;

(3) If you plan to directionally drill your well, also send us:

(i) The proposed bottom hole location and distances from the nearest section or tract lines;

(ii) The kick-off point;

(iii) The direction of deviation;

(iv) The angle of build-up and maximum angle; and

(v) Plan and cross section maps indicating the surface and bottom hole locations;

(4) The casing and cementing program;

(5) The circulation media (mud, air, foam, etc.);

(6) A description of the logs that you will run;

(7) A description and diagram of the blowout prevention equipment you will use during each phase of drilling;

(8) The expected depth and thickness of fresh water zones;

(9) Anticipated lost circulation zones;

(10) Anticipated reservoir temperature and pressure;

(11) Anticipated temperature gradient in the area;

#### § 3261.14

(12) A plat certified by a licensed surveyor showing the surveyed surface location and distances from the nearest section or tract lines;

(13) Procedures and durations of well testing; and

(14) Any other information we may require.

#### § 3261.14 When must I give BLM my operations plan?

Send us a complete operations plan before you begin any surface disturbance on a lease. You do not need to submit an operations plan for subsequent well operations or altering existing production equipment, unless these activities will cause more surface disturbance than originally approved, or we notify you that you must submit an operations plan. Do not start any activities that will result in surface disturbance until we approve your drilling permit or Sundry Notice.

#### § 3261.15 Must I give BLM my drilling permit application, drilling program, and operations plan at the same time?

You may submit your completed and signed drilling permit application and complete drilling program and operations plan either together or separately.

(a) If you submit them together and we approve your drilling permit, the approved drilling permit will authorize both the pad construction and the drilling and testing of the well.

(b) If you submit the operations plan separately from the drilling permit application and program, you must:

(1) Submit the operations plan before the drilling permit application and drilling program to allow BLM time to comply with National Environmental Policy Act (NEPA); and

(2) Submit a completed and signed Sundry Notice for well pad and access road construction. Do not begin construction until we approve your Sundry Notice.

#### § 3261.16 Can my operations plan, drilling permit, and drilling program apply to more than one well?

(a) Your operations plan and drilling program can sometimes be combined to cover several wells, but your drilling permit cannot. To include more than

#### 43 CFR Ch. II (10–1–08 Edition)

one well in your operations plan, give us adequate information for all well sites, and we will combine your plan to cover those well sites that are in areas of similar geology and environment.

(b) Your drilling program may also apply to more than one well, provided you will drill the wells in the same manner, and you expect to encounter similar geologic and reservoir conditions.

(c) You must submit a separate geothermal drilling permit application for each well.

#### § 3261.17 How do I amend my operations plan or drilling permit?

(a) If BLM has not yet approved your operations plan or drilling permit, send us your amended plan and completed and signed permit application.

(b) To amend an approved operations plan or drilling permit, submit a completed and signed Sundry Notice describing your proposed change. Do not start any amended operations until after BLM approves your drilling permit or Sundry Notice.

#### § 3261.18 Do I need to file a bond with BLM before I build a well pad or drill a well?

Before starting any operation, you must:

(a) File with BLM either a surety or personal bond in the following minimum amount:

(1) \$10,000 for a single lease;

(2) \$50,000 for all of your operations within a state; or

(3) \$150,000 for all of your operations nationwide;

(b) Get our approval of your surety or personal bond; and

(c) To cover any drilling operations on all leases committed to a unit, either submit a bond for that unit in an amount we specify, or provide a rider to a statewide or nationwide bond specifically covering the unit in an amount we specify.

(d) See subparts 3214 and 3215 for additional details on bonding procedures.

#### § 3261.19 When will BLM release my bond?

BLM will release your bond after you request it and we determine that you have:

## Bureau of Land Management, Interior

## § 3262.10

- (a) Plugged and abandoned all wells;
- (b) Reclaimed the surface and other resources; and
- (c) Met all the requirements of § 3200.4.

### **§ 3261.20 How will BLM review applications submitted under this subpart and notify me of its decision?**

- (a) When we receive your operations plan, we will make sure it is complete and review it for compliance with the requirements of § 3200.4.
- (b) If another Federal agency manages the surface of your lease, we will consult with it before we approve your drilling permit.
- (c) We will review your drilling permit and drilling program or your Sundry Notice for well pad construction, to make sure they conform with your operations plan and any mitigation measures we developed while reviewing your plan.
- (d) We will check your drilling permit and drilling program for technical adequacy and may require additional information.
- (e) We will check your drilling permit for compliance with the requirements of § 3200.4.
- (f) If we need any further information to complete our review, we will contact you in writing and suspend our review until we receive the information.
- (g) After our review, we will notify you as to whether your permit has been approved or denied, as well as any conditions of approval.

### **§ 3261.21 How do I get approval to change an approved drilling operation?**

- (a) Send BLM a Sundry Notice, form 3260-3, describing the proposed changes. Do not proceed with the changes until we have approved them in writing, except as provided in paragraph (c) of this section. If your operations such as redrilling, deepening, drilling a new directional leg, or plugging back a well would significantly change your approved permit, BLM may require you to send us a new drilling permit (see 43 CFR 3261.13). A significant change would be, for example, redrilling the well to a completely different target, especially a target in an unknown area.
- (b) If your changed drilling operation would cause additional surface distur-

ance, we may also require you to submit an amended operations plan.

- (c) If immediate action is required to properly continue drilling operations, or to protect public health, safety, property or the environment, BLM may provide oral approval to change an approved drilling operation. However, you must submit a written Sundry Notice within 48 hours after we orally approve your change.

### **§ 3261.22 How do I get approval for subsequent well operations?**

Send BLM a Sundry Notice describing your proposed operation. For some routine work, such as cleanouts, surveys, or general maintenance (see § 3264.11(b)), we may waive the Sundry Notice requirement. Contact your local BLM office to ask about waivers for subsequent well operations. Unless you receive a waiver, you must submit a Sundry Notice. Do not start your operations until we grant a waiver or approve the Sundry Notice.

## **Subpart 3262—Conducting Drilling Operations**

### **§ 3262.10 What operational requirements must I meet when drilling a well?**

- (a) When drilling a well, you must:
  - (1) Keep the well under control at all times by:
    - (i) Conducting training during your operation to maintain the capability of your personnel to perform emergency procedures quickly and effectively;
    - (ii) Using properly maintained equipment; and
    - (iii) Using operational practices that allow for quick and effective emergency response.
  - (b) You must use sound engineering principles and take into account all pertinent data when:
    - (1) Selecting and using drilling fluid types and weights;
    - (2) Designing and implementing a system to control fluid temperatures;
    - (3) Designing and using blowout prevention equipment; and
    - (4) Designing and implementing a casing and cementing program.
  - (c) Your operation must always comply with the requirements of § 3200.4.

## **§ 3262.11**

### **§ 3262.11 What environmental requirements must I meet when drilling a well?**

(a) You must conduct your operations in a manner that:

(1) Protects the quality of surface and subsurface water, air, natural resources, wildlife, soil, vegetation, and natural history;

(2) Protects the quality of cultural, scenic, and recreational resources;

(3) Accommodates, as necessary, other land uses;

(4) Minimizes noise; and

(5) Prevents property damage and unnecessary or undue degradation of the lands.

(b) You must remove or, with BLM's approval, properly store all equipment and materials that are not in use.

(c) You must retain all fluids from drilling and testing the well in properly designed pits, sumps, or tanks.

(d) When you no longer need a pit or sump, you must abandon it and restore the site as we direct.

(e) BLM may require you to give us a contingency plan showing how you will protect public health and safety, property, and the environment.

### **§ 3262.12 Must I post a sign at every well?**

Yes. Before you begin drilling a well, you must post a sign in a conspicuous place and keep it there throughout operations until the well site is reclaimed. Put the following information on the sign:

(a) The lessee or operator's name;

(b) Lease serial number;

(c) Well number; and

(d) Well location described by township, range, section, quarter-quarter section or lot.

### **§ 3262.13 May BLM require me to follow a well spacing program?**

BLM may require you to follow a well spacing program if we determine that it is necessary for proper development. If we require well spacing, we will consider the following factors when we set well spacing:

(a) Hydrologic, geologic, and reservoir characteristics of the field, minimizing well interference;

(b) Topography;

## **43 CFR Ch. II (10–1–08 Edition)**

(c) Interference with multiple use of the land; and

(d) Environmental protection, including ground water.

### **§ 3262.14 May BLM require me to take samples or perform tests and surveys?**

(a) BLM may require you to take samples or to test or survey the well to determine:

(1) The well's mechanical integrity;

(2) The identity and characteristics of formations, fluids, or gases;

(3) Presence of geothermal resources, water, or reservoir energy;

(4) Quality and quantity of geothermal resources;

(5) Well bore angle and direction of deviation;

(6) Formation, casing, or tubing pressures;

(7) Temperatures;

(8) Rate of heat or fluid flow; and

(9) Any other necessary well information.

(b) See § 3264.11 for information on reporting requirements.

## **Subpart 3263—Well Abandonment**

### **§ 3263.10 May I abandon a well without BLM's approval?**

(a) You must have a BLM-approved Sundry Notice documenting your plugging and abandonment program before you start abandoning any well.

(b) You must also notify the local BLM office before you begin abandonment activities, so that we may witness the work. Contact your local BLM office before starting to abandon your well to find out what notification we need.

### **§ 3263.11 What information must I give BLM to approve my Sundry Notice for abandoning a well?**

Send us a Sundry Notice with:

(a) All the information required in the well completion report (see § 3264.10), unless we already have that information;

(b) A detailed description of the proposed work, including:

(1) Type, depth, length, and interval of plugs;

(2) Methods you will use to verify the plugs (tagging, pressure testing, etc.);

## Bureau of Land Management, Interior

## § 3264.11

(3) Weight and viscosity of mud that you will use in the uncemented portions;

(4) Perforating or removing casing; and

(5) Restoring the surface; and

(c) Any other information that we may require.

### **§ 3263.12 How will BLM review my Sundry Notice to abandon my well and notify me of their decision?**

(a) When BLM receives your Sundry Notice, we will make sure it is complete and review it for compliance with the requirements of § 3200.4. We will notify you if we need more information or require additional procedures. If we need any further information to complete our review, we will contact you in writing and suspend our review until we receive the information. If we approve your Sundry Notice, we will send you an approved copy once our review is complete. Do not start abandonment of the well until we approve your Sundry Notice.

(b) BLM may orally approve plugging procedures for a well requiring immediate action. If we do, you must submit the information required in § 3263.11 within 48 hours after we give oral approval.

### **§ 3263.13 What must I do to restore the site?**

You must remove all equipment and materials and restore the site according to the terms of your permit or other BLM approval.

### **§ 3263.14 May BLM require me to abandon a well?**

If we determine that your well is no longer needed for geothermal resource production, injection, or monitoring, or if we determine that the well is not mechanically sound, BLM may order you to abandon the well. In either case, if you disagree you may explain to us why the well should not be abandoned. We will consider your reasons before we issue any final order.

### **§ 3263.15 May I abandon a producible well?**

(a) You may abandon a producible well only after you receive BLM's approval. Before abandoning a producing

well, send BLM the information listed in § 3263.11. We may also require you to explain why you want to abandon the well.

(b) BLM will deny your request if we determine that the well is needed:

(1) To protect a Federal lease from drainage; or

(2) To protect the environment or other resources of the United States.

## **Subpart 3264—Reports—Drilling Operations**

### **§ 3264.10 What must I submit to BLM after I complete a well?**

You must submit a Geothermal Well Completion Report, Form 3260-4, within 30 days after you complete a well. Your report must include the following:

(a) A complete, chronological well history;

(b) A copy of all logs;

(c) Copies of all directional surveys; and

(d) Copies of all mechanical, flow, reservoir, and other test data.

### **§ 3264.11 What must I submit to BLM after I finish subsequent well operations?**

(a) Submit to BLM a subsequent well operations report within 30 days after completing operations. At a minimum, this report must include:

(1) A complete, chronological history of the work done;

(2) A copy of all logs;

(3) Copies of all directional surveys;

(4) The results of all sampling, tests, or surveys we require you to make (see § 3262.14);

(4) Copies of all mechanical, flow, reservoir, and other test data; and

(5) A statement of whether you achieved your goals. For example, if the well was acidized to increase production, state whether the production rate increased when you put the well back on line.

(b) We may waive this reporting requirement for work we determine to be routine, such as cleanouts, surveys, or general maintenance. To request a waiver, contact BLM. If you do not receive a waiver, you must submit the report.

## **§ 3264.12**

### **§ 3264.12 What must I submit to BLM after I abandon a well?**

Send us a well abandonment report within 30 days after you abandon a well. If you plan to restore the site at a later date, you may submit a separate report within 30 days after completing site restoration. The well abandonment report must contain:

- (a) A complete chronology of all work done;
- (b) A description of each plug, including:
  - (1) Type and amount of cement used;
  - (2) Depth that the drill pipe or tubing was run to set the plug;
  - (3) Depth to top of plug; and
  - (4) If the plug was verified, whether it was done by tagging or pressure testing; and
- (c) A description of surface restoration procedures.

### **§ 3264.13 What drilling and operational records must I maintain for each well?**

You must keep the following information for each well, and make it available for BLM to inspect, upon request:

- (a) A complete and accurate drilling log, in chronological order;
- (b) All other logs;
- (c) Water or steam analyses;
- (d) Hydrologic or heat flow tests;
- (e) Directional surveys;
- (f) A complete log of all subsequent well operations, such as cementing, perforating, acidizing, and well cleanouts; and
- (g) Any other information regarding the well that could affect its status.

### **§ 3264.14 How do I notify BLM of accidents occurring on my lease?**

You must orally inform us of all accidents that affect operations or create environmental hazards within 24 hours of the accident. When you contact us, we may require you to submit a written report fully describing the incident.

## **43 CFR Ch. II (10–1–08 Edition)**

### **Subpart 3265—Inspection, Enforcement, and Noncompliance for Drilling Operations**

#### **§ 3265.10 What part of my drilling operations may BLM inspect?**

(a) BLM may inspect all of your Federal drilling operations regardless of surface ownership. We will inspect your operations for compliance with the requirements of § 3200.4.

(b) BLM may inspect all of your maps, well logs, surveys, records, books, and accounts related to your Federal drilling operations.

#### **§ 3265.11 What records must I keep available for inspection?**

You must keep a complete record of all aspects of your activities related to your drilling operation available for our inspection. Store these records in a place which makes them conveniently available to us. Examples of records which we may inspect include:

- (a) Well logs and maps;
- (b) Records, books, and accounts related to your Federal drilling operations;
- (c) Directional surveys;
- (d) Records pertaining to casing type and setting;
- (e) Records pertaining to formations penetrated;
- (f) Well test results;
- (g) Records pertaining to characteristics of the geothermal resource;
- (h) Records pertaining to emergency procedure training; and
- (i) Records pertaining to operational problems.

#### **§ 3265.12 What will BLM do if my operations do not comply with my permit and applicable regulations?**

(a) We will issue you a written Incident of Noncompliance, directing you to take required corrective action within a specific time period. If the noncompliance continues or is of a serious nature, we will take one or more of the following actions:

- (1) Enter your lease, and correct any deficiencies at your expense;
- (2) Collect all or part of your bond;
- (3) Direct modification or shutdown of your operations; and
- (4) Take other enforcement action under subpart 3213 against a lessee who

## Bureau of Land Management, Interior

## § 3270.11

is ultimately responsible for non-compliance.

(b) Noncompliance may result in BLM terminating your lease. See §§ 3213.17 through 3213.19.

### Subpart 3266—Confidential, Proprietary Information

#### § 3266.10 Will BLM disclose information I submit under these regulations?

All Federal and Indian data and information submitted to the BLM are subject to part 2 of this title. Part 2 includes the Department of the Interior regulations covering public disclosure of data and information contained in Department records. Certain mineral information not protected from disclosure under part 2 of this title may be made available for inspection without a Freedom of Information Act (FOIA) request. BLM will not treat surface location, surface elevation, or well status information as confidential.

#### § 3266.11 When I submit confidential, proprietary information, how can I help ensure that it is not available to the public?

When you submit data and information that you believe to be exempt from disclosure by part 2 of this title, you must clearly mark each page that you believe contains confidential information. BLM will keep all data and information confidential to the extent allowed by § 2.13(c) of this title.

#### § 3266.12 How long will information I give BLM remain confidential or proprietary?

The FOIA does not provide a finite period of time during which information may be exempt from public disclosure. BLM reviews each situation individually and in accordance with part 2 of this title.

### Subpart 3267—Geothermal Drilling Operations Relief and Appeals

#### § 3267.10 How do I request a variance from BLM requirements that apply to my drilling operations?

(a) You may file a request for a variance from the requirements of § 3200.4 for your approved drilling operations.

Your request must include enough information to explain:

(1) Why you cannot comply with the requirements of § 3200.4; and

(2) Why you need the variance to control your well, conserve natural resources, or protect public health and safety, property, or the environment.

(b) We may approve your request orally or in writing. If BLM gives you an oral approval, we will follow up with written confirmation.

#### § 3267.11 How may I appeal a BLM decision regarding my drilling operations?

You may appeal our decisions regarding your drilling operations in accordance with § 3200.5.

### Subpart 3270—Utilization of Geothermal Resources—General

#### § 3270.10 What types of geothermal operations are governed by these utilization regulations?

(a) The regulations in subparts 3270 through 3279 of this part cover the permitting and operating procedures for the utilization of geothermal resources. This includes:

- (1) Electrical generation facilities;
- (2) Direct use facilities;
- (3) Related utilization facility operations;
- (4) Actual and allocated well field production and injection; and
- (5) Related well field operations.

(b) The utilization regulations in subparts 3270 through 3279 do not address conducting exploration operations, which is covered in subpart 3250, or drilling wells intended for production or injection, which is covered in subpart 3260.

#### § 3270.11 What general standards apply to my utilization operations?

Your utilization operations must:

- (a) Meet all operational and environmental standards;
- (b) Prevent unnecessary impacts on surface and subsurface resources;
- (c) Result in the maximum ultimate recovery of geothermal resources;
- (d) Result in the beneficial use of geothermal resources, with minimum waste;

## § 3270.12

- (e) Protect public health, safety, and property; and
- (f) Comply with the requirements of § 3200.4.

### **§ 3270.12 What other orders or instructions may BLM issue?**

BLM may issue:

- (a) Geothermal resource operational orders, for detailed requirements that apply nationwide;
- (b) Notices to lessees, for detailed requirements on a statewide or regional basis;
- (c) Other orders and instructions specific to a field or area;
- (d) Permit conditions of approval; and
- (e) Oral orders, which BLM will confirm in writing.

## **Subpart 3271—Utilization Operations: Getting a Permit**

### **§ 3271.10 What do I need to start preparing a site and building and testing a utilization facility on Federal land leased for geothermal resources?**

In order to use Federal land to produce geothermal power, you must obtain a site license and construction permit from BLM before you start preparing the site. Send BLM a plan that shows what you want to do, and draft a proposed site license agreement that you think is fair and reasonable. We will review your proposal and decide whether to give you a permit and license to proceed with work on the site.

### **§ 3271.11 Who may apply for a permit to build a utilization facility?**

The lessee, the facility operator, or the unit operator may apply to build a utilization facility.

### **§ 3271.12 What do I need to start preliminary site investigations that may disturb the surface?**

- (a) You must:
  - (1) Fully describe your proposed operations in a Sundry Notice; and
  - (2) File a bond meeting the requirements of either § 3251.14 or § 3273.19. See subparts 3214 and 3215 for additional details on bonding procedures.
- (b) Do not begin the site investigation or surface disturbing activity

## 43 CFR Ch. II (10–1–08 Edition)

until BLM approves your Sundry Notice and bond.

### **§ 3271.13 How do I obtain approval to build pipelines and facilities connecting the well field to utilization facilities not located on Federal lands leased for geothermal resources?**

Before constructing pipelines and well field facilities on Federal lands leased for geothermal resources, you as lessee, unit operator, or facility operator must submit to BLM a utilization plan and facility construction permit addressing any pipelines or facilities. Do not start construction of your pipelines or facilities until BLM approves your facility construction permit.

### **§ 3271.14 What do I need to do to start building and testing a utilization facility if it is not located on Federal lands leased for geothermal resources?**

- (a) You do not need a BLM permit to construct a facility located on either:
  - (1) Private land; or
  - (2) Lands where the surface is privately owned and BLM has leased the underlying Federal geothermal resources, when the facility will utilize Federal geothermal resources.
- (b) Before testing a utilization facility that is not located on Federal lands leased for geothermal resources, send us a Sundry Notice describing the testing schedule and the quantity of Federal geothermal resources you expect to be delivered to the facility during the testing. Do not start delivering Federal geothermal resources to the facility until we approve your Sundry Notice.

### **§ 3271.15 How do I get a permit to begin commercial operations?**

Before using Federal geothermal resources, you as lessee, operator, or facility operator must send us a completed commercial use permit (see § 3274.11). This also applies when you use Federal resources allocated through any form of agreement. Do not start any commercial use operations until BLM approves your commercial use permit.

**Subpart 3272—Utilization Plan and Facility Construction Permit**

**§ 3272.10 What must I submit to BLM in my utilization plan?**

Submit to BLM an application describing:

(a) The proposed facilities as required by § 3272.11; and

(b) The anticipated environmental impacts and how you propose to mitigate those impacts, as required by § 3272.12.

**§ 3272.11 How do I describe the proposed utilization facility?**

Your submission must include:

(a) A generalized description of all proposed structures and facilities, including their size, location, and function;

(b) A generalized description of proposed facility operations, including estimated total production and injection rates; estimated well flow rates, pressures, and temperatures; facility net and gross electrical generation; and, if applicable, interconnection with other utilization facilities. If it is a direct use facility, send us the information we need to determine the amount of resource utilized;

(c) A contour map of the entire utilization site, showing production and injection well pads, pipeline routes, facility locations, drainage structures, existing and planned access, and lateral roads;

(d) A description of site preparation and associated surface disturbance, including the source for site or road building materials, amounts of cut and fill, drainage structures, analysis of all site evaluation studies prepared for the site(s), and a description of any additional tests, studies, or surveys which are planned to assess the geologic suitability of the site(s);

(e) The source, quality, and proposed consumption rate of water to be used during facility operations, and the source and quantity of water to be used during facility construction;

(f) The methods for meeting air quality standards during facility construction and operation, especially standards concerning non-condensable gases;

(g) An estimated number of personnel needed during construction and operation of the facility;

(h) A construction schedule;

(i) A schedule for testing of the facility and/or well equipment, and for the start of commercial operations;

(j) A description of architectural landscaping or other measures to minimize visual impacts; and

(k) Any additional information or data that we may require.

**§ 3272.12 What environmental protection measures must I include in my utilization plan?**

(a) Describe, at a minimum, your proposed measures to:

(1) Prevent or control fires;

(2) Prevent soil erosion;

(3) Protect surface or ground water;

(4) Protect fish and wildlife;

(5) Protect cultural, visual, and other natural resources;

(6) Minimize air and noise pollution; and

(7) Minimize hazards to public health and safety during normal operations.

(b) If BLM requires it, you must also describe how you will monitor your facility operations to ensure that they comply with the requirements of § 3200.4, and applicable noise, air, and water quality standards, at all times. We will consult with other involved surface management agencies, if any, regarding monitoring requirements. You must also include provisions for monitoring other environmental parameters we may require.

(c) Based on what level of impacts that BLM finds your operations may cause, we may require you to collect data concerning existing air and water quality, noise, seismicity, subsidence, ecological systems, or other environmental information for up to 1 year before you begin operating. BLM must approve your data collection methodologies, and will consult with any other surface managing agencies involved.

(d) You must also describe how you will abandon utilization facilities and restore the site, in order to comply with the requirements of § 3200.4.

(e) Finally, you must submit any additional information or data that BLM may require.

## **§ 3272.13**

### **§ 3272.13 How will BLM review my utilization plan and notify me of its decision?**

(a) When BLM receives your utilization plan, we will make sure it is complete and review it for compliance with § 3200.4.

(b) If another Federal agency manages the surface of your lease, we will consult with that agency as part of the plan review.

(c) If we need any further information to complete our review, we will contact you in writing and suspend our review until we receive the information.

(d) We will notify you in writing of our decision on your plan.

### **§ 3272.14 How do I get a permit to build or test my facility?**

(a) Before building or testing a utilization facility, you must submit to BLM a:

- (1) Utilization plan;
- (2) Completed and signed facility construction permit; and
- (3) Completed and signed site license. (See subpart 3273.)

(b) Do not start building or testing your utilization facility until we have approved both your facility construction permit and your site license.

(c) After our review, we will notify you whether we have approved or denied your permit, as well as of any conditions we require for conducting operations.

## **Subpart 3273—How To Apply for a Site License**

### **§ 3273.10 When do I need a site license for a utilization facility?**

You must obtain a site license approved by BLM, unless your facility will be located on lands leased as described in § 3273.11. Do not start building or testing your utilization facility on public lands leased for geothermal resources until BLM has approved both your facility construction permit (see § 3272.14) and your site license. The facility operator must apply for the license.

## **43 CFR Ch. II (10–1–08 Edition)**

### **§ 3273.11 When is a site license unnecessary?**

You do not need a site license if your facility will be located:

(a) On private land or on split estate land where the United States does not own the surface; or

(b) On Federal land not leased for geothermal resources. In this situation, the Federal surface management agency will issue you the permit you need.

### **§ 3273.12 How will BLM review my site license application?**

(a) When BLM receives your site license application, we will make sure it is complete. If we need more information for our review, we will ask you for that information and stop our review until we receive the information.

(b) If your site license is located on geothermal leases where the surface is managed by the Department of Agriculture, we will consult with that agency and obtain concurrence before we approve your application. The agency may require additional license terms and conditions.

(c) If the land is subject to section 24 of the Federal Power Act, we will issue the site license with the terms and conditions requested by the Federal Energy Regulatory Commission.

(d) If another Federal agency manages the surface, we will consult with them to determine if they recommend additional license terms and conditions.

(e) After our review, we will notify you whether we approved or denied your license, as well as any additional conditions we require.

### **§ 3273.13 What lands are not available for geothermal site licenses?**

BLM will not issue site licenses under these regulations for lands that are not leased or not available for geothermal leasing (see § 3201.11).

### **§ 3273.14 What area does a site license cover?**

A site license covers a reasonably compact tract of Federal land, limited to as much of the surface as is necessary to utilize geothermal resources. That means the site license area will only include the utilization facility

## Bureau of Land Management, Interior

## § 3273.21

itself and other necessary structures, such as substations and processing, repair, or storage facility areas.

### **§ 3273.15 What must I include in my site license application?**

Your site license application must include:

(a) A description of the boundaries of the land applied for, as determined by a certified licensed surveyor. Describe the land by legal subdivision, section, township and range, or by approved protraction surveys, if applicable;

(b) The affected acreage;

(c) The filing fee for a site license application found in the fee schedule in § 3000.12 of this chapter;

(d) A site license bond (see § 3273.19);

(e) The first year's rent, if applicable (see § 3273.18); and

(f) Documentation that the lessee or unit operator accepts the siting of the facility, if the facility operator is neither the lessee nor the unit operator.

[72 FR 24400, May 2, 2007, as amended at 72 FR 50887, Sept. 5, 2007]

### **§ 3273.16 What is the annual rent for a site license?**

BLM will specify the annual rent in your license and the date you must pay it, if you are required to pay rent (see § 3273.18). Your rent will be at least \$100 per acre or fraction thereof for an electrical generation facility, and at least \$10 per acre or fraction thereof for a direct use facility. Send the first year's rent to BLM, and all subsequent rental payments to MMS under 30 CFR part 218.

### **§ 3273.17 When may BLM reassess the annual rent for my site license?**

BLM may reassess the rent for lands covered by the license, beginning with the 10th year and every 10 years after that.

### **§ 3273.18 What facility operators must pay the annual site license rent?**

If you are a lessee siting a utilization facility on your own lease, or a unit operator siting a utilization facility on leases committed to the unit, you are not required to pay rent. Only a facility operator who is not also a lessee or unit operator must pay rent.

### **§ 3273.19 What are the bonding requirements for a site license?**

(a) For an electrical generation facility, the facility operator must submit a surety or personal bond to BLM for at least \$100,000 that meets the requirements of subpart 3214. BLM may increase the required bond amount. See subparts 3214 and 3215 for additional details on bonding procedures.

(b) For a direct use facility, the facility operator must submit a surety or personal bond to BLM that meets the requirements of subpart 3214 in an amount BLM will specify.

(c) The bond's terms must cover compliance with the requirements of § 3200.4.

(d) Until BLM approves your bond, do not start construction, testing, or any other activity that would disturb the surface.

### **§ 3273.20 When will BLM release my bond?**

We will release your bond after you request it and we determine that you have:

(a) Removed the utilization facility and all associated equipment;

(b) Reclaimed the land; and

(c) Met all the requirements of § 3200.4.

### **§ 3273.21 What are my obligations under the site license?**

As the facility operator, you:

(a) Must comply with the requirements of § 3200.4;

(b) Are liable for all damages to the lands, property, or resources of the United States caused by yourself, your employees, or your contractors or their employees;

(c) Must indemnify the United States against any liability for damages or injury to persons or property arising from the occupancy or use of the lands authorized under the site license; and

(d) Must restore any disturbed surface, and remove all structures when they are no longer needed for facility construction or operation. This includes the utilization facility if you cannot operate the facility and you are not diligent in your efforts to return the facility to operation.

## **§ 3273.22**

### **§ 3273.22 How long will my site license remain in effect?**

(a) The primary term of a site license is 30 years, with a preferential right to renew the license under terms and conditions set by BLM.

(b) If your lease on which the licensed site is located ends, you may apply for a facility permit under Section 501 of FLPMA, 43 U.S.C. 1761, if your facility is on BLM-managed lands. Otherwise, you must get permission from the surface management agency to continue using the surface for your facility.

### **§ 3273.23 May I renew my site license?**

(a) You have a preferential right to renew your site license under terms and conditions BLM determines.

(b) If your site license is located on leased lands managed by the Department of Agriculture, we will consult with the surface management agency and obtain concurrence before renewing your license. The agency may require additional license terms and conditions. If another Federal agency manages the surface, we will consult with them before granting your renewal.

### **§ 3273.24 When may BLM terminate my site license?**

(a) BLM may terminate a site license by written order. We may terminate your site license if you:

(1) Do not comply with the requirements of §3270.11; or

(2) Do not comply with the requirements of §3200.4.

(b) To prevent termination, you must correct the violation within 30 days after you receive a correction order from BLM, unless we determine that:

(1) The violation cannot be corrected within 30 days; and

(2) You are diligently attempting to correct it.

### **§ 3273.25 When may I relinquish my site license?**

You may request approval to relinquish your site license by sending BLM a written notice requesting relinquishment review and approval. We will not approve the relinquishment until you comply with §3273.21.

## **43 CFR Ch. II (10–1–08 Edition)**

### **§ 3273.26 When may I assign or transfer my site license?**

You may assign or transfer your site license in whole or in part. Send BLM your completed and signed transfer application and the filing fee for assignment or transfer of site license found in the fee schedule in §3000.12 of this chapter. Your application must include a written statement that the transferee will comply with all license terms and conditions, and that the lessee accepts the transfer. The transferee must submit a bond meeting the requirements of §3273.19. The transfer is not effective until we approve the bond and site license transfer.

[72 FR 24400, May 2, 2007, as amended at 72 FR 50887, Sept. 5, 2007]

## **Subpart 3274—Applying for and Obtaining a Commercial Use Permit**

### **§ 3274.10 Do I need a commercial use permit to start commercial operations?**

You must have a commercial use permit approved by BLM before you begin commercial operations from a Federal lease, a Federal unit, or a utilization facility.

### **§ 3274.11 What must I give BLM to approve my commercial use permit application?**

Submit a completed and signed commercial permit form, to BLM, containing the following information:

(a) The design specifications, and the inspection and calibration schedule of production, injection, and royalty meters;

(b) A schematic diagram of the utilization site or individual well, showing the location of each production and royalty meter. If the sales point is located off the utilization site, give us a generalized schematic diagram of the electrical transmission or pipeline system, including meter locations;

(c) A copy of the sales contract for the sale and/or utilization of geothermal resources;

(d) A description and analysis of reservoir, production, and injection characteristics, including the flow rates,

## Bureau of Land Management, Interior

## § 3275.11

temperatures, and pressures of each production and injection well;

(e) A schematic diagram of each production and injection well showing the wellhead configuration, including meters;

(f) A schematic flow diagram of the utilization facility, including interconnections with other facilities, if applicable;

(g) A description of the utilization process in sufficient detail to enable BLM to determine whether the resource will be utilized in a manner consistent with law and regulations;

(h) The planned safety provisions for emergency shutdown to protect public health, safety, property, and the environment. This should include a schedule for the testing and maintenance of safety devices;

(i) The environmental and operational parameters that will be monitored during the operation of the facility and/or well(s); and

(j) Any additional information or data that we may require.

### **§ 3274.12 How will BLM review my commercial use permit application?**

(a) When BLM receives your completed and signed commercial use permit application, we will make sure it is complete and review it for compliance with § 3200.4.

(b) If another Federal agency manages the surface of your lease, we will consult with that agency before we approve your commercial use permit.

(c) We will review your commercial use permit to make sure it conforms with your utilization plan and any mitigation measures we developed while reviewing your plan.

(d) We will check your commercial use permit for technical adequacy, and will ensure that your meters meet the accuracy standards (see §§ 3275.14 and 3275.15).

(e) If we need any further information to complete our review, we will contact you in writing and suspend our review until we receive the information.

(f) After our review, we will notify you whether your permit has been approved or denied, as well as any conditions of approval.

### **§ 3274.13 May I get a permit even if I cannot currently demonstrate I can operate within required standards?**

Yes, but we may limit your operations to a prescribed set of activities and a set period of time, during which we will give you a chance to show you can operate within environmental and operational standards, based on actual facility and well data you collect. Send us a Sundry Notice to get BLM approval for extending your permit. If during this set time period you still cannot demonstrate your ability to operate within the required standards, we will terminate your authorization. You must then stop all operations and restore the surface to the standards we set in the termination notice.

## **Subpart 3275—Conducting Utilization Operations**

### **§ 3275.10 How do I change my operations if I have an approved facility construction or commercial use permit?**

Send BLM a completed and signed Sundry Notice describing your proposed change. Until we approve your Sundry Notice, you must continue to comply with the original permit terms.

### **§ 3275.11 What are a facility operator's obligations?**

You must:

(a) Keep the facility in proper operating condition at all times by;

(1) Conducting training during your operation to ensure that your personnel are capable of performing emergency procedures quickly and effectively;

(2) Using properly maintained equipment; and

(3) Using operational practices that allow for quick and effective emergency response.

(b) Base the design of the utilization facility siting and operation on sound engineering principles and other pertinent geologic and engineering data;

(c) Prevent waste of, or damage to, geothermal and other energy and minerals resources; and

(d) Comply with the requirements of § 3200.4.

## § 3275.12

### **§ 3275.12 What environmental and safety requirements apply to facility operations?**

(a) You must perform all utilization facility operations in a manner that:

- (1) Protects the quality of surface and subsurface waters, air, and other natural resources, including wildlife, soil, vegetation, and natural history;
- (2) Prevents unnecessary or undue degradation of the lands;
- (3) Protects the quality of cultural, scenic, and recreational resources;
- (4) Accommodates other land uses as much as possible;
- (5) Minimizes noise;
- (6) Prevents injury; and
- (7) Prevents damage to property.

(b) You must monitor facility operations to identify and address local environmental resources and concerns associated with your facility or lease operations.

(c) You must remove or, with BLM approval, properly store all equipment and materials not in use.

(d) You must properly abandon the facility and reclaim any disturbed surface to standards approved or prescribed by us, when the land is no longer needed for facility construction or operation.

(e) When we require, you must submit a contingency plan describing procedures to protect public health and safety, property, and the environment.

(f) You must comply with the requirements of § 3200.4.

### **§ 3275.13 How must the facility operator measure the geothermal resources?**

The facility operator must:

(a) Measure all production, injection and utilization in accordance with methods and standards approved by BLM (see § 3275.15);

(b) Maintain and test all metering equipment. If your equipment is defective or out of tolerance, you must promptly recalibrate, repair, or replace it; and

(c) Determine the amount of production and/or utilization in accordance with methods and procedures approved by BLM (see § 3275.17).

## 43 CFR Ch. II (10–1–08 Edition)

### **§ 3275.14 What aspects of my geothermal operations must I measure?**

(a) For all well operations, you must measure wellhead flow, wellhead temperature, and wellhead pressure.

(b) For all electrical generation facilities, you must measure:

- (1) Steam and/or hot water flow entering the facility;
- (2) Temperature of the water and/or steam entering the facility;
- (3) Pressure of the water and/or steam entering the facility;
- (4) Gross electricity generated;
- (5) Net electricity at the facility tailgate;
- (6) Electricity delivered to the sales point; and
- (7) Temperature of the steam and/or hot water exiting the facility.

(c) For direct use facilities, you must measure:

- (1) Flow of steam and/or hot water; and
  - (2) Temperature of the steam or water entering the facility.
- (d) We may also require additional measurements, depending on the type of facility, the type and quality of the resource, and the terms of the sales contract.

### **§ 3275.15 How accurately must I measure my production and utilization?**

It depends on whether you use a meter to calculate Federal production or royalty, and what quantity of resource you are measuring.

(a) For meters that you use to calculate Federal royalty:

(1) If the meter measures electricity, it must have an accuracy of  $\pm 0.25\%$  or better of reading;

(2) If the meter measures steam flowing at more than 100,000 lbs/hr on a monthly basis, it must have an accuracy reading of  $\pm 2$  percent or better;

(3) If the meter measures steam flowing at less than 100,000 lbs/hr on a monthly basis, it must have an accuracy reading of  $\pm 4$  percent or better;

(4) If the meter measures water flowing at more than 500,000 lbs/hr on a monthly basis, it must have an accuracy reading of  $\pm 2$  percent or better;

(5) If the meter measures water flowing at 500,000 lbs/hr or less on a monthly basis, it must have an accuracy reading of  $\pm 4$  percent or better;

(6) If the meter measures heat content, it must have an accuracy reading of  $\pm 4$  percent, or better; or

(7) If the meter measures two-phase flow at any rate, BLM will determine and inform you of the meter accuracy requirements. You must obtain our prior written approval before installing and using meters for two-phase flow.

(b) Any meters that you do not use to calculate Federal royalty are considered production meters, which must maintain an accuracy of  $\pm 5$  percent or better.

(c) We may modify these requirements as necessary to protect the interests of the United States.

**§ 3275.16 What standards apply to installing and maintaining meters?**

(a) You must install and maintain all meters that we require, either according to the manufacturer's recommendations and specifications or paragraphs (b) through (e) of this section, whichever are more restrictive.

(b) If you use an orifice plate to calculate Federal royalty, the orifice plate installation must comply with "API Manual of Petroleum Measurement Standards, Chapter 14, Section 3, Part 2, Fourth Edition, April 2000."

(c) For meters used to calculate Federal royalty, you must calibrate the meter against a known standard as follows:

(1) You must annually calibrate meters measuring electricity;

(2) You must calibrate meters measuring steam or hot water flow with a turbine, vortex, ultrasonics, or other linear devices, every 6 months, or as recommended by the manufacturer, whichever is more frequent; and

(3) You must calibrate meters measuring steam or hot water flow with an orifice plate, venturi, pitot tube, or other differential device, every month, and you must inspect and repair the primary device (orifice plate, venturi, pitot tube) annually.

(d) You must use calibration equipment that is more accurate than the equipment you are calibrating.

(e) BLM may modify any of these requirements as necessary to protect the resources of the United States.

**§ 3275.17 What must I do if I find an error in a meter?**

(a) If you find an error in a meter used to calculate Federal royalty, you must correct the error immediately and notify BLM by the next working day of its discovery.

(b) If the meter is not used to calculate Federal royalty, you must correct the error and notify us within 3 working days after its discovery.

(c) If correcting the error will cause a change in the sales quantity of more than 2 percent for the month(s) in which the error occurred, you must adjust the sales quantity for that month(s) and submit an amended facility report to us within 3 working days.

**§ 3275.18 May BLM require me to test for byproducts associated with geothermal resource production?**

You must conduct any tests we require, including tests for byproducts, if we find it necessary to require such tests for a given operation.

**§ 3275.19 How do I apply to commingle production?**

To request approval to commingle production, send us a completed and signed Sundry Notice. We will review your request to commingle production from wells on your lease with production from your other leases or from leases where you do not have an interest. Do not commingle production until we have approved your Sundry Notice.

**§ 3275.20 What will BLM do if I waste geothermal resources?**

We will determine the amount of any resources you have lost through waste. If you did not take all reasonable precautions to prevent waste, we will require you to pay compensation based on the value of the lost production. If BLM finds that you have not adequately corrected the situation, we will follow the noncompliance procedures in § 3277.12.

**§ 3275.21 May BLM order me to drill and produce wells on my lease?**

BLM may order you to drill and produce wells on your lease when we find it necessary to protect Federal interests, prevent drainage, or ensure that lease development and production

occur in accordance with sound operating practices.

**Subpart 3276—Reports: Utilization Operations**

**§ 3276.10 What are the reporting requirements for facility and lease operations involving Federal geothermal resources?**

(a) When you begin commercial production and operation, you must notify BLM in writing within 5 business days.

(b) Submit completed and signed monthly reports thereafter to BLM as follows:

(1) If you are a lessee or unit operator supplying Federal geothermal resources to a utilization facility on Federal land leased for geothermal resources, submit a monthly report of well operations for all wells on your lease or unit;

(2) If you are the operator of a utilization facility on Federal land leased for geothermal resources, submit a monthly report of facility operations;

(3) If you are both a lessee or unit operator and the operator of a utilization facility on Federal land leased for geothermal resources, you may combine the requirements of paragraphs (b)(1) and (b)(2) of this section into one report; or

(4) If you are a lessee or unit operator supplying Federal geothermal resources to a utilization facility not located on Federal land leased for geothermal resources, and the sales point for the resource utilized is at the facility tailgate, submit all the requirements of paragraphs (b)(1) and (b)(2) of this section. You may combine these into one report.

(c) Unless BLM grants a variance, your reports must be received by BLM by the end of the month following the month that the report covers. For example, the report covering the month of July is due by August 31.

**§ 3276.11 What information must I include for each well in the monthly report of well operations?**

(a) Any drilling operations or changes made to a well;

(b) Total production or injection in thousands of pounds (klbs);

(c) Production or injection temperature in degrees Fahrenheit (deg. F);

(d) Production or injection pressure in pounds per square inch (psi). You must also specify whether this is gauge pressure (psig) or absolute pressure (psia);

(e) The number of days the well was producing or injecting;

(f) The well status at the end of the month;

(g) The amount of steam or hot water lost to venting or leakage, if the amount is greater than 0.5 percent of total lease production. We may modify this standard by a written order describing the change;

(h) The lease number or unit name where the well is located;

(i) The month and year to which the report applies;

(j) Your name, title, signature, and a phone number where BLM may contact you; and

(k) Any other information that we may require.

**§ 3276.12 What information must I give BLM in the monthly report for facility operations?**

(a) For all electrical generation facilities, include in your monthly report of facility operations:

(1) Mass of steam and/or hot water, in klbs, used or brought into the facility. For facilities using both steam and hot water, you must report the mass of each;

(2) The temperature of the steam or hot water in deg. F;

(3) The pressure of the steam or hot water in psi. You must also specify whether this is psig or psia;

(4) Gross generation in kilowatt hours (kwh);

(5) Net generation at the tailgate of the facility in kwh;

(6) Temperature in deg. F and volume of the steam or hot water exiting the facility;

(7) The number of hours the plant was on line;

(8) A brief description of any outages; and

(9) Any other information we may require.

(b) For electrical generation facilities where Federal royalty is based on the sale of electricity to a utility, in

## Bureau of Land Management, Interior

## § 3277.12

addition to the information required under paragraph (a) of this section, you must include the following information in your monthly report of facility operations:

- (1) Amount of electricity delivered to the sales point in kwh, if the sales point is different from the tailgate of the facility;
- (2) Amount of electricity lost to transmission;
- (3) A report from the utility purchasing the electricity documenting the total number of kwh delivered to the sales point during the month, or monthly reporting period if it is not a calendar month, and the number of kwh delivered during diurnal and seasonal pricing periods; and
- (4) Any other information we may require.

### **§ 3276.13 What additional information must I give BLM in the monthly report for flash and dry steam facilities?**

In addition to the regular monthly report information required by § 3276.12, send to BLM:

- (a) Steam flow into the turbine in klbs; for dual flash facilities, you must separate the steam flow into high pressure steam and low pressure steam;
- (b) Condenser pressure in psia;
- (c) Condenser temperature in deg. F;
- (d) Auxiliary steam flow used for gas ejectors, steam seals, pumps, etc., in klbs;
- (e) Flow of condensate out of the plant (after the cooling towers) in klbs; and
- (f) Any other information we may require.

### **§ 3276.14 What information must I give BLM in the monthly report for direct use facilities?**

- (a) Total monthly flow through the facility in thousands of gallons (kgal) or klbs;
- (b) Monthly average temperature in, in deg. F;
- (c) Number of hours that geothermal heat was used; and
- (d) Any other information we may require.

### **§ 3276.15 How must I notify BLM of accidents occurring at my utilization facility?**

You must orally inform us of all accidents that affect operations or create environmental hazards within 24 hours after each accident. When you contact us, we may require you to submit a written report fully describing the incident.

## **Subpart 3277—Inspections, Enforcement, and Noncompliance**

### **§ 3277.10 When will BLM inspect my operations?**

BLM may inspect all operations to ensure compliance with the requirements of § 3200.4. You must give us access during normal operating hours to inspect all facilities utilizing Federal geothermal resources.

### **§ 3277.11 What records must I keep available for inspection?**

(a) The operator or facility operator must keep all records and information pertaining to the operation of your utilization facility, royalty and production meters, and safety training available for BLM inspection for a period of 6 years following the time the records and information are created.

(b) This requirement also pertains to records and information from meters located off your lease or unit, when BLM needs them to determine:

- (1) Resource production to a utilization facility; or
- (2) The allocation of resource production to your lease or unit.

(c) Store all of these records in a place where they are conveniently available.

### **§ 3277.12 What will BLM do if I do not comply with all BLM requirements pertaining to utilization operations?**

(a) We will issue you a written Incident of Noncompliance, directing you to take required corrective action within a specific time period. If the noncompliance continues or is serious in nature, BLM will take one or more of the following actions:

- (1) Enter the lease, and correct any deficiencies at your expense;

## § 3278.10

- (2) Collect all or part of your bond;
  - (3) Order modification or shutdown of your operations; and
  - (4) Take other enforcement action against a lessee who is ultimately responsible for the noncompliance.
- (b) Noncompliance may result in BLM terminating your lease (see §§ 3213.17 through 3213.19).

### **Subpart 3278—Confidential, Proprietary Information**

#### **§ 3278.10 When will BLM disclose information I submit under these regulations?**

All Federal and Indian data and information submitted to BLM are subject to part 2 of this title. Part 2 includes the regulations of the Department of the Interior covering public disclosure of data and information contained in Department records. Certain mineral information not protected from disclosure under part 2 may be made available for inspection without a Freedom of Information Act (FOIA) request. Examples of information we will not treat as confidential include:

- (a) Facility location;
- (b) Facility generation capacity; or
- (c) To whom you are selling electricity or produced resources.

#### **§ 3278.11 When I submit confidential, proprietary information, how can I help ensure it is not available to the public?**

When you submit data and information that you believe to be exempt from disclosure under part 2 of this title, you must clearly mark each page that you believe contains confidential information. BLM will keep all data and information confidential to the extent allowed by § 2.13(c) of this title.

#### **§ 3278.12 How long will information I give BLM remain confidential or proprietary?**

The FOIA does not provide a finite period of time during which information may be exempt from public disclosure. BLM will review each situation individually and in accordance with part 2 of this title.

## 43 CFR Ch. II (10–1–08 Edition)

### **Subpart 3279—Utilization Relief and Appeals**

#### **§ 3279.10 When may I request a variance from BLM requirements pertaining to utilization operations?**

(a) You may file a request with BLM for a variance for your approved utilization operations from the requirements of § 3200.4. Your request must include enough information to explain:

- (1) Why you cannot comply with the requirements; and
- (2) Why you need the variance to operate your facility, conserve natural resources, or protect public health and safety, property, or the environment.

(b) We may approve your request orally or in writing. If we give you oral approval, we will follow up with written confirmation.

#### **§ 3279.11 How may I appeal a BLM decision regarding my utilization operations?**

You may appeal our decision affecting your utilization operations in accordance with § 3200.5.

## **PART 3280—GEOTHERMAL RESOURCES UNIT AGREEMENTS**

### **Subpart 3280—Geothermal Resources Unit Agreements—General**

Sec.

3280.1 What is the purpose and scope of this part?

3280.2 Definitions.

3280.3 What is BLM's general policy regarding the formation of unit agreements?

3280.4 When may BLM require Federal lessees to unitize their leases or require a Federal lessee to commit a lease to a unit?

3280.5 May BLM require the modification of lease requirements in connection with the creation and operation of a unit agreement?

3280.6 When may BLM require a unit operator to modify the rate of exploration, development, or production?

3280.7 Can BLM require an owner or lessee of lands not under Federal administration to unitize their lands or leases?

### **Subpart 3281—Application, Review, and Approval of a Unit Agreement**

3281.1 What steps must I must follow for BLM to approve my unit agreement?

## Bureau of Land Management, Interior

## Pt. 3280

- 3281.2 What documents must the unit operator submit to BLM before we may designate a unit area?
- 3281.3 What geologic information may a unit operator use in proposing a unit area?
- 3281.4 What are the size and shape requirements for a unit area?
- 3281.5 What happens if BLM receives applications that include overlapping unit areas?
- 3281.6 What action will BLM take after reviewing a proposed unit area designation?
- 3281.7 What documents must a unit operator submit to BLM before we will approve a unit agreement?
- 3281.8 Must a unit operator provide working interests within the designated unit area the opportunity to join the unit?
- 3281.9 How does a unit operator provide documentation to BLM of lease and tract commitment status?
- 3281.10 How will BLM determine that I have sufficient control of the proposed unit area?
- 3281.11 What are the unit operator qualifications?
- 3281.12 Who designates the unit operator?
- 3281.13 Is there a format or model a unit operator must use when proposing a unit agreement?
- 3281.14 What minimum requirements and terms must be incorporated into the unit agreement?
- 3281.15 What is the minimum initial unit obligation a unit agreement must contain?
- 3281.16 When must a Plan of Development be submitted to BLM?
- 3281.17 What information must be provided in the Plan of Development?
- 3281.18 What action will BLM take in reviewing the Plan of Development?
- 3281.19 What action will BLM take on a proposed unit agreement?
- 3281.20 When is a unit agreement effective?

### Subpart 3282—Participating Area

- 3282.1 What is a participating area?
- 3282.2 When must the unit operator have a participating area approved?
- 3282.3 When must the unit operator submit an application for BLM approval of a proposed initial participating area?
- 3282.4 What general information must the unit operator submit with a proposed participating area application?
- 3282.5 What technical information must the unit operator submit with a proposed participating area application?
- 3282.6 When must the unit operator propose to revise a participating area boundary?
- 3282.7 What is the effective date of an initial participating area or revision of an existing participating area?

- 3282.8 What are the reasons BLM would not approve a revision of the participating area boundary?
- 3282.9 How is production allocated within a participating area?
- 3282.10 When will unleased Federal lands in a participating area receive a production allocation?
- 3282.11 May a participating area continue if there is intermittent unit production?
- 3282.12 When does a participating area terminate?

### Subpart 3283—Modifications to the Unit Agreement

- 3283.1 When may the unit operator modify the unit agreement?
- 3283.2 When may the unit operator revise the unit contraction provision of a unit agreement?
- 3283.3 How will the unit operator know the status of a unit contraction revision request?
- 3283.4 When may the unit operator add lands to or remove lands from a unit agreement?
- 3283.5 When will BLM periodically review unit agreements?
- 3283.6 What is the purpose of BLM's periodic review?
- 3283.7 When may unit operators be changed?
- 3283.8 What must be filed with BLM to change the unit operator?
- 3283.9 When is a change of unit operator effective?
- 3283.10 If there is a change in the unit operator, when does the previous operator's liability end?
- 3283.11 Do the terms and conditions of a unit agreement modify Federal lease stipulations?
- 3283.12 Are transferees and successors in interest of Federal geothermal leases bound by the terms and conditions of the unit agreement?

### Subpart 3284—Unit Operations

- 3284.1 What general standards apply to operations within a unit?
- 3284.2 What are the principal operational responsibilities of the unit operator?
- 3284.3 What happens if the minimum initial unit obligations are not met?
- 3284.4 How are unit agreement terms affected after completion of the initial unit well?
- 3284.5 How do unit operations affect lease extensions?
- 3284.6 May BLM authorize a working interest owner to drill a well on lands committed to the unit?
- 3284.7 May BLM authorize operations on uncommitted Federal leases located within a unit?
- 3284.8 May a unit have multiple operators?

## § 3280.1

- 3284.9 May BLM set or modify production or injection rates?
- 3284.10 What must a unit operator do to prevent or compensate for drainage?
- 3284.11 Must the unit operator develop and operate on every lease or tract in the unit to comply with the obligations in the underlying leases or agreements?
- 3284.12 When must the unit operator notify BLM of any changes of lease and tract commitment status?

### Subpart 3285—Unit Termination

- 3285.1 When may BLM terminate a unit agreement?
- 3285.2 When may BLM approve a voluntary termination of a unit agreement?

### Subpart 3286—Model Unit Agreement

- 3286.1 Model Unit Agreement.

### Subpart 3287—Relief and Appeals

- 3287.1 May the unit operator request a suspension of unit obligations or development requirements?
- 3287.2 When may BLM grant a suspension of unit obligations?
- 3287.3 How does a suspension of unit obligations affect the terms of the unit agreement?
- 3287.4 May a decision made by BLM under this part be appealed?

AUTHORITY: 30 U.S.C. 1001–1028 and 43 U.S.C. 1701 *et seq.*

SOURCE: 72 FR 24432, May 2, 2007, unless otherwise noted.

## Subpart 3280—Geothermal Resources Unit Agreements—General

### § 3280.1 What is the purpose and scope of this part?

(a) The purpose of this part is to provide holders of Federal and non-Federal geothermal leases and owners of non-Federal mineral interests the opportunity to unite under a Federal geothermal unit agreement to explore for and develop geothermal resources in a manner that is necessary or advisable in the public interest.

(b) These regulations identify:

- (1) The procedures a prospective unit operator must follow to receive BLM approval for unit area designation and a Federal geothermal unit agreement;
- (2) The operational requirements a unit operator must meet once the unit agreement is approved; and

## 43 CFR Ch. II (10–1–08 Edition)

(3) The procedures BLM will follow in reviewing, approving, and administering a Federal geothermal unit agreement.

### § 3280.2 Definitions.

The following terms, as used in this part or in any agreement approved under the regulations in this part, have the following meanings unless otherwise defined in such agreement:

*Minimum initial unit obligation* means the requirement to complete at least one unit well within the timeframe specified in the unit agreement. If this requirement is not met, BLM deems the unit void as though it was never in effect.

*Participating area* means that part of the unit area that BLM deems to be productive from a horizon or deposit, and to which production would be allocated in the manner described in the unit agreement, assuming that all lands are committed to the unit agreement.

*Plan of development* means the document a unit operator submits to BLM defining how the unit operator will diligently pursue unit exploration and development to meet both initial and subsequent unit development and public interest obligations.

*Public interest* means operations within a geothermal unit resulting in:

- (1) Diligent development;
- (2) Efficient exploration, production and utilization of the resource;
- (3) Conservation of natural resources; and
- (4) Prevention of waste.

*Reasonably proven to produce* means a sufficient demonstration, based on scientific and technical information, that lands are contributing to unit production in commercial quantities or are providing reservoir pressure support for unit production.

*Unit agreement* means an agreement for the exploration, development, production, and utilization of separately owned interests in the geothermal resources made subject thereto as a single consolidated unit without regard to separate ownerships, which provides for the allocation of costs and benefits on a basis defined in the agreement or plan.

## Bureau of Land Management, Interior

## § 3280.6

*Unit area* means the area described in a unit agreement as constituting the land logically subject to development under such agreement.

*Unit contraction provision* means a term of a unit agreement providing that the boundaries of the unit area will contract to the size of the participating area, by having those lands outside of the participating area removed. BLM will contract the unit area if additional unit wells are not drilled and completed within the timeframe specified in the unit agreement.

*Unit operator* means the person, association, partnership, corporation, or other business entity designated under a unit agreement to conduct operations on unitized land as specified in such agreement.

*Unit well* means a well that is:

- (1) Designed to produce or utilize geothermal resources in commercial quantities;
- (2) Drilled and completed to the bona fide geologic objective specified in the unit agreement, unless a commercial resource is found at a shallower depth; and
- (3) Located on unitized land.

*Unitized land* means the part of a unit area committed to a unit agreement.

*Unitized substances* means deposits of geothermal resources recovered from unitized land by operation under and pursuant to a unit agreement.

*Working interest* means the interest held in geothermal resources or in lands containing the same by virtue of a lease, operating agreement, fee title, or otherwise, under which, except as otherwise provided in a unit agreement, the owner of such interest is vested with the right to explore for, develop, produce, and utilize such resources. The right delegated to the unit operator as such by the unit agreement is not to be regarded as a working interest.

### § 3280.3 What is BLM's general policy regarding the formation of unit agreements?

For the purpose of more properly conserving the natural resources of any geothermal reservoir, field, or like area, or any part thereof, lessees and their representatives may unite with each other, or jointly or separately

with others, in collectively adopting and operating under a unit agreement for the reservoir, field, or like area, or any part thereof, including direct use resources, if BLM determines and certifies this to be necessary or advisable in the public interest.

### § 3280.4 When may BLM require Federal lessees to unitize their leases or require a Federal lessee to commit a lease to a unit?

(a) BLM may initiate the formation of a unit agreement, or require an existing Federal lease to commit to a unit agreement, if in the public interest.

(b) BLM may require that Federal leases that become effective on or after August 8, 2005, contain a provision stating that BLM may require commitment of the lease to a unit agreement, and may prescribe the unit agreement to which such lease must commit to protect the rights of all parties in interest, including the United States.

### § 3280.5 May BLM require the modification of lease requirements in connection with the creation and operation of a unit agreement?

(a) BLM may, with the consent of the lessees involved, establish, alter, change, or revoke rates of operations (including drilling, operations, production, and other requirements) of the leases, and make conditions with respect to the leases, in connection with the creation and operation of any such unit agreement as BLM may consider necessary or advisable to secure the protection of the public interest.

(b) If leases to be included in a unit have unlike lease terms, such leases need not be modified to be in the same unit.

### § 3280.6 When may BLM require a unit operator to modify the rate of exploration, development, or production?

BLM may require a unit agreement applying to lands owned by the United States to contain a provision under which BLM or an entity designated in the unit agreement may alter or modify, from time-to-time, the rate of resource exploration or development, or production quantity or rate, under the unit agreement.

## § 3280.7

### **§ 3280.7 Can BLM require an owner or lessee of lands not under Federal administration to unitize their lands or leases?**

BLM cannot require the commitment of lands or leases not under Federal administration or jurisdiction to a Federal unit.

## **Subpart 3281—Application, Review, and Approval of a Unit Agreement**

### **§ 3281.1 What steps must I follow for BLM to approve my unit agreement?**

Before a unit agreement becomes effective, BLM must designate the unit area and approve the unit agreement. Procedures for designating the unit area are set forth in §§ 3281.2 through 3281.6. Procedures for approving the unit agreement are set forth in §§ 3281.7 through 3281.17.

### **§ 3281.2 What documents must the unit operator submit to BLM before we may designate a unit area?**

(a) The unit operator must submit the following documents before BLM may designate a proposed unit area:

(1) A report detailing the geologic information and interpretation that indicates, to the satisfaction of BLM, the proposed area is geologically appropriate for unitization;

(2) A map showing:

(i) The proposed unit area;

(ii) All leases (including Federal, state, or private) and tracts (unleased privately owned land or mineral rights);

(iii) The Federal lease number and lessee; and

(iv) An individual unit tract number;

(3) A list which includes the following information as to each Federal, state, and private lease, and tracts of unleased land, to be included in the unit:

(i) The lease number;

(ii) The legal land description of each lease and tract;

(iii) The acreage of each lease or tract;

(iv) The lessor and lessee of each lease;

(v) The mineral rights owner of any unleased tract; and

## 43 CFR Ch. II (10–1–08 Edition)

(vi) The total number of acres:

(A) In the unit area;

(B) Under Federal administration; and

(C) In private or other (such as state) ownership; and

(4) Any other information BLM may require.

(b) Before submitting any documents, ask BLM how many copies are required.

### **§ 3281.3 What geologic information may a unit operator use in proposing a unit area?**

(a) A unit operator may use any reasonable geologic information necessary to justify its proposed unit area. The information must document that the proposed unit area is:

(1) Geologically contiguous; and

(2) Suitable for resource exploration, development and production under a unit agreement.

(b) BLM will decide which information and interpretations are acceptable. BLM's acceptance of the information and interpretations may vary depending on the types and level of geologic information available for the area.

### **§ 3281.4 What are the size and shape requirements for a unit area?**

There are no specific size or shape requirements for a unit area, except that it must meet the requirements of § 3281.3. The size of the unit area may affect the minimum initial unit obligation requirements (see § 3281.15(b)).

### **§ 3281.5 What happens if BLM receives applications that include overlapping unit areas?**

(a) If BLM receives unit area applications that include overlapping lands, we will request that each prospective unit operator resolve the issue with the other operator(s). If the prospective operators cannot reach a resolution, BLM may:

(1) Return all unit applications and request all applicants to revise their proposed unit areas;

(2) Designate any unit area proposal that is geologically appropriate for unitization and best meets public interest requirements; or

## Bureau of Land Management, Interior

## § 3281.11

(3) Designate a different area for unitization when doing so is in the public interest.

(b) BLM will reject either an application or a portion of an application that includes lands already in an approved unit area.

### **§ 3281.6 What action will BLM take after reviewing a proposed unit area designation?**

(a) BLM will approve the unit area designation in writing and notify the prospective unit operator once we determine that:

(1) We have received the information required at § 3281.2;

(2) Information available to BLM documents that the area is geologically appropriate for unitization; and

(3) Unitization is appropriate to conserve the natural resources of a geothermal reservoir, field, or like area, or part thereof.

(b) BLM will notify a prospective unit operator in writing if we do not designate a proposed unit area.

### **§ 3281.7 What documents must a unit operator submit to BLM before we will approve a unit agreement?**

After BLM approves a unit area designation, a unit operator must submit the following information in order for BLM to approve a unit agreement:

(a) Documentation of tract commitment (see §§ 3281.8 and 3281.9);

(b) The unit agreement (see § 3281.15);

(c) The map required by § 3281.2(a)(2), if any modifications have occurred since the unit area was designated;

(d) The list required by § 3281.2(a)(3) indicating whether each lease or tract is committed to the unit agreement; and

(e) The plan of development.

### **§ 3281.8 Must a unit operator provide working interests within the designated unit area the opportunity to join the unit?**

After BLM designates a unit area, the unit operator must invite all owners of mineral rights (leased or unleased) and lease interests (record title and operating rights) in the designated unit area to join the unit. The unit operator must provide the lease interests and mineral rights owners 30 days to respond. If an interest or owner does

not respond, the unit operator must provide BLM with written evidence that all the interests or owners were invited to join the unit. BLM will not approve a unit agreement proposal if this evidence is not submitted.

### **§ 3281.9 How does a unit operator provide documentation to BLM of lease and tract commitment status?**

(a) The unit operator must provide documentation to BLM of the commitment status of each lease and tract in the designated unit area. The documentation must include a joinder or other comparable document signed by the lessee or mineral rights owner, or evidence that an opportunity to join was offered and no response was received (see § 3281.8).

(b) A majority interest of owners of any single Federal lease has authority to commit the lease to a unit agreement.

### **§ 3281.10 How will BLM determine that I have sufficient control of the proposed unit area?**

(a) BLM will determine whether:

(1) A unit operator has sufficient control of the proposed unit area by reviewing the number and location of leases and tracts committed and their geologic potential for development in relation to the entire proposed unit area; and

(2) The committed tracts provide the unit operator with sufficient control of the unit area to conduct resource exploration and development in the public interest.

(b) If BLM determines that the unit operator does not have sufficient control of the unit area, we will not approve the unit agreement.

### **§ 3281.11 What are the unit operator qualifications?**

(a) Before BLM will approve a unit agreement, the unit operator must:

(1) Meet the same qualifications as a lessee (see § 3202.10 of this chapter); and

(2) Demonstrate sufficient control of the unit area (see § 3281.10).

(b) A unit operator is not required to have an interest in any lease committed to the unit agreement.

## § 3281.12

### **§ 3281.12 Who designates the unit operator?**

The owners of geothermal rights and lease interests committed to the unit agreement will nominate a unit operator. Before designating the unit operator, BLM must also determine whether the prospective unit operator meets the requirements of § 3281.11.

### **§ 3281.13 Is there a format or model a unit operator must use when proposing a unit agreement?**

When proposing a unit agreement, submit to BLM:

- (a) The model unit agreement (see § 3286.1);
- (b) The model unit agreement with variances noted; or
- (c) Any unit agreement format that contains all the terms and conditions BLM requires (see §§ 3281.14 and 3281.15).

### **§ 3281.14 What minimum requirements and terms must be incorporated into the unit agreement?**

(a) The unit agreement must, at a minimum:

- (1) State who the unit operator is, and that the unit operator and participating lessees accept the unit terms and obligations set forth in the agreement and applicable BLM regulations;
- (2) State the size and general location of the unit area;
- (3) Include procedures for revising the unit area or participating area(s);
- (4) Include procedures for amending the unit agreement;
- (5) State the effective date and term of the unit, as provided in paragraph (b) of this section;
- (6) Incorporate the minimum initial unit obligations, as specified in § 3281.15;
- (7) State that BLM may require a modification of the rate of resource exploration or development, or the production quantity or rate, within the unit area;
- (8) State that the agreement is subject to periodic BLM review;
- (9) State that BLM will deem the unit agreement as void as if it were never in effect if the minimum initial unit obligations are not met;
- (10) Include a plan of development; and

## 43 CFR Ch. II (10–1–08 Edition)

(11) Include a unit contraction provision.

(b) The unit agreement must provide that it terminates 5 years after its effective date unless:

(1) BLM extends such date of expiration;

(2) Unitized substances are produced or utilized in commercial quantities in which event the agreement continues for so long as unitized substances are produced or utilized in commercial quantities; or

(3) BLM terminates the agreement under subpart 3285 of this part before the end of the 5 year period.

(c) The agreement may include any other provisions or terms that BLM and the unit operator agree are necessary for proper resource exploration and development, and management of the unit area.

### **§ 3281.15 What is the minimum initial unit obligation a unit agreement must contain?**

(a) The unit agreement must:

(1) Require the unit operator to drill, within the timeframe specified in the unit agreement, at least one unit well on a tract committed to the unit agreement;

(2) Specify the location and the minimum depth and/or geologic structure to which the initial unit well will be drilled; and

(3) Require the unit operator, upon completing a unit well, to provide to BLM in a timely manner the information required at § 3264.10 of this chapter.

(b) Depending on the size of the proposed unit area, BLM may require the minimum initial unit agreement obligation to include the drilling of more than one unit well.

(c) If necessary to aid in the evaluation of drilling locations, BLM and the unit operator may agree to include types of exploration operations as part of the initial unit obligation. An example of such work is drilling temperature gradient wells.

(d) BLM will not consider any work done prior to unit approval for the purpose of meeting initial unit obligations.

**§ 3281.16 When must a Plan of Development be submitted to BLM?**

(a) The prospective unit operator must submit an initial Plan of Development at the time the unit area is proposed for designation.

(b) Subsequent Plans of Development that were not already provided must be submitted to address future unit activities to be conducted throughout the term of the unit agreement. For example, if the Plan only addressed activities until a unit well is completed, the subsequent Plan must address activities including the drilling of additional unit wells until a producible well is completed. Once a producible well is completed, the Plan or subsequent Plan must address those activities related to utilizing the resource.

(c) There is no requirement to submit a Plan of Development once unitized resources begin commercial operation.

**§ 3281.17 What information must be provided in the Plan of Development?**

(a) The Plan of Development must state the types of and timeframes for activities the unit operator will conduct in diligent pursuit of unit exploration and development. The Plan may address those activities that will be conducted until the minimum initial unit obligation is met, or it may address all activities that will occur through the term of the unit agreement.

(b) The Plan of Development may specify that the activities will be conducted in phases during the term of the unit agreement. For example, the number, location, and depth of temperature gradient wells, and the timeframe for the completion of these wells, may be the first phase. A second phase may include drilling of observation or slim-hole wells to a greater depth than that specified in the first phase. Completion of the unit well may be the third phase. In all cases, the Plan of Development must include the completion of at least one unit well.

**§ 3281.18 What action will BLM take in reviewing the Plan of Development?**

BLM will review the Plan of Development to ensure that the types of activities and the timeframes for their com-

pletion meet public interest requirements. If BLM determines that the Plan of Development does not meet these requirements, BLM will negotiate with the prospective unit operator to revise the proposed activities. BLM will not designate a unit area until the Plan of Development meets applicable requirements.

**§ 3281.19 What action will BLM take on a proposed unit agreement?**

BLM will:

(a) Review the proposed unit agreement to ensure that the public interest is protected and that the agreement conforms to applicable laws and regulations;

(b) Coordinate the review of a proposed unit agreement with appropriate state agencies, and other Federal surface management agencies, if applicable;

(c) Approve the unit agreement and provide the unit operator with signed copies of the agreement, if we determine:

(1) That the unit operator has submitted all required information;

(2) That the unit agreement and the unit operator satisfy all required terms and conditions, including the requirements specified at §§ 3281.14 and 3281.15, and conform with all applicable laws and regulations; and

(3) That the unit agreement is necessary or advisable to meet the public interest;

(d) Notify the unit operator in writing if we reject the unit agreement proposal; and

(e) Reject any unit application that includes lands already committed to an approved unit agreement.

**§ 3281.20 When is a unit agreement effective?**

The effective date of the unit agreement approval is the first day of the month following the date BLM approves and signs it. The unit operator may request that the effective date be the first day of the month in which the agreement is signed by BLM, or a more appropriate date agreed to by BLM.

**Subpart 3282—Participating Area**

**§ 3282.1 What is a participating area?**

(a) A participating area is the combined portion of the unitized area which BLM determines:

(1) Is reasonably proven to produce geothermal resources; or

(2) Supports production in commercial quantities, such as pressure support from injection wells.

(b) The size and configuration of all participating areas and revisions are not effective until BLM approves them.

**§ 3282.2 When must the unit operator have a participating area approved?**

You must have an established BLM-approved participating area to allocate production and royalties before beginning commercial operations under a unit agreement to allocate production within the unit.

**§ 3282.3 When must the unit operator submit an application for BLM approval of a proposed initial participating area?**

The unit operator must submit an application for BLM approval of a proposed participating area no later than:

(a) 60 days after receiving BLM's determination identified in § 3281.15(a)(3) that a unit well will produce or utilize in commercial quantities; or

(b) 30 days before the initiation of commercial operations, whichever occurs earlier.

**§ 3282.4 What general information must the unit operator submit with a proposed participating area application?**

The unit operator must submit the following information with a participating area application:

(a) Technical information supporting its application (see § 3282.5);

(b) The information required in § 3281.2(a)(2) and (3) for the lands in the proposed participating area; and

(c) Any other information BLM may require.

**§ 3282.5 What technical information must the unit operator submit with a proposed participating area application?**

At a minimum, the unit operator must submit the following technical information with a proposed participating area application:

(a) Documentation that the participating area includes:

(1) The production and injection wells necessary for unit operations;

(2) Unit wells that are capable of being produced or utilized in commercial quantities; and

(3) The area each well drains or supplies pressure communication.

(b) Data, including logs, from production and injection well testing, if not previously submitted under § 3264.10 of this chapter;

(c) Interpretations of well performance, and reservoir geology and structure, that document that the lands are reasonably proven to produce; and

(d) Any other information BLM may require.

**§ 3282.6 When must the unit operator propose to revise a participating area boundary?**

(a) The unit operator must submit a written application to BLM to revise a participating area boundary no later than 60 days after receipt of the BLM determination described herein, when either:

(1) A well is completed that BLM has determined will produce or utilize in commercial quantities, and such well:

(i) Is located outside of an existing participating area; or

(ii) Drains an area outside the existing participating area; or

(2) An injection well located outside of an existing participating area is put into use that BLM has determined provides reservoir pressure support to production.

(b) The unit operator may submit a written application for a revision of a participating area when new or additional technical information or revised interpretations of any information provides a basis for revising the boundary.

(c) The unit operator may submit a written request to BLM to delay a participation area revision decision when drilling multiple wells in the unit is

actively pursued or the drilling is providing additional technical information. A delay will not affect the effective date of any participation area revision (see § 3282.7). The request must include:

- (1) The well locations;
- (2) Anticipated spud and completion dates of each well;
- (3) The timing of well testing and analyses of technical information; and
- (4) The anticipated date BLM will receive the participation area revision for review.

(d) BLM will provide the unit operator with a written decision on the application to revise a participating area or the request to delay a participating area revision decision by BLM.

**§ 3282.7 What is the effective date of an initial participating area or revision of an existing participating area?**

(a) BLM will establish the appropriate effective date of an initial participating area or any revision to a participating area. The effective date may be, but is not limited to, the first day of the month in which:

- (1) A well is completed that causes the participating area to be formed or revised;
- (2) Commercial operations start; or
- (3) New or additional technical information becomes known that provides a basis for revising the boundary (such as when production from, or injection to, an area outside the participating area first became known).

(b) The unit operator may request BLM to approve a specific effective date for the participating area or revision, but the date may not be earlier than the effective date of the unit.

**§ 3282.8 What are the reasons BLM would not approve a revision of the participating area boundary?**

BLM will not approve a revision of the participating area boundary:

- (a) If the unit operator does not submit the required information;
- (b) If BLM determines that the new or additional technical information does not support a boundary revision; or
- (c) If it reduces the size of a participating area because of depletion of the resource.

**§ 3282.9 How is production allocated within a participating area?**

Allocation of production to each committed lease or tract within a participating area is in the same proportion as that lease's or tract's surface acreage within the participating area.

**§ 3282.10 When will unleased Federal lands in a participating area receive a production allocation?**

Unleased Federal lands within a participating area are treated as follows:

(a) For royalty purposes only, you must allocate production to unleased Federal lands in the participating area as if the acreage were committed to the participating area.

(b) The unit operator is primarily liable for paying and must pay royalty to the United States for such allocated production based on a rate not less than the highest royalty rate for any Federal lease in the participating area. In the event the unit operator does not pay any royalties owed under this paragraph, each lessee of lands committed to the participating area is responsible for paying such royalties in the same proportion as that lessee's percentage of surface acreage within the participating area, excluding the unleased acreage.

**§ 3282.11 May a participating area continue if there is intermittent unit production?**

A participating area may continue if there is intermittent unit production only if BLM determines that intermittent production is in the public interest. For example, a direct use facility may only require production to occur during winter months.

**§ 3282.12 When does a participating area terminate?**

A participating area terminates when either:

- (a) The unit operator permanently stops operations in or affecting the participating area; or
- (b) Sixty (60) days after BLM notifies the unit operator in writing that we have determined that operations in the participating area are not being conducted in accordance with the unit agreement, the participating area approval, or the public interest. If before

the expiration of the 60 days, the unit operator demonstrates to BLM's satisfaction that the basis for BLM's determination is erroneous or has been rectified, BLM will not terminate the participating area.

### **Subpart 3283—Modifications to the Unit Agreement**

#### **§ 3283.1 When may the unit operator modify the unit agreement?**

(a) The unit operator may propose to modify a unit agreement by submitting an application to BLM that:

- (1) Identifies the proposed change and the reason for the change; and
- (2) Certifies that all necessary unit interests have agreed to the change.

(b) BLM will send the unit operator written notification of BLM's decision regarding the application. Proposed modifications to a unit agreement will not become effective until BLM approves them. BLM's approval may be made effective retroactively to the date the application was complete. BLM may approve a different effective date, including a date the unit operator requests and for which the unit operator provides acceptable justification.

#### **§ 3283.2 When may the unit operator revise the unit contraction provision of a unit agreement?**

(a) The unit operator may submit to BLM a request to revise the unit contraction provision of a unit agreement, if the unit operator has either:

- (1) Commenced commercial operations of unitized resources; or
- (2) Completed a unit well that produces or utilizes geothermal resources in commercial quantities.

(b) The request may propose an extension of the unit contraction date and/or a partial contraction of the unit area, and must include the following information:

- (1) The period for which the revision is requested; and
- (2) Whether an extension of the unit contraction date and/or a partial contraction of the unit area is requested.

(c) The request should address the following factors when applicable:

- (1) Economic constraints that limit the opportunity to drill and utilize the resource from additional wells;

(2) Reservoir monitoring or injection wells that BLM determines are necessary for unit operations are not located in the participating area;

(3) An inability to drill additional wells is due to circumstances beyond the unit operator's control, and a unit well that has produced or utilized in commercial quantities already is located in the unit;

(4) The types and intensity of unit operations already conducted in the unit area;

(5) The availability of viable electrical or resource sales contracts;

(6) The opportunity to utilize the resource economically; or

(7) Any other information that supports revision of the unit contraction provision.

(d) BLM will consider the factors discussed along with any other information submitted, and will approve the request if we determine that the revision is in the public interest. The approval may be subject to conditions such as requiring an annual renewal, or setting the timing and conditions for when phased contractions or termination of the revision may occur.

#### **§ 3283.3 How will the unit operator know the status of a unit contraction revision request?**

BLM will notify the unit operator in writing of our decision. If we approve the request, we:

(a) Will specify the term of the contraction extension and/or which lands will remain in the unit agreement;

(b) May require the unit operator to update the informational requirements of subpart 3282; and

(c) May terminate the participating area contraction revision if we find termination is necessary in the public interest.

#### **§ 3283.4 When may the unit operator add lands to or remove lands from a unit agreement?**

(a) The unit operator may request BLM to designate the addition or removal of lands to or from a unit agreement.

(b) In order for BLM to complete a review of the unit area revision request, the unit operator must submit to BLM the information required in §§ 3281.2, 3281.3, and 3281.7.

## Bureau of Land Management, Interior

## § 3284.1

(c) BLM will:

(1) Review the request;  
(2) Determine whether the information provided is sufficient and whether the new or additional geologic information or interpretation provides an acceptable basis for the unit boundary change; and

(3) Notify the unit operator in writing of our decision.

(d) If BLM approves the revision, the unit operator must notify all owners of lease interests or mineral rights of the unit area revision.

### **§ 3283.5 When will BLM periodically review unit agreements?**

BLM will periodically review all unit agreements to determine compliance with § 3283.6 in accordance with the following schedule:

(a) Not later than 5 years after the approval of each unit agreement; and

(b) At least every 5 years following the initial unit review.

### **§ 3283.6 What is the purpose of BLM's periodic review?**

(a) BLM must review all unit agreements to determine whether any leases, or portions of leases, committed to any unit are no longer reasonably necessary for unit operations, and eliminate from inclusion in the unit agreement any such lands it determines not reasonably necessary for unit operations.

(b) The elimination will be based on scientific evidence, and occur only for the purpose of conserving and properly managing the geothermal resources.

(c) BLM will not eliminate any lands from a unit until BLM provides the unit operator, the lessee, and any other person with a legal interest in such lands, with reasonable notice and an opportunity to comment.

(d) Any lands eliminated from a unit under this section are eligible for a lease extension under subpart 3207 of part 3200 of this chapter if the lands meet the requirements for the extension.

### **§ 3283.7 When may unit operators be changed?**

Unit operators may be changed only with BLM's written approval.

### **§ 3283.8 What must be filed with BLM to change the unit operator?**

To change the unit operator, the new operator must:

(a) Meet the qualification requirements of § 3281.11;

(b) Submit to BLM evidence of acceptable bonding under § 3214.13 of this chapter; and

(c) File with BLM written acceptance of the unit terms and obligations.

### **§ 3283.9 When is a change of unit operator effective?**

The change is effective when BLM approves the new unit operator in writing.

### **§ 3283.10 If there is a change in the unit operator, when does the previous operator's liability end?**

(a) The previous unit operator remains responsible for all duties and obligations of the unit agreement until BLM approves a new unit operator. The change of the unit operator does not release the previous unit operator from any liability for any obligations that accrued before the effective date of the change (see § 3215.14 of this chapter).

(b) The new unit operator is responsible for all unit duties and obligations after BLM approves the change.

### **§ 3283.11 Do the terms and conditions of a unit agreement modify Federal lease stipulations?**

Nothing in a unit agreement modifies stipulations included in any Federal lease.

### **§ 3283.12 Are transferees and successors in interest of Federal geothermal leases bound by the terms and conditions of the unit agreement?**

The terms and conditions of the unit agreement are binding on transferees and successors in interest to Federal geothermal leases committed to a unit agreement.

## **Subpart 3284—Unit Operations**

### **§ 3284.1 What general standards apply to operations within a unit?**

All unit operations must comply with:

**§ 3284.2**

**43 CFR Ch. II (10–1–08 Edition)**

(a) The terms and conditions of the unit agreement; and

(b) The standards and orders listed in the following chart:

Type of operation	Regulations on Operational Standards (43 CFR)	Regulations on Orders or Instructions (43 CFR)
Exploration .....	§ 3250.12	§ 3250.13
Drilling .....	§ 3260.11	§ 3260.12
Production or Utilization .....	§ 3270.11	§ 3270.12

**§ 3284.2 What are the principal operational responsibilities of the unit operator?**

The unit operator is responsible for:

(a) Diligently drilling for and developing in the public interest the geothermal resource occurring in the unit area. Only the unit operator is authorized to conduct:

(1) Any phase of drilling authorized under subpart 3260 of this chapter, unless another person is specifically authorized by BLM to conduct drilling (see § 3284.3);

(2) Resource development activities such as production and injection; and

(3) Delivery of the resource for commercial operation. An entity other than the unit operator, such as a facility operator, may purchase or utilize the resource produced from the unit.

(b) Providing written notification to BLM within 30 days after any changes to the commitment status of any lease or tract in the unit area (see §§ 3281.9 and 3284.12); and

(c) Insuring that the Federal Government receives all royalties, direct use fees, and rents for activities within the participating area.

**§ 3284.3 What happens if the minimum initial unit obligations are not met?**

(a) If the unit operator does not drill a well designed to produce or utilize geothermal resources in commercial quantities within the timeframe specified in the unit agreement, or the unit operator relinquishes the unit agreement before meeting the minimum initial unit obligations:

(1) BLM will deem the unit agreement void as though it was never in effect;

(2) BLM will deem any lease extension based upon the existence of the unit as void retroactive to the date the unit was effective; and

(3) Any lease segregations based on the unit become invalid.

(b) BLM will send the unit operator a written decision confirming that the unit agreement is void.

**§ 3284.4 How are unit agreement terms affected after completion of the initial unit well?**

(a) Upon completion of a unit well that BLM determines will produce or utilize geothermal resources in commercial quantities, the unit operator must submit a proposed participating area application under § 3282.3, and no additional drilling to meet unit obligations is required. If no additional drilling in the unit occurs, the unit area will contract to the participating area as specified in the unit agreement.

(b) If a unit operator drills a well designed to produce or utilize geothermal resources in commercial quantities, but the well will not produce commercially or is not producible, the unit operator must continue drilling additional wells within the timeframes specified in the unit agreement until a unit well is completed that BLM determines will produce or utilize geothermal resources in commercial quantities. BLM may terminate a unit if additional wells are not drilled within the timeframes specified in the unit agreement.

(c) The unit agreement will expire if no well that BLM determines will produce or utilize geothermal resources in commercial quantities is completed within the timeframes specified in the unit agreement.

(d) BLM will send the unit operator a written decision confirming that the unit agreement has been terminated or has expired.

**§ 3284.5 How do unit operations affect lease extensions?**

(a) Once the minimum initial unit obligation is met, lease extensions approved under § 3207.17 of this chapter based upon unit commitment will remain in effect until the unit is relinquished, expires, terminates, or the lease on which the initial unit obligation was met is eliminated from the unit.

(b) As long as there are commercial operations within the unit or there exists a unit well that BLM has determined is producing or utilizing geothermal resources in commercial quantities, lease extensions for any leases or portions of leases within the participating area will remain in effect as long as operations meet the requirements of § 3207.15 of this chapter.

**§ 3284.6 May BLM authorize a working interest owner to drill a well on lands committed to the unit?**

(a) BLM may authorize a working interest owner to drill a well on the interest owner's lease only if it is located outside of an established participating area. However, BLM will only do so upon determining that:

- (1) The unit operator is not diligently pursuing unit development; and
- (2) Drilling the well is in the public interest.

(b) If BLM determines that a working interest has completed a well that will produce or utilize geothermal resources in commercial quantities, the unit operator must:

- (1) Apply to revise the participating area to include the well; and
- (2) Operate the well.

**§ 3284.7 May BLM authorize operations on uncommitted Federal leases located within a unit?**

BLM may authorize a lessee/operator to conduct operations on an uncommitted Federal lease located within a unit if the lessee/operator demonstrates to our satisfaction that operations on the lease are:

- (a) In the public interest; and
- (b) Will not unnecessarily affect unit operations.

**§ 3284.8 May a unit have multiple operators?**

A unit may have only one operator.

**§ 3284.9 May BLM set or modify production or injection rates?**

BLM may set or modify the quantity, rate, or location of production or injection occurring under a unit agreement to ensure protection of Federal resources.

**§ 3284.10 What must a unit operator do to prevent or compensate for drainage?**

The unit operator must take all necessary measures to prevent or compensate for drainage of geothermal resources from unitized land by wells on land not subject to the unit agreement (see §§ 3210.16 and 3210.17 of this chapter).

**§ 3284.11 Must the unit operator develop and operate on every lease or tract in the unit to comply with the obligations in the underlying leases or agreements?**

The unit operator is not required to develop and operate on every lease or tract in the unit agreement to comply with the obligations in the underlying leases or agreement. The development and operation on any lands subject to a unit agreement is considered full performance of all obligations for development and operation for every separately owned lease or tract in the unit, regardless of whether there is development of any particular tract of the unit area.

**§ 3284.12 When must the unit operator notify BLM of any changes of lease and tract commitment status?**

The unit operator must provide updated documentation of commitment status (see §§ 3281.8 through 3281.10) of all leases and tracts to BLM whenever a change in commitment, such as the expiration of a private lease, occurs. The unit operator must submit the documentation to BLM within 30 days after the change occurs. The unit operator must also notify all lessees and mineral interest owners of these changes.

### Subpart 3285—Unit Termination

#### § 3285.1 When may BLM terminate a unit agreement?

BLM may terminate a unit agreement if the unit operator does not comply with any term or condition of the unit agreement.

#### § 3285.2 When may BLM approve a voluntary termination of a unit agreement?

BLM may approve the voluntary termination of a unit agreement at any time:

(a) After receiving a signed certification agreeing to the termination from a sufficient number of the working interest owners specified in the unit agreement who together represent a majority interest in the unit agreement; and

(b)(1) After the completion of the initial unit obligation well but before the establishment of a participating area; or

(2) After a participating area is established, upon receipt of information providing adequate assurance that:

(i) Diligent development and production of known commercial geothermal resources will occur; and

(ii) The public interest is protected.

### Subpart 3286—Model Unit Agreement

#### § 3286.1 Model Unit Agreement.

A unit agreement may use the following language:

Unit Agreement for the Development and Operation of the \_\_\_\_\_ Unit Area, County of \_\_\_\_\_, State of \_\_\_\_\_.

#### TABLE OF CONTENTS

Article I—Enabling Act and Regulations

Article XXXI—Special Federal Lease Stipulations and/or Conditions

This Agreement entered into as of the \_\_\_\_\_ day of \_\_\_\_\_, 20\_\_\_\_, by and between the parties subscribing, ratifying, or consenting hereto, and herein referred to as the “parties hereto”. Whereas the parties hereto are the owners of working, royalty, or other geothermal resources interests in land subject to this Agreement; and

Whereas the Geothermal Steam Act of 1970 (84 Stat. 1566), as amended, hereinafter referred to as the “Act” authorizes Federal lessees and their representatives to unite with each other, or jointly or separately with others, in collectively adopting and operating under a unit agreement for the purpose of more properly conserving the natural resources of any geothermal resources reservoir, field, or like area, or any part thereof, whenever determined and certified by the Secretary of the Interior to be necessary or advisable in the public interest; and

Whereas the parties hereto hold sufficient interest in the \_\_\_\_\_ Unit Area covering the land herein described to effectively control operations therein; and

Whereas, it is the purpose of the parties hereto to conserve natural resources, prevent waste, and secure other benefits obtainable through development and operations of the area subject to this Agreement under the terms, conditions, and limitations herein set forth;

Now, therefore, in consideration of the premises and the promises herein contained, the parties hereto commit to this agreement their respective interests in the below-defined Unit Area, and agree severally among themselves as follows:

## Bureau of Land Management, Interior

## § 3286.1

### ARTICLE I—ENABLING ACT AND REGULATIONS

1.1 The Act and all valid pertinent U.S. Department of the Interior regulations, including operating and unit plan regulations, heretofore or hereafter issued thereunder are accepted and made a part of this agreement as to Federal lands.

1.2 As to non-Federal lands, the Bureau of Land Management ("BLM") geothermal resources operating regulations in effect as of the effective date hereof governing drilling and producing operations, not inconsistent with the laws of the State in which the non-Federal land is located, are hereby accepted and made a part of this agreement.

### ARTICLE II—DEFINITIONS

2.1 The following terms shall have the meanings here indicated:

(a) *Geothermal Lease*. A lease issued under the act of December 24, 1970 (84 Stat. 1566), as amended, pursuant to the leasing regulations contained in 43 CFR Group 3200 and, unless the context indicates otherwise, "lease" shall mean a geothermal lease.

(b) *Unit Area*. The area described in Article III of this Agreement.

(c) *Unit Operator*. The person, association, partnership, corporation, or other business entity designated under this Agreement to conduct operations on Unitized Land as specified herein.

(d) *Participating Area*. That area of the Unit deemed to be productive as described in Article 12.1 herein and areas committed to the Unit by the Authorized Officer needed for support of operations of the Unit Area. The production allocated for lands used for support of operations shall be approved by the Authorized Officer pursuant to Articles 12.1 and 13.1 herein.

(e) *Working Interest*. The interest held in geothermal resources or in lands containing the same by virtue of a lease, operating agreement, fee title, or otherwise, under which, except as otherwise provided in this Agreement, the owner of such interest is vested with the right to explore for, develop, produce and utilize such resources. The right delegated to the Unit Operator as such by this Agreement is not to be regarded as a Working Interest.

(f) *Secretary*. The Secretary of the Interior or any person duly authorized to exercise powers vested in that officer.

(g) *Director*. The Director of the Bureau of Land Management or any person duly authorized to exercise powers vested in that officer.

(h) *Authorized Officer*. Any person authorized by law or by lawful delegation of authority in the Bureau of Land Management to perform the duties described.

### ARTICLE III—UNIT AREA AND EXHIBITS

3.1 The area specified on the map attached hereto marked "Exhibit A" is hereby designated and recognized as constituting the Unit Area, containing \_\_\_\_\_ acres, more or less. The above-described Unit Area shall be expanded, when practicable, to include therein any additional lands or shall be contracted to exclude lands whenever such expansion or contraction is deemed to be necessary or advisable to conform with the purposes of this Agreement.

3.2 Exhibit A attached hereto and made a part hereof is a map showing the boundary of the Unit Area, the boundaries and identity of tracts and leases in said area to the extent known to the Unit Operator.

3.3 Exhibit B attached hereto and made a part thereof is a schedule showing to the extent known to the Unit Operator the acreage, percentage, and kind of ownership of geothermal resources interests in all lands in the Unit Area.

3.4 Exhibits A and B shall be revised by the Unit Operator whenever changes in the Unit Area render such revision necessary, or when requested by the authorized officer, and not less than five copies of the revised Exhibits shall be filed with the authorized officer.

### ARTICLE IV—CONTRACTION AND EXPANSION OF UNIT AREA

4.1 Unless otherwise specified herein, the expansion and/or contraction of the Unit Area contemplated in Article 3.1 hereof shall be effected in the following manner:

(a) The Unit Operator, either on demand of the authorized officer or on its own motion and after prior concurrence by the authorized officer, shall prepare a notice of proposed expansion or contraction describing the contemplated changes in the boundaries of the Unit Area, the reasons therefore, and the proposed effective date thereof, preferably the first day of a month subsequent to the date of notice.

(b) Said notice shall be delivered to the authorized officer, and copies thereof mailed to the last known address of each Working Interest Owner, Lessee, and Lessor whose interests are affected, advising that 30 days will be allowed to submit any objections to the Unit Operator.

(c) Upon expiration of the 30-day period provided in the preceding item 4.1(b), Unit Operator shall file with the authorized officer evidence of mailing of the notice of expansion or contraction and a copy of any objections thereto that have been filed with the Unit Operator, together with an application in sufficient number, for approval of such expansion or contraction and with appropriate joinders.

(d) After due consideration of all pertinent information, the expansion or contraction

shall, upon approval by the authorized officer, become effective as of the date prescribed in the notice thereof.

4.2 Unitized Leases, insofar as they cover any lands excluded from the Unit Area under any of the provisions of this Article IV, may be maintained and continued in force and effect in accordance with the terms, provisions, and conditions contained in the Act, and the lease or leases and amendments thereto, except that operations and/or production under this Unit Agreement shall not serve to maintain or continue the excluded portion of any lease.

4.3 All legal subdivisions of unitized lands (i.e., 40 acres by Governmental survey or its nearest lot or tract equivalent in instances of irregular surveys), no part of which is entitled to be within a Participating Area on the 5th anniversary of the effective date of the initial Participating Area established under this Agreement, shall be eliminated automatically from this Agreement effective as of said 5th anniversary. Such lands shall no longer be a part of the Unit Area and shall no longer be subject to this Agreement, unless diligent drilling operations are in progress on an exploratory well on said 5th anniversary, in which event such lands shall not be eliminated from the Unit Area for as long as exploratory drilling operations are continued diligently with not more than six (6) months time elapsing between the completion of one exploratory well and the commencement of the next exploratory well.

4.4 An exploratory well, for the purposes of this Article IV, is defined as any well, regardless of surface location, projected for completion:

(a) In a zone or deposit below any zone or deposit for which a Participating Area has been established and is in effect; or

(b) At a subsurface location under Unitized Lands not entitled to be within a Participating Area.

4.5 In the event an exploratory well is completed during the six (6) months immediately preceding the 5th anniversary of the initial Participating Area established under this Agreement, lands not entitled to be within a Participating Area shall not be eliminated from this Agreement on said 5th anniversary, provided the drilling of another exploratory well is commenced under an approved Plan of Development within six (6) months after the completion of said well. In such event, the land not entitled to be in participation shall not be eliminated from the Unit Area so long as exploratory drilling operations are continued diligently with not more than six (6) months time elapsing between the completion of one exploratory well and the commencement of the next exploratory well.

4.6 With prior approval of the authorized officer, a specified period of time in excess of six (6) months may be allowed to elapse be-

tween the completion of one well and the commencement of the next well without the automatic elimination of nonparticipating acreage.

4.7 Unitized lands proved productive by drilling operations that serve to delay automatic elimination of lands under this Article IV shall be incorporated into a Participating Area (or Areas) in the same manner as such lands would have been incorporated in such areas had such lands been proven productive during the year preceding said 5th anniversary.

4.8 In the event nonparticipating lands are retained under this Agreement after the 5th anniversary of the initial Participating Area as a result of exploratory drilling operations, all legal subdivisions of unitized land (i.e., 40 acres by Government survey or its nearest lot or tract equivalent in instances of irregular Surveys), no part of which is entitled to be within a Participating Area, shall be eliminated automatically as of the 183rd day, or such later date as may be established by the authorized officer, following the completion of the last well recognized as delaying such automatic elimination beyond the 5th anniversary of the initial Participating Area established under this Agreement.

#### ARTICLE V—UNITIZED LAND AND UNITIZED SUBSTANCES

5.1 All land committed to this Agreement shall constitute land referred to herein as "Unitized Land." All geothermal resources in and produced from any and all formations of the Unitized Land are unitized under the terms of this agreement and herein are called "Unitized Substances."

#### ARTICLE VI—UNIT OPERATOR

6.1 \_\_\_\_\_ is hereby designated as Unit Operator, and by signature hereto as Unit Operator agrees and consents to accept the duties and obligations of Unit Operator for the discovery, development, production, distribution, and utilization of Unitized Substances as herein provided. Whenever reference is made herein to the Unit Operator, such reference means the Unit Operator acting in that capacity and not as an owner of interest in Unitized Substances, and the term "Working Interest Owner," when used herein, shall include or refer to Unit Operator as the owner of a Working Interest when such an interest is owned by it.

#### ARTICLE VII—RESIGNATION OR REMOVAL OF UNIT OPERATOR

7.1 The Unit Operator shall have the right to resign. Such resignation shall not become effective so as to release Unit Operator from the duties and obligations of Unit Operator or terminate Unit Operators rights, as such, for a period of six (6) months after notice of

## Bureau of Land Management, Interior

## § 3286.1

its intention to resign has been served by Unit Operator on all Working Interest Owners and the authorized officer, nor until all wells then drilled hereunder are placed in a satisfactory condition for suspension or abandonment, whichever is required by the authorized officer, unless a new Unit Operator shall have been selected and approved and shall have taken over and assumed the duties and obligations of Unit Operator prior to the expiration of said period.

7.2 The Unit Operator may, upon default or failure in the performance of its duties or obligations hereunder, be subject to removal by the same percentage vote of the owners of Working Interests as herein provided for the selection of a new Unit Operator. Such removal shall be effective upon notice thereof to the authorized officer.

7.3 The resignation or removal of Unit Operator under this Agreement shall not terminate its right, title, or interest as the owner of a Working Interest or other interest in Unitized Substances, but upon the resignation or removal of Unit Operator becoming effective, such Unit Operator shall deliver possession of all wells, equipment, material, and appurtenances used in conducting the unit operations to the new duly qualified successor Unit Operator or, if no such new unit operator is elected, to the common agent appointed to represent the Working Interest Owners in any action taken hereunder, to be used for the purpose of conducting operations hereunder.

7.4 In all instances of resignation or removal, until a successor Unit Operator is selected and approved as hereinafter provided, the Working Interest Owners shall be jointly responsible for performance of the duties and obligations of Unit Operator, and shall not later than 30 days before such resignation or removal becomes effective appoint a common agent to represent them in any action to be taken hereunder.

7.5 The resignation or removal of Unit Operator shall not release Unit Operator from any liability for any default by it hereunder occurring prior to the effective date of its resignation or removal.

### ARTICLE VIII—SUCCESSOR UNIT OPERATOR

8.1 If, prior to the establishment of a Participating Area hereunder, the Unit Operator shall resign as Operator, or shall be removed as provided in Article VII, a successor Unit Operator may be selected by vote of the more than one-half of the owners of the Working Interests in Unitized Substances, based on their respective shares, on an acreage basis, in the Unitized Land.

8.2 If, after the establishment of a Participating Area hereunder, the Unit Operator shall resign as Unit Operator, or shall be removed as provided in Article VII, a successor Unit Operator may be selected by a vote of more than one-half of the owners of the

Working Interests in Unitized Substances, based on their respective shares, on a participating acreage basis; provided that, if a majority but less than 60 percent of the Working Interest in the Participating Lands is owned by a party to this agreement, a concurring vote of one or more additional Working Interest Owners owning 10 percent or more of the Working Interest in the participating land shall be required to select a new Unit Operator.

8.3 The selection of a successor Unit Operator shall not become effective until:

(a) The Unit Operator so selected shall accept in writing the duties, obligations, and responsibilities of the Unit Operator; and

(b) The selection shall have been approved by the authorized officer.

8.4 If no successor Unit Operator is selected and qualified as herein provided, the authorized officer at his or her election may declare this Agreement terminated.

### ARTICLE IX—ACCOUNTING PROVISIONS AND UNIT OPERATING AGREEMENT

9.1 Costs and expenses incurred by Unit Operator in conducting unit operations hereunder shall be paid and apportioned among and borne by the owners of Working Interests; all in accordance with the agreement or agreements entered into by and between the Unit Operator and the owners of Working Interests, whether one or more, separately or collectively.

9.2 Any agreement or agreements entered into between the Working Interest Owners and the Unit Operator as provided in this Article, whether one or more, are herein referred to as the "Unit Operating Agreement."

9.3 The Unit Operating Agreement shall provide the manner in which the Working Interest Owners shall be entitled to receive their respective share of the benefits accruing hereto in conformity with their underlying operating agreements, leases, or other contracts, and such other rights and obligations, as between Unit Operator and the Working Interest Owners.

9.4 Neither the Unit Operating Agreement nor any amendment thereto shall be deemed either to modify any of the terms and conditions of this Agreement or to relieve the Unit Operator of any right or obligation established under this Agreement.

9.5 In case of any inconsistency or conflict between this Agreement and the Unit Operating Agreement, this Agreement shall govern.

9.6 Three true copies of any Unit Operating Agreement executed pursuant to this Article IX shall be filed with the authorized officer prior to approval of this Agreement.

ARTICLE X—RIGHTS AND OBLIGATIONS OF UNIT OPERATOR

10.1 The right, privilege, and duty of exercising any and all rights of the parties hereto that are necessary or convenient for exploring, producing, distributing, or utilizing Unitized Substances are hereby delegated to and shall be exercised by the Unit Operator as provided in this Agreement in accordance with a Plan of Development approved by the authorized officer.

10.2 Upon request by Unit Operator, acceptable evidence of title to geothermal resources interests in the Unitized Land shall be deposited with the Unit Operator and together with this Agreement shall constitute and define the rights, privileges, and obligations of Unit Operator.

10.3 Nothing in this Agreement shall be construed to transfer title to any land or to any lease or operating agreement, it being understood that the Unit Operator, in its capacity as Unit Operator, shall exercise the rights of possession and use vested in the parties hereto only for the purposes specified in this Agreement.

10.4 The Unit Operator shall take such measures as the authorized officer deems appropriate and adequate to prevent drainage of Unitized Substances from Unitized Land by wells on land not subject to this Agreement.

10.5 The authorized officer is hereby vested with authority to alter or modify, from time to time, in the authorized officer's discretion, the rate of prospecting and development and the quantity and rate of production under this Agreement.

ARTICLE XI—PLAN OF DEVELOPMENT

11.1 Concurrently with the submission of this Agreement to BLM for approval, the Unit Operator shall submit to BLM an acceptable initial Plan of Development. Said plan shall be as complete and adequate as the authorized officer may determine to be necessary for timely exploration and/or development, and to insure proper protection of the environment and conservation of the natural resources of the Unit Area.

11.2 Prior to the expiration of the initial Plan of Development, or any subsequent Plan of Development, Unit Operator shall submit for approval of the authorized officer an acceptable subsequent Plan of Development for the Unit Area which, when approved by the authorized officer, shall constitute the exploratory and/or development drilling and operating obligations of Unit Operator under this Agreement for the period specified therein.

11.3 Any Plan of Development submitted hereunder shall:

(a) Specify the number and locations of any exploration operations to be conducted

or wells to be drilled, and the proposed order and time for such operations or drilling; and

(b) To the extent practicable, specify the operating practices regarded as necessary and advisable for proper conservation of natural resources and protection of the environment in compliance with section 1.1 of this Agreement.

11.4 The Plan of Development submitted concurrently with this Agreement for approval shall prescribe that the Unit Operator shall begin to drill a unit well identified in the Plan of Development approved by the authorized officer, unless on such effective date a well is being drilled conformably with the terms hereof, and thereafter continue such drilling diligently until the \_\_\_\_\_ formation has been tested or until at a lesser depth unitized substances shall be discovered that can be produced in commercial quantities (i.e., quantities sufficient to repay the costs of drilling, completing, and producing operations, with a reasonable profit) or the Unit Operator shall at any time establish to the satisfaction of the authorized officer that further drilling of said well would be unwarranted or impracticable; provided, however, that the Unit Operator shall not in any event be required to drill said well to a depth in excess of \_\_\_\_\_ feet.

11.5 The initial Plan of Development and/or subsequent Plan of Development submitted under this Article shall provide that the Unit Operator shall initiate a continuous drilling program providing for drilling of no less than one well at a time, and allowing no more than six (6) months time to elapse between completion and testing of one well and the beginning of the next well, until a well capable of producing or utilizing Unitized Substances in commercial quantities is completed to the satisfaction of the authorized officer, or until it is reasonably proven that the Unitized Land is incapable of producing Unitized Substances in commercial quantities in the formations drilled under this Agreement.

11.6 The authorized officer may modify the exploration operation or drilling requirements of the initial or subsequent Plans of Development by granting reasonable extensions of time when, in his or her opinion, such action is warranted and in the public interest.

11.7 Until a well capable of producing or utilizing Unitized Substances in commercial quantities is completed, the failure of Unit Operator in a timely manner to conduct any exploration operations or drill any of the wells provided for in Plans of Development required under this Article XI or to submit a timely and acceptable subsequent Plan of Development, shall, after notice of default or notice of prospective default to Unit Operator by the authorized officer, and after failure of Unit Operator to remedy any actual

## Bureau of Land Management, Interior

## § 3286.1

default within a reasonable time (as determined by the authorized officer), result in automatic termination of this Agreement effective as of the date of the default, as determined by the authorized officer.

11.8 Separate Plans of Development may be submitted for separate productive zones, subject to the approval of the authorized officer. Also subject to the approval of the authorized officer, Plans of Development shall be modified or supplemented when necessary to meet changes in conditions or to protect the interest of all parties to this Agreement.

### ARTICLE XII—PARTICIPATING AREAS

12.1 Prior to the commencement of production of Unitized Substances, the Unit Operator shall submit for approval by the authorized officer a schedule (or schedules) of all land then regarded as reasonably proven to be productive from a pool or deposit discovered or developed; all lands in said schedule (or schedules), on approval of the authorized officer, will constitute a Participating Area (or Areas), effective as of the date production commences or the effective date of this Unit Agreement, whichever is later. Said schedule (or schedules) shall also set forth the percentage of Unitized Substances to be allocated, as herein provided, to each tract in the Participating Area (or Areas), and shall govern the allocation of production, commencing with the effective date of the Participating Area.

12.2 A separate Participating Area shall be established for each separate pool or deposit of Unitized Substances or for any group thereof that is produced as a single pool or deposit, and any two or more Participating Areas so established may be combined into one, on approval of the authorized officer. The effective date of any Participating Area established after the commencement of actual production of Unitized Substances shall be the first of the month in which is obtained the knowledge or information on which the establishment of said Participating Area is based, unless a more appropriate effective date is proposed by the Unit Operator and approved by the authorized officer.

12.3 Any Participating Area (or Areas) established under 12.1 or 12.2 above shall, subject to the approval of the authorized officer, be revised from time to time to:

(a) Include additional land then regarded as reasonably proved to be productive from the pool or deposit for which the Participating Area was established;

(b) Include lands necessary to unit operations;

(c) Exclude land then regarded as reasonably proved not to be productive from the pool or deposit for which the Participating Area was established; or

(d) Exclude land not necessary to unit operations; and

(e) Revise the schedule (or schedules) of allocation percentages accordingly.

12.4 Subject to the limitation cited in 12.1 hereof, the effective date of any revision of a Participating Area established under Articles 12.1 or 12.2 shall be the first of the month in which is obtained the knowledge or information on which such revision is predicated; provided, however, that a more appropriate effective date may be used if justified by the Unit Operator and approved by the authorized officer.

12.5 No land shall be excluded from a Participating Area on account of depletion of the Unitized Substances, except that any Participating Area established under the provisions of this Article XII shall terminate automatically whenever all operations are abandoned in the pool or deposit for which the Participating Area was established.

12.6 Nothing herein contained shall be construed as requiring any retroactive adjustment for production obtained prior to the effective date of the revision of a Participating Area.

### ARTICLE XIII—ALLOCATION OF UNITIZED SUBSTANCES

13.1 All Unitized Substances produced from a Participating Area established under this Agreement shall be deemed to be produced equally, on an acreage basis, from the several tracts of Unitized Land within the Participating Area established for such production.

13.2 For the purpose of determining any benefits accruing under this Agreement, each Tract of Unitized Land shall have allocated to it such percentage of said production as the number of acres in the Tract included in the Participating Area bears to the total number of acres of Unitized Land in said Participating Area.

13.3 Allocation of production hereunder for purposes other than settlement of the royalty obligations of the respective Working Interest Owners shall be on the basis prescribed in the Unit Operating Agreement, whether in conformity with the basis of allocation set forth above or otherwise.

13.4 The Unitized Substances produced from a Participating Area shall be allocated as provided herein, regardless of whether any wells are drilled on any particular part or tract of said Participating Area.

### ARTICLE XIV—RELINQUISHMENT OF LEASES

14.1 Pursuant to the provisions of the Federal leases and 43 CFR subpart 3213, a lessee of record shall, subject to the provisions of the Unit Operating Agreement, have the right to relinquish any of its interests in leases committed hereto, in whole or in part; provided, that no relinquishment shall be

made of interests in land within a Participating Area without the prior approval of the authorized officer.

14.2 A Working Interest Owner may exercise the right to surrender, when such right is vested in it by any non-Federal lease, sublease, or operating agreement, provided that each party who will or might acquire the Working Interest in such lease by such surrender or by forfeiture is bound by the terms of this Agreement, and further provided that no relinquishment shall be made of such land within a Participating Area without the prior written consent of the non-Federal Lessor.

14.3 If, as the result of relinquishment, surrender, or forfeiture, the Working Interests become vested in the fee owner or lessor of the Unitized Substances, such owner may:

(a) Accept those Working Interest rights and obligations subject to this Agreement and the Unit Operating Agreement, or

(b) Lease the portion of such land as is included in a Participating Area established hereunder, subject to this Agreement and the Unit Operating Agreement, and provide for the independent operation of any part of such land that is not then included within a Participating Area established hereunder.

14.4 If the fee owner or lessor of the Unitized Substances does not, (1) accept the Working Interest rights and obligations subject to this Agreement and the Unit Operating Agreement, or (2) lease such lands as provided in 14.3 above within six (6) months after the relinquished, surrendered, or forfeited Working Interest becomes vested in said fee owner or lessor, the Working Interest benefits and obligations accruing to such land under this Agreement and the Unit Operating Agreement shall be shared by the owners of the remaining unitized Working Interests in accordance with their respective Working Interest ownerships, and such owners of Working Interests shall compensate the fee owner or lessor of Unitized Substances in such lands by paying sums equal to the rentals, minimum royalties, and royalties applicable to such lands under the lease or leases in effect when the Working Interests were relinquished, surrendered, or forfeited.

14.5 Subject to the provisions of 14.4 above, an appropriate accounting and settlement shall be made for all benefits accruing to or payments and expenditures made or incurred on behalf of any surrendered or forfeited Working Interest subsequent to the date of surrender or forfeiture, and payment of any moneys found to be owing by such an accounting shall be made as between the parties within thirty (30) days.

14.6 In the event no Unit Operating Agreement is in existence and a mutually acceptable agreement cannot be consummated between the proper parties, the authorized officer may prescribe such reasonable and equi-

table conditions of agreement as he deems warranted under the circumstances.

14.7 The exercise of any right vested in a Working Interest Owner to reassign such Working Interest to the party from whom it was obtained shall be subject to the same conditions as set forth in this Article XIV in regard to the exercise of a right to surrender.

#### ARTICLE XV—RENTALS

15.1 Any unitized lease on non-Federal land containing provisions that would terminate such lease unless (1) drilling operations are commenced upon the land covered thereby within the time therein specified or (2) rentals are paid for the privilege of deferring such drilling operations, the rentals required thereby shall, notwithstanding any other provisions of this Agreement, be deemed to accrue as to the portion of the lease not included within a Participating Area and become payable during the term thereof as extended by this Agreement, and until the required drillings are commenced upon the land covered thereby.

15.2 Nothing herein operates to relieve the lessees of any land from their respective lease obligations for the payment of any rental or royalty due under their leases.

15.3 Rental and royalty due on the leases committed to the Unit shall be paid by Working Interest Owners responsible under existing contracts, laws, and regulations, or by the Unit Operator.

#### ARTICLE XVI—OPERATIONS ON NONPARTICIPATING LAND

16.1 Any party hereto owning or controlling the Working Interest in any Unitized Land having a regular well location may, with the approval of the authorized officer and at such party's sole risk, costs, and expense, drill a well to test any formation of deposit for which a Participating Area has not been established or to test any formation or deposit for which a Participating Area has been established if such location is not within said Participating Area, unless within 30 days of receipt of notice from said party of his intention to drill the well, the Unit Operator elects and commences to drill such a well in like manner as other wells are drilled by the Unit Operator under this Agreement.

16.2 If any well drilled by a Working Interest Owner other than the Unit Operator proves that the land upon which said well is situated may properly be included in a Participating Area, such Participating Area shall be established or enlarged as provided in this Agreement, and the well shall thereafter be operated by the Unit Operator in accordance with the terms of this Agreement and the Unit Operating Agreement.

## Bureau of Land Management, Interior

## § 3286.1

### ARTICLE XVII—LEASES AND CONTRACTS CONFORMED AND EXTENDED

17.1 The terms, conditions, and provisions of all leases, subleases, and other contracts relating to exploration, drilling, development, or utilization of geothermal resources on lands committed to this Agreement, are hereby expressly modified and amended only to the extent necessary to make the same conform to the provisions hereof. Otherwise said leases, subleases, and contracts shall remain in full force and effect.

17.2 The parties hereto consent that the Secretary shall, by his or her approval hereof, modify and amend the Federal leases committed hereto to the extent necessary to conform said leases to the provisions of this Agreement.

17.3 The development and/or operation of lands subject to this Agreement under the terms hereof shall be deemed full performance of any obligations for development and operation with respect to each and every separately owned tract subject to this Agreement, regardless of whether there is any development of any particular tract of the Unit Area.

17.4 Drilling and/or producing operations performed hereunder upon any tract of Unitized Lands will be deemed to be performed upon and for the benefit of each and every tract of Unitized Land.

17.5 Suspension of operations and/or production on all Unitized Lands pursuant to direction or consent of the Secretary or his duly authorized representative shall be deemed to constitute such suspension pursuant to such direction or consent as to each and every tract of Unitized Land. A suspension of operations and/or production limited to specified lands shall be applicable only to such lands.

17.6 Subject to the provisions of Article XV hereof and 17.10 of this Article, each lease, sublease, or contract relating to the exploration, drilling, development, or utilization of geothermal resources of lands other than those of the United States committed to this Agreement, is hereby extended beyond any such term provided therein so that it shall be continued for and during the term of this Agreement.

17.7 Subject to the lease renewal and the readjustment provision of the Act, any Federal lease committed hereto may, as to the Unitized Lands, be continued for the term so provided in such lease, or as extended by law or regulation. If it is appropriate for BLM to extend the term of a lease to match the term of the unit, the Unit Operator shall take the actions required for such extension under 43 CFR 3207.17. This subsection shall not operate to extend any lease or portion thereof as to lands excluded from the Unit Area by the contraction thereof.

17.8 Each sublease or contract relating to the operations and development of Unitized Substances from lands of the United States committed to this Agreement shall be continued in force and effect for and during the term of the underlying lease.

17.9 Any Federal lease heretofore or hereafter committed to any such unit plan embracing lands that are in part within and in part outside of the area covered by any such plan shall be segregated into separate leases as to the lands committed and the lands not committed, as of the effective date of unitization.

17.10 In the absence of any specific lease provision to the contrary, any lease, other than a Federal lease, having only a portion of its land committed hereto shall be segregated as to the portion committed and the portion not committed, and the provisions of such lease shall apply separately to such segregated portions, commencing as of the effective date hereof. In the event any such lease provides for a lump-sum rental payment, such payment shall be prorated between the portions so segregated in proportion to the acreage of the respective tracts.

17.11 Upon termination of this Agreement, the leases covered hereby may be maintained and continued in force and effect in accordance with the terms, provisions, and conditions of the Act, the lease or leases, and amendments thereto.

### ARTICLE XVIII—EFFECTIVE DATE AND TERM

18.1 This Agreement shall become effective upon approval by the Secretary or his duly authorized representative, and shall terminate five (5) years from said effective date unless:

(a) Such date of expiration is extended by the authorized officer;

(b) Unitized Substances are produced or utilized in commercial quantities in which event this Agreement shall continue for so long as Unitized Substances are produced or utilized in commercial quantities; or

(c) This Agreement is terminated prior to the end of said five (5) year period as heretofore provided.

18.2 This Agreement may be terminated at any time by the owners of a majority of the Working Interests on an acreage basis, with the approval of the authorized officer. Notice of any such approval shall be given by the Unit Operator to all parties hereto.

### ARTICLE XIX—APPEARANCES

19.1 Unit Operator shall, after notice to other parties affected, have the right to appear for and on behalf of any and all interests affected hereby before the Department of the Interior, and to appeal from decisions, orders or rulings issued under the regulations of said Department, or to apply for relief from any of said regulations or in any

## § 3286.1

proceedings relative to operations before the Department of the Interior or any other legally constituted authority: Provided, however, that any interested parties shall also have the right, at their own expense, to be heard in any such proceeding.

### ARTICLE XX—NO WAIVER OF CERTAIN RIGHTS

20.1 Nothing contained in this Agreement shall be construed as a waiver by any party hereto of the right to assert any legal or constitutional right or defense pertaining to the validity or invalidity of any law of the State wherein lands subject to this Agreement are located, or of the United States, or regulations issued thereunder, in any way affecting such party, or as a waiver by any such party of any right beyond his or its authority to waive.

### ARTICLE XXI—UNAVOIDABLE DELAY

21.1 The obligations imposed by this Agreement requiring Unit Operator to commence or continue drilling or to produce or utilize Unitized Substances from any of the land covered by this Agreement, shall be suspended while, but only so long as, Unit Operator, despite the exercise of due care and diligence, is prevented from complying with such obligations, in whole or in part, by strikes, Acts of God, Federal or other applicable law, Federal or other authorized governmental agencies, unavoidable accidents, uncontrollable delays in transportation, inability to obtain necessary materials in open market, or other matters beyond the reasonable control of Unit Operator, whether similar to matters herein enumerated or not.

21.2 No unit obligation that is suspended under this section shall become due less than thirty (30) days after it has been determined that the suspension is no longer applicable.

21.3 Determination of creditable "Unavoidable Delay" time shall be made by the Unit Operator, subject to approval by the authorized officer.

### ARTICLE XXII—POSTPONEMENT OF OBLIGATIONS

22.1 Notwithstanding any other provisions of this Agreement, the Authorized officer, on his own initiative or upon appropriate justification by Unit Operator, may postpone any obligation established by and under this Agreement to commence or continue drilling or to operate on or produce Unitized Substances from lands covered by this Agreement when, in his judgment, circumstances warrant such action.

### ARTICLE XXIII—NONDISCRIMINATION

23.1 In connection with the performance of work under this Agreement, the Operator agrees to comply with all of the provisions of section 202(1) to (7) inclusive, of Executive Order 11246 (30 FR 12319), as amended by Ex-

## 43 CFR Ch. II (10–1–08 Edition)

ecutive Order 11375 (32 FR 14303), which are hereby incorporated by reference in this Agreement.

### ARTICLE XXIV—COUNTERPARTS

24.1 This Agreement may be executed in any number of counterparts, no one of which needs to be executed by all parties, or may be ratified or consented to by separate instruments in writing specifically referring hereto, and shall be binding upon all parties who have executed such a counterpart, ratification, or consent hereto, with the same force and effect as if all such parties had signed the same document.

### ARTICLE XXV—SUBSEQUENT JOINDER

25.1 If the owner of any substantial interest in geothermal resources under a tract within the Unit Area fails or refuses to subscribe or consent to this Agreement, the owner of the Working Interest in that tract may withdraw said tract from this Agreement by written notice delivered to the authorized officer and the Unit Operator prior to the approval of this Agreement by the authorized officer.

25.2 Any geothermal resources interests in lands within the Unit Area not committed hereto prior to approval of this Agreement may thereafter be committed by the owner or owners thereof subscribing or consenting to this Agreement, and, if the interest is a Working Interest, by the owner of such interest also subscribing to the Unit Operating Agreement.

25.3 After operations are commenced hereunder, the right of subsequent joinder, as provided in this Article XXV, by a Working Interest Owner is subject to such requirements or approvals, if any, pertaining to such joinder, as may be provided for in the Unit Operating Agreement. Joinder to the Unit Agreement by a Working Interest Owner at any time must be accompanied by appropriate joinder to the Unit Operating Agreement, if more than one committed Working Interest Owner is involved, in order for the interest to be regarded as committed to this Unit Agreement.

25.4 After final approval hereof, joinder by a nonworking interest owner must be consented to in writing by the Working Interest Owner committed hereto and responsible for the payment of any benefits that may accrue hereunder in behalf of such nonworking interest. A nonworking interest may not be committed to this Agreement unless the corresponding Working Interest is committed hereto.

25.5 Except as may otherwise herein be provided, subsequent joinders to this Agreement shall be effective as of the first day of

## Bureau of Land Management, Interior

## § 3287.1

the month following the filing with the authorized officer of duly executed counterparts of all or any papers necessary to establish effective commitment of any tract to this Agreement, unless objection to such joinder is duly made within sixty (60) days by the authorized officer.

### ARTICLE XXVI—COVENANTS RUN WITH THE LAND

26.1 The covenants herein shall be construed to be covenants running with the land with respect to the interest of the parties hereto and their successors in interest until this Agreement terminates, and any grant, transfer, or conveyance, of interest in land or leases subject hereto shall be and hereby is conditioned upon the assumption of all privileges and obligations hereunder by the grantee, transferee, or other successor in interest.

26.2 No assignment or transfer of any Working Interest or other interest subject hereto shall be binding upon Unit Operator until the first day of the calendar month after Unit Operator is furnished with the original, photostatic, or certified copy of the instrument of transfer.

### ARTICLE XXVII—NOTICES

27.1 All notices, demands, or statements required hereunder to be given or rendered to the parties hereto shall be deemed fully given if given in writing and personally delivered to the party or sent by postpaid registered or certified mail, addressed to such party or parties at their respective addresses set forth in connection with the signatures hereto, or to the ratification or consent hereof, or to such other address as any such party may have furnished in writing to the party sending the notice, demand, or statement.

### ARTICLE XXVIII—LOSS OF TITLE

28.1 In the event title to any tract of Unitized Land shall fail and the true owner cannot be induced to join in this Agreement, such tract shall be automatically regarded as not committed hereto, and there shall be such readjustment of future costs and benefits as may be required on account of the loss of such title.

28.2 In the event of a dispute as to title to any royalty, Working Interest, or other interests subject hereto, payment or delivery on account thereof may be withheld without liability for interest until the dispute is finally settled: Provided, That, as to Federal land or leases, no payments of funds due the United States shall be withheld, but such funds shall be deposited as directed by the authorized officer to be held as unearned money pending final settlement of the title dispute, and then applied as earned or re-

turned in accordance with such final settlement.

### ARTICLE XXIX—TAXES

29.1 The Working Interest Owners shall render and pay for their accounts and the accounts of the owners of nonworking interests all valid taxes on or measured by the Unitized Substances in and under, or that may be produced, gathered, and sold or utilized from, the land subject to this Agreement after the effective date hereof.

29.2 The Working Interest Owners on each tract may charge a proper proportion of the taxes paid under 29.1 hereof to the owners of nonworking interests in said tract, and may reduce the allocated share of each royalty owner for taxes so paid. No taxes shall be charged to the United States or the State of \_\_\_\_\_ or to any lessor who has a contract with his lessee which requires the lessee to pay such taxes.

### ARTICLE XXX—RELATION OF PARTIES

30.1 It is expressly agreed that the relation of the parties hereto is that of independent contractors, and nothing in this Agreement contained, expressed, or implied, nor any operations conducted hereunder, shall create or be deemed to have created a partnership or association between the parties hereto or any of them.

### ARTICLE XXXI—SPECIAL FEDERAL LEASE STIPULATIONS AND/OR CONDITIONS

31.1 Nothing in this Agreement shall modify special lease stipulations and/or conditions applicable to lands of the United States. No modification of the conditions necessary to protect the lands or functions of lands under the jurisdiction of any Federal agency is authorized except with prior consent in writing whereby the authorizing official specifies the modification permitted.

*In witness whereof*, the parties hereto have caused this Agreement to be executed and have set opposite their respective names the date of execution.

## Subpart 3287—Relief and Appeals

### § 3287.1 May the unit operator request a suspension of unit obligations or development requirements?

The unit operator may provide a written request to BLM to suspend any or all obligations under the unit agreement. BLM will specify the term of the

## § 3287.2

suspension and any requirements the unit operator must meet for the suspension to remain in effect.

### § 3287.2 When may BLM grant a suspension of unit obligations?

(a) BLM may grant a suspension of unit obligations when, despite the exercise of due care and diligence, the unit operator is prevented from complying with such obligations, in whole or in part, by:

- (1) Acts of God;
- (2) Federal, state, or municipal laws;
- (3) Labor strikes;
- (4) Unavoidable accidents;
- (5) Uncontrollable delays in transportation;

(6) The inability to obtain necessary materials or equipment in the open market; or

(7) Other circumstances that BLM determines are beyond the reasonable control of the unit operator, such as agency timeframes required to complete environmental documents.

(b) BLM may deny the request for suspension of unit obligations when the suspension would involve a lengthy or indefinite period. For example, BLM might not approve a suspension of initial drilling obligations due to a unit operator's inability to obtain an electrical sales contract, or when poor economics affect the electrical generation market, limiting the opportunity to obtain a viable sales contract. BLM may grant a suspension of subsequent drilling obligations when it is in the public interest.

### § 3287.3 How does a suspension of unit obligations affect the terms of the unit agreement?

(a) BLM may suspend any terms of the unit agreement during the period a suspension is effective. During the period of the suspension, the involved unit terms are tolled. The suspension may not relieve the unit operator of its responsibility to meet other requirements of the unit agreement. For example, the unit operator may continue to be required to diligently develop or produce the resource during a suspension of drilling obligations.

(b) The unit operator must ensure all interests in the agreement are notified

## 43 CFR Ch. II (10–1–08 Edition)

of any suspension granted and the terms of the suspension.

### § 3287.4 May a decision made by BLM under this part be appealed?

A unit operator or any other adversely affected person may appeal a BLM decision regarding unit administration or operations in accordance with § 3200.5 of this chapter.

### Subpart 3400—Introduction: General

#### § 3400.0–3 Authority.

(a) These regulations are issued under the authority of and to implement provisions of:

(1) The Mineral Leasing Act of February 25, 1920, as amended (30 U.S.C. 181 *et seq.*).

(2) The Mineral Leasing Act for Acquired Lands of August 7, 1947, as amended (30 U.S.C. 351–359 *et seq.*).

(3) The Federal Land Policy and Management Act of 1976, October 21, 1976 (43 U.S.C. 1701 *et seq.*).

(4) The Surface Mining Control and Reclamation Act of 1977, August 3, 1977 (30 U.S.C. 1201 *et seq.*).

(5) The Multiple Mineral Development Act of August 13, 1954 (30 U.S.C. 521–531 *et seq.*).

## Bureau of Land Management, Interior

## § 3400.0-5

(6) The Department of Energy Organization Act of August 4, 1977 (42 U.S.C. 7101 *et seq.*).

(7) The National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*).

(8) The Federal Coal Leasing Amendments Act of 1976, as amended (90 Stat. 1083-1092).

(9) The Act of October 30, 1978 (92 Stat. 2073-2075).

(b) Specific citations of authority in subsequent subparts of this Group 3400 are to authorities from which the subpart is chiefly derived or which the subpart chiefly implements.

### § 3400.0-5 Definitions.

As used in this group:

(a) *Alluvial valley floor* has the meaning set forth in 30 CFR Chapter VII.

(b) *Authorized officer* means any employee of the Bureau of Land Management delegated the authority to perform the duty described in the section in which the term is used.

(c) *Bonus* means that value in excess of the rentals and royalties that accrues to the United States because of coal resource ownership that is paid as part of the consideration for receiving a lease.

(d) *Bypass coal* means an isolated coal deposit that cannot, for the foreseeable future, be mined economically and in an environmentally sound manner either separately or as part of any mining operation other than that of the applicant for either an emergency lease under the provisions of § 3425.1-4 of this title or a lease modification.

(e) *Casual use* means activities which do not ordinarily lead to any appreciable disturbance or damage to lands, resources or improvements, for example, activities which do not involve use of heavy equipment or explosives and which do not involve vehicle movement except over already established roads and trails.

(f) *Certificate of bidding rights* means a right granted by the Secretary to apply the fair market value of a relinquished coal or other mineral lease or right to a preference right coal or other mineral lease as a credit against the bonus bid or bids on a competitive lease or leases acquired at a lease sale or sales, or as a credit against the payment required for a coal lease modification.

(g) *Coal deposits* mean all Federally owned coal deposits, except those held in trust for Indians.

(h) *Department* means the United States Department of the Interior.

(i) *Director* means the Director of the Bureau of Land Management unless otherwise indicated.

(j) *Environmental assessment* means a document prepared by the responsible Federal agency consistent with 40 CFR 1508.9.

(k) *Exploration* has the meaning set forth in § 3480.0-5(a)(17) of this title.

(l) *Exploration license* means a license issued by the authorized officer to permit the licensee to explore for coal on unleased Federal lands.

(m) *Exploration plan* has the meaning set forth in § 3480.0-5(a)(18) of this title.

(n) *Fair market value* means that amount in cash, or on terms reasonably equivalent to cash, for which in all probability the coal deposit would be sold or leased by a knowledgeable owner willing but not obligated to sell or lease to a knowledgeable purchaser who desires but is not obligated to buy or lease.

(o) *Federal lands* mean lands owned by the United States, without reference to how the lands were acquired or what Federal agency administers the lands, including surface estate, mineral estate and coal estate, but excluding lands held by the United States in trust for Indians, Aleuts or Eskimos.

(p) *Governmental entity* means a Federal or state agency or a political subdivision of a state, including a county or a municipality, or any corporation acting primarily as an agency or instrumentality of a state, which produces electrical energy for sale to the public.

(q) *Interest* in a lease, application or bid means: any record title interest, overriding royalty interest, working interest, operating rights or option, or any agreement covering such an interest; any claim or any prospective or future claim to an advantage or benefit from a lease; and any participation or any defined or undefined share in any increments, issues, or profits that may be derived from or that may accrue in any manner from the lease based on or pursuant to any agreement or understanding existing when the application

was filed or entered into while the lease application or bid is pending. Stock ownership or stock control does not constitute an interest in a lease within the meaning of this definition. Attribution of acreage to stock ownership interests in leases is covered by § 3472.1-3(b) of this title.

(r) *Lease* means a Federal lease, issued under the coal leasing provisions of the mineral leasing laws, which grants the exclusive right to explore for and extract coal. In provisions of this group that also refer to Federal leases for minerals other than coal, the term *Federal coal lease* may apply.

(s) *Lease bond* means the bond or equivalent security given the Department to assure payment of all obligations under a lease, exploration license, or license to mine, and to assure that all aspects of the mining operation other than reclamation operations under a permit on a lease are conducted in conformity with the approved mining or exploration plan. This is the same as the *Federal lease bond* referred to in 30 CFR 742.11(a).

(t) *Licensee* means the holder of an exploration license.

(u) *License to mine* means a license issued under the provisions of part 3440 to mine coal for domestic use.

(v) *Logical Mining Unit* has the meaning set forth in § 3480.0-5(a)(22) of this title.

(w) *Logical Mining Unit reserves* has the meaning set forth in the term *logical mining unit recoverable coal reserves* in § 3480.0-5(a)(23) of this title.

(x) *Maximum economic recovery* has the meaning set forth in § 3480.0-5(a)(24) of this title.

(y) *Mineral leasing laws* mean the Mineral Leasing Act of 1920, as amended (30 U.S.C. 181 *et seq.*), and the Mineral Leasing Act for Acquired Lands of 1947, as amended (30 U.S.C. 351-359).

(z) *Mining plan* means a resource recovery and protection plan as described in § 3480.0-5(a)(39) of this title.

(aa) *Mining Supervisor* means the authorized officer.

(bb) *Mining unit* means an area containing technically recoverable coal that will feasibly support a commercial mining operation. The coal may either be Federal coal or be both Federal and non-Federal coal.

(cc) *Operator* means a lessee, exploration licensee or one conducting operations on a lease or exploration license under the authority of the lessee or exploration licensee.

(dd) *Permit* has the meaning set forth in 30 CFR Chapter VII.

(ee) *Permit area* has the meaning set forth in 30 CFR Chapter VII.

(ff) *Public bodies* means Federal and state agencies; political subdivisions of a state, including counties and municipalities; rural electric cooperatives and similar organizations; and nonprofit corporations controlled by any such entities.

(gg) *Qualified surface owner* means the natural person or persons (or corporation, the majority stock of which is held by a person or persons otherwise meeting the requirements of this section) who:

(1) Hold legal or equitable title to the surface of split estate lands;

(2) Have their principal place of residence on the land, or personally conduct farming or ranching operations upon a farm or ranch unit to be affected by surface mining operations; or receive directly a significant portion of their income, if any, from such farming and ranching operations; and

(3) Have met the conditions of paragraphs (gg) (1) and (2) of this section for a period of at least 3 years, except for persons who gave written consent less than 3 years after they met the requirements of both paragraphs (gg) (1) and (2) of this section. In computing the three year period the authorized officer shall include periods during which title was owned by a relative of such person by blood or marriage if, during such periods, the relative would have met the requirements of this section.

(hh) *Reserves* has the meaning set forth in the term *recoverable coal reserves* in § 3480.0-5(a)(37) of this title.

(ii) *Secretary* means the Secretary of the Interior.

(jj) *Sole party in interest* means a party who is and will be vested with all legal and equitable rights under a lease, bid, or an application for a lease. No one is a sole party in interest with respect to a lease or bid in which any other party has any interest.

(kk) *Split estate* means land in which the ownership of the surface is held by

persons, including governmental bodies, other than the Federal government and the ownership of underlying coal is, in whole or in part, reserved to the Federal government.

(ll) *Substantial legal and financial commitments* means significant investments that have been made on the basis of a long-term coal contract in power plants, railroads, coal handling and preparation, extraction or storage facilities and other capital intensive activities. Costs of acquiring the coal in place or of the right to mine it without an existing mine are not sufficient to constitute *substantial legal and financial commitments*.

(mm) *Surface coal mining operations* means activities conducted on the surface of lands in connection with a surface coal mine or surface operations and surface impacts incident to an underground mine, as defined in section 701(28) of the Surface Mining Control and Reclamation Act (30 U.S.C. 1291(28)).

(nn) *Surface management agency* means the Federal agency with jurisdiction over the surface of federally owned lands containing coal deposits, and, in the case of private surface over Federal coal, the Bureau of Land Management, except in areas designated as National Grasslands, where it means the Forest Service.

(oo) *Surface Mining Officer* means the regulatory authority as defined in 30 CFR Chapter VII.

(pp) *Valid existing rights* as used in §3461.1 of this title is defined in 30 CFR 761.5.

(qq) *Written consent* means the document or documents that a qualified surface owner has signed that:

- (1) Permit a coal operator to enter and commence surface mining of coal;
- (2) Describe any financial or other consideration given or promised in return for the permission, including in-kind considerations;
- (3) Describe any consideration given in terms of type or method of operation or reclamation for the area;
- (4) Contain any supplemental or related contracts between the surface owner and any other person who is a party to the permission; and

(5) Contain a full and accurate description of the area covered by the permission.

(rr) For the purposes of section 2(a)(2)(A) of the Act:

(1) *Arm's length transaction* means the transfer of an interest in a lease to an entity that is not controlled by or under common control with the transferor.

(2) *Bracket* means a 10-year period that begins on the date that coal is first produced on or after August 4, 1976, from a lease that has not been made subject to the diligence provisions of part 3480 of this title on the date of first production.

(3) *Controlled by or under common control with*, based on the instruments of ownership of the voting securities of an entity, means:

- (i) Ownership in excess of 50 percent constitutes control;
- (ii) Ownership of 20 through 50 percent creates a presumption of control; and
- (iii) Ownership of less than 20 percent creates a presumption of noncontrol.

(4) *Entity* means any person, association, or corporation, or any subsidiary, affiliate, or persons controlled by or under common control with such person, association, or corporation.

(5) *Holds and has held* means the cumulative amount of time that an entity holds any working interest in a lease on or after August 4, 1976. The *holds and has held* requirement of section 2(a)(2)(A) of the Act is working interest holder-specific for each lease. *Working interest* includes both record title interests and arrangements whereby an entity has the ability to determine when, and under what circumstances, the rights granted by the lease to develop coal will be exercised.

(6) *Producing* means actually severing coal. A lease is also considered producing when:

- (i) The operator/leasee is processing or loading severed coal, or transporting it from the point of severance to the point of sale; or

## **§ 3400.1**

(ii) Coal severance is temporarily interrupted in accordance with §§3481.4-1 through 4-4 of this chapter.

[44 FR 42609, July 19, 1979, as amended at 47 FR 33133, 33134, July 30, 1982; 47 FR 38131, Aug. 30, 1982; 50 FR 8626, Mar. 4, 1985; 51 FR 43921, Dec. 5, 1986; 52 FR 416, Jan. 6, 1987; 62 FR 44369, Aug. 20, 1997]

### **§ 3400.1 Multiple development.**

(a) The granting of an exploration license, a license to mine or a lease for the exploration, development, or production of coal deposits shall preclude neither the issuance of prospecting permits or mineral leases for prospecting, development or production of deposits of other minerals in the same land with suitable stipulations for simultaneous operation, nor the allowance of applicable entries, locations, or selections of leased lands with a reservation of the mineral deposits to the United States.

(b) The presence of deposits of other minerals or the issuance of prospecting permits or mineral leases for prospecting, development or production of deposits of other minerals shall not preclude the granting of an exploration license, a license to mine or a lease for the exploration, development or production of coal deposits on the same lands with suitable stipulations for simultaneous operations.

[44 FR 42609, July 19, 1979, as amended at 47 FR 33134, July 30, 1982]

### **§ 3400.2 Lands subject to leasing.**

The Secretary may issue coal leases on all Federal lands except:

- (a) Lands in:
  - (1) The National Park System;
  - (2) The National Wildlife Refuge System;
  - (3) The National Wilderness Preservation System;
  - (4) The National System of Trails;
  - (5) The National Wild and Scenic Rivers System, including study rivers designated under section 5(a) of the Wild and Scenic Rivers Act;
  - (6) Incorporated cities, towns, and villages;
  - (7) The Naval Petroleum Reserves, the National Petroleum Reserve in Alaska, and oil shale reserves; and
  - (8) National Recreation Areas designated by law;

## **43 CFR Ch. II (10-1-08 Edition)**

(b) Tide lands, submerged coastal lands within the Continental Shelf adjacent or littoral to any part of land within the jurisdiction of the United States; and

(c) Land acquired by the United States for the development of mineral deposits, by foreclosure or otherwise for resale, or reported as surplus property pursuant to the provisions of the Surplus Property Act of 1944 (50 U.S.C. App. 1622).

### **§ 3400.3 Limitations on authority to lease.**

#### **§ 3400.3-1 Consent or conditions of surface management agency.**

Leases for land, the surface of which is under the jurisdiction of any Federal agency other than the Department of the Interior, may be issued only with the consent of the head or other appropriate official of the other agency having jurisdiction over the lands containing the coal deposits, and subject to such conditions as that officer may prescribe to insure the use and protection of the lands for the primary purpose for which they were acquired or are being administered.

#### **§ 3400.3-2 Department of Defense lands.**

The Secretary may issue leases with the consent of the Secretary of Defense on acquired lands set apart for military or naval purposes only if the leases are issued to a governmental entity which:

- (a) Produces electrical energy for sale to the public;
- (b) Is located in the state in which the leased lands are located; and
- (c) Has production facilities in that state, and will use the coal produced from the lease within that state.

#### **§ 3400.3-3 Department of Agriculture lands.**

Subject to the provisions of § 3400.3-1, the Secretary may issue leases that authorize surface coal mining operations on Federal lands within the National Forest System, provided that such leases may not be issued on lands within a national forest unless the tract is assessed to be acceptable for all or certain stipulated methods of surface coal mining operations under the provisions

## Bureau of Land Management, Interior

## § 3400.5

of Criterion No. 1 in §3461.1 of this title.

### § 3400.3-4 Trust protection lands.

The regulations in this group do not apply to the leasing and development of coal deposits held in trust by the United States for Indians. See 43 CFR 3400.0-5(o). Regulations governing those deposits are found in 25 CFR Chapter I.

[44 FR 42609, July 19, 1979, as amended at 47 FR 33134, July 30, 1982]

### § 3400.4 Federal/state government co-operation.

(a) In order to implement the requirements of law for Federal-state co-operation in the management of Federal lands, a Department-state regional coal team shall be established for each coal production region defined pursuant to §3400.5. The team shall consist of a Bureau of Land Management field representative for each state in the region, who will be the Bureau of Land Management State Director, or, in his absence, his designated representative; the Governor of each state included in the region or, in his absence, his designated representative; and a representative appointed by and responsible to the Director of the Bureau of Land Management. The Director's representative shall be chairperson of the team. If the region is a multi-state region under the jurisdiction of only one Bureau of Land Management State Office, each State Director shall designate a Bureau of Land Management representative for each state.

(b) Each regional coal team shall guide all phases of the coal activity planning process described in §§3420.3 through 3420.3-4 of this title which relate to competitive leasing in the region.

(c) The regional coal team shall also serve as the forum for Department/state consultation and cooperation in all other major Department coal management program decisions in the region, including preference right lease applications, public body and small business setaside leasing, emergency leasing and exchanges.

(d) The regional coal team recommendations on leasing levels under §3420.2(a)(4) of this title and on re-

gional lease sales under §3420.3-4(g) shall be accepted except:

(1) In the case of an overriding national interest; or

(2) In the case the advice of the Governor(s) which is contrary to the recommendations of the regional coal team is accepted pursuant to §3420.4-3(c) of this title. In cases where the regional coal team's advice is not accepted, a written explanation of the reasons for not accepting the advice shall be provided to the regional coal team and made available for public review.

(e) Additional representatives of state and Federal agencies may participate directly in team meetings or indirectly in the preparation of material to assist the team at any time at the request of the team chairperson. Participation may be solicited from state and Federal agencies with special expertise in topics considered by the team or with direct surface management responsibilities in areas potentially affected by coal management decisions. However, at every point in the deliberations, the official team spokespersons for the Bureau of Land Management and for the Governors shall be those designated under paragraph (a) of this section.

(f) If a state declines to participate under this section in the coal-related activities of the Department:

(1) The Department may take action authorized in Group 3400 of this title in a coal production region wholly within such a state without forming a regional coal team, and

(2) The Department may form a regional coal team without a representative of the Governor of such a state in any multi-state coal production region.

(g) The regional coal team will function under the public participation procedures at §§1784.4-2, 1784.4-3, and 1784.5 of this chapter.

[44 FR 42609, July 19, 1979; 44 FR 56339, Oct. 1, 1979, as amended at 47 FR 33134, 33135, July 30, 1982; 51 FR 18887, May 23, 1986; 64 FR 52242, Sept. 28, 1999]

### § 3400.5 Coal production regions.

The Bureau of Land Management shall establish by publication in the FEDERAL REGISTER coal production regions. A coal production region may be changed or its boundaries altered by

## § 3400.6

publication of a notice of change in the FEDERAL REGISTER. Coal production regions shall be used for establishing regional leasing levels under §3420.2 of this title. Coal production regions shall be used to establish areas in which leasing shall be conducted under §3420.3 of this title and for other purposes of the coal management program.

[47 FR 33135, July 30, 1982]

### § 3400.6 Minimum comment period.

Unless otherwise required in Group 3400 of this title, a minimum period of 30 days shall be allowed for public review and comment where such review is required for Federal coal management program activities under Group 3400 of this title.

[51 FR 18887, May 23, 1986]

### Subpart 3410—Exploration Licenses

#### § 3410.0-1 Purpose.

This subpart provides for the issuance of licenses to explore for coal

## 43 CFR Ch. II (10-1-08 Edition)

deposits subject to disposal under Group 3400.

#### § 3410.0-2 Objective.

The objective of this subpart is to allow private parties singularly or jointly to explore coal deposits to obtain geological, environmental, and other pertinent data concerning the coal deposits.

#### § 3410.0-3 Authority.

(a) These regulations are issued under the authority of the statutes listed in §3400.0-3 of this title.

(b) These regulations primarily implement section 2(b) of the Mineral Leasing Act of 1920, as amended by section 4 of the Federal Coal Leasing Amendments Act of 1976 (30 U.S.C. 201(b)).

#### § 3410.1 Exploration licenses: Generally.

##### § 3410.1-1 Lands subject to exploration licenses.

(a) Exploration licenses may be issued for:

(1) Lands administered by the Secretary that are subject to leasing, §3400.2;

(2) Lands administered by the Secretary of Agriculture through the Forest Service or other agency that are subject to leasing, §3400.2;

(3) Lands which have been conveyed by the United States subject to a reservation to the United States of the mineral or coal deposits, to the extent that those deposits are subject to leasing under §3400.2; and

(4) Acquired lands set apart for military or naval purposes.

(b) No exploration license shall be issued for lands included in an existing coal lease.

##### § 3410.1-2 When an exploration license is required.

(a) No person may conduct exploration activities for commercial purposes, including sale of data acquired during exploration, on lands subject to this subpart without an exploration license.

(b) An exploration license shall not be required for casual use.

## Bureau of Land Management, Interior

## § 3410.2-2

(c) Exploration activities conducted without an exploration license in violation of this section shall constitute a trespass, and shall be subject to the provisions of 43 CFR 9239.5-3(f).

[44 FR 42613, July 19, 1979, as amended at 47 FR 33135, July 30, 1982]

### § 3410.2 Prelicensing procedures.

#### § 3410.2-1 Application for an exploration license.

(a) Exploration license applications shall be submitted at the Bureau of Land Management State Office having jurisdiction over the lands covered in the application (43 CFR subpart 1821). The applications shall be subject to the following requirements:

(1) No specified form of application is required.

(2) An area in a public land survey state for which an application is filed shall be described by legal description or, if on unsurveyed lands, by metes and bounds, in accordance with § 3471.1-1(d)(1) of this title. An application for an exploration license on acquired lands shall describe the area according to the description in the deed or document by which the United States acquired title in accordance with § 3471.1-1(d)(2) of this title.

(3) Each application shall contain three copies of an exploration plan which complies with the requirements of § 3482.1(a) of this title.

(4) Each application and its supporting documents shall be filed with a nonrefundable filing fee (43 CFR 3473.2).

(5) Exploration license applications shall normally cover no more than 25,000 acres in a reasonably compact area and entirely within one state. An application for an exploration license covering more than 25,000 acres must include a justification for an exception to the normal acreage limitation.

(b) Nothing in this subpart shall preclude the authorized officer from issuing a call for expressions of leasing interest in an area containing exploration licenses or applications for exploration licenses.

(c) Applicants for exploration licenses shall be required to provide an opportunity for other parties to participate in exploration under the license on a pro rata cost sharing basis.

(1) Immediately upon the filing of an application for an exploration license the applicant shall publish a "Notice of Invitation," approved by the authorized officer, once every week for 2 consecutive weeks in at least one newspaper of general circulation in the area where the lands covered by the license application are situated. This notice shall contain an invitation to the public to participate in the exploration under the license and shall contain the location of the Bureau of Land Management office in which the application shall be available for inspection. Copies of the Notice of Invitation shall be filed with the authorized officer at the time of publication by the applicant, for posting in the proper Bureau of Land Management Office and for Bureau of Land Management's publication of the Notice of Invitation in the FEDERAL REGISTER.

(2) Any person who seeks to participate in the exploration program contained in the application shall notify the authorized officer and the applicant in writing within 30 days after the publication in the FEDERAL REGISTER. The authorized officer may require modification of the original exploration plan to accommodate the legitimate exploration needs of persons seeking to participate, and to avoid the duplication of exploration activities in the same area, or may notify the person seeking to participate that the person should file a separate application for an exploration license.

(d) An application to conduct exploration which could have been conducted as a part of exploration under an existing or recent coal exploration license may be rejected.

[44 FR 42613, July 19, 1979, as amended at 47 FR 33135, July 30, 1982; 50 FR 8626, Mar. 4, 1985]

#### § 3410.2-2 Environmental analysis.

(a) Before an exploration license may be issued, the authorized officer shall prepare an environmental assessment or environmental impact statement, if necessary, of the potential effects of the proposed exploration on the natural and socio-economic environment of the affected area. No exploration license shall be issued if the exploration would:

(1) Result in disturbance that would cause significant and lasting degradation to the lands or injury to improvements, or in any disturbance other than that necessary to determine the nature of the overlying strata and the depth, thickness, shape, grade, quantity, quality or hydrologic conditions of the coal deposits; or

(2) Jeopardize the continued existence of a threatened or endangered species of fauna or flora or destroy or cause adverse modification to its critical habitat. No exploration license shall be issued until after compliance with sections 105 and 106 of the National Historic Preservation Act (16 U.S.C. 470(f)) with respect to any cultural resources which might be affected by any activity under the exploration license.

(b) The authorized officer shall include in each exploration license requirements and stipulations to protect the environment and associated natural resources and to ensure reclamation of the lands disturbed by the exploration.

[47 FR 33135, July 30, 1982, as amended at 50 FR 8626, Mar. 4, 1985]

**§ 3410.2-3 Surface management agency.**

The authorized officer may issue an exploration license covering lands the surface of which is under the jurisdiction of any Federal agency other than the Bureau of Land Management only in accordance with those conditions prescribed by the surface management agency concerning the use and protection of the nonmineral interests in those lands.

[44 FR 42613, July 19, 1979. Redesignated at 47 FR 33135, July 30, 1982]

**§ 3410.3 Exploration licenses.**

**§ 3410.3-1 Issuance and termination of an exploration license.**

(a) The authorized officer has the discretion to issue an exploration license or to reject the application therefor under this subpart.

(b) An exploration license shall become effective on the date specified by the authorized officer as the date when exploration activities may begin. An exploration license shall not be valid

for more than two years from its effective date.

(c) The approved exploration plan shall be attached and made a part of each exploration license.

(d) Subject to the continued obligation of the licensee and the surety company to comply with the terms and conditions of the exploration license, the exploration plan, and the regulations, a licensee may relinquish an exploration license for all or any portion of the lands covered by it. A relinquishment shall be filed in the Bureau of Land Management State Office in which the original application was filed. See 43 CFR subpart 1821.

(e) An exploration license may be cancelled by the authorized officer for noncompliance with its terms and conditions, the exploration plan, or the regulations, after the authorized officer has notified the licensee of the violation(s) in writing and the licensee has failed to correct the violation(s) within the period prescribed in the notice.

(f) Should a licensee request a modification to the exploration plan, the authorized officer may approve the modification if geologic or other conditions warrant.

(g) When unforeseen conditions that could result in substantial disturbance to the natural land surface or damage to the environment or improvements are encountered, or when geologic or other physical conditions warrant a modification in the approved exploration plan:

(1) The authorized officer may adjust the terms and conditions of the exploration license, or

(2) The authorized officer may direct adjustment in or approve modification of the exploration plan. If the licensee does not concur in the adjustment of the terms and conditions of the exploration license and exploration plan, he/she may, under 43 CFR part 4, appeal the decision modifying the license, or he/she may relinquish the exploration license.

(h) Exploration licenses shall not be extended. Exploration operations may not be conducted after the exploration license has expired. The licensee may apply for a new exploration license as

## Bureau of Land Management, Interior

## § 3410.4

described in this section. A new exploration license may be issued simultaneously with the termination of the existing exploration license.

[44 FR 42613, July 19, 1979, as amended at 47 FR 33135, July 30, 1982; 47 FR 38131, Aug. 30, 1982; 50 FR 8626, Mar. 4, 1985]

### § 3410.3-2 Limitations on exploration licenses.

The issuance of exploration licenses for an area shall not preclude the issuance of a Federal coal lease under applicable regulations for that area. If such a lease is issued for lands included in an exploration license, the authorized officer shall cancel the exploration license on the effective date of the lease for those lands which are common to both.

[44 FR 42613, July 19, 1979, as amended at 47 FR 33135, July 30, 1982]

### § 3410.3-3 Operating regulations.

The licensee shall comply with the provisions of the operating regulations of the Bureau of Land Management (43 CFR part 3480). Copies of the operating regulations may be obtained from the authorized officer. Authorized representatives of the Secretary and, where appropriate the surface management agency shall be permitted to inspect the premises and operations. The licensee shall allow the free ingress and egress of Government officers and other persons using the land under authority of the United States.

[44 FR 42613, July 19, 1979, as amended at 47 FR 33135, July 30, 1982; 50 FR 8626, Mar. 4, 1985]

### § 3410.3-4 Bonds.

(a) Bonding provisions in subpart 3474 of this chapter apply to this subpart.

(b) Prior to issuing an exploration license, the authorized officer shall ensure that the amount of the bond to be furnished is sufficient:

(1) To assure compliance with the terms and conditions of the exploration license and exploration plan; and

(2) In the absence of an agreement between the exploration licensee and the surface owner so providing, to assure compensation for damages to surface improvements made by surface owners where an exploration license embraces

such lands. In no event shall the amount of such bond be less than \$5,000.

(c) Upon completion of exploration and reclamation activities that are in compliance with the terms and conditions of the exploration license, the exploration plan and the regulations, or upon discontinuance of exploration operations and completion of needed reclamation to the satisfaction of the authorized officer, and where appropriate, the surface management agency, the authorized officer shall terminate the period of liability of the bond.

(d) Where the surface of the land being explored is privately owned, the authorized officer shall have the authority to terminate or adjust the period of liability and/or the amount of liability under the bond. The authorized officer shall provide, 30 days prior to the effective date of termination of the period of liability under the bond, a notice of termination to enable the surface owner to inspect the property and notify the authorized officer, in writing, of any deficiencies in reclamation. Should the licensee and any surface owner be unable to agree on the adequacy of the reclamation, the authorized officer shall make the final determination.

[44 FR 42613, July 19, 1979, as amended at 47 FR 33135, July 30, 1982; 48 FR 37655, Aug. 19, 1983; 50 FR 8626, Mar. 4, 1985]

### § 3410.4 Collection and submission of data.

(a) The authorized officer may require the applicant to collect ground and surface water data that are available to the licensee in the conduct of the approved exploration plan.

(b) The licensee shall furnish the authorized officer copies of all data (including, but not limited to, geological, geophysical and core drilling analyses) obtained during exploration in a form requested by the authorized officer. All data shall be considered confidential and not made public until the areas involved have been leased or until the authorized officer determines that public access to the data would not damage

## § 3410.5

the competitive position of the licensee, whichever comes first. (43 CFR 2.20 and 3481.3)

[44 FR 42613, July 19, 1979, as amended at 47 FR 33136, July 30, 1982; 50 FR 8626, Mar. 4, 1985]

### § 3410.5 Use of surface.

(a) Operations under these regulations shall not unreasonably interfere with or endanger operations authorized under any other Act or regulation.

(b) The licensee shall comply with all applicable Federal, state and local laws and regulations, including the regulations.

[44 FR 42613, July 19, 1979, as amended at 47 FR 33136, July 30, 1982]

### Subpart 3420—Competitive Leasing

#### § 3420.0-1 Purpose.

This subpart sets forth how the Department will conduct competitive

## Bureau of Land Management, Interior

## § 3420.1-3

leasing of rights to extract Federal coal.

### § 3420.0-2 Objectives.

The objectives of these regulations are to establish policies and procedures for considering development of coal deposits through a leasing system involving land use planning and environmental assessment or environmental impact statement processes; to promote the timely and orderly development of publicly owned coal resources; to ensure that coal deposits are leased at their fair market value; and to ensure that coal deposits are developed in consultation, cooperation and coordination with the public, state and local governments, Indian tribes and involved Federal agencies.

[47 FR 33136, July 30, 1982]

### § 3420.0-3 Authority.

(a) The regulations in this part are issued under the authority of the statutes cited in § 3400.0-3 of this title.

(b) The regulations in this part implement: (1) Primarily section 2(a) of the Mineral Leasing Act of 1920, as amended by sections 2 and 3 of the Federal Coal Leasing Amendments Act of 1976 (30 U.S.C. 201(a)); and (2) the Small Business Act of 1953, as amended (15 U.S.C. 631 *et seq.*).

### § 3420.1 Procedures.

#### § 3420.1-1 Lands subject to evaluation for leasing.

All lands subject to coal leasing under the mineral leasing laws are subject to evaluation under this subpart (43 CFR 3400.2).

[44 FR 42615, July 19, 1979. Redesignated at 47 FR 33136, July 30, 1982]

#### § 3420.1-2 Call for coal resource and other resource information.

(a) Prior to or as part of the initiation or update of a land use plan or land use analysis, a Call for Coal and Other Resource Information shall be made to formally solicit indications of interest and information on coal resource development potential and on other resources which may be affected by coal development for lands in the planning unit. Industry, State and

local governments and the general public may submit information on lands that should be considered for coal leasing, including statements describing why the lands should be considered for leasing.

(b) Proprietary data marked as confidential may be submitted in response to the Call for Coal and Other Resource Information, however, all such proprietary data shall be submitted to the authorized officer only. Data marked as confidential shall be treated in accordance with the laws and regulations governing the confidentiality of such information.

(c) The Call for Coal and Other Resource Information may be combined with the notice of intent to conduct land use planning published in accordance with § 1601.3(g) of this title or with the issue identification process in accordance with part 1600 of this title. If the agency conducting land use planning is other than the Bureau of Land Management, that agency may combine the Call for Coal and Other Resource Information with its land use planning process at the appropriate step.

[47 FR 33136, July 30, 1982, as amended at 50 FR 8626, Mar. 4, 1985; 51 FR 18888, May 23, 1986]

### § 3420.1-3 Special leasing opportunities.

(a) The Secretary shall, under the procedures established in this subpart, including § 3420.3 of this title, reserve and offer a reasonable number of lease tracts through competitive lease sales open only to a restricted class of potential bidders. Except for the limitation on bidding contained in paragraph (b) of this section, all requirements in this subpart apply equally to special leasing opportunities, including the requirement that coal be leased at its fair market value.

(b) Special leasing opportunities shall be provided for two classes of potential lessees:

(1) *Public bodies.* (i) Only public bodies with a definite plan for producing energy for their own use or for their members or customers shall bid for leases designated as special leasing opportunities for public bodies. To qualify as a definite plan, a plan must

#### § 3420.1-4

clearly state the intended use of the coal and have been approved by the governing board of the public body submitting the plan. In the event an electric generating station which will produce energy for the public body is either jointly owned with or participated in by others, or both, the definite plan shall assure that the public body's proportionate part of the energy produced is utilized pursuant to this paragraph.

(ii) Each public body shall submit the information specified in § 3472.2-5(a) (1) and (2) of this title as part of its expression of leasing interest or upon submission of a bid if no expression of leasing interest is made. The information specified in § 3472.2-5(a) (3) and (4) of this title shall be submitted within 60 days after submission of an expression of leasing interest or lease bid if no expression of leasing interest is made.

(iii) The Secretary may designate, during the process of preparing a regional lease sale schedule, certain coal lease tracts for special leasing opportunities for public bodies only if a public body has submitted an expression of leasing interest under § 3420.3-2, requesting that the procedures of this section apply.

(iv) Leases issued under this section to public bodies may be assigned only to other public bodies, or to a person who will mine the coal on behalf of and for the use of the public body, or to a person for the limited purpose of creating a security interest in favor of a lender who agrees to be obligated to mine the coal on behalf of the public body.

(2) *Small businesses.* (i) When necessary to comply with the requirements of the Small Business Act, the Secretary shall designate a reasonable number of tracts for special leasing opportunities for businesses qualifying under 13 CFR part 121.

(ii) Leases issued under this section may be assigned only to other small businesses qualifying under 13 CFR part 121.

(c) Potential lessees qualifying for special leasing opportunities may participate in competitive lease sales not designated as special leasing opportunities and shall not be required to sub-

#### 43 CFR Ch. II (10-1-08 Edition)

mit the evidence and information required specifically for a special leasing opportunity to participate.

[44 FR 42615, July 19, 1979. Redesignated and amended at 47 FR 33136, July 30, 1982]

#### § 3420.1-4 General requirements for land use planning.

(a) The Secretary may not hold a lease sale under this part unless the lands containing the coal deposits are included in a comprehensive land use plan or land use analysis. The land use plan or land use analysis will be conducted with public notice and opportunity for participation at the points specified in § 1610.2(f) of this title. The sale must be compatible with, and subject to, any relevant stipulations, guidelines, and standards set out in that plan or analysis.

(b)(1) The Bureau of Land Management shall prepare comprehensive land use plans and land use analyses for lands it administers in conformance with 43 CFR part 1600.

(2) The Department of Agriculture or any other Federal agency with surface management authority over lands subject to leasing shall prepare comprehensive land use plans or land use analyses for lands it administers.

(3) The Secretary may lease in any area where it is found either that there is no Federal interest in the surface or that the coal deposits in an area are insufficient to justify the costs of a Federal land use plan upon completion of a land use analysis in accordance with this section and 43 CFR part 1600.

(c) In an area of Federal lands not covered by a completed comprehensive land use plan or scheduled for comprehensive land use planning, a member of the public may request the appropriate Bureau of Land Management State Office to prepare a land use analysis for coal related uses of the land as provided for in this group.

(d) A comprehensive land use plan or land use analysis shall contain an estimate of the amount of coal recoverable by either surface or underground mining operations or both.

(e) The major land use planning decision concerning the coal resource shall

be the identification of areas acceptable for further consideration for leasing which shall be identified by the screening procedures listed below:

(1) Only those areas that have development potential may be identified as acceptable for further consideration for leasing. The Bureau of Land Management shall estimate coal development potential for the surface management agency. Coal companies, State and local governments and the general public are encouraged to submit information to the Bureau of Land Management at any time in connection with such development potential determinations. Coal companies, State and local governments and members of the general public may also submit nonconfidential coal geology and economic data during the inventory phase of planning to the surface management agency conducting the land use planning. Where such information is determined to indicate development potential for an area, the area may be included in the land use planning for evaluation for coal leasing.

(2) The Bureau of Land Management or the surface managing agency conducting the land use planning shall, using the unsuitability criteria and procedures set out in subpart 3461 of this title, review Federal lands to assess where there are areas unsuitable for all or certain stipulated methods of mining. The unsuitability assessment shall be consistent with any decision of the Office of Surface Mining Reclamation and Enforcement to designate lands unsuitable or to terminate a designation in response to a petition.

(3) Multiple land use decisions shall be made which may eliminate additional coal deposits from further consideration for leasing to protect other resource values and land uses that are locally, regionally or nationally important or unique and that are not included in the unsuitability criteria discussed in paragraph (e) of this section. Such values and uses include, but are not limited to, those identified in section 522(a)(3) of the Surface Mining Reclamation and Control Act of 1977 and as defined in 30 CFR 762.5. In making these multiple use decisions, the Bureau of Land Management or the surface management agency con-

ducting the land use planning shall place particular emphasis on protecting the following: Air and water quality; wetlands, riparian areas and sole-source aquifers; the Federal lands which, if leased, would adversely impact units of the National Park System, the National Wildlife Refuge System, the National System of Trails, and the National Wild and Scenic Rivers System.

(4)(i) While preparing a comprehensive land use plan or land use analysis, the Bureau of Land Management shall consult with all surface owners who meet the criteria in paragraphs (gg) (1) and (2) of §3400.0-5 of this title, and whose lands overlie coal deposits, to determine preference for or against mining by other than underground mining techniques.

(ii) For the purposes of this paragraph, any surface owner who has previously granted written consent to any party to mine by other than underground mining techniques shall be deemed to have expressed a preference in favor of mining. Where a significant number of surface owners in an area have expressed a preference against mining those deposits by other than underground mining techniques, that area shall be considered acceptable for further consideration only for development by underground mining techniques. In addition, the area may be considered acceptable for further consideration for leasing for development by other than underground techniques if there are no acceptable alternative areas available to meet the regional leasing level.

(iii) An area eliminated from further consideration by this subsection may be considered acceptable for further consideration for leasing for mining by other than underground mining techniques if:

(A) The number of surface owners who have expressed their preference against mining by other than underground techniques is reduced below a significant number because such surface owners have given written consent for such mining or have transferred ownership to unqualified surface owners; and

(B) The land use plan is amended accordingly.

#### **§ 3420.1-5**

(f) In its review of cumulative impacts of coal development, the regional coal team shall consider any threshold analysis performed during land-use planning as required by § 1610.4-4 of this title and shall apply this analysis, where appropriate, to the region as a whole.

[44 FR 42615, July 19, 1979. Redesignated and amended at 47 FR 33136, July 30, 1982; 50 FR 8626, Mar. 4, 1985; 51 FR 18888, May 23, 1986; 52 FR 46472, Dec. 8, 1987; 64 FR 52242, Sept. 28, 1999]

#### **§ 3420.1-5 Hearing requirements.**

After public notice, the Bureau of Land Management or other surface management agency shall conduct a public hearing on the proposed comprehensive land use plan or land use analysis if it involves the potential for coal leasing before it is adopted if such a hearing is requested by any person who is or may be adversely affected by the adoption of the plan. A hearing conducted under part 1600 of this title of this chapter shall fulfill this requirement.

[47 FR 33137, July 30, 1982]

#### **§ 3420.1-6 Consultation with Federal surface management agencies.**

Where a Federal surface management agency other than the Bureau of Land Management administers limited areas overlying Federal coal within the boundaries of a comprehensive land use plan or land use analysis being prepared by the Bureau of Land Management, or where the Bureau of Land Management manages lands on which coal development may impact land units of other Federal agencies, the Bureau of Land Management shall consult with the other agency to jointly determine the acceptability for further consideration for leasing of the potentially impacted lands the other agency administers or lands managed by the Bureau of Land Management that may impact lands of another agency.

[52 FR 46473, Dec. 8, 1987]

#### **§ 3420.1-7 Consultation with states and Indian tribes.**

Before adopting a comprehensive land use plan or land use analysis that makes an assessment of lands accept-

#### **43 CFR Ch. II (10-1-08 Edition)**

able for further consideration for leasing, the Bureau of Land Management or other surface management agency shall consult with the state Governor and the state agency charged with the responsibility for maintaining the state's unsuitability program (43 CFR 3461.4-1). Where a tribal government administers areas within or near the boundaries of a comprehensive land use plan or land use analysis being prepared by the Bureau of Land Management, the Bureau shall consult with the tribal government.

[44 FR 42615, July 19, 1979. Redesignated and amended at 47 FR 33137, July 30, 1982]

#### **§ 3420.1-8 Identification of lands as acceptable for further consideration.**

(a) Identification of lands as acceptable for further consideration for leasing will be made in the adoption of a comprehensive land use plan or land use analysis. Any lands identified as acceptable may be further considered for leasing under § 3420.3 of this title.

(b) Activity planning shall begin with a regional coal team meeting to review market analyses and land-use planning summaries. The market analyses and land-use planning summaries shall be available at least 45 days prior to such meeting.

[44 FR 42615, July 19, 1979. Redesignated and amended at 47 FR 33137, July 30, 1982; 51 FR 18888, May 23, 1986]

#### **§ 3420.2 Regional leasing levels.**

This section sets out the process to be followed in establishing regional leasing levels. Regional leasing levels shall be established by the Secretary. The Secretary shall particularly rely upon the advice and assistance of affected State Governors in ensuring that leasing levels have properly considered social, environmental and economic impacts and constraints.

(a) The regional coal teams shall be the forum through which initial leasing level recommendations are transmitted to the Secretary. Initial leasing level recommendations shall be developed as follows:

(1) The appropriate Bureau of Land Management State Director on the regional coal team, as designated by the regional coal team chairperson, shall

## Bureau of Land Management, Interior

## § 3420.2

prepare a broadly stated range of initial leasing levels for the region. This range of initial leasing levels must be based on information available to the State Director including: land use planning data; the results of the call for coal resource information held under § 3420.1-2 of this subpart; the results of the call for expressions of leasing interest held under § 3420.3-2 of this subpart; and other considerations. The State Director will consider comments received from the public in writing and at hearings, and input and advice from the Governors of the affected States regarding assumptions, data, and other factors pertinent to the region;

(2) This initial range of leasing levels shall be made available to the other members of the regional coal team for review and comment. This review shall be designed to ensure consideration of relevant social, environmental and economic factors of which the Secretary should be aware in setting leasing levels;

(3) Governors of affected States shall be requested by the regional coal team chairperson to provide comments and recommendations concerning the leasing levels through the Governor's representatives on the regional coal team. Governors may use any methodologies, systems or procedures available to determine their recommendations;

(4) The regional coal team chairperson shall call upon the team members to present their findings and recommendations on the initial leasing levels. The chairperson shall refer the members' recommendations to an appropriate Bureau State Director serving on the team. The State Director shall: (i) Ensure the recommendations are in an appropriate format; (ii) add any additional information from the Bureau of Land Management data sources which may be available and pertinent to leasing level decision-making; (iii) address any questions and clarify any issues raised by the members' recommendations; and (iv) outline any additional alternative leasing levels. The regional coal team shall consider the State Director's review and shall transmit to the Secretary alternative leasing levels and a preferred leasing level presented in ranges of tons to be offered for lease. The team

also must transmit to the Secretary, without change, all comments and recommendations of the Governor and the public.

(5) The regional coal team transmittal to the Secretary shall be made through the Director, who may provide additional data and recommendations, but only as separate documentation.

(b) The Secretary, upon receipt of the regional coal team transmittal, shall initiate consultations, in writing, with the Secretary of Energy, the Attorney General and affected Indian tribes. The Secretary shall establish leasing levels by region for the purposes of approximating the amount of coal to be offered through proposed lease sale schedules after consideration of potential policy conflicts or problems concerning, but not limited to:

(1) The Department's responsibility for the management, regulation and conservation of natural resources; and

(2) The capabilities of Federal lands and Federal coal resources to meet the proposed leasing levels, and the contributions State and privately owned coal lands can make.

(c) Leasing levels shall be based on the following factors:

(1) Advice from Governors of affected States as expressed through the regional coal team;

(2) The potential economic, social and environmental effects of coal leasing on the region, including recommendations from affected Indian tribes;

(3) Expressed industry interest in coal development in the region and indications of the demand for coal reserves;

(4) Expressed interests for special opportunity sales;

(5) Expected production from existing Federal coal leases and non-Federal coal holdings;

(6) The level of competition within the region and recommendations from the Department of Justice;

(7) U.S. coal production goals and projections of future demand for Federal coal;

(8) Consideration of national energy needs;

(9) Comments received from the public in writing and at public hearings; and

### § 3420.3

### 43 CFR Ch. II (10–1–08 Edition)

(10) Other pertinent factors.

(d) Prior to determining a final leasing level, the Secretary shall consult with the Governors of affected States to obtain final comments and recommendations. The Secretary shall then establish a final leasing level for the proposed coal lease sale.

(e) The levels shall be established for each coal production region where activity planning is conducted under the provisions of § 3420.3 of this subpart. The levels shall be developed separately for each region, but levels for 2 or more regions may be developed at the same time as the Secretary deems appropriate. Leasing levels may be stated in terms of a range of values.

(f) The leasing levels established for any given region shall become the basis for the proposed action for study in the regional coal lease sale environmental impact statement prepared pursuant to § 3420.3-4 of this subpart. The Secretary's final decision on which coal lease tracts, if any, within a region to offer for sale, and the schedule for the offering of such tracts shall be based on all information at the Secretary's disposal at the time of the decision.

[47 FR 33137, July 30, 1982, as amended at 48 FR 37655, Aug. 19, 1983; 50 FR 8626, Mar. 4, 1985; 64 FR 52242, Sept. 28, 1999]

#### § 3420.3 Activity planning: The leasing process.

##### § 3420.3-1 Area identification process.

(a) This section describes the process for identifying, ranking, analyzing, selecting, and scheduling lease tracts after land use planning has been completed. This process constitutes the "activity planning" aspect of the coal management program. Activity planning may occur where areas acceptable for further consideration for leasing have been identified by land use planning completed consistent with the provisions of § 3420.1-4 of this subpart.

(b) Split estate land otherwise acceptable for further consideration for leasing shall, upon verification of a refusal to consent received from a qualified surface owner under § 3427.2 of this title, be deleted from further activity planning.

(c) Each regional coal team established under § 3400.4 of this title shall:

(1) Guide tract delineation and preparation of site specific analyses of delineated tracts;

(2) Rank delineated tracts, select tracts that meet the leasing level established by the Secretary, and identify all alternative tract combinations to be analyzed in the regional lease sale environmental impact statement;

(3) Guide the preparation of the regional lease sale environmental impact statement; and

(4) Recommend a regional coal lease sale schedule to the Director.

(d) Public notice and opportunity for participation in activity planning must be appropriate to the area and the people involved. The Bureau of Land Management will make available a calendar listing of the points in the planning process at which the public may participate, including:

(1) The regional coal team meeting to recommend initial leasing levels (see § 3420.2(a)(4));

(2) The regional coal team meeting for tract ranking (see § 3420.3-4(a));

(3) Publication of the regional coal lease sale environmental impact statement (see § 3420.3-4(c)); and

(4) The regional coal team meeting to recommend specific tracts for a lease sale and a lease sale schedule (see § 3420.3-4(g)).

[44 FR 42615, July 19, 1979. Redesignated and amended at 47 FR 33138, July 30, 1982; 64 FR 52243, Sept. 28, 1999]

##### § 3420.3-2 Expressions of leasing interest.

(a) A call for expressions of leasing interest may be made after areas acceptable for further consideration for leasing have been identified by land use planning completed consistent with the provisions of § 3420.1-4 of this subpart.

(b) Each call for expressions of leasing interest shall be published as a notice in the FEDERAL REGISTER and in at least 1 newspaper of general circulation in each affected state.

## Bureau of Land Management, Interior

## § 3420.3-4

(c) All information submitted under this subpart shall be available for public inspection and copying upon request. Data which are considered proprietary shall not be submitted as part of an expression of leasing interest.

[44 FR 42615, July 19, 1979. Redesignated and amended at 47 FR 33138, July 30, 1982]

### § 3420.3-3 Preliminary tract delineation.

(a) Tracts may be delineated in any areas acceptable for further consideration for leasing whether or not expressions of leasing interest have been received for those areas.

(b) When public bodies have submitted expressions of leasing interest, tracts shall be delineated when and where technically feasible for public body special leasing opportunities in accordance with § 3420.1-3 of this subpart.

(c) In cooperation with the Small Business Administration, tracts may be delineated when and where technically feasible for small business special leasing opportunities in accordance with § 3420.1-3 of this title.

(d) Other tracts to be used in a lease or fee exchange (43 CFR subparts 3435 and 3436) may be delineated.

(e) A tract profile shall be formulated for each tract. The profile shall include:

(1) A summary of the information used in the delineation of the tract, and

(2) A site-specific environmental inventory and preliminary analysis.

[44 FR 42615, July 19, 1979. Redesignated and amended at 47 FR 33138, July 30, 1982]

### § 3420.3-4 Regional tract ranking, selection, environmental analysis and scheduling.

(a)(1) Upon completion of tract delineation and preparation of the tract profiles, the regional coal team shall rank the tracts in classes of high, medium or low desirability for coal leasing. Three major categories of consideration shall be used in tract ranking: coal economics; impacts on the natural environment; and socioeconomic impacts. The subfactors the regional coal team will consider under each category are those the regional coal team determines are appropriate for that region. The re-

gional coal team will make its determination after publishing notice in the FEDERAL REGISTER that the public has 30 days to comment on the subfactors. The regional coal team will then consider any comments it receives in determining the subfactors. BLM will publish the subfactors in the regional lease sale environmental impact statement required by this section. Tracts may also be ranked for other coal management purposes, such as emergency leasing under subpart 3425 of this title or exchanges under subparts 3435 and 3436 of this title.

(2) The regional coal team may modify tract boundaries being ranked, if appropriate, to reflect additional information.

(3) In ranking tracts, the regional coal team shall solicit the recommendations of the Federal and State agencies having appropriate expertise, including the Geological Survey, the Fish and Wildlife Service and the Federal surface management agency, if other than the Bureau of Land Management.

(4) Where Federal leasing decisions are likely to have impacts on lands held in trust for an Indian tribe, the regional coal team shall solicit the recommendations of the tribe and the Bureau of Indian Affairs.

(5) A statement that descriptions of the tracts to be ranked are available shall be included with the notice announcing any regional coal team meeting at which those tracts shall be ranked. BLM will publish the notice no later than 45 days before the meeting. The notice will list potential topics for discussion. An opportunity for public comment on the tract rankings shall be provided during the regional coal team meeting.

(b)(1) Upon completion of tract ranking, the regional coal team shall select at least 1 combination of tracts that approximates the regional leasing level. One combination of tracts within the regional leasing level shall be identified as the proposed action for study in the environmental impact statement. The team shall also select tract combinations representing alternative leasing levels. The team may identify alternative combinations of tracts within a leasing level.

(2) The regional coal team may adjust the tract ranking and select tracts to reflect considerations including:

- (i) The compatibility of coal quality, coal type and market needs;
- (ii) Environmental and socio-economic impacts;
- (iii) The compatibility of reserve size and demand distribution for tracts;
- (iv) Public opinion;
- (v) Avoidance of future emergency lease situations; and
- (vi) Special leasing opportunity requirements.

(c) After tract ranking and selection, a regional lease sale environmental impact statement on all tract combinations selected by the regional coal team for the various leasing levels and all other reasonable alternative leasing levels shall be prepared by the Bureau of Land Management in accordance with the provisions of the National Environmental Policy Act. The statement shall consider both:

(1) The site-specific potential environmental impacts of each tract being considered for lease sale; and

(2) The intraregional cumulative environmental impacts of the proposed leasing action and alternatives, and other coal and noncoal development activities.

(d) The results of the ranking and selection process, including the tract rankings, the tract selected and the list of ranking criteria used shall be published in the regional lease sale environmental impact statement required by paragraph (c) of this section. Detailed information on each of the tracts shall be available for inspection in the Bureau of Land Management State offices that have jurisdiction over lands within the coal production region (See 43 CFR subpart 1821). BLM will publish a notice in the FEDERAL REGISTER of the 60-day comment period and the public hearing on the draft environmental impact statement. BLM also will publish the notice at least once per week for two consecutive weeks in a newspaper of general circulation in the area of the sale.

(e) Public hearings shall be held in the region following the release of the draft regional lease sale environmental impact statement to announce and discuss the results of the ranking and se-

lection process and the potential impacts, including proposed mitigation measures.

(f) When the comment period on the draft environmental impact statement closes, the regional coal team will analyze the comments and make any appropriate revisions in the tract ranking and selection. The final regional lease sale environmental impact statement will reflect such revisions and will include all comments received.

(g) When BLM completes and releases the final regional lease sale environmental impact statement, the regional coal team will meet and recommend specific tracts for lease sale and a lease sale schedule. The regional coal team will provide notice in the FEDERAL REGISTER of the date and location at least 45 days before its meeting. The chairperson shall submit the recommendations to the Director. Any disagreement as to the recommendation among the team shall be documented and submitted by the chairperson along with the team recommendation. The Director shall submit the final regional environmental impact statement to the Secretary for his/her decision, together with the recommendation of the team and any recommendations the Director may wish to make.

(h) The tract ranking, selection and scheduling process and the regional lease sale environmental impact statement shall be revised or repeated as needed. The Secretary may, in consultation with the Governor(s) of the affected State(s) and surface management agencies, initiate or postpone the process to respond to considerations such as major land use planning updates, new tract delineations or increases or decreases in the leasing levels.

[47 FR 33138, July 30, 1982; 47 FR 38131, Aug. 30, 1982, as amended at 48 FR 37655, Aug. 19, 1983; 51 FR 18888, May 23, 1986; 64 FR 52243, Sept. 28, 1999]

#### § 3420.4 Final consultations.

##### § 3420.4–1 Timing of consultation.

Following the release of the final regional lease sale environmental impact

## Bureau of Land Management, Interior

## § 3420.4-5

statement, and prior to adopting a regional lease sale schedule, the Secretary shall engage in formal consultation as specified in §§ 3420.4-2 through 3420.4-5 of this title.

[44 FR 42615, July 19, 1979. Redesignated and amended at 47 FR 33139, July 30, 1982]

### § 3420.4-2 Consultation with surface management agencies.

(a) The Secretary, for any proposed lease tract containing lands the surface of which is under the jurisdiction of any agency other than the Department, shall request that the agency: (1) Consent, if it has not already done so, to the issuance of the lease (43 CFR 3400.3-1), and (2) if it consents, prescribe the terms and conditions the Secretary will impose in any lease which the head of the agency requires for the use and protection of the non-mineral interests in those lands.

(b) The Secretary may prescribe additional terms and conditions that are consistent with the terms proposed by the surface management agency to protect the interest of the United States and to safeguard the public welfare.

[44 FR 42615, July 19, 1979. Redesignated at 47 FR 33139, July 30, 1982]

### § 3420.4-3 Consultation with Governors.

(a) The Secretary shall consult the Governor of the state in which any tract proposed for sale is located. The Secretary shall give the Governor 30 days to comment before adopting a regional lease sale schedule or, for lease applications, before publishing a notice of sale for any tract within the State.

(b) When a tract proposed for lease sale within the boundaries of a National Forest would, if leased, be mined by surface mining methods, the Governor of the state in which the land to be leased is located shall be so notified by the Secretary. If the Governor fails to object to the lease sale proposal in 60 days, the Secretary may publish a notice of sale, including that tract. If, within the 60 day period, the Governor, in writing, objects to the lease sale proposal, the Secretary may not publish a notice of sale for that tract. Publication of the notice of sale shall be held in abeyance for 6 months from the date that the Governor objects. The

Governor may, during this six-month period, submit a written statement of reasons why the tract should not be proposed for lease sale, and the Secretary shall, on the basis of this statement, reconsider the lease sale proposal.

(c) Before determining whether to conduct a lease sale, the Secretary shall seek the recommendation of the Governor of the State(s) in which the lands proposed to be offered for lease are located as to whether or not to lease such lands and what alternative actions are available and what special conditions could be added to the proposed lease(s) to mitigate impacts. The Secretary shall accept the recommendations of the Governor(s) if he determines that they provide for a reasonable balance between the national interest and the State's interests. The Secretary shall communicate to the Governor(s) in writing and publish in the FEDERAL REGISTER the reasons for his determination to accept or reject such Governor's recommendations.

[44 FR 42615, July 19, 1979. Redesignated and amended at 47 FR 33139, July 30, 1982; 48 FR 37655, Aug. 19, 1983]

### § 3420.4-4 Consultation with Indian tribes.

The Secretary shall consult with any Indian tribe which may be affected by the adoption of the proposed regional lease sale schedule. The Secretary shall give the tribe 30 days in which to comment prior to adopting a lease sale schedule.

[44 FR 42615, July 19, 1979. Redesignated and amended at 47 FR 33139, July 30, 1982]

### § 3420.4-5 Consultation with the Attorney General.

The Secretary shall consult with and give due consideration to the advice of the Attorney General before the adoption of the proposed regional lease sale schedule. The Secretary shall provide 30 days in which the Attorney General may advise the Secretary prior to adopting a lease schedule.

[44 FR 42615, July 19, 1979. Redesignated and amended at 47 FR 33139, July 30, 1982]

## **§ 3420.5**

### **§ 3420.5 Adoption of final regional lease sale schedule.**

#### **§ 3420.5-1 Announcement.**

Following completion of the requirements of §§ 3420.3 and 3420.4 of this title, the Secretary shall announce the adoption of a final regional lease sale schedule. The announcement shall be published in the FEDERAL REGISTER and contain a legal description of each tract included in the lease sale schedule and the date when each tract has been tentatively scheduled for sale. Notice of this announcement shall be published in at least 1 newspaper of general distribution in each state within the region for which the regional lease sale schedule is adopted.

[44 FR 42615, July 19, 1979. Redesignated and amended at 47 FR 33139, July 30, 1982]

#### **§ 3420.5-2 Revision.**

(a) The Secretary may revise either the list of tracts included in the schedule or the timing of the lease sales in accordance with any alternatives which were considered in the regional lease sale environmental impact statement and during consultation under § 3420.4 of this title. BLM will publish a notice in the FEDERAL REGISTER and provide a 30-day comment period before it makes any revision increasing the number or frequency of sales, or the amount of coal offered. BLM will publish any revision in the FEDERAL REGISTER.

(b) Any regional lease sale schedule may be updated or replaced as a result of a new regional tract ranking, selection, and scheduling effort conducted in accordance with the provisions of § 3420.3-4 of this title.

[44 FR 42615, July 19, 1979. Redesignated and amended at 47 FR 33140, July 30, 1982; 64 FR 52243, Sept. 28, 1999]

### **§ 3420.6 Reoffer of tracts not sold in previous regional lease sales.**

Following the offering of tracts in accordance with the procedures outlined in §§ 3420.2, 3420.3, 3420.4 and 3420.5, any tracts not sold in accordance with the above listed provisions may be reoffered for sale by the Department provided a lease sale schedule has been reviewed by the regional coal team and,

## **43 CFR Ch. II (10-1-08 Edition)**

after consultation with the Governor, adopted by the Secretary. Provisions of subpart 3422 shall apply to these tracts.

[48 FR 37655, Aug. 19, 1983]

### **Subpart 3422—Lease Sales**

#### **§ 3422.1 Fair market value and maximum economic recovery.**

(a) Not less than 30 days prior to the publication of a notice of sale, the Secretary shall solicit public comments on fair market value (FMV) appraisal and the maximum economic recovery (MER) of the tract or tracts proposed to be offered and on factors that may affect these 2 determinations. BLM will publish the solicitation in the FEDERAL REGISTER and at least once per week for two consecutive weeks in a newspaper of general circulation in the area of the sale. Proprietary data marked as confidential may be submitted to the Bureau of Land Management in response to the solicitation of public comments. Data so marked shall be treated in accordance with the laws and regulations governing the confidentiality of such information.

(b) The authorized officer shall prepare a written report containing information on the mining method evaluation, estimated coal reserves by bed, coal quality assessment, royalty and lease bond recommendations and an evaluation of the public comments on the FMV and MER.

(c)(1) The authorized officer shall not accept any bid that is less than the fair market value as determined by the Department.

(2) Minimum bids shall be set on a regional basis and may be expressed in either dollars-per-acre or cents-per-ton. In no case shall the minimum bid be less than \$100 per acre or its equivalent in cents-per-ton.

[47 FR 33140, July 30, 1982, as amended at 50 FR 8626, Mar. 4, 1985; 51 FR 18888, May 23, 1986; 64 FR 52243, Sept. 28, 1999]

#### **§ 3422.2 Notice of sale and detailed statement.**

(a) Prior to the lease sale, the authorized officer shall publish a notice of the proposed sale in the FEDERAL

## Bureau of Land Management, Interior

## § 3422.3-2

REGISTER and in a newspaper(s) of general circulation in the county or equivalent political subdivision in which the tracts to be sold are situated. The newspaper notice shall be published not less than once a week for 3 consecutive weeks. BLM will post notice of the sale in BLM State Office where the coal lands are managed. BLM will also mail notice to any surface owner of lands noticed for sale and to any other person who has requested notice of sales in the area. The lease sale shall not be held until at least 30 days after such posting in the State Office.

(b) The notice shall:

(1) List the time and place of sale, the type of sale, bidding method, rental, and the description of the tract(s) being offered and the minimum bid(s) to be considered;

(2) Contain a description of the coal resources to be offered; and

(3) Contain information on where a detailed statement of the terms and conditions of the lease(s) which may result from the lease sale may be obtained.

(c) The detailed statement of the terms and conditions of the lease(s) offered and bidding instructions for sale shall:

(1) Contain an explanation of the manner in which the bids may be submitted;

(2) Contain a warning to all bidders concerning 18 U.S.C. 1860, which prohibits unlawful combination or intimidation of bidders;

(3) Specify that the Secretary reserves the right to reject any and all bids and the right to offer the lease to the next highest qualified bidder if the successful bidder fails to obtain the lease for any reason;

(4) Contain a notice that each bid shall be accompanied by the bidder's qualifications (See 43 CFR 3472.2-2);

(5) Contain a notice to bidders that the winning bidders shall have to submit the information required by the Attorney General for post-sale review (See 43 CFR 3422.3-4);

(6) If appropriate, contain (i) a copy of any written qualified surface owner consent, including purchase price, financial obligations and terms and conditions, filed and verified prior to the posting of the notice of lease sale in

the appropriate Bureau of Land Management State office; or (ii) a listing of lands for which qualified surface owner consent is required prior to lease sale but has not yet been filed, along with a statement that any consent for those lands filed prior to the deadline for such filings shall be made a part of the official file and shall be available for inspection by the public;

(7) If appropriate, contain a notice that bidders shall file a statement that all information they hold relevant to written consents affecting any area offered in the sale in which the bid is submitted has been filed with the proper Bureau of Land Management State office (43 CFR subpart 1821) in accordance with the provisions of subpart 3427 of this title;

(8) Contain a copy of the proposed lease, including all terms and special stipulations; and

(9) Contain any other information deemed appropriate by the authorized officer.

(d) Each successful bidder, if any, shall reimburse the United States for a proportionate share of the cost of publishing the notice of sale as a condition of lease issuance.

[44 FR 42615, July 19, 1979. Redesignated and amended at 47 FR 33140, July 30, 1982; 64 FR 52243, Sept. 28, 1999]

### § 3422.3 Sale procedures.

#### § 3422.3-1 Bidding systems.

(a) The provisions of 10 CFR part 378<sup>1</sup> are not applicable to this part.

(b) The Department may conduct lease sales using cash bonus—fixed royalty bidding systems or any other bidding system adopted through rule-making procedures.

[47 FR 33140, July 30, 1982]

#### § 3422.3-2 Conduct of sale.

(a)(1) Sealed bids shall be received only until the hour on the date specified in the notice of competitive leasing; all sealed bids submitted after that hour shall be returned. The authorized officer shall read all sealed bids, and shall announce the highest bid.

<sup>1</sup>Redesignated as 30 CFR part 260 and removed at 48 FR 1182, Jan. 11, 1983.

(2) No decision to accept or reject the high bid will be made at the time of sale.

(b) A sale panel shall convene to determine: (1) If the high bid was properly submitted; (2) if it reflects the FMV of the tract; and (3) whether the bidder is qualified to hold the lease. The recommendations of the panel shall be in writing and sent to the authorized officer who shall make the final decision to accept a bid or reject all bids. The sale panel's recommendation and the authorized officer's written decision shall be entered in the case file for the offered tract. The successful bidder shall be notified in writing. The Department reserves the right to reject any and all bids regardless of the amount offered, and shall not accept any bid that is less than fair market value. The authorized officer shall notify any bidder whose bid has been rejected and include in such notice a statement of the reason for the rejection. The Department reserves the right to offer the lease to the next highest qualified bidder if the successful bidder fails to execute the lease, or is for any reason disqualified from receiving the lease.

(c) Each sealed bid shall be accompanied by a certified check, cashier's check, bank draft, money order, certificate of bidding rights, personal check or cash for one-fifth of the amount of the bonus, and a qualifications statement over the bidder's own signature with respect to citizenship and interests held, as prescribed in § 3472.2-2 of this title.

[44 FR 42615, July 19, 1979. Redesignated and amended at 47 FR 33140, July 30, 1982]

**§ 3422.3-3 Unsurveyed lands.**

If the land is unsurveyed, the successful bidder shall not be given notice to comply with the requirements of § 3422.4 of this title for lease issuance until the land has been surveyed as provided in § 3471.1-2 of this title.

**§ 3422.3-4 Consultation with the Attorney General.**

(a) Subsequent to a lease sale, but prior to issuing a lease, the authorized officer shall require the successful bidder to submit on a form or in a format approved by the Attorney General in-

formation relating to the bidder's coal holdings to the authorized officer for transmittal to the Attorney General. Upon receipt of the information, the authorized officer shall notify the Attorney General of the proposed lease issuance, the name of the successful bidder and terms of the proposed lease sale and shall transmit the bidder's statement on coal holdings. A description of the information required by the Attorney General and the form or format for submission of the information may be obtained from the authorized officer.

(b) Where a successful bidder has previously submitted the currently required information, a reference to the date of submission and to the serial number of the record in which it is filed, together with a statement of any and all changes in holdings since the date of the previous submission, shall be accepted.

(c) The authorized officer shall not issue a lease until 30 days after the Attorney General receives the notice and statement of the successful bidder's coal holdings, or the Attorney General notifies the Director that lease issuance would not create or maintain a situation inconsistent with the antitrust laws, whichever comes first. The Attorney General shall inform the successful bidders and simultaneously, the authorized officer, if the successful bidder's statement of coal holdings is incomplete or inadequate, and shall specify what information is required for the Attorney General to complete his review. The 30 day period shall stop running on the date of such notification and not resume running until the Attorney General receives the supplemental information.

(d) The authorized officer shall not issue the lease to the successful bidder, if, during the 30 day period, the Attorney General notifies the Director that the lease issuance would create or maintain a situation inconsistent with antitrust law, except after complying with paragraph (e)(2) of this section.

(e) If the Attorney General notifies the Director that a lease should not be issued, the authorized officer may:

(1) Reject all bids or may notify the Attorney General in accordance with paragraph (a) of this section that

## Bureau of Land Management, Interior

## § 3425.1-1

issuance of the proposed lease to the next qualified high bidder is under consideration; or

(2) Issue the lease if, after a public hearing is conducted on the record in accordance with the Administrative Procedure Act, the authorized officer determines that:

(i) Issuance of the lease is necessary to carry out the purposes of the Federal Coal Leasing Amendments Act of 1976;

(ii) Issuance of the lease is consistent with the public interest; and

(iii) There are no reasonable alternatives to the issuance of the lease consistent with the Federal Coal Leasing Amendments Act of 1976, the anti-trust laws, and the public interest.

(f) If the Attorney General does not reply in writing to the notification in paragraph (a) of this section within 30 days, the authorized officer may issue a lease without waiting for the advice of the Attorney General.

(g) Information submitted to the authorized officer to comply with this section shall be treated as confidential and proprietary data if marked "confidential" by the reporting company. Confidential information shall be submitted to the authorized officer in a sealed envelope and shall be transmitted in that form to the Attorney General.

[44 FR 42615, July 19, 1979, as amended at 47 FR 33140, July 30, 1982]

### § 3422.4 Award of lease.

(a) After the authorized officer has accepted a high qualified bid, and the Attorney General has not objected to lease issuance or the procedures in § 3422.3-4(e)(2) of this title have been completed, the authorized officer shall send 4 copies of the lease form to the successful bidder. The successful bidder shall complete, sign and return these forms and shall: pay the balance of the bonus bid, if required; pay the first year's rental; pay the proportionate share of the cost of publishing the notice of sale; and file a lease bond. Upon receipt of the above, the authorized officer shall execute the lease.

(b) If the successful bidder dies before the lease is issued, the provisions of § 3472.2-4 of this title shall apply.

(c) At least half of the acreage offered for competitive lease in any 1 year shall be offered on a deferred bonus payment basis. In a deferred bonus payment, the lessee shall pay the bonus in 5 equal installments; the first installment shall be submitted with the bid. The balance shall be paid in equal annual installments due and payable on the next 4 anniversary dates of the lease. If a lease is relinquished or otherwise cancelled or terminated, the unpaid remainder of the bid shall be immediately payable to the United States.

(d) If the successful bidder fails to comply with any requirement of paragraph (a) of this section or of § 3422.3-4 of this title, the deposit on the successful bid shall be forfeited to the United States.

(e) If the lease cannot be awarded for reasons determined by the authorized officer to be beyond the control of the successful bidder, the deposit submitted with the bid shall be refunded.

[47 FR 33141, July 30, 1982]

## Subpart 3425—Leasing on Application

### § 3425.0-1 Purpose.

### § 3425.0-2 Objective.

The objective of this subpart is to provide an application process through which the Department may consider holding lease sales apart from the competitive leasing process set out in §§ 3420.3 through 3420.5-2 of this title, where an emergency need for unleased coal deposits is demonstrated, or in areas outside coal production regions or outside eastern activity planning areas.

[44 FR 42615, July 19, 1979, as amended at 47 FR 33141, July 30, 1982]

### § 3425.1 Application for lease.

#### § 3425.1-1 Where filed.

Application for a lease covering lands subject to leasing (43 CFR 3400.2) shall be filed in the Bureau of Land Management State Office having jurisdiction over the lands or minerals involved (43 CFR subpart 1821).

## § 3425.1-2

### § 3425.1-2 Contents of application.

No specific form of application is required. Three copies of the application, including preliminary and other data required by this subpart shall be filed. The lands applied for shall be described in accordance with subpart 3471 of this title. The application must be accompanied by the filing fee (43 CFR 3473.2).

### § 3425.1-3 Qualifications of the applicant.

Any applicant for a lease shall meet the qualifications required of a lessee as specified in subpart 3472 of this title.

### § 3425.1-4 Emergency leasing.

(a) An emergency lease sale may be held in response to an application under this subpart if the applicant shows:

(1) That the coal reserves applied for shall be mined as part of a mining operation that is producing coal on the date of the application, and either:

(i) The Federal coal is needed within 3 years (A) to maintain an existing mining operation at its current average annual level of production on the date of application or (B) to supply coal for contracts signed prior to July 19, 1979, as substantiated by a complete copy of the supply or delivery contract, or both; or

(ii) If the coal deposits are not leased, they would be bypassed in the reasonably foreseeable future, and if leased, some portion of the tract applied for would be used within 3 years; and

(2) That the need for the coal deposits shall have resulted from circumstances that were either beyond the control of the applicant or could not have been reasonably foreseen and planned for in time to allow for consideration of leasing the tract under the provisions of § 3420.3 of this title.

(b) The extent of any lease issued under this section shall not exceed 8 years of recoverable reserves at the rate of production under which the applicant qualified in paragraph (a)(1) of this section. If the applicant qualifies under both paragraphs (a)(1) (A) and (B) of this section, the higher rate applies.

(c) The authorized officer shall provide the Governor of the affected State(s) a notice of an emergency lease

## 43 CFR Ch. II (10-1-08 Edition)

application when it is filed with the Bureau of Land Management.

[44 FR 42615, July 19, 1979, as amended at 47 FR 33141, July 30, 1982; 48 FR 37655, Aug. 19, 1983]

### § 3425.1-5 Leasing outside coal production regions.

A lease sale may be held in response to an application under this subpart if the application covers coal deposits which are outside coal production regions identified under § 3400.5 of this title.

[47 FR 33141, July 30, 1982]

### § 3425.1-6 Hardship leases.

The Secretary may issue a lease under this subpart based on any application listed by serial number in the modified court order in *NRDC v. Hughes*, 454 F. Supp. 148 (D.D.C. 1978).

### § 3425.1-7 Preliminary data.

(a) Any application for a lease shall contain preliminary data to assist the authorized officer in conducting an environmental analysis as described in § 3425.3 of this title.

(b) Such preliminary data shall include:

(1) A map, or maps, showing the topography, physical features and natural drainage patterns, existing roads, vehicular trails, and utility systems; the location of any proposed exploration operations, including seismic lines and drill holes; to the extent known, the location of any proposed mining operations and facilities, trenches, access roads or trails, and supporting facilities including the approximate location and extent of the areas to be used for pits, overburden, and tailings; and the location of water sources or other resources that may be used in the proposed operations and facilities.

(2) A narrative statement, including:

(i) The anticipated scope, method, and schedule of exploration operations, including the types of exploration equipment to be used;

(ii) The method of mining anticipated, including the best estimate of the mining sequence and production rate to be followed;

## Bureau of Land Management, Interior

## § 3425.2

(iii) The relationship between the mining operations anticipated on the lands applied for and existing or planned mining operations, or support facilities on adjacent Federal or non-Federal lands;

(iv) A brief description, including maps or aerial photographs, as appropriate, of: The existing land use or uses within and adjacent to the lands applied for; known geologic, visual, cultural, paleontological or archaeological features; wetlands and floodplains; and known habitat of fish and wildlife—particularly threatened and endangered species—any of which may be affected by the proposed or anticipated exploration or mining operations and related facilities;

(v) A brief description of the proposed measures to be taken to control or prevent fire and to mitigate or prevent soil erosion, pollution of surface and ground water, damage to fish and wildlife or other natural resources, air and noise pollution, adverse impacts to the social and infrastructure systems of local communities, and hazards to public health and safety; reclaim the surface; and meet other applicable laws and regulations. The applicant may submit other pertinent information that the applicant wishes to have considered by the authorized officer;

(vi) A statement which describes the intended use of the coal covered by the emergency application; and

(vii) Any other information which will show that the application meets the requirements of this subpart.

(c) The applicant may engage in casual use of the land in the application, but shall not undertake any exploration without prior authorization by exploration license, or undertake any mining operations until lease issuance.

(d) The authorized officer, after reviewing the preliminary data contained in an application, and at any time during an environmental assessment may request additional information from the applicant. Where the surface of the land is held by a qualified surface owner (§ 3400.0-5) and the mining method to be used is other than underground mining techniques, the authorized officer shall obtain documents necessary to show ownership of the surface. The applicant shall submit

evidence of written consent from any qualified surface owner(s). (In accordance with subpart 3427 of this title).

[44 FR 42615, July 19, 1979, as amended at 47 FR 33141, July 30, 1982]

### § 3425.1-8 Rejection of applications.

(a) An application for a lease shall be rejected in total or in part if the authorized officer determines that: (1) The application is not consistent with the applicable regulations; (2) issuance of the lease would compromise the regional leasing process described in § 3420.3 of this title; or (3) leasing of the lands covered by the application, for environmental or other sufficient reasons, would be contrary to the public interest.

(b) Any application subject to rejection under paragraph (a) of this section shall not be rejected until the applicant is given written notice of the opportunity to provide requested missing information and fails to do so within the time specified in the decision issued for that purpose.

(c) The authorized officer shall transmit reasonable notice of the rejection of an emergency lease application to the Governor of the affected State(s).

[44 FR 42615, July 19, 1979, as amended at 47 FR 33141, July 30, 1982; 48 FR 37655, Aug. 19, 1983]

### § 3425.1-9 Modification of application area.

The authorized officer may add or delete lands from an area covered by an application for any reason he/she determines to be in the public interest. If an environmental assessment of the modification is required, BLM will solicit and consider public comments on the modified application.

[47 FR 33141, July 30, 1982, as amended at 64 FR 52243, Sept. 28, 1999]

### § 3425.2 Land use plans.

No lease shall be offered for sale under this subpart unless the lands have been included in a comprehensive land use plan or a land use analysis, as required in § 3420.1-4 of this title. The decision to hold a lease sale shall be

### § 3425.3

consistent with the appropriate comprehensive land use plan or land use analysis.

[44 FR 42615, July 19, 1979, as amended at 47 FR 33141, July 30, 1982]

### § 3425.3 Environmental analysis.

(a) Before a lease sale may be held under this subpart, the authorized officer shall prepare an environmental assessment or environmental impact statement of the proposed lease area in accordance with 40 CFR parts 1500 through 1508. BLM will publish a notice in the FEDERAL REGISTER, and at least once per week for two consecutive weeks in a newspaper of general circulation in the area of the sale, announcing the availability of the environmental assessment or draft environmental impact statement and the hearing required by § 3425.4(a)(1). BLM also will mail to the surface owner a notice of any lands to be offered for sale and to any person who has requested notice of sales in the area.

(b) For lease applications involving lands in the National Forest System, the authorized officer shall submit the lease application to the Secretary of Agriculture for consent, for completion or consideration of an environmental assessment and for the attachment of appropriate lease stipulations, and for the making of any other findings prerequisite to lease issuance. (43 CFR 3400.3, 3461.1(a))

[44 FR 42615, July 19, 1979, as amended at 47 FR 33141, July 30, 1982; 64 FR 52243, Sept. 28, 1999]

### § 3425.4 Consultation and sale procedures.

(a)(1) Prior to holding any lease sale in response to any application under this subpart, a public hearing shall be held on the environmental assessment or environmental impact statement, the proposed sale and the fair market value and maximum economic recovery on the proposed lease tract.

(2) Prior to holding any lease sale under this subpart, the Secretary shall consult with the entities and individuals listed in §§ 3420.4-2 through 3420.4-5 of this title.

(b) Subpart 3422 of this title applies in full to any sale to be held in re-

### 43 CFR Ch. II (10-1-08 Edition)

sponse to an application filed under this subpart.

[47 FR 33142, July 30, 1982]

### § 3425.5 Lease terms.

The terms of a lease issued under this subpart shall be consistent with the terms established for all competitive coal leases (43 CFR part 3470).

## Subpart 3427—Split Estate Leasing

### § 3427.0-1 Purpose.

The purpose of this subpart is to set out the protection that shall be afforded qualified surface owners of split estate lands (43 CFR 3400.0-5) and the requirements for submission of evidence of written surface owner consent from qualified surface owners of split estate lands.

[47 FR 33142, July 30, 1982]

### § 3427.0-3 Authority.

(a) These regulations are issued under the authority of the statutes cited in § 3400.0-3 of this title.

(b) These regulations primarily implement section 714 of the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1304), as construed in Solicitor's Opinion M-36909, 86 I.D. 28 (1979).

### § 3427.0-7 Scope.

The surface owner consent provisions of the Surface Mining Control and Reclamation Act do not apply:

(a) To preference right lease applications; and

(b) If the split estate coal is to be mined by underground mining techniques (43 CFR 3500.0-5).

### § 3427.1 Deposits subject to consent.

On split estate lands (43 CFR 3400.0-5(kk)) where the surface is owned by a qualified surface owner, coal deposits that will be mined by other than underground mining techniques shall not be included in a lease sale without evidence of written consent from the qualified surface owner (43 CFR 3400.0-5(gg)) allowing entry and commencement of surface mining operations.

[47 FR 33142, July 30, 1982]

**§ 3427.2 Procedures.**

(a)(1) Each written consent or evidence of written consent shall be filed with the appropriate Bureau of Land Management State office (43 CFR subpart 1821). For lands offered for lease sale pursuant to subpart 3420 of this title, consents or written evidence thereof shall be filed on or before a date prior to the lease sale specified in a notice published in the FEDERAL REGISTER. For lands offered for lease sale pursuant to subpart 3425 of this title, consents or written evidence thereof shall be filed prior to the posting of the lease sale notice.

(2) Statement of refusal to consent shall be filed with the appropriate Bureau of Land Management State Office, but such statement shall be accepted for filing only during activity planning.

(b) Written consent, evidence of written consent, or statement of refusal to consent may be filed by any private person or persons with a potential interest in the lease sale of split estate lands.

(c) Such filing shall, at a minimum, contain the present legal address of the qualified surface owner, and the name, ownership, interest, if any, and legal address of the party making the filing, and if it is a written consent or evidence thereof, a copy of the written consent or evidence thereof.

(d) The authorized officer shall verify that the written consent or evidence of such consent meets all of the following requirements, and that the statement of refusal to consent meets the requirements of paragraphs (d)(2) and (3) of this section:

(1) The right to enter and commence mining is transferable to whoever makes the successful bid in a lease sale for a tract which includes the lands to which the consent applies. A written consent shall be considered transferable only if it provides that after the lease sale for the tract to which the consent applies:

(i) The successful bidder shall assume all rights and obligations of the holder of the consent, including the obligation to make all payments to the grantor of the consent and to reimburse the holder of the consent for all money pre-

viously paid to the grantor under the consent contract; and

(ii) Neither the holder nor the grantor of the consent has any right under the consent contract to prevent the successful bidder from assuming the rights and obligations of the holder of the consent by imposing additional costs or conditions or otherwise;

(2) The named surface owner is a qualified surface owner as defined in § 3400.0-5(gg) of this title; and

(3) The title for all split estate lands described in the filing is held by the named qualified surface owners.

(e) Upon receipt of a filing from anyone other than the named qualified surface owner, the authorized officer shall contact the named qualified surface owner and request his confirmation in writing that the filed, written consent or evidence thereof to enter and commence mining has been granted, and that the filing fully discloses all of the terms of the written consent, or that the refusal to consent is accurate.

(f) The applicable conditions of paragraphs (d) and (e) of this section shall be met prior to the lease sale for lands to which the consents apply.

(g) The authorized officer shall in all cases notify the person or persons filing the written consent, evidence of written consent, or statement of refusal to consent of the results of the review of the filing, including any request for additional information needed to satisfy the requirements of this subpart in cases where insufficient information was supplied with the original filing.

(h) The purchase price of any applicable written consent from a qualified surface owner submitted and verified prior to posting of the notice of lease sale shall be included with the description of the tract(s) in the notice of lease sale, and the other terms of the consent shall be included in the detailed statement of the sale for the tract(s). Any consent filed after posting of the notice of lease sale shall be placed in the official file for the lease tract(s) to which the consent applies and shall be available for inspection by the public in the appropriate Bureau of Land Management State office (43 CFR subpart 1821).

### § 3427.3

(i) Any statement of refusal to consent shall be treated as controlling until the activity planning cycle that includes the area covered by the refusal to consent is repeated or the surface estate is sold. When an activity planning cycle is initiated, the qualified surface owner shall be notified that his/her prior statement of refusal has expired and shall be given the opportunity to submit another statement.

(j) If the surface owner fails to provide evidence of qualifications in response to surface owner consultation or to a written request for such evidence, and if the authorized officer is unable to independently determine whether or not the surface owner is qualified, the authorized officer shall presume that the surface owner is unqualified. The authorized officer shall notify the surface owner in writing of this determination and shall provide the surface owner an opportunity to appeal the determination.

(k) Any surface owner determined to be unqualified by decision of the field official of the surface management agency shall have 30 days from the date of receipt of such decision in which he/she may appeal the decision to the appropriate State Director of the Bureau of Land Management. The surface owner shall have the right to appeal the State Director's decision to the Director, Bureau of Land Management, within 30 days of receipt of that decision. Both appeals under this paragraph shall be in writing. As an exception to the provisions of § 3000.4 of this title, the decision of the Director shall be the final administrative action of the Department of the Interior.

[44 FR 42615, July 19, 1979, as amended at 47 FR 33142, July 30, 1982; 48 FR 37656, Aug. 19, 1983]

### § 3427.3 Validation of information.

Any person submitting a written consent shall include with his filing a statement that the evidence submitted, to the best of his knowledge, represents a true, accurate, and complete statement of information regarding the consent for the area described.

## 43 CFR Ch. II (10–1–08 Edition)

### § 3427.4 Pre-existing consents.

An otherwise valid written consent given by a qualified surface owner prior to August 3, 1977, shall not be required to meet the transferability of § 3427.2(d)(1) of this title.

[47 FR 33142, July 30, 1982]

### § 3427.5 Unqualified surface owners.

(a) Lease tracts involving surface owners who are not qualified (see § 3400.0-5(gg)) shall be leased subject to the protections afforded the surface owner by the statute(s) under which the surface was patented and the coal reserved to the United States. No consent from an unqualified surface owner is required under this subpart before the authorized officer may issue a lease for such a tract (see section 9 of the Stock-Raising Homestead Act (43 U.S.C. 249); the Act of March 3, 1909 (30 U.S.C. 81); section 3 of the Act of June 22, 1910 (30 U.S.C. 85); and section 5 of the Act of June 21, 1949 (30 U.S.C. 54)).

(b) The provisions of §§ 3427.1 through 3427.4 of this title are inapplicable to any lease tract on which a consent has been given by an unqualified surface owner. The high bidder at the sale of such a tract is not required to submit any evidence of written consent before the authorized officer may issue the lease unless the statute establishing the relative rights of the United States (and its lessees) and the surface owner so requires.

[47 FR 33142, July 30, 1982]

## PART 3430—NONCOMPETITIVE LEASES

### Subpart 3430—Preference Right Leases

Sec.

3430.0-1 Purpose.

3430.0-3 Authority.

3430.0-7 Scope.

3430.1 Preference right leases.

3430.1-1 Showing required for entitlement to a lease.

3430.1-2 Commercial quantities defined.

3430.2 Application for lease.

3430.2-1 Initial showing.

3430.2-2 Additional time.

3430.3 Planning and environment.

3430.3-1 Land use planning.

3430.3-2 Environmental analysis.

3430.4 Final showing.

3430.4-1 Request for final showing.

## Subpart 3430—Preference Right Leases

### § 3430.0-1 Purpose.

These regulations set forth procedures for processing noncompetitive (preference right) coal lease applications on Federal lands.

### § 3430.0-3 Authority.

(a) These regulations are issued under the authority of the statutes cited in § 3400.0-3 of this title.

(b) These regulations primarily implement section 2(b) of the Mineral Leasing Act of 1920 (30 U.S.C. 201(b)).

[44 FR 42628, July 19, 1979, as amended at 47 FR 33143, July 30, 1982]

### § 3430.0-7 Scope.

Section 4 of the Federal Coal Leasing Amendments Act of 1976, amending 30 U.S.C. 201(b), repealed the Secretary's authority to issue or extend a coal prospecting permit on Federal lands. Therefore, these regulations apply only to preference right lease applications based on prospecting permits issued prior to August 4, 1976. The surface owner consent provisions of section 714 of the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1304) do not apply to preference right lease applications.

[47 FR 33143, July 30, 1982]

### § 3430.1 Preference right leases.

#### § 3430.1-1 Showing required for entitlement to a lease.

An applicant for a preference right lease shall be entitled to a noncompetitive coal lease if the applicant can demonstrate that he discovered commercial quantities of coal on the prospecting permit lands within the term of the prospecting permit, all other requirements having been met.

## **§ 3430.1-2**

### **§ 3430.1-2 Commercial quantities defined.**

For the purpose of § 3430.1-1 of this title, commercial quantities is defined as follows:

(a) The coal deposit discovered under the prospecting permit shall be of such character and quantity that a prudent person would be justified in further expenditure of his labor and means with a reasonable prospect of success in developing a valuable mine.

(b) The applicant shall present sufficient evidence to show that there is a reasonable expectation that revenues from the sale of the coal shall exceed the cost of developing the mine and extracting, removing, transporting, and marketing the coal. The costs of development shall include the estimated cost of exercising environmental protection measures and suitably reclaiming the lands and complying with all applicable Federal and state laws and regulations.

### **§ 3430.2 Application for lease.**

#### **§ 3430.2-1 Initial showing.**

All preference right coal lease applications shall have contained or shall have been supplemented by the timely submission of:

(a) Information on the quantity and quality of the coal resources discovered within the boundaries of the prospecting permit area, including an average proximate analysis, sulfur content and BTU content of the coal, and all supporting geological and geophysical data used to develop the required information.

(1) Coal quantity shall be indicated by structural maps of the tops of all beds to be mined, isopachous maps of beds to be mined and interburden; and, for beds to be mined by surface mining methods, isopachous maps of the overburden. These maps shall show the location of test holes and outcrops. An estimate of the measured and indicated reserves for each bed to be mined shall be included.

(2) Coal quality data shall include, at a minimum, an average proximate analysis, sulfur content, and BTU content of the coal in each bed to be mined. Also, all supporting geological and geophysical data used to develop

## **43 CFR Ch. II (10-1-08 Edition)**

the required information shall be submitted.

(b) Topographic maps as available from state or Federal sources showing physical features, drainage patterns, roads and vehicle trails, utility systems, and water sources. The location of proposed development and mining operations facilities shall be identified on the maps. These maps shall include the approximate locations and extent of tailings and overburden storage areas; location and size of pit areas; and the location of water sources or other resources that may be used in the proposed operation and facilities incidental to that use.

(c) A narrative statement that includes:

(1) The anticipated scope of operations, the schedule of operations, and the types of equipment to be used;

(2) The mining method to be used and an estimate of the expected mining sequence and production rate; and

(3) The relationship, if any, between operations planned on the land applied for and existing or planned operations and facilities on adjacent lands.

(d) The authorized officer may request from the applicant, or the applicant may submit, any other information necessary to conduct an environmental analysis of the proposed mining operation, formulate mitigating measures and lease terms and determine commercial quantities.

[44 FR 42628, July 19, 1979, as amended at 47 FR 33143, July 30, 1982]

#### **§ 3430.2-2 Additional time.**

(a) If the applicant has timely submitted some, but not all, of the information required by § 3430.2-1 of this title, the authorized officer shall request additional information and shall specify the information required.

(b) The applicant shall submit any requested information within 60 days of the date of the request. The authorized officer may grant one 60-day extension if the applicant files a written request for an extension within the first 60-day period.

[44 FR 42628, July 19, 1979. Redesignated and amended at 47 FR 33143, July 30, 1982]

**§ 3430.3 Planning and environment.****§ 3430.3-1 Land use planning.**

(a) As a matter of policy, the Department shall complete the processing of all preference right lease applications.

(b) Preference right lease applications shall be processed in the cycle of on-going comprehensive land use plans unless the authorized officer determines that the processing of the application, in the cycle of on-going comprehensive land use plans, will not be completed by December 1, 1984.

(c) (1) Each applicant may file a request with the authorized officer:

(i) For an estimate of when the application shall be processed in the cycle of on-going comprehensive land use plans; and

(ii) To have the applicant's application processed in advance of the period specified in the authorized officer's estimate.

(2) The request shall include a statement of how the applicant will benefit from having the application processed more quickly than otherwise scheduled, and shall specify how the pendency of the application affects the applicant's production, marketing or use of coal before 1986.

(3) If the authorized officer concludes that the failure to process an application apart from the cycle of on-going comprehensive land use plans would cause the applicant substantial hardship, the authorized officer may process the application apart from the cycle of on-going comprehensive land use plans in a land use analysis.

[44 FR 42628, July 19, 1979, as amended at 47 FR 33143, July 30, 1982; 52 FR 25798, July 8, 1987]

**§ 3430.3-2 Environmental analysis.**

(a) After the applicant has completed the initial showing required under § 3430.2 of this title, the authorized officer shall conduct an environmental analysis of the proposed preference right lease area and prepare an environmental assessment or environmental impact statement on the application.

(b) The environmental analysis may be conducted in conjunction with and included as part of the environmental impact statement required for coal ac-

tivity planning under § 3420.3-4 of this title.

(c) Except for the coal preference right lease applications analyzed in the *San Juan Regional Coal Environmental Impact Statement* (March 1984), the *Savery Coal EIS* (July 1983), and the *Final Decision Record and Environmental Assessment of Coal PRLAs (Beans Spring, Table, and Black Butte Creek Projects)* (September 1982), or covered by serial numbers C-0127832, C-0123475, C-0126669, C-8424, C-8425, W-234111, C-0127834, U-1362, NM-3099, F-014996, F-029746, and F-033619, the authorized officer shall prepare environmental impact statements for all preference right lease applications for coal for which he/she proposes to issue a lease, in accordance with the following procedures:

(1) The authorized officer shall prepare adequate environmental impact statements and other National Environmental Policy Act documentation, prior to the determination that commercial quantities of coal have been discovered on the lands subject to a preference right lease application, in order to assure, *inter alia*, that the full cost of environmental impact mitigation, including site-specific lease stipulations, is included in the commercial quantities determination for that preference right lease application.

(2) The authorized officer shall prepare and evaluate alternatives that will explore various means to eliminate or mitigate the adverse impacts of the proposed action. The impact analysis shall address each numbered subject area set forth in § 3430.4-4 of this title, except that the impact analysis need not specifically address the subject areas of Mine Planning or of Bonding. At a minimum, each environmental impact statement shall include:

(i) A "no action" alternative that examines the impacts of the projected development without the issuance of leases for the preference right lease applications;

(ii) An alternative setting forth the applicant's proposed action. This alternative shall examine the applicant's proposal, based on information submitted in the applicant's initial showing and standard lease stipulations;

#### § 3430.4

(iii) An alternative setting forth the authorized officer's own proposed action. This alternative shall examine:

(A) The impacts of mining on those areas encompassed by the applicant's proposal that are found suitable for further consideration for mining after the unsuitability review provided for by subpart 3461 of this title; and

(B) The impacts of mining subject to appropriate special stipulations designed to mitigate or eliminate impacts for which standard lease stipulations may be inadequate. With respect to mitigation of significant adverse impacts, alternative lease stipulations shall be developed and preferred lease stipulations shall be identified and justified. The authorized officer shall state a preference between standard lease stipulations and special stipulations (performance standards or design criteria).

(iv) An exchange alternative, examining any reasonable alternative for exchange that the Secretary would consider were the applicant to show commercial quantities, and, in cases where, if the lands were to be leased, there is a finding that the development of the coal resources is not in the public interest.

(v) An alternative exploring the options of withdrawal and just compensation and examining the possibility of Secretarial withdrawal of lands covered by a preference right lease application (assuming commercial quantities will be shown) while the Secretary seeks congressional authorization for purchase or condemnation of the applicant's property, lease or other rights.

(3) The authorized officer shall prepare a cumulative impact analysis in accordance with 40 CFR 1508.7 and 1508.25 that examines the impacts of the proposed action and the alternatives when added to other past, present, and reasonably foreseeable future actions, regardless of what agency (Federal or nonfederal) or person undertakes such other actions.

(i) The cumulative impact analysis shall include an analysis of the combined impacts of the proposed preference right leasing with the mining of currently leased coal and other reasonably foreseeable future coal develop-

#### 43 CFR Ch. II (10–1–08 Edition)

ment, as well as other preference right leasing in the area under examination.

(ii) The cumulative impact analysis shall also examine the impacts of the proposed preference right leasing in conjunction with impacts from non-coal activities, such as mining for other minerals, other projects requiring substantial quantities of water, and other sources of air pollution.

(4) When information is inadequate to estimate impacts reasonably, the authorized officer shall comply with the provisions of 40 CFR 1502.22(b).

(5) Each environmental impact statement shall be prepared in accordance with the Council of Environmental Quality's National Environmental Policy Act regulations, 40 CFR part 1500.

[44 FR 42628, July 19, 1979, as amended at 47 FR 33143, July 30, 1982; 52 FR 25798, July 8, 1987]

#### § 3430.4 Final showing.

##### § 3430.4–1 Request for final showing.

(a) Upon completion of the environmental assessment or impact statement on the application, the authorized officer shall, if not previously submitted, request a final showing by the applicant.

(b) The authorized officer shall transmit to the applicant, separately or with a request for a final showing, the following:

(1) The proposed lease form, including any proposed stipulations; and

(2) A copy of the environmental assessment or impact statement on the application including a map or maps showing all areas subject to specific conditions or protective stipulations because they have been assessed or designated to be unsuitable for all or certain stipulated methods of coal mining, or because of other identified values that are not embodied in the unsuitability criteria in subpart 3461 of this title.

(c) The authorized officer shall process all preference right lease applications, except for those preference right lease applications numbered F–029746 and F–033619, in accordance with the following standards and procedures:

(1) The authorized officer shall transmit a request for final showing to each applicant for each preference right

lease application for which it proposes to issue a lease.

(2) Copies of each request shall be sent to all interested parties.

(3) The request shall contain proposed lease terms and special stipulations;

(d) Within 90 days of receiving the proposed lease form, the applicant shall submit the following information:

(1) Estimated revenues;

(2) The proposed means of meeting the proposed lease terms and special conditions and the estimated costs that a prudent person would consider before deciding to operate the proposed mine, including but not limited to, the cost of developing the mine, removing the coal, processing the coal to make it salable, transporting the coal, paying applicable royalties and taxes, and complying with applicable laws and regulations, the proposed lease terms, and special stipulations; and

(3) If the applicant intends to mine the deposit in the lands covered by a preference right lease application as part of a logical mining unit, the applicant shall include the estimated costs and revenue of the combined mining venture.

(e) The applicant may withdraw any lands from the application and delete them from the final showing if the applicant is no longer interested in leasing such lands or if such lands would be subject to special conditions or protective stipulations and the cost of mining the lands subject to these conditions or protective stipulations would adversely affect the commercial quantities determination.

(f) The applicant may delete any area subject to special conditions or protective stipulations, because it has been assessed to be unsuitable or otherwise, and the costs of mining subject to the conditions or protective stipulations, from the final showing required by paragraph (c) of this section.

(g) All data submitted by the preference right lease applicant that is labeled as privileged or confidential shall be treated in accordance with the provisions of part 2 of this title.

[44 FR 42628, July 19, 1979, as amended at 47 FR 33143, July 30, 1982; 52 FR 25799, July 8, 1987]

#### § 3430.4-2 Additional information.

(a) If the applicant for a preference right lease has submitted timely, some, but not all of the information required in § 3430.4-1 of this title, the authorized officer shall request additional information and shall specify the information required.

(b) The applicant shall submit any requested additional information within 60 days of the receipt of the request. The authorized officer may grant one 60-day extension if the applicant files a written request within the first 60-day period.

#### § 3430.4-3 Costing document and public review.

(a) The authorized officer shall prepare a document that estimates the cost of compliance with all laws, regulations, lease terms, and special stipulations intended to protect the environment and mitigate the adverse environmental impacts of mining.

(1) The costs shall be calculated for each of the various numbered subject areas contained in § 3430.4-4 of this title.

(2) The authorized officer's estimated costs of compliance may be stated in ranges based on the best available information. If a range is used, he/she shall identify the number from each range that the authorized officer proposes to use in making the determination whether a particular applicant has identified coal in commercial quantities.

(b) The authorized officer shall provide for public review of the costs of environmental protection associated with the proposed mining on the preference right lease application area.

(1) The authorized officer shall send the Bureau's cost estimate document to the preference right lease applicant and provide at least 30 days for the applicant to review said document before a notice of availability is published in the FEDERAL REGISTER. Comments submitted by the applicant, and the Bureau's response to the comments, shall be made available to the public for review and comment at the time the cost estimate document is made available.

(2) The authorized officer then shall publish in the FEDERAL REGISTER a notice of the availability of the Bureau's cost estimation document.

(3) The authorized officer also shall send the cost estimation document to all interested parties, including all agencies, organizations, and individuals that participated in the environmental impact statement or the scoping process.

(4) Copies of the cost estimation document shall be submitted to the Environmental Protection Agency.

(5) The public shall be given a period of not less than 60 days from the date of the publication of the notice in the FEDERAL REGISTER to comment on the Bureau's cost estimates.

(c) The cost estimate document and all substantive comments received (or summaries thereof if the response is voluminous) shall be part of the Record of Decision for the preference right lease application(s) (See 40 CFR 1505.2).

(1) The authorized officer shall respond to each substantive comment in the Record of Decision by modifying or supplementing his/her cost estimates, or explaining why they were not modified or supplemented in response to the comments.

(2) The authorized officer shall submit a copy of the Record of Decision with the public comments and the Bureau's response to the Environmental Protection Agency.

(3) The authorized officer shall publish a notice of the availability of each Record of Decision in the FEDERAL REGISTER.

(4) No preference right lease shall be issued sooner than 30 days following publication of the notice of availability required by paragraph (c)(3) of this section.

[52 FR 25799, July 8, 1987]

**§ 3430.4-4 Environmental costs.**

Prior to determining that a preference right lease applicant has discovered coal in commercial quantities, the authorized officer shall include the following listed and any other relevant environmental costs in the adjudication of commercial quantities (examples may not apply in all cases, neither are they all inclusive):

(a) *Permitting.* (1) Surface water—cost of collecting and analyzing baseline data on surface water quality and quantity (collecting and analyzing samples, constructing and maintaining monitoring facilities, purchasing equipment needed for surface water monitoring).

(2) Groundwater—costs of collecting and analyzing baseline data on groundwater quality and quantity (collecting and evaluating samples from domestic or test wells, purchasing well casings and screens and monitoring equipment, drilling and maintenance of test wells).

(3) Air quality—costs of collecting and analyzing baseline air quality data (purchasing rain, air direction, and wind gauges and air samplers and evaporation pans).

(4) Vegetation—costs of collecting and analyzing data on indigenous vegetation (collecting and classifying samples for productivity analyses).

(5) Wildlife—costs of collecting and analyzing baseline data on wildlife species and habitats (collecting wildlife and specimens and data and purchasing traps and nets).

(6) Soils—costs of collecting and analyzing baseline soil data (collecting and analyzing soil samples by physical and chemical means).

(7) Noise—costs of collecting and analyzing baseline data on noise (purchasing necessary equipment).

(8) Socio-economics—costs of conducting social and economic studies for baseline data (collecting and evaluating social and economic data).

(9) Archaeology, history, and other cultural resources—costs of collecting and analyzing data on archaeology, history, and other cultural resources (conducting archaeological excavations and historical and cultural surveys).

(10) Paleontology—costs of collecting and analyzing paleontological data (conducting surveys and excavations).

(11) Geology—costs of collecting and analyzing baseline geological data (drilling overburden cores and conducting physical and chemical analyses).

(12) Subsidence—costs of collecting and analyzing data on subsidence (setting monuments to measure subsidence).

(13) Mine planning—costs of developing mine permit application package (development of operating, blasting, air and water pollution control, fish and wildlife, and reclamation plans).

(b) Mining—environmental mitigation required by law or proposed to be imposed by the authorized officer.

(1) Surface water protection—costs of mitigating the impacts of mining on the quantity of surface water (purchasing replacement water and transporting it) and on the quality of surface water (construction sedimentation ponds, neutralization facilities, and diversion ditches).

(2) Groundwater protection—costs of mitigating the impacts of mining on the quantity of groundwater (replacing diminished supplies or water rendered unfit for its prior use(s)) and on the quality of groundwater (treating pumped mine water, compensating for damage to water rights, sealing sedimentation ponds).

(3) Air pollution control—costs of mitigating the impacts of mining on air quality (compliance with National Ambient Air Quality Standard and Protection from Significant Deterioration requirements using water and chemical sprays for dust control, installing and operating dust and other pollution collections).

(4) Noise abatement—costs of mitigating the impacts of mining on noise levels in mining area (installing and maintaining noise mufflers on equipment and around the mine site).

(5) Wildlife—costs of mitigating impacts to wildlife species identified as reasonably likely to occur and subject to proposed lease stipulations, and including costs of compliance with the Endangered Species Act and other laws, regulations, and treaties concerning wildlife protection.

(6) Socio-economics—costs of implementing any mitigation measure the Bureau or any other government agency has imposed; and of mitigating impacts on surface owners and occupants, including relocation costs and costs of compensation for improvements, crops, or grazing values.

(7) Archaeology, history, and other cultural—costs of monitoring and inspection during mining to identify archaeological, historical, and other cul-

tural resources, and costs of mitigating impacts to these resources identified as reasonably likely to occur and subject to proposed lease stipulations.

(8) Paleontological—costs of monitoring and inspection during mining to identify paleontological resources and costs of mitigating impacts to these resources identified as reasonably likely to occur and subject to proposed lease stipulations.

(9) Subsidence—costs of mitigating the impacts of subsidence identified as reasonably likely to occur and subject to proposed lease stipulations.

(10) Monitoring—costs of purchasing and maintaining facilities, equipment, and personnel to accomplish monitoring required as a permit condition or lease stipulation, or by law or regulation.

(c) *Reclamation.* (1) Topsoil removal and replacement—costs of reclaiming soil by stockpiling or continuous methods (removing and stockpiling and replacing topsoil, protecting the stockpile, if necessary, from erosion and compacting).

(2) Subsoil removal and replacement—costs of reclaiming subsoil by stockpiling or continuous method (removing and stockpiling and replacing subsoil, protecting the stockpile, if necessary, from erosion and compacting).

(3) Site restoration—costs of removing structures necessary to mining operations but not part of original land features (sedimentation ponds, roads, and buildings).

(4) Grading—costs of grading soil banks to their approximate original contour before replacing topsoil and subsoil, if applicable, and revegetating the affected area.

(5) Revegetation—costs of restoring vegetative cover to the affected area after grading and replacement of topsoil and subsoil, if applicable (liming, planting, irrigating, fertilizing, cultivating, and reworking, if first efforts are unsuccessful).

(6) Bonds—costs of bonds required by Federal, State and local governments.

[52 FR 25799, July 8, 1987]

## **§ 3430.5**

### **§ 3430.5 Determination of entitlement to lease.**

#### **§ 3430.5-1 Rejection of application.**

(a) The authorized officer shall reject the application if:

(1) The applicant fails to show that coal exists in commercial quantities on the applied for lands; or

(2) The applicant does not respond to a request for additional information within the time period specified in § 3430.3-2 or § 3430.4-2 of this title; or

(3) The applicant otherwise failed to meet statutory or regulatory requirements; or

(4) The applicant does not permit declassification of proprietary information within the time period specified in § 3430.2-2(b) of this title.

(b)(1) The authorized officer shall reject those portions of an otherwise acceptable application which were not available for prospecting when the underlying prospecting permit was issued because the lands were claimed, developed or withdrawn from coal leasing.

(2) In any action under this subsection, the authorized officer shall reject all lands in each affected smallest legal subdivision or, if practicable, each affected 10 acre aliquot part of the subdivision.

(c) The authorized officer may reject any preference right lease application that clearly cannot satisfy the commercial quantities test without preparing additional National Environmental Policy Act documentation and/or a cost estimate document as described in §§ 3430.3-2, 3430.4-3 and 3430.4-4 of this title. The following procedures apply to rejecting these preference right lease applications:

(1) When an applicant clearly fails to meet the commercial quantities test as provided in this part, the authorized officer may notify the applicant:

(i) That its preference right lease application will be rejected;

(ii) Of the reasons for the proposed rejection;

(iii) That the applicant has 60 days in which to provide additional information as to why its preference right lease application should not be rejected; and

## **43 CFR Ch. II (10-1-08 Edition)**

(iv) Of the type, quantity, and quality of additional information needed for reconsideration.

(2) If, after the expiration of the 60-day period, the authorized officer has no basis on which to change his/her decision, the authorized officer shall reject the preference right lease application.

(3) If the authorized officer reconsiders and changes the decision to reject the preference right lease application, he/she shall continue to adjudicate the preference right lease application in accordance with §§ 3430.3-2, 3430.4-3, and 3430.4-4 of this title.

[44 FR 42628, July 19, 1979, as amended at 47 FR 33143, July 30, 1982; 52 FR 25800, July 8, 1987]

#### **§ 3430.5-2 Appeals, lack of showing.**

(a) If the application is rejected because the existence of commercial quantities of coal has not been shown, the applicant may, in accordance with the procedures in part 4 of this title, file a notice of appeal and a statement of the reasons for the appeal.

(b) The applicant shall have the right to a hearing before an Administrative Law Judge if the applicant alleges that the facts in the application are sufficient to show entitlement to a lease.

(c) In such a hearing, the applicant shall bear both the burden of going forward and the burden of proof to show, by a preponderance of evidence, that commercial quantities of coal exist in the proposed lease area.

#### **§ 3430.5-3 Determination to lease.**

A preference right lease shall be issued if, upon review of the application, any available land use plan and the environmental assessment or environmental impact statement, the authorized officer determines that:

(a) Coal has been discovered in commercial quantities on the lands applied for;

(b) The applicant has used reasonable economic assumptions and data to support the showing that coal has been found on the proposed lease in commercial quantities; and

(c) The conditions or protective lease stipulations assure that environmental

## Bureau of Land Management, Interior

## § 3431.2

damage can be avoided or acceptably mitigated.

[47 FR 33143, July 30, 1982]

### § 3430.5-4 Lease exchange.

(a) Upon the request of the applicant, the Secretary may initiate lease exchange procedures under subpart 3435 of this title if the lands under application have been shown to contain coal in commercial quantities.

(b) Upon the request of the authorized officer, or at the request of the regional coal team or the Governor of the affected State(s), the Secretary may initiate lease exchange procedures under subpart 3435 of this title if:

(1) The lands under application have been shown to contain commercial quantities of coal;

(2) All or a portion of the proposed lease has been assessed as lands which should be unavailable for coal development because of land use or resource conflicts or as lands which are unsuitable for coal mining under the provisions of subpart 3461 of this title; and

(3) The lands are exempted from the application of any relevant unsuitability criteria or the Secretary lacks the authority to prevent damage to or loss of the land use or resource values threatened by lease operations.

[47 FR 33143, July 30, 1982, as amended at 48 FR 37656, Aug. 19, 1983]

### § 3430.6 Lease issuance.

#### § 3430.6-1 Lease terms.

Each preference right lease shall be subject to the terms provided for Federal coal leases established in part 3470 of this title.

[47 FR 33144, July 30, 1982]

#### § 3430.6-2 Bonding.

The lease bond for a preference right lease shall be set in accordance with subpart 3474 of this title.

#### § 3430.6-3 Duration of leases.

Preference right leases shall be issued for a term of 20 years and for so long thereafter as coal is produced in commercial quantities as defined in § 3483.1 of this title. Each lease shall be subject to readjustment at the end of the first 20-year period and at the end

of each period of 10 years thereafter in accordance with subpart 3451 of this title.

[44 FR 42628, July 19, 1979. Redesignated and amended at 47 FR 33144, July 30, 1982; 50 FR 8627, Mar. 4, 1985]

### § 3430.7 Trespass.

Mining operations conducted prior to the effective date of a lease shall constitute an act of trespass and be subject to penalties specified by § 9239.5 of this title.

## Subpart 3431—Negotiated Sales: Rights-of-Way

### § 3431.0-1 Purpose.

The purpose of this subpart is to provide procedures for the sale of coal that is necessarily removed in the exercise of a right-of-way issued under Title V of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1761 *et seq.*).

### § 3431.0-3 Authority.

(a) The regulations of this subpart are issued under the authority of the statutes cited in § 3400.0-3 of this title.

(b) These regulations primarily implement section 2(a)(1) of the Mineral Leasing Act of 1920, as amended by section 2 of the Act of October 30, 1978 (30 U.S.C. 201(a)(1)).

### § 3431.1 Qualified purchaser.

Any person who has acquired or applied for a right-of-way under Title V of the Federal Land Policy and Management Act of 1976 which requires the removal of coal deposits as a necessary incident to development, construction or use of the right-of-way is qualified to purchase the coal to be removed.

### § 3431.2 Terms and conditions of sale.

(a) Coal to be removed in connection with a right-of-way shall be sold to the qualified purchaser only at the estimated fair market value, as determined by the Secretary.

(b) Where the right-of-way is being used in connection with the development of a lease, the removal of coal from the right-of-way shall be subject to the same requirements for health

### § 3432.0-3

and safety protection, surface protection and rehabilitation that apply to the lease involved, and provisions for adequate recovery and conservation of the coal deposit.

(c) Where the right-of-way is not being used in the development of a Federal coal lease, the removal of the coal shall be made subject to the Surface Mining Control and Reclamation Act of 1977, and subject to such terms and conditions as the authorized officer of the surface management agency determines are necessary: (1) To protect public health, safety, and the environment; and (2) to ensure adequate recovery and conservation of the coal deposits in the right-of-way.

(d) All terms and conditions of the sale shall be terms and conditions of the right-of-way and shall be administered under the provisions of Group 2800 of this title.

[44 FR 42628, July 19, 1979, as amended at 47 FR 33144, July 30, 1982]

## Subpart 3432—Lease Modifications

### § 3432.0-3 Authority.

(a) The regulations of this subpart are issued under the authority of the statutes cited in § 3400.0-3 of this title.

(b) These regulations primarily implement section 3 of the Mineral Leasing Act of 1920, as amended by section 13 of the Federal Coal Leasing Amendments Act of 1976 (30 U.S.C. 203).

### § 3432.1 Application.

(a) A lessee may apply for a modification of a lease to include coal lands or coal deposits contiguous to those embraced in a lease. In no event shall the acreage in the application, when combined with the total area added by all modifications made after August 4, 1976, exceed 160 acres or the number of acres in the original lease, whichever is less.

(b) The lessee shall file the application for modification in the Bureau of Land Management State Office having jurisdiction over the lands involved (43 CFR subpart 1821), describing the additional lands desired, the lessee's needs or reasons for such modification, and the reasons why the modification

### 43 CFR Ch. II (10-1-08 Edition)

would be to the advantage of the United States.

[44 FR 42628, July 19, 1979, as amended at 44 FR 56340, Oct. 1, 1979]

### § 3432.2 Availability.

(a) The authorized officer may modify the lease to include all or part of the lands applied for if he determines that: (1) The modification serves the interests of the United States; (2) there is no competitive interest in the lands or deposits; and (3) the additional lands or deposits cannot be developed as part of another potential or existing independent operation.

(b) Coal deposits underlying land the surface of which is held by a qualified surface owner, and which would be mined by other than underground mining techniques, may not be added to a lease by modification.

(c) The lands applied for shall be added to the existing lease without competitive bidding, but the United States shall receive the fair market value of the lease of the added lands, either by cash payment or adjustment of the royalty applicable to the lands added to the lease by the modification.

### § 3432.3 Terms and conditions.

(a) The terms and conditions of the original lease shall be made consistent with the laws, regulations, and lease terms applicable at the time of modification except that if the original lease was issued prior to August 4, 1976, the minimum royalty provisions of section 6 of the Federal Coal Leasing Amendments Act of 1976 (30 U.S.C. 207; 43 CFR 3473.3-2) shall not apply to any lands covered by the lease prior to its modification until the lease is readjusted.

(b) Before a lease is modified, the lessee shall file a written acceptance of the conditions imposed in the modified lease and a written consent of the surety under the bond covering the original lease to the modification of the lease and to extension of the bond to cover the additional land.

(c) Before modifying a lease, BLM will prepare an environmental assessment or environmental impact statement covering the proposed lease area in accordance with 40 CFR parts 1500 through 1508.

## Bureau of Land Management, Interior

## § 3435.3-1

(d) For coal lease modification applications involving lands in the National Forest System, BLM will submit the lease modification application to the Secretary of Agriculture for consent, for completion or consideration of an environmental assessment, for the attachment of appropriate lease stipulations, and for making any other findings prerequisite to lease issuance.

[44 FR 42628, July 19, 1979, as amended at 67 FR 63567, Oct. 15, 2002]

### Subpart 3435—Lease Exchange

#### § 3435.0-1 Purpose.

The objective of these regulations is to provide methods for exchange of coal resources when it would be in the public interest to shift the impact of mineral operations from leased lands or portions of leased lands to currently unleased lands to preserve public resource or social values, and to carry out Congressional directives authorizing coal lease exchanges.

[44 FR 42628, July 19, 1979, as amended at 47 FR 33144, July 30, 1982]

#### § 3435.0-3 Authority.

(a) These regulations are issued under the authority of the statutes cited in § 3400.0-3 of this title.

(b) These regulations primarily implement:

(1) Section 3 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 203);

(2) Section 510(b)(5) of the Surface Mining Control and Reclamation Act (30 U.S.C. 1260(b)(5));

(3) Section 1 of the Act of October 30, 1978 (92 Stat. 2073);

(4) Section 1 of the Act of October 19, 1980 (94 Stat. 2269); and

(5) Section 4 of the Rattlesnake National Recreation Area and Wilderness Act of 1980 (94 Stat. 2272).

[44 FR 42628, July 19, 1979, as amended at 47 FR 33144, July 30, 1982]

#### § 3435.1 Coal lease exchanges.

Where the Secretary determines that coal exploration, development and mining operations would not be in the public interest on an existing lease or preference right lease application or portions thereof, or where the Congress has authorized lease exchange for a

class or list of leases, an existing lease or preference right lease application may be relinquished in exchange for:

(a) Leases where the Congress has specifically authorized the issuance of a new coal lease;

(b) The issuance of coal lease bidding rights of equal value;

(c) A lease for a mineral listed in subpart 3526 of this title by mutual agreement between the applicant and the Secretary; and

(d) Federal coal lease modifications; or

(e) Any combination of the above.

[44 FR 42628, July 19, 1979, as amended at 47 FR 33144, July 30, 1982]

#### § 3435.2 Qualified exchange proponents: Limitations.

(a) Any person who holds a Federal coal lease, or a preference right lease application that has been found to meet the commercial quantities requirements of §§ 3430.1 and 3430.5 of this title on lands described in § 3435.1 of this title is qualified to ask the Secretary to initiate an exchange.

(b) Except for leases qualified under subpart 3436 of this title, the Secretary may issue a new coal lease in exchange for the relinquishment of outstanding leases or lease applications only in those cases where the Congress has specifically authorized such exchanges.

(c) The Secretary shall evaluate each qualified exchange request and determine whether an exchange is in the public interest.

(d) Any modification of a coal lease in an exchange under this subpart shall be subject to the limitations in §§ 3432.1(a), 3432.2(b) and 3432.3(a) of this title.

[44 FR 42628, July 19, 1979, as amended at 47 FR 33144, July 30, 1982]

#### § 3435.3 Exchange procedures.

##### § 3435.3-1 Exchange notice.

(a) The Secretary shall initiate exchange procedures by notifying in writing a Federal coal lessee or preference right lease applicant that consideration of an exchange of mineral leases or other coal lease interests is appropriate. The notification may be on the Secretary's initiative or in response to a request under § 3435.2 of this title.

## § 3435.3-2

(b) The exchange notice shall also be provided to the Governor of the affected State(s) concurrent with notice to the lessee or preference right lease applicant stating why the Secretary believes an exchange may be in the public interest.

(c) The exchange notice shall contain a description of the leased lands or lands under preference right lease application being considered for exchange. These lands may include all or part of an existing lease or preference right lease application.

(d) The exchange notice may contain a description of the lands for which the Secretary would grant an exchange lease or lease interest. If a coal lease modification would be granted by exchange, the lands shall be selected from those lands found acceptable for further consideration for coal leasing under § 3420.1 of this title; and

(e) The notice shall contain a request that the lessee or preference right lease applicant indicate whether he is willing to negotiate an exchange.

[44 FR 42628, July 19, 1979, as amended at 47 FR 33144, July 30, 1982; 48 FR 37656, Aug. 19, 1983]

## § 3435.3-2 Initial response by lessee or lease applicant.

(a) The lessee or preference right lease applicant wishing to negotiate an exchange shall so reply in writing. The reply may include a description of the lands on which the lessee or lease applicant would accept an exchange lease or coal lease modification.

(b) A reply to the exchange notice by a lessee or preference right lease applicant indicating willingness to enter into an exchange shall also indicate willingness to provide the geologic and economic data needed by the Secretary to determine the fair market value of the lease or lease application to be relinquished. The lessee or preference right lease applicant shall also indicate willingness to provide any geologic and economic data in his possession that will help the Secretary to determine the fair market value of the potential Federal lease exchange tract or tracts.

[44 FR 42628, July 19, 1979, as amended at 47 FR 33144, July 30, 1982]

## 43 CFR Ch. II (10-1-08 Edition)

### § 3435.3-3 Agreement to terms.

(a) If both parties wish to proceed with the exchange, the authorized officer and the lessee or preference right lease applicant shall negotiate an exchange consistent with § 3435.1 of this title. The authorized officer shall consult with the regional coal team prior to initiation of such negotiations and shall consult again prior to finalization of the negotiated exchange.

(b) Land proposed for lease in exchange for, or for inclusion in, an existing lease or preference right lease application shall be subject to leasing under Group 3400 or 3500 of this title as appropriate, and any coal lands shall have been found to be acceptable for further consideration for leasing under § 3420.1 of this title.

[44 FR 42628, July 19, 1979, as amended at 47 FR 33144, July 30, 1982; 48 FR 37656, Aug. 19, 1983]

### § 3435.3-4 Determination of value.

The value of the land to be leased, or added by lease modification, or of the bidding rights to be issued in exchange shall, to the satisfaction of the lessee or lease applicant and the Secretary, be equal to the estimated fair market value of the lease or lease application to be relinquished.

### § 3435.3-5 Notice of public hearing.

After the lessee or lease applicant and the Secretary agree on an exchange proposal, notice of the exchange proposal shall be published in the FEDERAL REGISTER and in at least 1 newspaper of general circulation in each county or equivalent political subdivision where both the offered and selected lands are located. The notice shall announce that, upon request, at least 1 public hearing shall be held in a city or cities located near each tract involved. The notice shall also contain the Secretary's preliminary findings why the proposed exchange is in the public interest. Any notice of the availability of a draft environmental assessment or environmental impact statement on the exchange may be used to comply with this section.

[47 FR 33144, July 30, 1982]

## Bureau of Land Management, Interior

## § 3436.0-2

### § 3435.3-6 Consultation with Governor.

(a) The Secretary shall notify the Governor of each state in which lands in the proposed exchange are located of the terms of the exchange and the Secretary's preliminary findings why the exchange is in the public interest. The Secretary shall give each Governor 45 days to comment on the proposal prior to consummating the exchange.

(b) If, within the 45 day period, the Governor(s), in writing, objects to an exchange that involves leases or lease rights in more than one state, the Secretary will not consummate the exchange for 6 months from the date of objection. The Governor(s) may during this 6-month period submit a written statement why the exchange should not be consummated, and the Secretary shall, on the basis of this statement, reconsider the lease proposal.

[44 FR 42628, July 19, 1979, as amended at 47 FR 33144, July 30, 1982]

### § 3435.3-7 Consultation with the Attorney General.

In any exchange which, if consummated, shall result in the issuance of a Federal coal lease, the Secretary, after issuing an exchange notice under § 3435.3-1 of this title and before issuance of a written decision under § 3435.4 of this title.

(a) Shall require the lessee or lease applicant to submit the information in § 3422.3-4 of this title; and

(b) If the Attorney General, within 30 days, objects to lease issuance, shall not issue the exchange lease except after complying with the provisions of § 3422.3-4(f)(2) of this title.

### § 3435.4 Issuance of lease, lease modification or bidding rights.

(a) If, after any public hearing(s), the Secretary by written decision concludes that an exchange is in the public interest, the Secretary shall transmit to the lessee or preference right lease applicant:

(1) A statement of the Secretary's findings that lease issuance is in the public interest;

(2) Either (i) copies of the coal or other mineral exchange lease or coal lease modification containing the terms, conditions and special stipula-

tions under which the lease or coal lease modification is to be granted, or (ii) a statement describing the terms and conditions of the coal lease bidding rights to be granted in exchange; and

(3) A statement for execution by the lessee or preference right lease applicant relinquishing all right or interest in the lease or preference right lease application, or portion thereof, to be exchanged.

(b) The exchange lease, lease modification or coal lease bidding rights shall be issued upon relinquishment of the lease, preference right lease application, or portion thereof.

(c) The exchange lease or lease modification shall be subject to all relevant provisions of Group 3400 or 3500 of this title and 30 CFR Chapter VII, Subchapter D as appropriate.

[47 FR 33144, July 30, 1982, as amended at 50 FR 8627, Mar. 4, 1985]

## Subpart 3436—Coal Lease and Coal Land Exchanges: Alluvial Valley Floors

SOURCE: 47 FR 33145, July 30, 1982, unless otherwise noted.

### § 3436.0-1 Purpose.

The purpose of this subpart is to establish criteria and procedures for the exchange of coal leases and for the exchange of fee held coal for unleased federally-owned coal in cases where surface coal mining operations on the lands that are covered by an existing coal lease or that are fee held would interrupt, discontinue or preclude farming on alluvial valley floors west of the 100th Meridian, west longitude, or materially damage the quantity or quality of water in surface or underground systems that supply those alluvial valley floors.

### § 3436.0-2 Objective.

(a) The objective of this subpart is to provide relief to persons holding leases for Federal coal deposits or fee title to coal deposits which underlie or are near alluvial valley floors and which cannot be mined through surface mining operations under section 510(b)(5) of the Surface Mining Control and Reclamation Act, through the exchange of

### § 3436.0-3

lands, or interests therein, pursuant to the authority granted by the statutory provision.

(b) The Secretary shall exercise the authority to dispose of Federal coal deposits by lease to meet this objective when he/she determines that the exchange would serve the public interest. In determining whether such an exchange will serve the public interest, the Secretary will consider a wide variety of factors, including better Federal land management and the needs of State and local people, including needs for lands for the economy, community expansion, recreation areas, food, fiber, minerals and fish and wildlife. Unless consideration of the above factors would show otherwise, it will be assumed that an exchange will serve the public interest if substantial financial and legal commitments have been made toward development of the offered coal resource.

### § 3436.0-3 Authority.

(a) These regulations are issued under the authority of the statutes cited in § 3400.0-3 of this title.

(b) These regulations primarily implement section 510(b)(5) of the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1260(b)(5)).

### § 3436.0-5 Definitions.

As used in this subpart, the term *substantial financial and legal commitments* is a relative one, and the determination whether such commitments have been made, so as to qualify a person for an exchange under this subpart, will be made on a case-by-case basis. In making this determination, the Secretary will consider the level of expenditures made prior to January 1, 1977, that are related to development of the coal resource which is offered in exchange, taken together with the damages for which the person would be liable as a result of any legal commitments made prior to January 1, 1977, in connection with development of said coal resource, and the Secretary will compare that level of expenditure to the estimated total cost of developing the coal resource to the point of establishing a producing surface coal mining operation.

## 43 CFR Ch. II (10-1-08 Edition)

### § 3436.1 Coal lease exchanges.

#### § 3436.1-1 Qualified lease proponents.

(a) Coal lease exchanges under this program shall be available only to persons who:

(1) Hold a Federal coal lease or preference right lease application covering lands that include or are near an alluvial valley floor located west of the 100th Meridian, west longitude, where surface coal mining operations are prohibited by section 510(b)(5) of the Surface Mining Control and Reclamation Act because such operations would interrupt farming or materially damage the quantity and quality of the water in surface or underground water systems that would supply the alluvial valley floor;

(2) Have made substantial financial and legal commitments prior to January 1, 1977, in connection with the lease or preference right lease application; and

(3) Are not entitled to continue any existing surface coal mining operations pursuant to the first proviso of section 510(b)(5) of the Surface Mining Control and Reclamation Act.

(b) Persons seeking an exchange bear the burden of establishing that they are qualified pursuant to paragraph (a) of this section. The Secretary shall accept a determination made pursuant to 30 CFR 785.19(c) as conclusive evidence of the existence of an alluvial valley floor.

#### § 3436.1-2 Federal coal deposits subject to lease by exchange.

The lease offered by the Secretary in exchange for existing coal leases shall be for Federal coal deposits determined to be acceptable for further consideration for coal leasing pursuant to § 3420.1-5 or § 3420.2-3 of this title.

(a) Any person meeting the requirements of § 3436.1-1(a) of this title may apply for a lease exchange. No special form of application is required.

(b) The Secretary shall evaluate each exchange request to determine whether the proponent is qualified and whether the exchange serves the public interest. The exchange shall be processed in accordance with the procedures in subpart 3435 of this title for other lease and lease interest exchanges.

(c) After the Secretary and the exchange proponent have agreed to terms pursuant to §3435.3-3 of this title, the Secretary may elect to consider the exchange proposal in conjunction with the activity planning process for the coal production region in which the lands proposed to be leased are located pursuant to §3420.3 of this title. If the Secretary elects to process the exchange proposal in this manner, the tracts identified for use in the lease exchange shall be:

(1) Delineated for analysis pursuant to §3420.3-3 of this title;

(2) Ranked as having high desirability pursuant to §3420.3-4(a) of this title; and

(3) Selected for inclusion for analysis purposes in alternative proposed lease sale schedules pursuant to §3420.3-4(c) of this title. Such tracts shall then be the subject of environmental analysis, public comment and consultation pursuant to §§3420.3 and 3420.4 of this title.

(d) If the Secretary elects to process the exchange proposal independently of the activity planning process, the Secretary shall consider the environmental and resource information acquired during the land use planning process and found in the most recent regional environmental impact statement completed under the Federal coal management program. An environmental assessment or environmental impact statement shall be prepared on the proposed exchange prior to the public hearings and consultation required by §§3435.3-5 through 3435.3-7 of this title.

(e) In determining under §3435.3-4 of this title the estimated value of the lease or preference right lease application to be relinquished, the Secretary shall proceed as though there were no prohibitions on surface mining operations on the lands covered by the lease or preference right lease application.

(f) The exchange proponent shall bear all administrative costs of the exchange, including the cost of establishing the value of each lease involved in the exchange, if the exchange is completed.

[47 FR 33145, July 30, 1982, as amended at 50 FR 42023, Oct. 17, 1985]

## **§ 3436.2 Fee coal exchanges.**

### **§ 3436.2-1 Qualified exchange proponents.**

(a) Fee coal exchanges under this program shall only be available to persons who:

(1) Own coal west of the 100th Meridian, west longitude, underlying or near an alluvial valley floor where surface coal mining operations are prohibited by section 510(b)(5) of the Surface Mining Control and Reclamation Act because such operations would interrupt farming or materially damage the quantity and quality of the water in surface or underground water systems that would supply the alluvial valley floor; and

(2) Are not entitled to continue any existing surface coal mining operation pursuant to the first proviso to section 510(b)(5) of the Surface Mining Control and Reclamation Act.

(b) Exchange proponents bear the burden of establishing their qualifications pursuant to paragraph (a) of this section. The Secretary shall accept a determination made pursuant to 30 CFR 785.19(c) as conclusive evidence of the existence of an alluvial valley floor.

### **§ 3436.2-2 Federal coal deposits subject to disposal by exchange.**

The coal deposits offered in exchange by the Secretary shall be determined to be acceptable for further consideration for coal leasing pursuant to §3420.1 of this title and shall be in the same State as the coal deposit offered in exchange by the proponent.

### **§ 3436.2-3 Exchange procedures.**

(a) Any person meeting the requirements of §3436.2-1(a) of this title may apply for an exchange. No special form of application is required. Any exchange proposal should be directed to the District Manager for the Bureau of Land Management district in which the Federal coal deposits are located.

(b) The Secretary shall evaluate each exchange request to determine whether the proponent is qualified.

(c) After the authorized officer and the owner of the coal deposit underlying an alluvial valley floor identify Federal coal deposits that are suitable

for consideration for disposition through exchange, the exchange shall be processed in accordance with part 2200 of this title, except as provided in this section.

(d) The Secretary may consolidate the environmental analysis for the proposed exchange with the regional environmental impact statement prepared on alternative leasing schedules for the coal production region in which the Federal coal deposits are located pursuant to §3420.3–4 of this title. If the environmental analysis is not so consolidated, the Secretary shall consider environmental and other resource information obtained during the land use planning process or at other stages of the coal management program in preparing an appropriate environmental analysis or environmental impact statement on the proposed exchange.

(e) Exchanges shall be made on an equal value basis, provided that values of the lands exchanged may be equalized by the payment of money to the grantor or the Secretary so long as the payment does not exceed 25 percent of the total value of the lands or interests transferred out of Federal ownership. In determining the value of the coal deposit underlying or near an alluvial valley floor, the Secretary shall proceed as though there were no prohibition on surface coal mining operations on the property.

[47 FR 33145, July 30, 1982, as amended at 50 FR 42023, Oct. 17, 1985]

## PART 3440—LICENSES TO MINE

### Subpart 3440—Licenses to Mine

Sec.

3440.0–3 Authority.

3440.1 Terms.

3440.1–1 Forms.

3440.1–2 Qualifications.

3440.1–3 Limitations on coal use.

3440.1–4 Area and duration of license.

3440.1–5 Compliance with Surface Mining Control and Reclamation Act.

3440.1–6 Cancellation or forfeiture.

AUTHORITY: 30 U.S.C. 181 *et seq.*

SOURCE: 44 FR 42634, July 19, 1979, unless otherwise noted.

### Subpart 3440—Licenses to Mine

#### § 3440.0–3 Authority.

(a) These regulations are issued under the authority of the statutes cited in §3400.0–3 of this title.

(b) These regulations primarily implement section 8 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 208).

#### § 3440.1 Terms.

##### § 3440.1–1 Forms.

(a) Four copies of the application for a license to mine coal for domestic needs or for a renewal of such a license shall be filed on a form approved by the Director, or a substantial equivalent of the form, in the Bureau of Land Management State Office having jurisdiction over the lands involved (43 CFR subpart 1821).

(b) The original application or any renewal application shall be accompanied by the fee prescribed in subpart 3473 of this title, except when the application is filed by a relief agency.

##### § 3440.1–2 Qualifications.

(a) An individual, association or individuals, municipality, charitable organization or relief agency may hold a license to mine. A municipality shall file the information required under §3472.2–5(b) of this title.

(b) A license to mine shall not be issued to a private corporation.

(c) A license to mine shall not be issued to a minor, but may be issued to a legal guardian on behalf of a minor.

##### § 3440.1–3 Limitations on coal use.

(a) A license to mine may be issued to a municipality for the nonprofit mining and disposal of coal to its residents for household use only. Under such a license, a municipality may not mine coal either for its own use or for nonhousehold use such as for factories, stores, other business establishments and heating and lighting plants.

(b) Coal extracted under a license to mine shall not be disposed of for profit.

##### § 3440.1–4 Area and duration of license.

(a) A license to mine for an individual or association in the absence of

## Bureau of Land Management, Interior

## § 3451.1

unusual conditions or necessity, shall be limited to a legal subdivision of 40 acres or less and may be revoked at any time. Each license to mine shall terminate at the end of 2 years from the date of issuance, unless an application for a 2 year renewal is filed and approved before its termination date.

(b) A license to mine to a municipality may not exceed 320 acres for a municipality of less than 100,000 population, 1,280 acres for a municipality between 100,000 and 150,000 population, and 2,560 acres for a municipality of 150,000 population or more. A license to mine to a municipality shall terminate at the end of 4 years from the date of issuance, unless an application for a 4 year renewal is filed and approved before the termination date.

(c) (1) The authorized officer may authorize a recognized and established relief agency of any state upon the agency's request, to take government-owned coal deposits within the state and provide the coal to localities where it is needed to supply families on the rolls of such agency who require coal for household use but are unable to pay for that coal.

(2) Tracts shall be selected in areas assessed as acceptable for mining operations and at points convenient to supply the families in a locality. Each family shall be restricted to the amount of coal actually needed for its use, not to exceed 20 tons annually.

(3) Coal shall be taken from such tracts only by those with written authority from the relief agency. All mining shall be done pursuant to such authorization.

[44 FR 42634, July 19, 1979, as amended at 47 FR 33146, July 30, 1982]

### § 3440.1-5 Compliance with Surface Mining Control and Reclamation Act.

Mining on a license to mine shall not commence without a permit issued by the Surface Mining Officer unless the operation is exempt from the permit requirements under 30 CFR 700.11.

[44 FR 42634, July 19, 1979. Redesignated and amended at 47 FR 33146, July 30, 1982]

### § 3440.1-6 Cancellation or forfeiture.

Any license to mine may be canceled or forfeited for violation of the Act

under which the license to mine was issued, applicable Federal laws and regulations, or the terms and conditions of the license to mine.

[47 FR 33146, July 30, 1982]

### Subpart 3451—Continuation of Leases: Readjustment of Terms

#### § 3451.1 Readjustment of lease terms.

(a) (1) All leases issued prior to August 4, 1976, shall be subject to readjustment at the end of the current 20-year period and at the end of each 10-year period thereafter. All leases issued after August 4, 1976, shall be subject to readjustment at the end of the first 20-

## § 3451.2

year period and, if the lease is extended, each 10-year period thereafter.

(2) Any lease subject to readjustment which contains a royalty rate less than the minimum royalty prescribed in §3473.3-2 of this title shall be readjusted to conform to the minimum prescribed in that section.

(b) If the lease became subject to readjustment of terms and conditions before August 4, 1976, but the authorized officer prior to that date neither readjusted the terms and conditions nor informed the lessee whether or not a readjustment would be made, the terms and conditions of that lease shall not be readjusted retroactively to conform to the requirements of the Federal Coal Leasing Amendments Act of 1976.

(c)(1) The authorized officer shall, prior to the expiration of the current or initial 20-year period or any succeeding 10-year period thereafter, notify the lessee of any lease which becomes subject to readjustment after June 1, 1980, whether any readjustment of terms and conditions will be made prior to the expiration of the initial 20-year period or any succeeding 10-year period thereafter. On such a lease the failure to so notify the lessee shall mean that the United States is waiving its right to readjust the lease for the readjustment period in question.

(2) In any notification that a lease will be readjusted under this subsection, the authorized officer will prescribe when the decision transmitting the readjusted lease terms will be sent to the lessee. The time for transmitting the information will be as soon as possible after the notice that the lease shall be readjusted, but will not be longer than 2 years after such notice. Failure to send the decision transmitting the readjusted lease terms in the specified period shall constitute a waiver of the right to readjust, unless the delay is caused by events beyond the control of the Department.

(d) In the notification that the lease will be readjusted, the authorized officer may require the lessee to furnish information specified in §3422.3-4 of this title for review by the Attorney General as required by section 27(1) of the Mineral Leasing Act of 1920, as amended. If the authorized officer requests the information specified, no

## 43 CFR Ch. II (10-1-08 Edition)

lease readjustment shall be effective until 30 days after the authorized officer has transmitted the required information to the Attorney General. The lease shall be subject to cancellation if the lessee fails to furnish the required information within the time allowed.

(e) The Governor of the affected State will be sent a copy of the readjusted lease terms.

[44 FR 42635, July 19, 1979, as amended at 47 FR 33146, July 30, 1982; 48 FR 37656, Aug. 19, 1983; 53 FR 37300, Sept. 26, 1988]

### § 3451.2 Notification of readjusted lease terms.

(a) If the notification that the lease will be readjusted did not contain the readjusted lease terms, the authorized officer will, within the time specified in the notice that the lease shall be readjusted, notify the lessee by decision of the readjusted lease terms.

(b) The decision transmitting the readjusted lease terms and conditions to the lessee(s) of record shall constitute the final action of the Bureau of Land Management on all the provisions contained in a readjusted lease and will be provided to the lessee(s) of record prior to the anniversary date. The effective date of the readjusted lease shall not be affected by the filing of any appeal of, or a civil suit regarding, any of the readjusted terms and conditions.

(c) The readjusted lease terms and conditions shall become effective on the anniversary date;

(d) The lessee may appeal the decision of the authorized officer in accordance with the procedure set out in 43 CFR part 4; and

(e) Regardless of whether an appeal is filed by the lessee(s), all of the readjusted lease terms and conditions, including, but not limited to, the reporting and payment of rental and royalty, shall be effective on the anniversary date.

[47 FR 33146, July 30, 1982, and 53 FR 37300, Sept. 26, 1988]

## Bureau of Land Management, Interior

## § 3452.3

### Subpart 3452—Relinquishment, Cancellation, and Termination

#### § 3452.1 Relinquishment.

##### § 3452.1-1 General.

The lessee may surrender the entire lease, a legal subdivision thereof, an aliquot part thereof (not less than 10 acres) or any bed of the coal deposit therein. A partial relinquishment shall describe clearly the surrendered parcel or coal deposits and give the exact acreage relinquished. If the authorized officer accepts the relinquishment of any coal deposits in a lease, the coal reserves shall be adjusted in accordance with part 3480 of this title.

[47 FR 33147, July 30, 1982, as amended at 50 FR 8627, Mar. 4, 1985]

##### § 3452.1-2 Where filed.

A relinquishment shall be filed in triplicate by the lessee in the Bureau of Land Management State Office having jurisdiction over the lands involved (43 CFR subpart 1821).

##### § 3452.1-3 Acceptance.

The effective date of the lease relinquishment shall, upon approval by an authorized officer, be the date on which the lessee filed the lease relinquishment. No relinquishment shall be approved until the authorized officer determines that the relinquishment will not impair the public interest, that the accrued rentals and royalties have been paid and that all the obligations of the lessee under the regulations and terms of the lease have been met.

[47 FR 33147, July 30, 1982]

#### § 3452.2 Cancellation.

##### § 3452.2-1 Cause for cancellation.

(a) The authorized officer, after compliance with § 3452.2-2 of this title, may take the appropriate steps to institute proceedings in a court of competent jurisdiction for the cancellation of the lease if the lessee: (1) Fails to comply with the provisions of the Mineral Leasing Act of 1920, as amended; (2) fails to comply with any applicable general regulations; or (3) defaults in the performance of any of the terms,

covenants, and stipulations of the lease.

(b) Any lease issued before August 4, 1976, on which the lessee does not meet the diligent development requirements or any lease whenever issued on which the lessee does not meet the continued operation requirements shall be subject to cancellation in whole or in part. In deciding whether to initiate lease cancellation proceedings under this subsection, the Secretary shall not consider adverse circumstances which arise out of (1) normally foreseeable costs of compliance with requirements for environmental protection; (2) commonly experienced delays in delivery of supplies or equipment; or (3) inability to obtain sufficient sales.

[44 FR 42635, July 19, 1979, as amended at 47 FR 33147, July 30, 1982]

##### § 3452.2-2 Cancellation procedure.

The lessee shall be given notice of any default, breach or cause of forfeiture and be afforded 30 days to correct the default, to request an extension of time in which to correct the default, or to submit evidence showing why the lease should not be cancelled. The Governor of the affected State(s) shall be given reasonable notice of action taken by the Department of the Interior to initiate cancellation of the lease.

[44 FR 42635, July 19, 1979, as amended at 48 FR 37656, Aug. 19, 1983]

#### § 3452.3 Termination.

(a) Any lease issued or readjusted after August 4, 1976, shall be terminated if the lessee does not meet the diligent development requirements.

(b) Should a lease be relinquished, cancelled or terminated for any reason, all deferred bonus payments shall be immediately payable and all rentals and royalties, including advance royalties, already paid or due, shall be forfeited to the United States.

[44 FR 42635, July 19, 1979, as amended at 47 FR 33147, July 30, 1982]

**Subpart 3453—Transfers by Assignment, Sublease or Otherwise**

**§ 3453.1 Qualifications.**

(a) Leases may be transferred in whole or in part to any person, association or corporation qualified under subpart 3472 of this title to hold such leases, except as provided by § 3420.1–4(b) (1)(iv) and (2)(ii) of this title.

(b) Preference right lease applications may be transferred as a whole only to a person, association or corporation qualified under subpart 3472 of this title to hold a lease.

(c) Exploration licenses may be transferred in whole or in part subject to § 3453.3(b) of this title.

[47 FR 33147, July 30, 1982]

**§ 3453.2 Requirements.**

**§ 3453.2–1 Application.**

Applications for approval of any transfer of a lease, preference right lease application or exploration license or any interest in a lease or license, whether by direct assignment, working agreement, transfer of royalty interest, sublease, or otherwise, shall be filed within 90 days from final execution.

[44 FR 42635, July 19, 1979, as amended at 47 FR 33147, July 30, 1982]

**§ 3453.2–2 Forms and statements.**

(a) Transfers of any record title interest shall be filed in triplicate and shall be accompanied by a request for approval from the transferee.

(b) No specific form need be used for requests for approval of transfers. The request for approval shall contain evidence of the transferee's qualifications, including a statement of Federal coal lease acreage holdings. This evidence shall consist of the same showing of qualifications required of a lease applicant by subpart 3472 of this title. A single signed copy of the qualifications statement is sufficient.

(c) A separate instrument of transfer shall be filed for each lease when transfers involve record titles. When transfers to the same person, association, or corporation involving more than one lease are filed at the same time, one request for approval and one showing as

to the qualifications of the transferee shall be sufficient.

(d) A single signed copy of all other instruments of transfer is sufficient, except that collateral assignments and other security or mortgage documents shall not be accepted for filing.

(e) Any transfer of a record title interest or assignment of operating rights shall be accompanied by the transferee's submission of the information specified in § 3422.3–4 of this title, including the holdings of any affiliate(s) (including joint ventures) of the transferees, or a statement incorporating a prior submission of the specified information by reference to the date and lease, license or application serial number of the submission, and containing any and all changes in holdings since the date of the prior submission.

(f) Any document of transfer which does not contain a description of all consideration or value paid or promised for the transfer shall be accompanied by a separate statement of all consideration or value, whether cash, property, future payments or any other type of consideration, paid or promised for the transfer.

(g) Information submitted to comply with paragraphs (e) and (f) of this section may be labeled as proprietary data and shall be treated in accordance with the laws and regulations governing the confidentiality of such information.

[44 FR 42635, July 19, 1979, as amended at 47 FR 33147, July 30, 1982]

**§ 3453.2–3 Filing location and fee.**

Instruments of transfer and requests for approval shall be filed in the Bureau of Land Management office having jurisdiction over the leased lands proposed for transfer (see 43 CFR subpart 1821). Each instrument of transfer shall be accompanied by a nonrefundable filing fee (see 43 CFR 3473.2).

[47 FR 33147, July 30, 1982]

**§ 3453.2–4 Bonds.**

(a) If a bond is required, it shall be furnished before a lease, preference right lease application or exploration license may be approved for transfer. If the original lease, preference right lease application or exploration license

## Bureau of Land Management, Interior

## § 3453.3-2

required the maintenance of a bond, the transferee shall submit either a written consent from the surety to the substitution of the transferee as principal or a new bond with the transferee as principal. Transfers of any part of the leased or licensed lands shall be described by legal subdivisions. Before any transfer of part of a lease or license is approved, the transferee shall submit: (1) A written statement from the surety that it agrees to the transfer and that it agrees to remain bound as to the interest retained by the lessee or licensee; and (2) a new bond with the transferee as principal covering the portion transferred.

(b) The transferor and the surety shall continue to be responsible for the performance of any obligation under the lease, preference right lease application or exploration license until the effective date of the approval of the transfer. If the transfer is not approved, the obligation to the United States shall continue as though no such transfer had been filed for approval. After the effective date of approval, the transferee, including any sublessee, applicant or licensee, and the transferee's surety shall be responsible for all lease, application or license obligations, notwithstanding any terms of the transfer to the contrary.

[47 FR 33147, July 30, 1982, as amended at 47 FR 38131, Aug. 30, 1982]

### § 3453.2-5 Effect of partial assignment.

A transfer of full record-title to only part of the lands, or any bed of the coal deposits therein, shall segregate the transferred and retained portions into separate and distinct leases or licenses, with the retained portion keeping the original serial number. The newly segregated lease or license shall be assigned a new serial number and shall contain the same terms and conditions as the original lease or license.

[47 FR 33148, July 30, 1982]

### § 3453.3 Approval.

#### § 3453.3-1 Conditions for approval.

(a) No transfer of a lease shall be approved if:

(1) The transferee is not qualified to hold a lease or an interest in a lease

under subpart 3472 of this title or under §§ 3420.1-3(b)(1)(iv) and 3420.1-3(b)(2)(ii) of this title;

(2) The lease bond is insufficient;

(3) The filing fee has not been submitted;

(4) The transferee would hold the lease in violation of the acreage requirements set out in subpart 3472 of this title;

(5) The transfer would create an overriding royalty or other interest in violation of § 3473.3-2 of this title;

(6) The lease account is not in good standing;

(7) The information required under § 3453.2-2(e) and (f) of this title has not been submitted; or

(8) The transferee is subject to the prohibition in § 3472.1-2(e) of this title.

(b) When the licensee proposes to transfer an exploration license, any other participating parties in the license shall be given the right of first refusal. If none of the participating parties wishes to assume the license, the license may be transferred if:

(1) The exploration bond is sufficient;

(2) The filing fee has been submitted; and

(3) The license account is in good standing.

(c) A preference right lease application may be transferred as a whole only to any party qualified to hold a lease under subpart 3472 of this title.

[47 FR 33148, July 30, 1982, as amended at 50 FR 42023, Oct. 17, 1985]

### § 3453.3-2 Disapproval of transfers.

(a) The authorized officer shall deny approval of a transfer if any reason why the transfer cannot be approved (listed in § 3453.3-1 of this title) is not cured within the time established by the authorized officer in a decision notifying the applicant for approval why the transfer cannot be approved.

(b) The authorized officer shall not approve a transfer of a lease until 30 days after the requirements of § 3422.3-4 of this title have been met.

[44 FR 42635, July 19, 1979, as amended at 47 FR 33148, July 30, 1982]

### § 3453.3-3

#### § 3453.3-3 Effective date.

A transfer shall take effect the first day of the month following its final approval by the Bureau of Land Management, or if the transferee requests in writing, the first day of the month of the approval. The Governor of the affected State(s) shall be given reasonable notice of any lease transfer.

[44 FR 42635, July 19, 1979, as amended at 47 FR 33148, July 30, 1982; 48 FR 37656, Aug. 19, 1983]

#### § 3453.3-4 Extensions.

(a) The filing of or approval of any transfer shall not alter any terms or extend any time periods under the lease, including those dealing with readjustment of the lease and the diligent development and continued operation on the lease.

(b) The filing of or approval of a transfer of an exploration license shall not extend the term of the license beyond the statutory 2-year maximum.

[44 FR 42635, July 19, 1979, as amended at 47 FR 33148, July 30, 1982; 47 FR 38131, Aug. 30, 1982]

SOURCE: 44 FR 42638, July 19, 1979, unless otherwise noted.

### Subpart 3461—Federal Lands Review: Unsuitability for Mining

#### § 3461.0-3 Authority.

(a) These regulations are issued under the authority of the statutes listed in § 3400.0-3 of this title.

(b) These regulations primarily implement:

(1) The general unsuitability criteria in section 522(a) of the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1272(a));

(2) The Federal lands review in section 522(b) of the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1272(b)); and

(3) The prohibitions against mining certain lands in section 522(e) of the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1272(e)).

#### § 3461.0-6 Policy.

The Department shall carry out the review of Federal lands under section 522(b) of the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1272(b)) principally through land use planning assessments by the surface management agency regarding the unsuitability of Federal lands for all or certain stipulated methods of coal mining.

#### § 3461.0-7 Scope.

Each criterion in § 3461.1 of this title uses the phrase “shall be considered unsuitable” as shorthand for “shall be considered unsuitable for all or certain

## Bureau of Land Management, Interior

## § 3461.2-1

stipulated methods of coal mining involving surface coal mining operations, as defined in § 3400.0-5(mm) of this title.

[44 FR 42638, July 19, 1979, as amended at 47 FR 33148, July 30, 1982]

### § 3461.1 Underground mining exemption from criteria.

(a) Federal lands with coal deposits that would be mined by underground mining methods shall not be assessed as unsuitable where there would be no surface coal mining operations, as defined in § 3400.0-5 of this title, on any lease, if issued.

(b) Where underground mining will include surface operations and surface impacts on Federal lands to which a criterion applies, the lands shall be assessed as unsuitable unless the surface management agency finds that a relevant exception or exemption applies.

[44 FR 42638, July 19, 1979, as amended at 47 FR 33149, July 30, 1982. Redesignated at 52 FR 46473, Dec. 8, 1987]

### § 3461.2 Unsuitability assessment procedures.

#### § 3461.2-1 Assessment and land use planning.

(a)(1) Each of the unsuitability criteria shall be applied to all coal lands with development potential identified in the comprehensive land use plan or land use analysis. For areas where 1 or more unsuitability conditions are found and for which the authorized officer of the surface management agency could otherwise regard coal mining as a likely use, the exceptions and exemptions for each criterion may be applied.

(2) Public comments on the application of the unsuitability criteria shall be solicited by a notice published in the FEDERAL REGISTER. This call for comments may be part of the call for public comments on the draft land-use plan or land-use analysis. This notice shall announce the availability of maps and other information describing the results of the application and the application process used.

(3) The authorized officer of the surface management agency shall describe in the comprehensive land use plan or land use analysis the results of the application of each unsuitability cri-

terion, exception and exemption. The authorized officer of the surface management agency shall state in the plan or analysis those areas which could be leased only subject to conditions or stipulations to conform to the application of the criteria or exceptions. Such areas may ultimately be leased provided that these conditions or stipulations are contained in the lease.

(b)(1) The authorized officer shall make his/her assessment on the best available data that can be obtained given the time and resources available to prepare the plan. The comprehensive land use plan or land use analysis shall include an indication of the adequacy and reliability of the data involved. Where either a criterion or exception (when under paragraph (a) of this section the authorized officer decides that application of an exception is appropriate) cannot be applied during the land use planning process because of inadequate or unreliable data, the plan or analysis shall discuss the reasons therefor and disclose when the data needed to make an assessment with reasonable certainty would be generated. In the case of Criterion 19, application shall be made before approval of the mining permit. In the case of other deferred criteria, application shall be made prior to finalizing the environmental analysis for the area being studied for coal leasing. The authorized officer shall make every effort within the time and resources available to collect adequate and reliable data which would permit the application of Criterion 19 in the land use or activity planning process. When those data are obtained, the authorized officer shall make public his/her assessment on the application of the criterion or, if appropriate, the exception and the reasons therefor and allow opportunity for public comment on the adequacy of the application as required by paragraph (a)(2) of this section.

(2) No lease tract shall be analyzed in a final regional lease sale environmental impact statement prepared under § 3420.4-5 of this title without significant data material to the application to the tract of each criterion described in § 3461.1 of this title, except, where necessary, criterion 19. If the data are lacking for the application of

## **§ 3461.2-2**

a criterion or exception to only a portion of the tract, and if the authorized officer determines that it is likely that stipulations in the lease or permit to conduct surface coal mining operations could avoid any problems which may result from subsequent application of the criterion or exception, such tract may be included and analyzed in the regional lease sale environmental impact statement.

(c) Any unsuitability assessments which result either from a designation or a termination of a designation of Federal lands as unsuitable by the Office of Surface Mining Reclamation and Enforcement, or from changes warranted by additional data acquired in the activity planning process, may be made without formally revising or amending the comprehensive land use plan or analysis.

[44 FR 42638, July 19, 1979, as amended at 47 FR 33149, July 30, 1982; 51 FR 18888, May 23, 1986. Redesignated and amended at 52 FR 46473, Dec. 8, 1987]

## **§ 3461.2-2 Consultation on unsuitability assessments.**

(a) Prior to adopting a comprehensive land use plan or land use analysis which assesses Federal lands as unsuitable for coal mining, the Secretary or other surface management agency shall complete the consultation set out in §§ 3420.1-6 and 3420.1-7 of this title.

(b) When consultation or concurrence is required in the application of any criterion or exception in § 3461.1 of this title, the request for advice or concurrence, and the reply thereto, shall be in writing. Unless another period is provided by law, the authorized officer shall specify that the requested advice, concurrence or nonconcurrence be made within 30 days.

(c) When the authorized officer does not receive a response either to a request for concurrence which is required by this subpart but not by law, or to consultation within the specified time, he or she may proceed as though concurrence had been given or consultation had occurred.

[44 FR 42638, July 19, 1979, as amended at 47 FR 33149, July 30, 1982. Redesignated at 52 FR 46473, Dec. 8, 1987]

## **43 CFR Ch. II (10-1-08 Edition)**

### **§ 3461.3 Relationship of leasing to unsuitability assessment.**

#### **§ 3461.3-1 Application of criteria on unleased lands.**

(a) The unsuitability criteria shall only be applied, prior to lease issuance, to all lands leased after July 19, 1979.

(b) The unsuitability criteria shall be initially applied either:

(1) During land use planning or the environmental assessment conducted for a specific lease application; or

(2) During land use planning under the provisions of § 3420.1-4 of this title.

[47 FR 33149, July 30, 1982. Redesignated at 52 FR 46473, Dec. 8, 1987]

#### **§ 3461.3-2 Application of criteria on leased lands.**

The unsuitability criteria shall not be applied to leased lands.

[47 FR 33149, July 30, 1982. Redesignated at 52 FR 46473, Dec. 8, 1987]

### **§ 3461.4 Exploration.**

(a) Assessment of any area as unsuitable for all or certain stipulated methods of coal mining operations pursuant to section 522 of the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1272) and the regulations of this subpart does not prohibit exploration of such area under subpart 3410 and Part 3480 of this title.

(b) An application for an exploration license on any lands assessed as unsuitable for all or certain stipulated methods of coal mining shall be reviewed by the Bureau of Land Management to ensure that exploration does not harm any value for which the area has been assessed as unsuitable.

[44 FR 42638, July 19, 1979. Redesignated and amended at 47 FR 33149, July 30, 1982; 50 FR 8627, Mar. 4, 1985. Further redesignated at 52 FR 46473, Dec. 8, 1987]

### **§ 3461.5 Criteria for assessing lands unsuitable for all or certain stipulated methods of coal mining.**

(a)(1) *Criterion Number 1.* All Federal lands included in the following land systems or categories shall be considered unsuitable: National Park System, National Wildlife Refuge System, National System of Trails, National

Wilderness Preservation System, National Wild and Scenic Rivers System, National Recreation Areas, lands acquired with money derived from the Land and Water Conservation Fund, National Forests, and Federal lands in incorporated cities, towns, and villages.

(2) *Exceptions.* (i) A lease may be issued within the boundaries of any National Forest if the Secretary finds no significant recreational, timber, economic or other values which may be incompatible with the lease; and (A) surface operations and impacts are incident to an underground coal mine, or (B) where the Secretary of Agriculture determines, with respect to lands which do not have significant forest cover within those National Forests west of the 100th Meridian, that surface mining may be in compliance with the Multiple-Use Sustained-Yield Act of 1960, the Federal Coal Leasing Amendments Act of 1976 and the Surface Mining Control and Reclamation Act of 1977.

(ii) A lease may be issued within the Custer National Forest with the consent of the Department of Agriculture as long as no surface coal mining operations are permitted.

(3) *Exemptions.* The application of this criterion to lands within the listed land systems and categories is subject to valid existing rights, and does not apply to surface coal mining operations existing on August 3, 1977.

(b)(1) *Criterion Number 2.* Federal lands that are within rights-of-way or easements or within surface leases for residential, commercial, industrial, or other public purposes, on federally owned surface shall be considered unsuitable.

(2) *Exceptions.* A lease may be issued, and mining operations approved, in such areas if the surface management agency determines that:

(i) All or certain types of coal development (e.g., underground mining) will not interfere with the purpose of the right-of-way or easement; or

(ii) The right-of-way or easement was granted for mining purposes; or

(iii) The right-of-way or easement was issued for a purpose for which it is not being used; or

(iv) The parties involved in the right-of-way or easement agree, in writing, to leasing; or

(v) It is impractical to exclude such areas due to the location of coal and method of mining and such areas or uses can be protected through appropriate stipulations.

(3) *Exemptions.* This criterion does not apply to lands: To which the operator made substantial legal and financial commitments prior to January 4, 1977; on which surface coal mining operations were being conducted on August 3, 1977; or which include operations on which a permit has been issued.

(c)(1) *Criterion Number 3.* The terms used in this criterion have the meaning set out in the Office of Surface Mining Reclamation and Enforcement regulations at Chapter VII of Title 30 of the Code of Federal Regulations. Federal lands affected by section 522(e) (4) and (5) of the Surface Mining Control and Reclamation Act of 1977 shall be considered unsuitable. This includes lands within 100 feet of the outside line of the right-of-way of a public road or within 100 feet of a cemetery, or within 300 feet of any public building, school, church, community or institutional building or public park or within 300 feet of an occupied dwelling.

(2) *Exceptions.* A lease may be issued for lands:

(i) Used as mine access roads or haulage roads that join the right-of-way for a public road;

(ii) For which the Office of Surface Mining Reclamation and Enforcement has issued a permit to have public roads relocated;

(iii) If, after public notice and opportunity for public hearing in the locality, a written finding is made by the authorized officer that the interests of the public and the landowners affected by mining within 100 feet of a public road will be protected.

(iv) For which owners of occupied dwellings have given written permission to mine within 300 feet of their buildings.

(3) *Exemptions.* The application of this criterion is subject to valid existing rights, and does not apply to surface coal mining operations existing on August 3, 1977.

(d)(1) *Criterion Number 4.* Federal lands designated as wilderness study areas shall be considered unsuitable while under review by the Administration and the Congress for possible wilderness designation. For any Federal land which is to be leased or mined prior to completion of the wilderness inventory by the surface management agency, the environmental assessment or impact statement on the lease sale or mine plan shall consider whether the land possesses the characteristics of a wilderness study area. If the finding is affirmative, the land shall be considered unsuitable, unless issuance of noncompetitive coal leases and mining on leases is authorized under the Wilderness Act and the Federal Land Policy and Management Act of 1976.

(2) *Exemption.* The application of this criterion to lands for which the Bureau of Land Management is the surface management agency and lands in designated wilderness areas in National Forests is subject to valid existing rights.

(e)(1) *Criterion Number 5.* Scenic Federal lands designated by visual resource management analysis as Class I (an areas of outstanding scenic quality or high vessel sensitivity) but not currently on the National Register of Natural Landmarks shall be considered unsuitable.

(2) *Exception.* A lease may be issued if the surface management agency determines that surface coal mining operations will not significantly diminish or adversely affect the scenic quality of the designated area.

(3) *Exemptions.* This criterion does not apply to lands: to which the operator has made substantial legal and financial commitments prior to January 4, 1977; on which surface coal mining operations were being conducted on August 3, 1977, or which include operations on which a permit has been issued.

(f)(1) *Criterion Number 6.* Federal lands under permit by the surface management agency, and being used for scientific studies involving food or fiber production, natural resources, or technology demonstrations and experiments shall be considered unsuitable for the duration of the study, demonstration or experiment, except where

mining could be conducted in such a way as to enhance or not jeopardize the purposes of the study, as determined by the surface management agency, or where the principal scientific user or agency gives written concurrence to all or certain methods of mining.

(2) *Exemptions.* This criterion does not apply to lands: To which the operator made substantial legal and financial commitments prior to January 4, 1977; on which surface coal mining operations were being conducted on August 3, 1977; or which include operations on which a permit has been issued.

(g)(1) *Criterion Number 7.* All publicly or privately owned places which are included in the National Register of Historic Places shall be considered unsuitable. This shall include any areas that the surface management agency determines, after consultation with the Advisory Council on Historic Preservation and the State Historic Preservation Officer, are necessary to protect the inherent values of the property that made it eligible for listing in the National Register.

(2) *Exceptions.* All or certain stipulated methods of coal mining may be allowed if, after consultation with the Advisory Council on Historic Preservation and the State Historic Preservation Officer, they are approved by the surface management agency, and, where appropriate, the State or local agency with jurisdiction over the historic site.

(3) *Exemptions.* This criterion does not apply to lands: to which the operator made substantial legal and financial commitments prior to January 4, 1977; on which surface coal mining operations were being conducted on August 3, 1977; or which include operations on which a permit has been issued.

(h)(1) *Criterion Number 8.* Federal lands designated as natural areas or as National Natural Landmarks shall be considered unsuitable.

(2) *Exceptions.* A lease may be issued and mining operation approved in an area or site if the surface management agency determines that:

(i) The use of appropriate stipulated mining technology will result in no significant adverse impact to the area or site; or

(ii) The mining of the coal resource under appropriate stipulations will enhance information recovery (e.g., paleontological sites).

(3) *Exemptions.* This criterion does not apply to lands: To which the operator made substantial legal and financial commitments prior to January 4, 1977; on which surface coal mining operations were being conducted on August 3, 1977; or which includes operations on which a permit has been issued.

(i) (1) *Criterion Number 9.* Federally designated critical habitat for listed threatened or endangered plant and animal species, and habitat proposed to be designated as critical for listed threatened or endangered plant and animal species or species proposed for listing, and habitat for Federal threatened or endangered species which is determined by the Fish and Wildlife Service and the surface management agency to be of essential value and where the presence of threatened or endangered species has been scientifically documented, shall be considered unsuitable.

(2) *Exception.* A lease may be issued and mining operations approved if, after consultation with the Fish and Wildlife Service, the Service determines that the proposed activity is not likely to jeopardize the continued existence of the listed species and/or its critical habitat.

(3) *Exemptions.* This criterion does not apply to lands: to which the operator made substantial legal and financial commitments prior to January 4, 1977; on which surface coal mining operations were being conducted on August 3, 1977; or which include operations on which a permit has been issued.

(j)(1) *Criterion Number 10.* Federal lands containing habitat determined to be critical or essential for plant or animal species listed by a state pursuant to state law as endangered or threatened shall be considered unsuitable.

(2) *Exception.* A lease may be issued and mining operations approved if, after consultation with the state, the

surface management agency determines that the species will not be adversely affected by all or certain stipulated methods of coal mining.

(3) *Exemptions.* This criterion does not apply to lands: To which the operator made substantial legal and financial commitments prior to January 4, 1977; on which surface coal mining operations were being conducted on August 3, 1977; or which include operations on which a permit has been issued.

(k)(1) *Criterion Number 11.* A bald or golden eagle nest or site on Federal lands that is determined to be active and an appropriate buffer zone of land around the nest site shall be considered unsuitable. Consideration of availability of habitat for prey species and of terrain shall be included in the determination of buffer zones. Buffer zones shall be determined in consultation with the Fish and Wildlife Service.

(2) *Exceptions.* A lease may be issued if:

(i) It can be conditioned in such a way, either in manner or period of operation, that eagles will not be disturbed during breeding season; or

(ii) The surface management agency, with the concurrence of the Fish and Wildlife Service, determines that the golden eagle nest(s) will be moved.

(iii) Buffer zones may be decreased if the surface management agency determines that the active eagle nests will not be adversely affected.

(3) *Exemptions.* This criterion does not apply to lands: to which the operator made substantial legal and financial commitments prior to January 4, 1977; on which surface coal mining operations were being conducted on August 3, 1977; or which include operations on which a permit has been issued.

(l)(1) *Criterion Number 12.* Bald and golden eagle roost and concentration areas on Federal lands used during migration and wintering shall be considered unsuitable.

(2) *Exception.* A lease may be issued if the surface management agency determines that all or certain stipulated methods of coal mining can be conducted in such a way, and during such periods of time, to ensure that eagles shall not be adversely disturbed.

(3) *Exemptions.* This criterion does not apply to lands: to which the operator made substantial legal and financial commitments prior to January 4, 1977; on which surface coal mining operations were being conducted on August 3, 1977; or which include operations on which a permit has been issued.

(m)(1) *Criterion Number 13.* Federal lands containing a falcon (excluding kestrel) cliff nesting site with an active nest and a buffer zone of Federal land around the nest site shall be considered unsuitable. Consideration of availability of habitat for prey species and of terrain shall be included in the determination of buffer zones. Buffer zones shall be determined in consultation with the Fish and Wildlife Service.

(2) *Exception.* A lease may be issued where the surface management agency, after consultation with the Fish and Wildlife Service, determines that all or certain stipulated methods of coal mining will not adversely affect the falcon habitat during the periods when such habitat is used by the falcons.

(3) *Exemptions.* This criterion does not apply to lands: to which the operator made substantial legal and financial commitments prior to January 4, 1977; on which surface coal mining operations were being conducted on August 3, 1977; or which include operations on which a permit has been issued.

(n)(1) *Criterion Number 14.* Federal lands which are high priority habitat for migratory bird species of high Federal interest on a regional or national basis, as determined jointly by the surface management agency and the Fish and Wildlife Service, shall be considered unsuitable.

(2) *Exception.* A lease may be issued where the surface management agency, after consultation with the Fish and Wildlife Service, determines that all or certain stipulated methods of coal mining will not adversely affect the migratory bird habitat during the periods when such habitat is used by the species.

(3) *Exemption.* This criterion does not apply to lands: to which the operator made substantial legal and financial commitments prior to January 4, 1977; on which surface coal mining oper-

ations were being conducted on August 3, 1977; or which include operations on which a permit has been issued.

(o)(1) *Criterion Number 15.* Federal lands which the surface management agency and the state jointly agree are habitat for resident species of fish, wildlife and plants of high interest to the state and which are essential for maintaining these priority wildlife and plant species shall be considered unsuitable. Examples of such lands which serve a critical function for the species involved include:

(i) Active dancing and strutting grounds for sage grouse, sharp-tailed grouse, and prairie chicken;

(ii) Winter ranges crucial for deer, antelope, and elk;

(iii) Migration corridor for elk; and

(iv) Extremes of range for plant species; and

A lease may be issued if, after consultation with the state, the surface management agency determines that all or certain stipulated methods of coal mining will not have a significant long-term impact on the species being protected.

(2) *Exemptions.* This criterion does not apply to lands: To which the operator made substantial legal and financial commitments prior to January 4, 1977; on which surface coal mining operations were being conducted on August 3, 1977; or which include operations on which a permit has been issued.

(p)(1) *Criterion Number 16.* Federal lands in riverine, coastal and special floodplains (100-year recurrence interval) on which the surface management agency determines that mining could not be undertaken without substantial threat of loss of life or property shall be considered unsuitable for all or certain stipulated methods of coal mining.

(2) *Exemptions.* This criterion does not apply to lands: To which the operator made substantial legal and financial commitments prior to January 4, 1977; on which surface coal mining operations were being conducted on August 3, 1977; or which include operations on which a permit has been issued.

(q)(1) *Criterion Number 17.* Federal lands which have been committed by the surface management agency to use

## Bureau of Land Management, Interior

## § 3465.0-1

as municipal watersheds shall be considered unsuitable.

(2) *Exception.* A lease may be issued where the surface management agency in consultation with the municipality (incorporated entity) or the responsible governmental unit determines, as a result of studies, that all or certain stipulated methods of coal mining will not adversely affect the watershed to any significant degree.

(3) *Exemptions.* This criterion does not apply to lands: To which the operator made substantial legal and financial commitments prior to January 4, 1977; on which surface coal mining operations were being conducted on August 3, 1977; or which include operations on which a permit has been issued.

(r)(1) *Criterion Number 18.* Federal lands with National Resource Waters, as identified by states in their water quality management plans, and a buffer zone of Federal lands  $\frac{1}{4}$  mile from the outer edge of the far banks of the water, shall be unsuitable.

(2) *Exception.* The buffer zone may be eliminated or reduced in size where the surface management agency determines that it is not necessary to protect the National Resource Waters.

(3) *Exemptions.* This criterion does not apply to lands: To which the operator made substantial legal and financial commitments prior to January 4, 1977; on which surface coal mining operations were being conducted on August 3, 1977; or which include operations on which a permit has been issued.

(s)(1) *Criterion Number 19.* Federal lands identified by the surface management agency, in consultation with the state in which they are located, as alluvial valley floors according to the definition in § 3400.0-5(a) of this title, the standards in 30 CFR Part 822, the final alluvial valley floor guidelines of the Office of Surface Mining Reclamation and Enforcement when published, and approved state programs under the Surface Mining Control and Reclamation Act of 1977, where mining would interrupt, discontinue, or preclude farming, shall be considered unsuitable. Additionally, when mining Federal land outside an alluvial valley floor would materially damage the

quantity or quality of water in surface or underground water systems that would supply alluvial valley floors, the land shall be considered unsuitable.

(2) *Exemptions.* This criterion does not apply to surface coal mining operations which produced coal in commercial quantities in the year preceding August 3, 1977, or which had obtained a permit to conduct surface coal mining operations.

(t)(1) *Criterion Number 20.* Federal lands in a state to which is applicable a criterion (i) proposed by the state or Indian tribe located in the planning area, and (ii) adopted by rulemaking by the Secretary, shall be considered unsuitable.

(2) *Exceptions.* A lease may be issued when:

(i) Such criterion is adopted by the Secretary less than 6 months prior to the publication of the draft comprehensive land use plan or land use analysis, plan, or supplement to a comprehensive land use plan, for the area in which such land is included, or

(ii) After consultation with the state or affected Indian tribe, the surface management agency determines that all or certain stipulated methods of coal mining will not adversely affect the value which the criterion would protect.

(3) *Exemptions.* This criterion does not apply to lands: To which the operator made substantial legal and financial commitments prior to January 4, 1977; on which surface coal mining operations were being conducted on August 3, 1977; or which include operations on which a permit has been issued.

[44 FR 42638, July 19, 1979, as amended at 47 FR 33148, July 30, 1982; 48 FR 54820, Dec. 7, 1983. Redesignated and amended at 52 FR 46473, Dec. 8 1987]

### Subpart 3465—Surface Management and Protection

#### § 3465.0-1 Purpose.

This subpart establishes rules for the management and protection of the surface of leased Federal lands when coal deposits are developed.

## **§ 3465.0-3**

### **§ 3465.0-3 Authority.**

These regulations are issued under the authority of the statutes listed in § 3400.0-3 of this title.

### **§ 3465.0-7 Applicability.**

This subpart applies to leases and licenses to mine issued by the Bureau of Land Management for the development of Federal coal.

### **§ 3465.1 Use of surface.**

(a) The operator shall use only that part of the surface area included in his lease or license to mine that has been included in an approved resource recovery and protection plan and mining permit (43 CFR 3482.1(b) and 30 CFR part 741).

(b) Separate leases, permits, or rights-of-way under the appropriate provisions in title 43 of the Code of Federal Regulations are required for the installation of power generation plants or commercial or industrial facilities on the lands in the lease or license to mine or for the use of mineral materials or timber from the land in the lease or license to mine.

(c) Other land uses under other authorities may be allowed on an area in a lease or license to mine provided there is no unreasonable conflict and that neither the mining operation nor the other use is jeopardized by the presence of the other.

[44 FR 42638, July 19, 1979, as amended at 47 FR 33149, July 30, 1982; 50 FR 8627, Mar. 4, 1985]

### **§ 3465.2 Inspections and noncompliance.**

#### **§ 3465.2-1 Inspections.**

The authorized officer or his/her authorized representative shall have the right to enter lands under a lease or license to mine to inspect without advance notice or a search warrant, upon presentation of appropriate credentials, to determine whether the activities and conditions are in compliance with the applicable laws, regulations, notices and orders, terms and conditions of leases, licenses to mine or per-

## **43 CFR Ch. II (10-1-08 Edition)**

mits, and the requirements of the approved mining plan.

[44 FR 42638, July 19, 1979. Redesignated and amended at 47 FR 33149, July 30, 1982; 50 FR 8627, Mar. 4, 1985]

### **§ 3465.2-2 Discovery of noncompliance.**

(a) Upon discovery of activities or conditions that are not in compliance with the terms of a lease or license to mine, or with an approved permit (30 CFR part 741), but that do not pose a serious and imminent danger to the public or to resources and environmental quality, the authorized officer shall refer the matter to the Surface Mining Officer for remedial action, or take remedial action on matters of exploration outside the permit area.

(b) Upon discovery of activities or conditions that are not in compliance with the terms of a lease, license to mine, or with an approved permit and that do pose a serious and imminent danger to the health and safety of the public or to resources and environmental quality, the authorized officer may order the immediate cessation of the activities or conditions provided that the Surface Mining Officer is immediately informed of the issuance of any such emergency cessation order.

[44 FR 42638, July 19, 1979. Redesignated at 47 FR 33149, July 30, 1982; 50 FR 8627, Mar. 4, 1985]

### **§ 3465.2-3 Failure of lessee or holder of license to mine to act.**

Failure of a lessee or the holder of a license to mine to comply with an immediate cessation order issued under § 3465.3-2(b) or with a written notice of noncompliance issued by the Surface Mining Officer in accordance with part 3480 of this title or 30 CFR Chapter VII, Subchapter D, or by the authorized officer in accordance with part 3480 of this title, shall be grounds for suspension of the permit and may be grounds for cancellation of the license to mine, or in accordance with subpart 3452 of this title, the lease.

[44 FR 42638, July 19, 1979. Redesignated and amended at 47 FR 33149, July 30, 1982; 50 FR 8627, Mar. 4, 1985]

SOURCE: 44 FR 42643, July 19, 1979, unless otherwise noted.

**Subpart 3471—Coal Management  
Provisions and Limitations**

**§ 3471.1 Land description requirements.**

**§ 3471.1-1 Land description and coal deposit in application.**

(a) Any application for a lease, lease modification, or license to mine shall include a complete and accurate description of the lands for which the lease, lease modification, or license to mine is desired.

(b) If the land has been surveyed under the public land rectangular survey system, each application shall describe the land by legal subdivision (section, township, and range), or aliquot part thereof (but not less than 10 acres).

(c) Where protraction diagrams have been approved and the effective date has been published in the FEDERAL REGISTER, the application for land shown on such protraction diagrams and filed on or after the effective date shall contain a description of the land according to the section, township, and range shown on the approved protraction diagrams.

(d)(1) If the land has not been surveyed on the ground and is not shown on the records as covered by protraction diagrams, the application shall describe the land by metes and bounds, giving courses and distances between the successive angle points on the boundary of the tract, in cardinal directions except where the boundaries of the land are in irregular form, and connected by courses and distances to an official corner of the public land surveys. In Alaska, the description of unsurveyed land shall be connected by courses and distances to either an official corner of the public land surveys or to a triangulation station established by an agency of the United States such as the Geological Survey,

## § 3471.1-2

the National Oceanic and Atmospheric Administration, or the International Boundary Commission, if the record position is available to the general public.

(2)(i) If the land is acquired land in a non-public land state which has not been surveyed under the rectangular system of public land surveys, the land shall be described as in the deed or other document by which the United States acquired title to the lands or minerals.

(ii) If the land constitutes less than the entire tract acquired by the United States, it shall be described by courses and distances between successive angle points on its boundary tying by course and distance into an identifiable point listed in the description in the deed or other document by which the United States acquired title to the land.

(iii) If the description in the deed or other document by which the United States acquired title to the land does not include the courses and distance between the successive angle points on the boundary of the desired tract, the description in the application shall be expanded to include such courses and distances.

(iv) The application shall be accompanied by a map on which the land is clearly marked showing its location with respect to the administrative unit or project of which it is a part. It is not necessary to submit a map if the land has been surveyed under the rectangular system of public land surveys, and the land description can be conformed to that system.

(v) If an acquisition tract number has been assigned by the acquiring agency to the tract, a description by tract number will be accepted.

(vi) Any accreted land not described in the deed to the United States shall be described by metes and bounds, giving courses and distances between the successive angle points on the boundary of the tract, and connected by courses and distances to an angle point on the perimeter of the acquired tract to which the accretions belong.

### § 3471.1-2 Land description in lease.

(a) All unsurveyed lands in a public land survey system state shall have a cadastral survey performed at Federal

## 43 CFR Ch. II (10-1-08 Edition)

Government expense before a lease or license to mine may be issued, except for areas covered by a skeleton survey, i.e. Utah and Alaska, and the lease when issued shall be described by legal subdivision (section, township, and range), or aliquot part thereof (but no less than 10 acres).

(b) If the land is acquired land in a non-public land state, the land in the lease shall be described in the same manner provided for lease applications under § 3471.1-1(d)(2) of this title.

### § 3471.2 Effect of land transactions.

#### § 3471.2-1 Disposal of land with a reservation of minerals.

(a) Where the lands included in a lease or license to mine have been or may be disposed of with reservation of the coal deposits, a lessee or the holder of a license to mine must comply fully with the law under which the reservation was made. See, among other laws, the Acts of March 3, 1909 (34 Stat. 844; 30 U.S.C. 81); June 22, 1910 (35 Stat. 583; 30 U.S.C. 83-85); December 29, 1916, as amended (39 Stat. 862; 43 U.S.C. 291-301); June 17, 1949 (63 Stat. 200); June 21, 1949 (63 Stat. 214; 30 U.S.C. 54); March 8, 1922 (42 Stat. 415; 48 U.S.C. 376-377); and October 21, 1976 (90 Stat. 2759; 43 U.S.C. 1719).

(b) Any sale or conveyance of acquired lands by the agency having jurisdiction shall be subject to any lease or license to mine previously issued under the Mineral Leasing Act for Acquired Lands.

(c) Leases on acquired lands outstanding on August 7, 1947, and covering lands subject to the Mineral Leasing Act for Acquired Lands may be exchanged for new leases to be issued under that Act.

(d) When: (1) The coal is to be mined by other than underground mining techniques, (2) the surface of the land is owned by a qualified surface owner, and (3) the lease is issued after August 3, 1977, the lessee shall comply with the terms of the written consent of the qualified surface owner not inconsistent with Federal and state mined land reclamation laws and regulations.

[44 FR 42643, July 19, 1979, as amended at 47 FR 33149, July 30, 1982]

## Bureau of Land Management, Interior

## § 3471.4

### § 3471.2-2 Effect of conveyance to state or local entity.

(a) If the United States has conveyed the title to, or otherwise transferred control of the land surface containing the coal deposits to (1) any state or political subdivision, agency, or its instrumentality, (2) a college, any other educational corporation, or association, or (3) to a charitable or religious corporation or association, the transferee shall be notified by certified mail of the application for the license to mine or lease, or the scheduling of a lease sale. The transferee shall be given a reasonable period of time within which to suggest any stipulations necessary for the protection of existing surface improvements or uses to be included in the license or lease and state the supporting facts, or to file any objections to its issuance and state the supporting facts.

(b) Opposition by the state or local entity is not a bar to issuance of the license to mine or lease for the reserved minerals in the lands. (See, however, §3461.1(b).) In each case, the final determination on whether to issue the license to mine or lease is based on the best interests of the public.

[44 FR 42643, July 19, 1979, as amended at 47 FR 33149, July 30, 1982]

### § 3471.3 Cancellation or forfeiture.

#### § 3471.3-1 Protection of *bona fide* purchaser.

(a) The Secretary's right to cancel or forfeit a lease for any violation shall not adversely affect the title or interest of a *bona fide* purchaser of any lease or any interest therein. A *bona fide* purchaser must be a person, association, or corporation qualified to hold such lease or interest, even though the holdings of the party or parties from which the lease or interest therein was acquired or their predecessor(s) in title (including the original lessee of the United States), may have been cancelled or forfeited for any such violation.

(b) Any party to any proceedings with respect to a violation of any provision of the mineral leasing laws may be dismissed promptly as a party by showing that he/she holds and acquired his/her interest as a *bona fide* purchaser

without having violated any provisions of the mineral leasing laws.

(c) If a party waives his or her rights under the lease, or if such rights are suspended by order of the Secretary pending a decision, rental payments and time counted against the term of the lease shall be suspended as of the first day of the month following the filing of the waiver or the Secretary's suspension until the first day of the month following the final decision in the proceeding or the revocation of the waiver or suspension.

[44 FR 42643, July 19, 1979. Redesignated and amended at 47 FR 33149, July 30, 1982]

### § 3471.3-2 Sale of underlying interests.

If, in any proceeding to cancel or forfeit a lease or any interest therein acquired in violation of any of the provisions of the mineral leasing laws, the lease or interest therein is cancelled or forfeited, and if there are valid options to acquire the lease or an interest therein that are not subject to cancellation, forfeiture, or compulsory disposition, this lease or interest therein shall be sold to the highest responsible qualified bidder by competitive bidding, in a manner similar to that provided for in the offering of leases by competitive bidding, subject to all outstanding valid interests and options. If less than the whole interest in the lease or interest therein is cancelled or forfeited, the partial interest shall be sold in the same way. If no satisfactory offer is obtained as a result of the competitive offering of a whole or partial interest, it may be sold by other methods that the authorized officer finds appropriate. However, the terms shall not be less favorable to the Government than those of the best competitive bid received.

[44 FR 42643, July 19, 1979. Redesignated at 47 FR 33149, July 30, 1982]

### § 3471.4 Future interest, acquired lands.

An application to lease lands in which the United States has a future interest filed more than 2 years prior to the date of the vesting in the United States of the interest in the coal shall be rejected. Any application for a future interest lease outstanding at the

## **§ 3472.1**

## **43 CFR Ch. II (10–1–08 Edition)**

time of the vesting in the United States of the present possessory interest in the coal shall not lapse, but shall continue to be treated under subpart 3425 of this title. (See 43 CFR 3472.1–2(g).)

[44 FR 42643, July 19, 1979, as amended at 47 FR 33149, July 30, 1982]

### **Subpart 3472—Lease Qualification Requirements**

#### **§ 3472.1 Qualifications.**

##### **§ 3472.1–1 Qualified applicants and bidders.**

A lease may be issued only to (a) citizens of the United States; (b) associations of citizens organized under the laws of the United States or of any state thereof, which are authorized to hold such interests by the statute under which they are organized and by the instrument establishing their association; (c) corporations organized under the laws of the United States or of any state thereof, including a company or corporation operating a common carrier railroad; and (d) public bodies, including municipalities.

[44 FR 42643, July 19, 1979. Redesignated at 44 FR 56340, Oct. 1, 1979]

##### **§ 3472.1–2 Special leasing qualifications.**

(a) Each applicant or bidder for a lease shall furnish a signed statement showing that, with the area applied or bid for, the applicant or bidder's interests in leases and lease applications, held directly or indirectly, do not exceed in the aggregate the acreage limitation in § 3472.1–3 of this title.

(b) A lease shall not be issued to a minor but may be issued to a legal guardian or trustee on behalf of a minor.

(c) Every company or corporation operating a common carrier railroad shall make a statement that it needs the coal for which it seeks a lease solely for its own railroad use; that it operates main or branch lines in the state in which the lands involved are located; that the aggregate acreage in the leases and applications in which it holds an interest, directly or indirectly, does not exceed 10,240 acres; and

that it does not hold more than one lease for each 200 miles of its railroad lines served or to be served from such coal deposits. This last requirement excludes spurs or switches, branch lines built to connect the leased coal with the railroad, and parts of the railroad operated mainly by power not produced by steam.

(d) Aliens may not acquire or hold any direct or indirect interest in leases, except that they may own or control stock in corporations holding leases if the laws of their country do not deny similar or like privileges to citizens of the United States. If any appreciable percentage of stock of a corporation is held by aliens who are citizens of a country denying similar or like privileges to United States citizens, that corporation's application or bid for a lease shall be rejected, and that corporation's lease shall be subject to cancellation.

(e)(1)(i) On or after December 31, 1986, no lease shall be issued and no existing lease shall be transferred to any entity that holds and has held for 10 years any lease from which the entity is not producing the coal in commercial quantities, except as authorized under the advance royalty or suspension provisions of part 3480 of this chapter, or paragraph (e) (4), (5), or (6) of this section.

(ii) An entity seeking to obtain a working interest in a lease, or approval of a transfer under subpart 3453 of this title, shall qualify both on the date of determination of lessee qualifications and on the date the lease is issued or transfer approved.

(iii) Once a lease has been issued to a qualified entity or transfer approved for a lease under subpart 3453 of this title, disqualification at a later date shall not result in surrender of that lease, or rescission of the approved transfer, except as provided in paragraph (e)(4) of this section.

(2)(i) Any entity seeking to obtain a lease or approval of a transfer of a lease pursuant to 43 CFR Group 3400 of this title shall certify, in writing, that the entity is in compliance with the Act and the requirements of this subpart. The entity's self-certification statement shall include:

(A) A statement that the entity is qualified to be issued a lease or to have a transfer approved in accordance with the presumption of control or the presumption of noncontrol requirements at § 3400.0-5(rr) of this title, and in accordance with the producing requirements at paragraph (e)(6) of this section;

(B) Justification rebutting the presumption of control requirements at § 3400.0-5(rr) of this title, if the entity's instruments of ownership of the voting securities of another entity or of its voting securities by another entity are 20 through 50 percent. The authorized officer, based on the written self-certification statement and other relevant information, shall determine whether the entity has rebutted the presumption of control.

(ii) If a lease is issued, or a transfer approved under subpart 3453 of this title, to an entity based upon an improper, written self-certification of compliance, the authorized officer shall administratively cancel the lease, or rescind the approved transfer, after complying with § 3452.2-2 of this title.

(3) The authorized officer may require an entity holding or seeking to hold an interest in a lease, to furnish, at any time, further evidence of compliance with the special leasing qualifications of this subpart.

(4)(i) An entity, seeking to qualify for lease issuance, or transfer approval under subpart 3453 of this title, shall not be disqualified under the provisions of this subpart if it has one of the following actions pending before the authorized officer for any lease that would otherwise disqualify it under this subpart:

(A) Request for lease relinquishment; or

(B) Application for arm's-length lease assignment; or

(C) Application for approval of a logical mining unit that the authorized officer determines would be producing on its effective date.

(ii) Once a lease has been issued, or transfer approved, to an entity that qualifies under paragraph (e)(4)(i) of this section, an adverse decision by the authorized officer on the pending action, or the withdrawal of the pending action by the applicant, shall result in

termination of the lease or rescision of the transfer approval. Such decision of the authorized officer shall be effective, regardless of appeal of that decision. The possibility of lease termination shall be included as a special stipulation in every lease issued to an entity that qualifies under paragraph (e)(4) of this section.

(iii) The entity shall not qualify for lease issuance or transfer under paragraph (e)(4)(i) of this section during the pendency of an appeal before the Office of Hearings and Appeals from an adverse decision by the authorized officer on any of the actions described in paragraph (e)(4)(i) of this section.

(iv)(A) Where an entity, qualified under this section, had an approved transfer of a lease under subpart 3453 of this title, the transferor retained a right-of-first-refusal, and the entity wishes to relinquish such lease if such lease would otherwise disqualify the entity under this subpart, the entity may file the relinquishment under subpart 3452 of this title. However, the entity shall:

(1) Submit sufficient documentation for the authorized officer to determine that, in fact, such a right-of-first-refusal exists and prevents approval or disapproval by the authorized officer of the pending relinquishment;

(2) Submit with the request for approval of the relinquishment a statement that action by the authorized officer on the pending relinquishment be conditioned on the execution, or lack thereof, of the assignment under the right-of-first-refusal, as well as on the approval or disapproval of the assignment, if executed, under subpart 3453 of this title;

(3) Submit an application for arm's-length lease assignment signed by the entity as well as proof that it has been submitted to the transferor that retained the right-of-first-refusal (e.g., copy of certified mail delivery); and

(4) Submit the name(s) and address(es) of the transferor(s) that retained the right-of-first-refusal.

(B) If the authorized officer determines, based on the information supplied under paragraph (e)(4)(iv)(A) of this section, that the right-of-first-refusal prevents action on the pending relinquishment, the authorized officer

will send, via certified mail, return receipt requested, a request for additional information to the transferor that retained the right-of-first-refusal. The request shall state that the transferor that retained the right-of-first-refusal shall comply with subpart 3453 of this title within 30 days of receipt. If the transferor that retained the right-of-first-refusal does not comply within the 30-day time frame, the authorized officer will:

(1) Disapprove the pending assignment and so notify the entity and the transferor that retained the right-of-first-refusal; and

(2) Process the request for relinquishment under subpart 3452 of this title.

(C) If the authorized officer determines, pursuant to the information submitted under paragraph (e)(4)(iv)(A) of this section, that the right-of-first-refusal does not prevent action on the request for relinquishment, the authorized officer will:

(1) Disapprove the pending assignment and so notify the entity and the transferor that retained the right-of-first-refusal; and

(2) Process the request for relinquishment under subpart 3452 of this title.

(5) Leases that have been mined out (i.e., all recoverable reserves have been exhausted), as determined by the authorized officer, may be held for such purposes as reclamation without disqualification of the entity under the provisions of this subpart.

(6)(i) The authorized officer shall determine the date of first production for the purposes of establishing the beginning of the bracket, if applicable.

(ii) An entity shall not be disqualified under the provisions of this subpart if each lease that the entity holds is:

(A) Producing and is within its bracket;

(B) Producing and has produced commercial quantities during the bracket.

(C) Producing and has achieved production in commercial quantities (an entity holding such a lease is disqualified under section 2(a)(2)(A) of the Act from the end of the bracket until production in commercial quantities is achieved), for leases which fail to produce commercial quantities within the bracket;

(D) Producing, or currently in compliance with the continued operation requirements of part 3480 of this chapter, for leases that began their first production of coal—

(1) On or after August 4, 1976; and

(2) After becoming subject to the diligence provisions of part 3480 of this chapter;

(E) Contained in an approved logical mining unit that is:

(1) Producing or currently in compliance with the LMU continued operation requirements or part 3480 of this chapter; and

(2) In compliance with the logical mining unit stipulations of approval under §3487.1(e) and (f) of this chapter; or

(F) Relieved of a producing obligation pursuant to paragraph (e) (1), (4), or (5) of this section.

(f) In order to qualify for a lease on acquired lands set apart for military and naval purposes, a governmental entity shall show that it produces electrical energy for sale to the public and that it is located in the state where the lands subject to the application or bid are located.

(g) Any applicant for a lease for lands in which the United States has a future interest shall submit documentation that he or she holds, in fee or by lease, the present interest in the coal deposit subject to the application.

[44 FR 42643, July 19, 1979. Redesignated at 44 FR 56340, Oct. 1, 1979, and amended at 47 FR 33150, July 30, 1982; 51 FR 43922, Dec. 5, 1986; 52 FR 416, Jan. 6, 1987; 62 FR 44370, Aug. 20, 1997]

#### § 3472.1-3 Acreage limitations.

(a)(1) No person, association, or corporation, or any subsidiary, affiliate, or person controlled by or under common control with such person, association, or corporation shall take, hold, own, or control at one time Federal coal leases, lease or lease modification applications, or bids on more than 75,000 acres in any one state and in no case on more than 150,000 acres in the United States.

(2) No person, association, or corporation holding, owning, or controlling leases, lease or lease modification applications or bids (individually or through any subsidiary, affiliate, or

person under common control) on more than 150,000 acres in the United States on November 7, 2000, shall be required to relinquish any lease or lease application held on that date. However, it shall not be permitted to hold any additional interests in any further leases or lease applications until such time as its holdings, ownership, or control of leases or applications has been reduced below 150,000 acres within the United States.

(b)(1) In computing acreage held, owned or controlled, the accountable acreage of a party holding, owning or controlling an undivided interest in a lease shall be the party's proportionate part of the total lease acreage. Any subsidiary, affiliate or person controlled by or under common control with any corporation, person or association holding, owning or controlling a Federal coal lease shall be charged with lease acreage to the same extent as such corporation, person or association. The accountable acreage of a party holding, owning or controlling an interest in a corporation or association shall be that party's proportionate part of the acreage held, owned or controlled by such corporation or association. However, no party shall be charged with its pro rata share of any acreage held, owned or controlled by any corporation or association unless that party is the beneficial owner of more than 10 percent of the stock or other instruments of ownership or control of such corporation or association.

(2) On acquired lands, if the United States owns only a fractional interest in the coal resources of the lands involved, only that part of the total acreage involved in the lease, proportionate to the extent of ownership by the United States of the coal resources, shall be charged as acreage holdings. The acreage embraced in a future interest lease is not to be charged as acreage holdings until the lease for the future interest takes effect.

[44 FR 42643, July 19, 1979. Redesignated at 44 FR 56340, Oct. 1, 1979, and amended at 47 FR 33150, July 30, 1982; 67 FR 63567, Oct. 15, 2002]

#### **§ 3472.2 Filing of qualification statements.**

##### **§ 3472.2-1 Sole party in interest statement.**

Every applicant or bidder for a lease or license to mine shall submit to the Bureau of Land Management State Office having jurisdiction over the lands in the application or subject to the bid (43 CFR subpart 1821) at the time of filing the application or bid a signed statement that the applicant is the sole party in interest in the application or bid, and the lease or license to mine, if issued. If the applicant or bidder is or will not be the sole party in interest, the applicant or bidder shall set forth the names of the other interested parties in the application or bid. A separate or joint statement shall be signed by them and by the applicant or bidder setting forth the nature and extent of the interest of each in the application or bid, the nature of the agreement between them, if oral, and a copy of such agreement if written. Such separate or joint statement of interest and written agreement, if any, or a statement of the nature of such agreement, if oral, shall accompany the application or bid. All interested parties shall furnish evidence of their qualifications to hold such interest in the lease or license to mine including a statement regarding knowledge of written consent from any qualified surface owner for the area involved (43 CFR subpart 3427).

##### **§ 3472.2-2 Contents of qualification statement.**

(a) If the applicant or bidder is an individual, he shall submit a signed statement setting forth his citizenship with each application or bid for a license to mine or lease.

(b) If the applicant or bidder is an association or partnership, the application or bid shall be accompanied by a certified copy of the articles of association or partnership, together with a statement showing (1) that the association or partnership is authorized to hold a lease or license to mine; (2) that the member or partner executing the lease or license to mine is authorized to act on behalf of the association or partnership in such matters; (3) the names and addresses of all members

**§ 3472.2-3**

owning or controlling more than 10 percent of the association or partnership and their citizenship and holdings.

(c) If the applicant or bidder for a lease or license to mine is a corporation, it shall submit statements showing:

- (1) The state of incorporation;
- (2) That the corporation is authorized to hold leases or licenses to mine;
- (3) The names of the officers authorized to act on behalf of the corporation;
- (4) The percentage of the corporation's voting stock and all of the stock owned by aliens or those having addresses outside of the United States; and
- (5) The name, address, citizenship and acreage holdings of any stockholder owning or controlling 10 percent or more of the corporate stock of any class. If more than 10 percent of the stock is owned or controlled by or on behalf of aliens, or persons who have addresses outside of the United States, the corporation shall provide their names and addresses, the amount of stock held by each such person, and to the extent known to the corporation or which can be reasonably ascertained by it, the facts as to the citizenship of each such person. Applications on behalf of a corporation executed by other than an officer named under paragraph (c)(3) of this section shall be accompanied by proof of the signatory's authority to execute the instrument. The applicant shall submit the same information as is required in the preceding paragraph for any of its corporate stockholders holding, owning or controlling 10 percent or more of its stock of any class.

(d) To qualify as a small business for the purpose of bidding on any tract to be offered as part of a special opportunity lease sale for small businesses, the bidder shall submit evidence demonstrating qualification under 13 CFR part 121.

(e) Where there is a legal guardian or trustee, the following shall be provided:

- (1) A copy of the court order or other document authorizing the guardian or trustee to act as such and to fulfill in behalf of the ward or beneficiary all obligations of the lease or other obligations arising thereunder; the person

**43 CFR Ch. II (10-1-08 Edition)**

submitting any such document shall in some manner indicate its authenticity;

(2) A statement by the guardian or trustee as to his or her citizenship and holdings (of acreage in Federal coal leases) in any capacity; i.e., individually and for the benefit of any person; and

(3) A statement by each ward and beneficiary as to his or her citizenship and holdings; if the ward or beneficiary is a minor, the statement shall be executed for the minor by the guardian or trustee, as appropriate.

(f) The Department reserves the right to request any supplementary information that is needed to accredit acreage under § 3472.1-3 of this title.

(g) Any applicant or bidder who has previously filed a qualification statement may, if it certifies that the prior statement remains complete, current and accurate, submit a serial number reference to the record and office where the prior statement is filed.

[44 FR 42643, July 19, 1979, as amended at 47 FR 33150, July 30, 1982]

**§ 3472.2-3 Signature of applicant.**

(a) Every application or bid for a lease or license to mine shall be signed by the applicant or bidder or by its attorney-in-fact. If executed by an attorney-in-fact the application or bid shall be accompanied by the power of attorney and the applicant's own statement as to citizenship and acreage holdings unless the power of attorney specifically authorizes and empowers the attorney-in-fact to make such statement or to execute all statements which may be required under these regulations.

(b) If the application or bid is signed by an attorney-in-fact or agent, it shall be accompanied by:

(1) A statement over the signature of the attorney-in-fact or agent; and

(2) A separate statement personally signed by the applicant or bidder stating whether there is any agreement or undertaking, written or oral, whereby the attorney-in-fact or agent has or is to receive any interest in the lease, if issued.

**§ 3472.2-4 Special qualifications heirs and devisees (estates).**

(a) If an applicant or bidder for a license to mine or a lease dies before the

## Bureau of Land Management, Interior

## § 3473.1-1

license to mine or lease is issued, the license or lease shall be issued: If the estate has not been probated, to the executor or administrator of the estate; if probate has been completed, or is not required, to the heirs or devisees; and if their are minor heirs or devisees, to their legal guardian or trustee.

(b) The lease or license to mine shall not issue until the following information has been filed:

(1) Where probate of the estate has not been completed:

(i) Evidence that the person who acts as executor or administrator has the authority to act in that capacity and to act on the application or bid;

(ii) Evidence that the heirs or devisees are the heirs or devisees of the deceased applicant or bidder, and are the only heirs or devisees of the deceased; and

(iii) A statement over the signature of each heir or devisee concerning citizenship and holdings.

(2) Where the executor or administrator has been discharged or no probate proceedings are required: (i) A certified copy of the will or decree of distribution, if any, and if not, a statement signed by the heirs that they are the only heirs of the applicant or bidder, and citing the provisions of the law of the deceased's last domicile showing that no probate is required; and (ii) a statement over the signature of each of the heirs or devisees with reference to citizenship and holdings, except that if the heir or devisee is a minor, the statement shall be over the signature of the guardian or trustee.

### § 3472.2-5 Special qualifications, public bodies.

(a) To qualify to bid for a lease on a tract offered for sale under § 3420.1-3 of this title, a public body shall submit:

(1) Evidence of the manner in which it is organized;

(2) Evidence that it is authorized to hold a lease;

(3) A definite plan as described in § 3420.1-3(b) to produce energy within 10 years of issuance of the prospective lease solely for its own use or for sale to its members or customers (except for short-term sales to others); and

(4) Evidence that the definite plan has been duly authorized by its governing body.

(b) To obtain a license to mine, a municipality shall submit with its application:

(1) Evidence of the manner in which it is organized;

(2) Evidence that it is authorized to hold a license to mine; and

(3) Evidence that the action proposed has been duly authorized by its governing body.

(c) To qualify to bid for a lease on a tract of acquired land set apart for military or naval purposes, a governmental entity shall submit:

(1) Evidence of the manner in which it is organized, including the State in which it is located;

(2) Evidence that it is authorized to hold a lease;

(3) Evidence that the action proposed has been duly authorized by its own governing body; and

(4) Evidence that it is producing electricity for sale to the public in the state where the lands to be leased are located.

(d) If the material required in paragraphs (a), (b), or (c) of this section has previously been filed, a reference to the serial number of the record in which it has been filed, together with a statement as to any amendments, shall be accepted.

[44 FR 42643, July 19, 1979, as amended at 47 FR 33150, July 30, 1982]

## Subpart 3473—Fees, Rentals, and Royalties

### § 3473.1 Payments.

#### § 3473.1-1 Form of remittance.

All remittances shall be by U.S. currency, postal money order or negotiable instrument payable in U.S. currency and shall be made payable to the Department of the Interior—Bureau of Land Management or the Department of the Interior—Minerals Management Service, as appropriate. In the case of payments made to the Service, such payments may also be made by electronic funds transfer.

[49 FR 11638, Mar. 27, 1984]

## **§ 3473.1-2**

### **§ 3473.1-2 Where submitted.**

(a)(1) All first-year rentals and the first-year portions of all bonuses for leases issued under Group 3400 of this title shall be paid to the Bureau of Land Management State office having jurisdiction over the lands (43 CFR subpart 1821).

(2) All second-year and subsequent rentals and deferred bonus amounts payable after the initial payment for leases shall be paid to the Service.

(b) All royalties on producing leases, all payments under leases in their minimum production period, and all advance royalties shall be paid to the Service.

[49 FR 11638, Mar. 27, 1984, as amended at 49 FR 39330, Oct. 5, 1984]

### **§ 3473.1-3 When paid.**

First year's rental for preference right leases shall be remitted at the time of filing the applications. First year's rental for competitive leases shall be payable when required by decision. Thereafter, rental for all leases shall be paid in accordance with the lease provisions.

### **§ 3473.2 Fees.**

(a) An application for a license to mine must include payment of the filing fee found in the fee schedule in §3000.12 of this chapter. BLM may waive the filing fee for applications filed by relief agencies as provided in §3440.1-1(b) of this chapter.

(b) An application for an exploration license must include payment of the filing fee found in the fee schedule in §3000.12 of this chapter.

(c) An instrument of transfer of a lease or an interest in a lease must include payment of the filing fee found in the fee schedule in §3000.12 of this chapter.

(d) BLM will charge applicants for a royalty rate reduction a processing fee on a case-by-case basis as described in §3000.11 of this chapter.

(e) BLM will charge applicants for logical mining unit formation or modification a processing fee on a case-by-case basis as described in §3000.11 of this chapter.

(f) The applicant who nominates a tract for a competitive lease sale must

## **43 CFR Ch. II (10-1-08 Edition)**

pay a processing fee on a case-by-case basis as described in §3000.11 of this chapter as modified by the provisions below. BLM will include in the sale notice under §3422.2(b)(9) of this chapter a statement of the total cost recovery fee paid to BLM by the applicant up to 30 days before the competitive lease sale. The cost recovery process for a competitive coal lease follows:

(1) The applicant nominating the tract for competitive leasing must pay the cost recovery amount before BLM will publish a notice of the competitive lease sale;

(2) Before the lease is issued:

(i) The successful bidder, if someone other than the applicant, must pay to BLM the cost recovery amount specified in the sale notice; and

(ii) The successful bidder must pay all processing costs BLM incurs after the date of the sale notice;

(3) If the successful bidder is someone other than the applicant, BLM will refund to the applicant the amount paid under paragraph (f)(1) of this section; and

(4) If there is no successful bidder, the applicant remains responsible for all processing fees.

(g) BLM will charge applicants for modification of a coal lease a processing fee on a case-by-case basis as described in §3000.11 of this chapter.

[70 FR 58876, Oct. 7, 2005]

### **§ 3473.3 Rentals and royalties.**

#### **§ 3473.3-1 Rentals.**

(a) The annual rental per acre or fraction thereof on any lease issued or readjusted after the promulgation of this subpart shall not be less than \$3. The amount of the rental will be specified in the lease.

(b) Until a lease issued before August 4, 1976, is readjusted, the rental paid for any year shall be credited against the royalties for that year.

(c) On leases issued or readjusted after August 4, 1976, rental payments shall not be credited against royalties.

(d) Rentals paid for any lease year commencing prior to the effective date of the first lease readjustment occurring after August 4, 1976, shall be credited against royalties for that year. Rentals due and payable for any lease

## Bureau of Land Management, Interior

## § 3474.2

year commencing on or after the effective date of the readjustment shall not be credited against royalties.

[44 FR 42643, July 19, 1979, as amended at 47 FR 33150, July 30, 1982]

### § 3473.3-2 Royalties.

(a)(1) A lease shall require payment of a royalty of not less than 12½ percent of the value of the coal removed from a surface mine.

(2) A lease shall require payment of a royalty of 8 percent of the value of coal removed from an underground mine.

(3) The value of coal removed from a mine is defined for royalty purposes in § 3483.4 of this title.

(b) The royalty rates specified in paragraph (a) of this section shall be applied to new leases at the time of issuance and to previously issued leases at the time of the next scheduled readjustment of the lease.

(c) The authorized officer shall have the discretion, upon the request of the lessee, to authorize the payment of an advance royalty in lieu of continued operation for any particular year in accordance with § 3485.2 of this title.

(d) An overriding royalty interest, production payment or similar interest that exceeds 50 percent of royalty first payable to the United States under the Federal lease, or when added to any other overriding royalty interest exceeds that percentage, except those created in order to finance a mine, shall not be created by a Federal lease transfer or surface owner consent. However, when an interest in a Federal lease or operating agreement is transferred, the transferor may retain an overriding royalty in excess of the above limitation if he/she shows that he/she has made substantial investments for improvements directly related to exploration, development and mining on the lands covered by the transfer that would justify a higher payment.

(e) The Secretary, whenever he/she determines it necessary to promote development or finds that the lease cannot be successfully operated under its terms, may waive, suspend or reduce the rental, or reduce the royalty but not advance royalty, on an entire leasehold, or on any deposit, tract or portion thereof, except that in no case

shall the royalty be reduced to zero percent. An application for any of these benefits shall be filed with the authorized officer in accordance with part 3480 of this title.

[44 FR 42643, July 19, 1979, as amended at 47 FR 33151, July 30, 1982; 50 FR 8627, Mar. 4, 1985; 55 FR 2664, Jan. 26, 1990]

### § 3473.4 Suspension of operations, production, and payment obligations.

(a) Application by a lessee for relief from any operating and producing requirements of a lease; shall be filed in triplicate in the office of the Mining Supervisor in accordance with 43 CFR part 3480.

(b) The term of any lease shall be extended by adding thereto any period of suspension of all operations and production during such term in accordance with any direction or assent of the Mining Supervisor.

[44 FR 42643, July 19, 1979, as amended at 47 FR 33151, July 30, 1982]

## Subpart 3474—Bonds

### § 3474.1 Bonding requirements.

(a) Before a lease may be issued, one of the following forms of lease bond shall be furnished:

(1) Corporate surety bonds;

(2) Cash bond; or

(3) Personal lease bonds secured by negotiable U.S. bonds of a par value equal to the amount of the required surety bond, together with a power of attorney executed on a form approved by the Director.

(b) The applicant or bidder shall file the lease bond in the proper office within 30 days of receiving notice. The lease bond shall be furnished on a form approved by the Director.

(c) The bonding obligation for a new lease may be met by an adjustment to an existing LMU bond covering the other leases within the same LMU.

[44 FR 42643, July 19, 1979, as amended at 47 FR 33151, July 30, 1982]

### § 3474.2 Type of bond required.

(a) A lease bond for each lease, conditioned upon compliance with all terms and conditions of the lease, shall be furnished in the amount determined by

### **§ 3474.3**

the authorized officer. Except as provided in §3474.3(b) of this title, that bond shall not cover reclamation within a permit area.

(b) For exploration licenses, a bond shall be furnished in accordance with §3410.3-4 of this title.

(c)(1) Upon approval of an LMU including more than 1 Federal lease, the lessee may, in lieu of individual lease bonds, furnish and maintain an LMU bond covering all of the terms and conditions of every Federal lease within the LMU, except for reclamation within the mining permit area unless the condition in §3474.3(b) of this title applies. All LMU bonds shall be furnished in the amount recommended by the Mining Supervisor.

(2) When an LMU is terminated, the LMU bond shall terminate. Individual leases remaining from the LMU shall be covered by lease bonds in the manner prescribed by the Mining Supervisor.

[44 FR 56340, Oct. 1, 1979, as amended at 47 FR 33151, July 30, 1982]

### **§ 3474.3 Bond conversions.**

(a) The authorized officer shall notify those leaseholders who have nationwide or statewide bonds at the time of issuance of this subpart of the requirement to secure a separate lease bond for each lease in the amount determined by the authorized officer to be proper and necessary.

(b)(1) In setting or adjusting individual lease bond amounts, the authorized officer shall assure that the lease bond covers reclamation within a permit area where the Surface Mining Officer, because of the absence of a cooperative agreement governing Federal lands within that state, notifies the authorized officer that the lease bond should cover that reclamation.

(2) After consultation with the Surface Mining Officer, the authorized officer may release the amount of any outstanding bond which is related to, and is not necessary to secure, the performance of reclamation within a permit area.

[44 FR 42643, July 19, 1979, as amended at 47 FR 33151, July 30, 1982]

## **43 CFR Ch. II (10-1-08 Edition)**

### **§ 3474.4 Qualified sureties.**

A list of companies holding certificates of authority from the Secretary of the Treasury under the Act of July 30, 1947 (6 U.S.C. 6-14) as acceptable sureties on Federal bonds is published annually in the FEDERAL REGISTER.

### **§ 3474.5 Default.**

When the surety makes payment to the Government of any indebtedness due under a lease, the face amount of the surety bond and the surety's liability thereunder shall be reduced by the amount of such payment.

### **§ 3474.6 Termination of the period of liability.**

The authorized officer shall not consent to termination of the period of liability under the lease bond unless an acceptable substitute bond has been filed or until all terms and conditions of the lease have been fulfilled.

## **Subpart 3475—Lease Terms**

### **§ 3475.1 Lease form.**

Leases shall be issued on a standard form approved by the Director. The authorized officer may modify those provisions of the standard form which are not required by statute or regulations and may add such additional stipulations and conditions as he/she deems appropriate.

[47 FR 33151, July 30, 1982]

### **§ 3475.2 Duration of leases.**

Leases shall be issued for a period of 20 years and so long thereafter as the condition of continued operation is met. If the condition of continued operation is not met the lease shall be cancelled as provided in §3452.2 of this title.

[44 FR 42643, July 19, 1979. Redesignated at 47 FR 33151, July 30, 1982]

### **§ 3475.3 Dating of leases.**

(a) Leases will be dated and made effective the first day of the month following the date signed by the authorized officer. However, upon receipt of a prior written request, the authorized officer may date a lease to be effective

on the first day of the month in which it is signed.

(b) Future interest leases shall become effective on the date of vesting of title to the minerals in the United States as stated in the lease.

[44 FR 42643, July 19, 1979. Redesignated at 47 FR 33151, July 30, 1982]

#### **§ 3475.4 Land description.**

Compliance with § 3471.1 of this title is required.

[44 FR 42643, July 19, 1979. Redesignated at 47 FR 33151, July 30, 1982]

#### **§ 3475.5 Diligent development and continued operation.**

In accordance with part 3480 of this title, each lease shall require:

- (a) Diligent development; and
- (b) Either (1) continued operation except when operations under the lease are interrupted by strikes, the elements or casualties not attributable to the lessee, or (2) in lieu thereof, when the Secretary determines that the public interest will be served, payment of an advanced royalty.

[47 FR 33151, July 30, 1982, as amended at 50 FR 8627, Mar. 4, 1985]

#### **§ 3475.6 Logical mining unit.**

(a) Criteria for approving or directing establishment of an LMU shall be developed and applied in accordance with § 3487.1 of this title.

(b) When a lease is included in an LMU with other Federal leases or with interests in non-Federal coal deposits, the terms and conditions of the Federal lease or leases shall be amended so that they are consistent with or are superseded by the requirements imposed on the LMU of which it has become a part.

(c) The holder of any lease issued or readjusted between May 7, 1976, and the effective date of this regulation, whose lease provides by its own terms that it is considered to be an LMU, may request removal of this provision from any such lease. Such request shall be submitted to the authorized officer.

[47 FR 33151, July 30, 1982, as amended at 50 FR 8627, Mar. 4, 1985]

## **PART 3480—COAL EXPLORATION AND MINING OPERATIONS RULES**

NOTE1: The information collection requirements contained in 43 CFR part 3480 which require the filing of forms have been approved by the Office of Management and Budget (OMB) under 44 U.S.C. 3507. The Coal Production and Royalty Report form in 30 CFR 211.62(d)(1), U.S. Geological Survey Form 9-373A, has been approved by OMB under 44 U.S.C. 3507 and assigned clearance number 1028-0001.

The information is being collected for Federal royalty accounting purposes. The information will be used to permit accounting and auditing of royalties submitted by the operators/lessees of Federal coal leases. The obligation to respond is mandatory for all operators/lessees of Federal coal leases. For nonproducing Federal leases, the report is required on an annual basis. For producing Federal leases, the report is required monthly or quarterly as specified in the Federal lease.

The information collection requirements contained at §§ 3481.1, 3481.2, 3482.2, 3482.3, 3483.3, 3483.4, 3485.1, 3485.2, 3486.3 and 3487.1 of this title have been approved by OMB under 44 U.S.C. 3507 and assigned clearance number 1028-0042. The information may be collected from some operators/lessees to either provide data so that proposed operations may be approved or to enable the monitoring of compliance with approvals already granted. The information will be used to grant approval to begin or alter operations or to allow operations to continue. The obligation to respond is required to obtain the benefit under the Federal lease.

NOTE 2: There are many leases and agreements currently in effect, and which will remain in effect, involving Federal coal leases which specifically refer to the United States Geological Survey, USGS, Minerals Management Service, MMS, or Conservation Division. These leases and agreements also often specifically refer to various officers such as Supervisor, Conservation Manager, Deputy Conservation Manager, Minerals Manager and Deputy Minerals Manager. In addition, many leases and agreements specifically refer to 30 CFR part 211 or specific sections thereof. Those references shall now be read to refer to 43 CFR part 3480 or to the appropriate redesignated section thereof.

SOURCE: 47 FR 33179, July 30, 1982, unless otherwise noted. Redesignated at 48 FR 41589, Sept. 16, 1983.

### Subpart 3480—Coal Exploration and Mining Operations Rules: General

#### § 3480.0-1 Purpose.

The purposes of the rules of this part are to ensure orderly and efficient development, mining, preparation, and handling operations for Federal coal; ensure production practices that prevent wasting or loss of coal or other resources; avoid unnecessary damage to coal-bearing or mineral-bearing formations; ensure MER of Federal coal; ensure that operations meet requirements for diligent development and continued operation; ensure resource recovery and protection plans are submitted and approved in compliance with MLA; ensure effective and reasonable regulation of surface and underground coal mining operations; require an accurate record and accounting of all coal produced; ensure efficient, environmentally sound exploration and mining operations; and eliminate duplication of efforts by the Minerals Management Service (MMS), OSM, and the States in the Federal coal program.

#### § 3480.0-4 Scope.

The rules of this part shall govern operations for the exploration, development, and production of Federal coal under Federal coal leases, licenses, and permits, regardless of surface ownership, pursuant to the Mineral Leasing Act of February 25, 1920, as amended (MLA), and in conjunction with the rules at 43 CFR Group 3400 and 30 CFR Chapter VII. Included are provisions relating to resource recovery and protection, royalties, diligent development, continued operation, maximum economic recovery (MER), and logical mining units (LMU's). Except as otherwise provided in 25 CFR Chapter I or Indian lands leases, these rules do not apply to operations on Indian lands.

The provisions in these rules relating to advance royalty, diligent development, continued operation, MER, and LMU's shall not apply to Indian lands, leases and permits. The rules governing exploration licenses for unleased Federal coal are codified at 43 CFR part 3410. Until final rulemaking is promulgated and implemented by the Office of Surface Mining Reclamation and Enforcement (OSM) regarding the initial Federal lands Programs, the initial Federal lands Program rules codified at 30 CFR part 211 (1981) shall remain in effect.

#### § 3480.0-5 Definitions.

(a) As used in the rules of this part, the following terms shall have the following meanings:

(1) *Advance royalty* means a payment under a Federal lease in advance of actual production when authorized by the authorized officer to be made in lieu of continued operation. Payments made under the minimum production clause, in lieu of actual production from a Federal lease issued prior to August 4, 1976, and not readjusted after August 4, 1976, are not advance royalty under the provisions at 43 CFR 3483.4

(2) *Assistant Director for Solid Leasable Minerals* means Assistant Director for Solid Leasable Minerals, Bureau of Land Management;

(3) *Assistant Secretary for Land and Water Resources* means the Assistant Secretary for Land and Water Resources, Department of the Interior;

(4) *Chief, Division of Solid Mineral Operations* means the Chief, Division of Solid Minerals Operations, Bureau of Land Management;

(5) *Coal reserve base* shall be determined using existing published or unpublished information, or any combination thereof, and means the estimated tons of Federal coal in place contained in beds of:

(i) Metallurgical or metallurgical-blend coal 12 inches or more thick; anthracite, semianthracite, bituminous, and subbituminous coal 28 inches or more thick; and lignite 60 inches or more thick to a depth of 500 feet below the lowest surface elevation on the Federal lease.

(ii) Metallurgical and metallurgical-blend coal 24 inches or more thick; an-

thracite, semianthracite, bituminous and subbituminous coal 48 inches or more thick; and lignite 84 inches or more thick occurring from 500 to 3,000 feet below the lowest surface elevation on the Federal lease.

(iii) Any thinner bed of metallurgical, anthracite, semianthracite, bituminous, and subbituminous coal and lignite at any horizon above 3,000 feet below the lowest surface elevation on the Federal lease, which is currently being mined or for which there is evidence that such coal bed could be mined commercially at this time.

(iv) Any coal at a depth greater than 3,000 feet where mining actually is to occur.

(6) *Commercial quantities* means 1 percent of the recoverable coal reserves or LMU recoverable coal reserves.

(7) *Contiguous* means having at least one point in common, including cornering tracts. Intervening physical separations such as burn or outcrop lines and intervening legal separations such as rights-of-way do not destroy contiguity as long as legal subdivisions have at least one point in common.

(8) *Continued operation* means the production of not less than commercial quantities of recoverable coal reserves in each of the first 2 continued operation years following the achievement of diligent development and an average amount of not less than commercial quantities of recoverable coal reserves per continued operation year thereafter, computed on a 3-year basis consisting of the continued operation year in question and the 2 preceding continued operation years.

(9) *Continued operation year* means the 12-month period beginning with the commencement of the first royalty reporting period following the date that diligent development is achieved and each 12-month period thereafter, except as suspended in accordance with 43 FR 3483.3(b).

(10) *Deputy Director for Energy and Mineral Resources* means the Deputy Director for Energy and Mineral Resources, Bureau of Land Management;

(11) *Development* means activities conducted by an operator/lessee, after approval of a permit application package, to prepare a mine for commercial production.

(12) *Diligent development* means the production of recoverable coal reserves in commercial quantities prior to the end of the diligent development period.

(13) *Diligent development period* means a 10-year period which:

(i) For Federal leases shall begin on either—

(A) The effective date of the Federal lease for all Federal leases issued after August 4, 1976; or

(B) The effective date of the first lease readjustment after August 4, 1976, for Federal leases issued prior to August 4, 1976; and

(ii) For LMU's shall begin on either—

(A) The effective approval date of the LMU, if the LMU contains a Federal lease issued prior to August 4, 1976, but not readjusted after August 4, 1976, prior to LMU approval; or

(B) The effective date of the most recent Federal lease issuance or readjustment prior to LMU approval, for any LMU that does not contain a lease issued prior to August 4, 1976, that has not been readjusted after August 4, 1976, prior to LMU approval.

The diligent development period shall terminate at the end of the royalty reporting period in which the production of recoverable coal reserves in commercial quantities was achieved, or at the end of 10 years, whichever occurs first.

(14) *Exploration* means drilling, excavating, and geological, geophysical or geochemical surveying operations designed to obtain detailed data on the physical and chemical characteristics of Federal coal and its environment including the strata below the Federal coal, overburden, and strata above the Federal coal, and the hydrologic conditions associated with the Federal coal.

(15) *Exploration plan* means a detailed plan to conduct exploration; it shows the location and type of exploration to be conducted, environmental protection procedures, present and proposed roads, and reclamation and abandonment procedures to be followed upon completion of operations.

(16) *General mining order* means any numbered formal order, issued by the State Director, which is published in the FEDERAL REGISTER after opportunity for public comment. General Mining Orders apply to coal exploration, mining, and related operations.

(17) *Gross value*, for the purpose of royalty calculations, means the unit sale or contract price times the number of units sold, subject to the provisions at §3485.2(g) of this title under which gross value is determined.

(18) *License* means a license to mine coal pursuant to the provisions of 43 CFR part 3440, or an exploration license issued pursuant to the provisions of 43 CFR part 3410.

(19) *Logical mining unit (LMU)* means an area of land in which the recoverable coal reserves can be developed in an efficient, economical, and orderly manner as a unit with due regard to conservation of recoverable coal reserves and other resources. An LMU may consist of one or more Federal leases and may include intervening or adjacent lands in which the United States does not own the coal. All lands in an LMU shall be under the effective control of a single operator/lessee, be able to be developed and operated as a single operation, and be contiguous.

(20) *Logical mining unit (LMU) recoverable coal reserves* means the sum of estimated Federal and non-Federal recoverable coal reserves in the LMU.

(21) *Maximum economic recovery (MER)* means that, based on standard industry operating practices, all profitable portions of a leased Federal coal deposit must be mined. At the times of MER determinations, consideration will be given to: existing proven technology; commercially available and economically feasible equipment; coal quality, quantity, and marketability; safety, exploration, operating, processing, and transportation costs; and compliance with applicable laws and regulations. The requirement of MER does not restrict the authority of the authorized officer to ensure the conservation of the recoverable coal reserves and other resources and to prevent the wasting of coal.

(22) *Methods of operation* means the methods and manner, described in an exploration or resource recovery and protection plan, by which exploration, development, or mining activities are to be performed by the operator/lessee.

(23) *Minable reserve base* means that portion of the coal reserve base which is commercially minable and includes

all coal that will be left, such as in pillars, fenders, or property barriers. Other areas where mining is not permissible (including, but not limited to, areas classified as unsuitable for coal mining operations) shall be excluded from the minable reserve base.

(24) *Mine* means an underground or surface excavation or series of excavations and the surface or underground support facilities that contribute directly or indirectly to mining, production, preparation, and handling of coal.

(25) *MLA* means the Act of February 25, 1920, as amended, commonly referred to as the Mineral Leasing Act and codified at 30 U.S.C. 181, *et seq.*, and the Mineral Leasing Act for Acquired Lands, as amended, 30 U.S.C. 351-359.

(26) *Notice of availability* means formal notification by the authorized officer to: appropriate Federal, State, and local government agencies; to the surface and mineral owners; and to the public in accordance with 43 CFR 3481.2.

(27) *Operator/lessee* means lessee, licensee, and/or one conducting operations on a Federal lease or license under a written contract or written agreement with the lessee or licensee.

(28) *Permanent abandonment of exploration operations* means the completion of all activities conducted under an approved exploration plan, including plugging of all drill holes, submission of required records, and reclamation of all disturbed surfaces.

(29) *Permanent abandonment of mining operations* means the completion of all development, production, and resource recovery and protection requirements conducted under an approved resource recovery and protection plan, including satisfaction of all Federal rental and royalty requirements.

(30) *Preparation* means any physical or chemical treatment to prepare coal for market. Treatment may include crushing, sizing, drying, mixing, or other processing, and removal of noncoal waste such as bone or other impurities to enhance the quality and therefore the value of the coal.

(31) *Production* means mining of recoverable coal reserves and/or commercial byproducts from a mine using surface, underground, auger, or *in situ* methods.

(32) *Recoverable coal reserves* means the minable reserve base excluding all coal that will be left, such as in pillars, fenders, and property barriers.

(33) *Resource recovery and protection* includes practices to: recover efficiently the recoverable coal reserves subject to these rules; avoid wasting or loss of coal or other resources; prevent damage to or degradation of coal-bearing or mineral-bearing formations; ensure MER of the Federal coal; and ensure that other resources are protected during exploration, development, and mining, and upon abandonment.

(34) *Resource recovery and protection plan* means a plan showing that the proposed operation meets the requirements of MLA for development, production, resource recovery and protection, diligent development, continued operation, MER, and the rules of this part for the life-of-the-mine.

(35) *State Director* means an employee of the Bureau of Land Management who has been designated as the chief administrative officer of one of the Bureau's 12 administrative areas designated as "States".

(36) *Subsidence* means a lowering of surface elevations over an underground mine caused by loss of support and subsequent settling or caving of strata lying above the mine.

(b) The following shall have the meanings as defined at 30 CFR Chapter VII:

*Alluvial valley floors*  
*Federal Lands Program*  
*Ground water*  
*Indian lands*  
*Overburden*  
*Permit*  
*Permit application*  
*Permit application package*  
*Permit area*  
*Regulatory authority*  
*Roads*  
*Spoil*

[47 FR 33179, July 30, 1982; 47 FR 53366, Nov. 26, 1982. Redesignated and amended at 48 FR 41589, 41590, Sept. 16, 1983]

#### § 3480.0-6 Responsibilities.

(a) *Responsibilities of other Federal Agencies*—(1) *Office of Surface Mining Reclamation and Enforcement*. The responsibility for administration of the

Surface Mining Control and Reclamation Act of 1977 (SMCRA) (30 U.S.C. 1201, *et seq.*) is vested in OSM.

(2) *Mine Safety and Health Administration.* The responsibility for enforcement of the Federal Coal Mine Health and Safety Act of 1969, as amended (83 Stat. 742), and the coal mine health and safety rules contained in Chapter I of this title are vested in the Mine Safety and Health Administration, Department of Labor.

(3) *Bureau of Land Management.* The responsibility for the issuance of exploration licenses for unleased Federal coal, the issuance of licenses to mine, and the issuance, readjustment, modification, termination, cancellation, and/or approval of transfers of Federal coal leases pursuant to MLA, as amended, is vested in the Bureau of Land Management.

(b) The BLM has the general responsibility to administer MLA with respect to coal mining, production, and resource recovery and protection operations on Federal coal leases and licenses, and to supervise exploration operations for Federal coal.

(c) Subject to the supervisory authority of the Secretary, the rules of this part shall be administered by BLM through the Director; Deputy Director for Energy and Mineral Resources; Chief, Division of Solid Mineral Operations; State Director and authorized officer.

(d) The authorized officer is empowered to oversee exploration, development, production, resource recovery and protection, diligent development, continued operation, preparation, handling, product verification, and abandonment operations subject to the rules of this part, and shall be responsible for the following:

(1) *Exploration plans.* Approve, disapprove, approve upon condition(s), or require modification to exploration plans for Federal coal.

(2) *Resource recovery and protection plans.* Recommend to the Assistant Secretary for Energy and Minerals the approval, disapproval, or approval upon condition(s) of resource recovery and protection plans.

(3) *LMU applications.* Approve, disapprove, or approve upon condition(s) LMU applications or modifications

thereto; direct the establishment of LMU's in the interest of conservation of recoverable coal reserves and other resources; conduct public hearings on LMU applications, as appropriate, recommend amendments to Federal lease terms when determined necessary to ensure consistency with LMU stipulations; monitor and ensure compliance with LMU stipulations and the rules of this part; and require reports and information for the establishment of an LMU.

(4) *Inspection of operations.* Examine as frequently as necessary, but at least quarterly, federally leased or licensed lands where operations for exploration, development, production, preparation, and handling of coal are conducted or are to be conducted; inspect such operations for product verification, resource recovery and protection, MER, diligent development and continued operation; inspect such operations for the purpose of determining whether wasting or degradation of other resources or damage to formations and deposits or nonmineral resources affected by the operations is being avoided or minimized; and determine whether there is compliance with all provisions of applicable laws, rules, and orders, all terms and conditions of Federal leases and licenses, and all requirements of approved exploration or resource recovery and protection plans.

(5) *Compliance.* Require operators/lessees to conduct operations subject to the rules of this part in compliance with all provisions of applicable laws, rules, and orders, all terms and conditions of Federal leases and licenses under MLA requirements, and approved exploration or resource recovery and protection plans for requirements of production, development, resource recovery and protection, MER, diligent development and continued operation upon commencement of production.

(6) *Waiver, suspension, or reduction of rentals, or reduction of royalties.* Receive and act on applications for waiver, suspension, or reduction of rentals, and receive and act on applications for reduction of royalties, but not advance royalty, filed pursuant to the rules of this part.

(7) *Extensions or suspensions.* Receive and act on applications for extensions

or suspensions filed in accordance with 43 CFR 3483.2 and, when appropriate, terminate extensions or suspensions that have been granted, provided that approval of an extension or a suspension shall not preclude the regulatory authority from requiring the operator/lessee to continue to comply with the reclamation requirements of 30 CFR Chapter VII, Subchapter K, or an approved State program.

(8) *Cessation and abandonment.* Upon receipt of notice of proposed abandonment or upon relinquishment of a Federal lease, in accordance with 43 CFR 3452.1-2, or Federal license, in accordance with 43 CFR 3410.3-1(d), the authorized officer shall conduct an inspection to determine whether the applicable exploration, development, production, resource recovery and protection, and abandonment requirements of the Federal lease or license have been met. Relinquishment or abandonment of a Federal lease shall not preclude the regulatory authority from requiring the operator/lessee to comply with the reclamation requirements of 30 CFR Chapter VII, Subchapter K, or an approved State program.

(9) *Exploration drill holes.* Prescribe or approve the methods for protecting coal-bearing formations from damage or contamination that might occur as a result of any holes drilled to, or through, the coal-bearing formations for any purpose under an approved exploration plan.

(10) *Trespass.* Report to the responsible officer of the surface managing agency, with a copy to the regulatory authority, any trespass on Federal lands that involves exploration activities or removal of unleased Federal coal, determine the quantity and quality of coal removed, and recommend the amount of trespass damages.

(11) *Water and air quality.* Inspect exploration operations to determine compliance with air and surface and ground water pollution control measures required by Federal statutes as implemented by the terms and conditions of applicable Federal leases, licenses or approved exploration plans, and promptly notify appropriate representatives of the regulatory authority and Federal Agencies in the event of any noncompliance.

(12) *Implementation of rules.* Issue General Mining Orders and other orders for enforcement, make determinations, and grant consents and approvals as necessary to implement or ensure compliance with the rules of this part. Any oral orders, approvals, or consents shall be promptly confirmed in writing.

(13) *Lease bonds.* (i) Determine whether the total amount of Federal lease bond with respect to operations under the rules of this part is adequate at all times to satisfy the reclamation requirements of the exploration plan.

(ii) Determine whether the total amount of any bond furnished with respect to operations subject to the rules of this part is at all times adequate to satisfy the requirements of the Federal lease or license relating to exploration, development, production, resource recovery and protection, and shall determine if the bond amount is adequate to satisfy any payments of rentals on producing Federal leases and payments of Federal royalties.

(iii) Notify the responsible officer of the surface managing agency of determinations under (c)(13) (i) and (ii) of this section.

[47 FR 33179, July 30, 1982. Redesignated and amended at 48 FR 41589, 41590, Sept. 16, 1983]

## Subpart 3481—General Provisions

### § 3481.1 General obligations of the operator/lessee.

(a) The operator/lessee shall conduct exploration activities, reclamation, and abandonment of exploration operations for Federal coal pursuant to the performance standards of the rules of this part, applicable requirements of 30 CFR 815.15 (OSM permanent performance standards for coal exploration) or an approved State program, any Federal lease or license terms and/or conditions, the requirements of the approved exploration plan, and orders issued by the authorized officer.

(b) The operator/lessee shall conduct surface and underground coal mining operations involving development, production, resource recovery and protection, and preparation and handling of coal in accordance with the rules of this part, terms and conditions of the Federal leases or licenses, the approved resource recovery and protection plan,

and any orders issued by the authorized officer.

(c) The operator/lessee shall prevent wasting of coal and other resources during exploration, development, and production and shall adequately protect the recoverable coal reserves and other resources upon abandonment.

(d) The operator/lessee shall immediately report to the authorized officer any conditions or accidents causing severe injury or loss of life that could affect mining operations conducted under the resource recovery and protection plan or threaten significant loss of recoverable coal reserves or damage to the mine, the lands, or other resources, including, but not limited to, fires, bumps, squeezes, highwall caving, landslides, inundation of mine with water, and gas outbursts, including corrective action initiated or recommended. Within 30 days after such accident, the operator/lessee shall submit a detailed report of damage caused by such accident and of the corrective action taken.

(e) The principal point of contact for the operator/lessee with respect to any requirement of the rules of this part shall be the authorized officer. All reports, plans, or other information required by the rules of this part shall be submitted to the authorized officer.

(f) The operator/lessee shall provide the authorized officer free access to the Federal premises.

[47 FR 33179, July 30, 1982. Redesignated and amended at 48 FR 41589, 41590, Sept. 16, 1983]

**§ 3481.2 Procedures and public participation.**

(a) *Written findings.* All major decisions and determinations of the State Director and District Manager shall be in writing; shall set forth with reasonable detail the facts and rationale upon which such decisions or determinations are based; and shall be available for public inspection, pursuant to § 3481.3 of this title, during normal business hours at the appropriate office.

(b) *Logical mining units (LMU's)*—(1) *Availability of LMU proposals.* Applications for the approval of an LMU or modification thereto submitted under § 3487.1 of this title, or a proposal by the authorized officer to establish an LMU, shall be available for public in-

spection, pursuant to § 3481.3 of this title, in the office of the authorized officer. A notice of the availability of any proposed LMU or modification thereto shall be prepared immediately by the authorized officer, promptly posted at his office, and mailed to the surface and coal owners, if other than the United States; appropriate State and Federal Agencies; and the clerk or other appropriate officer of the county in which the proposed LMU is located. The notice will be posted or published in accordance with the procedures of such offices. The notice shall be submitted by the authorized officer to a local newspaper of general circulation in the locality of the proposed LMU for publication at least once a week for 2 weeks consecutively.

(2) *Notice of proposed decision.* Prior to the final approval or establishment of any LMU, the authorized officer shall have the proposed decision published in a local newspaper of general circulation in the locality of the proposed LMU at least once a week for 2 weeks consecutively and shall not approve the application for at least 30 days after the first publication of the proposed decision. Such notice may be published concurrently with the notice of availability.

(3) *Public participation.* A public hearing shall be conducted upon the receipt by the authorized officer of a written request for a hearing from any person having a direct interest which is or may be affected adversely by approval of the proposed LMU, provided that the written request is received within 30 days after the first publication of the notice of proposed decision in a newspaper of general circulation in the locality of the proposed LMU. A complete transcript of any such public hearing, including any written comments submitted for the record, shall be kept and made available to the public during normal business hours at the office of the authorized officer that held the hearing, and shall be furnished at cost to any interested party. In making any decision or taking any action subsequent to such public hearing, the authorized officer shall take into account all testimony presented at the public hearing.

## Bureau of Land Management, Interior

## § 3481.4-4

### § 3481.3 Confidentiality.

(a) Information on file with MMS obtained pursuant to the rules of this part or part 3400 of this title shall be open for public inspection and copying during regular office hours upon a written request, pursuant to rules at 43 CFR part 2, except that:

(1) Information such as geologic and geophysical data and maps pertaining to Federal recoverable coal reserves obtained from exploration licensees under the rules of this part or part 3410 of this title shall not be disclosed except as provided in 43 CFR 2.20(c).

(2) Information obtained from an operator/lessee under the rules of this part that constitutes trade secrets and commercial or financial information which is privileged or confidential or other information that may be withheld under the Freedom of Information Act (5 U.S.C. 552(b)), such as geologic and geophysical data and maps, shall not be available for public inspection or made public or disclosed without the consent of the operator/lessee.

(3) Upon termination of a Federal lease, such geologic and geophysical data and maps shall be made available to the public.

(4) Upon issuance or readjustment of a Federal lease, the estimated Federal recoverable coal reserves figure shall not be made available to the public unless such a release has been included as a Federal lease term.

(b) Information requested by the operator/lessee to be kept confidential under this section shall be clearly marked "CONFIDENTIAL INFORMATION." All pages so marked shall be physically separated from other portions of the submitted materials. All information not marked "CONFIDENTIAL INFORMATION" will be available for public inspection, except as stated at paragraph (a) of this section for data submitted prior to August 30, 1982.

[47 FR 33179, July 30, 1982; 47 FR 53366, Nov. 26, 1982. Redesignated and amended at 48 FR 41589, 41590, Sept. 16, 1983]

### § 3481.4 Temporary interruption in coal severance.

#### § 3481.4-1 Can I temporarily interrupt coal severance and still be qualified as producing?

Yes, a temporary interruption in coal severance allows you (the lessee/operator) to halt the extraction of coal for a limited period of time without jeopardizing your qualifications under section (2)(a)(2)(A) of MLA to receive additional leases. During the period of a temporary interruption in coal severance, BLM still considers you lease or LMU to be producing so as not to preclude you from receiving a new or transferred lease.

[62 FR 44370, Aug. 20, 1997]

#### § 3481.4-2 What are some examples of circumstances that qualify for a temporary interruption of coal severance?

(a) Movement, failure, or repair of major equipment, such as draglines or longwalls; overburden removal; adverse weather; employee absences;

(b) Inability to sever coal due to orders issued by governmental authorities for cessation or relocation of the coal severance operations; and

(c) Inability to sell or distribute coal severed from the lease or LMU out of or away from the lease or LMU.

[62 FR 44370, Aug. 20, 1997]

#### § 3481.4-3 Does a temporary interruption in coal severance affect the diligence requirements applicable to my lease or LMU?

No, a temporary interruption in coal severance covered by §§ 3481.4-1 to 3481.4-4 does not change the diligence requirements of subpart 3483 applicable to your lease or LMU.

[62 FR 44370, Aug. 20, 1997]

#### § 3481.4-4 What is the aggregate amount of time I can temporarily interrupt coal severance and have BLM consider my lease or LMU producing?

(a) If you (the lessee/operator) want BLM to consider your lease or LMU to be producing, the aggregate of all temporary interruptions in coal severance from your lease or LMU must not exceed 1 year in the 5-consecutive-year

## § 3482.1

period immediately preceding the date of BLM's determination of lessee qualifications under §3472.1-2 of this chapter.

(b) BLM will not count toward the aggregate interruption limit described in paragraph (a) of this section:

(1) Any interruption in coal severance that is 14 days or less in duration;

(2) Any suspension granted under §3483.3 of this part; and

(3) Any BLM-approved suspension of the requirements of §3472.1-2(e)(1) of this part for reasons of strikes, the elements, or casualties not attributable to the operator/lessee before diligent development is achieved.

[62 FR 44370, Aug. 20, 1997]

## Subpart 3482—Exploration and Resource Recovery and Protection Plans

### §3482.1 Exploration and resource recovery and protection plans.

(a) *Exploration plans.* For background and application procedures for exploration licenses for unleased Federal coal, see 43 CFR part 3410. For background and application procedures for exploration for Federal coal within an approved permit area after mining operations have commenced, see 30 CFR Chapter VII. For any other exploration for Federal coal prior to commencement of mining operations, the following rules apply:

(1) Except for casual use, before conducting any exploration operations on federally leased or licensed lands, the operator/lessee shall submit an exploration plan to and obtain approval from the authorized officer. Casual use, as used in this paragraph, means activities which do not cause appreciable surface disturbance or damage to lands or other resources and improvements. Casual use does not include use of heavy equipment or explosives or vehicular movement off established roads and trails.

(2) The operator/lessee shall submit five copies of exploration plans to the authorized officer. Exploration plans shall be consistent with and responsive to the requirements of the Federal lease or license for the protection of recoverable coal reserves and other re-

## 43 CFR Ch. II (10-1-08 Edition)

sources and for the reclamation of the surface of the lands affected by the operations. The exploration plan shall show that reclamation is an integral part of the proposed operations and that reclamation will progress as contemporaneously as practicable with such operations.

(3) Exploration plans shall contain all of the following:

(i) The name, address, and telephone number of the applicant, and, if applicable, the operator/lessee of record.

(ii) The name, address, and telephone number of the representative of the applicant who will be present during and be responsible for conducting the exploration.

(iii) A narrative description of the proposed exploration area, cross-referenced to the map required under paragraph (a)(3)(viii) of this section, including applicable Federal lease and license serial numbers; surface topography; geologic, surface water, and other physical features; vegetative cover; endangered or threatened species listed pursuant to the Endangered Species Act of 1973 (16 U.S.C. 1531, *et seq.*); districts, sites, buildings, structures, or objects listed on, or eligible for listing on, the National Register of Historic Places; and known cultural or archeological resources located within the proposed exploration area.

(iv) A narrative description of the methods to be used to conduct coal exploration, reclamation, and abandonment of operations including, but not limited to—

(A) The types, sizes, numbers, capacity, and uses of equipment for drilling and blasting, and road or other access route construction;

(B) Excavated earth- or debris-disposal activities;

(C) The proposed method for plugging drill holes;

(D) Estimated size and depth of drill holes, trenches, and test pits; and,

(E) Plans for transfer and modification of exploration drill holes to be used as surveillance, monitoring, or water wells.

(v) An estimated timetable for conducting and completing each phase of the exploration, drilling, and reclamation.

(vi) The estimated amounts of coal to be removed during exploration, a description of the method to be used to determine those amounts, and the proposed use of the coal removed.

(vii) A description of the measures to be used during exploration for Federal coal to comply with the performance standards for exploration (§3484.1(a) of this title) and applicable requirements of 30 CFR 815.15 or an approved State program.

(viii) A map at a scale of 1:24,000 or larger showing the areas of land to be affected by the proposed exploration and reclamation. The map shall show existing roads, occupied dwellings, and pipelines; proposed location of trenches, roads, and other access routes and structures to be constructed; applicable Federal lease and license boundaries; the location of land excavations to be conducted; coal exploratory holes to be drilled or altered; earth- or debris-disposal areas; existing bodies of surface water; and topographic and drainage features.

(ix) The name and address of the owner of record of the surface land, if other than the United States. If the surface is owned by a person other than the applicant or if the Federal coal is leased to a person other than the applicant, a description of the basis upon which the applicant claims the right to enter that land for the purpose of conducting exploration and reclamation.

(x) Such other data as may be required by the authorized officer.

(b) *Resource recovery and protection plans.* Before conducting any Federal coal development or mining operations on Federal leases or licenses, the operator/lessee shall submit and obtain approval of a resource recovery and protection plan, unless a current resource recovery and protection plan has been approved prior to August 30, 1982. If the resource recovery and protection plan is submitted solely to meet the MLA 3-year submittal requirement, the resource recovery and protection plan shall be submitted to the authorized officer. Upon receipt of a resource recovery and protection plan, the authorized officer will review such plan for completeness and for compliance with MLA. Prior to commencement of any coal development or mining operations

on a Federal lease or license, a permit application package containing, among other documents, a resource recovery and protection plan and a permit application shall be submitted to the regulatory authority. On any Federal lease issued after August 4, 1976, MLA requires that a resource recovery and protection plan shall be submitted no later than 3 years after the effective date of the Federal lease. On any Federal lease issued prior to August 4, 1976, MLA requires that a resource recovery and protection plan shall be submitted no later than 3 years after the effective date of the first lease readjustment after August 4, 1976, or the effective date of the operator/lessee's election provided for at §3483.1(b)(1) of this title, unless a current resource recovery and protection plan has been approved. Any resource recovery and protection plan submitted but not approved as of August 30, 1982, shall be revised to comply with these rules. A resource recovery and protection plan for an LMU shall be submitted to the authorized officer as provided in §3487.1(e)(1) of this title.

(c) The authorized officer may contact directly operators/lessees regarding MLA requirements. The resource recovery and protection plan shall contain all the requirements pursuant to MLA for the life-of-the-mine and, unless previously submitted in an LMU application or as directed by the authorized officer, shall include all of the following:

(1) Names, addresses, and telephone numbers of persons responsible for operations to be conducted under the approved plan to whom notices and orders are to be delivered; names and addresses of operators/lessees; Federal lease serial numbers; Federal license serial numbers, if appropriate; and names and addresses of surface and subsurface coal or other mineral owners of record, if other than the United States.

(2) A general description of geologic conditions and mineral resources, with appropriate maps, within the area where mining is to be conducted.

(3) A description of the proposed mining operation, including:

(i) Sufficient coal analyses to determine the quality of the minable reserve base in terms including, but not limited to, Btu content on an as-received basis, ash, moisture, sulphur, volatile matter, and fixed carbon content.

(ii) The methods of mining and/or variation of methods, basic mining equipment and mining factors including, but not limited to, mining sequence, production rate, estimated recovery factors, stripping ratios, highwall limits, and number of acres to be affected.

(iii) An estimate of the coal reserve base, minable reserve base, and recoverable coal reserves for each Federal lease included in the resource recovery and protection plan. If the resource recovery and protection plan covers an LMU, recoverable coal reserves will also be reported for the non-Federal lands included in the resource recovery and protection plan.

(iv) The method of abandonment of operations proposed to protect the unmined recoverable coal reserves and other resources.

(4) Maps and cross sections, as follows:

(i) A plan map of the area to be mined showing the following—

(A) Federal lease boundaries and serial numbers;

(B) LMU boundaries, if applicable;

(C) Surface improvements, and surface ownership and boundaries;

(D) Coal outcrop showing dips and strikes; and,

(E) Locations of existing and abandoned surface and underground mines.

(ii) Isopach maps of each coal bed to be mined and the overburden and interburden.

(iii) Typical structure cross sections showing all coal contained in the coal reserve base.

(iv) General layout of proposed surface or strip mine showing—

(A) Planned sequence of mining by year for the first 5 years, thereafter in 5-year increments for the remainder of mine life;

(B) Location and width of coal fenders; and,

(C) Cross sections of typical pits showing highwall and spoil configuration, fenders, if any, and coal beds.

(v) General layout of proposed underground mine showing—

(A) Planned sequence of mining by year for the first 5 years, thereafter in 5-year increments for the remainder of mine life;

(B) Location of shafts, slopes, main development entries and barrier pillars, panel development, bleeder entries, and permanent barrier pillars;

(C) Location of areas where pillars will be left and an explanation why these pillars will not be mined;

(D) A sketch of a typical entry system for main development and panel development entries showing centerline distances between entries and crosscuts;

(E) A sketch of typical panel recovery (e.g., room and pillar, longwall, or other mining method) showing, by numbering such mining, the sequence of development and retreat; and,

(vi) For auger mining—

(A) A plan map showing the area to be auger mined and location of pillars to be left to allow access to deeper coal;

(B) A sketch showing details of operations including coal bed thickness, auger hole spacing, diameter of holes and depth or length of auger holes.

(5) A general reclamation schedule for the life-of-the-mine. This should not be construed as meaning duplication of a permit application in a permit application package under SMCRA. The resource recovery and protection plan may cross-reference, as appropriate, a permit application submitted under SMCRA to fulfill this requirement.

(6) Any required data which are clearly duplicated in other submittals to the regulatory authority or Mine Safety and Health Administration may be used to fulfill the requirements of the above paragraphs provided that the cross-reference is clearly stated. A copy of the relevant portion of such submittals must be included in the resource recovery and protection plan.

(7) Explanation of how MER of the Federal coal will be achieved for the Federal coal leases included in the resource recovery and protection plan. If a coal bed, or portion thereof, is not to be mined or is to be rendered

## Bureau of Land Management, Interior

## § 3482.2

unminable by the operation, the operator/lessee shall submit appropriate justification to the authorized officer for approval.

[47 FR 33179, July 30, 1982; 47 FR 53366, Nov. 26, 1982. Redesignated at 48 FR 41589, Sept. 16, 1983]

### § 3482.2 Action on plans.

(a)(1) *Exploration plans.* The authorized officer after evaluating a proposed exploration plan and all comments received thereon, and after consultation with the responsible officer of the surface managing agency, and with the regulatory authority when exploration is to be conducted within an approved permit area prior to commencement of mining operations, shall promptly approve or disapprove in writing an exploration plan. In approving an exploration plan, the authorized officer shall determine that the exploration plan complies with the rules of this part, applicable requirements of 30 CFR 815.15 or an approved State program, and any Federal lease or license terms and/or conditions. Reclamation must be accomplished as set forth in the exploration plan. The authorized officer may impose additional conditions to conform to the rules of this part. In disapproving an exploration plan, the authorized officer shall state what modifications, if any, are necessary to achieve such conformity. No exploration plan shall be approved unless the bond, executed pursuant to the provisions of 43 CFR part 3474 or 43 CFR part 3410, has been determined by the responsible officer of the surface managing agency to be adequate. When the land involved in the exploration plan is under the surface management jurisdiction of an agency other than DOI, that other agency must concur with the approval terms of the exploration plan.

(2) *Resource recovery and protection plans.* No resource recovery and protection plan or modification thereto shall be approved which is not in conformance with the rules of this part, any Federal lease or license terms and/or conditions, and is not found to achieve MER of the Federal coal within an LMU or Federal lease issued or readjusted after August 4, 1976. The determination of MER shall be made by the

authorized officer based on review of the resource recovery and protection plan. No resource recovery and protection plan shall be approved prior to the filing of a complete permit application package and unless the Federal lease bond, executed pursuant to the provisions of 43 CFR part 3474 has been determined by the authorized officer to be adequate.

(3) *Recoverable coal reserves estimates.* For all Federal coal leases issued or readjusted after August 4, 1976, the recoverable coal reserves or LMU recoverable coal reserves shall be those estimated by the authorized officer as of the date of approval of the resource recovery and protection plan, or the date of approval of any existing mining plan as defined at 30 CFR 740.5 (1981). If an operator/lessee credits production toward diligent development in accordance with §3483.5 of this title, such credits shall be included in the recoverable coal reserves estimates. The estimate of recoverable coal reserves or LMU recoverable coal reserves may only be revised as new information becomes available. Estimates of recoverable coal reserves or LMU recoverable coal reserves shall not be reduced due to any production after the original estimate made by the authorized officer.

(b) *Changes in plans by authorized officer.* (1) Approved exploration plans may be required to be revised or supplemented at any time by the authorized officer, after consultation with the operator/lessee and the responsible officer of the surface managing agency as necessary, to adjust to changed conditions, to correct oversights, or to reflect changes in legal requirements.

(2) The authorized officer, pursuant to MLA, may require approved resource recovery and protection plans to be revised or supplemented reasonably for modifications, after consultation with the operator/lessee and the regulatory authority as necessary, to adjust to changed conditions, to correct oversights, or to reflect changes in legal requirements. Such revisions shall be made in writing, as appropriate, and the authorized officer shall submit a copy to the regulatory authority.

(c) *Changes in plans by operator/lessee.*

(1) The operator/lessee may propose modifications to an approved exploration plan and shall submit a written statement of the proposed change and its justification to the authorized officer. The authorized officer shall promptly approve or disapprove in writing any such modifications, after consultation with the responsible officer of the managing agency and the regulatory authority as necessary, or specify conditions under which they would be acceptable.

(2) The operator/lessee may propose modifications to an approved resource recovery and protection plan for any requirements under MLA, and shall submit a written statement of the proposed change and its justification to the authorized officer. The authorized officer shall promptly approve or disapprove in writing any such modifications, after consultation with the regulatory authority as necessary, or specify conditions under which they would be acceptable. Upon approval of modifications, the authorized officer shall submit a copy to the regulatory authority.

[47 FR 33179, July 30, 1982; 47 FR 53366, Nov. 26, 1982. Redesignated at 48 FR 41589, Sept. 16, 1983]

**§ 3482.3 Mining operations maps.**

(a) *General requirements.* Upon commencement of mining operations, the operator/lessee shall maintain accurate and up-to-date maps of the mine, drawn to scales acceptable to the authorized officer. Before a mine or section of a mine is abandoned, closed, or made inaccessible, a survey of the mine or section shall be made by the operator/lessee and recorded on such maps. All excavations in each separate coal bed shall be shown in such a manner that the production of coal for any royalty reporting period can be accurately ascertained. Additionally, the maps shall show the name of the mine; name of the operator/lessee; Federal lease or license serial number(s); permit number; Federal lease and permit boundary lines; surface buildings; dip of the coal bed(s); true north; map scale; map explanation; location, diameter, and depth of auger holes; improvements; topography, including subsidence re-

sulting from mining; geologic conditions as determined from outcrops, drill holes, exploration, or mining; any unusual geologic or other occurrences such as dikes, faults, splits, unusual water occurrences, or other conditions that may influence MER; and other information that the authorized officer may request. Copies of such maps shall be properly posted to date and furnished, in duplicate, to the authorized officer annually, or at such other times as the authorized officer requests. Copies of any maps, normally submitted to the regulatory authority, Mine Safety and Health Administration, or other State or Federal Agencies, that show all of the specific data required by this paragraph or paragraphs (b), (c), and (d) of this section shall be acceptable in fulfilling these requirements.

(b) *Underground mine maps.* Underground mine maps, in addition to the general requirements of paragraph (a) of this section, shall show all mine workings; the date of extension of the mine workings; an illustrative coal section at the face of each working unit; location of all surface mine fans; ventilation stoppings, doors, overcasts, undercasts, permanent seals, and regulators; direction of the ventilating current in the various parts of the mine at the time of making the latest surveys; sealed areas; known bodies of standing water in other mine workings, either in, above, or below the active workings of the mine; areas affected by squeezes; elevations of surface and underground levels of all shafts, slopes, or drifts, and elevation of the floor, bottom of the mine workings, or mine survey stations in the roof at regular intervals in main entries, panels, or sections; and sump areas. Any maps submitted to the regulatory authority to be used to monitor subsidence shall also be submitted to the authorized officer.

(c) *Surface mine maps.* Surface mine maps, in addition to the general requirements of paragraph (a) of this section, shall include the date of extension of the mine workings and a detailed stratigraphic section at intervals specified in the approved resource recovery and protection plan. Such maps shall show areas from which coal has been removed; the highwall; fences; uncovered, but unmined, coal beds;

## Bureau of Land Management, Interior

## § 3483.2

and elevation of the top of the coal beds.

(d) *Vertical projections and cross sections of mine workings.* When required by the authorized officer, vertical projections and cross sections shall accompany plan views.

(e) *Accuracy of maps.* The accuracy of maps furnished shall meet standards acceptable to the authorized officer and shall be certified by a professional engineer, professional land surveyor, or other such professionally qualified person.

(f) *Liability of operator/lessee for expense of survey.* If the operator/lessee fails to furnish a required or requested map within a reasonable time, the authorized officer, if necessary, shall employ a professionally qualified person to make the required survey and map, the cost of which shall be charged to, and promptly paid by, the operator/lessee.

(g) *Incorrect maps.* If any map submitted by an operator/lessee is believed to be incorrect, and the operator/lessee cannot verify the map or supply a corrected map, the authorized officer may employ a professionally qualified person to make a survey and any necessary maps. If the survey shows the maps submitted by the operator/lessee to be substantially incorrect, in whole or in part, the cost of making the survey and preparing the maps shall be charged to, and promptly paid by, the operator/lessee.

### Subpart 3483—Diligence Requirements

#### § 3483.1 Diligent development and continued operation requirement.

(a) *General requirements.* (1) Except as provided at paragraph (b) of this section, each Federal coal lease and LMU is required to achieve diligent development.

(2) Once the operator/lessee of a Federal coal lease or LMU has achieved diligent development, the operator/lessee shall maintain continued operation on the Federal lease or LMU for every continued operation year thereafter, except as provided in § 3483.3 of this title.

(b) Federal coal leases issued prior to August 4, 1976, until the first readjust-

ment of the lease after August 4, 1976, shall be subject to the Federal lease terms, including those that describe the minimum production requirement, except that:

(1) An operator/lessee holding such a lease may elect to be subject to the rules of this part by notifying the authorized officer in writing prior to August 30, 1983.

(i) Such election shall consist of a written request, in triplicate, to the authorized officer that a Federal lease(s) be subject to the rules of this part, and shall contain the following—

(A) Name and address of the operator/lessee of record.

(B) Federal lease number(s).

(C) Certified record of annual Federal coal production since August 4, 1976, for the Federal lease(s) that the operator/lessee requests to have credited toward diligent development in accordance with § 3483.5 of this title.

(ii) Upon verification by the authorized officer of the reported annual Federal coal production, the authorized officer shall notify the operator/lessee by certified mail, return receipt requested, that the election has been approved. The effective date of the election shall be the most recent royalty reporting period prior to the submittal of the election to the authorized officer.

(2) Upon the effective date of the first lease readjustment after August 4, 1976, all such Federal leases shall be subject to the rules of this part.

(c) Any Federal coal lease included in an LMU shall be subject to the diligent development and continued operation requirements imposed on the LMU in lieu of those diligent development and continued operation requirements that would apply to the Federal lease individually.

[47 FR 33179, July 30, 1982; 47 FR 53366, Nov. 26, 1982. Redesignated at 48 FR 41589, Sept. 16, 1983]

#### § 3483.2 Termination or cancellation for failure to meet diligent development and maintain continued operation.

(a) Any Federal coal lease or LMU which has not achieved diligent development shall be terminated by DOI.

### § 3483.3

### 43 CFR Ch. II (10–1–08 Edition)

(b) After an LMU has been terminated under the provision of paragraph (a) of this section, any Federal coal lease included in that LMU shall then be subject to the diligent development and continued operation requirements that would have been imposed on that Federal lease by the rules of this part, as if the Federal lease had not been included in the LMU.

(c) Any Federal coal lease on which continued operation is not maintained shall be subject to cancellation.

(d) The DOI may cancel any Federal coal lease or LMU which fails to meet the requirement for submission of a resource recovery and protection plan.

#### **§ 3483.3 Suspension of continued operation or operations and production.**

(a) Applications for suspensions of continued operation must be filed in triplicate in the office of the authorized officer. The authorized officer, if he or she determines an application to be in the public interest, may approve the application or terminate suspensions that have been or may be granted.

(1) The authorized officer must suspend the requirement for continued operation by the period of time he or she determines that strikes, the elements, or casualties not attributable to the operator/lessee have interrupted operations under the Federal coal lease or LMU.

(2) The authorized officer may suspend the requirement for continued operation upon the payment of advance royalty in accordance with § 3481.0-6 of this title for any operation. The authorized officer, upon notifying the operator/lessee 6 months in advance, may cease to accept advance royalty in lieu of the requirement for continued operation.

(b) In the interest of conservation, the authorized officer is authorized to act on applications for suspension of operations and production filed pursuant to paragraph (b) of this section, direct suspension of operations and production, and terminate such suspensions which have been or may be granted. Applications by an operator/lessee for relief from any operations and production requirements of a Federal lease shall contain justification for the

suspension and shall be filed in triplicate in the office of the authorized officer.

(1) A suspension in accordance with paragraph (b) of this section shall take effect as of the time specified by the authorized officer. Any such suspension of a Federal coal lease or LMU approved by the authorized officer also suspends all other terms and conditions of the Federal coal lease or LMU, for the entire period of such a suspension. Rental and royalty payments will be suspended during the period of such suspension of all operations and production, beginning with the first day of the Federal lease month on which the suspension of operations and production becomes effective. Rental and royalty payments shall resume on the first day of the Federal lease month in which operations or production is resumed. Where rentals are creditable against royalties and have been paid in advance, proper credit shall be allowed on the next rental or royalty on producing Federal leases due under the Federal lease.

(2) The minimum annual production requirements shall be proportionately reduced for that portion of a Federal lease year for which suspension of operations and production is directed or granted by the authorized officer, in the interest of conservation of recoverable coal reserves and other resources, in accordance with paragraph (b) of this section.

(3) The term, including the diligent development period, of any Federal lease shall be extended by adding to it any period of suspension in accordance with paragraph (b) of this section, of operations and production.

(4) A suspension in accordance with paragraph (b) of this section does not suspend the permit and the operator/lessee's reclamation obligation under the permit.

[47 FR 33179, July 30, 1982; 47 FR 53366, Nov. 26, 1982. Redesignated at 48 FR 41589, Sept. 16, 1983, and amended at 53 FR 49986, Dec. 13, 1988; 62 FR 44370, Aug. 20, 1997]

#### **§ 3483.4 Payment of advance royalty in lieu of continued operation.**

(a) Advance royalty may only be accepted in lieu of continued operation

upon application to and approval by the authorized officer.

(b) However, any request by an operator/lessee for suspension of the continued operation requirement and payment of advance royalty in lieu thereof shall be made no later than 30 days after the beginning of the continued operation year. If an operator/lessee requests authorization to pay advance royalty in lieu of continued operation later than 30 days after the beginning of any continued operation year, the authorized officer may condition acceptance of advance royalty on the payment of a late payment charge on the amount of the advance royalty due. The late payment charge will be calculated in accordance with 30 CFR 218.20.

(c) For advance royalty purposes, the value of the Federal coal will be calculated in accordance with §3485.2 of this title and this section. When advance royalty is accepted in lieu of continued operation, it shall be paid in an amount equivalent to the production royalty that would be owed on the production of 1 percent of the recoverable coal reserves or the Federal LMU recoverable coal reserves. The advance royalty rate for an LMU shall be deemed to be 8 percent where the Federal LMU recoverable coal reserves contained in the LMU would be recovered by only underground mining operations and 12½ percent where the Federal LMU recoverable coal reserves contained in the LMU would be recovered only by other mining operations. For LMU's that contain Federal LMU recoverable coal reserves that would be recovered by a combination of underground and other mining methods, the advance royalty rate shall be deemed to be 12½ percent. The unit value of the recoverable coal reserves for determining the advance royalty payment for a Federal lease or LMU shall be:

(1) The unit value for production royalty purposes of coal produced and sold under the Federal coal lease or LMU during the immediately preceding production royalty payment period; or

(2) Computed at the average unit price at which coal from other Federal leases in the same region was sold during such period, if no coal was produced and sold under the Federal coal lease

or LMU during the immediately preceding royalty payment period, or if the authorized officer finds that there is an insufficient number of such sales to determine such value equitably; or

(3) Determined by the authorized officer, if there were no sales of Federal coal from such region during such period or if the authorized officer finds that there is an insufficient number of such sales to determine such value equitably.

(d) The aggregate number of years during the period of any Federal coal lease or LMU for which advance royalty may be accepted in lieu of the requirement of continued operation shall not exceed 10. For Federal leases issued prior to August 4, 1976, advance royalty shall not be accepted in lieu of continued operation for more than a total of 10 years following the first lease readjustment after August 4, 1976. Any continued operation year in which any advance royalty is paid shall be deemed a year in which advance royalty is accepted in lieu of continued operation for the purposes of this paragraph. However, if an operator/lessee meets the requirement for continued operation in any continued operation year in which the operator/lessee has paid advance royalty, such year shall not be considered when calculating the maximum number of years for which advance royalty may be accepted for the Federal lease or LMU. The number of years for which advance royalty has been paid under any Federal coal lease prior to its inclusion in an LMU shall not be considered when calculating the maximum number of years for which advance royalty may be accepted for the LMU.

(e) The dollar amount of any production royalty for a Federal coal lease or LMU owed for any continued operation year during or subsequent to the continued operation year in which advance royalty is paid, shall be reduced (but not below zero) by the dollar amount of any advance royalty paid under that Federal lease or LMU to the extent that such advance royalty has not been used to reduce production royalty for a prior year.

(f) No advance royalty paid during the initial 20-year term of a Federal

coal lease or LMU shall be used to reduce a production royalty pursuant to paragraph (e) of this section after the 20th year of the Federal coal lease or LMU. For purposes of this paragraph, the initial 20-year term of a Federal lease shall commence on the effective date of the Federal lease for all Federal leases issued after August 4, 1976; on the effective date of the first lease readjustment after August 4, 1976, for all Federal leases issued prior to August 4, 1976; and on the effective date of LMU approval for all LMU's. Any advance royalty paid on a Federal lease prior to its inclusion in an LMU shall be credited to the LMU and shall be considered to have been paid on the date of LMU approval for the purposes of this paragraph, provided that the Federal lease has been included in an LMU within the initial 20-year term of the Federal lease as determined in this paragraph and to the extent that the advance royalty has not already been credited against production royalty on the Federal lease.

(g) If an operator/lessee fails to make an approved advance royalty payment in any continued operation year, the authorized officer shall inform the operator/lessee in writing that the operator/lessee is in violation of the continued operation requirement. If the operator/lessee then fails to comply with 30 CFR 218.200, the Federal lease or LMU shall be subject to cancellation pursuant to § 3483.2 of this title.

[47 FR 33179, July 30, 1982; 47 FR 53366, Nov. 26, 1982. Redesignated at 48 FR 41589, Sept. 16, 1983]

**§ 3483.5 Crediting of production toward diligent development.**

(a) For Federal coal leases issued after August 4, 1976, all production after the effective date of the Federal lease shall be credited toward diligent development.

(b) For Federal coal leases issued prior to August 4, 1976, all production after the effective date of the first lease readjustment after August 4, 1976, shall be credited toward diligent development.

(c) For Federal coal leases issued prior to August 4, 1976, that have not been readjusted after August 4, 1976, if the operator/lessee has elected under

§ 3483.1 of this title to be subject to the diligent development and continued operation requirements of the rules of this part, all production after the effective date of the operator/lessee's election shall be applied toward diligent development.

(d) For Federal coal leases issued prior to August 4, 1976, that have not been readjusted after August 4, 1976, if the operator/lessee has elected under § 3483.1 of this title to be subject to the diligent development and continued operation requirements of the rules of this part, all production after August 4, 1976, that occurred prior to the effective date of the operator/lessee's election shall be applied toward diligent development if the operator/lessee so requests.

(e) For Federal coal leases issued prior to August 4, 1976, that have been readjusted after August 4, 1976, all production after August 4, 1976, that occurred prior to the effective date of the first lease readjustment after August 4, 1976, shall be applied toward diligent development if the operator/lessee so requests. Such a request shall comply with the election application provisions at § 3483.1(b)(1) of this title. Any production after such readjustment shall be applied toward diligent development pursuant to paragraph (b) of this section.

(f) For Federal coal leases issued prior to August 4, 1976, that are governed by the Federal lease clauses which describe the minimum production requirements until the first lease readjustment after August 4, 1976, no production prior to the effective date of that first Federal lease readjustment shall be applied toward diligent development.

(g) For LMU's, any production credited under the rules of this part to a Federal lease prior to its inclusion in the LMU shall be applied toward diligent development for the LMU.

**§ 3483.6 Special logical mining unit rules.**

(a) Production anywhere within the LMU, of either Federal or non-Federal recoverable coal reserves or a combination thereof, shall be applied toward satisfaction of the requirements of the rules of this part for achievement of

diligent development and continued operation for the LMU.

(b) The dates for submission of a resource recovery and protection plan and achievement of diligent development shall not be changed by any enlargement or diminution of the LMU.

### Subpart 3484—Performance Standards

#### § 3484.1 Performance standards for exploration and surface and underground mining.

The following performance standards shall apply to exploration, development, production, resource recovery and protection, MER, and preparation and handling of coal under Federal leases and licenses, and LMU's.

(a) *Performance standards for exploration.* (1) The operator/lessee shall comply with the standards of the rules of this part and with all applicable requirements of the surface management agency, 30 CFR 815.15, or an approved State program.

(2) The operator/lessee, if required by the authorized officer, shall set and cement casing in the hole and install suitable blowout prevention equipment when drilling on lands valuable or prospectively valuable for oil, gas, or geothermal resources.

(3) All exploration drill holes must be capped with at least 5 feet of cement and plugged with a permanent plugging material that is unaffected by water and hydrocarbon gases and will prevent the migration of gases and water in the drill hole under normal hole pressures. For exploration holes drilled deeper than stripping limits, the operator/lessee, using cement or other suitable plugging material approved by the authorized officer, shall plug the hole through the thickness of the coal bed(s) or mineral deposit(s) and through aquifers for a distance of at least 50 feet above and below the coal bed(s) or mineral deposit(s) and aquifers, or to the bottom of the drill hole. A lesser cap or plug may be approved by the authorized officer. Exploration activities shall be managed to prevent water pollution and mixing of ground and surface waters and ensure the safety of people, livestock, and wildlife.

(4) The operator/lessee shall retain for 1 year, unless a shorter time period is authorized by the authorized officer, all drill and geophysical logs and shall make such logs available for inspection or analysis by the authorized officer, if requested. The authorized officer, at his discretion, may require the operator/lessee to retain representative samples of drill cores for 1 year. Confidentiality of such information will be accorded pursuant to the provisions at § 3481.3 of this title.

(5) The operator/lessee may utilize exploration drill holes as surveillance wells for the purpose of monitoring the effects of subsequent operations on the quantity, quality, or pressure of ground water or mine gases only with the written approval of the authorized officer, in consultation with the regulatory authority. The operator/lessee may convert exploration drill holes to water wells only after approval of the operator/lessee's written request by the authorized officer and the surface owner or authorized officer, in consultation with the regulatory authority. All such approvals shall be accompanied by a corresponding transfer of responsibility for any liability including eventual plugging, reclamation, and abandonment. Nothing in this paragraph shall supersede or affect the applicability of any State law requirements for such a transfer, conversion, or utilization as a supply for domestic consumption.

(b) *General performance standards for surface and underground mining—(1) Maximum economic recovery (MER).* Upon approval of a resource recovery and protection plan for an LMU, or for a Federal lease issued or readjusted after August 4, 1976, the operator/lessee shall conduct operations to achieve MER of the Federal coal. To determine that MER of the Federal coal will be achieved, the authorized officer shall consider the information submitted by the operator/lessee under § 3482.1(c) and/or § 3487.1(c) of this title. The authorized officer may request additional information from the operator/lessee to aid in the MER determination. The operator/lessee shall consider coal preparation operations to avoid the wasting of coal and to encourage the achievement of MER. Federal leases issued

prior to August 4, 1976, that have not yet been readjusted after August 4, 1976, shall comply with MLA regarding conservation of the recoverable coal reserves and other resources.

(2) Diligent development, continued operation, advance royalty, and 3-year resource recovery and protection plan submission requirements are addressed at §§ 3483.1 through 3483.6 of this title.

(3) *Unexpected wells.* The operator/lessee shall notify the authorized officer promptly if operations encounter unexpected wells or drill holes which could adversely affect the recovery of coal during mining operations, and shall take no further action that would disturb such wells or drill holes without the approval of the authorized officer.

(4) *Resource recovery and protection.* The operator/lessee shall conduct efficient operations to recover the recoverable coal reserves; prevent wasting and conserve the recoverable coal reserves and other resources; prevent damage or degradation to coal-bearing or mineral-bearing formations; and ensure that other resources are protected upon abandonment.

(5) *Release of lease bond.* Subsequent to permanent abandonment of mining operations, the authorized officer will determine if the operator/lessee has met obligations required under the Federal lease for resource recovery and protection, and will determine if the operator/lessee has met the Federal lease requirements pertaining to rentals and royalties. The authorized officer will make appropriate recommendations to the authorized officer for reduction or termination of the Federal lease bond.

(c) *Performance standards for underground mines—(1) Underground resource recovery.* Underground mining operations shall be conducted so as to prevent wasting of coal and to conserve recoverable coal reserves consistent with the protection and use of other resources. No entry, room, or panel workings in which the pillars have not been completely mined within safe limits shall be permanently abandoned or rendered inaccessible, except with the prior written approval of the authorized officer.

(2) *Subsidence.* The operator/lessee shall adopt mining methods which en-

sure proper recovery of recoverable coal reserves under MLA, as determined by the authorized officer. Operators/lessees of underground coal mines shall adopt measures consistent with known technology in order to prevent or, where the mining method used requires subsidence, control subsidence, maximize mine stability, and maintain the value and use of surface lands consistent with 30 CFR 784.20 and 817.121, 817.122, 817.124, and 817.126, or applicable requirements of an approved State program. Where pillars are not removed and controlled subsidence is not part of the resource recovery and protection plan, pillars of adequate dimensions shall be left for surface stability, giving due consideration to the thickness and strength of the coal beds and the strata above and immediately below the coal beds.

(3) *Top coal.* Top coal may be left in underground mines only upon approval by the authorized officer. The determination of mining height in thick coal beds will take into consideration safety factors, available equipment, overall coal bed thickness, and MER. The bottom coal left, if determined by the authorized officer to be of a minable thickness, should be maintained at a uniform thickness to allow recovery in the future as new technology is developed and economics allow.

(4) *Multiple coal bed mining.* (i) In general, the recoverable coal reserves in the upper coal beds shall be mined before the lower coal beds; simultaneous workings in each upper coal bed shall be kept in advance of the workings in each lower coal bed. The authorized officer may authorize mining of any lower coal beds before mining the upper coal bed(s) only after a technical justification, submitted to the authorized officer by the operator/lessee, shows that recovery of all coal bed(s) will not be adversely affected.

(ii) In areas subject to multiple coal bed mining, the protective barrier pillars for all main and secondary development entries, main haulageways, primary aircourses, bleeder entries, and manways in each coal bed shall be superimposed regardless of vertical separation or rock competency; however, modifications and exceptions to, or variations from, this requirement may

be approved in advance by the authorized officer.

(5) The authorized officer shall approve the conditions under which an underground mine, or portions thereof, will be temporarily abandoned, pursuant to the rules of this part.

(6) *Barrier pillars left for support.* (i) The operator/lessee shall not, without prior consent of the authorized officer, mine any recoverable coal reserves or drive any underground workings within 50 feet of any of the outside boundary lines of the federally leased or licensed land, or within such greater distance of said boundary lines as the authorized officer may prescribe with consideration for State or Federal environmental or safety laws. The operator/lessee may be required to pay for unauthorized mining of barrier pillars. The authorized officer may require that payment shall be up to, and include, the full value of the recoverable coal reserves mined from the pillars. The drilling of any lateral holes within 50 feet of any outside boundary shall be done in consultation with the authorized officer.

(ii) If the coal in adjoining premises has been worked out, an agreement shall be made with the coal owner prior to the mining of the coal remaining in the Federal barrier pillars which otherwise may be lost. If the water level beyond the pillar is below the operator/lessee's adjacent operations, and all the safety factors have been considered, the operator/lessee, on the written order of the authorized officer, shall mine out and remove all available Federal recoverable coal reserves in such barrier if it can be mined without undue hardship to the operator/lessee; with due consideration for safety; and pursuant to existing mining, reclamation, and environmental laws and rules. Either the operator/lessee or the authorized officer may initiate the proposal to mine coal in a barrier pillar.

(7) The abandonment of a mining area shall require the approval of the authorized officer.

(d) *Performance standards for surface mines.* (1) Pit widths for each coal bed shall be engineered and designed so as to eliminate or minimize the amount of coal fender to be left as a permanent pillar on the spoil side of the pit.

(2) The amount of bottom or rider coal beds wasted in each pit will be minimized consistent with individual mine economics and the coal quality standards that must be maintained by the operation.

(3) The abandonment of a mining area shall require the approval of the authorized officer.

(4) If a coal bed exposed by surface mining or an accumulation of slack coal or combustible waste becomes ignited, the operator/lessee shall immediately take all necessary steps to extinguish the fire and protect the remaining coal.

(5) The authorized officer shall approve the conditions under which a surface mine, or portions thereof, will be temporarily abandoned, pursuant to the rules of this part.

(6) *Barrier or boundary coal.* The operator/lessee shall be encouraged by the authorized officer, in the interest of conservation of recoverable coal reserves and other resources, to mine coal up to the Federal lease or license boundary line; provided that, the mining is in compliance with existing State and Federal mining, environmental and reclamation laws and rules, the mining does not conflict with existing surface rights, and the mining is carried out without undue hardship to the operator/lessee and with due consideration for safety.

(e) *Performance standards for auger mines.* (1) If auger mining is proposed, the authorized officer shall take into account the percentage of recovery, which in general shall exceed 30 percent, and the probable effect on recovering the remaining adjacent recoverable coal reserves by underground mining. If underground mining from the highwall or outcrop is contemplated in the foreseeable future, auger mining may not be approved if underground mining would ensure greater recovery of the unmined recoverable coal reserves. Where auger mining is authorized, the authorized officer will require a sufficient number and size of pillars at regular intervals along the highwall or outcrop to ensure access to the unmined recoverable coal reserves.

(2) A plan for recovery of recoverable coal reserves by auger methods shall be designed to achieve MER.

## § 3484.2

(3) Auger mining must comply with the rules of this part, and 30 CFR Chapter VII or applicable requirements of an approved State program.

[47 FR 33179, July 30, 1982; 47 FR 53366, Nov. 26, 1982. Redesignated at 48 FR 41589, Sept. 16, 1983]

### § 3484.2 Completion of operations and permanent abandonment.

(a) Before permanent abandonment of exploration operations, all openings and excavations shall be closed, backfilled, or otherwise permanently dealt with in accordance with sound engineering practices and according to the approved exploration plan. Drill holes, trenches, and other excavations for exploration shall be abandoned in such a manner as to protect the surface and not endanger any present or future underground operation, or any deposit of coal, oil, gas, mineral resources, or ground water. Areas disturbed by exploration operations will be graded, drained, and revegetated.

(b) Upon permanent abandonment of mining operations, the authorized officer will require that the unmined recoverable coal reserves and other resources be adequately protected. Upon completion of abandonment, the authorized officer will inform the responsible office of the surface managing agency and regulatory authority as to whether the abandonment has been completed in compliance with the rules of this part.

## Subpart 3485—Reports, Royalties and Records

### § 3485.1 Reports.

(a) *Exploration reports.* The operator/lessee shall file with the authorized officer the information required in paragraph (b) of this section. Such filing shall be within 30 days after the end of each calendar year and promptly upon completion or suspension of exploration operations, unless otherwise provided in the exploration license or Federal lease, and at such other times as the authorized officer may request.

(b) *Exploration report content.* The exploration report shall contain the following information:

## 43 CFR Ch. II (10–1–08 Edition)

(1) Location(s) and serial number(s) of the federally leased or licensed lands.

(2) Nature of exploration operations.

(3) Number of holes drilled and/or other work performed during the year or report period.

(4) Total footage drilled during the year or other period as determined by the authorized officer.

(5) Map showing all holes drilled, other excavations, and the coal outcrop lines.

(6) Analyses of coal and other pertinent tests obtained from exploration operations during the year.

(7) Copies of all in-hole mechanical or geophysical stratigraphic surveys or logs, such as electric logs, gamma ray-neutron logs, sonic logs, or any other logs. The records shall include a log of all strata penetrated and conditions encountered such as water, quicksand, gas, or any unusual conditions.

(8) Status of reclamation of the disturbed areas.

(9) A statement on availability and location of all drill hole logs and representative drill cores retained by the operator/lessee pursuant to § 3484.1(a) of this title.

(10) Any other information requested by the authorized officer.

(c) Any coal reserve base, minable reserve base or recoverable coal reserves estimates generated from an exploration license shall be submitted to the authorized officer within 1 year after completion of drilling operations.

(d) *Production reports and payments.*

(1) Operators/lessees shall report on USGS Form 9-373A, within 30 days after expiration of the period covered by the report, all coal mined, the basis for computing Federal royalty and any other form requirements, and shall make all payments due. Acceptance of the report and payment shall not be construed as an accord and satisfaction on the operator/lessee's Federal royalty obligation.

(2) Licensees shall report all coal mined on a semiannual basis on the report form provided.

(3) Non-Federal LMU production shall be reported in accordance with § 3487.1(h)(1) of this title.

(e) *Penalty.* If an operator/lessee knowingly records or reports less than

## Bureau of Land Management, Interior

## § 3485.2

the true weight or value of coal mined, the authorized officer shall impose a penalty equal to either double the amount of Federal royalty due on the shortage or the full value, as determined in §3485.2 of this title, of the shortage. If, after notice, an operator/lessee or licensee maintains false records or files false reports, the authorized officer may recommend to the responsible officer of the surface managing agency that action be initiated to cancel the Federal lease or license, in addition to the imposition of any penalties.

(f) *Confidentiality.* Confidentiality of any information required under this section shall be determined in accordance with §3487.1(h)(1) of this title.

### § 3485.2 Royalties.

(a) Provisions for the payment of advance royalty in lieu of continued operation are contained at §3483.4 of this title.

(b) An overriding royalty interest, production payment, or similar interest that exceeds 50 percent of royalty first payable to the United States under the Federal lease, or when added to any other overriding royalty interest exceeds that percentage, except those created in order to finance a mine, shall not be created by a Federal lease transfer or surface owner consent. However, when an interest in the Federal lease or operating agreement is transferred, the transferor may retain an overriding royalty in excess of the above limitation if he shows that he has made substantial investments for improvements directly related to exploration, development, and mining on the land covered by the transfer that would justify a higher payment.

(c)(1) The authorized officer may waive, suspend, or reduce the rental on a Federal lease, or reduce the Federal royalty, but not advance royalty, on a Federal lease or portion thereof. The authorized officer shall take such action for the purpose of encouraging the greatest ultimate recovery of Federal coal, and in the interest of conservation of Federal coal and other resources, whenever in his judgment it is necessary to promote development, or if he finds that the Federal lease cannot be successfully operated under its

terms. In no case shall the authorized officer reduce to zero any royalty on a producing Federal lease.

(2) An application for any of the above benefits shall be filed in triplicate in the office of the authorized officer. The application shall contain the serial number of the Federal lease, the Bureau of Land Management State Office, the name and address of the record title holder and any operator/lessee, and the description of the lands in the manner provided by 43 CFR 3471.1.

(i) Each application shall include the name and location of the mine; a map showing the extent of the existing, proposed or adjoining mining operations; a tabulated statement of the Federal coal mined, if any, and subject to Federal royalty for the existing or adjoining operation covering a period of not less than 12 months before the date of filing of the application; and existing Federal rental and royalty rates on Federal leases covered by the application.

(ii) Each application shall contain a detailed statement of expenses and costs of operating the entire mine, the income from the sale of coal, and all facts indicating whether the mine can be successfully operated under the Federal rental and royalty provisions fixed in the Federal lease or why the reduction is necessary to promote development. Where the application is for a reduction in Federal royalty, full information shall be furnished as to whether royalties or payments out of production are paid to parties other than the United States, the amounts so paid, and efforts made to reduce them, if any. If the Federal lease included in the application is not part of nor adjoining an operating mine, these detailed financial data may be obtained from another operating mine which is in close proximity and for which the authorized officer has deemed to have similar operating characteristics.

(iii) The applicant shall also file a copy of agreements, between the operator/lessee and the holders of any royalty interests or production payments other than those created in order to finance a mine, to a reduction of all other royalties from the Federal lease

### § 3485.3

so that the total royalties and production payments owed the holders of these interests will not be in excess of one-half of the Federal royalties, should the Federal royalty reduction be granted.

(3) If the applicant does not meet the criteria of the rules of this part, the authorized officer shall reject such application or request more data from the operator/lessee.

(4) If the applicant meets the criteria of the rules of this part, the authorized officer shall act on the application.

(d) If a Federal coal lease that provides for a cents-per-ton Federal royalty is developed by *in situ* technology, BLM will establish a procedure for estimating tonnage for royalty purposes.

[47 FR 33179, July 30, 1982. Redesignated at 48 FR 41589–41594, Sept. 16, 1983, and amended at 54 FR 1532, Jan. 13, 1989]

#### § 3485.3 Maintenance of and access to records.

(a) Operators/lessees shall maintain current and accurate records for the Federal lease or LMU showing:

(1) The type, quality, and weight of all coal mined, sold, used on the premises, or otherwise disposed of, and all coal in storage (remaining in inventory).

(2) The prices received for all coal sold and to whom and when sold.

(b) [Reserved]

(c) Licensees must maintain a current record of all coal mined and/or removed.

(d) Operators/lessees will retain these records for a period of time as determined by the authorized officer in accordance with current BLM rules and procedures.

[47 FR 33179, July 30, 1982, as amended at 48 FR 35641, Aug. 5, 1983. Redesignated at 48 FR 41589, Sept. 16, 1983]

## Subpart 3486—Inspection, Enforcement, and Appeals

### § 3486.1 Inspections.

(a) The operator/lessee shall provide access, at all reasonable times, to the authorized officer for inspection or investigation of operations in order to determine whether the operations are in compliance with all applicable laws,

### 43 CFR Ch. II (10–1–08 Edition)

rules, and orders; the terms and conditions of the Federal lease or license; and requirements of any approved exploration plan for:

(1) Abandonment.

(2) Environmental protection and reclamation practices.

(b) The operator/lessee shall provide access, at all reasonable times, to the authorized officer for inspection or investigation of operations in order to determine whether the operations are in compliance with all applicable laws, rules, and orders; the terms and conditions of the Federal lease or license; and requirements of any approved resource recovery and protection plan for:

(1) Production practices.

(2) Development.

(3) Resource recovery and protection.

(4) Diligent development and continued operation.

(5) Audits of Federal rental and royalty payments on producing Federal leases.

(6) Abandonment.

(7) MER determinations.

### § 3486.2 Notices and orders.

(a) *Address of responsible party.* Before beginning operations, the operator/lessee shall inform the authorized officer in writing of the operator/lessee's post office address and the name and post office address of the superintendent or designated agent who will be in charge of the operations and who will act as the local representative of the operator/lessee. Thereafter, the authorized officer shall be informed of any changes.

(b) *Receipt of notices and orders.* The operator/lessee shall be construed to have received all notices and orders that are mailed by certified mail, return receipt requested, to the mine office or handed to a responsible official connected with the mine or exploration site for transmittal to the operator/lessee or his local representative.

### § 3486.3 Enforcement.

(a) If the authorized officer determines that an operator/lessee has failed to comply with the rules of this part, the terms and conditions of the Federal lease or license, the requirements of

## Bureau of Land Management, Interior

## § 3487.1

approved exploration or resource recovery and protection plans, or orders of the authorized officer, and such noncompliance does not threaten immediate and serious damage to the mine, the deposit being mined, valuable ore-bearing mineral deposits or other resources, or affect the royalty provisions of the rules of this part, the authorized officer shall serve a notice of noncompliance upon the operator/lessee by delivery in person to him or his agent, or by certified mail, return receipt requested, addressed to the operator/lessee at his last known address. Failure of the operator/lessee to take action in accordance with the notice of noncompliance within the time limits specified by the authorized officer shall be grounds for cessation of operations upon notice by the authorized officer. The authorized officer may also recommend to the authorized officer the initiation of action for cancellation of the Federal lease or license and forfeiture of any Federal lease bonds.

(b) The notice of noncompliance shall specify in what respect(s) the operator/lessee has failed to comply with the rules of this part, the terms and conditions of the Federal lease or license, the requirements of approved exploration or resource recovery and protection plans, or orders of the authorized officer, and shall specify the action that must be taken to correct such noncompliance and the time limits within which such action must be taken.

(c) If, in the judgment of the authorized officer, an operator/lessee is conducting activities which fail to comply with the rules of this part, the terms and conditions of the Federal lease or license, the requirements of approved exploration or resource recovery and protection plans, or orders of the authorized officer, and/or which threaten immediate and serious damage to the mine, the deposit being mined, valuable ore-bearing mineral deposits, or, regarding exploration, the environment, the authorized officer shall order the immediate cessation of such activities without prior notice of noncompliance.

(d) A written report shall be submitted by the operator/lessee to the authorized officer when such noncompliance

has been corrected. Upon concurrence by the authorized officer that the conditions which warranted the issuance of a notice or order of noncompliance have been corrected, the authorized officer shall so notify the operator/lessee in writing.

(e) The authorized officer shall enforce requirements of SMCRA only if he finds a violation, condition, or practice that he determines to be an emergency situation for which an authorized representative of the Secretary is required to act pursuant to 30 CFR 843.11 and 843.12.

[47 FR 33179, July 30, 1982; 47 FR 53366, Nov. 26, 1982. Redesignated at 48 FR 41589, Sept. 16, 1983]

### § 3486.4 Appeals.

Decisions or orders issued by the BLM under part 3480 of this title may be appealed pursuant to part 4 of this title.

[48 FR 41593, Sept. 16, 1983]

## Subpart 3487—Logical Mining Unit

### § 3487.1 Logical mining units.

(a) An LMU shall become effective only upon approval of the authorized officer. The effective date for an LMU may be established by the authorized officer between the date that the authorized officer receives an application for LMU approval and the date the authorized officer approves the LMU. The effective date of the LMU approval shall be determined by the authorized officer in consultation with the LMU applicant. An LMU may be enlarged by the addition of other Federal coal leases or with interests in non-Federal coal deposits, or both, in accordance with paragraph (g) of this section. An LMU may be diminished by creation of other separate Federal leases or LMU's in accordance with paragraph (g) of this section.

(b) The authorized officer may direct, or an operator/lessee may initiate, the establishment of an LMU containing only Federal coal leases issued after August 4, 1976. The authorized officer may direct, or an operator/lessee may initiate, the establishment of an LMU containing Federal coal leases issued prior to August 4, 1976, provided that

the operators/lessees consent to making all such Federal leases within the LMU subject to the uniform requirements for submittal of a resource recovery and protection plan, LMU recoverable coal reserves exhaustion, diligent development, continued operation, MER, advance royalty, and royalty reporting periods (but not royalty rates) made applicable by the LMU stipulations and the rules of this part. Any Federal lease included in an LMU shall have its terms amended as necessary so that its terms and conditions are consistent with the stipulations required for the approval of the LMU pursuant to paragraph (e) of this section.

(c) *Contents of an LMU application.* An operator/lessee must submit five copies of an LMU application to the authorized officer if the operator/lessee is applying on his own initiative to combine lands into an LMU, or if directed to establish an LMU by the authorized officer in accordance with paragraph (b) of this section. Such application shall include the following:

(1) Name and address of the designated operator/lessee of the LMU.

(2) Federal lease serial numbers and description of the land and all coal beds considered to be of minable thickness within the boundary of the LMU. Identification of those coal beds proposed to be excluded from any Federal lease which would be a part of the LMU.

(3) Documents and related information supporting a finding of effective control of the lands to be included in the LMU.

(4) Sufficient data to enable the authorized officer to determine that MER of the Federal recoverable coal reserves will be achieved by establishment of the LMU. If a coal bed, or portion thereof, is proposed not to be mined or to be rendered unminable by the operation, the operator/lessee shall submit appropriate justification to the authorized officer for approval.

(5) Any other information required by the authorized officer.

(6) If any confidential information is included in the submittal and is identified as such by the operator/lessee, it shall be treated in accordance with § 3481.3 of this title.

(d) *Consultation.* (1) Prior to approval, the authorized officer shall consult with the operator/lessee about any Federal recoverable coal reserves within the LMU that the operator/lessee does not intend to mine and any Federal recoverable coal reserves that the operator/lessee intends to relinquish. The authorized officer shall also consult with the operator/lessee about Federal lease revisions to make the time periods for resource recovery and protection plan submittals, the 40-year LMU recoverable coal reserves exhaustion requirement, and diligent development, continued operation, advance royalty and Federal rental and royalty collection requirements applicable to each producing Federal lease consistent with the LMU stipulations.

(2) The public participation procedures of § 3481.2 of this title shall be completed prior to approval of an LMU.

(e) *Stipulations.* Prior to the approval of an LMU, the authorized officer shall notify the operator/lessee and responsible officer of the surface managing agency of stipulations required for the approval of the proposed LMU. The LMU stipulations shall provide for:

(1) The submittal, within 3 years from the effective date of LMU approval, of a resource recovery and protection plan that contains the information required by § 3482.1(c) of this title for all Federal and non-Federal lands within the LMU.

(2) A schedule for the achievement of diligent development and continued operation for the LMU. The schedule shall reflect the date for achieving diligent development and maintaining continued operation of the individual Federal leases included in the LMU, consistent with the rules of this part. An operator/lessee may request to pay advance royalty in lieu of continued operation in accordance with § 3482.1(c) of this title.

(3) Uniform reporting periods for Federal rental and royalty on Federal leases.

(4) The revision, if necessary, of terms and conditions of the individual Federal leases included in the LMU. The terms and conditions of the Federal leases, except for Federal royalty rates, shall be amended so that they

**Bureau of Land Management, Interior**

**§ 3487.1**

are consistent with the stipulations of the LMU.

(5) Estimates of the Federal LMU recoverable coal reserves, and non-Federal LMU recoverable coal reserves, using data acquired by generally acceptable exploration methods.

(6) Beginning the 40-year period in which the reserves of the entire LMU must be mined, on one of the following dates—

(i) The effective date of the LMU, if any portion of the LMU is producing on that date;

(ii) The date of approval of the resource recovery and protection plan for the LMU if no portion of the LMU is producing on the effective date of the LMU; or

(iii) The date coal is first produced from any portion of the LMU, if the LMU begins production after the effective date of the LMU but prior to approval of the resource recovery and protection plan for the LMU.

(7) Any other condition that the authorized officer determines to be necessary for the efficient and orderly operation of the LMU.

(f) The authorized officer may approve an LMU if it meets the following criteria:

(1) The LMU fully meets the LMU definition.

(2) The LMU application demonstrates that mining operations on the LMU, which may consist of a series of excavations, will:

(i) Achieve maximum economic recovery of Federal recoverable coal reserves within the LMU. In determining whether the proposed LMU meets this requirement, BLM, as appropriate, will consider:

(A) The amount of coal reserves recoverable from the proposed LMU compared to the amount recoverable if each lease were developed individually; and

(B) Any other factors BLM finds relevant to this requirement;

(ii) Facilitate development of the coal reserves in an efficient, economical, and orderly manner. In determining whether the proposed LMU meets this requirement, BLM, as appropriate, will consider:

(A) The potential for independent development of each lease proposed to be included in the LMU;

(B) The potential for inclusion of the leases in question in another LMU;

(C) The availability and utilization of transportation and access facilities for development of the LMU as a whole compared to development of each lease separately;

(D) The mining sequence for the LMU as a whole compared to development of each lease separately; and

(E) Any other factors BLM finds relevant to this requirement; and

(iii) Provide due regard to conservation of coal reserves and other resources. In determining whether the proposed LMU meets this requirement, BLM, as appropriate, will consider:

(A) The effects of developing and operating the LMU as a unit; and

(B) Any other factors BLM finds relevant to this requirement.

(3) All single Federal leases that are included in more than one LMU shall be segregated into two or more Federal leases. If only a portion of a Federal lease is included in an LMU, the remaining land shall be segregated into another Federal lease. The authorized officer will consult with the authorized officer about the segregation of such Federal leases. The operator/lessee may apply to relinquish any such portion of a Federal lease under 43 CFR 3452.1.

(4) The operator/lessee has agreed to the LMU stipulations required by the authorized officer for approval of the LMU.

(5) The LMU does not exceed 25,000 acres, including both Federal and non-Federal lands.

(6) A lease that has not produced commercial quantities of coal during the first 8 years of its diligent development period can be included in an LMU only if at the time the LMU application is submitted:

(i) A portion of the LMU under consideration is included in a SMCRA permit approved under 30 U.S.C. 1256; or

(ii) A portion of the LMU under consideration is included in an administratively complete application for a SMCRA permit.

(g) The authorized officer will state in writing the reasons for the decision on an LMU application.

(h) *Modification of an LMU.* (1) The boundaries of an LMU may be modified either upon application by the operator/lessee and approval of the authorized officer after consultation with the responsible officer of the surface managing agency, or by direction of the authorized officer after consultation with the authorized officer. In accordance with §3482.2(a)(3) of this title, the authorized officer may adjust only the estimate of LMU recoverable coal reserves pursuant to departmental actions or orders that modify the LMU boundaries, or upon approval of an operator/lessee application.

(2) Upon application by the operator/lessee, an LMU may be enlarged by the addition of other Federal coal leases or with interests in non-Federal coal deposits, or both. The LMU boundaries may also be enlarged as the result of the enlargement of a Federal lease in the LMU, pursuant to 43 CFR part 3432. An LMU may be diminished by creation of other separate Federal leases or LMU's or by the relinquishment of a Federal lease or portion thereof, pursuant to 43 CFR part 3452.

(3) In considering an application for the modification of an LMU, the authorized officer shall consider modifying the LMU stipulations, including the production requirement for commercial quantities.

(4) The authorized officer will not extend the 40-year period in which the reserves of the entire LMU must be mined, as specified at paragraph (e)(6) of this section, because of the enlargement of an LMU or because of the modification of a resource recovery and protection plan.

(i) *Administration of LMU operations.* An LMU shall be administered in accordance with the following criteria:

(1) Where production from non-Federal lands in the LMU is the basis, in whole or in part, for satisfaction of the requirements for diligent development or continued operation, the operator/lessee shall provide a certified report of such production, as determined by the authorized officer. The certified report shall include a map showing the area mined and the amount of coal mined.

(2) *Diligent development, continued operation and advance royalty.* Operators/lessees must comply with the diligent development, continued operation, and advance royalty requirements contained at §§3483.1 through 3483.6 of this title.

(3) Operators/lessees must comply with the LMU stipulations.

[47 FR 33179, July 30, 1982. Redesignated at 48 FR 41589–41594, Sept. 16, 1983, and amended at 51 FR 13229, Apr. 18, 1986; 62 FR 44370, Aug. 20, 1997]

## PART 3500—LEASING OF SOLID MINERALS OTHER THAN COAL AND OIL SHALE

### Subpart 3501—Leasing of Solid Minerals Other Than Coal and Oil Shale—General

#### Sec.

- 3501.1 What is the authority for this part?
- 3501.2 What is the scope of this part?
- 3501.5 What terms do I need to know to understand this part?
- 3501.10 What types of mineral use authorizations can I get under these rules?
- 3501.16 Does my permit or lease grant me an exclusive right to develop the lands covered by the permit or lease?
- 3501.17 Are there any general planning or environmental considerations that affect issuance of my permit or lease?
- 3501.20 If BLM approves my application for a use authorization under this part, when does it become effective?
- 3501.30 May I appeal BLM's decisions under this part?

### Subpart 3502—Qualification Requirements

#### LEASE QUALIFICATIONS

- 3502.10 Who may hold permits and leases?
- 3502.13 May foreign citizens hold permits or leases?
- 3502.15 Are there any additional restrictions on holding leases or interests in leases?
- 3502.20 Will BLM issue a lease to me if I am not complying with the diligence requirements of the Mineral Leasing Act?

#### HOW TO SHOW LEASE QUALIFICATIONS

- 3502.25 Where do I file evidence that I am qualified to hold a permit or lease?
- 3502.26 May I supplement or update my qualifications statement?
- 3502.27 If I am an individual, what information must I give BLM in my qualifications statement?
- 3502.28 If I am an association or a partnership, what information must I give BLM in my qualifications statement?

## Bureau of Land Management, Interior

## Pt. 3500

3502.29 If I am a guardian or trustee for a trust holding on behalf of a beneficiary, what information must I give BLM in my qualifications statement?

3502.30 If I am a corporation, what information must I give BLM in my qualifications statement?

### SPECIAL SITUATIONS AND ADDITIONAL CONCERNS

3502.33 If I represent an applicant as an attorney-in-fact, do I have to submit anything to BLM?

3502.34 What must I submit if there are other parties in interest?

3502.40 What happens if an applicant or successful bidder for a permit or lease dies before the permit or lease is issued?

3502.41 What happens to a permit or lease if the permittee or lessee dies?

3502.42 What happens if the heir is not qualified?

### Subpart 3503—Areas Available for Leasing

#### AVAILABLE AREAS UNDER BLM MANAGEMENT

3503.10 Are all Federal lands available for leasing under this part?

3503.11 Are there any other areas in which I cannot get a permit or lease for the minerals covered by this part?

3503.12 For what areas may I receive a sulphur permit or lease?

3503.13 For what areas may I receive a hardrock mineral permit or lease?

3503.14 For what areas may I get a permit or lease for asphalt?

3503.15 May I lease the gold or silver reserved to the United States on land I hold under a private land claim in New Mexico?

3503.16 May I obtain permits or leases for sand and gravel in Nevada under the terms of this part?

#### AVAILABLE AREAS MANAGED BY OTHERS

3503.20 What if another Federal agency manages the lands I am interested in?

3503.21 What happens if the surface of the land I am interested in belongs to a non-Federal political subdivision or charitable organization?

3503.25 When may BLM issue permits and leases for Federal minerals underlying private surface?

3503.28 Does BLM incorporate any special requirements to protect the lands and resources?

#### LAND DESCRIPTIONS

3503.30 How should I describe surveyed lands or lands shown on protraction or amended protraction diagrams in states which are part of the Public Land Survey System?

3503.31 How should I describe lands in states which are part of the Public Land Survey System but have not been surveyed and are not shown on a protraction or amended protraction diagram?

3503.32 How should I describe acquired lands?

3503.33 Will BLM issue me a lease for unsurveyed lands?

#### ACREAGE AMOUNTS

3503.36 Are there any size or shape limitations on the lands I can apply for?

3503.37 Is there a limit to the acreage of lands I can hold under permits and leases?

3503.38 How does BLM compute my acreage holdings?

#### FILING APPLICATIONS

3503.40 Where do I file my permit or lease application and other necessary documents?

3503.41 Will BLM disclose information I submit under these regulations?

3503.42 When I submit confidential, proprietary information, how can I help ensure it is not available to the public?

3503.43 How long will information I give BLM remain confidential or proprietary?

3503.44 How will BLM treat Indian information submitted under the Indian Mineral Development Act?

3503.45 How will BLM administer information concerning other Indian minerals?

3503.46 When will BLM consult with Indian mineral owners when information concerning their minerals is the subject of a FOIA request?

### Subpart 3504—Fees, Rental, Royalty and Bonds

#### GENERAL INFORMATION

3504.10 What fees must I pay?

3504.11 What forms of payment will BLM and MMS accept?

3504.12 What payments do I send to BLM and what payments do I send to MMS?

#### RENTALS

3504.15 How does BLM determine my rent?

3504.16 When is my rental due after the first year of the lease?

3504.17 What happens if I do not pay my rental in on time?

#### ROYALTIES

3504.20 What are the requirements for paying royalties on production?

3504.21 What are the minimum royalty rates?

3504.22 How will I know what the royalty rate is on my lease production?

3504.25 Do I have to produce a certain amount per year?

## **Pt. 3500**

3504.26 May I create overriding royalties on my Federal lease?

### **BONDING**

3504.50 Do I have to file a bond to receive a permit or lease?

3504.51 How do I file my bond?

3504.55 What types of bonds are acceptable?

3504.56 If I have more than one permit or lease, may I combine bond coverage?

3504.60 Under what circumstances might BLM elect to change the amount of my bond?

3504.65 What happens to my bond if I do not meet my permit or lease obligations?

3504.66 Must I restore my bond to the full amount if payment has been made from my bond?

3504.70 When will BLM terminate the period of liability of my bond?

3504.71 When will BLM release my bond?

### **Subpart 3505—Prospecting Permits**

3505.10 What is a prospecting permit?

3505.11 Do I need a prospecting permit to collect mineral specimens for non-commercial purposes?

### **APPLYING FOR PROSPECTING PERMITS**

3505.12 How do I obtain a prospecting permit?

3505.13 What must my application include?

3505.15 Is there an acreage limit for my application?

3505.25 How does BLM prioritize applications for prospecting permits?

3505.30 May I amend or change my application after I file it?

3505.31 May I withdraw my application after I file it?

3505.40 After submitting my application, do I need to submit anything else?

3505.45 What is an exploration plan?

3505.50 How will I know if BLM has approved or rejected my application?

3505.51 May I file a revised application if BLM rejects my original application?

### **PROSPECTING PERMIT TERMS AND CONDITIONS**

3505.55 What are my obligations to BLM under an approved prospecting permit?

3505.60 How long is my prospecting permit in effect?

3505.61 May BLM extend the term of my prospecting permit?

3505.62 Under what conditions will BLM extend my prospecting permit?

3505.64 How do I apply for an extension?

3505.65 What information must I include in my extension request?

3505.66 If approved, when is my extension effective?

3505.70 May I relinquish my prospecting permit?

3505.75 What happens if I fail to pay the rental?

## **43 CFR Ch. II (10–1–08 Edition)**

3505.80 What happens when my permit expires?

3505.85 May BLM cancel my prospecting permit for reasons other than failure to pay rental?

### **Subpart 3506—Exploration Licenses**

#### **GENERAL INFORMATION**

3506.10 What is an exploration license?

#### **APPLYING FOR AND OBTAINING EXPLORATION LICENSES**

3506.11 What must I do to obtain an exploration license?

3506.12 Who prepares and publishes the notice of exploration?

3506.13 What information must I provide to BLM to include in the notice of exploration?

3506.14 May others participate in the exploration program?

3506.15 What will BLM do in response to my exploration license application?

#### **TERMS; MODIFICATIONS**

3506.20 After my license is issued, may I modify my license or exploration plan?

3506.25 Once I have a license, what are my responsibilities?

### **Subpart 3507—Preference Right Lease Applications**

3507.11 What must I do to obtain a preference right lease?

3507.15 How do I apply for a preference right lease?

3507.16 Is there a fee or payment required with my application?

3507.17 What information must my preference right lease application include?

3507.18 What do I need to submit to show that I have found a valuable deposit?

3507.19 Under what circumstances will BLM reject my application?

3507.20 May I appeal BLM's rejection of my preference right lease?

### **Subpart 3508—Competitive Lease Applications**

3508.11 What lands are available for competitive leasing?

3508.12 How do I get a competitive lease?

3508.14 How will BLM publish the notice of lease sale?

3508.15 What information will the detailed statement of the lease sale terms and conditions include?

3508.20 How will BLM conduct the sale and handle bids?

3508.21 What happens if I am the successful bidder?

3508.22 What happens if BLM rejects my bid?

## Bureau of Land Management, Interior

## Pt. 3500

### Subpart 3509—Fractional and Future Interest Lease Applications

- 3509.10 What are future interest leases?
- 3509.11 Under what conditions will BLM issue a future interest lease to me?
- 3509.12 Who may apply for a future interest lease?
- 3509.15 Do I have to pay for a future interest lease?
- 3509.16 How do I apply for a future interest lease?
- 3509.17 What information must I include in my application for a future interest lease?
- 3509.18 What will BLM do after it receives my application for a future interest lease?
- 3509.20 When does my future interest lease take effect?
- 3509.25 For what reasons will BLM reject my application for a future interest lease?
- 3509.30 May I withdraw my application for a future interest lease?
- 3509.40 What are fractional interest prospecting permits and leases?
- 3509.41 For what lands may BLM issue fractional interest prospecting permits and leases?
- 3509.45 Who may apply for a fractional interest prospecting permit or lease?
- 3509.46 How do I apply for a fractional interest prospecting permit or lease?
- 3509.47 What information must I include in my application for a fractional interest prospecting permit or lease?
- 3509.48 What will BLM do after it receives my application for a fractional interest lease?
- 3509.49 What terms and conditions apply to my fractional interest prospecting permit or lease?
- 3509.50 Under what conditions would BLM reject my application for a fractional interest prospecting permit or lease?
- 3509.51 May I withdraw my application for a fractional interest prospecting permit or lease?

### Subpart 3510—Noncompetitive Leasing: Fringe Acreage Leases and Lease Modifications

- 3510.11 If I already have a Federal lease, or the mineral rights on adjacent private lands, may I lease adjoining Federal lands that contain the same deposits without competitive bidding?
- 3510.12 What must I do to obtain a lease modification or fringe acreage lease?
- 3510.15 What will BLM do with my application?
- 3510.20 Do I have to pay a fee to modify my existing lease or obtain a fringe acreage lease?

- 3510.21 What terms and conditions apply to fringe acreage leases and lease modifications?

### Subpart 3511—Lease Terms and Conditions

- 3511.10 Do certain leases allow me to mine other commodities as well?
- 3511.11 If I am mining calcium chloride, may I obtain a noncompetitive mineral lease to produce the commingled sodium chloride?
- 3511.12 Are there standard terms and conditions which apply to all leases?
- 3511.15 How long will my lease be in effect?
- 3511.25 What is meant by lease readjustment and lease renewal?
- 3511.26 What if I object to the terms and conditions BLM proposes for a readjusted lease?
- 3511.27 How do I renew my lease?
- 3511.30 If I appeal BLM's proposed new terms, must I continue paying royalties or rentals while my appeal is pending?

### Subpart 3512—Assignments and Subleases

#### HOW TO ASSIGN LEASES

- 3512.11 Once BLM issues me a permit or lease, may I assign or sublease it?
- 3512.12 Is there a fee for requesting an assignment or sublease?
- 3512.13 How do I assign my permit or lease?
- 3512.16 How do I sublease my lease?
- 3512.17 How do I transfer the operating rights in my permit or lease?

#### SPECIAL CIRCUMSTANCES AND OBLIGATIONS

- 3512.18 Will BLM approve my assignment or sublease if I have outstanding liabilities?
- 3512.19 Must I notify BLM if I intend to transfer an overriding royalty to another party?

#### EFFECT OF ASSIGNMENTS ON YOUR OBLIGATIONS

- 3512.25 If I assign my permit or lease, when do my obligations under the permit or lease end?
- 3512.30 What are the responsibilities of a sublessor and a sublessee?
- 3512.33 Does an assignment or sublease alter the permit or lease terms?

### Subpart 3513—Waiver, Suspension or Reduction of Rental and Minimum Royalties

#### RENTAL AND ROYALTY REDUCTIONS

- 3513.11 May BLM relieve me of the lease requirements of rental, minimum royalty, or production royalty while continuing to hold the lease?
- 3513.12 What criteria does BLM consider in approving a waiver, suspension, or reduction in rental or minimum royalty, or a reduction in the royalty rate?

- 3513.15 How do I apply for reduction of rental, royalties or minimum production?
- 3513.16 Do I have to pay a fee when I apply for a waiver, suspension, or reduction of rental, minimum royalty, production royalty, or minimum production?

SUSPENSION OF OPERATIONS AND PRODUCTION  
(CONSERVATION CONCERNS)

- 3513.20 What is a suspension of operations and production (conservation concerns)?
- 3513.21 What is the effect of a suspension of operations and production (conservation concerns)?
- 3513.22 How do I apply for a suspension of operations and production (conservation concerns)?
- 3513.23 May BLM order a suspension of operations and production (conservation concerns)?
- 3513.25 When will my suspension of operations and production (conservation concerns) take effect?
- 3513.26 When and how does my suspension of operations and production (conservation concerns) expire or terminate?

SUSPENSION OF OPERATIONS (ECONOMIC  
CONCERNS)

- 3513.30 What is a suspension of operations (economic concerns)?
- 3513.31 What is the effect of a suspension of operations (economic concerns)?
- 3513.32 How do I apply for a suspension of operations (economic concerns)?
- 3513.33 When will my suspension of operations (economic concerns) take effect?
- 3513.34 When and how does my suspension of operations (economic concerns) expire or terminate?

**Subpart 3514—Lease Relinquishments and  
Cancellations**

RELINQUISHING YOUR LEASE

- 3514.11 May I relinquish my lease or any part of my lease?
- 3514.12 What additional information should I include in a request for partial relinquishment?
- 3514.15 Where do I file my relinquishment?
- 3514.20 When is my relinquishment effective?
- 3514.21 When will BLM approve my relinquishment?

CANCELLATIONS, FORFEITURES, AND OTHER  
SITUATIONS

- 3514.25 When does my lease expire?
- 3514.30 May BLM cancel my lease?
- 3514.31 May BLM waive cancellation or forfeiture?
- 3514.32 Will BLM give me an opportunity to remedy a violation of the lease terms?
- 3514.40 What if I am a *bona fide* purchaser and my lease is subject to cancellation?

**Subpart 3515—Mineral Lease Exchanges**

LEASE EXCHANGE REQUIREMENTS

- 3515.10 May I exchange my lease or lease right for another mineral lease or lease right?
- 3515.12 What regulatory provisions apply if I want to exchange a lease or lease right?
- 3515.15 May BLM initiate an exchange?
- 3515.16 What standards does BLM use to assess the public interest of an exchange?
- 3515.18 Will I be notified when BLM is considering initiating an exchange that will affect my lease?

TYPES OF LEASE EXCHANGES

- 3515.20 May I exchange preference rights?
- 3515.21 What types of lands can be exchanged?
- 3515.22 What if the lands to be exchanged are not of equal value?

LEASE EXCHANGE PROCEDURES

- 3515.23 May BLM require me to submit additional information?
- 3515.25 Is BLM required to publish notice or hold a hearing?
- 3515.26 When will BLM make a decision on the exchange?
- 3515.27 Will BLM attach any special provisions to the exchange lease?

**Subpart 3516—Use Permits**

- 3516.10 What are use permits?
- 3516.11 What kinds of permits or leases allow use permits?
- 3516.12 What activities may I conduct under a use permit?
- 3516.15 How do I apply for a use permit?
- 3516.16 What must I include with my application?
- 3516.20 Is there an annual fee or charge for use of the lands?
- 3516.30 What happens if I fail to pay the annual rental on my use permit?

**Subpart 3517—Hardrock Mineral Development Contracts; Processing and Milling Arrangements**

- 3517.10 What are development contracts and processing and milling arrangements?
- 3517.11 Are permits and leases covered by approved agreements exempt from the acreage limitations?
- 3517.15 How do I apply for approval of one of these agreements?
- 3517.16 How does BLM process my application?

AUTHORITY: 5 U.S.C. 552; 30 U.S.C. 189 and 192c; 43 U.S.C. 1701 *et seq.*; and sec. 402, Reorganization Plan No. 3 of 1946 (5 U.S.C. appendix).

## Bureau of Land Management, Interior

## § 3501.1

SOURCE: 64 FR 53536, Oct. 1, 1999, unless otherwise noted.

### Subpart 3501—Leasing of Solid Minerals Other Than Coal and Oil Shale—General

#### § 3501.1 What is the authority for this part?

The statutory authority for the regulations in this group is as follows:

(a) *Leasable minerals*—(1) *Public domain*. The Mineral Leasing Act of 1920, as amended (30 U.S.C. 181 *et seq.*).

(2) *Acquired lands*. The Mineral Leasing Act for Acquired Lands of 1947, as amended (30 U.S.C. 351–359) and the Act of June 28, 1944 (58 Stat. 483–485) for those lands reserved from allotment by section 58 of the supplemental agreement of 1902 (32 Stat. 654) with the Choctaw-Chickasaw Nation of Indians. Congress ratified the purchase contract in the Act of June 24, 1948 (62 Stat. 596) and appropriated funds for the purchase in the Act of May 24, 1949 (63 Stat. 76).

(b) *Hardrock minerals*. (1) Section 402 of Reorganization Plan No. 3 of 1946 (5 U.S.C. Appendix) transferred the functions of the Secretary of Agriculture for the leasing or other disposal of minerals to the Secretary of the Interior for lands acquired under the following statutes:

(i) The Act of March 4, 1917 (16 U.S.C. 520);

(ii) Title II of the National Industrial Recovery Act of June 16, 1933 (40 U.S.C. 401, 403(a) and 408);

(iii) The 1935 Emergency Relief Appropriation Act of April 8, 1935 (48 Stat. 115, 118);

(iv) Section 55 of Title I of the Act of August 24, 1935 (49 Stat. 750, 781);

(v) The Act of July 22, 1937 (50 Stat. 522, 525, 530), as amended July 28, 1942 (7 U.S.C. 1011(c) and 1018); and

(vi) Section 3 of the Act of June 28, 1952 (66 Stat. 285).

(2) Section 3 of the Act of September 1, 1949 (30 U.S.C. 192c) authorized the issuance of mineral leases or permits for the exploration, development and utilization of minerals, other than those covered by the Mineral Leasing Act for Acquired Lands, in certain lands added to the Shasta National

Forest by the Act of March 19, 1948 (62 Stat. 83).

(3) The Act of June 30, 1950 (16 U.S.C. 508(b)) authorizes leasing of the hardrock minerals on National Forest lands in Minnesota.

(c) *Special acts*. (1) Gold, silver or quicksilver in confirmed private land grants are covered by the Act of June 8, 1926 (30 U.S.C. 291–293).

(2) Reserved minerals in lands patented to the State of California for parks or other purposes are covered by the Act of March 3, 1933 (47 Stat. 1487), as amended by the Act of June 5, 1936 (49 Stat. 1482) and the Act of June 29, 1936 (49 Stat. 2026).

(3) National Park Service Areas. Congress authorized mineral leasing, including the leasing of nonleaseable minerals in the manner prescribed by section 10 of the Act of August 4, 1939 (43 U.S.C. 387), in the following national recreation areas:

(i) Lake Mead National Recreation Area—The Act of October 8, 1964 (16 U.S.C. 460n-*et seq.*);

(ii) Whiskeytown Unit of the Whiskeytown-Shasta-Trinity National Recreation Area—The Act of November 8, 1965 (16 U.S.C. 460q-*et seq.*);

(iii) Glen Canyon National Recreation Area—The Act of October 27, 1972 (16 U.S.C. 460dd *et seq.*).

(4) Shasta-Trinity Units of the Whiskeytown-Shasta-Trinity National Recreation Area. Section 6 of the Act of November 8, 1965 (16 U.S.C. 460q-*et seq.*) authorizes mineral leasing, including the leasing of nonleaseable minerals in the manner prescribed by section 3 of the Act of September 1, 1949 (30 U.S.C. 192c), on lands within the Shasta-Trinity Units of the Whiskeytown-Shasta-Trinity National Recreation Area.

(5) White Mountains National Recreation Area. Sections 403, 404, and 1312 of the Alaska National Interest Lands Conservation Act (16 U.S.C. 460mm–2 through 460mm–4) authorize the Secretary of the Interior to permit the removal of the nonleaseable minerals from lands or interests in lands within the recreation area in the manner described by section 10 of the Act of August 4, 1939, as amended (43 U.S.C. 387), and the removal of leaseable minerals from lands or interest in lands within

the recreation area in accordance with the mineral leasing laws.

(d) *Land management.* The Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 *et seq.*) authorizes the management and use of the public lands.

(e) *Fees.* Section 304 of FLPMA (43 U.S.C. 1734) authorizes the Secretary to establish reasonable filing and service fees for applications and other documents relating to the public lands. The Independent Offices Appropriation Act (31 U.S.C. 9701) authorizes agencies to charge fees to recover the costs of providing services or things of value.

[64 FR 53536, Oct. 1, 1999, as amended at 70 FR 58876, Oct. 7, 2005]

#### § 3501.2 What is the scope of this part?

(a) This part applies to minerals other than oil, gas, coal and oil shale, leased under the mineral leasing acts, and to hardrock minerals leasable under Reorganization Plan No. 3 of 1946, on any unclaimed, undeveloped area of available public domain or acquired lands where leasing of these specific minerals is allowed by law. Special areas identified in part 3580 of this title and asphalt on certain lands in Oklahoma also are leased under this part. Check part 3580 to identify any special provisions that apply to those special areas.

(b) This part does not apply to Indian lands or minerals except where expressly noted.

#### § 3501.5 What terms do I need to know to understand this part?

You need to know the following terms, which are used frequently in this part:

*Acquired lands* means lands or interests in lands, including mineral estates, which the United States obtained through purchase, gift, or condemnation. It includes all lands BLM administers for hardrock mineral leasing other than public domain lands.

*Chiefly valuable*, for the purposes of this part, means the land is more valuable for the development of sodium, sulphur or potassium than for any non-mineral use of the land.

*Hardrock minerals* include base metals, precious metals, industrial minerals, and precious or semi-precious

gemstones. Hardrock minerals do not include coal, oil shale, phosphate, sodium, potassium, or gilsonite deposits. Also, hardrock minerals do not include commodities the government sells such as common varieties of sand, gravel, stone, pumice or cinder. The term hardrock minerals as used here includes mineral deposits that are found in sedimentary and other rocks.

*Leasable minerals*, for purposes of this part, means the chlorides, sulfates, carbonates, borates, silicates or nitrates of potassium or sodium and related products; sulphur on public lands in the States of Louisiana and New Mexico and on all acquired lands; phosphate, including associated and related minerals; asphalt in certain lands in Oklahoma; and gilsonite (including all vein-type solid hydrocarbons).

*MMS* means the Minerals Management Service.

*Permit* means prospecting permit, unless otherwise specified.

*Valuable deposit*, for the purposes of this part, means an occurrence of minerals of such character that a person of ordinary prudence would be justified in the further expenditure of his or her labor and means, with a reasonable prospect of success in developing a profitable mine.

#### § 3501.10 What types of mineral use authorizations can I get under these rules?

BLM issues the mineral use authorizations listed below to qualified individuals. Some authorizations are not available for certain commodities. See the subparts referenced in each subsection for more information.

(a) "Prospecting permits" let you explore for leasable mineral deposits on lands where BLM has determined that prospecting is needed to determine the existence of a valuable deposit. See subpart 3505 of this part.

(b) "Exploration licenses" let you explore in areas with known deposits of a leasable mineral to obtain data. With an exploration license, you do not get any preference or other right to a lease. See subpart 3506 of this part.

(c) "Preference right leases" are issued to holders of prospecting permits who, during the term of the permit, demonstrate the discovery of a

valuable deposit of the leasable mineral for which BLM issued the permit. There are other requirements. The requirements for mine plans are in subpart 3592 of part 3590 of this chapter. See subpart 3507 of this part.

(d) "Competitive leases" are issued by competitive bidding for known deposits of a leasable mineral. See subpart 3508 of this part.

(e) "Fringe acreage leases" are issued noncompetitively for known deposits of leasable minerals on Federal lands adjacent to existing deposits, when the Federal deposits can be mined only as part of an adjacent operation. See subpart 3510 of this part.

(f) "Lease modifications" add acreage containing known deposits of a leasable mineral to an adjacent Federal lease of the same mineral, provided the deposits can be mined only as part of the larger mining operation. See subpart 3510 of this part.

(g) "Use permits" are available to holders of phosphate and sodium leases so that they may use the surface of unappropriated and unentered public lands for the proper extraction, treatment, or removal of the phosphate or sodium deposits. See subpart 3516 of this part.

**§3501.16 Does my permit or lease grant me an exclusive right to develop the lands covered by the permit or lease?**

No. Your permit or lease gives you an exclusive right to the mineral, but not to the lands. BLM may allow other uses or disposal of the lands, including leasing of other minerals, if those uses or disposals will not unreasonably interfere with your operation. If BLM issues other permits or leases covering the lands contained within your permit or lease, they will contain suitable stipulations for simultaneous operation based on consideration of safety, environmental protection, conservation, ultimate recovery of the resource, and other factors. You must also make all reasonable efforts to avoid interference with other authorized uses. In cases where the date of the lease is used to determine priority for development and a lease is renewed, BLM will use the effective date of the original

lease to determine priority for development.

**§3501.17 Are there any general planning or environmental considerations that affect issuance of my permit or lease?**

(a) BLM will not issue you a permit or lease unless it conforms with the decisions, terms and conditions of an applicable comprehensive land use plan.

(b) BLM or the surface management agency will comply with any applicable environmental requirements before issuing you a permit or lease. This may result in conditions on your permit or lease.

(c) BLM will issue permits and leases consistent with any unsuitability designation under part 1600 of this title.

**§3501.20 If BLM approves my application for a use authorization under this part, when does it become effective?**

Your lease, permit, or other use authorization is effective the first day of the month after BLM signs it, unless you request in writing and BLM agrees to make it effective the first day of the month in which it is approved. This applies to all leases, licenses, permits, transfers and assignments in this part, unless a specific regulation provides otherwise.

**§3501.30 May I appeal BLM's decisions under this part?**

Any party adversely affected by a BLM decision under this part may appeal the decision under parts 4 and 1840 of this title.

## Subpart 3502—Qualification Requirements

### LEASE QUALIFICATIONS

**§3502.10 Who may hold permits and leases?**

You may hold an interest in permits or leases under this part only if you meet the requirements of 30 U.S.C. 184. You must be:

- (a) An adult citizen of the United States;
- (b) An association (including partnerships and trusts) of such citizens;

### § 3502.13

(c) A corporation organized under the laws of the United States or of any U.S. State or territory;

(d) A legal guardian of a minor United States citizen;

(e) A trustee of a trust where the beneficiary is a minor but the trustee is qualified to hold a permit or lease; or

(f) any other person authorized to hold a lease under 30 U.S.C. 184.

### § 3502.13 May foreign citizens hold permits or leases?

No. However, foreign citizens may hold stock in United States corporations that hold leases or permits if the laws, customs, or regulations of their country do not deny similar privileges to citizens or corporations of the United States.

### § 3502.15 Are there any additional restrictions on holding leases or interests in leases?

Yes. If you are a member of Congress or an employee of the Department of the Interior, except as provided in part 20 of this title, you may not acquire or hold any Federal lease, or lease interest. (Officer, agent or employee of the Department-see part 20 of this title; Member of Congress-see R.S. 3741; 41 U.S.C. 22; 18 U.S.C. 431-433). Also, BLM may not issue any lease or permit which causes a conflict of interest. See 5 CFR part 2635.

### § 3502.20 Will BLM issue a lease to me if I am not complying with the diligence requirements of the Mineral Leasing Act?

BLM will not issue you a lease or renew your lease, or approve a transfer of any lease or interest in a lease for you unless you are complying with section 2(a)(2)(A) of the Mineral Leasing Act (30 U.S.C. 201(2)(A)) for any of your existing leases that are subject to that provision. For Federal coal leases, BLM will determine compliance under § 3472.1-2(e) of this title. If BLM issues you a lease when you are in violation of section 2(a)(2)(A), BLM must void your lease under § 3514.30(b).

## 43 CFR Ch. II (10-1-08 Edition)

### HOW TO SHOW LEASE QUALIFICATIONS

### § 3502.25 Where do I file evidence that I am qualified to hold a permit or lease?

You must file evidence with BLM that you meet the qualification requirements in this subpart. You may file this evidence separately from your permit or lease application, but file it in the same office as your application.

### § 3502.26 May I supplement or update my qualifications statement?

After we accept your qualifications, you may send additional information to the same BLM office by referring to the serial number of the record in which your evidence is filed. All changes to your qualifications statement must be in writing. You must make sure that your evidence is current, accurate and complete.

### § 3502.27 If I am an individual, what information must I give BLM in my qualifications statement?

If you are an individual, send us a signed statement showing that:

(a) You are a U.S. citizen; and

(b) Your acreage holdings do not exceed the limits in § 3503.37 of this part. This includes your holdings through a corporation, association, or partnership in which you are the beneficial owner of more than 10% of the stock or other instruments of control.

### § 3502.28 If I am an association or a partnership, what information must I give BLM in my qualifications statement?

Send us:

(a) A signed statement setting forth:

(1) The names, addresses, and citizenship of all members who own or control 10 percent or more of the association or partnership;

(2) The names of the members authorized to act on behalf of the association or partnership; and

(3) That the association or partnership's acreage holdings for the particular mineral concerned do not exceed the acreage limits in § 3503.37 of this part.

(b) A copy of the articles of the association or the partnership agreement.

## Bureau of Land Management, Interior

## § 3502.41

### **§ 3502.29 If I am a guardian or trustee for a trust holding on behalf of a beneficiary, what information must I give BLM in my qualifications statement?**

Send us:

- (a) A signed statement setting forth:
  - (1) The beneficiary's citizenship;
  - (2) Your citizenship;
  - (3) The grantor's citizenship, if the trust is revocable; and
  - (4) That the acreage holdings of the beneficiary, the guardian or trustee, or the grantor, if the trust is revocable, cumulatively do not exceed the acreage limitations in § 3503.37 of this part; and
- (b) A copy of the court order or other document authorizing or creating the trust or guardianship.

### **§ 3502.30 If I am a corporation, what information must I give BLM in my qualifications statement?**

A corporate officer or authorized attorney-in-fact must send BLM a signed statement stating:

- (a) The State or territory of incorporation;
- (b) The name and citizenship of, and percentage of stock owned, held, or controlled by, any stockholder owning, holding, or controlling more than 10 percent of the stock of the corporation;
- (c) The names of the officers authorized to act on behalf of the corporation; and
- (d) That the corporation's acreage holdings, and those of any stockholder identified under paragraph (b) of this section, do not exceed the acreage limitations in § 3503.37 of this part.

#### **SPECIAL SITUATIONS AND ADDITIONAL CONCERNS**

### **§ 3502.33 If I represent an applicant as an attorney-in-fact, do I have to submit anything to BLM?**

Yes. Send us evidence of your authority to act on behalf of the applicant, and a statement of the applicant's qualifications and acreage holdings if you are empowered to make this statement. Otherwise, the applicant must send us this information separately.

### **§ 3502.34 What must I submit if there are other parties in interest?**

If you are not the sole party in interest in an application for a permit or

lease, include with your application the names of all other parties who hold or will hold any interest in the application or in the permit or lease when BLM issues it. All interested parties must show they are qualified to hold permit or lease interests.

### **§ 3502.40 What happens if an applicant or successful bidder for a permit or lease dies before the permit or lease is issued?**

(a) If probate of the estate has been completed or is not required, BLM will issue the permit or lease to the heirs or devisees, or their guardian. We will recognize the heirs or devisees or their guardian as the record title holders of the permit or lease. They must send us:

- (1) A certified copy of the will or decree of distribution, and if no will or decree exists, a statement signed by the heirs that they are the only heirs and citing the provisions of the law of the deceased's last domicile showing that no probate is required; and
- (2) A statement signed by each of the heirs or devisees with reference to citizenship and holdings similar to that required by § 3502.27 of this part. If the heir or devisee is a minor, the guardian or trustee must sign the statement.

(b) If probate is required but has not been completed, BLM will issue the permit or lease to the executor or administrator of the estate. BLM considers the executor or administrator as the record title holder of the permit or lease. He or she must send:

- (1) Evidence that the person who, as executor or administrator, submits lease and bond forms has authority to act in that capacity and to sign those forms;
- (2) Evidence that the heirs or devisees are the only heirs or devisees of the deceased; and
- (3) A statement signed by each heir or devisee concerning citizenship and holdings, as required by § 3502.27 of this part.

### **§ 3502.41 What happens to a permit or lease if the permittee or lessee dies?**

If the permittee or lessee dies, BLM will recognize as the record title holder of the permit or lease:

- (a) The executor or administrator of the estate, if probate is required but

## § 3502.42

has not been completed and they have filed the evidence required by § 3502.40(b) of this part; or

(b) The heirs or devisees, if probate has been completed or is not required, if they have filed evidence required by § 3502.40(a) of this part.

### **§ 3502.42 What happens if the heir is not qualified?**

We will allow unqualified heirs to hold ownership in a lease or permit for up to two years. During that period, the heir must either become qualified or divest himself or herself of the interest.

## **Subpart 3503—Areas Available for Leasing**

### **AVAILABLE AREAS UNDER BLM MANAGEMENT**

### **§ 3503.10 Are all Federal lands available for leasing under this part?**

No. The Secretary of the Interior may not lease lands on any of the following Federal areas:

(a) Land recommended for wilderness allocation by the surface managing agency;

(b) Lands within BLM wilderness study areas;

(c) Lands designated by Congress as wilderness areas; and

(d) Lands within areas allocated for wilderness or further planning in Executive Communication 1504, Ninety-Sixth Congress (House Document Number 96-119), unless such lands are allocated to uses other than wilderness by a land and resource management plan or have been released to uses other than wilderness by an act of Congress.

### **§ 3503.11 Are there any other areas in which I cannot get a permit or lease for the minerals covered by this part?**

Prospecting permits and leases for solid leasable and hardrock minerals are not available under this part for:

(a) Lands within the boundaries of any unit of the National Park System, except as expressly authorized by law;

(b) Lands within Indian Reservations, except the Uintah and Ouray Indian Reservation, Hillcreek Extension, State of Utah;

## **43 CFR Ch. II (10-1-08 Edition)**

(c) Lands within incorporated cities, towns and villages;

(d) Lands within the National Petroleum Reserve-Alaska, oil shale reserves and national petroleum reserves;

(e) Lands acquired by the United States for development of helium, fissionable material deposits or other minerals essential to the defense of the country, except leasable minerals;

(f) Lands acquired by foreclosure or otherwise for resale;

(g) Acquired lands reported as surplus under the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 471 *et seq.*);

(h) Any tidelands or submerged coastal lands within the continental shelf adjacent or littoral to any part of lands within the jurisdiction of the United States;

(i) Lands within the Grand Staircase-Escalante National Monument;

(j) Lands adjacent to or within Searles Lake, California, which are not available for potassium prospecting permits (BLM will lease potassium in this area by competitive bidding); and

(k) Any other lands withdrawn from mineral leasing.

### **§ 3503.12 For what areas may I receive a sulphur permit or lease?**

You may get a sulphur permit or lease for public domain lands in the States of Louisiana and New Mexico or for Federal acquired lands nationwide, subject to the exceptions listed in §§ 3503.10 and 3503.11 of this part.

### **§ 3503.13 For what areas may I receive a hardrock mineral permit or lease?**

Subject to the consent of the surface managing agency, you may obtain hardrock mineral permits and leases only in the following areas:

(a) Lands identified in Reorganization Plan No. 3 of 1946, for which jurisdiction for mineral leasing was transferred to the Secretary of the Interior. These include lands originally acquired under the following acts:

(1) 16 U.S.C. 520 (Weeks Act);

(2) Title II of the National Industrial Recovery Act (40 U.S.C. 401, 403a and 408);

(3) The 1935 Emergency Relief Appropriation Act (48 Stat. 115 and 118);

## Bureau of Land Management, Interior

## § 3503.20

(4) Section 55 of Title I of the Act of August 24, 1935 (49 Stat. 750 and 781); and

(5) The Act of July 22, 1937 (7 U.S.C. 1011 (c) and 1018 (repealed), Bankhead-Jones Act).

(b) Lands added to the Shasta National Forest by Act of March 19, 1948 (62 Stat. 83);

(c) Public Domain Lands within the National Forests in Minnesota (16 U.S.C. 508 (b));

(d) Lands in New Mexico that are portions of Juan Jose Lobato Grant (North Lobato) and Anton Chica Grant (El Pueblo) as described in section 1 of the Act of June 28, 1952 (66 Stat. 285);

(e) Lands in the Shasta and Trinity Units of the Whiskeytown-Shasta-Trinity National Recreation Areas;

(f) The following National Park Lands:

(1) Lake Mead National Recreation Area;

(2) Glen Canyon National Recreation Area; and

(3) Lands in the Whiskeytown Unit of the Whiskeytown-Shasta-Trinity National Recreation Area;

(g) Lands patented to the State of California for park or other purposes where minerals were reserved to the United States; and

(h) White Mountains National Recreation Area, Alaska.

### **§ 3503.14 For what areas may I get a permit or lease for asphalt?**

You may get leases for asphalt only on certain Federal lands in Oklahoma identified by law. See 32 Stat. 654 (1902) and 58 Stat. 483 (1944). You may not obtain prospecting permits for asphalt.

### **§ 3503.15 May I lease the gold or silver reserved to the United States on land I hold under a private land claim in New Mexico?**

If you hold the remaining record title interest or operating rights interest in confirmed private land grants in New Mexico, you may obtain a lease for gold and silver reserved to the United States. See parts 3580 and 3581 of this chapter for leasing requirements.

### **§ 3503.16 May I obtain permits or leases for sand and gravel in Nevada under the terms of this part?**

You may not get new leases or permits under these regulations; BLM will consider any new applications for sand and gravel under the regulations at part 3600 of this chapter. Also, beginning January 1, 2000, BLM will not renew any existing sand and gravel lease for certain lands the United States received under an exchange with the State of Nevada.

## AVAILABLE AREAS MANAGED BY OTHERS

### **§ 3503.20 What if another Federal agency manages the lands I am interested in?**

(a) *Public domain lands.* BLM will issue a permit or lease for public domain lands where the surface is administered by another Federal agency only after consulting with the surface management agency. Some laws applicable to public domain lands require us to obtain the consent of the surface management agency before we issue a lease or permit.

(b) *Acquired lands.* For all lands not subject to paragraph (a) of this section where the surface is managed by another Federal agency, we must have written consent from the surface management agency before we issue permits or leases. The surface management agency may request further information about surface disturbance and reclamation before granting its consent.

(c) *Appeal.* If a surface management agency refuses to consent or imposes conditions on your permit or lease, you may appeal its decision under that agency's appeal provisions. If you notify BLM within 30 days after receiving BLM's decision denying or conditioning your permit or lease that you have appealed the surface management agency's decision, we will suspend the time for filing an appeal under 43 CFR parts 4 and 1840 until the surface management agency's decision is final and not subject to further administrative or judicial review.

## § 3503.21

### **§ 3503.21 What happens if the surface of the land I am interested in belongs to a non-Federal political subdivision or charitable organization?**

(a) BLM will notify the entity who owns the surface of the lands included within your permit or lease application if that entity is:

(1) Any State or political subdivision, agency or instrumentality thereof;

(2) A college or any other educational corporation or association; or

(3) A charitable or religious corporation or association.

(b) The entity who owns the surface of the lands in your application will have up to 90 days to suggest any lease stipulations to protect existing surface improvements or uses, or to object to the permit or lease. BLM will then decide whether to issue the permit or lease and which, if any, stipulations identified by the surface owner to include, based on how the interests of the United States would best be served.

### **§ 3503.25 When may BLM issue permits and leases for Federal minerals underlying private surface?**

(a) The regulations in this part apply where the United States disposed of certain lands and those disposals reserved to the United States the right to prospect for, mine, and remove the minerals under applicable leasing laws and regulations.

(b) If the Federal Government acquires minerals through a deed, BLM will follow any special covenants in the deed relating to leasing or permitting.

### **§ 3503.28 Does BLM incorporate any special requirements to protect the lands and resources?**

BLM will specify permit or lease stipulations to adequately use and protect the lands and their resources. This may include stipulations which are required by the surface managing agency, or which are recommended by the surface managing agency or non-federal surface owner and accepted by BLM. (See also part 3580 of this chapter.)

## 43 CFR Ch. II (10–1–08 Edition)

### LAND DESCRIPTIONS

### **§ 3503.30 How should I describe surveyed lands or lands shown on protraction or amended protraction diagrams in states which are part of the Public Land Survey System?**

Describe the lands by legal subdivision, section, township, and range.

### **§ 3503.31 How should I describe lands in states which are part of the Public Land Survey System but have not been surveyed and are not shown on a protraction or amended protraction diagram?**

Describe such lands by metes and bounds in accordance with BLM standard survey practices for the public lands. Connect your description by courses and distances between successive angle points to an official corner of the public land survey system or, for accreted lands, to an angle point that connects to a point on an official corner of the public land survey system to which the accretions belong.

### **§ 3503.32 How should I describe acquired lands?**

You may describe acquired lands by metes and bounds, or you may also use the description shown on the deed or other document that conveyed title to the United States. If you are applying for less than the entire tract acquired by the United States, describe the land using courses and distances tied to a point on the boundary of the requested tract. Where the acquiring agency assigned a tract number to the identical tract you wish to permit or lease, you may describe those lands by the tract number and include a map which clearly shows the lands with respect to the administrative unit or the project of which they are a part. In States outside of the public land survey system, you should describe the lands by tract number, and include a map.

### **§ 3503.33 Will BLM issue me a lease for unsurveyed lands?**

No. All leased areas must be officially surveyed to BLM standards. If you are applying for a permit or lease on unsurveyed or protracted lands, you must pay for the survey. If BLM intends to issue a lease by competitive

**Bureau of Land Management, Interior****§ 3503.40**

bidding, we will pay for surveying the lands.

smallest subdivision for which you may apply. The lands must be in reasonably compact form.

**ACREAGE AMOUNTS****§ 3503.36 Are there any size or shape limitations on the lands I can apply for?**

Generally, a quarter-quarter section, a lot or a protraction block is the

**§ 3503.37 Is there a limit to the acreage of lands I can hold under permits and leases?**

Yes. The limits are summarized in the following table:

Commodity	Maximum acreage for a permit or lease	Maximum acreage of permits and leases in any one State	Maximum acreage in permits and leases nationwide
(a) Phosphate ..	2,560 acres .....	None .....	20,480 acres.
(b) Sodium .....	2,560 acres .....	5,120 acres (may be increased to 30,720 acres to facilitate an economic mine).	None.
(c) Potassium ..	2,560 acres .....	96,000 acres (larger if necessary for extraction of potassium from concentrated brines in connection with an existing mining operation).	None.
(d) Sulphur .....	640 acres .....	1,920 acres in 3 leases or permits .....	None.
(e) Gilsomite .....	5,120 acres .....	7,680 acres .....	None.
(f) Hardrock Minerals.	2,560 acres .....	20,480 acres in permits and leases, 10,240 acres in leases, but can be increased to 20,480 if needed for orderly mine development.	None.
(g) Asphalt .....	640 acres .....	2,560 acres .....	Only available in Oklahoma.

[64 FR 53536, Oct. 1, 1999, as amended at 65 FR 50449, Aug. 18, 2000]

**§ 3503.38 How does BLM compute my acreage holdings?**

(a) The maximum acreage in any one state refers to the acres you hold under a permit or lease on either public domain lands or acquired lands. Acquired lands and public domain lands are counted separately, so you may hold up to the maximum acreage of each at the same time. For example, one person could hold 20,000 acres under phosphate leases for public domain lands and 20,000 acres under phosphate leases for acquired lands at the same time.

(b) If your permit or lease is for fractional interest lands, BLM will charge your acreage holdings for a share which is proportionate to the United States' ownership interest. For example, if the United States holds a 25% interest in 200 acres, you will be charged with 50 acres ( $200 \times .25$ ).

(c) BLM will not charge any acreage in a future interest lease against your acreage limitations until the date the permit or lease takes effect.

(d) If you own stock in a corporation or a beneficial interest in an association which holds a lease or permit, your acreage will include your proportionate part of the corporation's or association's share of the total lease or permit acreage. This only applies if you own more than 10 percent of the corporate stock or beneficial interest of the association.

**FILING APPLICATIONS****§ 3503.40 Where do I file my permit or lease application and other necessary documents?**

File your application in the State Office which manages the lands for which you are applying, unless we have designated a different State Office. For purposes of this part, a document is filed when it is received in the proper office.

#### § 3503.41

##### **§ 3503.41 Will BLM disclose information I submit under these regulations?**

All Federal and Indian data and information submitted to the BLM are subject to part 2 of this title. Part 2 includes the regulations of the Department of the Interior covering public disclosure of data and information contained in Department of the Interior records. BLM may make certain mineral information not protected from disclosure under part 2 of this title may be made available for inspection without a Freedom of Information Act (FOIA) request.

##### **§ 3503.42 When I submit confidential, proprietary information, how can I help ensure it is not available to the public?**

When you submit data and information that you believe to be exempt from disclosure by part 2 of this title, you must clearly mark each page that you believe contains confidential information. BLM will keep all data and information confidential to the extent allowed by § 2.13(c) of this title.

##### **§ 3503.43 How long will information I give BLM remain confidential or proprietary?**

The FOIA does not provide an express period of time for which information may be exempt from disclosure to the public. We will review each situation individually and in accordance with guidance provided by part 2 of this title.

##### **§ 3503.44 How will BLM treat Indian information submitted under the Indian Mineral Development Act?**

Under the Indian Mineral Development Act of 1982 (IMDA) (25 U.S.C. 2101 *et seq.*), the Department of the Interior will hold as privileged proprietary information of the affected Indian or Indian tribe—

(a) All findings forming the basis of the Secretary's intent to approve or disapprove any Minerals Agreement under IMDA; and

(b) All projections, studies, data, or other information concerning a Minerals Agreement under IMDA, regardless of the date received, related to—

#### 43 CFR Ch. II (10–1–08 Edition)

(1) The terms, conditions, or financial return to the Indian parties;

(2) The extent, nature, value, or disposition of the Indian mineral resources; or

(3) The production, products, or proceeds thereof.

##### **§ 3503.45 How will BLM administer information concerning other Indian minerals?**

For information concerning Indian minerals not covered by § 3503.44 of this part, BLM will withhold such records as may be withheld under an exemption to the Freedom of Information Act (FOIA) (5 U.S.C. 552) when it receives a request for information related to tribal or Indian minerals held in trust or subject to restrictions on alienation.

##### **§ 3503.46 When will BLM consult with Indian mineral owners when information concerning their minerals is the subject of a FOIA request?**

BLM will notify the Indian mineral owner(s) identified in the records of the Bureau of Indian Affairs (BIA), and the BIA, and give them a reasonable period of time to state objections to disclosure, using the standards and procedures of § 2.15(d) of this title, before making a decision about the applicability of FOIA exemption 4 to protect:

(a) information obtained from a person outside the United States Government; when

(b) following consultation with a submitter under § 2.15(d) of this title, BLM determines that the submitter does not have an interest in withholding the records that can be protected under FOIA; but

(c) BLM has reason to believe that disclosure of the information may result in commercial or financial injury to the Indian mineral owner(s), but is uncertain that such is the case.

#### **Subpart 3504—Fees, Rental, Royalty and Bonds**

##### **GENERAL INFORMATION**

##### **§ 3504.10 What fees must I pay?**

(a) The following table shows fees for various documents in this part.

## Bureau of Land Management, Interior

§ 3504.15

Document	Processing fee
(1) Applications other than those listed below .....	As found in the fee schedule in § 3000.12 of this chapter.
(2) Prospecting permit application .....	Case-by-case basis as described in § 3000.11 of this chapter.
(3) Prospecting permit application amendment .....	As found in the fee schedule in § 3000.12 of this chapter.
(4) Prospecting permit extension .....	As found in the fee schedule in § 3000.12 of this chapter.
(5) Preference right lease application .....	Case-by-case basis as described in § 3000.11 of this chapter.
(6) Successful competitive lease application .....	Case-by-case basis as described in § 3000.11 of this chapter, and modified by §§ 3508.14 and 3508.21.
(7) Future or fractional interest lease application .....	Case-by-case basis as described in § 3000.11 of this chapter.
(8) Lease modification or fringe acreage lease .....	As found in the fee schedule in § 3000.12 of this chapter.
(9) Lease renewal application .....	As found in the fee schedule in § 3000.12 of this chapter.
(10) Assignment, sublease, or transfer of operating rights .....	As found in the fee schedule in § 3000.12 of this chapter.
(11) Transfer of overriding royalty .....	As found in the fee schedule in § 3000.12 of this chapter.
(12) Application to waive, suspend, or reduce your rental, minimum royalty, or royalty rate.	Case-by-case basis as described in § 3000.11 of this chapter.
(13) Use permit .....	As found in the fee schedule in § 3000.12 of this chapter.

(b) Fees for exploration licenses are not administered under this section, but are administered under part 2920 of this chapter.

[72 FR 50887, Sept. 5, 2007]

### § 3504.11 What forms of payment will BLM and MMS accept?

Make your payments to BLM in cash, postal money order, negotiable instrument in U.S. currency, or such other method as BLM may authorize. See MMS regulations at 30 CFR part 218 for their payment requirements.

### § 3504.12 What payments do I submit to BLM and what payments do I submit to MMS?

(a) *Fees and rentals.* (1) Pay all filing and processing fees, all first-year rentals, and all bonus bids for leases to the BLM State Office that manages the lands you are interested in. Make your instruments payable to the U.S. Department of the Interior—Bureau of Land Management.

(2) Pay all second-year and subsequent rentals and all other payments for leases to the Minerals Management Service (MMS). See 30 CFR part 218 for MMS's payment procedures.

(b) *Royalties.* Pay all royalties on producing leases and all payments under

leases in their minimum production period to the MMS.

[64 FR 53536, Oct. 1, 1999, as amended at 70 FR 58877, Oct. 7, 2005]

## RENTALS

### § 3504.15 How does BLM determine my rent?

We set your rent by multiplying the number of acres in your lease or permit by the rental rates shown below. The rates differ for different commodities and some rates increase over time. You must pay rent each year. We round up any fractional acreage to the next highest acre. If you do not know the exact acreage, compute the total acreage by assuming each of the smallest subdivisions is 40 acres. The minimum rental is \$20 per permit or lease for all commodities. Pay the minimum rental or the per-acre rental, whichever is greater.

(a) Annual rental rates for prospecting permits for all commodities are \$.50 per acre or fraction of an acre.

(b) Annual rental rates for leases for each commodity are shown in the table below. The rate shown is for each acre or fraction of an acre in the lease.

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6 to end
(1) Phosphate .....	\$0.25	\$0.50	\$0.50	\$1.00	\$1.00	\$1.00
(2) Sodium .....	0.25	0.50	0.50	0.50	0.50	1.00
(3) Potassium .....	0.25	0.50	0.50	0.50	0.50	1.00
(4) Sulphur .....	0.50	0.50	0.50	0.50	0.50	0.50
(5) Gilsomite .....	0.50	0.50	0.50	0.50	0.50	0.50
(6) Hardrock .....	1.00	1.00	1.00	1.00	1.00	1.00
(7) Asphalt .....	0.25	0.50	0.50	0.50	0.50	1.00

[64 FR 53536, Oct. 1, 1999; 65 FR 11476, Mar. 3, 2000]

**§ 3504.16 When is my rental due after the first year of the lease?**

(a) For prospecting permits, pay your rental in advance each year before the anniversary date of the permit.

(b) For sodium, potassium or asphalt leases, pay your rental in advance before January 1 of each year.

(c) For phosphate leases pay your rental in advance on or before the anniversary date of the lease.

(d) For other mineral leases not covered in paragraph (b) or (c) of this section, pay the rental in advance each year before the anniversary of the effective date of the lease.

(e) MMS will credit your lease rental for any year against the first production royalties or minimum royalties (see § 3504.25 of this part) as the royalties accrue under the lease during that year.

**§ 3504.17 What happens if I do not pay my rental on time?**

(a) If you do not pay your rental on time for a prospecting permit, your permit will automatically terminate.

(b) If you do not pay your rental for a lease on time, BLM will notify you that unless you pay within 30 days from receipt of the notification, BLM will take action to cancel your lease.

ROYALTIES

**§ 3504.20 What are the requirements for paying royalties on production?**

You must pay royalties on any production from your lease in accordance with the terms specified in the lease. See § 3504.21 of this part for minimum royalty rates. Your royalty rate will be a percentage of the quantity or gross value of the output of the produced commodity. Apply the royalty rate to the value of the production determined under MMS regulations in Title 30. For asphalt, the minimum royalty is calculated on a cents-per-ton basis. You may not pay your royalty in quantity without BLM's prior approval.

**§ 3504.21 What are the minimum royalty rates?**

Commodity	Minimum royalty rate
(a) Phosphate .....	5% of gross value of the output of phosphates or phosphate rock and associated or related minerals.
(b) Sodium .....	2% of the quantity or gross value of the output of sodium compounds and related products at the point of shipment to market.
(c) Potassium .....	2% of the quantity or gross value of the output of potassium compounds and related products at the point of shipment to market.
(d) Sulphur .....	5% of the quantity or gross value of the output of sulphur at the point of shipment to market.
(e) Gilsonite .....	No minimum royalty rate.
(f) Hardrock Minerals .....	No minimum royalty rate.
(g) Asphalt .....	25 cents per ton (2,000 pounds) of marketable production.

**§ 3504.22 How will I know what the royalty rate is on my lease production?**

BLM determines the rate for each lease before we offer it. If BLM offered the lease competitively, the rates are in the notice of lease sale. If you applied for a noncompetitive lease, BLM will send you a royalty rate schedule for your concurrence and signature before we issue you the lease. BLM attaches royalty rates to, and makes them a part of, all leases.

**§ 3504.25 Do I have to produce a certain amount per year?**

(a) If your mineral lease was issued, renewed or readjusted any time after April 22, 1986, you must either produce a minimum amount or pay a minimum royalty in lieu of production each lease year. This requirement begins in the sixth lease year or the first full year of a renewed or readjusted lease, whichever comes first. The minimum royalty payment is \$3 per acre or fraction of an acre. For phosphate, sulphur, gilsonite

## Bureau of Land Management, Interior

## § 3504.55

and hardrock leases, pay the minimum royalty in advance before the lease anniversary date. For sodium, potassium and asphalt leases the minimum royalty is due in advance before January 1 of each year.

(b) MMS will credit any lease rental payment (see § 3504.16(d) of this part) against the minimum royalty payment amount due under paragraph (a) of this section. MMS then will credit your minimum royalty as specified under paragraph (a) to your production royalties for that year only. For example, if you pay \$1,000 in rental and you owe \$3,000 in minimum royalties, you will pay a total of \$3,000 for both. If during the lease year you accrue \$10,000 in production royalties, MMS will credit \$3,000 against that amount.

(c) Hardrock mineral leases or development or operating agreements subject to escalating rentals are exempt from minimum production and minimum royalty requirements.

### § 3504.26 May I create overriding royalties on my Federal lease?

Yes, but:

(a) BLM may order you to suspend or reduce your overriding royalties to as low as one percent if we determine your overriding royalty could:

- (1) Cause you to abandon your lease prematurely; or
- (2) Prevent mining of marginally economic or low-grade deposits.

(b) Where more than one overriding royalty interest is involved, BLM will apply any suspension or reduction to these interests in the manner agreed upon by the interest holders. If there is no agreement, we will order suspensions and reductions starting with the most recent interest and continuing in reverse order of the dates the overriding interests were created.

(c) If you apply for a royalty rate reduction under subpart 3513, of this part, we may request that you reduce your overriding royalties.

## BONDING

### § 3504.50 Do I have to file a bond to receive a permit or lease?

Yes, unless paragraph (b) of this section applies.

(a) BLM will set permit and lease bond amounts for each lease or permit. We will consider the cost of complying with all permit and lease terms, including royalty and reclamation requirements, when setting bond amounts. The minimum bond amount for prospecting permits is \$1000. The minimum bond amount for leases is \$5000.

(b) BLM may enter into agreements with states to provide for your state reclamation bond to satisfy our reclamation bonding requirements. We may need additional information from you to determine whether your state bond will cover all of our reclamation requirements. If you have filed a current bond with a state where we have an agreement, and we determine that your state bond will satisfy all BLM reclamation bonding requirements, you will only need to file evidence of that state bond with BLM. We will require an additional bond from you if we determine your state bond does not cover all of our bonding requirements.

### § 3504.51 How do I file my bond?

File one copy of your bond in the BLM State office where you applied for a permit or lease. You must use an approved BLM form. You must sign the form if you are the principal of a personal bond. For surety bonds, both you and an acceptable surety must sign the form.

### § 3504.55 What types of bonds are acceptable?

You may file either a personal bond or a surety bond.

(a) Personal bonds may be in the form of:

- (1) Cashier's check;
- (2) Certified check; or
- (3) Negotiable U.S. Treasury bonds

equal in value to your bond amount. If you submit Treasury bonds, you must give the Secretary full authority to sell the securities if you default on your permit or lease obligations.

(b) Surety bonds must be issued by qualified surety companies approved by the Department of the Treasury. You can get a list of qualified sureties at any BLM State Office.

## **§ 3504.56**

### **§ 3504.56 If I have more than one permit or lease, may I combine bond coverage?**

Yes. Instead of filing separate bonds for each permit or lease, you may file a bond to cover all permits and leases for a specific mineral in any one state, or nationwide. We will establish the amount of the bond; however, the minimums are:

(a) \$25,000 for statewide bonds. File these bonds in the BLM State Office for the state where your leases are located.

(b) \$75,000 for nationwide bonds. File these bonds in any BLM State Office.

### **§ 3504.60 Under what circumstances might BLM elect to change the amount of my bond?**

We may increase or decrease your bond amount when we determine that a change in coverage is appropriate, but we will not decrease your bond amount below the minimum.

### **§ 3504.65 What happens to my bond if I do not meet my permit or lease obligations?**

BLM will demand payment from your bond to cover any obligations on which you default. Your bond will be reduced accordingly. If the surety makes a payment, we will reduce the face amount of the surety bond and the surety's liability by the amount of the payment.

### **§ 3504.66 Must I restore my bond to the full amount if payment has been made from my bond?**

Yes. After any default, BLM will notify you of the amount you must pay to restore your bond. We will give you no more than six months to post a new bond or increase the existing bond to its pre-default level. You may elect to file separate or substitute bonds for each permit or lease. If you do not replace your bond, BLM may take action to cancel the leases or permits covered by the bond.

### **§ 3504.70 When will BLM terminate the period of liability of my bond?**

BLM may terminate the period of liability for any bond only when you have filed an acceptable replacement bond or when you have met all your permit or lease terms and conditions.

## **43 CFR Ch. II (10–1–08 Edition)**

### **§ 3504.71 When will BLM release my bond?**

(a) BLM will release your bond when we have determined, after the passage of a reasonable period of time, that you have done the following:

(1) Paid all royalties, rentals, penalties, and assessments;

(2) Satisfied all permit or lease obligations;

(3) Reclaimed the site; and

(4) Taken effective measures to ensure that the mineral prospecting or development activities will not adversely affect surface or subsurface resources.

(b) If you assign your lease or permit, BLM will release your bond after we determine that you met the requirements of paragraphs (a)(1) and (a)(2) of this section. Also, your assignee must provide an acceptable bond or other surety.

## **Subpart 3505—Prospecting Permits**

### **§ 3505.10 What is a prospecting permit?**

(a) A prospecting permit gives you the exclusive right to prospect on and explore lands available for leasing under this part to determine if a valuable deposit exists of:

(1) Phosphate;

(2) Sodium;

(3) Potassium;

(4) Sulphur;

(5) Gilsonite; or

(6) A hardrock mineral.

(b) Prospecting permits are not available for asphalt.

(c) You may remove only material needed to demonstrate the existence of a valuable mineral deposit.

### **§ 3505.11 Do I need a prospecting permit to collect mineral specimens for non-commercial purposes?**

No. You may collect mineral specimens for hobby, recreation, scientific, research or similar purposes without a prospecting permit. However, the surface management agency may require a use permit. BLM's regulations for collecting mineral specimens are at part 8365 of this title.

## Bureau of Land Management, Interior

## § 3505.45

### APPLYING FOR PROSPECTING PERMITS

#### **§ 3505.12 How do I obtain a prospecting permit?**

Deliver 3 copies of the BLM application form to the BLM office with jurisdiction over the lands you are interested in. Include the first year's rental with your application. You will also be charged a processing fee, which BLM will determine on a case-by-case basis as described in § 3000.11 of this chapter. For more information on fees and rentals, see subpart 3504 of this part.

[70 FR 58877, Oct. 7, 2005]

#### **§ 3505.13 What must my application include?**

Your application must be legible and dated. It must contain your or your agent's original signature. It must also include:

- (a) Your name and address;
- (b) A statement of your qualifications and holdings (see subpart 3502 of this part);
- (c) A complete and accurate land description (see subpart 3503 of this part);
- (d) Three copies of any maps needed to accompany the description; and
- (e) The name of all the commodities for which you are applying.

#### **§ 3505.15 Is there an acreage limit for my application?**

The acreage in your application must not exceed the maximum allowed for the permit. See § 3503.37 of this part for the acreage limits applicable for the different minerals. BLM will not issue a permit if it causes you to exceed the limits shown in the table in that section.

#### **§ 3505.25 How does BLM prioritize applications for prospecting permits?**

BLM will prioritize applications based on the time of filing. If more than one application is filed at the same time for the same commodity on the same lands, we will hold a public drawing in accordance with subpart 1821 of this title to determine priority.

#### **§ 3505.30 May I amend or change my application after I file it?**

Yes. However, if your amendment adds lands, we will assign priority to those added lands from the date you

filed the amended application. You must include the rental for any added lands and the processing fee for prospecting permit application amendments found in the fee schedule in § 3000.12 of this chapter with your amended application.

[64 FR 53536, Oct. 1, 1999, as amended at 70 FR 58877, Oct. 7, 2005]

#### **§ 3505.31 May I withdraw my application after I file it?**

Yes. Just send us a written request. If you withdraw your application in whole or in part before BLM signs the permit, we will refund the corresponding proportionate share of your rental payment. BLM will retain any fees already paid for processing the application.

[64 FR 53536, Oct. 1, 1999, as amended at 70 FR 58877, Oct. 7, 2005]

#### **§ 3505.40 After submitting my application, do I need to submit anything else?**

Yes. After we initially review your permit application, but before we issue the prospecting permit, we will require you to submit three copies of an exploration plan under § 3505.45 of this part. You must also submit a bond. See 43 CFR part 3504, especially 43 CFR 3504.50, for information on bonds.

#### **§ 3505.45 What is an exploration plan?**

An exploration plan shows how you intend to determine the existence and workability of a valuable deposit. Your exploration plan must include as much of the following information as possible:

(a) The names, addresses and telephone numbers of persons responsible for operations under your plan and to whom BLM will deliver notices and orders;

(b) A brief description of the environment your plan may affect. Focus on the affected geologic, water and other physical factors, and the distribution and abundance of vegetation and habitat of fish and wildlife, particularly threatened and endangered species. Include maps with your descriptions, and discuss the present land use in and adjacent to the area;

(c) A narrative description showing:

## § 3505.50

(1) The method of exploration and types of equipment you will use;

(2) The measures you will take to prevent or control fire, soil erosion, pollution of surface and ground water, pollution of air, damage to fish and wildlife or their habitat, damage to other natural resources, and hazards to public health and safety, including specific actions necessary to meet all applicable laws and regulations;

(3) The method for plugging drill holes; and

(4) The measures you will take to reclaim the land, including:

(i) A reclamation schedule;

(ii) The method of grading, backfilling, soil stabilization, compacting and contouring;

(iii) The method of soil preparation and fertilizer application;

(iv) The type and mixture of shrubs, trees, grasses, forbs or other vegetation you will plant; and

(v) The method of planting, including approximate quantity and spacing;

(d) The estimated timetable for each phase of the work and for final completion of the program;

(e) Suitable topographic maps or aerial photographs showing existing bodies of surface water, topographic, cultural and drainage features, and the proposed location of drill holes, trenches and roads; and

(f) Any other data which BLM may require.

### § 3505.50 How will I know if BLM has approved or rejected my application?

(a) BLM will review your application to determine compliance with land use plans, environmental requirements, unsuitability criteria and whether the lands are within a known leasing area. BLM's decision whether to approve your application is at BLM's complete discretion. If we approve your application, we will issue your permit. If we reject your application, we will mail you a written decision. This notice will:

(1) Detail the reasons why we rejected your application;

(2) Identify any items you will need to correct in your application; and

(3) Tell you how you may appeal an adverse decision.

## 43 CFR Ch. II (10–1–08 Edition)

(b) If we do not accept your application, we will refund your rental payment. We will retain any fees already paid for processing the application.

[64 FR 53536, Oct. 1, 1999, as amended at 70 FR 58877, Oct. 7, 2005]

### PROSPECTING PERMIT TERMS AND CONDITIONS

#### § 3505.55 What are my obligations to BLM under an approved prospecting permit?

You must:

(a) Pay your annual rental in a timely fashion. See §§ 3504.15 and 3504.16 of this part;

(b) Comply with all permit terms and stipulations the surface management agency attached to the permit;

(c) Conduct only those exploration activities approved as part of your existing exploration plan; and

(d) Discontinue activities following expiration of the initial term unless and until BLM extends your permit.

#### § 3505.60 How long is my prospecting permit in effect?

Your prospecting permit will be effective for an initial term of 2 years.

#### § 3505.61 May BLM extend the term of my prospecting permit?

We may extend prospecting permits for phosphate and hardrock minerals for up to an additional 4 years, and for potassium and gilsonite for up to an additional 2 years. We cannot extend sodium and sulphur prospecting permits.

#### § 3505.62 Under what conditions will BLM extend my prospecting permit?

You must prove that:

(a) You explored with reasonable diligence and were unable to determine the existence and workability of a valuable deposit covered by the permit. Reasonable diligence means that, in BLM's opinion, you drilled a sufficient number of holes or performed other comparable prospecting to explore the permit area within the time allowed; or

(b) Your failure to perform diligent prospecting activities was due to conditions beyond your control.

## Bureau of Land Management, Interior

## § 3506.10

### § 3505.64 How do I apply for an extension?

There is no application form. Just send us a written request with the information in § 3505.65 of this part at least 90 days before your permit expires. Include the processing fee for extensions of prospecting permits found in the fee schedule in § 3000.12 of this chapter and the first year's rental in accordance with §§ 3504.10, 3504.15, and 3504.16 of this part.

[64 FR 53536, Oct. 1, 1999, as amended at 70 FR 58877, Oct. 7, 2005]

### § 3505.65 What information must I include in my extension request?

Your request must:

- (a) Show that you have met the conditions for extension in § 3505.62;
- (b) Describe your previous diligent prospecting activities on the permit; and
- (c) Show how much additional time you need to complete prospecting work.

### § 3505.66 If approved, when is my extension effective?

Your permit extension will become effective on the date we approve it, or on the expiration date of the original permit, if this date is later.

### § 3505.70 May I relinquish my prospecting permit?

Yes. You may relinquish the entire prospecting permit or any legal subdivision of it. A partial relinquishment must clearly describe the exact acreage you want to relinquish. BLM will not accept a relinquishment if you are not in compliance with the requirements of your permit. Once we accept the request, your relinquishment is effective as of the date you filed it with BLM. We will then note the relinquishment on the land status records. We may then open the lands to any new applications. If you relinquish part or all of your permit, you lose any right to any preference right lease to the lands covered by the relinquishment.

### § 3505.75 What happens if I fail to pay the rental?

Your prospecting permit will automatically terminate if you do not pay the rental before the anniversary date

of the permit. We will note your permit termination on the official status records.

### § 3505.80 What happens when my permit expires?

Your permit will expire at the end of its initial or extended term, as applicable, without notice. BLM may open the lands to new applications 60 days after your permit expires. However, if you timely filed for an extension under § 3505.64 of this part, the 60 day period would begin to run on the date BLM denies your extension request. If you timely filed for a preference right lease under § 3507.15 of this part, the 60 day period only would begin to run on the date BLM denies your lease application.

### § 3505.85 May BLM cancel my prospecting permit for reasons other than failure to pay rental?

Yes.

(a) We may cancel your permit if you do not comply with the Mineral Leasing Act, any of the other acts applicable to your specific permit, these regulations, or any of the permit terms or stipulations. We will give you 30 days notice, within which you must correct your default. If your default continues, BLM may cancel your permit.

(b) If we waive one cause for cancellation, we may still cancel your permit for another cause, or for the same cause occurring at another time. Unless you file an appeal, we will note your permit cancellation on the land status records. BLM may use your bond to reclaim the land or correct other deficiencies if we cancel your permit.

## Subpart 3506—Exploration Licenses

### GENERAL INFORMATION

### § 3506.10 What is an exploration license?

An exploration license allows you to explore known, unleased mineral deposits to obtain geologic, environmental and other pertinent data concerning such deposits.

## § 3506.11

### APPLYING FOR AND OBTAINING EXPLORATION LICENSES

#### **§ 3506.11 What must I do to obtain an exploration license?**

(a) To apply, submit an exploration plan as described at § 3505.45 of this part, along with your request for an exploration license. No specific form is required. When BLM approves the exploration plan, we will attach the approved plan to, and make it a part of, the license. You must also publish a BLM-approved notice of exploration, inviting others to participate in exploration under the license on a pro-rata cost-sharing basis.

(b) Except as otherwise provided in this subpart, BLM will process your exploration license application in accordance with the regulations at part 2920 of this chapter.

#### **§ 3506.12 Who prepares and publishes the notice of exploration?**

BLM will prepare a notice of exploration using your information and post the notice and your exploration plan in the BLM office for 30 days. You must publish the notice of exploration once a week for three consecutive weeks in at least one newspaper of general circulation in the area in which the lands are located.

#### **§ 3506.13 What information must I provide to BLM to include in the notice of exploration?**

You must include:

- (a) Your name and address;
- (b) A description of the lands;
- (c) The address of the BLM office where your exploration plan will be available for inspection; and
- (d) An invitation to the public to participate in the exploration under the license.

#### **§ 3506.14 May others participate in the exploration program?**

(a) If any person wants to participate in the exploration program, you and BLM must receive written notice from that person within 30 days after the later of the final newspaper publication or the end of the BLM 30-day posting period.

## 43 CFR Ch. II (10–1–08 Edition)

(b) A person who wants to participate in the exploration program must state in their notice:

- (1) They are willing to share in the cost of the exploration on a pro-rata basis; and
- (2) Any modifications to the exploration program that BLM should consider.

[64 FR 53536, Oct. 1, 1999; 65 FR 11476, Mar. 3, 2000]

#### **§ 3506.15 What will BLM do in response to my exploration license application?**

(a) BLM will determine whether to issue the exploration license. If we decide to issue the license, we will name the participants and the acreage covered. We also will establish hole spacing requirements and include any stipulations needed to protect the environment.

(b) If there are inconsistencies between proposed exploration plans, the approved license will resolve them.

### TERMS; MODIFICATIONS

#### **§ 3506.20 After my license is issued, may I modify my license or exploration plan?**

BLM may approve modifications of your exploration plan upon your request. We may also permit you to remove lands from your exploration license at any time. However, once we issue your exploration license, you may not add lands to the area of your exploration license.

#### **§ 3506.25 Once I have a license, what are my responsibilities?**

You must share with BLM all data you obtain during exploration. We will consider the data confidential and will not make the data public until either:

- (a) The areas involved are leased; or
- (b) BLM determines that it must release the data in response to a FOIA request.

### **Subpart 3507—Preference Right Lease Applications**

#### **§ 3507.11 What must I do to obtain a preference right lease?**

To obtain a preference right lease, you must have a prospecting permit for

the area you want to lease and meet the following conditions and any other conditions established in this subpart:

(a) *All leasable minerals except asphalt.* You must demonstrate that you have discovered a valuable deposit within the period covered by your prospecting permit. However, paragraphs (b) and (d) of this section provide some limitations.

(b) *Sodium, potassium, and sulphur.* In addition to the requirements of paragraph (a) of this section, BLM must determine that the lands are chiefly valuable for the subject minerals.

(c) *Asphalt.* You may not obtain a preference right lease for asphalt. However, you may obtain a competitive lease or a fringe acreage lease under subpart 3508 or 3510 of this part.

(d) *Permits issued under the authority of Reorganization Plan No. 3 of 1946.* Prospecting permits for minerals BLM administers under the authority of Reorganization Plan No. 3 of 1946 do not entitle you to a preference right lease. We may grant you a noncompetitive lease if you discover a valuable deposit during the permit term.

#### **§ 3507.15 How do I apply for a preference right lease?**

No specific form is required. Submit three copies of your application within 60 days after the date your prospecting permit expires or the date BLM denies your request for a permit extension filed under § 3505.64 of this part, whichever is later.

#### **§ 3507.16 Is there a fee or payment required with my application?**

Yes. You must submit the first year's rental with your application according to the provisions in § 3504.15 of this part. BLM will also charge a processing fee on a case-by-case basis as described in § 3000.11 of this chapter.

[70 FR 58877, Oct. 7, 2005]

#### **§ 3507.17 What information must my preference right lease application include?**

Your application must contain:

- (a) A statement of your qualifications and holdings as specified in subpart 3503 of this chapter;
- (b) Three maps showing:
  - (1) Utility systems;

- (2) The location of any proposed development or mining operations and incidental facilities;

- (3) The approximate locations and the extent of the areas you will use for pits, overburden and tailings; and

- (4) The location of water sources or other resources which you may use in the proposed operations or incidental facilities;

- (c) A narrative statement addressing:

- (1) The anticipated scope, method and schedule of development operations, including the type of equipment you will use;

- (2) The method of mining anticipated, including the best available estimate of the mining sequence and production rate; and

- (3) The relationship, if any, between the planned mining operations and existing or planned mining operations and facilities on adjacent Federal or non-Federal lands;

- (d) Financial information which will enable us to determine if you have found a valuable deposit. Include at least an estimate of projected mining and processing costs, saleable products and markets, and projected selling prices;

- (e) A complete and accurate description of the lands as found in your prospecting permit, if your application is for less than the lands covered by your prospecting permit; and

- (f) Other data, as we may require.

#### **§ 3507.18 What do I need to submit to show that I have found a valuable deposit?**

To show you have found a valuable deposit, send us the information listed in § 3593.1 of this part. You must have collected the data during the term of the prospecting permit, but you may refer to prior geologic work. BLM may request supplemental data from you to determine the following:

- (a) The extent and character of the deposit;

- (b) The anticipated mining and processing methods and costs;

- (c) Anticipated location, kind and extent of necessary surface disturbance;

- (d) The measures you will take to reclaim that disturbance;

- (e) An estimate of the profitability of mineral development; and

## **§ 3507.19**

(f) Whether there is a reasonable prospect of success in developing a profitable mine.

### **§ 3507.19 Under what circumstances will BLM reject my application?**

(a) BLM will reject your application for a preference right lease if:

(1) You did not discover a valuable deposit of mineral(s) covered by the prospecting permit;

(2) You did not submit requested information in a timely manner;

(3) You did not otherwise comply with the requirements of this subpart; or

(4) In the case of sodium, potassium and sulphur, if BLM determines that the lands are not chiefly valuable for the mineral commodity specified in the permit.

(b) If you applied for a lease for minerals BLM administers under the authority of Reorganization Plan No. 3 of 1946, BLM may also reject your application if we determine that mining is not the preferred use of the lands in the application. In making this determination, we will consider:

(1) The land use plan;

(2) Unsuitability criteria under subpart 1610 of this title;

(3) Any environmental impacts; and

(4) The purposes of the statute under which the lands were acquired.

(c) We will also reject your application if the surface managing agency does not consent to the lease.

### **§ 3507.20 May I appeal BLM's rejection of my preference right lease?**

Yes. You have a right to appeal under the procedures in parts 4 and 1840 of this title.

## **Subpart 3508—Competitive Lease Applications**

### **§ 3508.11 What lands are available for competitive leasing?**

BLM may issue a competitive lease on unleased lands where we know that a valuable mineral deposit exists. In such areas, before issuing a lease we may issue you an exploration license, but not a prospecting permit. However, BLM may offer competitive leases for lands where no prospecting or exploratory work is needed to determine the

## **43 CFR Ch. II (10–1–08 Edition)**

existence or workability of a valuable mineral deposit. In addition, we may offer competitive leases for asphalt on any lands available for asphalt leasing, whether or not we know that a valuable mineral deposit exists.

### **§ 3508.12 How do I get a competitive lease?**

(a) Notify BLM of areas in which you are interested. We may also designate certain lands for competitive leasing.

(b) Before BLM publishes a notice of lease sale, pay a processing fee on a case-by-case basis as described in § 3000.11 of this chapter as modified by §§ 3508.14 and 3508.21. If someone else is the successful bidder, BLM will refund you the amount you paid under this paragraph. If there is no successful bidder, you remain responsible for all processing fees.

(c) After determining that the lands are available for leasing, we will publish a notice of lease sale containing all significant information (see § 3508.14 of this part).

(d) We will award a competitive lease through sale to the qualified bidder who offers the highest acceptable bonus bid. In the event of a tie, BLM will determine a fair method for choosing the successful bid.

[64 FR 53536, Oct. 1, 1999, as amended at 70 FR 58877, Oct. 7, 2005]

### **§ 3508.14 How will BLM publish the notice of lease sale?**

(a) Once we determine which lands are available for leasing, we will publish a notice of lease sale at least once a week for three consecutive weeks in a newspaper of general circulation in the area where the lands are situated. We will also post the notice of lease sale for 30 days in the public room of the BLM office which administers the lands.

(b) The notice will include:

(1) The time and place of sale;

(2) The bidding method, including opening and closing dates for bidding;

(3) A description of the tract BLM is offering;

(4) A description of the mineral deposit BLM is offering;

(5) The minimum bid we will consider; and

## Bureau of Land Management, Interior

## § 3509.10

(6) Information on where you can get a copy of the proposed lease and a detailed statement of the lease sale terms and conditions.

(7) If the tract being offered for competitive sale was nominated by an applicant, a statement of the total cost recovery fee paid to BLM by the applicant under § 3508.12 up to 30 days before the competitive lease sale.

[64 FR 53536, Oct. 1, 1999, as amended at 70 FR 58877, Oct. 7, 2005]

### **§ 3508.15 What information will the detailed statement of the lease sale terms and conditions include?**

(a) The proposed lease terms and conditions, including the rental, royalty rates, bond amount, and any special stipulations for the particular tract;

(b) An explanation of how you may submit your bid;

(c) Notification that you must accompany your bid with your qualifications statement (see subpart 3502 of this part) and a deposit of one-fifth of your bid amount;

(d) Notification that if you are the successful bidder, you must pay your proportionate share of the total publication cost for the sale notice before we will issue the lease. Your share is based on the number of tracts you bid on successfully, divided by the total number of tracts offered for sale;

(e) A warning concerning 18 U.S.C. 1860 which provides criminal penalties for manipulating the bidding process;

(f) A statement that the Secretary reserves the right to reject any and all bids, and to offer the lease to the next qualified bidder, if the successful bidder does not get the lease for any reason; and

(g) Any other information we deem appropriate.

### **§ 3508.20 How will BLM conduct the sale and handle bids?**

We will open and announce all bids at the time and date specified in the notice of lease sale, but we will not accept or reject bids at that time. We must receive your bid by the deadline in the sale notice or we will not consider it. You may withdraw or modify your bid before the time specified in the notice of sale.

### **§ 3508.21 What happens if I am the successful bidder?**

(a) If you are the highest qualified bidder and we determine that your bid meets or exceeds fair market value, we will send you copies of the lease on the form attached to the detailed statement. Within the time we specify you must:

(1) Sign and return the lease form;

(2) Pay the balance of the bonus bid;

(3) Pay the first year's rental;

(4) Pay the publication costs;

(5) Furnish the required lease bond;

(6) If you were not the applicant, pay the cost recovery fee specified in the lease sale notice; and

(7) Pay all processing costs BLM incurs after the date of the sale notice.

(b) See § 3504.12 of this part for payment procedures.

[64 FR 53536, Oct. 1, 1999; 65 FR 11476, Mar. 3, 2000; 70 FR 58877, Oct. 7, 2005]

### **§ 3508.22 What happens if BLM rejects my bid?**

(a) If your bid is the high bid and we reject it because you did not sign the lease form and pay the balance of the bonus bid, or otherwise comply with this subpart, you forfeit to the United States your deposit of one-fifth of the bonus bid amount.

(b) If we must reject your high bid for reasons beyond your control, we will return your bid deposit.

(c) If we reject your bid because it is not the high bid, we will return your bid deposit.

## **Subpart 3509—Fractional and Future Interest Lease Applications**

### **§ 3509.10 What are future interest leases?**

BLM issues noncompetitive future interest leases to persons who hold present mineral interests that will revert to the Federal Government at some future date. Future interest leases allow the present interest holders to continue using their present mineral right once the Federal Government acquires it.

## **§ 3509.11**

### **§ 3509.11 Under what conditions will BLM issue a future interest lease to me?**

When it is in the public interest, we will issue you a future interest lease for lands where you either have an existing mining operation or have established that a valuable deposit exists.

### **§ 3509.12 Who may apply for a future interest lease?**

You may apply for a future interest lease only if you have a present interest in the minerals. You must hold more than 50 per cent of either the fee interest, a lease interest or an operating rights interest. You must also meet the qualification requirements set forth in subpart 3502 of this part.

### **§ 3509.15 Do I have to pay for a future interest lease?**

You must pay fair market value for the mineral deposit when title vests in the United States. You also will be required to pay royalty on your production.

### **§ 3509.16 How do I apply for a future interest lease?**

No specific form is required. You must file at least one year before the mineral interest vests with the United States or BLM will deny your application. BLM will charge you a processing fee on a case-by-case basis as described in § 3000.11 of this chapter.

[64 FR 53536, Oct. 1, 1999, as amended at 70 FR 58878, Oct. 7, 2005]

### **§ 3509.17 What information must I include in my application for a future interest lease?**

Your application must include the same information we require when you apply for a present interest Federal lease. See subpart 3508 of this part. In addition, you must include the following:

- (a) A land description;
- (b) Your certification that you meet the qualifications requirements (see subpart 3502 of this part);
- (c) Evidence of your title or the extent of your rights to the present interest in the mineral deposits. Submit either a certified abstract of title or a title certificate, or the instrument establishing your rights; and

## **43 CFR Ch. II (10–1–08 Edition)**

(d) The names of the other owners, if any, of the mineral interests. If you own the operating rights to the mineral by means of a contract with the mineral owner, you also need to submit three copies of the mineral contract or lease.

### **§ 3509.18 What will BLM do after it receives my application for a future interest lease?**

(a) After BLM receives your application for a future interest lease, we will notify all other interest owners that they have 90 days to file applications for the same mineral interest.

(b) If any other interest owners timely apply, we will hold a competitive lease sale among the qualified applicants. BLM will establish standards for the competitive sale similar to those under subpart 3508 of this part, and provide notice to all of the qualified applicants.

(c) If no other qualified owners timely apply, BLM may issue a future interest lease to you. BLM will establish the amount of the bonus bid you must pay through appraisal.

### **§ 3509.20 When does my future interest lease take effect?**

Your future interest lease will be effective on the date the minerals vest in the United States, as stated in the lease.

### **§ 3509.25 For what reasons will BLM reject my application for a future interest lease?**

We will reject your application:

- (a) If you do not meet the qualifications in § 3509.15 of this part;
- (b) If you filed your application less than one year before the minerals vest in the United States; or
- (c) We determine that issuing the lease is not in the public interest.

### **§ 3509.30 May I withdraw my application for a future interest lease?**

Yes. You must file the withdrawal with BLM before the lease is signed. BLM will retain any fees already paid for processing the application.

[64 FR 53536, Oct. 1, 1999, as amended at 70 FR 58878, Oct. 7, 2005]

**§ 3509.40 What are fractional interest prospecting permits and leases?**

They are prospecting permits and leases for parcels where the United States holds less than 100 per cent of the mineral interest of the parcel. Fractional interest leases allow development of the shared mineral interests.

**§ 3509.41 For what lands may BLM issue fractional interest prospecting permits and leases?**

We issue them for lands where the United States owns less than 100 per cent of the mineral interest and where we have determined it is in the public interest to grant the permit or lease. We will only grant fractional interest permits or leases with the consent of the surface managing agency. If we believe a mineral deposit exists but do not know, we may issue a noncompetitive fractional interest lease.

**§ 3509.45 Who may apply for a fractional interest prospecting permit or lease?**

Only persons who have an interest in the non-Federal share of the same minerals may apply for a fractional interest lease of the minerals. Applicants must also meet the qualification standards in subpart 3502 of this part.

**§ 3509.46 How do I apply for a fractional interest prospecting permit or lease?**

No specific form is required. Submit the application to the BLM office with jurisdiction over the lands. BLM will charge you a processing fee on a case-by-case basis as described in § 3000.11 of this chapter.

[64 FR 53536, Oct. 1, 1999, as amended at 70 FR 58878, Oct. 7, 2005]

**§ 3509.47 What information must I include in my application for a fractional interest prospecting permit or lease?**

Your application must include all the same information we require when you apply for a regular competitive Federal lease. See subpart 3508 of this part. In addition, you must include the following:

- (a) A land description;

- (b) Your certification that you meet the qualifications requirements (see subpart 3502 of this part);

- (c) Evidence of your title or the extent of your rights in the mineral deposits. Submit either a certified abstract of title, a title certificate or the instrument establishing your rights; and

- (d) The names of the other owners, if any, of the mineral interests. If you own the operating rights to the mineral by means of a contract with the mineral owner, you also need to submit three copies of the mineral contract or lease.

**§ 3509.48 What will BLM do after it receives my application for a fractional interest lease?**

- (a) After BLM receives your application for a fractional interest lease, we will notify all other interest owners that they have 90 days to file applications for the same mineral interest.

- (b) If any other interest owners timely apply, we will hold a competitive lease sale among the qualified applicants. BLM will establish standards for the competitive sale similar to those under subpart 3508 of this part, and provide notice to all of the applicants.

- (c) If no other qualified owners timely apply, BLM may issue a fractional interest lease to you. BLM will establish the amount of the bonus bid you must pay through appraisal.

**§ 3509.49 What terms and conditions apply to my fractional interest prospecting permit or lease?**

BLM will apply the commodity-specific terms and conditions found in this part to fractional interest prospecting permits and leases.

**§ 3509.50 Under what conditions would BLM reject my application for a fractional interest prospecting permit or lease?**

BLM will reject your fractional interest application if:

- (a) You do not meet the qualifications in § 3509.45 of this part;

- (b) You would have an interest in the total Federal and non-Federal mineral estate of less than 50% once the fractional interest prospecting permit or lease is issued, unless we determine it would be in the best interests of the

## **§ 3509.51**

government to issue the permit or lease; or

(c) We determine that it is not in the public interest to grant the lease.

### **§ 3509.51 May I withdraw my application for a fractional interest prospecting permit or lease?**

Yes, if you file the withdrawal before the lease is signed. BLM will retain any fees already paid for processing the application.

[64 FR 53536, Oct. 1, 1999, as amended at 70 FR 58878, Oct. 7, 2005]

## **Subpart 3510—Noncompetitive Leasing: Fringe Acreage Leases and Lease Modifications**

### **§ 3510.11 If I already have a Federal lease, or the mineral rights on adjacent private lands, may I lease adjoining Federal lands that contain the same deposits without competitive bidding?**

Yes. If the adjoining Federal lands are available for leasing, you may lease them noncompetitively, even if they are known to contain a deposit of the mineral you are interested in leasing. We will either issue a new lease for these lands (fringe acreage) or add the lands to your existing Federal lease (modification).

### **§ 3510.12 What must I do to obtain a lease modification or fringe acreage lease?**

(a) File three copies of your application with the BLM office that administers the lands. No specific application form is required.

(b) Include the filing fee for lease modification or fringe acreage lease found in the fee schedule in section 3000.12 of this chapter. If you want to modify an existing lease, BLM will base the rental payment on the rate in effect for the lease being modified.

(c) Your application must:

(1) Show the serial number of the lease if the lands adjoin an existing Federal lease;

(2) Contain a complete and accurate description of the lands desired;

(3) Show that the mineral deposit specified in your application extends

## **43 CFR Ch. II (10–1–08 Edition)**

from your adjoining lease or from private lands you own or control; and

(4) Include proof that you own or control the mineral deposit in the adjoining lands if they are not under a Federal lease.

[64 FR 53536, Oct. 1, 1999, as amended at 72 FR 50888, Sept. 5, 2007]

### **§ 3510.15 What will BLM do with my application?**

We will issue or modify a lease under this subpart only if we determine that:

(a) The lands are contiguous to your existing Federal lease or to non-Federal lands you own or control;

(b) The new fringe lease does not exceed the maximum size allowed in a lease, as specified in § 3503.37 of this part;

(c) The acreage of the modified lease, including additional lands, is not in excess of the maximum size allowed for a lease, as specified in § 3503.37 of this part;

(d) The mineral deposit is not in an area of competitive interest to holders of other active mining units in the area;

(e) The lands for which you applied lack sufficient reserves of the mineral resource to warrant independent development;

(f) Leasing the lands will conserve natural resources and will provide for economical and efficient recovery as part of a mining unit; and

(g) You meet the qualification requirements for holding a lease described in subpart 3502 of this title and the new or modified lease will not cause you to exceed the acreage limitations described in § 3503.37 of this part.

### **§ 3510.20 Do I have to pay a fee to modify my existing lease or obtain a fringe acreage lease?**

Yes. Before BLM issues a new fringe acreage lease or modifies your existing lease, you must pay a bonus in an amount we will determine based on an appraisal or other appropriate means. The bonus cannot be less than \$1 per acre or fraction of an acre.

## Bureau of Land Management, Interior

## § 3511.25

### § 3510.21 What terms and conditions apply to fringe acreage leases and lease modifications?

Your fringe acreage lease is a new Federal lease. Therefore, we may impose terms and conditions different from those in your original Federal lease. A modified lease will be subject to the same terms and conditions as in the original Federal lease.

### Subpart 3511—Lease Terms and Conditions

#### § 3511.10 Do certain leases allow me to mine other commodities as well?

Yes. Sodium leases authorize you to mine potassium compounds as related products, and potassium leases authorize mining associated sodium compounds and related products. A phosphate lease allows you to use deposits of silica, limestone or other rock on the lease for use in the processing or refining of phosphate, phosphate rock, and associated minerals mined from the leased lands. You must pay royalty

on these materials as specified in your lease.

#### § 3511.11 If I am mining calcium chloride, may I obtain a noncompetitive mineral lease to produce the commingled sodium chloride?

Yes. If you are producing calcium chloride in paying quantities from an existing mine which you control, you may apply to BLM for a noncompetitive lease to produce the commingled sodium chloride. You must already have authorization, under part 3800 of this chapter, for the locatable minerals. You must also meet the other requirements of this part for the commingled leasable minerals.

#### § 3511.12 Are there standard terms and conditions which apply to all leases?

Yes. BLM will issue your lease on a standard form which will contain several terms and conditions. We will add your rental rate, royalty obligations and any special stipulations to this lease form.

#### § 3511.15 How long will my lease be in effect?

Commodity	Initial Term	Period of Renewal or Readjustment
(a) Phosphate .....	Indeterminate .....	Subject to readjustment at the end of each 20 year period.
(b) Sodium .....	20 years .....	Can be renewed for 10 years at the end of the initial term and for following 10 year periods.
(c) Potassium .....	Indeterminate .....	Subject to readjustment at the end of each 20 year period.
(d) Sulphur .....	20 years .....	Can be renewed for 10 years at the end of the initial term and for following 10 year periods.
(e) Gilsonite .....	20 years and for as long thereafter as gilsonite is produced in paying quantities.	Subject to readjustment at the end of each 20 year period.
(f) Hardrock Minerals .....	not to exceed 20 years .....	Can be renewed for 10 years at the end of the initial term and for following 10 year periods.
(g) Asphalt .....	20 years .....	Can be renewed for 10 years at the end of the initial term and for following 10 year periods.

#### § 3511.25 What is meant by lease readjustment and lease renewal?

(a) If your lease is issued subject to readjustment, BLM will notify you of the readjusted terms before the end of each 20-year period. If we do not timely notify you of readjusted terms, those leases continue for another 20-year pe-

riod under the same terms and conditions.

(b) If you have a lease that requires renewal, we will issue the lease for an initial term as specified in § 3510.15 of this part. You must apply for a renewal of the lease at least 90 days before the initial term ends in order to extend the lease for an additional term. If you do

## § 3511.26

not renew the lease, it expires and the lands become available for re-leasing. BLM may change some of your lease terms when we renew a lease.

### **§ 3511.26 What if I object to the terms and conditions BLM proposes for a readjusted lease?**

(a) You have 60 days after receiving the proposed readjusted terms to object. If we do not receive your objection within 60 days, the proposed readjusted terms will be in effect. If you file an objection, BLM will issue a decision in response. If you disagree with the decision, you may appeal under parts 4 and 1840 of this title.

(b) The readjusted lease terms and conditions will be effective pending the outcome of any appeal, unless BLM provides otherwise.

### **§ 3511.27 How do I renew my lease?**

File an application at least 90 days before the lease term expires. No specific form is required. Send us 3 copies of your application together with the processing fee for lease renewal found in the fee schedule in § 3000.12 of this chapter and an advance rental payment of \$1 per acre or fraction of an acre.

[64 FR 53536, Oct. 1, 1999, as amended at 70 FR 58878, Oct. 7, 2005]

### **§ 3511.30 If I appeal BLM's proposed new terms, must I continue paying royalties or rentals while my appeal is pending?**

Yes. Continue to pay royalties and rentals at the original rate. Your obligation to pay any increased readjusted royalties, minimum royalties and rentals will be suspended while your appeal is considered. However, any increased charges accrue beginning with the effective date of the readjustment or renewal, while final action on your appeal is pending. If the increased charges are sustained on appeal, you must pay the accrued balance, plus interest at the rate MMS specifies for late payment in 30 CFR part 218.

## 43 CFR Ch. II (10–1–08 Edition)

### **Subpart 3512—Assignments and Subleases**

#### **HOW TO ASSIGN LEASES**

### **§ 3512.11 Once BLM issues me a permit or lease, may I assign or sublease it?**

You may assign or sublease your permit or lease in whole or in part to any person, association, or corporation qualified to hold a permit or lease.

### **§ 3512.12 Is there a fee for requesting an assignment or sublease?**

When you submit your instrument for assignment of record title or operating rights, or for transfer of overriding royalties, you must pay the filing fee for assignment, sublease, or transfer of operating rights found in the fee schedule in § 3000.12 of this chapter. BLM will not accept any instrument without the filing fee.

[64 FR 53536, Oct. 1, 1999, as amended at 72 FR 50888, Sept. 5, 2007]

### **§ 3512.13 How do I assign my permit or lease?**

(a) Within 90 days of final execution of the assignment, you must submit three copies of your instrument for assignment of each permit or lease. The instrument must contain:

- (1) The assignee's name and current address;
- (2) The interest held by you and the interest you plan to assign;
- (3) The serial number of the affected permit or lease;
- (4) The amount of overriding royalties you retain;
- (5) The date and your original signature on each copy, as the assignor; and
- (6) The assignee must also send BLM a request for approval of the assignment which must contain:
  - (i) A statement of the assignee's qualifications and holdings, as required by subpart 3502 of this part;
  - (ii) Date and original signature of the assignee; and
  - (iii) The filing fee for assignment, sublease, or transfer of operating rights found in the fee schedule in § 3000.12 of this chapter.

## Bureau of Land Management, Interior

## § 3512.33

(b) BLM must approve the assignment. We will notify you with a decision indicating approval or disapproval.

(c) If you are assigning a portion of your permit or lease, we will create a new permit or lease for the assigned portion, if approved.

[64 FR 53536, Oct. 1, 1999, as amended at 72 FR 50888, Sept. 5, 2007]

### § 3512.16 How do I sublease my lease?

(a) You must file one copy of the sublease between you and the sublessee within 90 days from the date of final execution of the sublease.

(b) The sublessee must also file a signed and dated request for approval and a statement of qualifications (see subpart 3502 of this part), and submit the filing fee for assignment, sublease, or transfer of operating rights found in the fee schedule in § 3000.12 of this chapter.

(c) We will notify you with a decision indicating approval or disapproval.

[64 FR 53536, Oct. 1, 1999, as amended at 72 FR 50888, Sept. 5, 2007]

### § 3512.17 How do I transfer the operating rights in my permit or lease?

(a) You must file one copy of the agreement to transfer operating rights within 90 days from the date of final execution of the agreement.

(b) The transferee must also file a signed and dated request for approval and a statement of qualifications (see subpart 3502 of this part), and submit the filing fee for assignment, sublease, or transfer of operating rights found in the fee schedule in § 3000.12 of this chapter.

(c) We will notify you with a decision indicating approval or disapproval.

[64 FR 53536, Oct. 1, 1999, as amended at 72 FR 50888, Sept. 5, 2007]

#### SPECIAL CIRCUMSTANCES AND OBLIGATIONS

### § 3512.18 Will BLM approve my assignment or sublease if I have outstanding liabilities?

Before we will approve your assignment of a permit or lease, your account must be in good standing. We will also approve the assignment if the assignee

and his or her surety provides written acceptance of your outstanding liabilities under the permit or lease. In addition, the assignee must either furnish a new bond equivalent to your existing bond or obtain consent of the surety on your bond to substitute the assignee as the principal.

### § 3512.19 Must I notify BLM if I intend to transfer an overriding royalty to another party?

Yes. Although we do not approve these transfers, you must file all overriding royalty interest transfers with the BLM within 90 days from the date of execution. Include the transferee's statement of qualifications required in subpart 3502 and the filing fee for transfer of overriding royalty found in the fee schedule in § 3000.12 of this chapter.

[64 FR 53536, Oct. 1, 1999, as amended at 72 FR 50888, Sept. 5, 2007]

#### EFFECT OF ASSIGNMENTS ON YOUR OBLIGATIONS

### § 3512.25 If I assign my permit or lease, when do my obligations under the permit or lease end?

You and your surety remain responsible for the performance of all obligations under the permit or lease until the date we approve the assignment. You will continue to be responsible for obligations that accrued prior to the date of our approval of the assignment, whether or not they were identified at the time of the transfer.

### § 3512.30 What are the responsibilities of a sublessor and a sublessee?

After BLM's approval of a sublease becomes effective, the sublessor and sublessee are jointly and severally liable for performance of all obligations under the permit or lease.

### § 3512.33 Does an assignment or sublease alter the permit or lease terms?

No, it does not alter permit or lease terms.

**Subpart 3513—Waiver, Suspension or Reduction of Rental and Minimum Royalties**

**RENTAL AND ROYALTY REDUCTIONS**

**§ 3513.11 May BLM relieve me of the lease requirements of rental, minimum royalty, or production royalty while continuing to hold the lease?**

Yes. BLM has a process which may allow you temporary relief from these lease requirements.

**§ 3513.12 What criteria does BLM consider in approving a waiver, suspension, or reduction in rental or minimum royalty, or a reduction in the royalty rate?**

We will consider if approval:

- (a) Is in the interest of conservation;
- (b) Will encourage the greatest ultimate recovery of the resource; and
- (c) Is necessary either to promote development of the mineral resources or because you cannot successfully operate the lease under existing terms.

**§ 3513.15 How do I apply for reduction of rental, royalties or minimum production?**

You must send us two copies of your application with the following information for all leases involved:

- (a) The serial numbers;
- (b) The name of the record title holder(s);
- (c) The name of the operator and operating rights owners if different from the record title holder(s);
- (d) A description of the lands by legal subdivision;
- (e) A map showing the serial number and location of each mine or excavation and the extent of the mining operations;
- (f) A tabulated statement of the leasable minerals mined for each month covering at least the last twelve months before you filed your application, and the average production mined per day for each month;
- (g) If you are applying for relief from the minimum production requirement, complete information as to why you did not attain the minimum production;
- (h) A detailed statement of expenses and costs of operating the entire lease,

and the income from the sale of any leased products;

(i) All facts showing why you cannot successfully operate the mines under the royalty or rental fixed in the lease and other lease terms;

(j) For reductions in royalty, full information as to whether you pay royalties or payments out of production to anyone other than the United States, the amounts paid and efforts you have made to reduce them;

(k) Documents demonstrating that the total amount of overriding royalties paid for the lease will not exceed one-half the proposed reduced royalties due the United States; and

(l) Any other information BLM needs to determine whether the request satisfies the standards in § 3513.12 of this part.

**§ 3513.16 Do I have to pay a fee when I apply for a waiver, suspension, or reduction of rental, minimum royalty, production royalty, or minimum production?**

Yes. BLM will charge you a processing fee on a case-by-case basis, as described in § 3000.11 of this chapter.

[70 FR 58878, Oct. 7, 2005]

**SUSPENSION OF OPERATIONS AND PRODUCTION (CONSERVATION CONCERNS)**

**§ 3513.20 What is a suspension of operations and production (conservation concerns)?**

A suspension of operations and production (conservation concerns) is a BLM action where BLM orders or allows you to suspend operations in the interest of conservation of natural resources.

**§ 3513.21 What is the effect of a suspension of operations and production (conservation concerns)?**

BLM will extend your lease term by any periods of suspension of operations and production (conservation concerns). We will reduce the minimum annual production requirements of your lease proportionately for that time during a lease year in which a suspension of operations and production is effective. You do not have to pay rental and minimum annual production royalties starting with the first day of the next lease month after

## Bureau of Land Management, Interior

## § 3514.11

the suspension becomes effective. However, if the suspension is effective on the first day of the lease month, you may stop paying rentals and royalties that same day.

### § 3513.22 How do I apply for a suspension of operations and production (conservation concerns)?

Send us two copies of an application that explains why it is in the interest of conservation to suspend your operations and production.

### § 3513.23 May BLM order a suspension of operations and production (conservation concerns)?

Yes, BLM may order a suspension of operations and production.

### § 3513.25 When will my suspension of operations and production (conservation concerns) take effect?

Your suspension takes effect on the date BLM specifies.

### § 3513.26 When and how does my suspension of operations and production (conservation concerns) expire or terminate?

Your suspension ends on the expiration date that BLM specifies in the decision or order approving the suspension, or on the first day of the lease month in which you resume operations or production, whichever occurs first. All lease terms and obligations resume on this date. MMS will allow credit towards future rentals or royalties due, if you paid rent for the period of suspension of operations and production.

#### SUSPENSION OF OPERATIONS (ECONOMIC CONCERNS)

### § 3513.30 What is a suspension of operations (economic concerns)?

A suspension of operations (economic concerns) is an action by which BLM may approve your request to suspend operations on your lease when marketing conditions are such that you cannot operate your leases except at a loss. BLM may not order a suspension of operations (economic concerns) unless you request it.

### § 3513.31 What is the effect of a suspension of operations (economic concerns)?

This suspension does not affect the term of the lease or the annual rental payment. BLM will reduce the minimum annual production requirements of your lease in proportion to that part of the lease year for which a suspension of operations is effective.

### § 3513.32 How do I apply for a suspension of operations (economic concerns)?

Send us two copies of your application which shows why your lease cannot be operated except at a loss.

### § 3513.33 When will my suspension of operations (economic concerns) take effect?

Your suspension will be effective on the date BLM specifies. You do not have to pay royalty on minimum annual production beginning on the first day of the next lease month after the suspension becomes effective. If the effective date is the first of the month, you may stop paying royalty on minimum annual production on that day.

### § 3513.34 When and how does my suspension of operations (economic concerns) expire or terminate?

The suspension of operations (economic concerns) ends on the expiration date that BLM specifies in the decision approving the suspension, or on the first day of the lease month in which you resume operations, whichever occurs first. Your obligation for minimum annual production resumes at this time.

## Subpart 3514—Lease Relinquishments and Cancellations

### RELINQUISHING YOUR LEASE

### § 3514.11 May I relinquish my lease or any part of my lease?

If you can show, to BLM's satisfaction, that the public interest will not be impaired, you may relinquish your entire lease or any legal subdivision of it. Notify us in writing that you intend to relinquish all or part of your lease. Include your original signature and

## § 3514.12

date. If we approve your relinquishment, you are required to pay all accrued rentals and royalties, and to perform any reclamation of the leased lands that BLM may require. In some cases, BLM may require you to preserve any mines, productive works or permanent improvements on the leased lands in accordance with the terms of your lease.

### **§ 3514.12 What additional information should I include in a request for partial relinquishment?**

Any partial relinquishment must also clearly describe the lands you are relinquishing and give the exact area involved.

### **§ 3514.15 Where do I file my relinquishment?**

File the relinquishment in the BLM office that issued the lease.

### **§ 3514.20 When is my relinquishment effective?**

When BLM approves your relinquishment, it will be effective as of the date you filed it.

### **§ 3514.21 When will BLM approve my relinquishment?**

We will accept your relinquishment when you have met all terms and conditions of the lease, including reclamation obligations.

#### **CANCELLATIONS, FORFEITURES, AND OTHER SITUATIONS**

### **§ 3514.25 When does my lease expire?**

(a) Sodium, sulphur, asphalt, and hardrock mineral leases expire at the end of the lease term. If you file a timely application for lease renewal under § 3511.27 of this part, your lease expires on the expiration date or the date BLM rejected your application, whichever is later.

(b) Potassium, phosphate and gilsonite leases continue for so long as you comply with the lease terms and conditions which are subject to periodic readjustment.

(c) For more information, see § 3511.15 of this part.

## 43 CFR Ch. II (10–1–08 Edition)

### **§ 3514.30 May BLM cancel my lease?**

(a) Yes. BLM may institute appropriate proceedings in a court of competent jurisdiction to cancel your lease if:

(1) You do not comply with the provisions of the Mineral Leasing Act, other relevant statutes, or regulations applicable to your lease; or

(2) You default on any of the lease terms, covenants or stipulations and continue to fail or default for 30 days after BLM notifies you in writing of your default.

(b) BLM may cancel your lease administratively if we issued it in violation of any law or regulation. In such a case, we may consider issuing an amended lease, if appropriate.

### **§ 3514.31 May BLM waive cancellation or forfeiture?**

Yes, but our waiver of any particular cause of forfeiture will not prevent us from canceling and forfeiting the lease for any other cause or for the same cause occurring at any other time.

### **§ 3514.32 Will BLM give me an opportunity to remedy a violation of the lease terms?**

(a) If you own or control, directly or indirectly, an interest in a lease in violation of any of the provisions of the Mineral Leasing Act, other relevant statutes, the lease terms or the regulations in this part, we will give you 30 days to remedy the violation or to show cause why we should not ask the Attorney General to institute court proceedings to:

(1) Cancel the lease;  
(2) Forfeit your interest; or  
(3) Compel disposal of the interest so owned or controlled.

(b) BLM will not give you 30 days if there is no legal remedy to the violation.

### **§ 3514.40 What if I am a *bona fide* purchaser and my lease is subject to cancellation?**

(a) If you are a *bona fide* purchaser, BLM will not cancel your lease or your interest in a lease based on your predecessor's actions. However, you must be sure that the lease is in compliance with the terms and conditions required by BLM.

## Bureau of Land Management, Interior

## § 3515.21

(b) BLM will promptly take action to dismiss any party who shows they are a *bona fide* purchaser from any legal proceedings to cancel the lease.

### Subpart 3515—Mineral Lease Exchanges

#### LEASE EXCHANGE REQUIREMENTS

#### § 3515.10 May I exchange my lease or lease right for another mineral lease or lease right?

Yes. BLM may determine that operations on your lease or lands for which you have a preference right to a lease are not in the public interest. If you or BLM identify other lands for exchange, you may relinquish your current lease or preference right in exchange for a mineral lease of other lands of equal value.

#### § 3515.12 What regulatory provisions apply if I want to exchange a lease or lease right?

(a) Except as provided in paragraph (b) of this section, this subpart and the relevant provisions of part 2200 of this title apply to mineral lease exchanges.

(b) Exchanges involving the issuance of coal leases, coal lease bidding rights or coal lease modifications are subject to the regulations in subpart 3435 of this chapter rather than to the regulations in this part.

#### § 3515.15 May BLM initiate an exchange?

Yes. When we do:

(a) We will notify you that we are prepared to consider exchange of a mineral lease if you relinquish your existing leasing rights.

(b) We may exchange all or any part of the lands under your preference right lease application(s) or lease(s).

#### § 3515.16 What standards does BLM use to assess the public interest of an exchange?

BLM must find that the exchange is in the public interest under the following criteria:

(a) The benefits of production from your existing lease or preference right to a lease would not outweigh the adverse effects on, or threat of damage or destruction to:

(1) Agricultural production potential;  
(2) Scenic values;  
(3) Biological values including threatened or endangered species habitat;

(4) Geologic values;

(5) Archeological, historic or other cultural values;

(6) Other public interest values such as recreational use;

(7) Residential or urban areas;

(8) Potential inclusion in the wilderness or wild and scenic rivers systems; or

(9) Other public uses, including public highways, airports, and rights-of-way from lease operations.

(b) The lands proposed for exchange must be free from hazardous waste as defined under the authorities of the Federal Water Pollution Control Act (33 U.S.C. 1251), Resource Conservation and Recovery Act (42 U.S.C. 6901) and the Comprehensive Environmental Response, Compensation and Liability Act (42 U.S.C. 9601).

#### § 3515.18 Will I be notified when BLM is considering initiating an exchange that will affect my lease?

Yes. The notice you receive will:

(a) State why we believe an exchange would be in the public interest;

(b) Ask whether you are willing to negotiate for an exchange;

(c) Contain a description of the lands for which we would offer exchange terms; and

(d) Ask you to describe the lands on which you would accept a lease in exchange for your present holdings.

#### TYPES OF LEASE EXCHANGES

#### § 3515.20 May I exchange preference rights?

Yes. To have a preference right that can be exchanged, you must have timely submitted a preference right lease application. If you have demonstrated a right to a lease, BLM may, in lieu of issuing the preference right lease, negotiate for the selection of appropriate lands to exchange and establish lease terms for those lands.

#### § 3515.21 What types of lands can be exchanged?

The lands to be leased in exchange for your existing rights must be:

## **§ 3515.22**

(a) Subject to leasing under the authorities of this part; and

(b) Acceptable to both you and BLM as a lease tract containing a deposit of leasable or hardrock minerals of equal value to your existing rights.

### **§ 3515.22 What if the lands to be exchanged are not of equal value?**

If the lands are not equal in value, either party may equalize the value by paying money to the party receiving the property of lesser value. Such payments may not exceed 25 percent of the total value of the land or interest transferred out of Federal ownership. The parties may mutually agree to waive the monetary payment, if the Secretary determines that:

(a) A waiver will expedite the exchange;

(b) The public interest will be better served by the waiver than by the payment; and

(c) The amount to be waived is no more than 3 percent of the value of the lands being transferred out of Federal ownership, or \$15,000, whichever is less.

#### **LEASE EXCHANGE PROCEDURES**

### **§ 3515.23 May BLM require me to submit additional information?**

Yes. You must be willing to provide geologic and economic data we need to determine the fair market value of your preference right or lease to be relinquished.

### **§ 3515.25 Is BLM required to publish notice or hold a hearing?**

Yes. After you and BLM agree on the lands for exchange, we will publish a notice of the proposed exchange in the *FEDERAL REGISTER* and in a newspaper(s) in the county(s) where the lands involved are located. The notice will include:

(a) The time and place of a public hearing(s);

(b) Our preliminary findings that the exchange is in the public interest; and

(c) A request for public comments on the merits of the proposed exchange.

### **§ 3515.26 When will BLM make a decision on the exchange?**

After the public hearing and consideration of public comments, we will determine whether issuance of the ex-

## **43 CFR Ch. II (10–1–08 Edition)**

change lease is in the public interest. If it is, we will then process the exchange. If not, we will cancel the exchange.

### **§ 3515.27 Will BLM attach any special provisions to the exchange lease?**

Yes, the lease terms will contain a statement that you quitclaim and relinquish any right or interest in your preference right lease application or lease exchanged.

## **Subpart 3516—Use Permits**

### **§ 3516.10 What are use permits?**

Use permits allow you to use the surface of lands not included within your permit or lease to help you develop the mineral deposits. You may only get a use permit during the life of your permit or lease, and only for unentered, unappropriated, BLM-administered land. Use permits are not prospecting permits.

### **§ 3516.11 What kinds of permits or leases allow use permits?**

Use permits are issued only in support of phosphate and sodium permits and leases. For phosphate permits and leases, BLM may issue you a use permit to use up to 80 acres. For sodium leases, use permits are limited to no more than 40 acres.

### **§ 3516.12 What activities may I conduct under a use permit?**

Phosphate use permits authorize you to conduct activities to properly extract, treat, or remove the mineral deposits. Sodium use permits authorize you to occupy camp sites, develop refining works and use the surface for other purposes connected with, and necessary to, the proper development and use of the deposits.

### **§ 3516.15 How do I apply for a use permit?**

You must file three copies of your application in the BLM office administering the lands you are interested in. There is no specific form required. Include the filing fee for a use permit found in the fee schedule in § 3000.12 of this chapter and the first year's rental.

## Bureau of Land Management, Interior

Pt. 3580

Calculate the rental in accordance with § 3504.15 of this part.

[64 FR 53536, Oct. 1, 1999, as amended at 72 FR 50888, Sept. 5, 2007]

### **§ 3516.16 What must I include with my application?**

You must agree to pay the annual charge identified in the permit, and provide the following information:

- (a) Specific reasons why you need the additional lands;
- (b) A description of the lands applied for;
- (c) Any information demonstrating that the lands are suitable and appropriate for your needs; and
- (d) Evidence that the lands are unoccupied and unappropriated.

### **§ 3516.20 Is there an annual fee or charge for use of the lands?**

Yes. You must pay the annual \$1 per acre rental, or \$20, whichever is greater, on or before the anniversary date of the permit.

### **§ 3516.30 What happens if I fail to pay the annual rental on my use permit?**

Your use permit will terminate automatically if you fail to pay the required rental within 30 days after we serve you with a written notice of the rental requirement.

## **Subpart 3517—Hardrock Mineral Development Contracts; Processing and Milling Arrangements**

### **§ 3517.10 What are development contracts and processing and milling arrangements?**

Development contracts and processing and milling arrangements involving hardrock minerals are agreements between one or more lessees and one or more other persons to justify large scale operations for the discovery, development, production, or transportation of ores.

### **§ 3517.11 Are permits and leases covered by approved agreements exempt from the acreage limitations?**

Hardrock mineral permits and leases committed to development contracts or processing or milling arrangements

approved by BLM are exempt from state and nationwide acreage limitations. We will not count them toward your maximum acreage holdings. However, individual hardrock mineral leases committed to a development contract or lease may not exceed 2560 acres in size.

### **§ 3517.15 How do I apply for approval of one of these agreements?**

No specific form is required. Submit three copies of your application to the BLM office with jurisdiction over some or all of the lands in which you are interested. Include the following information:

- (a) Copies of the contract or other agreement affecting the Federal hardrock mineral leases or permits, or both;
- (b) A statement showing the nature and reason for your request;
- (c) A statement showing all the interests held in the area of the agreement by the designated contractor; and
- (d) The proposed or agreed upon plan of operation for development of the leased lands.

### **§ 3517.16 How does BLM process my application?**

- (a) We will consider whether the agreement will conserve natural resources and is in the public interest.
- (b) Once the agreement is signed by all the parties, we may approve it.

## **PART 3580—SPECIAL LEASING AREAS**

SOURCE: 51 FR 15256, Apr. 22, 1986, unless otherwise noted.

### **Subpart 3581—Gold, Silver, or Quicksilver in Confirmed Private Land Grants**

#### **§ 3581.0-3 Authority.**

Authority for leasing gold, silver, or quicksilver in confirmed private land grants is shown in § 3500.0-3(c)(1) of this title.

#### **§ 3581.1 Lands to which applicable.**

The regulations in this subpart apply to lands in private land claims patented pursuant to decrees of the Court of Private Land Claims where the grant did not convey the rights to deposits of gold, silver and quicksilver and where the grantee has not otherwise become entitled in law or in equity to the deposits.

#### **§ 3581.2 Who may obtain a lease.**

Applications shall only be filed by, and leases issued to, the owner of the lands under the confirmed land grant; that is, the original grantee or his/her record transferee or successor in title.

#### **§ 3581.3 Application for lease.**

(a) Applications for leases shall be filed in triplicate in the proper BLM office and may include all or any part of the grant for which the applicant holds title on the date of the application. No specific form is required.

(b) Applications shall set forth the name and address of the applicant, describe the lands in which the deposits occur by legal subdivision of the public surveys, if so surveyed, otherwise by metes and bounds; or if for the entire area in the grant, the name of the grant, area and date of patent shall suffice. The mineral deposits also shall be fully described, giving character, mode of occurrence, nature of the formation, kind and character of associated minerals, if any, proposed mining

## Bureau of Land Management, Interior

## § 3582.2-1

methods, estimate of amount of investment necessary for successful operation of the mine(s) contemplated, estimated amount of production of gold, silver and quicksilver, or any of them, and such other pertinent information as the applicant may desire to set forth, including what he/she considers a reasonable royalty rate under the lease.

(c) The applicant also shall file with his/her application a duly authenticated abstract of title showing present ownership of the lands or a certificate of the county recorder of deeds that the record title stands in the applicant's name.

### § 3581.4 Leases.

#### § 3581.4-1 Lease terms.

The lease shall be issued for a period of 20 years with a preference right in the lessee to renew for a 10-year term at the end of the initial term and at the end of each 10-year period thereafter.

[51 FR 15213, Apr. 22, 1986; 51 FR 25204, July 11, 1986]

#### § 3581.4-2 Rate of royalty; investment determined.

If the authorized officer finds the application sufficient to authorize the issuance of a lease, he/she shall establish a rate of royalty of not less than 5 percent or more than 12½ percent of the value of the output of gold, silver or quicksilver at the mine and also shall establish the amount of investment required under the lease.

#### § 3581.4-3 Lease form and execution.

A lease on a form approved by the Director shall be furnished to the applicant, who shall be allowed 30 days from notice within which to execute and return the lease to the proper BLM office and to furnish the required bond.

#### § 3581.5 Bond.

Prior to lease issuance, the lessee shall furnish a bond of not less than \$2,000 conditioned upon compliance with all terms and conditions of the lease, including the prescribed investment requirement. The authorized officer reserves the right to increase the bond amount.

## Subpart 3582—National Park Service Areas

### § 3582.0-3 Authority.

Authority for leasing mineral deposits within certain national recreation areas administered by the National Park Service is found in § 3500.0-3(c)(3) of this title.

### § 3582.1 Other applicable regulations.

#### § 3582.1-1 Leasable minerals.

Except as otherwise specifically provided in this subpart, leasing of deposits of leasable minerals shall be governed by regulations in parts 3500, 3510, 3520, 3530, 3540 and 3550 of this title.

#### § 3582.1-2 Hardrock minerals.

Except as otherwise specifically provided in this subpart, leasing of deposits of hardrock minerals shall be governed by regulations in parts 3500 and 3560 of this title.

### § 3582.2 Lands to which applicable.

#### § 3582.2-1 Boundary maps.

The areas subject to the regulations in this subpart are those areas of lands and water which are shown on the following maps on file and available for public inspection in the Office of the Director of the National Park Service and in the Superintendent's office of each area. The boundaries of these areas may be revised by the Secretary as authorized in the Acts cited under § 3500.0-3(c)(3) of this title.

(a) Lake Mead National Recreation Area—the map identified as "boundary map 8360—80013A, revised December 1979."

(b) Whiskeytown Unit of the Whiskeytown-Shasta-Trinity National Recreation Area—the map identified as "Proposed Whiskeytown-Shasta-Trinity National Recreation Area," numbered BOR-WST 1004, dated July 1963.

(c) Ross Lake and Lake Chelan National Recreation Areas—the map identified as "Proposed Management Units. North Cascades, Washington," numbered NP-CAS—7002, dated October 1967.

(d) Glen Canyon National Recreation Area—the map identified as "Boundary Map Glen Canyon National Recreation

## § 3582.2-2

Area," numbered GLC—91,006, dated August 1972.

[51 FR 15213, Apr. 22, 1986; 51 FR 25204, July 11, 1986]

### § 3582.2-2 Excepted areas.

The following areas shall not be opened to mineral leasing:

(a) *Lake Mead National Recreation Area.* (1) All waters of Lakes Mead and Mohave and all lands within 300 feet of those lakes measured horizontally from the shoreline at maximum water surface elevations.

(2) All lands within the area of supervision of the Bureau of Reclamation around Hoover and Davis Dams and all lands within any developed and/or concentrated public use area or other area of outstanding recreational significance as designated by the Superintendent on the map (NRA-L.M. 2291A, dated July 1966) of Lake Mead National Recreation Area which is available for inspection in the Office of the Superintendent.

(b) *Whiskeytown Unit of the Whiskeytown-Shasta-Trinity National Recreation Area.* (1) All waters of Whiskeytown Lake and all lands within 1 mile of that lake measured from the shoreline at maximum surface elevation.

(2) All lands classified as high density recreation, general outdoor recreation, outstanding natural and historic, as shown on the map numbered 611-20, 004B, dated April 1976 entitled "Land Classification, Whiskeytown Unit, Whiskeytown-Shasta-Trinity National Recreation Area." This map is available for public inspection in the Office of the Superintendent.

(3) All lands within section 34 of Township 33 north, Range 7 west, Mt. Diablo Meridian.

(c) *Ross Lake and Lake Chelan National Recreation Areas.* (1) All of Lake Chelan National Recreation Area.

(2) All lands within one-half mile of Gorge, Diablo and Ross Lakes measured from the shoreline at maximum surface elevation.

(3) All lands proposed for or designated as wilderness.

(4) All lands within one-half mile of State Highway 20.

## 43 CFR Ch. II (10-1-08 Edition)

(5) Pyramid Lake Research Natural Area and all lands within one-half mile of its boundaries.

(d) *Glen Canyon National Recreation Area.* Those areas closed to mineral disposition within the natural zone, development zone, cultural zone and portions of the recreation and resource utilization zone as shown on the map numbered 80,002A, dated March 1980, entitled "Mineral Management Plan—Glen Canyon National Recreation Area." This map is available for public inspection in the Office of the Superintendent and the Offices of the State Directors, Bureau of Land Management, Arizona and Utah.

[51 FR 15213, Apr. 22, 1986; 51 FR 25204, July 11, 1986]

### § 3582.3 Consent and consultation.

Any mineral lease or permit shall be issued or renewed only with the consent of the Regional Director, National Park Service. Such consent shall be granted only upon a determination by the Regional Director that the activity permitted under the lease or permit shall not have significant adverse effect upon the resources or administration of the area pursuant to the authorizing legislation for the area. Any lease or permit issued shall be subject to such conditions as may be prescribed by the Regional Director to protect the surface and significant resources of the area, to preserve their use for public recreation and subject to the condition that site specific approval of any activity on the lease or permit shall be given only upon a concurrence by the Regional Director. All lease applications for reclamation withdrawn lands also shall be submitted to the Bureau of Reclamation for review.

## Subpart 3583—Shasta and Trinity Units of the Whiskeytown-Shasta-Trinity National Recreation Area

### § 3583.0-3 Authority.

Authority for leasing mineral deposits within the Shasta and Trinity Units of the Whiskeytown-Shasta-Trinity National Recreation Area administered

## Bureau of Land Management, Interior

## § 3583.4-3

by the Forest Service is cited in § 3500.0-3(c)(4) of this title.

### § 3583.1 Other applicable regulations.

#### § 3583.1-1 Leasable minerals.

Except as otherwise specifically provided in this subpart, leasing of deposits of leasable minerals shall be governed by regulations in parts 3500, 3510, 3520, 3530, 3540 and 3550 of this title.

#### § 3583.1-2 Hardrock minerals.

This subpart governs the leasing of hardrock minerals in the Shasta and Trinity Units of the Whiskeytown-Shasta-Trinity National Recreation Area. The terms and conditions of hardrock leases issued under this subpart shall be the same as those set out for hardrock leases in subpart 3561 of this title, except as specifically modified in this subpart.

#### § 3583.2 Consent of Secretary of Agriculture.

Any mineral lease for lands subject to this subpart shall be issued only with the consent of the Secretary of Agriculture and subject to such conditions as he/she may prescribe after he/she finds that such disposition would not have significant adverse effects on the purpose of the Central Valley Project or the administration of the recreation area.

#### § 3583.3 Applications for hardrock mineral leases.

No specific form is required. An application shall include the applicant's name and address, a statement of holdings in accordance with subpart 3502 of this title, a description of the lands in accordance with subpart 3501 of this title, and the name of the mineral for which the lease is desired. The applicant shall state whether the mineral applied for can be developed in paying quantities, stating the reasons therefor, and shall furnish such facts as are available to him/her respecting the known occurrence of the mineral, the character of such occurrence and its probable value as evidencing the existence of a workable deposit of such mineral. Each application must be filed in triplicate in the proper BLM office and must be accompanied by the filing fee

for Shasta and Trinity hardrock mineral leases found in the fee schedule in § 3000.12 of this chapter.

[51 FR 15213, Apr. 22, 1986, as amended at 72 FR 50888, Sept. 5, 2007]

### § 3583.4 Hardrock mineral leases.

#### § 3583.4-1 Leasing units.

Leasing units may not exceed 640 acres consisting, if the lands are surveyed, of legal subdivisions in reasonably compact form or, if the lands are not surveyed, of a square or rectangular area with north and south and east and west boundaries so as to approximate legal subdivisions, described by metes and bounds and connected to a corner of the public survey by courses and distances. The authorized officer may prescribe a lesser area for any mineral deposit if such lesser area is adequate for an economic mining operation.

#### § 3583.4-2 Royalties, rentals and minimum royalties.

Rentals and royalties shall be determined by the authorized officer on the basis of the fair market value, but in no event shall be less than:

(a) A rental of 50 cents per acre or fraction thereof payable in advance until production is obtained.

(b) A minimum royalty of \$1 per acre or fraction thereof payable in advance after production is obtained.

(c) A production royalty of 2 percent of the amount or value of the minerals mined, the exact amount of royalty to be fixed prior to the issuance of the lease.

#### § 3583.4-3 Special terms and conditions.

Each lease shall contain provisions for the following:

(a) Diligent development of the leased property, except when operations are interrupted by strikes, the elements or casualties not attributable to the lessee, unless operations are suspended upon a showing that the lease cannot be operated except at loss because of unfavorable market conditions;

(b) Occupation and use of the surface shall be restricted to that which is reasonably necessary for the exploration,

#### **§ 3583.4-4**

development and extraction of the leased minerals, subject to any special rules to protect the values of the recreation area;

(c) No vegetation shall be destroyed or disturbed except where necessary to mine and remove the minerals;

(d) Operations shall not be conducted in such a manner as to adversely affect the purpose of the Central Valley Project through dumping, drainage or otherwise;

(e) Structures shall not be erected or roads or vehicle trails opened or constructed without first obtaining written permission from an authorized officer or employee of the Forest Service. The permit for a road or trail may be conditioned upon the permittee's maintaining the road or trail in passable condition satisfactory to the officer in charge of the area so long as it is used by the permittee or his/her successor;

(f) Reservation of the right to add additional terms to the lease when deemed necessary by the authorized officer or employee of the Forest Service for the protection of the surface, its resources and use for recreation.

#### **§ 3583.4-4 Duration of lease.**

Leases shall be issued for period of 5 years. Any lease in good standing, upon which production in paying quantities has been obtained, shall be subject to renewal for successive 5 year terms on such reasonable terms as may be prescribed by the Secretary. An application for renewal shall be filed in triplicate in the proper BLM office at least 90 days prior to the expiration of the current lease term unless the lands included in the lease have been withdrawn at the expiration of such term.

#### **§ 3583.4-5 Lease by competitive bidding.**

Leases may be offered competitively for any lands applied for under this subpart without regard to the quantity or quality of the mineral deposit that may be present therein.

#### **§ 3583.5 Disposal of materials.**

Materials within the public lands covered by regulations in this subpart which are not subject to the provisions of §§ 3583.1-1 and 3583.1-2 of this title shall be subject to disposal under the

#### **43 CFR Ch. II (10-1-08 Edition)**

Materials Act of 1947, as amended (30 U.S.C. 601 *et seq.*), subject to the conditions and limitations on occupancy and operations prescribed for leases in this subpart.

[51 FR 15213, Apr. 22, 1986; 51 FR 25204, July 11, 1986]

### **Subpart 3584—Reserved Minerals in Lands Patented to the State of California for Park or Other Public Purposes**

#### **§ 3584.0-3 Authority.**

Authority for leasing reserved minerals in certain lands patented to the State of California for park or other purposes is cited under § 3500.0-3(c)(2) of this title.

#### **§ 3584.1 Lands to which applicable.**

The regulations in this subpart apply to certain lands patented to the State of California for park and other public purposes.

#### **§ 3584.2 Minerals to be leased.**

Leasable and hardrock minerals are subject to lease under this subpart.

#### **§ 3584.3 Other applicable regulations.**

Subject to regulations in this subpart, the regulations in parts 3500, 3510, 3520, 3530, 3540, 3550 and 3560 of this title shall govern the leasing of all leasable and hardrock minerals within the area.

[51 FR 15213, Apr. 22, 1986; 51 FR 25205, July 11, 1986]

#### **§ 3584.4 Notice of application.**

The authorized officer shall notify the surface owner of each application received. Notice of any proposed competitive lease sale shall be given to the surface owner prior to publication of notice of sale. Should the surface owner object to leasing of any tract for reasons determined by the authorized officer to be satisfactory, the application shall be rejected and the lands shall not be offered for lease sale.

#### **§ 3584.5 Protection of surface.**

All leases issued pursuant to this subpart shall be conditioned upon compliance by the lessee with all the laws, rules and regulations of the State of

## Bureau of Land Management, Interior

## § 3585.3-2

California for the safeguarding and protection of plant life, scenic features and park or recreational improvements on the lands, where not inconsistent with the terms of the lease or this section. The lease also shall provide that any mining work performed upon the lease shall be located in accordance with any requirements of the State necessary for the protection of the surface rights and uses and so conducted as to result in the least possible injury to plant life, scenic features and improvements and that, upon completion of the mining operation, all excavations, including wells, shall be closed and the property shall be conditioned for abandonment to the satisfaction of the surface owner. The lease shall further provide that any use of the lands for ingress to and egress from the mine shall be on a route approved in writing by the State's authorized representative.

### § 3584.6 Terms of lease.

Leases for hardrock minerals shall issue for a period of 5 years with a preference in the lessee for renewal for a term of 5 years at the end of the initial term and at the end of each 5 year period thereafter (See subpart 3566).

## Subpart 3585—White Mountains National Recreation Area, Alaska

### § 3585.0-3 Authority.

(a) Authority for leasing minerals in the White Mountains National Recreation Area—Alaska is found in § 3500.0-3(c)(5) of this title.

(b) Authority for approving exploration licenses is section 302(b) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1732(b)).

### § 3585.1 Lands to which applicable.

The lands subject to the regulations in this subpart are within the White Mountains National Recreation Area—Alaska which have been opened to mineral leasing and development pursuant to the findings in the land use plan for the area that such use and development would be compatible with, or would not significantly impair, public recreation and conservation of the scenic, scientific, historic, fish and wildlife or other values contributing to

public enjoyment. The land use plan is on file and available for public inspection in the Bureau's Fairbanks District Office.

### § 3585.2 Other applicable regulations.

#### § 3585.2-1 Leasable minerals.

Leasing of deposits of leasable minerals shall be governed by the applicable regulations in parts 3500, 3510, 3520, 3530, 3540 and 3550 of this title.

#### § 3585.2-2 Hardrock minerals.

Except as otherwise specifically provided in §§ 3585.3 and 3585.4 of this title for mining claimant preference right leases, the regulations in parts 3500 and 3560 of this title shall govern the leasing of hardrock minerals.

### § 3585.3 Mining claimant preference right leases.

#### § 3585.3-1 Who may obtain a mining claimant preference right lease.

Where, consistent with the land use plan, the Secretary has opened the area to mineral leasing and development, the holder of an unperfected mining claim within the White Mountains National Recreation Area—Alaska which was, prior to November 16, 1978, located, recorded and maintained in accordance with applicable Federal and State laws on lands located within the recreation area is entitled to a lease for the removal of the hardrock minerals from the mining claim(s), provided such mining claimant submits a timely application.

#### § 3585.3-2 Application.

(a) An application for a mining claimant preference right lease shall be filed in triplicate in the Fairbanks District Office, Bureau of Land Management, P.O. Box 1150, Fairbanks, Alaska 99707, by the holder of an unperfected mining claim(s), within 2 years from the date the lands are opened to mineral leasing and development.

(b) No specific form is required.

(c) Each application shall be signed in ink by the applicant and shall include the following:

(1) The applicant's name and address;

(2) The serial number for each claim for which the application is made;

#### **§ 3585.4**

(3) The name of the mineral(s) for which the lease is sought; and

(4) A separate map on which the claim(s) is clearly marked.

(d) A single application may embrace any number of unperfected mining claims provided that, in the aggregate, the claims do not exceed 640 acres. The claims shall be contiguous and shall be located entirely within an area 6 miles square. Multiple applications may be submitted.

#### **§ 3585.4 Leases.**

##### **§ 3585.4-1 Survey for leasing.**

Prior to the issuance of a lease under this subpart, the applicant, at his/her own expense, shall be required to have a correct survey made under authority of a cadastral engineer, such survey to show the exterior surface boundaries of the entire lease tract, not each individual mining claim where more than one claim is involved, which boundaries are to be distinctly marked by monuments on the ground. Application for authorization of survey shall be made in accordance with subpart 1821 of this title.

[51 FR 15213, Apr. 22, 1986; 51 FR 25205, July 11, 1986]

##### **§ 3585.4-2 Terms and conditions.**

Leases shall be issued on a form approved by the Director and under such terms and conditions as prescribed in the lease form and subpart 3561 of this title. Where deemed necessary by the authorized officer, special lease stipulations also shall be included for the protection of the surface, its resources and use for recreation.

##### **§ 3585.4-3 Relinquishment of claims.**

Prior to the issuance of a lease, the applicant shall relinquish in writing any right or interest in his/her mining claim(s) as of the date the lease covering such claim(s) becomes effective.

#### **§ 3585.5 Exploration license.**

##### **§ 3585.5-1 Exploration license.**

Private parties, jointly or severally, may apply for exploration licenses to explore known hardrock mineral deposits which are not under lease or within an area subject to application and lease

#### **43 CFR Ch. II (10-1-08 Edition)**

under § 3585.3 of this title to obtain geologic, environmental and other pertinent data concerning such deposits. Exploration licenses do not grant the licensee any preference right to a lease.

##### **§ 3585.5-2 Other applicable regulations.**

Except as otherwise specifically provided in this subpart, the regulations pertaining to land use authorizations under part 2920 of this title shall govern the issuance of exploration licenses.

##### **§ 3585.5-3 Exploration plan.**

All applications for exploration licenses shall include an exploration plan which is in full compliance with § 3562.3-3 of this title. The approved exploration plan shall be attached to, and made a part of, the license.

##### **§ 3585.5-4 Notice of exploration.**

Applicants for exploration licenses shall publish a Notice of Exploration inviting other parties to participate in exploration under license on a pro rata cost sharing basis.

##### **§ 3585.5-5 Contents of notice.**

The Notice of Exploration prepared by the authorized officer and furnished to the applicant shall contain:

- (a) The name and address of the applicant;
- (b) A description of the lands;
- (c) The address of the Bureau office where the exploration plan will be available for inspection; and
- (d) An invitation to the public to participate in the exploration under the license.

##### **§ 3585.5-6 Publication and posting of notice.**

(a) The applicant shall publish the Notice of Exploration once a week for 3 consecutive weeks in at least 1 newspaper of general circulation nearest the area where the lands are located.

(b) The authorized officer shall post the notice in the Bureau's Alaska State Office and in the Fairbanks District Office for 30 days.

**§ 3585.5-7 Notice of participation.**

Any person who seeks to participate in the exploration program shall notify the authorized officer and the applicant in writing within 30 days after posting of the Notice of Exploration.

**§ 3585.5-8 Decision on plan and participation.**

(a) The authorized officer may issue the exploration license naming participants and acreage covered, establishing core hole spacing and resolving any other issue necessary to minimize surface disturbance and inconsistencies between proposed exploration plans.

(b) Upon application by the participants, a modification of the exploration plan may be approved by the authorized officer.

[51 FR 15213, Apr. 22, 1986; 51 FR 25205, July 11, 1986]

**§ 3585.5-9 Submission of data.**

The licensee must furnish to BLM copies of all data obtained during exploration. If part 2 of this title requires any such data to be held confidential, BLM will not make it public.

[63 FR 52954, Oct. 1, 1998]

**Subpart 3586—Sand and Gravel in Nevada****§ 3586.1 Applicable law and regulations.**

The Act of June 8, 1926 (44 Stat. 708), authorizes the Secretary to dispose of the reserved minerals in certain lands patented to the State of Nevada under such conditions and under such rules and regulations as he/she may prescribe. Mineral materials, including deposits of sand and gravel, in such lands shall, except for leases granted and renewed under this subpart, be subject to disposal only under the regulations in Group 3600 of this title which implement the Materials Act of 1947, as amended (30 U.S.C. 601 *et seq.*).

**§ 3586.2 Existing leases.**

Existing sand and gravel leases may be renewed at the expiration of their initial term, and at the end of each successive 5-year period thereafter, for an additional term of 5 years, under

such terms and conditions as the authorized officer determines to be reasonable. An application for renewal must be filed in triplicate in the proper BLM office within 90 days prior to the expiration of the lease term and be accompanied by the filing fee for renewal of existing sand and gravel leases in Nevada found in the fee schedule in §3000.12 of this chapter. Prior to renewal of a lease, the lessee shall be required to file a new bond and remit advance rental for the first year of the renewal lease at the rate prescribed by the authorized officer. The rental payment shall not be less than \$20. The lease shall be renewed only upon application of the lessee of record. The authorized officer shall not renew any lease that is not producing sand and gravel or is not part of an existing sand and gravel mining operation.

[51 FR 15213, Apr. 22, 1986, as amended at 72 FR 50889, Sept. 5, 2007]

**§ 3586.3 Transfers of lease.**

Leases may be transferred in whole or in part. The regulations in subpart 3506 of this title shall govern all such transfers.

**PART 3590—SOLID MINERALS (OTHER THAN COAL) EXPLORATION AND MINING OPERATIONS**

NOTE: There are many leases and agreements currently in effect, and which will remain in effect, involving Federal leases which specifically refer to the United States Geological Survey, Minerals Management Services or the Conservation Division. These leases and agreements also often specifically refer to various officers as Supervisor, Conservation Manager, Deputy Conservation Manager, Minerals Manager and Deputy Minerals Manager. In addition, many leases and agreements specifically refer to 30 CFR part 231 or specific sections thereof. Those references shall now mean the Bureau of Land Management or Minerals Management Service, as appropriate.

### **Subpart 3590—Solid Minerals (Other Than Coal) Exploration and Mining Operations—General**

#### **§ 3590.0-1 Purpose.**

The purpose of the regulations in this part is to promote orderly and efficient prospecting, exploration, testing, development, mining and processing operations and production practices without waste or avoidable loss of minerals or damage to deposits; to encourage maximum recovery and use of all known mineral resources; to promote operating practices which will avoid, minimize or correct damage to the environment—land, water and air—and avoid, minimize or correct hazards to public health and safety; and to obtain a proper record and accounting of all minerals produced.

#### **§ 3590.0-2 Policy.**

The regulations in this part are administered under the direction of the Director, Bureau of Land Management.

#### **§ 3590.0-3 Authority.**

Authority for carrying out the regulations in this part is set out in § 3500.0-3 of this title, unless otherwise noted.

#### **§ 3590.0-5 Definitions.**

As used in this part, the term:

(a) *Established requirements* means applicable law and regulations, lease, license or permit terms, conditions and special stipulations; approved mine or exploration plan requirements; and orders issued by the authorized officer.

(b) *General mining order* means a formal numbered order issued in a rule-making procedure by the Department of the Interior which implements the

## Bureau of Land Management, Interior

## § 3590.2

regulations in this part and applied to mining and related operations.

(c) *Lessee* means any person, partnership, association, corporation or municipality that holds a mineral lease, through issuance or assignment, in whole or part, which lease is subject to the provisions of this part.

(d) *Licensee* means any person, partnership, association, corporation or municipality that holds a mineral license, through issuance or assignment, in whole or part, which license is subject to the provisions of this part.

(e) *Permittee* means any person, partnership, association, corporation or municipality that holds a mineral prospecting permit, through issuance, or assignment, in whole or part, which permit is subject to the provisions of this part.

(f) *Operator* means anyone authorized to conduct operations pursuant to the regulations in this part.

(g) *Reclamation* means the measures undertaken to bring about the necessary reconditioning or restoration of lands or water affected by exploration, mining, on-site processing operations or waste disposal in a manner which, among other things, will prevent or control on-site or offsite damage to the environment.

(h) *Ultimate maximum recovery* means that all portions of a leased Federal mineral deposit shall be mined, based on standard industry operating practices. The requirement to achieve ultimate maximum recovery does not in any way restrict the authorized officer's authority to ensure the conservative of the mineral resource and protection of the other resources.

### § 3590.0-7 Scope.

The regulations in this part govern operations for the discovery, testing, development, mining, reclamation, and processing of all minerals under lease, license or permit issued for Federal lands under the regulations in Group 3500 of this title or part 3140 of this title. For operations, involving the extraction of hydrocarbon from tar sands or oil shale by in-situ methods utilizing boreholes or wells, part 3160 of this title is applicable. These regulations also govern operations for all minerals on Indian tribal lands and al-

lotted Indian lands leased under 25 CFR parts 211 and 212. Further, when the regulations in this part related to matters included in 25 CFR part 215 or 216 the regulations in this part shall be considered as supplemental and the regulations in 25 CFR part 215 or 216 shall govern to the extent of any inconsistencies.

### § 3590.2 Responsibility of the authorized officer.

The authorized officer shall regulate prospecting, exploration, testing, development, mining, processing operations, and reclamation authorized under this part. The duties of the authorized officer include, but are not limited to, the following:

(a) Approval of operating plans and plan modifications after preparation of appropriate environmental analyses. Prior to approving a plan, the authorized officer shall consult with the agency having jurisdiction over the lands with respect to the surface protection and reclamation aspects of such plan.

(b) Inspection, at least quarterly, of leased, licensed or permitted lands where operations for discovery, testing, development, mining, reclamation, or processing of minerals are being conducted.

(c) Inspection and regulation of such operations for the purpose of preventing waste of mineral substances or damage to formations and deposits containing them, or damage to other formations, deposits or nonmineral resources affected by the operations.

(d) Inspecting exploration and mining operations to determine the adequacy of water management and pollution control measures taken for the protection of the quality of surface and groundwater resources and the adequacy of emission control measures taken for the protection of air quality. Such inspection shall be conducted as necessary and shall be fully coordinated with all State and Federal agencies having jurisdiction.

(e) Requiring operators to conduct operations in compliance with established requirements, including the law, regulations, the terms and conditions of the lease, license or permit, the requirements of approved exploration or

## § 3591.1

mining plans, notices and orders and special stipulations.

(f) Obtaining the records of production of minerals and other information as necessary in order to verify that production reported to the Minerals Management Service for royalty purposes is an accurate accounting of minerals produced.

(g) Acting on applications for suspension of operations and production filed under § 3503.3 of this title and terminating such suspensions when conditions warrant. The authorized officer shall, upon request, assist in review of applications for suspension of operations and production on Indian lands which are filed under the provisions of 25 CFR parts 211 and 212.

(h) Upon receipt of a written request for cessation or abandonment of operations, inspecting the operations and determining whether they are in compliance with established requirements. The authorized officer shall, in accordance with applicable procedures, consult with, or obtain the concurrence of the State or Federal agency having jurisdiction over the lands with respect to the surface protection and reclamation requirements of the lease, license or permit and the exploration or mining plan.

(i) Acting on any mineral trespass on Federal or Indian lands in accordance with part 9230 of this title. The surface managing agency, if other than the BLM, shall be notified of any mineral trespass and the planned enforcement action.

(j) Implementing General Mining Orders and issuing other orders, making determinations and providing concurrence and approvals as necessary to implement or assure compliance with the regulations in this part. Any verbal orders, approvals or concurrences shall be promptly confirmed in writing.

### **Subpart 3591—General Obligations of Lessees, Licensees and Permittees**

#### **§ 3591.1 General obligations of lessees, licensees and permittees.**

(a) Operations for the discovery, testing, development, mining or processing of minerals shall conform to the established requirements.

## 43 CFR Ch. II (10–1–08 Edition)

(b) The surface of lease, license or permit lands shall be reclaimed in accordance with established requirements. Lessees, licensees or permittees shall take such action as may be needed to avoid, minimize or repair:

(1) Waste and damage to mineral-bearing formations;

(2) Soil erosion;

(3) Pollution of the air;

(4) Pollution of surface or ground water;

(5) Damage to vegetation;

(6) Injury to or destruction of fish or wildlife and their habitat;

(7) Creation of unsafe or hazardous conditions;

(8) Damage to improvements; and

(9) Damage to recreation, scenic, historical and ecological values of the lands.

(10) Damage to scientifically significant paleontological and archaeological resources.

(c) All operations conducted under this part shall be consistent with Federal and State water and air quality standards.

(d) Inundations, fires, fatal accidents, accidents threatening damage to the mine, the lands or the deposits, or conditions which could cause water pollution shall be reported promptly to the authorized officer. The notice required by this section shall be in addition to any notice or reports required by 30 CFR part 56 or 57, or other applicable regulations.

#### **§ 3591.2 Forms and reports.**

The operator shall submit production and royalty forms and reports to the Minerals Management Service in accordance with 30 CFR parts 216 and 218.

### **Subpart 3592—Plans and Maps**

#### **§ 3592.1 Operating plans.**

(a) Before conducting any operations under any lease(s), license(s), or permit(s), the operator shall submit to the authorized officer an exploration or mining plan which shall show in detail the proposed exploration, prospecting, testing, development or mining operations to be conducted. Exploration and mining plans shall be consistent with and responsive to the requirements of the lease, license or permit

## Bureau of Land Management, Interior

## § 3592.1

for the protection of nonmineral resources and for the reclamation of the surface of the lands affected by the operations on Federal or Indian lease(s), license(s), or permits. The authorized officer shall consult with any other agency involved, and shall promptly approve the plans or indicate what additional information is necessary to conform to the provisions of the established requirements. No operations shall be conducted except as provided in an approved plan.

(b) The exploration plan shall be submitted in accordance with mineral specific regulations in Group 3500 of this title (See subparts 3512, 3522, 3532, 3542, 3552 and 3562) and in accordance with 25 CFR 216.6 for Indian lands.

(c) The lessee/operator shall submit 2 copies of the mining plan to the authorized officer for approval. An additional copy shall be submitted if the surface managing agency is other than the BLM. The mining plan shall contain, at a minimum, the following:

(1) Names, addresses and telephone numbers of those responsible for operations to be conducted under the approved plan to whom notices and orders are to be delivered, names and addresses of lessees, Federal lease serial numbers and names and addresses of surface and mineral owners of record, if other than the United States;

(2) A general description of geologic conditions and mineral resources, with appropriate maps, within the area where mining is to be conducted;

(3) A copy of a suitable map or aerial photograph showing the topography, the area covered by the lease(s), the name and location of major topographic and cultural features and the drainage plan away from the affected area;

(4) A statement of proposed methods, of operating, including a description of the surface or underground mining methods, the proposed roads, the size and location of structures and facilities to be built, mining sequence, production rate, estimated recovery factors, stripping ratios and number of acres in the Federal or Indian lease(s), license(s), or permit(s) to be affected;

(5) An estimate of the quantity and quality of the mineral resources, proposed cutoff grade and, if applicable,

proposed blending procedures for all leases covered by the mining plan;

(6) An explanation of how ultimate maximum recovery of the resource will be achieved for the Federal or Indian lease(s). If a mineral deposit, or portion thereof, is not to be mined or is to be rendered unminable by the operation, the operator/lessee shall submit appropriate justification to the authorized officer for approval;

(7) Appropriate maps and cross sections showing:

(i) Federal or Indian lease boundaries and serial numbers;

(ii) Surface ownership and boundaries;

(iii) Locations of existing and abandoned mines;

(iv) Typical structure cross sections;

(v) Location of shafts or mining entries, strip pits, waste dumps, and surface facilities; and

(vi) Typical mining sequence, with appropriate timeframes;

(8) A narrative which addresses the environmental aspects associated with the proposed mine which includes, at a minimum, the following:

(i) An estimate of the quantity of water to be used and pollutants that may enter any receiving waters;

(ii) A design for the necessary impoundment, treatment or control of all runoff water and drainage from workings to reduce soil erosion and sedimentation and to prevent the pollution of receiving waters;

(iii) A description of measures to be taken to prevent or control fire, soil erosion, subsidence, pollution of surface and ground water, pollution of air, damage to fish or wildlife or other natural resources and hazards to public health and safety; and

(9) A reclamation schedule and the measures to be taken for surface reclamation of the Federal or Indian lease(s), license(s), or permit(s) that will ensure compliance with the established requirements. In those instances in which the lease requires the revegetation of an area affected by operations, the mining plan shall show:

(i) Proposed methods of preparation and fertilizing the soil prior to replanting;

## § 3592.2

(ii) Types and mixtures of shrubs, trees or tree seedlings, grasses or legumes to be planted; and

(iii) Types and methods of planting, including the amount of grasses or legumes per acre, or the number and spacing of trees or tree seedlings, or combinations of grasses and trees;

(10) The method of abandonment of operations on Federal or Indian lease(s), license(s), and permit(s) proposed to protect the unmined recoverable reserves and other resources, including the method proposed to fill in, fence or close all surface openings which are a hazard to people or animals. Abandonment of operations also is subject to the provisions of subpart 3595 of this title; and

(11) Any additional information that the authorized officer deems necessary for approval of the plan.

(d)(1) Approved exploration and mining plans may be modified at any time to adjust to changed conditions or to correct an oversight. To obtain approval of an exploration or mining plan modification, the operator/lessee shall submit a written statement of the proposed modification and the justification for such modification. Any proposed exploration or mining plan modification(s) shall not be implemented unless previously approved by the authorized officer.

(2) The authorized officer may require a modification to the approved exploration or mining plan if conditions warrant.

(e) If circumstances warrant, or if development of an exploration or mining plan for the entire operation is dependent upon unknown factors which cannot or will not be determined except during the progress of the operations, a partial plan may be approved and supplemented from time to time. The operator/lessee shall not, however, perform any operation except under an approved plan.

## § 3592.2 Maps of underground workings and surface operations.

Maps of underground workings and surface operations shall be drawn to a scale acceptable to the authorized officer. All maps shall be appropriately marked with reference to Government land marks or lines and elevations with

## 43 CFR Ch. II (10–1–08 Edition)

reference to sea level. When required by the authorized officer, vertical projections and cross sections shall accompany plan views. Maps shall be based on accurate surveys and certified by a professional engineer, professional land surveyor or other professionally qualified person. Accurate copies of such maps or reproductive material or prints thereof shall be furnished by the operator to the authorized officer when and as required.

## § 3592.3 Production maps.

(a) The operator shall prepare maps which show mineral production from the leased lands. All excavations in each separate bed or deposit shall be shown in such a manner that the production of minerals for any royalty period can be accurately ascertained. Maps submitted for in situ or solution mining shall show pipelines, meter locations, or other points of measurement necessary for production verification. Production maps shall be submitted to the authorized officer at the end of each royalty reporting period or on a schedule determined by the authorized officer. As appropriate or required by the authorized officer, production maps also shall show surface boundaries, lease boundaries and topography, including subsidence resulting from mining activities.

(b) In the event of failure of the operator to furnish the maps required by this section, the authorized officer shall employ a licensed mine surveyor to make a survey and maps of the mine, and the cost thereof shall be charged to and promptly paid by the operator/lessee.

(c) If the authorized officer believes any map submitted by an operator/lessee is incorrect, the authorized officer may cause a survey to be made, and if the survey shows the map submitted by the operator/lessee to be substantially incorrect in whole or in part, the cost of making the survey and preparing the map shall be charged to and promptly paid by the operator/lessee.

**Bureau of Land Management, Interior**

**§ 3594.3**

**Subpart 3593—Bore Holes and Samples**

**§ 3593.1 Core or test hole cores, samples, cuttings.**

(a) The operator/lessee shall submit promptly to the authorized officer a signed copy of records of all core or test holes made on the lands covered by the lease, license or permit. The records shall be in a form that will allow the position and direction of the holes to be located on a map. The records shall include a log of all strata penetrated and conditions encountered, such as water, gas or unusual conditions. Copies of analysis of all samples shall be transmitted to the authorized officer as soon as obtained or as requested by the authorized officer. The operator/lessee shall furnish the authorized officer a detailed lithologic log of each drill hole and all other in-hole surveys or other logs produced. The core from test holes shall be retained by the operator/lessee for 1 year or such other period as may be directed by the authorized officer, and shall be available for inspection by the authorized officer. The authorized officer may cut such cores and receive samples as appropriate. Upon the request of the authorized officer, the operator/lessee shall furnish samples of strata, drill cuttings and mill products.

(b) Surface drill holes for development or holes for prospecting shall be abandoned to the satisfaction of the authorized officer by cementing and/or casing or by other methods approved in advance by the authorized officer and in a manner to protect the surface and not endanger any present or future underground operation or any deposit of oil, gas, other mineral substances or aquifer.

(c) Logs and analyses of development holes shall not be required unless specifically requested by the authorized officer. Drill holes may be converted to surveillance wells for the purpose of determining the effect of subsequent operations upon the quantity, quality of pressure of ground water or mine gases. Such conversion may be required by the authorized officer or requested by the operator/lessee and approved by the authorized officer. Prior to the termination of the lease, license or permit

term, all surveillance wells shall be reclaimed unless the surface owner assumes responsibility for reclamation of such surveillance wells. The transfer of liability for reclamation shall be approved in writing by the authorized officer.

(d) When drilling on lands with potential for encountering high pressure oil, gas or geothermal formations, drilling equipment shall be equipped with blowout control devices acceptable to the authorized officer.

**Subpart 3594—Mining Methods**

**§ 3594.1 Ultimate maximum recovery.**

(a) Mining operations shall be conducted in a manner to yield the ultimate maximum recovery of the mineral deposits, consistent with the protection and use of other natural resources and the protection and preservation of the environment—land, water and air. All shafts, main exits and passageways, as well as overlying beds or mineral deposits that at a future date may be of economic importance, shall be protected by adequate pillars in the deposit being worked or by such other means as approved by the authorized officer.

(b) New geologic information obtained during mining regarding any mineral deposits on the lease shall be fully recorded and a copy of the record furnished to the authorized officer, if requested.

**§ 3594.2 Support pillars.**

Sufficient pillars shall be left during first mining to ensure the ultimate maximum recovery of mineral deposits prior to abandonment. All boundary pillars shall be 50 feet thick unless otherwise specified in writing by the authorized officer. Boundary and other main pillars shall be mined only with the written consent or by order of the authorized officer.

**§ 3594.3 Boundary pillars and isolated blocks.**

(a) If the ore on adjacent lands subject to the regulations in this part has been worked out beyond any boundary

#### § 3594.4

pillar, if the water level beyond the pillar is below the operator's/lessee's adjacent operations, and if no other hazards exist, the operator/lessee shall, on the written order of the authorized officer, mine out and remove all available ore in such boundary pillar, both in the lands covered by the lease and in the adjoining premises, when the authorized officer determines that such ore can be mined without undue hardship to the operator/lessee.

(b) If the mining rights in adjoining premises are privately owned or controlled, an agreement may be made with the owners of such interests for the extraction of the ore in the boundary pillars.

(c) Narrow strips of ore between leased lands and the outcrop on other lands subject to the regulations in this part and small blocks of ore adjacent to leased lands that would otherwise be isolated or lost may be mined under the provisions of paragraphs (a) and (b) of this section.

#### § 3594.4 Development on leased lands through adjoining mines as part of a mining unit.

An operator/lessee may mine a leased tract from an adjoining underground mine on lands privately owned or controlled or from adjacent leased lands, under the following conditions:

(a) The only connections between the mine on lands privately owned or controlled and the mine on leased lands shall be the main haulageways, the ventilationways and the escapeways. Substantial concrete frames and fire-proof doors that can be closed in an emergency and opened from either side shall be installed in each such connection. Other connections through the boundary pillars shall not be made until both mines are about to be exhausted and abandoned. The authorized officer may waive any of the requirements of this paragraph when it is determined such waiver will not conflict with the regulations in 30 CFR part 57 and will promote maximum recovery of the ore.

(b) Free access for inspection of said connecting mine on lands privately owned or controlled shall be given at any reasonable time to the authorized officer.

#### 43 CFR Ch. II (10–1–08 Edition)

(c) If an operator/lessee is operating on a lease through a mine on lands privately owned or controlled does not maintain the mine access in accordance with the safety regulations, operations on the leased lands may be stopped by order of the authorized officer.

#### § 3594.5 Minerals soluble in water; brines; minerals taken in solution.

(a) In mining or prospecting deposits of sodium, potassium or other minerals soluble in water, all wells, shafts, prospecting holes and other openings shall be adequately protected with cement or other suitable materials against the coursing or entrance of water. The operator/lessee shall, when ordered by the authorized officer, back-fill with rock or other suitable material to protect the roof from breakage when there is a danger of the entrance of water.

(b) On leased, license or permit lands containing brines, due precaution shall be exercised to prevent the deposit from becoming diluted or contaminated by the mixture of water or valueless solution.

(c) Where minerals are taken from the earth in solution, such extraction shall not be within 500 feet of the boundary line of lands contained in the approved mine plan without the written permission of the authorized officer.

(d) Any agreement necessary for allocation of brine production shall be made a part of the mine plan.

#### Subpart 3595—Protection Against Mining Hazards

##### § 3595.1 Surface openings.

(a) The operator/lessee shall substantially fill in, fence, protect or close all surface openings, subsidence holes, surface excavations or workings which are a hazard to people or animals. Such protective measures shall be maintained in a secure condition during the term of the lease, license or permit. Before abandonment of operations, all openings, including water discharge points, shall be closed to the satisfaction of the authorized officer.

## **Bureau of Land Management, Interior**

## **§ 3598.1**

(b) Reclamation or protection of surface areas no longer needed for operations will commence without delay. The authorized officer shall designate such areas where restoration or protective measures, or both shall be taken.

(c) Wells utilized for operations involving solution mining or brine extraction shall be abandoned in accordance with the approved mine plan.

### **§ 3595.2 Abandonment of underground workings.**

No underground workings or part thereof shall be permanently abandoned and rendered inaccessible without the advance, written approval of the authorized officer.

## **Subpart 3596—Waste From Mining or Milling**

### **§ 3596.1 Milling.**

The operator/lessee shall conduct milling operations in accordance with the established requirements. The operator/lessee shall use due diligence in the reduction, concentration or separation of mineral substances by mechanical or chemical processes or other means so that the percentage of salts, concentrates, or other mineral substances recovered and waste generated shall be in accordance with the approved practices.

### **§ 3596.2 Disposal of waste.**

The operator/lessee shall dispose of all wastes resulting from the mining, reduction, concentration or separation of mineral substances in accordance with the terms of the lease, approved mining plan, applicable Federal, State and local law and regulations and the directions of the authorized officer.

## **Subpart 3597—Production Records**

### **§ 3597.1 Books of account.**

(a) Operators/lessees shall maintain records which show a correct account of all ore and rock mined, of all ore put through the processing plant, of all mineral products produced and of all ore and mineral products sold. The records shall show all relevant quality analyses of ore mined, processed or

sold and the percentage of the mineral products recovered or lost.

(b) Production records shall be made available for examination by the authorized officer during regular business hours. For the purpose of production verification, the authorized office may request, and the operator/lessee shall submit a copy of any portion of the production records not submitted to the Minerals Management Service as part of the operator's/lessee's production reporting.

### **§ 3597.2 Audits.**

(a) An audit of the operator's/lessee's accounts and books may be made or directed by the Minerals Management Service in accordance with the provisions of Title 30 of the Code of Federal Regulations.

(b) An audit of the operator's/lessee's accounts and production records by the service may be requested by the authorized officer if, during the process of verification of production, it is determined that an irregularity exists between reported production and production calculated by the authorized officer. Such audits shall be requested when the irregularity cannot be resolved between the operator/lessee and the authorized officer.

## **Subpart 3598—Inspection and Enforcement**

### **§ 3598.1 Inspection of underground and surface conditions; surveying, estimating and study.**

Operators/lessees shall provide means at all reasonable hours, either day or night, for the authorized officer to inspect or investigate the underground and surface conditions; to conduct surveys; to estimate the amount of ore or other methods of prospecting, exploration, testing, development, processing and handling; to determine the volumes, types, and composition of wastes generated; to determine the adequacy of measures for minimizing the amount of such wastes and the measures for treatment and disposal of such wastes; to determine reclamation procedures and progress; production records; environmental concerns; and

## **§ 3598.2**

to determine whether the operator/lessee is in compliance with established requirements.

### **§ 3598.2 Issuance of orders.**

Orders and notices issued by the authorized officer shall be mailed by certified mail, return receipt requested, to the operator/lessee at the address furnished in the exploration or mining plan. The operator/lessee shall notify the authorized officer of any change of address or operator/lessee name.

### **§ 3598.3 Service of notices, instructions and orders.**

The operator/lessee shall be considered to have received all notices and orders that are mailed by certified mail and a receipt received by the authorized officer. Verbal orders and notices may be given to officials at the mine but shall be confirmed in writing in accordance with § 3598.2 of this title.

### **§ 3598.4 Enforcement orders.**

(a) If the authorized officer determines that an operator/lessee has failed to comply with established requirements, and such noncompliance does not threaten immediate, serious or irreparable damage to the environment, the mine or deposit being mined, or other valuable mineral deposits or other resources, the authorized officer shall serve a notice of noncompliance upon the operator and lessee by delivery in person or by certified mail, return receipt requested. Failure of the operator/lessee to take action in accordance with the notice of noncompliance shall be grounds for the authorized officer to issue an order to cease operations or initiate legal proceedings to cancel the lease under § 3509.4 of this title, or, for Indian leases, recommend to the Bureau of Indian Affairs that action be taken in accordance with 25 CFR part 211.

(b) A notice of noncompliance shall specify how the operator/lessee has failed to comply with established requirements, and shall specify the action which shall be taken to correct the noncompliance and the time limits within which such action shall be taken. The operator/lessee shall notify the authorized officer when noncompliance items have been corrected.

## **43 CFR Ch. II (10–1–08 Edition)**

(c) If, in the judgment of the authorized officer, the failure to comply with the established requirements threatens immediate, serious or irreparable damage to the environment, the mine or the deposit being mined, or other valuable mineral deposits or other resources, the authorized officer may, either in writing or orally with written confirmation, order the cessation of operations without prior notice.

### **§ 3598.5 Appeals.**

Orders or decisions issued under the regulations in this part may be appealed as provided in part 4 of this title. Orders issued under § 3598.4(c) of this title shall be effective during the pendency of any appeal.

## **Subpart 3599—Late Payment or Underpayment of Charges**

### **§ 3599.1 Late payment or underpayment charges.**

(a) The failure to make timely or proper payments of any monies due pursuant to leases, permits, and contracts subject to these regulations will result in the collection by the Minerals Management Service (MMS) of the amount past due plus a late payment charge. Exceptions to this late payment charge may be granted when estimated payments have already been made timely and otherwise in accordance with instructions provided by MMS to the payor. However, late payment charges assessed with respect to any Indian lease, permit, or contract shall be collected and paid to the Indian or tribe to which the overdue amount is owed.

(b) Late payment charges are assessed on any late payment or underpayment from the date that the payment was due until the date on which the payment is received in the appropriate MMS accounting office. Payments received after 4 p.m. local time on the date due will be acknowledged as received on the following workday.

(c) Late payment charges are calculated on the basis of a percentage assessment rate. In the absence of a specific lease, permit, license, or contract provision prescribing a different rate, this percentage assessment rate is prescribed by the Department of the

## Bureau of Land Management, Interior

## Pt. 3600

Treasury as the “Treasury Current Value of Funds Rate.”

(d) This rate is available in the Treasury Fiscal Requirements Manual Bulletins that are published prior to the first day of each calendar quarter for application to overdue payments or underpayments in that new calendar quarter. The rate is also published in the Notices section of the FEDERAL REGISTER and indexed under “Fiscal Service/Notices/Funds Rate; Treasury Current Value.”

(e) Late payment charges apply to all underpayments and payments received after the date due. These charges include rentals; production, minimum, or advance royalties; assessments for liquidated damages; administrative fees and payments by purchaser of royalty taken-in-kind or any other payments, fees, or assessments that a lessee/operator/permittee/payor/or purchaser of royalty taken-in-kind is required to pay by a specified date. The failure to pay past due amounts, including late payment charges, will result in the initiation of other enforcement proceedings.

[47 FR 22528, May 25, 1982. Redesignated at 48 FR 36588, Aug. 12, 1983. Redesignated at 51 FR 15212, Apr. 22, 1986]

### Group 3600—Mineral Materials Disposal

NOTE: The information collection requirements contained in parts 3600, 3610 and 3620 have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and assigned clearance number 1004-0103. The information is being collected to allow the authorized officer to determine if the applicant is qualified to purchase or have free use of mineral materials on the public lands. The obligation to respond is required to obtain a benefit.

### PART 3600—MINERAL MATERIALS DISPOSAL

#### Subpart 3601—Mineral Materials Disposal; General Provisions

##### FUNDAMENTAL PROVISIONS

Sec.

3601.1 Purpose.

3601.3 Authority.

3601.5 Definitions.

3601.6 Policy.

3601.8 Public availability of information.

3601.9 Information collection.

##### LIMITATIONS ON DISPOSAL OF MINERAL MATERIALS

3601.10 Limitations on BLM's discretion to dispose of mineral materials.

3601.11 When will environmental considerations prevent BLM from disposing of mineral materials?

3601.12 What areas does BLM exclude from disposal of mineral materials?

3601.13 How can I obtain mineral materials from Federal lands that have been withdrawn to aid a function of another Federal agency or of a State or local government agency?

3601.14 When can BLM dispose of mineral materials from unpatented mining claims?

##### RIGHTS OF PURCHASERS AND PERMITTEES

3601.20 Rights of parties.

3601.21 What rights does a person have under a materials sales contract or use permit?

3601.22 What rights remain with the United States when BLM sells or issues a permit for mineral materials?

##### PRE-APPLICATION SAMPLING AND TESTING

3601.30 Pre-application activities—how and when may I sample and test mineral materials?

##### MINING AND RECLAMATION PLANS

3601.40 Mining and reclamation plans.

3601.41 What information must I include in my mining plan?

3601.42 What information must I include in my reclamation plan?

3601.43 What is the process for BLM to approve my mining and reclamation plans?

3601.44 How and when may my mining or reclamation plan be modified?

##### CONTRACT AND PERMIT ADMINISTRATION

3601.50 Administration of sales contracts and free use permits.

3601.51 How will BLM inspect my operation?

3601.52 After I finish my operations, when must I remove improvements and equipment?

##### CONTRACT AND PERMIT CANCELLATION

3601.60 Cancellation.

3601.61 When may BLM cancel my contract or permit?

3601.62 Cancellation procedure.

##### UNAUTHORIZED USE

3601.70 Unauthorized use.

3601.71 What constitutes unauthorized use?

3601.72 What are the consequences of unauthorized use?

**APPEALS**

- 3601.80 How do I appeal a final decision by BLM?

**Subpart 3602—Mineral Materials Sales**

**APPLICATIONS**

- 3602.10 Applying for a mineral materials sales contract.  
3602.11 How do I request a sale of mineral materials?  
3602.12 How does the mineral materials sales process affect other users of the same public lands?  
3602.13 How does BLM measure and establish the price of mineral materials?  
3602.14 What kind of financial security does BLM require?  
3602.15 What will happen to my bond if I transferred all of my interests or operations to another bonded party?

**ADMINISTRATION OF SALES**

- 3602.20 Administration of mineral materials sales.  
3602.21 What payment terms apply to my mineral materials sales contract?  
3602.22 When will a contract terminate?  
3602.23 When will BLM make refunds or allow credits?  
3602.24 When may I assign my materials sales contract?  
3602.25 What rights and responsibilities does my assignee assume?  
3602.26 If I assign my contract, when do my obligations under the contract end?  
3602.27 When will BLM extend the term of a contract?  
3602.28 What records must I maintain and how long must I keep them?  
3602.29 How will BLM verify my production?

**NONCOMPETITIVE SALES**

- 3602.30 Noncompetitive sales.  
3602.31 What volume limitations and fees generally apply to noncompetitive mineral materials sales?  
3602.32 What volume and other limitations pertain to noncompetitive sales associated with public works projects?  
3602.33 How will BLM dispose of mineral materials for use in developing Federal mineral leases?  
3602.34 What is the term of a noncompetitive contract?

**COMPETITIVE SALES**

- 3602.40 Competitive sales.  
3602.41 When will BLM sell mineral materials on a competitive basis?  
3602.42 How does BLM publicize competitive mineral materials sales?  
3602.43 How does BLM conduct competitive mineral materials sales?  
3602.44 How do I make a bid deposit?

- 3602.45 What final steps will BLM take before issuing me a contract?  
3602.46 What is the term of a competitive contract?  
3602.47 When and how may I renew my competitive contract and what is the fee?  
3602.48 What may BLM require when renewing my contract?  
3602.49 When will BLM issue a non-renewable contract?

**Subpart 3603—Community Pits and Common Use Areas**

**DISPOSAL OF MATERIALS—COMMUNITY PITS AND COMMON USE AREAS**

- 3603.10 Disposal of mineral materials from community pits and common use areas.  
3603.11 What rights pertain to users of community pits?  
3603.12 What rights pertain to users of common use areas?  
3603.13 What price does BLM charge under materials sales contracts for mineral materials from community pits and common use areas?  
3603.14 What plans do I need to prepare to mine or remove mineral materials from a community pit or common use area?

**RECLAMATION**

- 3603.20 Reclamation.  
3603.21 What reclamation requirements pertain to community pits and common use areas?  
3603.22 What fees must I pay to cover the cost of reclamation of community pits and common use areas?

**Subpart 3604—Free Use of Mineral Materials**

**OBTAINING FREE USE PERMITS**

- 3604.10 Permits for free use of mineral materials.  
3604.11 How do I apply for a free use permit?  
3604.12 Who may obtain a free use permit?  
3604.13 When will BLM decline to issue a free use permit to a qualified applicant?

**ADMINISTRATION OF FREE USE**

- 3604.20 Administration of free use permits.  
3604.21 What is the term of a free use permit?  
3604.22 What conditions and restrictions pertain to my free use permit?  
3604.23 When and how may I assign my free use permit?  
3604.24 Who may remove materials on my behalf?  
3604.25 What bond requirements pertain to free use permits?  
3604.26 When will BLM cancel my permit?  
3604.27 What rights does a free use permit give me against other users of the land?

## Bureau of Land Management, Interior

## § 3601.6

AUTHORITY: 30 U.S.C. 601 *et seq.*; 43 U.S.C. 1201, 1701 *et seq.*; Sec. 2, Act of September 28, 1962 (Pub. L. 87-713, 76 Stat. 652).

SOURCE: 66 FR 58901, Nov. 23, 2001, unless otherwise noted.

### Subpart 3601—3601—Mineral Materials Disposal; General Provisions

#### FUNDAMENTAL PROVISIONS

##### § 3601.1 Purpose.

The regulations in this part establish procedures for the exploration, development, and disposal of mineral material resources on the public lands, and for the protection of the resources and the environment. The regulations apply to permits for free use and contracts for sale of mineral materials.

##### § 3601.3 Authority.

(a) BLM's authority to dispose of sand, gravel, and other mineral and vegetative materials that are not subject to mineral leasing or location under the mining laws is the Act of July 31, 1947, as amended (30 U.S.C. 601 *et seq.*), commonly referred to as the Materials Act. This authority applies to sale and free use of these materials. BLM's authority to allow removal of limited quantities of petrified wood from public lands without charge is section 2 of the Act of September 28, 1962 (Pub. L. 87-713, 76 Stat. 652).

(b) Section 302 of the Federal Land Policy and Management Act of 1976 (FLPMA) (43 U.S.C. 1732) provides the general authority for BLM to manage the use, occupancy, and development of the public lands under the principles of multiple use and sustained yield in accordance with the land use plans that BLM develops under FLPMA.

(c) Section 304 of FLPMA (43 U.S.C. 1734) and the Independent Offices Appropriation Act of 1952 (31 U.S.C. 9701) authorize the U.S. Government to collect fees and to require reimbursement of its costs.

##### § 3601.5 Definitions.

As used in this part the term:

*Act* means the Materials Act of July 31, 1947, as amended (30 U.S.C. 601, *et seq.*).

*BLM* means the Bureau of Land Management.

*Common use area* means a generally broad geographic area from which BLM can make disposals of mineral materials to many persons, with only negligible surface disturbance. The use is dispersed throughout the area.

*Community pit* means a relatively small, defined area from which BLM can make disposals of mineral materials to many persons. The surface disturbance is usually extensive in the confined area.

*Mineral materials* means, but is not limited to, petrified wood and common varieties of sand, stone, gravel, pumice, pumicite, cinders, and clay.

*Performance bond* means a bond to ensure compliance with the terms of the contract and reclamation of the site as BLM requires.

*Permittee* means any Federal, State, or territorial agency, unit, or subdivision, including municipalities, or any non-profit organization, to which BLM issued a free use permit for the removal of mineral materials from the public lands.

*Public lands* means any lands and interest in lands owned by the United States and administered by the Secretary of the Interior through BLM without regard to how the United States acquired ownership, except lands held for the benefit of Indians, Aleuts, and Eskimos.

*Purchaser* means any person, including a business or government entity, buying or holding a contract to purchase mineral materials on the public lands.

##### § 3601.6 Policy.

It is BLM's policy:

(a) To make mineral materials available unless it is detrimental to the public interest to do so;

(b) To sell mineral material resources at not less than fair market value;

(c) To permit Federal, State, Territorial, and local government entities and non-profit organizations free use of these materials for qualified purposes;

(d) To protect public land resources and the environment and minimize damage to public health and safety

## § 3601.8

during the exploration for and the removal of such minerals;

(e) To prevent unauthorized removal of mineral materials; and

(f) To require purchasers and permittees to account for all removals of mineral materials.

### **§ 3601.8 Public availability of information.**

(a) All data and information concerning Federal and Indian minerals that you submit under this part are subject to part 2 of this title. Part 2 of this title includes the regulations of the Department of the Interior covering the public disclosure of data and information contained in Department of the Interior records. BLM may make available for inspection certain mineral information not protected from disclosure under part 2 of this title without a Freedom of Information Act (FOIA) (5 U.S.C. 552) request.

(b) When you submit data and information under this part that you believe to be exempt from public disclosure, and that you wish BLM to withhold from such disclosure, you must clearly mark each page that you believe includes confidential information. BLM will keep all data and information confidential to the extent allowed by § 2.13(c) of this title.

### **§ 3601.9 Information collection.**

The Office of Management and Budget has approved the information collection requirements in part 3600 under 44 U.S.C. 3501 *et seq.* and assigned clearance number 1004-0103. BLM is collecting the information to allow us to determine if you are qualified to purchase or have free use of mineral materials on the public lands. You must respond to obtain a benefit.

#### **LIMITATIONS ON DISPOSAL OF MINERAL MATERIALS**

### **§ 3601.10 Limitations on BLM's discretion to dispose of mineral materials.**

### **§ 3601.11 When will environmental considerations prevent BLM from disposing of mineral materials?**

BLM will not dispose of mineral materials if we determine that the aggregate damage to public lands and resources would exceed the public bene-

## 43 CFR Ch. II (10-1-08 Edition)

fits that BLM expects from the proposed disposition.

### **§ 3601.12 What areas does BLM exclude from disposal of mineral materials?**

(a) BLM will not dispose of mineral materials from wilderness areas or other areas where it is expressly prohibited by law. This includes national parks and monuments.

(b) BLM will not dispose of mineral materials from Indian lands and lands set aside or held for the use or benefit of Indians.

(c) BLM will not dispose of mineral materials from areas identified in land use plans as not appropriate for mineral materials disposal.

### **§ 3601.13 How can I obtain mineral materials from Federal lands that have been withdrawn to aid a function of another Federal agency or of a State or local government agency?**

If you wish to obtain mineral materials from lands withdrawn to aid a function of another Federal agency or of a State or local government agency, you may apply to BLM. BLM will dispose of the mineral materials only with the consent of that agency.

### **§ 3601.14 When can BLM dispose of mineral materials from unpatented mining claims?**

(a) BLM may dispose of mineral materials from unpatented mining claims if disposal does not endanger or materially interfere with prospecting, mining, or processing operations, or uses reasonably incident thereto.

(b) BLM will ask a mining claimant for a waiver before disposing of mineral materials from a claim. If the mining claimant refuses to sign a waiver, BLM will make sure that disposal of the mineral materials will not be detrimental to the public interest. We also will consult with the Solicitor's Office, if necessary, before proceeding with the disposal.

## Bureau of Land Management, Interior

## § 3601.42

### RIGHTS OF PURCHASERS AND PERMITTEES

#### § 3601.20 Rights of parties.

#### § 3601.21 What rights does a person have under a materials sales contract or use permit?

(a) Unless otherwise provided, if you are a purchaser under a sales contract or a free use permittee, you have the right to:

(1) Extract, remove, process, and stockpile the material until the contract or permit terminates, regardless of any rights others acquire later under the provisions of the general land laws; and

(2) Use and occupy the described lands to the extent necessary for fulfillment of the contract or permit.

(b) Users of the lands covered by your materials sales contract or free use permit who acquire their rights later than the date BLM designated the tract for mineral materials disposal will be subject to your existing use authorization, as provided in § 3602.12. This applies to uses due to any later settlement, location, lease, sale, or other appropriation under the general land laws, including the mineral leasing and mining laws.

#### § 3601.22 What rights remain with the United States when BLM sells or issues a permit for mineral materials?

Your sale contract or use permit is subject to the continuing right of the United States to issue leases, permits, and licenses for the use and occupancy of the lands, if such use would not endanger or materially interfere with the production or removal of materials under contract or permit.

### PRE-APPLICATION SAMPLING AND TESTING

#### § 3601.30 Pre-application activities—how and when may I sample and test mineral materials?

(a) BLM may authorize you in writing to sample and test mineral materials. The authorization letter expires after 90 days, but BLM may extend it for an additional 90 days if you show us that an extension is necessary. BLM may authorize these activities before

issuing a sales contract or free use permit.

(b) You must submit your sampling and testing findings to BLM. All information you submit under this section is subject to part 2 of this title. That part sets forth the rules of the Department of the Interior relating to public availability of information contained in Departmental records. (See § 3601.8.)

(c) A letter from BLM authorizing you to sample and test mineral materials does not give you a preference right to a sales contract or free use permit.

(d) BLM may impose bonding and reclamation requirements on sampling and testing that you conduct under an authorization letter.

### MINING AND RECLAMATION PLANS

#### § 3601.40 Mining and reclamation plans.

BLM may require you to submit mining and reclamation plans before we begin any environmental review or issue a contract or permit. You may combine these plans in one document.

#### § 3601.41 What information must I include in my mining plan?

If BLM requires you to submit a mining plan, it must include:

(a) A map, sketch, or aerial photograph identifying the area for which you are applying, the area and depth you plan to disturb, existing and proposed access, and the names and locations of major topographic and known cultural features;

(b) A description of your proposed methods of operation and the periods during which you will operate;

(c) A description of measures you will take to prevent hazards to public health and safety and to minimize and mitigate environmental damage; and

(d) Such other information as BLM may require.

#### § 3601.42 What information must I include in my reclamation plan?

If BLM requires you to submit a reclamation plan, it must include:

(a) A statement of the proposed manner and time in which you will complete reclamation of the areas disturbed by your operations;

### § 3601.43

(b) A map or sketch which delineates the area you will reclaim; and

(c) Such other information as BLM may require.

#### **§ 3601.43 What is the process for BLM to approve my mining and reclamation plans?**

(a) After reviewing your mining and reclamation plans, BLM will notify you of any deficiencies in the plans and recommend the changes necessary. BLM will notify you in writing when we approve your plan. You must follow BLM-approved mining and reclamation plans, which become part of the contract or permit.

(b) Your operation must not deviate from the plan BLM approves, unless it is modified under § 3601.44.

#### **§ 3601.44 How and when may my mining or reclamation plan be modified?**

(a) Either you or BLM may initiate a modification of an approved mining or reclamation plan to adjust for changed conditions or to correct any oversight. BLM will consult with you before requiring a modification.

(b) If BLM notifies you that you must modify your plan, you must prepare the modification, or explain why you need more time, within 30 days. If you fail to modify your plan to BLM's satisfaction, BLM may order you to stop operations under your contract or permit.

(c) When you ask to change an approved mining or reclamation plan for one of the reasons in paragraph (a) of this section, BLM will notify you in writing within 30 days whether we approve the modification, deny it, or require any changes in it.

#### **CONTRACT AND PERMIT ADMINISTRATION**

#### **§ 3601.50 Administration of sales contracts and free use permits.**

#### **§ 3601.51 How will BLM inspect my operation?**

You must allow BLM access at any reasonable time:

- (a) To inspect or investigate the mine condition;
- (b) To conduct surveys;

### 43 CFR Ch. II (10–1–08 Edition)

(c) To estimate the volume, types, and composition of commodities that you mine or remove;

(d) To examine weight tickets, truck logs, and other records that BLM finds necessary to verify production; or

(e) To determine whether you comply with contract, permit, statutory, or regulatory requirements.

[66 FR 58901, Nov. 23, 2001; 67 FR 68778, Nov. 13, 2002]

#### **§ 3601.52 After I finish my operations, when must I remove improvements and equipment?**

After your contract or permit period expires, or after cancellation of your permit or contract, BLM will allow you up to 90 days, excluding periods of inclement weather, to remove the equipment, personal property, and any other improvements that you placed on the public lands. You may leave in place improvements such as roads, culverts, and bridges if BLM consents. If you fail to remove equipment, personal property, or any other improvement, it becomes the property of the United States. However, you remain liable for the cost of its removal and for restoration of the site.

#### **CONTRACT AND PERMIT CANCELLATION**

#### **§ 3601.60 Cancellation.**

#### **§ 3601.61 When may BLM cancel my contract or permit?**

BLM may cancel your contract or free use permit if you:

(a) Fail to comply with the provisions of the Materials Act of 1947, as amended (30 U.S.C. 601 *et seq.*);

(b) Fail to comply with any applicable regulations; or

(c) Default in the performance of any material term, covenant, or stipulation in the contract.

#### **§ 3601.62 Cancellation procedure.**

(a) BLM will give you written notice of any defaults, breach, or cause of forfeiture, either in person or by certified mail. You have 30 days after receiving the notice:

- (1) To correct all defaults;
- (2) To request an extension of time in which to correct the defaults; or

## Bureau of Land Management, Interior

## § 3602.12

(3) To submit evidence showing to BLM's satisfaction why we should not cancel your contract or free use permit.

(b) If you fail to respond to the notice under paragraph (a) of this section, or if delivery of the notice is refused, or not completed as described in §1810.2 of this chapter, BLM may cancel the contract or permit.

### UNAUTHORIZED USE

#### § 3601.70 Unauthorized use.

##### § 3601.71 What constitutes unauthorized use?

(a) Except as provided in paragraph (b) of this section, you must not extract, sever, or remove mineral materials from public lands under the jurisdiction of the Department of the Interior, unless BLM or another Federal agency with jurisdiction authorizes the removal by sale or permit. Violation of this prohibition constitutes unauthorized use.

(b) If you own the surface estate of lands with reserved Federal minerals, you may use mineral materials within the boundaries of your surface estate without a sales contract or permit only in the following circumstances:

(1) You use a minimal amount of mineral materials for your own personal use;

(2) You have statutory authority to use the mineral materials; or

(3) You have other express authority to use the mineral materials.

##### § 3601.72 What are the consequences of unauthorized use?

Unauthorized users are liable for damages to the United States, and are subject to prosecution for such unlawful acts (see subpart 9239 of this chapter).

### APPEALS

#### § 3601.80 How do I appeal a final decision by BLM?

If a BLM decision adversely affects you, you may appeal the decision in accordance with parts 4 and 1840 of this title.

## Subpart 3602—Mineral Materials Sales

### APPLICATIONS

#### § 3602.10 Applying for a mineral materials sales contract.

#### § 3602.11 How do I request a sale of mineral materials?

(a) You may submit a written request for sale of mineral materials to the BLM office with jurisdiction over the site containing the materials. No particular form is required for this request.

(b) BLM also may initiate a sale without a request under paragraph (a) of this section.

(c) You must pay a processing fee as provided in §§ 3602.31(b) and 3602.44(f). If the request is for mineral materials that are from a community pit or common use area this requirement does not apply.

[66 FR 58901, Nov. 23, 2001, as amended at 70 FR 58878, Oct. 7, 2005; 72 FR 50888, Sept. 5, 2007]

#### § 3602.12 How does the mineral materials sales process affect other users of the same public lands?

(a) When BLM designates tracts for competitive or noncompetitive sale of mineral materials, and notes the designation in the public land records, it creates a right to remove the materials superior to any subsequent claim, entry, or other conflicting use of the land, including subsequent mining claim locations.

(b) The superior right under paragraph (a) of this section is part of all contracts and permits BLM authorizes within 2 years after the date we designate the tract. BLM may extend this 2-year period for one additional year for good cause. The right continues for the entire term of the contract or permit and any renewal term. The superior right under paragraph (a) of this section also applies to any subsequent contracts or permits that BLM authorizes within 2 years after the previous contract or permit expires or terminates.

### § 3602.13

(c) This right does not prevent other uses or segregate the land from the operation of the public land laws, including the mining and mineral leasing laws. However, such subsequent uses must not interfere with the extraction of mineral materials.

[66 FR 58901, Nov. 23, 2001; 67 FR 68778, Nov. 13, 2002]

### § 3602.13 How does BLM measure and establish the price of mineral materials?

(a) BLM will not sell mineral materials at less than fair market value. BLM determines fair market value by appraisal.

(b) BLM may periodically reappraise the value of mineral materials not yet removed, and adjust your contract price accordingly. BLM will not adjust the price during the first 2 years of the contract. BLM also will not adjust the contract price during the 2-year period following any adjustment. However, BLM may adjust the price at the beginning of any contract renewal period.

(c) BLM measures mineral materials by in-place volume or weight equivalent. When BLM requires you to measure materials, we may either designate the method you must use or allow you to choose either method. We will verify your results.

### § 3602.14 What kind of financial security does BLM require?

(a) For contracts of \$2,000 or more, BLM will require a performance bond of an amount sufficient to meet the reclamation standards provided for in the contract, but at least \$500. If you have a sales contract from a community pit or common use area and you pay a reclamation fee, BLM will not require you to post a performance bond.

(b) BLM may require a performance bond for contracts of less than \$2,000. We will not require a bond amount greater than 20 percent of the total contract value.

(c) A performance bond may be a—

(1) Bond of a corporate surety shown on the approved list (Circular 570) issued by the U.S. Treasury Department, including surety bonds arranged or paid for by third parties;

(2) Certificate of deposit that:

### 43 CFR Ch. II (10–1–08 Edition)

(i) Is issued by a financial institution whose deposits are Federally insured;

(ii) Does not exceed the maximum insurable amount set by the Federal Deposit Insurance Corporation;

(iii) Is made payable or assigned to the United States;

(iv) Grants BLM authority to demand immediate payment if you fail to meet the terms and conditions of the contract;

(v) States that no party may redeem it before BLM approves its redemption; and

(vi) Otherwise conforms to BLM's instructions as found in the contract terms;

(3) Cash bond, with a power of attorney to BLM to convert it upon your failure to meet the terms and conditions of the contract;

(4) Irrevocable letter of credit from a bank or financial institution organized or authorized to transact business in the United States, with a power of attorney to BLM to redeem it upon your failure to meet the terms and conditions of the contract; or

(5) Negotiable Treasury bond of the United States of a par value equal to the amount of the required bond, together with a power of attorney to BLM to sell it upon your failure to meet the terms and conditions of the contract.

### § 3602.15 What will happen to my bond if I transferred all of my interests or operations to another bonded party?

BLM will cancel your bond obligations following approval of the transfer of your interests or operations if the transferee provides a bond that assumes all of your existing liabilities as required in § 3602.24. However, under § 3602.26, you remain liable for any reclamation or other obligation that accrued during the time you held your interest.

## Bureau of Land Management, Interior

## § 3602.23

### ADMINISTRATION OF SALES

#### § 3602.20 Administration of mineral materials sales.

#### § 3602.21 What payment terms apply to my mineral materials sales contract?

(a) Under a sales contract for mineral materials—

(1) For sales of \$2,000 or less, you must pay the full amount before BLM will sign the contract.

(2) When the sale exceeds \$2,000, you may make installment payments. The first installment payment must be the greater of \$500 or 5 percent of the total purchase price. If you elect to make installment payments—

(i) For non-competitive sales, you must pay the first installment at or before the time BLM awards the contract;

(ii) For competitive sales, you must pay the first installment as a deposit at the time you submit the bid; and

(iii) For noncompetitive and competitive sales—

(A) Once you have removed materials, you must make each subsequent installment payment monthly in an amount equal to the value of the minerals you remove each month. You must make the payment by the 15th day following the end of the month for which you are reporting. However, you must pay the balance of the purchase price not later than 60 days before the expiration date of the contract. BLM will credit your first installment payment to you at the time of your final payment unless we cancel your contract under § 3601.61; or

(B) You may make advance payment for your annual production based on the previous year's production or your projection of the current year's production, so long as you resume paying on a monthly basis as required in paragraph (a)(2)(iii)(A) of this section if your annual payment does not cover your actual production for the current year. You must resume monthly payments no later than the 15th day following the end of the month in which production exceeds the projected production on which payments were based.

(3) You must annually (as provided in your contract) produce an amount sufficient to pay to the United States a

sum of money equal to the first installment determined under paragraph (a)(2) of this section. In lieu of such production, you may make an annual payment in the amount of the first installment. If in any contract year you make production payments that are less than the first installment, you must pay the difference between the production payments and the amount of the first installment. These annual payments are due on or before each anniversary date of the contract.

(b) If you fail to comply with the terms and conditions of the contract and BLM cancels your contract under § 3601.61, you will forfeit all moneys that you paid.

#### § 3602.22 When will a contract terminate?

(a) Your contract terminates when—

(1) Its term expires;

(2) You have completed production under your contract or permit and any renewal, and completed required reclamation; or

(3) BLM cancels your contract under § 3601.60 *et seq.* of this part.

(b) You and BLM may, by agreement, terminate the sales contract at any time.

#### § 3602.23 When will BLM make refunds or allow credits?

(a) BLM may make refunds or allow credits if—

(1) When your contract expires, your total payments exceed the total value of mineral materials included in the contract;

(2) BLM determines that insufficient mineral materials existed in the sales area to fulfill the terms of the contract; or

(3) Materials you paid for are unavailable as a result of terminating your contract by mutual agreement under § 3602.22(b).

(b) If your refund or credit is a result of terminating your contract by mutual agreement under § 3602.22(b), BLM will reduce the amount of the refund or credit by the amount of the administrative cost of processing the disposal action. If these administrative costs exceed your total payments, BLM will not make a refund or allow a credit.

#### **§ 3602.24**

(c) BLM may credit to future production on the same contract, but not refund, payments that you make in lieu of production under § 3602.21(a)(3). However, if, upon expiration of the contract, the total value of payments you have made exceeds the total value of mineral materials included in your contract, BLM will refund the difference in accordance with paragraphs (a) and (b) of this section.

#### **§ 3602.24 When may I assign my materials sales contract?**

(a) You may not assign the contract or any interest therein unless BLM approves the transfer in writing.

(b) BLM will not approve your proposed assignment of contract, unless—

(1) Your assignee—

(i) Furnishes a financial guarantee as required by § 3602.14; or

(ii) Obtains a written commitment from the previous surety that it will be bound by the assignment when BLM approves it; and

(2) The assignment contains all the terms and conditions in your contract.

#### **§ 3602.25 What rights and responsibilities does my assignee assume?**

When BLM approves your assignment, your assignee is entitled to all the rights and is subject to all the obligations under the contract.

#### **§ 3602.26 If I assign my contract, when do my obligations under the contract end?**

When BLM approves your assignment, you are released from any further liability under the contract for actions the assignee may take after the effective date of the assignment. You continue to be responsible for obligations that accrued before the approval date, whether or not you knew of them at the time of the transfer.

#### **§ 3602.27 When will BLM extend the term of a contract?**

BLM may grant a one-time extension of the contract not to exceed 1 year, if:

(a) (1) For contracts with terms over 90 days, BLM receives your written request between 30 and 90 days before the contract expires; or

(2) For contracts with terms of 90 days or less, BLM receives your writ-

#### **43 CFR Ch. II (10–1–08 Edition)**

ten request not later than 15 days before the contract expires; and

(b) You show in writing that the delay in removing the mineral materials was due to causes beyond your control and was not due to your fault or negligence.

#### **§ 3602.28 What records must I maintain and how long must I keep them?**

(a) BLM may require you to maintain and preserve for 6 years records, maps, and surveys relating to production verification and valuation. These include, but are not limited to, detailed records of quantity, types, and value of commodities you moved, processed, sold, delivered, or used.

(b) You must make such records available to BLM to allow us to determine whether you have complied with statutes, regulations, and the terms of the contract.

#### **§ 3602.29 How will BLM verify my production?**

(a) You must submit at least one report per contract year of the amount of mineral materials you have mined or removed under your sales contract so BLM can verify that you have made the required payments. BLM will specify the timing of the reports in your contract or permit.

(b) BLM may require more frequent reporting if we find it necessary.

(c) BLM may require you to conduct pre-operation, annual, and post-operation volumetric surveys of the mine site.

#### **NONCOMPETITIVE SALES**

#### **§ 3602.30 Noncompetitive sales.**

In addition to the following sections, §§ 3602.31 through 3602.35, the provisions of §§ 3602.11 through 3602.29 also apply to noncompetitive sales.

#### **§ 3602.31 What volume limitations and fees generally apply to noncompetitive mineral materials sales?**

(a) BLM may sell, at not less than fair market value, and without advertising or calling for bids, mineral materials not greater than 200,000 cubic yards (or weight equivalent) in any individual sale, when BLM determines it to be:

## Bureau of Land Management, Interior

## § 3602.42

- (1) In the public interest; and
- (2) Impracticable to obtain competition.

(b) BLM will charge the purchaser a processing fee on a case-by-case basis as described in §3000.11 of this chapter.

(c) BLM will not approve multiple noncompetitive sales that exceed a total of 300,000 cubic yards (or weight equivalent) made in any one State for the benefit of any one purchaser, whether an individual, partnership, corporation, or other entity, in any period of 12 consecutive months.

(d) The volume limitations in paragraphs (a) and (c) of this section do not apply to sales in the State of Alaska that BLM determines are needed for construction, operation, maintenance, or termination of the Trans-Alaska Pipeline System or the Alaska Natural Gas Transportation System.

(e) The volume limitations in paragraphs (a) and (b) of this section do not apply if:

(1) BLM determines that circumstances make it impossible to obtain competition; or

(2) There is insufficient time to invite competitive bids, because of an emergency situation affecting public property, health, or safety.

[66 FR 58901, Nov. 23, 2001, as amended at 70 FR 58878, Oct. 7, 2005; 73 FR 35592, June 24, 2008]

### **§ 3602.32 What volume and other limitations pertain to noncompetitive sales associated with public works projects?**

BLM may sell mineral materials not exceeding 400,000 cubic yards (or weight equivalent), at not less than fair market value, without advertising or calling for bids if:

(a) BLM determines the sale to be in the public interest; and

(b) The materials will be used in connection with an urgent public works improvement program on behalf of a Federal, State, or local governmental agency, and time does not permit advertising for a competitive sale.

### **§ 3602.33 How will BLM dispose of mineral materials for use in developing Federal mineral leases?**

(a) If you propose to use mineral materials in connection with developing a

mineral lease issued by BLM, we may, without calling for competitive bids, sell you at fair market value a volume of mineral materials not exceeding a total of 200,000 cubic yards (or weight equivalent) in one State in any period of 12 consecutive months.

(b) If the materials remain within the boundaries of the lease, BLM will not charge for mineral materials that you must move in order to extract minerals under a Federal lease, whether or not you use them for lease development.

### **§ 3602.34 What is the term of a noncompetitive contract?**

BLM will not issue a noncompetitive contract for the sale of mineral materials for a term exceeding 5 years, excluding any contract extension under §3602.27 and any period that BLM may allow for removal of equipment and improvements under §3601.52.

## COMPETITIVE SALES

### **§ 3602.40 Competitive sales.**

In addition to the following sections, §§3602.41 through 3602.49, the provisions of §§3602.11 through 3602.29 also apply to competitive sales.

### **§ 3602.41 When will BLM sell mineral materials on a competitive basis?**

Except for sales from community pits and common use areas under subpart 3603 of this part, and noncompetitive sales under §3602.30 *et seq.*, BLM will make sales only after inviting competitive bids through publication and posting under §3602.42.

### **§ 3602.42 How does BLM publicize competitive mineral materials sales?**

(a) When offering mineral materials for sale by competitive bidding, BLM:

(1) Will advertise the sale by publishing a sale notice in a newspaper of general circulation in the area where the material is located, on the same day once a week for 2 consecutive weeks; and

(2) Will post a sale notice in a conspicuous place in the office where you will submit bids.

(b) In the sale notice, BLM will state:

#### § 3602.43

- (1) By legal description, the location of the tract or tracts on which we are offering the materials;
- (2) The kind of materials we are offering;
- (3) The estimated quantities of materials we are offering;
- (4) The unit of measurement;
- (5) The appraised prices;
- (6) The time and place for receiving and opening of bids;
- (7) The minimum deposit we require;
- (8) If the sale is by request, the total cost recovery fee paid to BLM by the applicant up to 21 days before the sale;
- (9) The site access that will be available to the purchaser;
- (10) The method of bidding;
- (11) If applicable, that the purchaser must file mining or reclamation plans;
- (12) The bonding requirement;
- (13) The location for inspection of contract terms and proposed stipulations;
- (14) The address and telephone number of the office where you may obtain additional information;
- (15) Whether BLM will renew the contract; and
- (16) Any additional information that BLM deems necessary.

(c) BLM may, in its discretion, extend the period of time for advertising;

(d) BLM will not hold sales sooner than 1 week after the last advertisement.

[66 FR 58901, Nov. 23, 2001, as amended at 70 FR 58878, Oct. 7, 2005]

#### § 3602.43 How does BLM conduct competitive mineral materials sales?

(a) The applicant requesting a mineral materials sale must pay a processing fee on a case-by-case basis as described in § 3000.11 of this chapter as modified by the provisions in this section and in § 3602.42(b)(8). The cost recovery process for a competitive mineral materials sale follows:

(1) The applicant requesting the sale must pay the cost recovery fee amount before BLM will publish a sale notice.

(2) Before the contract is issued:

(i) The successful bidder, if someone other than the applicant, must pay to BLM the cost recovery amount specified in the sale notice; and

#### 43 CFR Ch. II (10–1–08 Edition)

(ii) The successful bidder must pay all processing costs BLM incurs after the date of the sale notice.

(3) If the successful bidder is someone other than the applicant, BLM will refund to the applicant the amount paid under paragraph (a)(1) of this section.

(b) In conducting a competitive sale, BLM may require submission of sealed written bids, oral bids, or a combination of both. The sale notice will state how you must submit your bid. If 2 or more persons make identical high sealed bids, BLM will determine the highest bid by holding an oral auction among the persons making the identical high bids. If no oral bid is made higher than the sealed bids, BLM will pick the successful bidder by lot. After BLM announces the high bid at an oral auction, if you are the high bidder you must confirm that bid in writing at least by the close of business on the date of the sale, or by such time as BLM may specify in the sale notice.

(c) When BLM determines that it is in the public interest to do so, we may reject any or all bids, or may waive minor deficiencies in the bids that would not ordinarily affect the outcome of the bidding.

[66 FR 58901, Nov. 23, 2001, as amended at 70 FR 58878, Oct. 7, 2005]

#### § 3602.44 How do I make a bid deposit?

(a) If you wish to make a bid to purchase mineral materials, you must submit a deposit in advance of the sale.

(1) Your sealed bids must contain a deposit.

(2) At an oral auction, you must make your deposit before the opening of the bidding.

(b) Your deposit must be the greater of \$500 or 5 percent of the appraised value as we specify in the sale notice.

(c) Your deposit may be in the form of cash, a money order, a bank draft, or a cashier's or certified check made payable to the Bureau of Land Management.

(d) If you are not the successful bidder, BLM will return your bid deposit when the bidding concludes.

(e) If you are the successful bidder, BLM will apply your deposit to the purchase price.

(f) BLM will charge the successful bidder a processing fee on a case-by-

## Bureau of Land Management, Interior

## § 3602.47

case basis as described in § 3000.11 of this chapter and § 3602.43.

[66 FR 58901, Nov. 23, 2001, as amended at 70 FR 58878, Oct. 7, 2005]

### § 3602.45 What final steps will BLM take before issuing me a contract?

(a) *Ability to perform.* BLM may require you to furnish information we find necessary to determine whether you are able to meet the obligations of the contract.

(b) *Reasons for denying a contract.* We will deny you the contract, even if you made the highest bid, if—

(1) We determine that you are unable to meet the obligations of the contract,

(2) You are unwilling to accept the terms of the contract, or

(3) BLM rejects all bids.

(c) *Refund of deposit.* If BLM denies you a contract under paragraph (b)(1) or (b)(3) of this section, we will refund your deposit.

(d) *Awarding a contract.* BLM will notify you of your contract award by presenting you with or sending you the contract.

(e) *Accepting a contract.* If BLM awards you the contract, you must, within 60 days after receiving it, sign and return the contract, together with a performance bond and mining and reclamation plan when BLM requires them. BLM may extend this period an additional 30 days if you request it in writing within the first 60-day period. If you fail to sign and return the contract within the first 60-day period, or an approved 30-day extension period, you will forfeit the bid deposit.

(f) *Awarding the contract to the second-highest bidder.* If BLM determines that you are unable to meet the obligations of the contract, or if you fail to sign and return the contract within the time period specified, BLM may offer and award the contract for the amount of the high bid to the person making the next highest complete bid. That person must be qualified and willing to accept the contract, and must re-deposit the amount required under § 3602.44(b).

(g) *Contract form.* BLM will make all sales on BLM standard contract forms approved by the Director, Bureau of Land Management. We will include as necessary additional provisions and

stipulations in the contract to conform to the provisions of the competitive sale notice and to address environmental concerns or other site-specific issues.

### § 3602.46 What is the term of a competitive contract?

The term of the contract will be in the sales notice. BLM will not issue a competitive contract for the sale of mineral materials for a term exceeding 10 years. However, the 10-year period does not include any contract extension under § 3602.27, any contract renewal under § 3602.47, and any periods for removal of equipment and improvements under § 3601.52 of this part.

### § 3602.47 When and how may I renew my competitive contract and what is the fee?

(a) *Applying for competitive contract renewal.* When you have paid the United States the full contract price for the mineral materials you purchased under a competitive contract, you may apply for renewal of the contract without further competitive bidding in order to purchase and extract additional material that may be available at the contract site. You must submit your request for renewal of the contract at least 90 days before it expires. You do not need to use a specific form.

(b) *BLM's response to the application.* BLM will renew your contract if—

(1) You meet all the requirements of this section;

(2) Your contract is not limited under § 3602.49; and

(3) BLM determines that you are able to fulfill the obligations of a new contract.

(c) *Renewal term.* BLM will renew your contract for a maximum term of 10 additional years. The renewal may be for less than 10 years if you do not request that much time, or if BLM finds that the quantity of material involved does not justify a 10-year term.

(d) *Number of times BLM may renew a contract.* There is no maximum number of times BLM may renew a contract.

(e) *Fee.* BLM will charge a processing fee on a case-by-case basis as described in § 3000.11 of this chapter.

[66 FR 58901, Nov. 23, 2001, as amended at 70 FR 58878, Oct. 7, 2005]

## § 3602.48

### § 3602.48 What may BLM require when renewing my contract?

(a) *Reappraisal.* BLM will not grant a renewal without requiring a reappraisal under § 3602.13.

(b) *Bond amount and terms.* Before renewing your contract, BLM may require you to increase, or allow you to decrease, the amount of the performance bond you posted under § 3602.14. BLM may also require other bond modifications to ensure coverage for the renewed contract.

(c) *Environmental protection requirements.* Before renewing your contract, BLM will perform additional environmental analysis as required, and may require you to adopt additional measures to prevent hazards to public health and safety, and to minimize and mitigate environmental damage.

(d) *Other requirements.* BLM may require additions or changes to other terms or conditions of your contract.

### § 3602.49 When will BLM issue a non-renewable contract?

(a) BLM may offer you a contract restricted to a single term or otherwise limited in its duration. We will base this restriction on a finding that—

(1) The land should be used for another, possibly conflicting, purpose after mineral materials are removed;

(2) The deposit of mineral materials may be appropriate for future use by multiple operators or by the local community; or

(3) Other circumstances make renewal inappropriate.

(b) If BLM limits a contract under this section, the sale notice under § 3602.42 will include this information.

(c) If your contract is in existence on December 24, 2001, BLM will decide whether you may request renewal of that contract. You must ask BLM for this decision at least 90 days before the contract expires. If fewer than 120 days remain on your existing contract on December 24, 2001, BLM may approve a renewal request that you submit less than 90 days before the contract expires if we decide the contract qualifies for renewal and we have sufficient time to process your request before your contract is due to expire.

## 43 CFR Ch. II (10–1–08 Edition)

### Subpart 3603—Community Pits and Common Use Areas

#### DISPOSAL OF MATERIALS—COMMUNITY PITS AND COMMON USE AREAS

#### § 3603.10 Disposal of mineral materials from community pits and common use areas.

(a) BLM may make mineral material sales and allow free use under permit from the same deposit within areas that we designate for this purpose. These kinds of disposals must be consistent with other provisions of this part. These designated community pit sites or common use areas may be any size.

(b) This subpart applies to both sales and free use from community pits and common use areas unless otherwise stated. Refer to subpart 3604 of this part for additional regulations applicable to the free use of mineral materials.

#### § 3603.11 What rights pertain to users of community pits?

BLM's designation of a community pit site, when noted on the appropriate BLM records or posted on the ground, establishes a right to remove the materials superior to any subsequent claim or entry of the lands.

#### § 3603.12 What rights pertain to users of common use areas?

(a) BLM's designation of a common use area does not establish a right to remove the materials superior to any subsequent claim or entry of the lands.

(b) Once you have a permit or a sales contract to remove mineral materials from a common use area, your rights under that permit or contract are superior to any subsequent claim or entry on the lands.

#### § 3603.13 What price does BLM charge under materials sales contracts for mineral materials from community pits and common use areas?

BLM will sell mineral materials from community pits or common use areas under materials sales contracts for not less than fair market value.

## Bureau of Land Management, Interior

## § 3604.13

### **§ 3603.14 What plans do I need to prepare to mine or remove mineral materials from a community pit or common use area?**

BLM generally will not require a mining or reclamation plan before you mine or remove mineral materials from a community pit or common use area. We may require such a plan if we find that circumstances warrant it. In all cases, you must comply with the terms of the contract or permit to protect health, safety, and the environment.

#### RECLAMATION

### **§ 3603.20 Reclamation.**

### **§ 3603.21 What reclamation requirements pertain to community pits and common use areas?**

Generally, you do not need to perform reclamation after extracting mineral materials from community pits or common use areas. However, you must pay a reclamation fee as provided in § 3603.22.

### **§ 3603.22 What fees must I pay to cover the cost of reclamation of community pits and common use areas?**

(a) You must pay a reclamation fee based on the amount of mineral materials you extract from the community pit or common use area, unless you make an alternative arrangement under paragraph (b) of this section. The reclamation fee you pay is a proportionate share of the total estimated cost of reclamation, determined by using the ratio of the material that you extract under your permit or contract to the total volume of the material BLM estimates will be extracted from the site.

(b) BLM may, at our discretion, allow purchasers and permittees to perform interim or final reclamation, where needed, in lieu of paying reclamation charges. If BLM allows you to perform reclamation in lieu of paying a fee, we may also require you to post a bond under § 3602.14.

## **Subpart 3604—Free Use of Mineral Materials**

### OBTAINING FREE USE PERMITS

### **§ 3604.10 Permits for free use of mineral materials.**

### **§ 3604.11 How do I apply for a free use permit?**

If you wish to apply for free use of mineral materials, you may file a letter of request or a BLM standard application form approved by the Office of Management and Budget.

### **§ 3604.12 Who may obtain a free use permit?**

Any Federal, State, or territorial agency, unit, or subdivision, including municipalities, or any non-profit organization, may apply for a free use permit to extract and use mineral materials.

(a) BLM may issue free use permits to a government entity without limitation as to the number of permits or as to the value of the mineral materials to be extracted or removed, provided that the government entity shows that it will not use these materials for commercial or industrial purposes.

(b) BLM may issue free use permits to a non-profit organization for not more than 5,000 cubic yards (or weight equivalent) in any period of 12 consecutive months, provided that the organization shows that it will not use these materials for commercial or industrial purposes.

### **§ 3604.13 When will BLM decline to issue a free use permit to a qualified applicant?**

BLM will not issue a free use permit if we determine that you own or control an adequate supply of suitable mineral materials that:

(a) Are readily available, and

(b) You can mine in a manner that is economically and environmentally acceptable.

## § 3604.20

### ADMINISTRATION OF FREE USE

#### § 3604.20 Administration of free use permits.

#### § 3604.21 What is the term of a free use permit?

(a) BLM will determine the appropriate length of your free use permit term.

(1) BLM will not grant free use permits to government entities for terms exceeding 10 years.

(2) BLM will not grant free use permits to non-profit organizations for terms exceeding one year.

(b) BLM may extend any free use permit term for a single additional period not to exceed one year.

#### § 3604.22 What conditions and restrictions pertain to my free use permit?

(a) You must not barter or sell mineral materials that you obtain under a free use permit.

(b) You must not remove mineral materials before BLM issues you a permit or after your permit expires.

(c) BLM may incorporate other conditions and restrictions into your free use permit.

#### § 3604.23 When and how may I assign my free use permit?

You may assign or transfer your free use permit to entities qualified under § 3604.12. You must first obtain BLM's written approval.

#### § 3604.24 Who may remove materials on my behalf?

(a) You may allow your agent to extract mineral materials under your free use permit.

(b) Your agent may charge you only for extraction services and must not—

(1) Charge you for the materials extracted, processed, or removed; or

(2) Take mineral materials from the permit area as payment for services rendered to you, or as a donation or gift.

#### § 3604.25 What bond requirements pertain to free use permits?

BLM may require a bond or other security as a guarantee of your faithful compliance with the provisions of your permit and applicable regulations, including reclamation. The type of secu-

## 43 CFR Ch. II (10–1–08 Edition)

rity must be one of those provided for in § 3602.14(c) of this part.

#### § 3604.26 When will BLM cancel my permit?

BLM may cancel your permit if you fail, after adequate notice, to follow its terms and conditions.

#### § 3604.27 What rights does a free use permit give me against other users of the land?

Permits that BLM issues under this subpart constitute a superior right to remove the materials in accordance with the permit terms and provisions, as against any claim to or entry of the lands made after the date BLM designated the tract for mineral materials disposal. *See* § 3602.12.

Sec.

### Subpart 3622—Free Use of Petrified Wood

3622.1 Program: General.

3622.2 Procedures; permits.

3622.3 Designation of areas.

3622.4 Collection rules.

AUTHORITY: 30 U.S.C. 601 *et seq.*; 43 U.S.C. 1201, 1732, 1733, 1740; Sec. 2, Act of September 28, 1962 (Pub. L. 87-713, 76 Stat. 652).

SOURCE: 48 FR 27015, June 10, 1983, unless otherwise noted.

### Subpart 3622—Free Use of Petrified Wood

#### § 3622.1 Program: General.

(a) Persons may collect limited quantities of petrified wood for noncommercial purposes under terms and conditions consistent with the preservation of significant deposits as a public recreational resource.

(b) The purchase of petrified wood for commercial purposes is provided for in § 3602.10 *et seq.* of this chapter.

[48 FR 27015, June 10, 1983, as amended at 66 FR 58909, Nov. 23, 2001]

#### § 3622.2 Procedures; permits.

No application or permit for free use is required except for specimens over 250 pounds in weight. The authorized officer may issue permits, using the

## Bureau of Land Management, Interior

## Pt. 3710

procedures of subpart 3604 of this chapter, for the removal of such specimens if the applicant certifies that they will be displayed to the public in a museum or similar institution.

[48 FR 27015, June 10, 1983, as amended at 66 FR 58909, Nov. 23, 2001]

### § 3622.3 Designation of areas.

(a) All public lands administered by the Bureau of Land Management and the Bureau of Reclamation are open to or available for free use removal of petrified wood unless otherwise provided for by notice in the FEDERAL REGISTER. Free use areas under the jurisdiction of said Bureaus may be modified or cancelled by notices published in the FEDERAL REGISTER.

(b) The heads of other Bureaus in the Department of the Interior may publish in the FEDERAL REGISTER designations, modifications or cancellations of free use areas for petrified wood on lands under their jurisdiction.

(c) The Secretary of the Interior may designate, modify or cancel free use areas for petrified wood on public lands which are under the jurisdiction of other Federal departments or agencies, other than the Department of Agriculture, with the consent of the head of other Federal departments or agencies concerned, upon publication of notice in the FEDERAL REGISTER.

### § 3622.4 Collection rules.

(a) *General.* The authorized officer shall control the removal without charge of petrified wood from public lands using the following criteria:

(1) The maximum quantity of petrified wood that any one person is allowed to remove without charge per day is 25 pounds in weight plus one piece, provided that the maximum total amount that one person may remove in one calendar year shall not exceed 250 pounds. Pooling of quotas to obtain pieces larger than 250 pounds is not allowed.

(2) Except for holders of permits issued under subpart 3604 of this chapter to remove museum pieces, no person shall use explosives, power equipment, including, but not limited to, tractors, bulldozers, plows, power-shovels, semi-trailers or other heavy equip-

ment for the excavation or removal of petrified wood.

(3) Petrified wood obtained under this section shall be for personal use and shall not be sold or bartered to commercial dealers.

(4) The collection of petrified wood shall be accomplished in a manner that prevents hazards to public health and safety, and minimizes and mitigates environmental damage.

(b) *Additional rules.* The head of the agency having jurisdiction over a free use area may establish and publish additional rules for collecting petrified wood for noncommercial purposes to supplement those included in paragraph (a) of this section.

[48 FR 27015, June 10, 1983, as amended at 66 FR 58909, Nov. 23, 2001]

## Group 3700—Multiple Use; Mining

NOTE: The information collection requirements contained in part 3730 of Group 3700 have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance number 1004-0110. The information is being collected to permit the authorized officer to determine whether an applicant is qualified to hold a lease for the exploration, development and utilization of minerals on all public lands withdrawn for power development. The information will be used to make this determination. A response is required to obtain a benefit.

### Subpart 3710—Public Law 167; Act of July 23, 1955: General

#### § 3710.0-3 Authority.

The Act of July 23, 1955 (69 Stat. 367, 30 U.S.C. sec. 601), was enacted "to amend the Act of July 31, 1947 (61 Stat. 681) and the mining laws to provide for multiple use of the surface of the same tracts of the public lands, and for other purposes." The regulations in this part are intended to implement only sections 3 to 7, inclusive, of said Act hereinafter more fully identified. The word "Act" when used in this subpart refers to the Act of July 23, 1955. Sections 1 and 2 thereof relate specifically to the Materials Act of July 31, 1947.

[35 FR 9731, June 13, 1970]

### Subpart 3712—Proceedings Under the Act

SOURCE: 35 FR 9732, June, 13, 1970, unless otherwise noted.

#### § 3712.1 Restriction on use of unpatented mining claims.

(a) The Act in section 4 provides:

Any mining claim hereafter located under the mining laws of the United States shall not be used, prior to issuance of patent therefor, for any purposes other than prospecting, mining or processing operations and uses reasonably incident thereto.

Rights under any mining claim hereafter located under the mining laws of the United States shall be subject, prior to issuance of patent therefor, to the right of the United States to manage and dispose of the vegetative surface resources thereof and to manage other surface resources thereof (except mineral deposits subject to location under the mining laws of the United States). Any such mining claim shall also be subject, prior to issuance of patent therefor, to the right of the United States, its permittees, and licensees, to use so much of the surface thereof as may be necessary for such purposes or for access to adjacent land: *Provided, however*, That any use of the surface of any such mining claim by the United States, its permittees or licensees, shall be such as not to endanger or materially interfere with prospecting, mining or processing operations or uses reasonably incident thereto: *Provided, further*, That if at any time the locator requires more timber for his mining operations than is available to him from the claim after disposition of timber therefrom by the United States, subsequent to the location of the claim, he shall be entitled, free of charge, to be supplied with timber for such requirements from the nearest timber administered by the disposing agency which is ready for harvesting under the rules and regulations of that agency and which is substantially equivalent in kind and quantity to the timber estimated by the disposing agency to have been disposed of from the claim: *Provided, further*, That nothing in this act shall be construed as affecting or intended to affect or in any way interfere with or modify the laws of the States which lie wholly or in part westward of the ninety-eighth meridian relating to the ownership, control, appropriation, use, and distribution of ground or surface waters within any unpatented mining claim.

Except to the extent required for the mining claimant's prospecting, mining or processing operations and uses reasonably incident thereto, or for the construction of buildings or structures in connection therewith, or to provide clearance for such operations or uses, or to the extent authorized by the United States, no claimant of any mining claim hereafter located under the mining laws of the United States shall, prior to issuance of patent therefor, sever, remove, or use any vegetative or other surface resources thereof which are subject to management or disposition by the United States under the preceding subsection (b). Any severance or removal of timber which is permitted under the exceptions of the preceding sentence, other than severance or removal to provide clearance, shall be in accordance with sound principles of forest management.

(b) The locator of an unpatented mining claim subject to the Act is limited

in his use of the claim to those uses specified in the act, namely prospecting, mining, or processing operations and uses reasonably incident thereto. He is forbidden to use it for any other purpose such, for example, as for filling stations, curio shops, cafes, tourist, or fishing and hunting camps. Except as such interference may result from uses permitted under the act, the locator of an unpatented mining claim subject to the act may not interfere with the right of the United States to manage the vegetative and other surface resources of the land, or use it so as to block access to or egress from adjacent public land, or use Federal timber for purposes other than those permitted under the act, or block access to water needed in grazing use of the national forests or other public lands, or block access to recreational areas, or prevent agents of the Federal Government from crossing the locator's claim in order to reach adjacent land for purposes of managing wild-game habitat or improving fishing streams so as to thwart the public harvest and proper management of fish and game resources on the public lands generally, both on located and on adjacent lands.

(c) Mining claims located prior to the date of the act will be subject to the Act where determination has been made pursuant to section 5 of the Act, that the locator's surface rights are limited as provided in section 4 of the Act, or where the owners have waived and relinquished all rights under section 6 of the Act, which are contrary to or in conflict with the limitations and restrictions specified as to hereafter located unpatented mining claims in section 4 of the Act. See §3714.3 as to effect on existing rights.

(d) On mining claims subject to the provisions of the Act, timber may be used by the claimants only for the purposes permitted under the Act, and, except where timber is removed to provide clearance for operations or uses permitted under the Act, such timber must be cut in accordance with sound principles of forest management. When timber on a mining claim is disposed of by the Government subsequent to the location of the claim, free use of timber by the mining claimant of like kind and quantity from the nearest

## § 3712.2

timber administered by the disposing agency is provided for, but only when and to the extent that is required for their mining operations and only in kind and quantity substantially equivalent to the timber removed from the claim by the Government. Any such timber may be cut and removed only under the rules and regulations of the administering agency. Regulations governing applications and issuance of permits for the use of such timber on public lands administered by the Bureau of Land Management are contained in part 5510 of this chapter.

### § 3712.2 Publication of notice.

#### § 3712.2-1 Request for publication of notice to mining claimant.

(a) The Act in the first paragraph of section 5(a) provides as follows:

The head of a Federal department or agency which has the responsibility for administering surface resources of any lands belonging to the United States may file as to such lands in the office of the Secretary of the Interior, or in such office as the Secretary of the Interior may designate, a request for publication of notice to mining claimants, for determination of surface rights, which request shall contain a description of the lands covered thereby, showing the section or sections of the public land surveys which embrace the lands covered by such request, or if such lands are unsurveyed, either the section or sections which would probably embrace such lands when the public land surveys are extended to such lands or a tie by courses and distances to an approved United States mineral monument.

The "request for publication of notice to mining claimants" authorized to be filed by the above-quoted portion of the act can be filed by the Federal department or agency which has the responsibility for administering surface resources of the lands to which the requested notice would relate. It must describe the land covered by the request by section, township, range, and meridian or, if the land is unsurveyed, either the section or sections which would probably embrace such lands when the public land surveys are extended to such lands, or by a metes and bounds description of such area with a tie to a United States mineral monument.

(b) A request for publication of notice under this subsection shall be filed with the proper office of the Bureau of Land Management. No request for pub-

## 43 CFR Ch. II (10-1-08 Edition)

lication may include lands in more than one district.

#### § 3712.2-2 Evidence necessary to support a request for publication.

(a) The second and third paragraphs of section 5(a) of the Act provide in detail for the filing by the head of a Federal department or agency of certain evidence in support of the request for publication of the notice referred to in § 3712.2-1 as follows:

The filing of such request for publication shall be accompanied by an affidavit or affidavits of a person or persons over twenty-one years of age setting forth that the affiant or affiants have examined the lands involved in a reasonable effort to ascertain whether any person or persons were in actual possession of or engaged in the working of such lands or any part thereof, and, if no person or persons were found to be in actual possession of or engaged in the working of said lands or any part thereof, on the date of such examination, setting forth such fact, or, if any person or persons were so found to be in actual possession or engaged in such working on the date of such examination, setting forth the name and address of each such person, unless affiant shall have been unable through reasonable inquiry to obtain information as to the name and address of any such person, in which event the affidavit shall set forth fully the nature and results of such inquiry.

The filing of such request for publication shall also be accompanied by the certificate of a title or abstract company, or of a title abstractor, or of an attorney, based upon such company's abstractor's or attorney's examination of those instruments which are shown by the tract indexes in the county office of record as affecting the lands described in said request, setting forth the name of any person disclosed by said instruments to have an interest in said lands under any unpatented mining claim heretofore located, together with the address of such person if such address is disclosed by such instruments of record. "Tract indexes" as used herein shall mean those indexes, if any, as to surveyed lands identifying instruments as affecting a particular legal subdivision of the public land surveys, and as to unsurveyed lands identifying instruments as affecting a particular probable legal subdivision according to a projected extension of the public land surveys.

(b) This part of the Act requires the filing of an affidavit which may be made by any person or persons over

## Bureau of Land Management, Interior

## § 3712.2-5

twenty-one years of age who have examined the lands. It must show whether any person or persons were "in actual possession of or engaged in the working of such lands (the lands described in the request for publication of notice) or any part thereof" and, if they were, the name and address of each such person must be given if it can be learned by reasonable inquiry and if it cannot be so learned, the affidavit must show in detail what inquiry or inquiries were made to obtain each such name and address. No definition of the terms "in actual possession" or "engaged in the working of said lands" will be attempted here, but the affidavits should recite what evidences of occupancy or workings were found. The request for publication must also be accompanied by a certificate executed as provided in the third paragraph of section 5(a) and containing the information required by that paragraph to be furnished. If there are no tract indexes, as defined in the Act, in the county office of record affecting the lands described in the request for publication, a certificate executed as provided in the said third paragraph of section 5(a) to that effect must be furnished.

### § 3712.2-3 Contents of published notice.

Section 5(a) of the Act specifies in detail what the published notice shall contain, as follows:

Such notice shall describe the lands covered by such request, as provided heretofore, and shall notify whomever it may concern that if any person claiming or asserting under, or by virtue of, any unpatented mining claim heretofore located, rights as to such lands or any part thereof, shall fail to file in the office where such request for publication was filed (which office shall be specified in such notice) and within one hundred and fifty days from the date of the first publication of such notice (which date shall be specified in such notice), a verified statement which shall set forth, as to such unpatented mining claim—

- (1) The date of location;
- (2) The book and page of recordation of the notice or certificate of location;
- (3) The section or sections of the public land surveys which embrace such mining claims; or if such lands are unsurveyed, either the section or sections which would probably embrace such mining claim when the public land surveys are extended to such

lands or a tie by courses and distances to an approved United States mineral monument;

(4) Whether such claimant is a locator or purchaser under such location; and

(5) The name and address of such claimant and names and addresses so far as known to the claimant of any other person or persons claiming any interest or interests in or under such unpatented mining claim: such failure shall be conclusively deemed (i) to constitute a waiver and relinquishment by such mining claimant of any right, title or interest under such mining claim contrary to or in conflict with the limitations or restrictions specified in section 4 of this Act as to hereafter located unpatented mining claims, and (ii) to constitute a consent by such mining claimant that such mining claim, prior to issuance of patent therefor, shall be subject to the limitations and restrictions specified in section 4 of this Act as to hereafter located unpatented mining claims, and (iii) to preclude thereafter, prior to issuance of patent, any assertion by such mining claimant of any right or title to or interest in or under such mining claim contrary to or in conflict with the limitations or restrictions specified in section 4 of this Act as to hereafter located unpatented mining claims.

### § 3712.2-4 Publication.

If the request for publication and the accompanying papers conform to the requirements of the Act, the Authorized officer or the Director, as may be appropriate, at the expense of the requesting department or agency, shall cause notice to mining claimants to be published in a newspaper having general circulation in the county in which the lands involved are situated. If the notice is published in a daily newspaper it shall be published in the Wednesday issue for nine consecutive weeks, if in a weekly paper, in nine consecutive issues, or if in a semi-weekly or tri-weekly paper, in the issue of the same day of each week for nine consecutive weeks.

### § 3712.2-5 Proof of publication.

After the period of newspaper publication has expired, the department or agency requesting the publication shall obtain from the office of the newspaper or publication a sworn statement that the notice was published at the time and in accordance with the requirements under the regulations of this

## § 3712.2-6

part, and shall file such sworn statement in the office where the Request for Publication was filed.

### § 3712.2-6 Service of notice.

The last paragraph of section 5(a) of the Act provides with respect to service of the notice by personal delivery or by registered mail, as follows:

Within fifteen days after the date of first publication of such notice, the department or agency requesting such publication (1) shall cause a copy of such notice to be personally delivered to or to be mailed by registered mail addressed to each person in possession or engaged in the working of the land whose name and address is shown by an affidavit filed as aforesaid, and to each person who may have filed, as to any lands described in said notice, a request for notices, as provided in subsection (d) of this section 5, and shall cause a copy of such notice to be mailed by registered mail to each person whose name and address is set forth in the title or abstract company's or title abstractor's or attorney's certificate filed as aforesaid, as having an interest in the lands described in said notice under any unpatented mining claim heretofore located, such notice to be directed to such person's address as set forth in such certificate; and (2) shall file in the office where said request for publication was filed an affidavit showing that copies have been so delivered or mailed.

### § 3712.2-7 Service of copies; failure to comply.

If the department or agency requesting publication under these regulations shall fail to comply with the requirements of section 5(a) of the Act as to the personal delivery or mailing of a copy of the published notice to any person, the publication of such notice shall be deemed wholly ineffectual as to that person or as to the rights asserted by that person and the failure of that person to file a verified statement, as provided in such notice shall in no manner affect, diminish, prejudice or bar any rights of that person.

### § 3712.3 Failure of claimant to file verified statement.

If any claimant under any unpatented mining claim located prior to July 23, 1955, which embraces any of the lands described in any notice published in accordance with the regulations in this part shall fail to file a verified statement, as specified in such

## 43 CFR Ch. II (10-1-08 Edition)

published notice (See § 3712.2-4), within one hundred and fifty days from the date of the first publication of such notice, such failure shall be conclusively deemed except as otherwise provided in § 3712.2-7.

(a) To constitute a waiver and relinquishment by such mining claimant of any right, title or interest under such mining claim contrary to or in conflict with the limitations or restrictions specified in section 4 of the Act as to unpatented mining claims located after its enactment.

(b) To constitute a consent by such mining claimant that such mining claim, prior to issuance of patent therefor, be subject to the limitations and restrictions specified in section 4 of the Act as to unpatented mining claims located after its enactment.

(c) To preclude thereafter prior to the issuance of patent any assertion by such mining claimant of any right or title to or interest in or under such mining claim contrary to or in conflict with the limitations or restrictions specified in section 4 of the Act as to unpatented mining claims located after its enactment.

## Subpart 3713—Hearings

SOURCE: 35 FR 9734, June 13, 1970, unless otherwise noted.

### § 3713.1 Hearing procedures.

The procedures with respect to notice of such a hearing and the conduct thereof, and in respect to appeals, shall follow the appeals and contests of the Department of the Interior and the Bureau of Land Management (part 1850 of this title) relating to contests or protests affecting public lands of the United States so far as they are applicable.

### § 3713.2 Hearing: Time and place.

If any verified statement shall be filed by a mining claimant then the administrative law judge or the Director, as may be appropriate, shall fix a time and place for a hearing to determine the validity and effectiveness of any right or title to or interest in or under such mining claim which the mining claimant may assert contrary to or in

## Bureau of Land Management, Interior

## § 3714.1

conflict with the limitations or restrictions specified in section 4 of the Act as to unpatented mining claims located after its enactment. The administrative law judge shall notify the department or agency and all mining claimants entitled to notice as the result of the filing of such verified statement of the time and place of such hearing at least 30 days in advance thereof. The notice of hearing shall contain a statement specifying the issues upon which evidence will be submitted at the hearing. Such hearing shall be held in the county where the lands in question, or parts thereof, are located unless the mining claimant agrees otherwise.

### § 3713.3 Stipulation between parties.

Where verified statements are filed asserting rights to an aggregate of more than twenty mining claims, any single hearing shall be limited to a maximum of twenty mining claims unless the parties affected shall otherwise stipulate and as many separate hearings shall be set as shall be necessary to comply with section 5(c) of the Act. If at any time prior to a hearing the department or agency requesting publication of notice and any person filing a verified statement pursuant to such notice shall so stipulate, then to the extent so stipulated, but only to such extent, no hearing shall be held with respect to rights asserted under that verified statement, and to the extent defined by the stipulation the rights asserted under that verified statement shall be deemed to be unaffected by the notice published pursuant to that request.

### § 3713.4 Effect of decision affirming a mining claimant's rights.

(a) If the final decision rendered in any hearing held pursuant to section 5 of the Act shall affirm the validity and effectiveness of any mining claimant's right or interest under a mining claim asserted in accordance with the provisions of that section, then no subsequent proceedings under section 5 of the act shall have any force or effect upon the so-affirmed right or interest of such mining claimant under such mining claim.

(b) If it is finally determined as the result of such a hearing that the claim-

ant has no right or title to or interest in or under his mining claim which he may assert contrary to or in conflict with the limitations and restrictions specified in section 4 of the act, then those limitations and restrictions shall apply with respect to such mining claim.

## Subpart 3714—Rights of Mining Claimants

SOURCE: 35 FR 9734, June 13, 1970, unless otherwise noted.

### § 3714.1 Recording by mining claimant of request for copy of notice.

Section 5(d) of the Act provides as follows:

Any person claiming any right under or by virtue of any unpatented mining claim heretofore located and desiring to receive a copy of any notice to mining claimants which may be published as above provided in subsection (a) of this section 5, and which may affect lands embraced in such mining claim, may cause to be filed for record in the county office of record where the notice of certificate of location of such mining claim shall have been recorded, a duly acknowledged request for a copy of any such notice. Such request for copies shall set forth the name and address of the person requesting copies, and shall also set forth, as to each heretofore located unpatented mining claim under which such person asserts rights—

- (1) The date of location;
- (2) The book and page of the recordation of the notice or certificate of location; and
- (3) The section or sections of the public land surveys which embrace such mining claim; or if such lands are unsurveyed, either the section or sections which would probably embrace such mining claim when the public land surveys are extended to such lands or a tie by courses and distances to an approved United States mineral monument. Other than in respect to the requirements of subsection (a) of this section 5 as to personal delivery or mailing of copies of notices and in respect to the provisions of subsection (e) of this section 5, no such request for copies of published notices and no statement or allegation in such request and no recordation thereof shall affect title to any mining claim or to any land or be deemed to constitute constructive notice to any person that the person requesting copies has, or claims, any right, title, or interest in or under any mining claim referred to in such request.

## § 3714.2

### § 3714.2 Waiver of rights by mining claimants.

Section 6 of the Act provides as follows:

The owner or owners of any unpatented mining claim heretofore located may waive and relinquish all rights thereunder which are contrary to or in conflict with the limitations or restrictions specified in section 4 of this Act as to hereafter located unpatented mining claims. The execution and acknowledgement of such a waiver and relinquishment by such owner or owners and the recordation thereof in the office where the notice or certificate of location of such mining claim is of record shall render such mining claim thereafter and prior to issuance of patent subject to the limitations and restrictions in section 4 of this Act in all respects as if said mining claim had been located after enactment of this act, but no such waiver or relinquishment shall be deemed in any manner to constitute any concession as to the date of priority of rights under said mining claim or as to the validity thereof.

### § 3714.3 Protection of existing rights; exclusion of reservation in patents.

The Act in section 7 provides as follows:

Nothing in this Act shall be construed in any manner to limit or restrict or to authorize the limitation or restriction of any existing rights of any claimant under any valid mining claim heretofore located, except as such rights may be limited or restricted as a result of a proceeding pursuant to section 5 of this Act, or as a result of a waiver and relinquishment pursuant to section 6 of this Act; and nothing in this act shall be construed in any manner to authorize inclusion in any patent hereafter issued under the mining laws of the United States for any mining claim heretofore or hereafter located, of any reservation, limitation, or restriction not otherwise authorized by law, or to limit or repeal any existing authority to include any reservation, limitation, or restriction in any such patent, or to limit or restrict any use of the lands covered by any patented or unpatented mining claim by the United States, its lessees, permittees, and licensees which is otherwise authorized by law.

This section makes it clear that all of the rights of mining claimants existing on the date of the Act are preserved and will continue unless: (a) Claimant fails, subject, however, to the provisions of § 3712.2-7, to file a verified statement in response to a published

## 43 CFR Ch. II (10-1-08 Edition)

notice as provided in section 5(b) of the Act and § 3712.2-9; (b) it is determined as a result of a hearing pursuant to section 5(c) that such rights asserted in a verified statement are not valid and effective; (c) the claimant waives and relinquishes his rights pursuant to section 6. It also preserves to all mining claimants the right to a patent unrestricted by anything in the Act and provides that no limitation, reservation or restriction may be inserted in any mineral patent unless authorized by law, but it also makes it clear that all laws in force on the date of its enactment which provide for any such reservation, limitation, or restriction in such patents and all authority of law then existing for the use of lands embraced in unpatented mining claims by the United States, its lessees, permittees, and licensees continue in full force and effect.

### Subpart 3715—Use and Occupancy Under the Mining Laws

AUTHORITY: 18 U.S.C. 1001, 3571 *et seq.*; 30 U.S.C. 22, 42, 612; 43 U.S.C. 1061 *et seq.*, 1201, 1457, 1732 (b) and (c), 1733 (a) and (g).

SOURCE: 61 FR 37125, July 16, 1996, unless otherwise noted.

#### § 3715.0-1 What are the purpose and the scope of this subpart?

(a) *Purpose.* The purpose of this subpart is to manage the use and occupancy of the public lands for the development of locatable mineral deposits by limiting such use or occupancy to that which is reasonably incident. The Bureau of Land Management (BLM) will prevent abuse of the public lands while recognizing valid rights and uses under the Mining Law of 1872 (30 U.S.C. 22 *et seq.*) and related laws governing the public lands, regardless of when those rights were created. BLM will take appropriate action to eliminate invalid uses, including unauthorized residential occupancy of the public lands.

(b) *Scope.* This subpart applies to public lands BLM administers. They do not apply to state or private lands in which the mineral estate has been reserved to the United States. They do not apply to Federal lands administered by other

## Bureau of Land Management, Interior

## § 3715.0-5

Federal agencies, even though those lands may be subject to the operation of the mining laws.

(c) This subpart does not impair the right of any person to engage in recreational activities or any other authorized activity on public lands BLM administers.

### § 3715.0-3 What are the legal authorities for this subpart?

The authorities for this subpart are 18 U.S.C. 1001, 3571 *et seq.*; 30 U.S.C. 22, 42, 612; 43 U.S.C. 1061 *et seq.*, 1201, 1457, 1732 (b) and (c), 1733 (a) and (g).

### § 3715.0-5 How are certain terms in this subpart defined?

As used in this subpart the term:

*Mining laws* means all laws that apply to mining of locatable minerals on public lands and which make public lands available for development of locatable minerals. This includes, but is not limited to, the general authorities relating to mining of locatable minerals or to the public lands on which this subpart is based and case law which interprets those authorities.

*Mining operations* means all functions, work, facilities, and activities reasonably incident to mining or processing of mineral deposits. It includes building roads and other means of access to a mining claim or millsite on public lands.

*Occupancy* means full or part-time residence on the public lands. It also means activities that involve residence; the construction, presence, or maintenance of temporary or permanent structures that may be used for such purposes; or the use of a watchman or caretaker for the purpose of monitoring activities. Residence or structures include, but are not limited to, barriers to access, fences, tents, motor homes, trailers, cabins, houses, buildings, and storage of equipment or supplies.

*Permanent structure* means a structure fixed to the ground by any of the various types of foundations, slabs, piers, poles, or other means allowed by building codes. The term also includes a structure placed on the ground that lacks foundations, slabs, piers, or poles, and that can only be moved through disassembly into its compo-

nent parts or by techniques commonly used in house moving. The term does not apply to tents or lean-tos.

*Public lands* means lands open to the operation of the mining laws which BLM administers, including lands covered by unpatented mining claims or millsites.

*Prospecting or exploration* means the search for mineral deposits by geological, geophysical, geochemical, or other techniques. It also includes, but is not limited to, sampling, drilling, or developing surface or underground workings to evaluate the type, extent, quantity, or quality of mineral values present.

*Reasonably incident* means the statutory standard "prospecting, mining, or processing operations and uses reasonably incident thereto" (30 U.S.C. 612). It is a shortened version of the statutory standard. It includes those actions or expenditures of labor and resources by a person of ordinary prudence to prospect, explore, define, develop, mine, or benefit a valuable mineral deposit, using methods, structures, and equipment appropriate to the geological terrain, mineral deposit, and stage of development and reasonably related activities.

*Substantially regular work* means work on, or that substantially and directly benefits, a mineral property, including nearby properties under your control. The work must be associated with the search for and development of mineral deposits or the processing of ores. It includes active and continuing exploration, mining, and beneficiation or processing of ores. It may also include assembly or maintenance of equipment, work on physical improvements, and procurement of supplies, incidental to activities meeting the conditions of §§ 3715.2 and 3715.2-1. It may also include off-site trips associated with these activities. The term also includes a seasonal, but recurring, work program.

*Unnecessary or undue degradation*, as applied to unauthorized uses, means those activities that are not reasonably incident and are not authorized under any other applicable law or regulation. As applied to authorized uses,

## § 3715.0-9

## 43 CFR Ch. II (10-1-08 Edition)

the term is used as defined in 43 CFR 3802.0-5 and 3809.0-5.

[61 FR 37125, July 16, 1996, as amended at 62 FR 59822, Nov. 5, 1997]

### § 3715.0-9 Information collection.

(a) BLM has submitted to the Office of Management and Budget the information collection requirements contained in this subpart under 44 U.S.C. 3507 and the Paperwork Reduction Act of 1995 and assigned clearance number 1004-0169. BLM collects the information so that it may manage use and occupancy of public lands under the mining laws by prohibiting unauthorized uses and occupancies. A response to BLM is mandatory and required to obtain the benefit of occupying the public lands for reasonably incident activities.

(b) BLM estimates the public reporting burden for this information to average two hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Information Collection Clearance Officer (DW-110), Bureau of Land Management, Building 50, Denver Federal Center, Denver, Colorado 80225-0047, and the Office of Management and Budget, Paperwork Reduction Project, 1004-0169, Washington, DC 20503.

### § 3715.1 Do the regulations in this subpart apply to my use or occupancy?

To determine if the regulations in this subpart apply to your activities, refer to Table 1 in this section.

TABLE 1

Applicability of this subpart	
If your proposed use of the public lands— ..... Includes occupancy and is "reasonably incident" as defined by this subpart.	Then— The provisions of this subpart apply to you. You must seek concurrence from BLM before beginning this use and comply with all provisions of this subpart.
Involves the placement, construction, or maintenance of enclosures, gates, fences, or signs.	The provisions of this subpart apply to you. You must seek concurrence from BLM before beginning this use and comply with all provisions of this subpart.
Is reasonably incident, but does not involve occupancy.	The provisions of this subpart do not apply to you, except for §§ 3715.4, 3715.5 and 3715.7. You are subject to the applicable regulations in 43 CFR part 3800.
Is <i>not</i> reasonably incident (involving rights-of-way, for example), but may be allowed under the public land laws.	The occupancy consultation provisions of this subpart do not apply to you. Your use is not allowed under this subpart. You must seek authorization under 43 CFR Group 2900.
Is not allowed under the public land laws, the mining laws, the mineral leasing laws, or other applicable laws.	Your use is prohibited. You must not begin or continue unauthorized uses.
Involves occupancy of a site, or any subsequent site within a 25-mile radius of the initially occupied site, for 14 days or less in any 90-day period.	The provisions of this subpart do not apply to you. Refer to the applicable regulations in 43 CFR part 8360 and pertinent State Director supplementary rules. 43 CFR part 8360 will not otherwise apply to a reasonably incident use or occupancy that this subpart allows.

### § 3715.2 What activities do I have to be engaged in to allow me to occupy the public lands?

In order to occupy the public lands under the mining laws for more than 14 calendar days in any 90-day period within a 25-mile radius of the initially occupied site, you must be engaged in certain activities. Those activities that are the reason for your occupancy must:

- (a) Be reasonably incident;
- (b) Constitute substantially regular work;
- (c) Be reasonably calculated to lead to the extraction and beneficiation of minerals;
- (d) Involve observable on-the-ground activity that BLM may verify under § 3715.7; and
- (e) Use appropriate equipment that is presently operable, subject to the need

## Bureau of Land Management, Interior

## § 3715.3

for reasonable assembly, maintenance, repair or fabrication of replacement parts.

### § 3715.2-1 What additional characteristic(s) must my occupancy have?

In addition to the requirements specified in § 3715.2, your occupancy must involve one or more of the following:

- (a) Protecting exposed, concentrated or otherwise accessible valuable minerals from theft or loss;
- (b) Protecting from theft or loss appropriate, operable equipment which is regularly used, is not readily portable, and cannot be protected by means other than occupancy;
- (c) Protecting the public from appropriate, operable equipment which is regularly used, is not readily portable, and if left unattended, creates a hazard to public safety;
- (d) Protecting the public from surface uses, workings, or improvements which, if left unattended, create a hazard to public safety; or
- (e) Being located in an area so isolated or lacking in physical access as to require the mining claimant, operator, or workers to remain on site in order to work a full shift of a usual and customary length. A full shift is ordinarily 8 hours and does not include

travel time to the site from a community or area in which housing may be obtained.

### § 3715.2-2 How do I justify occupancy by a caretaker or watchman?

If you assert the need for a watchman or caretaker to occupy the public lands to protect valuable or hazardous property, equipment, or workings, you must show that the need for the occupancy is both reasonably incident and continual. You must show that a watchman or caretaker is required to be present either whenever the operation is not active or whenever you or your workers are not present on the site.

### § 3715.2-3 Under what circumstances will BLM allow me to temporarily occupy a site for more than 14 days?

BLM may allow temporary occupancy at a single site to extend beyond the 14-day period described in § 3715.1 if you need to secure the site beyond 14 days through the use of a watchman as allowed by § 3715.2-2, and you have begun consultation with BLM under § 3715.3. If BLM decides not to concur in the occupancy, the temporary occupancy must stop.

### § 3715.3 Must I consult with BLM before occupancy?

Before beginning occupancy, you must consult with BLM about the requirements of this subpart. See Table 2 in this section.

TABLE 2

Consultation requirements	
If you are proposing a use that would involve occupancy.	Then.
Under a plan of operations or a modification submitted under 43 CFR part 3800, subpart 3802 or subpart 3809.	You must include in the proposed plan of operations the materials required by § 3715.3-2 describing any proposed occupancy for BLM review concurrently with review of the plan of operation. BLM will determine whether you have complied with the requirements of this subpart together with its decision approving or modifying the plan.
Under the notice provisions of 43 CFR part 3800, subpart 3809.	You must submit the materials required by § 3715.3-2 together with the materials submitted under 43 CFR 3809.1-3 for BLM review concurrently with its review of the proposed activity. Any activities in the notice that do not involve occupancy and are reasonably incident may proceed in accordance with 43 CFR part 3800, subpart 3809.
And is a "casual use" under 43 CFR 3809.1-2 or does not require a plan of operations under 43 CFR 3802.1-2 and 3809.1-4 or a notice under 43 CFR 3809.1-3.	You are subject to the consultation provisions of this subpart and must submit the materials required by § 3715.3-2 to BLM.

TABLE 2—Continued

Consultation requirements	
Or enclosures, fences, gates, or signs intended to exclude the general public.	Any casual use activities that do not involve occupancy and are reasonably incident may proceed in accordance with 43 CFR part 3800, subpart 3809. You are subject to the consultation provisions of this subpart and must submit the materials required by § 3715.3-2 to BLM.

**§ 3715.3-1 At what point may I begin occupancy?**

You must not begin occupancy until—

(a) You have complied with either 43 CFR part 3800, subpart 3802 or 3809 and this subpart, and BLM has completed its review and made the required determinations under the applicable subparts, and

(b) You have obtained all federal, state and local mining, reclamation, and waste disposal permits, approvals, or other authorizations for the particular use or occupancy as required under this subpart.

**§ 3715.3-2 What information must I provide to BLM about my proposed occupancy?**

You must give BLM a detailed map that identifies the site and the placement of the items specified in paragraphs (c), (d), and (e) of this section, and a written description of the proposed occupancy that describes in detail:

(a) How the proposed occupancy is reasonably incident;

(b) How the proposed occupancy meets the conditions specified in § 3715.2 and § 3715.2-1;

(c) Where you will place temporary or permanent structures for occupancy;

(d) The location of and reason you need enclosures, fences, gates, and signs intended to exclude the general public;

(e) The location of reasonable public passage or access routes through or around the area to adjacent public lands; and

(f) The estimated period of use of the structures, enclosures, fences, gates, and signs, as well as the schedule for removal and reclamation when operations end.

**§ 3715.3-3 How does BLM process the information I submit about my proposed occupancy?**

BLM will review all proposed occupancies and all proposed enclosures, fences, gates, or signs intended to exclude the general public to determine if your proposed occupancy or use will conform to the provisions of §§ 3715.2, 3715.2-1 and 3715.5. BLM will complete its review of a proposed occupancy not involving a plan of operations within 30 business days of receipt of the materials, unless it concludes that the determination cannot be made until:

(a) 30 business days after it prepares necessary environmental documents, and

(b) 30 business days after it has complied with section 106 of the National Historic Preservation Act, Section 7 of the Endangered Species Act, and/or other applicable statutes, if applicable.

**§ 3715.3-4 How will BLM notify me of the outcome of its review process?**

At the conclusion of the review, BLM will make a written determination of concurrence or non-concurrence, and will send it to you. For operations conducted under a plan of operations, BLM will include this written determination in the decision that approves, modifies, or rejects the plan.

**§ 3715.3-5 What will BLM's notification include?**

(a) BLM will include in each determination of concurrence a statement requiring you to continue to comply with §§ 3715.2, 3715.2-1 and 3715.5.

(b) BLM will specify in each determination of non-concurrence how the proposed occupancy fails to meet the conditions of § 3715.2, § 3715.2-1 or § 3715.5, and will provide you an opportunity to modify the proposed occupancy or appeal the determination under § 3715.9.

## Bureau of Land Management, Interior

## §3715.4-4

### **§3715.3-6 May I begin occupancy if I have not received concurrence from BLM?**

If you have not received concurrence from BLM, you must not begin occupancy even though you have submitted, or plan to submit, an amended occupancy proposal or an appeal.

### **§3715.4 What if I have an existing use or occupancy?**

(a) By August 18, 1997, all existing uses and occupancies must meet the applicable requirements of this subpart. If not, BLM will either issue you a notice of noncompliance or order any existing use or occupancy failing to meet the requirements of this subpart to suspend or cease under §3715.7-1. BLM will also order you to reclaim the land under 43 CFR part 3800, subpart 3802 or 3809 to BLM's satisfaction within a specified, reasonable time, unless otherwise expressly authorized.

(b) If you are occupying the public lands under the mining laws on August 15, 1996, you may continue your occupancy for one year after that date, without being subject to the procedures this subpart imposes, if:

(1) You notify BLM by October 15, 1996 of the existence of the occupancy using a format specified by BLM; and

(2) BLM has no pending trespass action against you concerning your occupancy.

(c) The one-year grace period provided in paragraph (b) of this section will not apply if at any time BLM determines that your use or occupancy is not reasonably incident and the continued presence of the use or occupancy is a threat to health, safety or the environment. In this situation, BLM will order an immediate temporary suspension of activities under §3715.7-1(a).

(d) If you have no existing occupancies, but are engaged in uses of the public lands under the mining law, you are subject to the standards in §3715.5. BLM will determine if your existing uses comply with those standards during normal inspection visits to the area and during BLM review of notices and plans of operations filed under 43 CFR part 3800.

### **§3715.4-1 What happens after I give BLM written notification of my existing occupancy?**

(a) BLM will visit your site during the normal course of inspection to obtain the information described in §3715.3-2. After the visit, BLM will make a determination of concurrence or non-concurrence.

(b) You must provide the information described in §3715.3-2 to BLM. You may provide it either in writing or verbally during a site visit by BLM field staff.

### **§3715.4-2 What if I do not notify BLM of my existing occupancy?**

If you do not provide the written notice required in §3715.4, you will be subject to the enforcement actions of §3715.7-1, the civil remedies of §3715.7-2, and the criminal penalties of §3715.8.

### **§3715.4-3 What if BLM does not concur in my existing use or occupancy?**

If BLM determines that all or any part of your existing use or occupancy is not reasonably incident:

(a) BLM may order a suspension or cessation of all or part of the use or occupancy under §3715.7-1;

(b) BLM may order the land to be reclaimed to its satisfaction and specify a reasonable time for completion of reclamation under 43 CFR part 3800; and

(c) BLM may order you to apply within 30 days after the date of notice from BLM for appropriate authorization under the regulations in 43 CFR Group 2900.

### **§3715.4-4 What if there is a dispute over the fee simple title to the lands on which my existing occupancy is located?**

BLM may defer a determination of concurrence or non-concurrence with your occupancy until the underlying fee simple title to the land has been finally determined by the Department of the Interior. During this time, your existing occupancy may continue, subject to §3715.5(a).

## **§ 3715.5**

### **§ 3715.5 What standards apply to my use or occupancy?**

(a) Your use or occupancy must be reasonably incident. In all uses and occupancies, you must prevent or avoid “unnecessary or undue degradation” of the public lands and resources.

(b) Your uses must conform to all applicable federal and state environmental standards and you must have obtained all required permits before beginning, as required under 43 CFR part 3800. This means getting permits and authorizations and meeting standards required by state and federal law, including, but not limited to, the Clean Water Act (33 U.S.C. 1251 *et seq.*), Clean Air Act (42 U.S.C. 7401 *et seq.*), and the Resource Conservation and Recovery Act (42 U.S.C. 6901 *et seq.*), as required under 43 CFR part 3800.

(c) Your occupancies must conform to all applicable federal and state environmental standards and you must have obtained all required permits before beginning, as required under this subpart and 43 CFR part 3800. This means getting permits and authorizations and meeting standards required by state and federal law, including, but not limited to, the Clean Water Act (33 U.S.C. 1251 *et seq.*), Clean Air Act (42 U.S.C. 7401 *et seq.*), and the Resource Conservation and Recovery Act (42 U.S.C. 6901 *et seq.*), as required under this subpart and 43 CFR part 3800.

(d) If your prospecting or exploration activities involve only surface activities, you must not place permanent structures on the public lands. Any temporary structures you place on the public lands during prospecting or exploration will be allowed only for the duration of the activities, unless BLM expressly and in writing allows them to remain longer. If your prospecting or exploration activities involve subsurface activities, you may place permanent structures on the public lands, if BLM concurs.

(e) All permanent and temporary structures you place on the public lands must conform with the applicable state or local building, fire, and electrical codes, and occupational safety and health and mine safety standards. If state or local codes require, you must obtain a certificate of occupancy or its equivalent before you begin use

## **43 CFR Ch. II (10–1–08 Edition)**

or occupancy involving permanent structures. If state or local law requires, you must also acquire appropriate sewerage and sanitation permits before the occupancy or use of a permanent structure placed on the public lands.

### **§ 3715.5–1 What standards apply to ending my use or occupancy?**

Unless BLM expressly allows them in writing to remain on the public lands, you must remove all permanent structures, temporary structures, material, equipment, or other personal property placed on the public lands during authorized use or occupancy under this subpart. You have 90 days after your operations end to remove these items. If BLM concurs in writing, this provision will not apply to seasonal operations that are temporarily suspended for less than one year and expected to continue during the next operating season or to operations that are suspended for no longer than one year due to market or labor conditions.

### **§ 3715.5–2 What happens to property I leave behind?**

Any property you leave on the public lands beyond the 90-day period described in § 3715.5–1 becomes property of the United States and is subject to removal and disposition at BLM’s discretion consistent with applicable laws and regulations. You are liable for the costs BLM incurs in removing and disposing of the property.

### **§ 3715.6 What things does BLM prohibit under this subpart?**

Except where other applicable laws or regulations allow, BLM prohibits the following:

(a) Placing, constructing, maintaining or using residences or structures for occupancy not meeting:

(1) The conditions of occupancy under §§ 3715.2 or 3715.2–1; or

(2) Any of the standards of occupancy under § 3715.5;

(b) Beginning occupancy before the filing, review, and approval or modification of a plan of operation as required under 43 CFR part 3800, subparts 3802 or 3809;

(c) Beginning occupancy before consultation with BLM as required by

## Bureau of Land Management, Interior

## §3715.7-1

§3715.3 for activities that do not require a plan of operations under 43 CFR part 3800, subpart 3802 or that are defined as casual use or notice activities under 43 CFR part 3800, subpart 3809;

(d) Beginning occupancy without receiving a determination of concurrence because the proposed occupancy or fencing will not conform to the provisions of §3715.2, §3715.2-1 or §3715.5;

(e) Not complying with any order issued under this subpart within the time frames the order provides;

(f) Preventing or obstructing free passage or transit over or through the public lands by force, threats, or intimidation; provided, however, that reasonable security and safety measures in accordance with this subpart are allowed;

(g) Placing, constructing, or maintaining enclosures, gates, or fences, or signs intended to exclude the general public, without BLM's concurrence;

(h) Causing a fire or safety hazard or creating a public nuisance;

(i) Not complying with the notification and other requirements under §3715.4 relating to an existing occupancy; and

(j) Conducting activities on the public lands that are not reasonably incident, including, but not limited to: non-mining related habitation, cultivation, animal maintenance or pasturage, and development of small trade or manufacturing concerns; storage, treatment, processing, or disposal of non-mineral, hazardous or toxic materials or waste that are generated elsewhere and brought onto the public lands; recycling or reprocessing of manufactured material such as scrap electronic parts, appliances, photographic film, and chemicals; searching for buried treasure, treasure trove or archaeological specimens; operating hobby and curio shops; cafes; tourist stands; and hunting and fishing camps.

### **§3715.7 How will BLM inspect my use or occupancy and enforce this subpart?**

(a) BLM field staff is authorized to physically inspect all structures, equipment, workings, and uses located on the public lands. The inspection may include verification of the nature of your use and occupancy to ensure

that your use or occupancy is, or continues to be, reasonably incident and in compliance with §§3715.2, 3715.2-1, 3715.4-1 and 3715.5.

(b) BLM will not inspect the inside of structures used solely for residential purposes, unless an occupant or a court of competent jurisdiction gives permission.

### **§3715.7-1 What types of enforcement action can BLM take if I do not meet the requirements of this subpart?**

BLM has four types of orders that it can issue depending on the circumstances:

(a) *Immediate suspension.* (1) BLM may order an immediate, temporary suspension of all or any part of your use or occupancy if:

(i) All or part of your use or occupancy is not reasonably incident or is not in compliance with §§3715.2, 3715.2-1, 3715.3-1(b), 3715.5 or 3715.5-1, and

(ii) an immediate, temporary suspension is necessary to protect health, safety or the environment.

(2) BLM will presume that health, safety or the environment are at risk and will order your use or occupancy to be immediately and temporarily suspended if:

(i) You are conducting an occupancy under a determination of concurrence under this section; and

(ii) You fail at any time to meet any of the standards in §3715.3-1(b) or §3715.5(b), (c), or (e).

(3) The suspension order will describe—

(i) How you are failing or have failed to comply with the requirements of this subpart; and

(ii) The actions, in addition to suspension of the use or occupancy, that you must take to correct the non-compliance and the time by which you must suspend the use or occupancy. It will also describe the time, not to exceed 30 days, within which you must complete corrective action.

(4) The suspension order will not be stayed by an appeal.

(b) *Cessation order.* (1) BLM may order a temporary or permanent cessation of all or any part of your use or occupancy if:

(i) All or any part of your use or occupancy is not reasonably incident but

## § 3715.7-2

does not endanger health, safety or the environment, to the extent it is not reasonably incident;

(ii) You fail to timely comply with a notice of noncompliance issued under paragraph (c) of this section;

(iii) You fail to timely comply with an order issued under paragraph (d) of this section; or

(iv) You fail to take corrective action during a temporary suspension ordered under paragraph (a) of this section.

(2) The cessation order will describe—

(i) The ways in which your use or occupancy is not reasonably incident; is in violation of a notice of noncompliance issued under paragraph (c) of this section; or is in violation of an order issued under paragraphs (a) or (d) of this section, as appropriate;

(ii) The actions, in addition to cessation of the use or occupancy, that you must take to correct the noncompliance;

(iii) The time by which you must cease the use or occupancy, not to exceed 30 days from the date the Interior Board of Land Appeals affirms BLM's order; and

(iv) The length of the cessation.

(c) *Notice of noncompliance.* (1) If your use or occupancy is not in compliance with any requirements of this subpart, and BLM has not invoked paragraph (a) of this section, BLM will issue an order that describes—

(i) How you are failing or have failed to comply with the requirements of this subpart;

(ii) The actions that you must take to correct the noncompliance and the time, not to exceed 30 days, within which you must start corrective action; and

(iii) The time within which you must complete corrective action.

(2) If you do not start and complete corrective action within the time allowed, BLM may order an immediate suspension under paragraph (a) of this section, if necessary, or cessation of the use or occupancy under paragraph (b) of this section.

(d) *Other.* If you are conducting an activity that is not reasonably incident but may be authorized under 43 CFR Group 2900 or 8300, or, as to sites in Alaska, 43 CFR part 2560, BLM may order you to apply within 30 days from

## 43 CFR Ch. II (10-1-08 Edition)

the date you receive the order for authorization under the listed regulations.

[61 FR 37125, July 16, 1996, as amended at 62 FR 59822, Nov. 5, 1997]

### § 3715.7-2 What happens if I do not comply with a BLM order?

If you do not comply with a BLM order issued under § 3715.7-1, the Department of the Interior may request the United States Attorney to institute a civil action in United States District Court for an injunction or order to prevent you from using or occupying the public lands in violation of the regulations of this subpart. This relief may be in addition to the enforcement actions described in § 3715.7-1 and the penalties described in § 3715.8.

### § 3715.8 What penalties are available to BLM for violations of this subpart?

The penalties for individuals and organizations are as follows:

(a) *Individuals.* If you knowingly and willfully violate the requirements of this subpart, you may be subject to arrest and trial under section 303(a) of FLPMA (43 U.S.C. 1733(a)) and/or section 4 of the Unlawful Occupancy and Inclosures of Public Lands Act (43 U.S.C. 1064). If you are convicted, you will be subject to a fine of not more than \$100,000 or the alternative fine provided for in the applicable provisions of 18 U.S.C. 3571, or imprisonment not to exceed 12 months, or both, for each offense.

(b) *Organizations.* If an organization or corporation knowingly or willfully violates the requirements of this subpart, it is subject to trial and, if convicted, will be subject to a fine of not more than \$200,000, or the alternative fine provided for in the applicable provisions of 18 U.S.C. 3571.

### § 3715.8-1 What happens if I make false statements to BLM?

You are subject to arrest and trial before a United States District Court if, in any matter under this subpart, you knowingly and willfully falsify, conceal or cover up by any trick, scheme or device a material fact, or make any false, fictitious or fraudulent statements or representations, or make

## Bureau of Land Management, Interior

## § 3730.0-1

or use any false writings or document knowing the same to contain any false, fictitious or fraudulent statement or entry. If you are convicted, you will be fined not more than \$250,000 or the alternative fine provided for in the applicable provisions of 18 U.S.C. 3571, or imprisoned not more than 5 years, or both.

### § 3715.9 What appeal rights do I have?

If you are adversely affected by a BLM decision, order or determination made under this subpart, you may appeal the decision, order or determination to the Interior Board of Land Appeals (IBLA) under the provisions of 43 CFR part 4.

### § 3715.9-1 Does an appeal to IBLA suspend a BLM decision?

(a) An appeal to IBLA does not suspend an order requiring an immediate, temporary suspension of occupancy issued under § 3715.7-1(a) before the appeal or while it is pending. In this case, the provisions of 43 CFR 4.21(a) do not apply.

(b) The provisions of 43 CFR 4.21(a) apply to all other BLM decisions, orders or determinations under this subpart.

## Subpart 3730—Public Law 359; Mining in Powersite Withdrawals: General

### § 3730.0-1 Purpose; lands open.

(a) The purpose of the Mining Claims Rights Restoration Act of August 11, 1955 (Act), is to permit the mining, development, and utilization of the mineral resources of all public lands withdrawn or reserved for power development and other purposes, except for lands that:

(1) Are included in any project operating or being constructed under a license or permit issued under the Federal Power Act or other Act of Congress, or

(2) Are under examination and survey by a prospective licensee of the Federal Energy Regulatory Commission under an uncanceled preliminary permit that has not been renewed more than once.

(b) Locations made under the Act on lands withdrawn or reserved for power

### § 3730.0-3

development within the revested Oregon and California Railroad and Re-conveyed Coos Bay Wagon Road Grant Lands are also subject to the provisions of the Act of April 8, 1948 (62 Stat. 162). See subpart 3821 of this title.

[59 FR 44856, Aug. 30, 1994]

### § 3730.0-3 Authority.

The authorities for the regulations in this part are the Act of August 11, 1955 (30 U.S.C. 621-625); § 314 of the Act of October 21, 1976 (43 U.S.C. 1744); 30 U.S.C. 28f-k, 107 Stat. 405.

[59 FR 44856, Aug. 30, 1994]

### § 3730.0-9 Information collection.

(a) The collections of information contained in subpart 3730 have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and assigned clearance number 1004-0110 and subsequently consolidated with 1004-0114. The information will enable the authorized officer to determine whether a mining claimant is qualified to hold a mining claim or site for the exploration, development, and utilization of minerals on all public lands that are withdrawn for power development. A response is required to obtain a benefit in accordance with the Act of August 11, 1955 (30 U.S.C. 621-625), Section 314 of the Federal Land Policy and Management Act of 1976, as amended (43 U.S.C. 1744), and 30 U.S.C. 28f-28k, as amended by the Act of November 5, 2001 (115 Stat. 414).

(b) Public reporting burden for this information is estimated to average 8 minutes per response, including time for reviewing instructions, searching existing records, gathering and maintaining the data collected, and completing and reviewing the information collected. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden; to the Information Collection Clearance Officer (783), Bureau of Land Management, 1849 C St., NW, Washington, DC 20240; and the Office of Management and Budget, Paperwork Re-

### Subpart 3731—Power Rights

#### § 3731.1 Power rights retained in the United States.

(a) The Act in the first proviso provides as follows:

That all power rights to such lands shall be retained by the United States.

(1) Under this proviso every patent issued for such a location must contain a reservation unto the United States, its permittees or licensees of the right to enter upon, occupy and use, any part of the lands for power purposes without any claim or right to compensation accruing to the locator or successor in interest from the occupation or use of any of the lands within the location, for such purposes. Furthermore, the patent will contain a provision that the United States, its permittees and licensees shall not be responsible or held liable or incur any liability for the damage, destruction, or loss of any mining claim, mill site, facility installed or erected, income, or other property or investments resulting from the actual use of such lands or portions thereof for power development at any time where such power development is made by or under the authority of the United States, except where such damage, destruction, or loss results from the negligence of the United States, its permittees and licensees.

[35 FR 9736, June 13, 1970]

### Subpart 3732—Withdrawals Other Than for Powersite Purposes

#### § 3732.1 Act ineffective as to other withdrawals.

(a) The Act in section 2(c) provides as follows:

Nothing in this act shall affect the validity of withdrawals or reservations for purposes other than power development.

(b) If the power site lands are also affected by any other type of withdrawal which prevents mining location in whole or in part, the provisions of the

## Bureau of Land Management, Interior

## § 3735.1

Act apply only to the extent that the lands are otherwise open to location.

[35 FR 9737, June 13, 1970]

### Subpart 3733—Risk of Operation

#### § 3733.1 Financial risk of operation.

The Act in section 3 provides in part as follows:

Prospecting and exploration for and the development and utilization of mineral resources authorized in this act shall be entered into or continued at the financial risk of the individual party or parties undertaking such work.

[35 FR 9737, June 13, 1970]

#### § 3733.2 Liability of United States.

The Act in section 3 provides in part as follows:

*Provided*, That the United States, its permittees and licensees shall not be responsible or held liable or incur any liability for the damage, destruction, or loss of any mining claim, mill site, facility installed or erected, income, or other property or investments resulting from the actual use of such lands or portions thereof for power development at any time where such power development is made by or under the authority of the United States, except where such damage, destruction, or loss results from the negligence of the United States, its permittees and licensees.

[35 FR 9737, June 13, 1970]

### Subpart 3734—Location and Assessment Work

#### § 3734.1 Owner of claim to file notice of location and assessment work.

(a) The owner of any unpatented mining claim, mill site, or tunnel site located on land described in § 3730.0-1 (a) and (b), shall file all notices or certificates of location, amended notices or certificates, and transfers of interest, with the proper State Office of the Bureau of Land Management pursuant to part 3833 of this chapter, and pay the applicable maintenance, location, and service fees required by part 3830 of this title. The notice, certificate, transfer, or amendment thereto shall be marked by the owner to indicate that it is being filed pursuant to the Act of August 11, 1955, the Act of April 8, 1948, or both, as required by part

3833. Failure to so mark the location certificate will delay the procedures to authorize mining under subpart 3736.

(b) Neither section 4 nor any other provision of the Act validates any mining location made prior to the act, which is invalid because made on lands after they were withdrawn or reserved for power purposes and before a favorable determination by the Federal Power Commission under section 24 of the Federal Power Act of June 10, 1920 (41 Stat. 1063; 1075), as amended (16 U.S.C. 792; 818) and the opening or restoration of the lands to location. Section 4 applies to unpatented locations for lands referred to in § 3730.0-3(a) only if:

(1) The location was made on or after August 11, 1955, or

(2) The location was made prior to August 11, 1955, and prior to the withdrawal or reservation of the lands for power purposes, or

(3) The location was made prior to August 11, 1955, on lands restored to location from a powersite reserve or withdrawal subject to section 24 of the Federal Power Act.

(c) The owner of any unpatented mining claim, mill site, or tunnel site located on land described in § 3730.0-1 of this chapter may either:

(1) Perform and record annual assessment work if the owner qualifies as a small miner under part 3835 of this chapter; or

(2) Pay an annual maintenance fee of \$100 per unpatented mining claim, mill site, or tunnel site in lieu of the annual assessment work or notice of intention to hold, under subpart 3834 of this chapter.

[35 FR 9737, June 13, 1970, as amended at 58 FR 38196, July 15, 1993; 59 FR 44856, Aug. 30, 1994; 68 FR 61064, Oct. 24, 2003]

### Subpart 3735—Prior Existing Mining Locations

#### § 3735.1 No limitation or restriction of rights under valid claims located prior to withdrawal.

(a) The Act in section 5 provides:

Nothing in this act contained shall be construed to limit or restrict the rights of the owner or owners of any valid mining claim located prior to the date of withdrawal or reservation: *Provided*, That nothing in this

## § 3735.2

act shall be construed to limit or restrict the rights of the owner or owners of any mining claim who are diligently working to make a discovery of valuable minerals at the time any future withdrawal or reservation for power development is made.

(b) Although the Act does not limit or restrict the rights of owners of locations to which section 5 refers, such owners shall comply with section 4 by making the filings required either by paragraph (c) or (d) of § 3734.1 whichever is applicable.

[35 FR 9737, June 13, 1970]

### **§ 3735.2 No limitation of rights where claimant in diligent prosecution of work when future withdrawals made.**

(a) Under section 5 of the Act the rights to a location made prior to any future withdrawal or reservation for power development or one on which the locator was diligently working to make a discovery of valuable minerals are not limited or restricted.

[35 FR 9737, June 13, 1970]

## **Subpart 3736—Mining Operations**

### **§ 3736.1 Placer locator to conduct no mining operations for 60 days.**

(a) The Act in section 2(b) provides in part as follows:

The locator of a placer claim under this Act, however, shall conduct no mining operations for a period of sixty days after the filing of a notice of location pursuant to section 4 of this Act. If the Secretary of the Interior, within sixty days from the filing of the notice of location, notifies the locator by registered mail of the Secretary's intention to hold a public hearing to determine whether placer mining operations would substantially interfere with other uses of the land included within the placer claim, mining operations on that claim shall be further suspended until the Secretary has held the hearing and has issued an appropriate order. The order issued by the Secretary of the Interior shall provide for one of the following: (1) a complete prohibition of placer mining; (2) a permission to engage in placer mining upon the condition that the locator shall, following placer operations, restore the surface of the claim to the condition in which it was immediately prior to those operations; or (3) a general permission to engage in placer mining. No order by the Secretary with respect to such operations shall be valid unless a certified copy is filed in the same State or

## **43 CFR Ch. II (10–1–08 Edition)**

county office in which the locator's notice of location has been filed, in compliance with the United States mining laws.

(b) Upon receipt of a notice of location of a placer claim filed in accordance with § 3734.1 for land subject to location under the act, a determination will be made by the authorized officer of the Bureau of Land Management as to whether placer mining operations on the land may substantially interfere with other uses thereof. If it is determined that placer operations may substantially interfere with other uses, a notice of intention to hold a hearing will be sent to each of the locators by registered or certified mail within 60 days from date of filing of the location notice.

[35 FR 9737, June 13, 1970]

### **§ 3736.2 Hearing; notice of protest.**

(a) If a hearing is to be held, notice of the hearing will be delivered personally or by registered mail or certified mail to the locator of the placer claim. The notice will indicate the time and place of hearing. The procedures with respect to service of notice of hearing and conduct thereof shall follow the provisions of appeals and contests of the Department of the Interior (part 1850 of this title) in effect at the time the hearing is held. No publication of the notice will be required but a copy thereof shall be posted in the proper office of the Bureau of Land Management for a period of not less than 30 days prior to the date set for the hearing. The manager shall give such publicity to the hearing as may be done without expense to the Government.

(b) Any party, other than a Federal agency, desiring to appear and testify at a hearing in protest to placer mining operations must file a written notice of protest in the proper office wherein the notice of hearing is posted. Such notice, accompanied by the filing fee for notice of protest of placer mining operations found in the fee schedule in § 3000.12 of this chapter, must contain the party's name and address and a statement showing the nature of the party's interest in the use of the lands embraced within the mining claim. Each notice of protest must be filed within the period of time specified

## Bureau of Land Management, Interior

## Pt. 3740

in the notice of hearing. The authorized officer shall forward a copy of each such notice that is filed to the mining locator prior to the hearing.

(c) Following the hearing, the administrative law judge will render a decision, subject to the right of appeal by any person admitted as a party to the hearing in accordance with the provisions of appeals and contests of the Department of the Interior (part 1850 of this title). Each decision by an administrative law judge, or upon appeal, shall provide for the issuance of an appropriate order as provided in section 2(b) of the Act; but no such order shall issue until the decision, upon which it is based, becomes final. A certified copy of any order issued shall be filed in the same State or county office in which the location notice has been filed. Any such order permitting mining operations shall be filed at the expense of the mining locator.

[35 FR 9737, June 13, 1970, as amended at 72 FR 50889, Sept. 5, 2007]

### Subpart 3737—Use

#### § 3737.1 Mining claim and millsite use.

(a) The Act in section 6 provides as follows:

Notwithstanding any other provisions of this act, all mining claims and mill sites or mineral rights located under the terms of this act or otherwise contained on the public lands as described in section 2 shall be used only for the purposes specified in section 2 and no facility or activity shall be erected or conducted thereon for other purposes.

(b) Under this section, a mining claim or millsite may not be used for purposes other than for legitimate mining and milling. The claimant, therefore, may not erect on the mining claim any facility or activity such as filling stations, curio shops, cafes, tourist or hunting and fishing lodges, or conduct such businesses thereon.

[35 FR 9738, June 13, 1970]

### Subpart 3738—Surface Protection Requirements

#### § 3738.1 Bond or deposit required.

Should a limited order be issued under section 2(b)(2) of the Act, the locator is required to furnish a bond in a

sum determined by the Administrative law judge. The bond must be either a corporate surety bond or a personal bond accompanied by cash or negotiable Federal securities equal at their par value to the amount of the penal sum of the bond, together with power-of-attorney to the Secretary of the Interior or his delegate.

[35 FR 9738, June 13, 1970]

#### § 3738.2 Restoration of surface condition.

If the locator fails or refuses to restore the surface, appropriate action will be taken against him and his surety, including the appropriation of any money deposited on personal bonds, to be used for the purpose of restoring the surface of the claim involved. Any moneys on deposit or received from surety in excess of the amount needed for the restoration of the surface of the particular claim shall be refunded.

[35 FR 9738, June 13, 1970]

## Subpart 3740—Public Law 585, Multiple Mineral Development: General

### § 3740.0-1 Purpose.

The Act of August 13, 1954 (68 Stat. 708, 30 U.S.C. 521 subpart), was enacted "To amend the mineral leasing laws and the mining laws to provide for multiple mineral development of the same tracts of public lands, and for other purposes." The regulations in this part are intended to implement only those sections of said act, hereinafter more fully identified, which require action by the Department of the Interior or its agencies. The expression "Act" when used in this part, means the Act of August 13, 1954 (68 Stat. 708). The expression "Leasing Act", when used in this part, refers to the "mineral leasing laws" as defined in section 11 of the Act of August 13, 1954 (68 Stat. 708).

[35 FR 9738, June 13, 1970]

### Subpart 3741—Claims, Locations and Patents

SOURCE: 35 FR 9738, June 13, 1970, unless otherwise noted.

#### § 3741.1 Validation of certain mining claims.

The Act in section 1(a) provides as follows:

That (a) subject to the conditions and provisions of this Act and to any valid inter-

## 43 CFR Ch. II (10-1-08 Edition)

vening rights acquired under the laws of the United States, any mining claim located under the mining laws of the United States subsequent to July 31, 1939, and prior to February 10, 1954, on lands of the United States, which at the time of location were—

(1) Included in a permit or lease issued under the mineral leasing laws; or

(2) Covered by an application or offer for a permit or lease which had been filed under the mineral leasing laws; or

(3) Known to be valuable for minerals subject to disposition under the mineral leasing laws, shall be effective to the same extent in all respects as if such lands at the time of location, and at all times thereafter, had not been so included or covered or known: *Provided, however,* That, in order to be entitled to the benefits of this act, the owner of any such mining claim located prior to January 1, 1953, must have posted and filed for record, within the time allowed by the provisions of the Act of August 12, 1953 (67 Stat. 539) [not later than December 10, 1953.] an amended notice of location as to such mining claim, stating that such notice was filed pursuant to the provisions of said Act of August 12, 1953, and for the purpose of obtaining the benefits thereof: *And provided further,* That, in order to obtain the benefits of this act, the owner of any such mining claim located subsequent to December 31, 1952, and prior to February 10, 1954, not later than one hundred and twenty days after the date of enactment of this act, must post on such claim in the manner required for posting notice of location of mining claims and file for record in the office where the notice or certificate of location of such claim is of record an amended notice of location for such claim, stating that such notice is filed pursuant to the provisions of this act, and for the purpose of obtaining the benefits thereof and, within said one hundred and twenty day period, if such owner shall have filed a uranium lease application as to the tract covered by such mining claim, must file with the Atomic Energy Commission a withdrawal of such uranium lease application or, if a uranium lease shall have issued pursuant thereto, a release of such lease, and must record a notice of the filing of such withdrawal or release in the county office wherein such notice or certificate of location shall have been filed for record.

#### § 3741.2 Preference mining locations.

The Act in section 3(a) and (b) provides as follows:

(a) Subject to the conditions and provisions of this Act and to any valid prior rights acquired under the laws of the United States, the owner of any pending uranium lease application or of any uranium lease shall have, for a period of one hundred and twenty days after the date of enactment of this act, as

limited in subsection (b) of this section 3, the right to locate mining claims upon the lands covered by said application or lease.

(b) Any rights under any such mining claim so hereafter located pursuant to the provisions of subsection (a) of this section 3 shall be subject to any rights of the owner of any mining claim which was located prior to February 10, 1954, and which was valid at the date of the enactment of this Act or which may acquire validity under the provisions of this Act. As to any lands covered by a uranium lease and also by a pending uranium lease application, the right of mining location under this section 3, as between the owner of said lease and the owner of said application, shall be deemed as to such conflict area to be vested in the owner of said lease. As to any lands embraced in more than one such pending uranium lease application, such right of mining location, as between the owners of such conflicting applications, shall be deemed to be vested in the owner of the prior application. Priority of such an application shall be determined by the time of posting on a tract then available for such leasing of a notice of lease application in accordance with paragraph (c) of the Atomic Energy Commission's Domestic Uranium Program Circular 7 (10 CFR 60.7(c)) provided there shall have been timely compliance with the other provisions of said paragraph (c) or, if there shall not have been such timely compliance, then by the time of the filing of the uranium lease application with the Atomic Energy Commission. Any rights under any mining claim located under the provisions of this section 3 shall terminate at the expiration of thirty days after the filing for record of the notice or certificate of location of such mining claim unless, within said 30-day period, the owner of the uranium lease application or uranium lease upon which the location of such mining claim was predicated shall have filed with the Atomic Energy Commission a withdrawal of said application or a release of said lease and shall have recorded a notice of the filing of such withdrawal or release in the county office wherein such notice or certificate of location shall be of record.

#### **§ 3741.3 Additional evidence required with application for patent.**

All questions between mining claimants asserting conflicting rights of possession under mining claims, must be adjudicated in the courts. Any applicant for mineral patent, who claims benefits under sections 1 or 3 of this Act, or the Act of August 12, 1953, supra, in addition to matters required in Group 3800 of this chapter, must file with his Application for Patent a certified copy of each instrument required

to have been recorded as to his mining claim in order to entitle it to such benefits unless an Abstract of Title or Certificate of Title filed with the Application for Patent shall set forth said instruments in full. If a mining claim was located on or after the date of this Act a statement must be filed showing that on the date of location the lands affected were not covered by a uranium lease or an application for a uranium lease. The applicant must also file a copy of the notice required to be posted on the claim and state in his application that such notice was duly posted in accordance with the requirements of the Act.

#### **§ 3741.4 Reservation to United States of Leasing Act minerals.**

Section 4 of the Act provides that:

Every mining claim or millsite—

(1) Heretofore located under the mining laws of the United States which shall be entitled to benefits under the first three sections of this Act; or

(2) Located under the mining laws of the United States after the effective date of passage of this Act, shall be subject, prior to issuance of a patent therefor, to a reservation to the United States of all Leasing Act minerals and of the right (as limited in section 6 hereof) of the United States, its lessees, permittees, and licensees to enter upon the land covered by such mining claim or millsite and to prospect for, drill for, mine, treat, store, transport, and remove Leasing Act minerals and to use so much of the surface and subsurface of such mining claim or millsite as may be necessary for such purposes, and whenever reasonably necessary, for the purpose of prospecting for, drilling for, mining, treating, storing, transporting, and removing Leasing Act minerals on and from other lands; and any patent issued for any such mining claim or millsite shall contain such reservation as to, but only as to, such lands covered thereby which at the time of the issuance of such patent were—

(a) Included in a permit or lease issued under the mineral leasing laws; or

(b) Covered by an application or offer for a permit or lease filed under the mineral leasing laws; or

(c) Known to be valuable for minerals subject to disposition under the mineral leasing laws.

**§ 3741.5 Mining claims and millsites located on Leasing Act lands after August 13, 1954.**

Since enactment of the Act on August 13, 1954, and subject to its conditions and provisions, including the reservation of Leasing Act minerals to the United States as provided in section 4, mining claims and millsites may be located under the mining laws of the United States on lands of the United States which at the time of location are—

(a) Included in a permit or lease issued under the mineral leasing laws; or

(b) Covered by an application or offer for a permit or lease filed under the mineral leasing laws; or

(c) Known to be valuable for minerals subject to disposition under the mineral leasing laws: This is inclusive of lands in petroleum reserves, except Naval petroleum reserves;

to the same extent in all respects as if such lands were not so included or covered or known.

**§ 3741.6 Acquisition of Leasing Act minerals in lands covered by mining claims and millsites.**

The Leasing Act minerals in lands covered by mining claims and millsites located after the date of the Act or validated pursuant to the Act may be acquired under the mineral leasing laws, upon appropriate application therefor being filed prior to the issuance of patent to such mining claims or millsites, or after the issuance of patent, if the patent contains a reservation of Leasing Act minerals to the United States as provided in section 4 of the Act.

**Subpart 3742—Procedures Under the Act**

SOURCE: 35 FR 9739, June 13, 1970, unless otherwise noted.

**§ 3742.1 Procedure to determine claims to Leasing Act minerals under unpatented mining locations.**

Section 7 of the Act provides a procedure whereby a Leasing Act applicant, offeror, permittee or lessee may have determined the existence and validity of claims to Leasing Act minerals as-

serted under unpatented mining locations made prior to August 13, 1954, affecting lands embraced within such application, offer, permit or lease. This procedure is described in the succeeding regulations, and involves the prior recording of notice of such application, offer, permit or lease and the filing of a request for publication of notice of the same.

**§ 3742.2 Recordation of notice of application, offer, permit or lease.**

Not less than 90 days prior to the filing of such request for publication, there must have been filed for record in the county office of record for each county in which lands covered thereby are situated, a notice of the filing of the application or offer, or of the issuance of the permit or lease, upon which said request for publication is based. Such notice must set forth the date of the filing of such application or offer or of the issuance of such permit or lease, the name and address of the applicant, offeror, permittee or lessee, and the description of the lands covered by such application, offer, permit or lease, showing the section or sections of the public land surveys which embrace such lands, or, if such lands are unsurveyed, either the section or sections which would probably embrace such lands when the public land surveys are extended to such lands, or a tie by courses and distances to an approved United States mineral monument.

**§ 3742.3 Publication of notice.**

**§ 3742.3-1 Request for publication of notice of Leasing Act filing; supporting instruments.**

(a) Having complied with the requirement of § 3742.2 the applicant, offeror, permittee or lessee may file a Request for Publication of notice of such party's application, offer, permit or lease. Such request for publication shall be filed in the proper office. No Request for Publication, or publication, may include lands in more than one District.

(b) The filing of a Request for Publication must be accompanied by the following:

(1) A certified copy of the Notice of Application, offer, permit or lease setting forth the date of recordation

thereof. The date of recordation shall be presumed to have been the date when the notice was filed for record unless the certified copy of the notice shows otherwise or is accompanied by an affidavit of the person filing the request for publication showing that the notice was filed for record on a date prior to the date of recordation.

(2) An affidavit or affidavits of a person or persons over 21 years of age, setting forth that the affiant or affiants have examined the lands involved in a reasonable effort to ascertain whether any person or persons were in actual possession of or engaged in the working of the lands covered by such request or any part thereof. If no person or persons were found to be in actual possession of or engaged in the working of said lands or any part thereof, on the date of such examination, such affidavit or affidavits shall set forth such fact. If any person or persons were so found to be in actual possession or engaged in such working on the date of such examination, such affidavit or affidavits shall set forth the name and address of each such person unless the affiant shall have been unable, through reasonable inquiry, to obtain information as to the name and address of such person; in which event, the affidavit or affidavits shall set forth fully the nature and the results of such inquiry.

(3) The certificate of a title or abstract company, or of a title abstractor, or of an attorney, based upon such company's, abstractor's or attorney's examination of the instruments affecting the lands involved, of record in the public records of the county in which said lands are situated as shown by the indices of the public records in the county office of record for said county, setting forth the name of any person disclosed by said instruments to have an interest in said lands under any unpatented mining claim located prior to enactment of the Act on August 13, 1954, together with the address of such person if disclosed by such instruments of record.

(4) A nonrefundable \$10 remittance to cover service charge.

#### § 3742.3-2 Contents of published notice.

The notice to be published as required by the preceding section, shall describe the lands covered by the application, offer, permit or lease in the same manner as is required under § 3742.2 Such published notice shall notify whomever it may concern, that if any person claiming or asserting under, or by virtue of, any unpatented mining claim located prior to enactment of the Act of August 13, 1954, any right or interest in Leasing Act minerals as to such lands or any part thereof, shall fail to file in the office where such Request for Publication was filed (which office shall be specified in such notice), and within 150 days from the date of the first publication of such notice (which date shall be specified in such notice), a verified statement which shall set forth, as to such unpatented mining claim:

(a) The date of location;  
(b) The book and page of recordation of the notice or certificate of location;  
(c) The section or sections of the public land surveys which embrace such mining claim; or if such lands are unsurveyed, either the section or sections which would probably embrace such mining claim when the public land surveys are extended to such lands or a tie by courses and distances to an approved United States mineral monument;

(d) Whether such claimant is a locator or purchaser under such location; and

(e) The name and address of such claimant and names and addresses so far as known to the claimant of any other person or persons claiming any interest or interests in or under such unpatented mining claim; such failure shall be conclusively deemed (1) to constitute a waiver and relinquishment by such mining claimant of any and all right, title, and interest under such mining claim as to, but only as to, Leasing Act minerals, and (2) to constitute a consent by such mining claimant that such mining claim and any patent issued therefor, shall be subject to the reservation of Leasing Act minerals specified in section 4 of the Act, and (3) to preclude thereafter any assertion by such mining claimant

### § 3742.3-3

of any right or title to or interest in any Leasing Act mineral by reason of such mining claim.

#### § 3742.3-3 Publication.

(a) Upon receipt of a Request for Publication and accompanying instruments, if all is found regular, the Authorized officer, or the Director, as may be appropriate, at the expense of the requesting person (who prior to the commencement of publication must furnish the agreement of the publisher to hold such requesting person alone responsible for charges of publication), shall cause notice of the application, offer, permit or lease to be published in a newspaper, to be designated by the Authorized officer, or the Director, as may be appropriate, having general circulation in the county in which the lands involved are situated.

(b) If such notice is published in a daily paper, it shall be published in the Wednesday issue for 9 consecutive weeks, or, if in a weekly paper, in 9 consecutive issues, or, if in a semi-weekly or tri-weekly paper, in the issue of the same day of each week for 9 consecutive weeks.

#### § 3742.3-4 Proof of publication.

After the period of newspaper publication has expired, the person requesting publication shall obtain from the office of the newspaper of publication, a sworn statement<sup>1</sup> that the notice was published at the time and in accordance with the requirements under these regulations of this part, and shall file such sworn statement in the office where the Request for Publication was filed.

#### § 3742.3-5 Mailing of copies of published notice.

Within fifteen days after the date of first publication, the person requesting such publication shall:

(a) Cause a copy of such notice to be personally delivered to or to be mailed by registered mail addressed to each

<sup>1</sup>18 U.S.C. 1001 makes it a crime for any person knowingly and willfully to make to any department or agency of the United States any false, fictitious or fraudulent statements or representations as to any matter within its jurisdiction.

### 43 CFR Ch. II (10-1-08 Edition)

person in possession or engaged in the working of the land whose name and address is shown by the affidavit or affidavits of examination of the land filed, as set forth in § 3742.3-1.

(b) Cause a copy of such notice to be personally delivered to or to be mailed by registered mail addressed to each person who may, on or before the date of first publication, have filed for record, as to any lands described in the published notice, a Request for Notices, as provided in subsection (d) of section 7 of the Act (see § 3744.1);

(c) Cause a copy of such notice to be mailed by registered mail to each person whose name and address is set forth in the certificate required to be filed under § 3742.3-1; and

(d) File in the office where the Request for Publication was filed an affidavit that copies have been delivered or mailed as herein specified. Notwithstanding the requirements in paragraphs (a), (b) and (c) of this section, not more than one copy of such notice need be delivered or mailed to the same person.

#### § 3742.3-6 Service of copies; failure to comply.

If any applicant, offeror, permittee or lessee requesting publication of notice under these regulations shall fail to comply with the requirements of section 7(a) of the Act as to personal delivery or mailing of a copy of the published notice to any person, the publication of such notice shall be deemed wholly ineffectual as to that person or as to the rights asserted by that person and the failure of that person to file a verified statement, as provided in such notice shall in no manner affect, diminish, prejudice or bar any rights of that person.

#### § 3742.4 Failure of mining claimant to file verified statement.

If any claimant under any unpatented mining claim located prior to enactment of the Act on August 13, 1954, which embraces any of the lands described in any notice published in accordance with the regulations in this part shall fail to file a verified statement, as specified in such published notice within one hundred and fifty days from the date of the first publication of

## Bureau of Land Management, Interior

## § 3746.1

such notice, such failure shall be conclusively deemed, except as otherwise provided in §3742.3-6.

(a) To constitute a waiver and relinquishment by such mining claimant of any and all right, title, and interest under such mining claim as to, but only as to, Leasing Act minerals, and

(b) To constitute a consent by such mining claimant that such mining claim and any patent issued therefor, shall be subject to the reservation of Leasing Act minerals specified in section 4 of the Act, and

(c) To preclude thereafter any assertion by such mining claimant of any right or title to or interest in any Leasing Act minerals by reason of such mining claim.

### Subpart 3743—Hearings

SOURCE: 35 FR 9741, June 13, 1970, unless otherwise noted.

#### § 3743.1 Hearing procedures.

The procedures with respect to notice of such hearing and the conduct thereof, and in respect to appeals, shall follow the provisions of Appeals and Contests of the Department of the Interior and the Bureau of Land Management (part 1850 of this chapter) relating to contests or protests affecting public lands of the United States.

#### § 3743.2 Hearing: Time and place.

If any verified statement shall be filed by a mining claimant then the authorized officer of the proper office, or the Director, as may be appropriate, shall fix a time and place for a hearing to determine the validity and effectiveness of the mining claimant's asserted right or interest in Leasing Act minerals. Such place of hearing shall be in the county where the lands in question, or part thereof, are located, unless the mining claimant agrees otherwise.

#### § 3743.3 Stipulation between parties.

If at any time prior to a hearing the person requesting publication of notice and any person filing a verified statement pursuant to such notice shall so stipulate, then to the extent so stipulated, but only to such extent, no hearing shall be held with respect to rights asserted under that verified statement,

and to the extent defined by the stipulation the rights asserted under that verified statement shall be deemed to be unaffected by the notice published pursuant to that request.

#### § 3743.4 Effect of decision affirming a mining claimant's rights.

If, pursuant to a hearing held as provided in the regulations of this part, the final decision rendered in the matter shall affirm the validity and effectiveness of any mining claimant's right or interest under a mining claim as to Leasing Act minerals, then no subsequent proceedings under section 7 of the Act and the regulations of this part shall have any force or effect upon the so-affirmed right or interest of such mining claimant under such mining claim.

### Subpart 3746—Fissionable Source Materials

#### § 3746.1 Mining locations for fissionable source materials.

(a) In view of the amendment of section 5(b)(7) of the Atomic Energy Act of 1946 by section 10(c) of the Act of August 13, 1954 (68 Stat. 708), and of the provisions of the Atomic Energy Act of 1954 (68 Stat. 921), it is clear that after enactment of said Act of August 13, 1954, valid mining locations under the mining laws of the United States may be based upon a discovery of a mineral deposit which is a fissionable source material.

(b) As to mining locations made prior to the enactment of said Act of August 13, 1954, section 10(d) of the act provides:

(d) Notwithstanding the provisions of the Atomic Energy Act, and particularly sec. 5(b)(7) thereof, prior to its amendment hereby, or the provisions of the Act of August 12, 1953 (67 Stat. 539), and particularly sec. 3 thereof, any mining claim, heretofore located under the mining laws of the United States for or based upon a discovery of a mineral deposit which is a fissionable source material and which, except for the possible contrary construction of said Atomic Energy Act, would have been locatable under such mining laws, shall, insofar as adversely affected by such possible contrary construction, be valid and effective, in all respects to the same extent as if said mineral deposit

## **Pt. 3800**

were a locatable mineral deposit other than a fissionable source material.

[35 FR 9741, June 13, 1970, as amended at 41 FR 50690, Nov. 17, 1976]

## **Group 3800—Mining Claims Under the General Mining Laws**

NOTE: The information collection requirements contained in parts 3800, 3810, 3820, 3830, 3860 and 3870 of Group 3800 have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance numbers 1004-0025, 1004-0104, 1004-0110 and 1004-0114. The information is being collected to permit the authorized officer to review certain proposed mining activities to ensure that they provide adequate protection of the public lands and their resources. The information will be used to make this determination. A response is required to obtain a benefit.

#### **GENERAL INFORMATION**

- 3809.1 What are the purposes of this subpart?
- 3809.2 What is the scope of this subpart?
- 3809.3 What rules must I follow if State law conflicts with this subpart?
- 3809.5 How does BLM define certain terms used in this subpart?
- 3809.10 How does BLM classify operations?
- 3809.11 When do I have to submit a plan of operations?
- 3809.21 When do I have to submit a notice?
- 3809.31 Are there any special situations that affect what submittals I must make before I conduct operations?
- 3809.100 What special provisions apply to operations on segregated or withdrawn lands?
- 3809.101 What special provisions apply to minerals that may be common variety minerals, such as sand, gravel, and building stone?
- 3809.111 Will BLM disclose to the public the information I submit under this subpart?
- 3809.115 Can BLM collect information under this subpart?
- 3809.116 As a mining claimant or operator, what are my responsibilities under this subpart for my project area?

#### **FEDERAL/STATE AGREEMENTS**

- 3809.200 What kinds of agreements may BLM and a State make under this subpart?
- 3809.201 What should these agreements address?
- 3809.202 Under what conditions will BLM defer to State regulation of operations?
- 3809.203 What are the limitations on BLM deferral to State regulation of operations?
- 3809.204 Does this subpart cancel an existing agreement between BLM and a State?

#### **OPERATIONS CONDUCTED UNDER NOTICES**

- 3809.300 Does this subpart apply to my existing notice-level operations?
- 3809.301 Where do I file my notice and what information must I include in it?
- 3809.311 What action does BLM take when it receives my notice?
- 3809.312 When may I begin operations after filing a complete notice?
- 3809.313 Under what circumstances may I not begin operations 15 calendar days after filing my notice?
- 3809.320 Which performance standards apply to my notice-level operations?
- 3809.330 May I modify my notice?

## Bureau of Land Management, Interior

## Pt. 3800

- 3809.331 Under what conditions must I modify my notice?
- 3809.332 How long does my notice remain in effect?
- 3809.333 May I extend my notice, and, if so, how?
- 3809.334 What if I temporarily stop conducting operations under a notice?
- 3809.335 What happens when my notice expires?
- 3809.336 What if I abandon my notice-level operations?

### OPERATIONS CONDUCTED UNDER PLANS OF OPERATIONS

- 3809.400 Does this subpart apply to my existing or pending plan of operations?
- 3809.401 Where do I file my plan of operations and what information must I include with it?
- 3809.411 What action will BLM take when it receives my plan of operations?
- 3809.412 When may I operate under a plan of operations?
- 3809.415 How do I prevent unnecessary or undue degradation while conducting operations on public lands?
- 3809.420 What performance standards apply to my notice or plan of operations?
- 3809.421 Enforcement of performance standards.
- 3809.423 How long does my plan of operations remain in effect?
- 3809.424 What are my obligations if I stop conducting operations?

### MODIFICATIONS OF PLANS OF OPERATIONS

- 3809.430 May I modify my plan of operations?
- 3809.431 When must I modify my plan of operations?
- 3809.432 What process will BLM follow in reviewing a modification of my plan of operations?
- 3809.433 Does this subpart apply to a new modification of my plan of operations?
- 3809.434 How does this subpart apply to pending modifications for new or existing facilities?

### FINANCIAL GUARANTEE REQUIREMENTS—GENERAL

- 3809.500 In general, what are BLM's financial guarantee requirements?
- 3809.503 When must I provide a financial guarantee for my notice-level operations?
- 3809.505 How do the financial guarantee requirements of this subpart apply to my existing plan of operations?
- 3809.551 What are my choices for providing BLM with a financial guarantee?

### INDIVIDUAL FINANCIAL GUARANTEE

- 3809.552 What must my individual financial guarantee cover?

- 3809.553 May I post a financial guarantee for a part of my operations?
- 3809.554 How do I estimate the cost to reclaim my operations?
- 3809.555 What forms of individual financial guarantee are acceptable to BLM?
- 3809.556 What special requirements apply to financial guarantees described in §3809.555(e)?

### BLANKET FINANCIAL GUARANTEE

- 3809.560 Under what circumstances may I provide a blanket financial guarantee?

### STATE-APPROVED FINANCIAL GUARANTEE

- 3809.570 Under what circumstances may I provide a State-approved financial guarantee?
- 3809.571 What forms of State-approved financial guarantee are acceptable to BLM?
- 3809.572 What happens if BLM rejects a financial instrument in my State-approved financial guarantee?
- 3809.573 What happens if the State makes a demand against my financial guarantee?
- 3809.574 What happens if I have an existing corporate guarantee?

### MODIFICATION OR REPLACEMENT OF A FINANCIAL GUARANTEE

- 3809.580 What happens if I modify my notice or approved plan of operations?
- 3809.581 Will BLM accept a replacement financial instrument?
- 3809.582 How long must I maintain my financial guarantee?

### RELEASE OF FINANCIAL GUARANTEE

- 3809.590 When will BLM release or reduce the financial guarantee for my notice or plan of operations?
- 3809.591 What are the limitations on the amount by which BLM may reduce my financial guarantee?
- 3809.592 Does release of my financial guarantee relieve me of all responsibility for my project area?
- 3809.593 What happens to my financial guarantee if I transfer my operations?
- 3809.594 What happens to my financial guarantee when my mining claim or millsite is patented?

### FORFEITURE OF FINANCIAL GUARANTEE

- 3809.595 When may BLM initiate forfeiture of my financial guarantee?
- 3809.596 How does BLM initiate forfeiture of my financial guarantee?
- 3809.597 What if I do not comply with BLM's forfeiture decision?
- 3809.598 What if the amount forfeited will not cover the cost of reclamation?
- 3809.599 What if the amount forfeited exceeds the cost of reclamation?

## § 3800.5

### INSPECTION AND ENFORCEMENT

- 3809.600 With what frequency will BLM inspect my operations?
- 3809.601 What types of enforcement action may BLM take if I do not meet the requirements of this subpart?
- 3809.602 Can BLM revoke my plan of operations or nullify my notice?
- 3809.603 How does BLM serve me with an enforcement action?
- 3809.604 What happens if I do not comply with a BLM order?
- 3809.605 What are prohibited acts under this subpart?

### PENALTIES

- 3809.700 What criminal penalties apply to violations of this subpart?
- 3809.701 What happens if I make false statements to BLM?

### APPEALS

- 3809.800 Who may appeal BLM decisions under this subpart?
- 3809.801 When may I file an appeal of the BLM decision with OHA?
- 3809.802 What must I include in my appeal to OHA?
- 3809.803 Will the BLM decision go into effect during an appeal to OHA?
- 3809.804 When may I ask the BLM State Director to review a BLM decision?
- 3809.805 What must I send BLM to request State Director review?
- 3809.806 Will the State Director review the original BLM decision if I request State Director review?
- 3809.807 What happens once the State Director agrees to my request for a review of a decision?
- 3809.808 How will decisions go into effect when I request State Director review?
- 3809.809 May I appeal a decision made by the State Director?

### PUBLIC VISITS TO MINES

- 3809.900 Will BLM allow the public to visit mines on public lands?

## Subpart 3800—General

### § 3800.5 Fees.

- (a) An applicant for a plan of operations under this part must pay a processing fee on a case-by-case basis as described in § 3000.11 of this chapter whenever BLM determines that consideration of the plan of operations requires

## 43 CFR Ch. II (10–1–08 Edition)

the preparation of an Environmental Impact Statement.

(b) An applicant for any action for which a mineral examination, including a validity examination or a common variety determination, and their associated reports, is performed under § 3809.100 or § 3809.101 of this part must pay a processing fee on a case-by-case basis as described in section 3000.11 of this chapter for such examination and report.

(c) An applicant for a mineral patent under part 3860 of this chapter must pay a processing fee on a case-by-case basis as described in § 3000.11 of this chapter for any validity examination and report prepared in connection with the application.

(d) An applicant for a mineral patent also is required to pay a processing fee under § 3860.1 of this chapter.

[70 FR 58878, Oct. 7, 2005]

## Subpart 3802—Exploration and Mining, Wilderness Review Program

### § 3802.0–1 Purpose.

The purpose of this subpart is to establish procedures to prevent impairment of the suitability of lands under wilderness review for inclusion in the wilderness system and to prevent unnecessary or undue degradation by activities authorized by the U.S. Mining Laws and provide for environmental protection of the public lands and resources.

### § 3802.0–2 Objectives.

The objectives of this subpart are to:

(a) Allow mining claim location, prospecting, and mining operations in lands under wilderness review pursuant to the U.S. Mining Laws, but only in a manner that will not impair the suitability of an area for inclusion in the wilderness system unless otherwise permitted by law; and

(b) Assure management programs that reflect consistency between the U.S. Mining Laws, and other appropriate statutes.

### § 3802.0–3 Authority.

These regulations are issued under the authority of sections 302 and 603 of

## Bureau of Land Management, Interior

## § 3802.0-5

the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1732, 1733, and 1782).

### § 3802.0-5 Definitions.

As used in this subpart, the term:

(a) *Reclamation*, which shall be commenced, conducted and completed as soon after disturbance as feasible without undue physical interference with mining operations, means:

(1) Reshaping of the lands disturbed and affected by mining operations to the approximate original contour or to an appropriate contour considering the surrounding topography as determined by the authorized officer;

(2) Restoring such reshaped lands by replacement of topsoil; and

(3) Revegetating the lands by using species previously occurring in the area to provide a vegetative cover at least to the point where natural succession is occurring.

(b) *Environment* means surface and subsurface resources both tangible and intangible, including air, water, mineral, scenic, cultural, paleontological, vegetative, soil, wildlife, fish and wilderness values.

(c) *Wilderness Study Area* means a roadless area of 5,000 acres or more or roadless islands which have been found through the Bureau of Land Management wilderness inventory process to have wilderness characteristics (thus having the potential of being included in the National Wilderness Preservation System), and which will be subjected to intensive analysis through the Bureau's planning system, and through public review to determine wilderness suitability, and is not yet the subject of a Congressional decision regarding its designation as wilderness.

(d) *Impairment of suitability for inclusion in the Wilderness System* means taking actions that cause impacts, that cannot be reclaimed to the point of being substantially unnoticeable in the area as a whole by the time the Secretary is scheduled to make a recommendation to the President on the suitability of a wilderness study area for inclusion in the National Wilderness Preservation System or have degraded wilderness values so far, compared with the area's values for other purposes, as to significantly constrain

the Secretary's recommendation with respect to the area's suitability for preservation as wilderness.

(e) *Mining claim* means any unpatented mining claim, millsite, or tunnel site authorized by the U.S. mining laws.

(f) *Mining operations* means all functions, work, facilities, and activities in connection with the prospecting, development, extraction, and processing of mineral deposits and all uses reasonably incident thereto including the construction and maintenance of means of access to and across lands subject to these regulations, whether the operations take place on or off the claim.

(g) *Operator* means a person conducting or proposing to conduct mining operations.

(h) *Authorized officer* means any employee of the Bureau of Land Management to whom has been delegated the authority to perform the duties described in this subpart.

(i) *Wilderness inventory* means an evaluation conducted under BLM wilderness inventory procedures which results in a written description and map showing those lands that meet the wilderness criteria established under section 603(a) of the Federal Land Policy and Management Act.

(j) *Manner and degree* means that existing operations will be defined geographically by the area of active development and the logical adjacent (not necessarily contiguous) continuation of the existing activity, and not necessarily by the boundary of a particular, claim or lease, and in some cases a change in the kind of activity if the impacts from the continuation and change of activity are not of a significantly different kind than the existing impacts. However, the significant measure for these activities is still the impact they are having on the wilderness potential of an area. It is the actual use of the area, and not the existence of an entitlement for use, which is the controlling factor. In other words, an existing activity, even if impairing, may continue to be expanded in an area or progress to the next stage of development so long as the additional impacts are not significantly different

#### § 3802.0-6

from those caused by the existing activity. In determining the manner and degree of existing operations, a rule of reason will be employed.

(k) *Valid existing right* means a valid discovery had been made on a mining claim on October 21, 1976, and continues to be valid at the time of exercise.

(l) *Undue and unnecessary degradation* means impacts greater than those that would normally be expected from an activity being accomplished in compliance with current standards and regulations and based on sound practices, including use of the best reasonably available technology.

(m) *Substantially unnoticeable* means something that either is so insignificant as to be only a very minor feature of the overall area or is not distinctly recognizable by the average visitor as being manmade or man-caused because of age, weathering or biological change.

#### § 3802.0-6 Policy.

Under the 1872 Mining Law (30 U.S.C. 22 *et seq.*), a person has a statutory right consistent with other laws and Departmental regulations, to go upon the open (unappropriated and unreserved) public lands for the purpose of mineral prospecting, exploration, development, and extraction. The Federal Land Policy and management Act requires the Secretary to regulate mining operations in lands under wilderness review to prevent impairment of the suitability of these areas for inclusion in the wilderness system. However, mining operations occurring in the same manner and degree that were being conducted on October 21, 1976, may continue, even if they are determined to be impairing. Mining activities not exceeding manner and degree shall be regulated only to prevent undue and unnecessary degradation of public lands.

#### § 3802.0-7 Scope.

(a) These regulations apply to mining operations conducted under the United States mining laws, as they affect the resources and environment or wilderness suitability of lands under wilderness review.

#### 43 CFR Ch. II (10-1-08 Edition)

(b) These regulations apply to means of access across public land for the purpose of conducting operations under the U.S. mining laws.

#### § 3802.1 Plan of operations.

An approved plan shall include appropriate environmental protection and reclamation measures selected by the authorized officer that shall be carried out by the operator. An operator may prepare and submit with a plan measures for the reclamation of the affected area.

#### § 3802.1-1 When required.

An approved plan of operations is required for operations within lands under wilderness review prior to commencing:

(a) Any mining operations which involve construction of means of access, including bridges, landing areas for aircraft, or improving or maintaining such access facilities in a way that alters the alignment, width, gradient size, or character of such facilities;

(b) Any mining operations which destroy trees 2 or more inches in diameter at the base;

(c) Mining operations using tracked vehicles or mechanized earth moving equipment, such as bulldozers or backhoes;

(d) Any operations using motorized vehicles over other than *open use areas and trails* as defined in subpart 6292 of this title, *off-road vehicles*, unless the use of a motorized vehicle can be covered by a temporary use permit issued under part 2930 of this chapter;

(e) The construction or placing of any mobile, portable or fixed structure on public land for more than 30 days;

(f) On mining operations requiring the use of explosives; or

(g) Any operation which may cause changes in a water course.

[45 FR 13974, Mar. 3, 1980, as amended at 67 FR 61745, Oct. 1, 2002]

#### § 3802.1-2 When not required.

A plan of operations under this subpart is not required for—

(a) Searching for and occasionally removing mineral samples or specimens;

(b) Operating motorized vehicles over *open use areas and trails* as defined in 43 CFR part 8340 so long as the vehicles

## Bureau of Land Management, Interior

## § 3802.1-5

conform to the operating regulations and vehicle standards contained in that subpart;

(c) Maintaining or making minor improvements of existing access routes, bridges, landing areas for aircraft, or other facilities for access where such improvements or maintenance shall not alter the alignment, width, gradient, size or character of such facilities; or

(d) Making geological, radiometric, geochemical, geophysical or other tests and measurements using instruments, devices, or drilling equipment which are transported without using mechanized earth moving equipment or tracked vehicles.

### § 3802.1-3 Operations existing on October 21, 1976.

A plan of operations shall not be required for operations that were being conducted on October 21, 1976, unless the operation is undergoing changes that exceed the manner and degree of operations on October 21, 1976. However, if the authorized officer determines that operations in the same manner and degree are causing undue or unnecessary degradation of lands and resources or adverse environmental effects, an approved plan containing protective measures may be required. Any changes planned in an existing operation that would result in operations exceeding the present manner and degree shall be delayed until the plan is processed under provisions of § 3802.1-5 of this title.

### § 3802.1-4 Contents of plan of operations.

(a) A plan of operations shall be filed in the District Office of the Bureau of Land Management in which the claim is located.

(b) No special form is required to file a plan of operations.

(c) The plan of operations shall include—

(1) The name and mailing address of both the person for whom the operation will be conducted, and the person who will be in charge of the operation and should be contacted concerning the reclamation or other aspects of the operation (any change in the mailing ad-

dress shall be reported promptly to the authorized officer);

(2) A map, preferably a topographic map, or sketch showing present road, bridge or aircraft landing area locations, proposed road, bridge or aircraft landing area locations, and size of areas where surface resources will be disturbed;

(3) Information sufficient to describe either the entire operation proposed or reasonably foreseeable operations and how they would be conducted, including the nature and location of proposed structures and facilities;

(4) The type and condition of existing and proposed means of access or aircraft landing areas, the means of transportation used or to be used, and the estimated period during which the proposed activity will take place;

(5) If and when applicable, the serial number assigned to the mining claim, mill or tunnel site filed pursuant to subpart 3833 of this title.

### § 3802.1-5 Plan approval.

(a) The authorized officer shall promptly acknowledge the receipt of a plan of operations and within 30 days of receipt of the plan act on the plan of operations to determine its acceptability.

(b) The authorized officer shall review the plan of operations to determine if the operations are impairing the suitability of the area for preservation as wilderness. Pending approval of the plan of operations, mining operations may continue in a manner that minimizes environmental impacts as prescribed in § 3802.3 of this title. After completing the review of the plan of operations, the authorized officer shall give the operator written notice that:

(1) The plan is approved subject to measures that will prevent the impairment of the suitability of the area for preservation as wilderness as determined by the authorized officer;

(2) Plans covering operations on a claim with a valid existing right are approved subject to measures that will prevent undue and unnecessary degradation of the area; or

(3) The anticipated impacts of the mining operations are such that all or part of further operations will impair

the suitability of the area for preservation as wilderness, the plan is disapproved and continuance of such operations is not allowed.

(c) Upon receipt of a plan of operations for mining activities commencing after the effective date of these regulations, the authorized officer may notify the operator, in writing, that:

(1) In an area of lands under wilderness review where an inventory has not been completed, an operator may agree to operate under a plan of operations that includes terms and conditions that would be applicable in a wilderness study area. Without an agreement to this effect, no action may be taken on the plan until a wilderness inventory is completed;

(2) The area has been inventoried and a final decision has been issued and become effective that the area does not contain wilderness characteristics, and that the mining operations are no longer subject to these regulations; or

(3) The anticipated impacts are such that all or part of the proposed mining operations will impair the suitability of the area for preservation as wilderness, and therefore, the proposed mining operation cannot be allowed.

(d) In addition to paragraphs (a) through (c) of this section, the following general plan approval procedures may also apply. The authorized officer may notify the operator, in writing, that:

(1) The plan of operations is unacceptable and the reasons therefore;

(2) Modification of the plan of operations is necessary to meet the requirements of these regulations;

(3) The plan of operations is being reviewed, but that more time, not to exceed an additional 60 days, is necessary to complete such review, setting forth the reasons why additional time is needed except in those instances where it is determined that an Environmental Impact Statement, compliance with section 106 of the National Historic Preservation Act (NHPA) or section 7 of the Endangered Species Act is needed. Periods during which the area of operations is inaccessible for inspection due to climatic conditions, fire hazards or other physical conditions or legal impediments, shall not be in-

cluded when counting the 60 calendar day period; or

(4) The proposed operations do not require a plan of operations.

(e) If the authorized officer does not notify the operator of any action on the plan of operations within the 30-day period, or the 60-day extension, or notify the operator of the need for an Environmental Impact Statement or compliance with section 106 of NHPA or section 7 of the Endangered Species Act, operations under the plan may begin. The option to begin operations under this section does not constitute approval of a plan of operations. However, if the authorized officer at a later date finds that operations under the plan are impairing wilderness suitability, the authorized officer shall notify the operator that the operations are not in compliance with these regulations and what changes are needed, and shall require the operator to submit a modified plan of operations, within a time specified in the notice. If the operator is notified of the need for an Environmental Impact Statement, the plan of operations shall not be approved before 30 days after a final statement is prepared and filed with the Environmental Protection Agency. If the operator is notified of the need for compliance with section 106 of the NHPA or section 7 of the Endangered Species Act, the plan of operations shall not be approved until the compliance responsibilities of the Bureau of Land Management are satisfied.

(f) If cultural resource properties listed on or eligible for listing on the National Register of Historic Places are within the area of operations, no operations which would affect those resources shall be approved until compliance with section 106 of the National Historic Preservation Act is accomplished. The operator is not required to do or to pay for an inventory. The responsibility and cost of the cultural resource mitigation, except as provided in §3802.3-2(f) of this title, included in an approved plan of operation shall be the operator's.

(g) Pending final approval of the plan of operations, the authorized officer may approve any operations that may be necessary for timely compliance with requirements of Federal and State

## Bureau of Land Management, Interior

## § 3802.2

laws. Such operations shall be conducted so as to prevent impairment of wilderness suitability and to minimize environmental impacts as prescribed by the authorized officer in accordance with the standards contained in § 3802.3 of this title.

### § 3802.1-6 Modification of plan.

(a) If the development of a plan for an entire operation is not possible, the operator shall file an initial plan setting forth this proposed operation to the degree reasonably foreseeable at that time. Thereafter, the operator shall file a supplemental plan or plans prior to undertaking any operations not covered by the initial plan.

(b) At any time during operations under an approved plan of operations, the authorized officer or the operator may initiate a modification of the plan detailing any necessary changes that were unforeseen at the time of filing of the plan of operations. If the operator does not furnish a proposed modification within a time considered reasonable by the authorized officer, the authorized officer may recommend to the State Director that the operator be required to submit a proposed modification of the plan. The recommendation of the authorized officer shall be accompanied by a statement setting forth the supporting facts and reasons for his recommendations. In acting upon such recommendation, except in the case of a modification under § 3802.1-5(e) of this title, the State Director shall determine (1) whether all reasonable measures were taken by the authorized officer to predict the environmental impacts of the proposed operations; (2) whether the disturbance is or may become of such significance as to require modification of the plan of operations in order to meet the requirement for environmental protection specified in § 3802.3-2 of this title, and (3) whether the disturbance can be minimized using reasonable means. Lacking such a determination by the State Director, an operator is not required to submit a proposed modification of an approved plan of operations. Operations may continue in accordance with the approved plan of operations until a modified plan is approved, unless the State Director determines that

the operations are causing impairment or unnecessary or undue degradation to surface resources. He shall advise the operator of those measures needed to avoid such damage and the operator shall immediately take all necessary steps to implement measures recommended by the State Director.

(c) A supplemental plan of operations or a modification of an approved plan of operations shall be approved by the authorized officer in the same manner as the initial plan of operations.

### § 3802.1-7 Existing operations.

(a) Persons conducting mining operations on the effective date of these regulations, who would be required to submit a plan of operations under § 3802.1-1 of this title, may continue operations but shall, within 60 days after the effective date of these regulations, submit a plan of operations. Upon a showing of good cause, the authorized officer shall grant an extension of time to submit a plan of operations not to exceed an additional 180 days.

(b) Operations may continue according to the submitted plan of operations during its review unless the operator is notified otherwise by the authorized officer.

(c) Upon approval of a plan of operations, mining operations shall be conducted in accordance with the approved plan.

### § 3802.2 Bond requirements.

(a) Any operator who conducts mining operations under an approved plan of operations shall, if required to do so by the authorized officer, furnish a bond in an amount determined by the authorized officer. The authorized officer may determine not to require a bond where mining operations would cause nominal environmental damage, or the operator has an excellent past record for reclamation. In determining the amount of the bond, the authorized officer shall consider the estimated cost of stabilizing and reclaiming all areas disturbed by the operations consistent with § 3802.3-2(h) of this title.

(b) In lieu of a bond, the operator may deposit and maintain in a Federal depository account of the United States Treasury, as directed by the authorized officer, cash in an amount

### § 3802.3

### 43 CFR Ch. II (10–1–08 Edition)

equal to the required dollar amount of the bond or negotiable securities of the United States having a face and market value at the time of deposit of not less than the required dollar amount of the bond.

(c) In place of the individual bond on each separate operation, a blanket bond covering hardrock mining operations may be furnished, at the option of the operator, if the terms and conditions as determined by the authorized officer are sufficient to comply with these regulations.

(d) In the event that an approved plan of operations is modified in accordance with § 3802.1–5 of this title, the authorized officer shall review the initial bond for adequacy and, if necessary, shall require that the amount of bond be adjusted to conform to the plan of operations, as modified.

(e) When a mining claim is patented, except for the California Desert Conservation Area, the authorized officer shall release the operator from that portion of the performance bond and plan of operations which applies to operations within the boundaries of the patented land. The authorized officer shall release the operator from the remainder of the performance bond and plan of operations (covering approved means of access outside the boundaries of the mining claim) when the operator has either completed reclamation in accordance with paragraph (f) of this section or those requirements are waived by the authorized officer.

(f) When all or any portion of the reclamation has been completed in accordance with paragraph (h) of § 3802.3–2 of this title, the operator shall notify the authorized officer who shall promptly make a joint inspection with the operator. The authorized officer shall then notify the operator whether the performance under the plan of operations is accepted. When the authorized officer has accepted as completed any portion of the reclamation, he shall reduce proportionally the amount of bond with respect to the remaining reclamation.

### § 3802.3 Environmental protection.

#### § 3802.3–1 Environmental assessment.

(a) When a plan of operations or significant modification is filed, the authorized officer shall make an environmental assessment to identify the impacts of the proposed mining operations upon the environment and to determine whether the proposed activity will impair the suitability of the area for preservation as wilderness or cause unnecessary and undue degradation and whether an environmental impact statement is required.

(b) Following completion of the environmental assessment or the environmental impact statement, the authorized officer shall develop measures deemed necessary for inclusion in the plan of operations that will prevent impairment of wilderness suitability and undue or unnecessary degradation of land and resources.

(c) If as a result of the environment assessment, the authorized officer determines that there is substantial public interest in the proposed mining operations, the operator may be notified that an additional period of time is required to consider public comments. The period shall not exceed the additional 60 days provided for approval of a plan in § 3802.1–4 of this title except as provided for cases requiring an environmental impact statement, a cultural resource inventory or section 7 of the Endangered Species Act.

#### § 3802.3–2 Requirements for environmental protection.

(a) *Air quality.* The operator shall comply with applicable Federal and State air quality standards, including the requirements of the Clean Air Act (42 U.S.C. 1857 *et seq.*).

(b) *Water quality.* The operator shall comply with applicable Federal and State water quality standards, including regulations issued pursuant to the Federal Water Pollution Control Act (33 U.S.C. 1151 *et seq.*).

(c) *Solid wastes.* The operator shall comply with applicable Federal and State standards for the disposal and treatment of solid wastes. All garbage, refuse, or waste shall either be removed from the affected lands or disposed or treated to minimize, so far as

is practicable, its impact on the environment and the surface resources. All tailings, waste rock, trash, deleterious materials of substances and other waste produced by operations shall be deployed, arranged, disposed or treated to minimize adverse impact upon the environment, surface and subsurface resources.

(d) *Visual resources.* The operator shall, to the extent practicable, harmonize operations with the visual resources, identified by the authorized officer, through such measures as the design, location of operating facilities and improvements to blend with the landscape.

(e) *Fisheries, wildlife and plant habitat.* The operator shall take such action as may be needed to minimize or prevent adverse impact upon plants, fish, and wildlife, including threatened or endangered species, and their habitat which may be affected by the operations.

(f) *Cultural and paleontological resources.* (1) The operator shall not knowingly disturb, alter, injure, destroy or take any scientifically important paleontological remains or any historical, archaeological, or cultural district, site, structure, building or object.

(2) The operator shall immediately bring to the attention of the authorized officer any such cultural and/or paleontological resources that might be altered or destroyed by his operation, and shall leave such discovery intact until told to proceed by the authorized officer. The authorized officer shall evaluate the discoveries brought to his attention, and determine within 10 working days what action shall be taken with respect to such discoveries.

(3) The responsibility and the cost of investigations and salvage of such values discovered during approved operations shall be the Federal Government's.

(g) *Access routes.* No new access routes that would cause more than temporary impact and therefore would impair wilderness suitability shall be constructed in a wilderness study area. Temporary access routes that are constructed by the operator shall be constructed and maintained to assure adequate drainage and to control or pre-

vent damage to soil, water, and other resource values. Unless otherwise approved by the authorized officer, roads no longer needed for operations shall be closed to normal vehicular traffic; bridges and culverts shall be removed; cross drains, dips, or water bars shall be constructed, and the road surface shall be shaped to as near a natural contour as practicable, be stabilized and revegetated as required in the plan of operations.

(h) *Reclamation.* (1) The operator shall perform reclamation of those lands disturbed or affected by the mining operation conducted by the operator under an approved plan of operations containing reclamation measures stipulated by the authorized officer as contemporaneously as feasible with operations. The disturbance or effect on mined land shall not include that caused by separate operations in areas abandoned before the effective date of these regulations.

(2) An operator may propose and submit with his plan of operations measures for reclamation of the affected area.

(i) *Protection of survey monuments.* The operator shall, to the extent practicable and consistent with the operation, protect all survey monuments, witness corners, reference monuments, bearing trees and line trees against destruction, obliteration, or damage from the approved operations. If, in the course of operations, any monuments, corners or accessories are destroyed, obliterated or damaged by such operations, the operator shall immediately report the matter to the authorized officer. The authorized officer shall prescribe in writing the requirement for the restoration or reestablishment of monuments, corners, bearing trees, and line trees.

#### § 3802.4 General provisions.

##### § 3802.4-1 Noncompliance.

(a) An operator who conducts mining operations undertaken either without an approved plan of operations or without taking actions specified in a notice of noncompliance within the time specified therein may be enjoined by an appropriate court order from continuing

#### **§ 3802.4-2**

such operations and be liable for damages for such unlawful acts.

(b) Whenever the authorized officer determines that an operator is failing or has failed to comply with the requirements of an approved plan of operations, or with the provisions of these regulations and that noncompliance is causing impairment of wilderness suitability or unnecessary and undue degradation of the resources of the lands involved, the authorized officer shall serve a notice of noncompliance upon the operator by delivery in person to the operator or the operator's authorized agent, or by certified mail addressed to the operator's last known address.

(c) A notice of noncompliance shall specify in what respects the operator is failing or has failed to comply with the requirements of the plan of operations of the provisions of applicable regulations, and shall specify the actions which are in violation of the plan or regulations and the actions which shall be taken to correct the noncompliance and the time limits, not to exceed 30 days, within which corrective action shall be taken.

#### **§ 3802.4-2 Access.**

(a) An operator is entitled to non-exclusive access to his mining operations consistent with provisions of the United States mining laws and Departmental regulations.

(b) In approving access as part of a plan of operations, the authorized officer shall specify the location of the access route, the design, construction, operation and maintenance standards, means of transportation, and other conditions necessary to prevent impairment of wilderness suitability, protect the environment, the public health or safety, Federal property and economic interests, and the interests of other lawful users of adjacent lands or lands traversed by the access route. The authorized officer may also require the operator to utilize existing access routes in order to minimize the number of separate rights-of-way, and, if practicable, to construct access routes within a designated transportation and utility corridor. When commercial hauling is involved and the use of an existing access route is required, the

#### **43 CFR Ch. II (10-1-08 Edition)**

authorized officer may require the operator to make appropriate arrangements for use and maintenance.

#### **§ 3802.4-3 Multiple-use conflicts.**

In the event that uses under any lease, license, permit, or other authorization pursuant to the provisions of any other law, shall conflict, interfere with, or endanger operations in approved plans or otherwise authorized by these regulations, the conflicts shall be reconciled, as much as practicable, by the authorized officer.

#### **§ 3802.4-4 Fire prevention and control.**

The operator shall comply with all applicable Federal and State fire laws and regulations, and shall take all reasonable measures to prevent and suppress fires on the area of mining operations.

#### **§ 3802.4-5 Maintenance and public safety.**

During all operations, the operator shall maintain his structures, equipment, and other facilities in a safe and orderly manner. Hazardous sites or conditions resulting from operations shall be marked by signs, fenced, or otherwise identified to protect the public in accordance with applicable Federal and State laws and regulations.

#### **§ 3802.4-6 Inspection.**

The authorized officer shall periodically inspect operations to determine if the operator is complying with these regulations and the approved plan of operations, and the operator shall permit access to the authorized officer for this purpose.

#### **§ 3802.4-7 Notice of suspension of operations.**

(a) Except for seasonal suspension, the operator shall notify the authorized officer of any suspension of operations within 30 days after such suspension. This notice shall include:

(1) Verification of intent to maintain structures, equipment, and other facilities, and

(2) The expected reopening date.

(b) The operator shall maintain the operating site, structure, and other facilities in a safe and environmentally

## Bureau of Land Management, Interior

## § 3809.2

acceptable condition during nonoperating periods.

(c) The name and address of the operator shall be clearly posted and maintained in a prominent place at the entrance to the area of mining operations during periods of nonoperation.

### § 3802.4–8 Cessation of operations.

The operator shall, within 1 year following cessation of operations, remove all structures, equipment, and other facilities and reclaim the site of operations, unless variances are agreed to in writing by the authorized officer. Additional time may be granted by the authorized officer upon a show of good cause by the operator.

### § 3802.5 Appeals.

(a) Any party adversely affected by a decision of the authorized officer or the State Director made pursuant to the provisions of this subpart shall have a right of appeal to the Board of Land Appeals, Office of Hearings and Appeals, pursuant to part 4 of this title.

(b) In any case involving lands under the jurisdiction of any agency other than the Department of the Interior, or an office of the Department of the Interior other than the Bureau of Land Management, the office rendering a decision shall designate the authorized officer of such agency as an adverse party on whom a copy of any notice of appeal and any statement of reasons, written arguments, or brief must be served.

### § 3802.6 Public availability of information.

(a) All data and information concerning Federal and Indian minerals submitted under this subpart 3802 are subject to part 2 of this title. Part 2 of this title includes the regulations of the Department of the Interior covering the public disclosure of data and information contained in Department of the Interior records. Certain mineral information not protected from public disclosure under part 2 may of this title be made available for inspection without a Freedom of Information Act (5 U.S.C. 552) request.

(b) When you submit data and information under this subpart 3802 that you believe to be exempt from disclo-

sure to the public, you must clearly mark each page that you believe includes confidential information. BLM will keep all data and information confidential to the extent allowed by § 2.13(c) of this title.

[63 FR 52954, Oct. 1, 1998]

## Subpart 3809—Surface Management

AUTHORITY: 16 U.S.C. 1280; 30 U.S.C. 22; 30 U.S.C. 612; 43 U.S.C. 1201; and 43 U.S.C. 1732, 1733, 1740, 1781, and 1782.

SOURCE: 65 FR 70112, Nov. 21, 2000, unless otherwise noted.

### GENERAL INFORMATION

### § 3809.1 What are the purposes of this subpart?

The purposes of this subpart are to:

(a) Prevent unnecessary or undue degradation of public lands by operations authorized by the mining laws. Anyone intending to develop mineral resources on the public lands must prevent unnecessary or undue degradation of the land and reclaim disturbed areas. This subpart establishes procedures and standards to ensure that operators and mining claimants meet this responsibility; and

(b) Provide for maximum possible coordination with appropriate State agencies to avoid duplication and to ensure that operators prevent unnecessary or undue degradation of public lands.

### § 3809.2 What is the scope of this subpart?

(a) This subpart applies to all operations authorized by the mining laws on public lands where the mineral interest is reserved to the United States, including Stock Raising Homestead lands as provided in § 3809.31(d) and (e). When public lands are sold or exchanged under 43 U.S.C. 682(b) (Small Tracts Act), 43 U.S.C. 869 (Recreation and Public Purposes Act), 43 U.S.C. 1713 (sales) or 43 U.S.C. 1716 (exchanges), minerals reserved to the United States continue to be removed from the operation of the mining laws unless a subsequent land-use planning decision expressly restores the land to mineral

### § 3809.3

entry, and BLM publishes a notice to inform the public.

(b) This subpart does not apply to lands in the National Park System, National Forest System, and the National Wildlife Refuge System; acquired lands; or lands administered by BLM that are under wilderness review, which are subject to subpart 3802 of this part.

(c) This subpart applies to all patents issued after October 21, 1976 for mining claims in the California Desert Conservation Area, except for any patent for which a right to the patent vested before that date.

(d) This subpart does not apply to private land except as provided in paragraphs (a) and (c) of this section. For purposes of analysis under the National Environmental Policy Act of 1969, BLM may collect information about private land that is near to, or may be affected by, operations authorized under this subpart.

(e) This subpart applies to operations that involve locatable minerals, including metallic minerals; some industrial minerals, such as gypsum; and a number of other non-metallic minerals that have a unique property which gives the deposit a distinct and special value. This subpart does not apply to leasable and salable minerals. Leasable minerals, such as coal, phosphate, sodium, and potassium; and salable minerals, such as common varieties of sand, gravel, stone, and pumice, are not subject to location under the mining laws. Parts 3400, 3500 and 3600 of this title govern mining operations for leasable and salable minerals.

[65 FR 70112, Nov. 21, 2000, as amended at 66 FR 54860, Oct. 30, 2001]

### § 3809.3 What rules must I follow if State law conflicts with this subpart?

If State laws or regulations conflict with this subpart regarding operations on public lands, you must follow the requirements of this subpart. However, there is no conflict if the State law or regulation requires a higher standard of protection for public lands than this subpart.

### 43 CFR Ch. II (10–1–08 Edition)

### § 3809.5 How does BLM define certain terms used in this subpart?

As used in this subpart, the term:

*Casual use* means activities ordinarily resulting in no or negligible disturbance of the public lands or resources. For example—

(1) Casual use generally includes the collection of geochemical, rock, soil, or mineral specimens using hand tools; hand panning; or non-motorized sluicing. It may include use of small portable suction dredges. It also generally includes use of metal detectors, gold spears and other battery-operated devices for sensing the presence of minerals, and hand and battery-operated drywashers. Operators may use motorized vehicles for casual use activities provided the use is consistent with the regulations governing such use (part 8340 of this title), off-road vehicle use designations contained in BLM land-use plans, and the terms of temporary closures ordered by BLM.

(2) Casual use does not include use of mechanized earth-moving equipment, truck-mounted drilling equipment, motorized vehicles in areas when designated as closed to “off-road vehicles” as defined in § 8340.0-5 of this title, chemicals, or explosives. It also does not include “occupancy” as defined in § 3715.0-5 of this title or operations in areas where the cumulative effects of the activities result in more than negligible disturbance.

*Exploration* means creating surface disturbance greater than casual use that includes sampling, drilling, or developing surface or underground workings to evaluate the type, extent, quantity, or quality of mineral values present. Exploration does not include activities where material is extracted for commercial use or sale.

*Minimize* means to reduce the adverse impact of an operation to the lowest practical level. During review of operations, BLM may determine that it is practical to avoid or eliminate particular impacts.

*Mining claim* means any unpatented mining claim, millsite, or tunnel site located under the mining laws. The term also applies to those mining claims and millsites located in the California Desert Conservation Area that were patented after the enactment

## Bureau of Land Management, Interior

## § 3809.5

of the Federal Land Policy and Management Act of October 21, 1976. Mining “claimant” is defined in §3833.0–5 of this title.

*Mining laws* means the Lode Law of July 26, 1866, as amended (14 Stat. 251); the Placer Law of July 9, 1870, as amended (16 Stat. 217); and the Mining Law of May 10, 1872, as amended (17 Stat. 91); as well as all laws supplementing and amending those laws, including the Building Stone Act of August 4, 1892, as amended (27 Stat. 348); the Saline Placer Act of January 31, 1901 (31 Stat. 745); the Surface Resources Act of 1955 (30 U.S.C. 611–614); and the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 *et seq.*).

*Mitigation*, as defined in 40 CFR 1508.20, may include one or more of the following:

- (1) Avoiding the impact altogether by not taking a certain action or parts of an action;
- (2) Minimizing impacts by limiting the degree or magnitude of the action and its implementation;
- (3) Rectifying the impact by repairing, rehabilitating, or restoring the affected environment;
- (4) Reducing or eliminating the impact over time by preservation and maintenance operations during the life of the action; and
- (5) Compensating for the impact by replacing, or providing substitute, resources or environments.

*Operations* means all functions, work, facilities, and activities on public lands in connection with prospecting, exploration, discovery and assessment work, development, extraction, and processing of mineral deposits locatable under the mining laws; reclamation of disturbed areas; and all other reasonably incident uses, whether on a mining claim or not, including the construction of roads, transmission lines, pipelines, and other means of access across public lands for support facilities.

*Operator* means a person conducting or proposing to conduct operations.

*Person* means any individual, firm, corporation, association, partnership, trust, consortium, joint venture, or any other entity conducting operations on public lands.

*Project area* means the area of land upon which the operator conducts operations, including the area required for construction or maintenance of roads, transmission lines, pipelines, or other means of access by the operator.

*Public lands*, as defined in 43 U.S.C. 1702, means any land and interest in land owned by the United States within the several States and administered by the Secretary of the Interior through the BLM, without regard to how the United States acquired ownership, except—

- (1) Lands located on the Outer Continental Shelf; and
- (2) Lands held for the benefit of Indians, Aleuts, and Eskimos.

*Reclamation* means taking measures required by this subpart following disturbance of public lands caused by operations to meet applicable performance standards and achieve conditions required by BLM at the conclusion of operations. For a definition of “reclamation” applicable to operations conducted under the mining laws on Stock Raising Homestead Act lands, see part 3810, subpart 3814 of this title. Components of reclamation include, where applicable:

- (1) Isolation, control, or removal of acid-forming, toxic, or deleterious substances;
- (2) Regrading and reshaping to conform with adjacent landforms, facilitate revegetation, control drainage, and minimize erosion;
- (3) Rehabilitation of fisheries or wildlife habitat;
- (4) Placement of growth medium and establishment of self-sustaining revegetation;
- (5) Removal or stabilization of buildings, structures, or other support facilities;
- (6) Plugging of drill holes and closure of underground workings; and
- (7) Providing for post-mining monitoring, maintenance, or treatment.

*Riparian area* is a form of wetland transition between permanently saturated wetlands and upland areas. These areas exhibit vegetation or physical characteristics reflective of permanent surface or subsurface water influence. Typical riparian areas include lands along, adjacent to, or contiguous with perennially and intermittently flowing

## § 3809.10

rivers and streams, glacial potholes, and the shores of lakes and reservoirs with stable water levels. Excluded are areas such as ephemeral streams or washes that do not exhibit the presence of vegetation dependent upon free water in the soil.

*Tribe* means, and *Tribal* refers to, a Federally recognized Indian tribe.

*Unnecessary or undue degradation* means conditions, activities, or practices that:

(1) Fail to comply with one or more of the following: the performance standards in § 3809.420, the terms and conditions of an approved plan of operations, operations described in a complete notice, and other Federal and state laws related to environmental protection and protection of cultural resources;

(2) Are not “reasonably incident” to prospecting, mining, or processing operations as defined in § 3715. 0–5 of this chapter; or

(3) Fail to attain a stated level of protection or reclamation required by specific laws in areas such as the California Desert Conservation Area, Wild and Scenic Rivers, BLM-administered portions of the National Wilderness System, and BLM-administered National Monuments and National Conservation Areas.

[65 FR 70112, Nov. 21, 2000, as amended at 66 FR 54860, Oct. 30, 2001]

## § 3809.10 How does BLM classify operations?

BLM classifies operations as—

(a) Casual use, for which an operator need not notify BLM. (You must reclaim any casual-use disturbance that you create. If your operations do not qualify as casual use, you must submit a notice or plan of operations, whichever is applicable. See §§ 3809.11 and 3809.21.);

(b) Notice-level operations, for which an operator must submit a notice (except for certain suction-dredging operations covered by § 3809.31(b)); and

(c) Plan-level operations, for which an operator must submit a plan of operations and obtain BLM’s approval.

## 43 CFR Ch. II (10–1–08 Edition)

## § 3809.11 When do I have to submit a plan of operations?

(a) You must submit a plan of operations and obtain BLM’s approval before beginning operations greater than casual use, except as described in § 3809.21. Also see §§ 3809.31 and 3809.400 through 3809.434.

(b) You must submit a plan of operations for any bulk sampling in which you will remove 1,000 tons or more of presumed ore for testing.

(c) You must submit a plan of operations for any operations causing surface disturbance greater than casual use in the following special status areas where § 3809.21 does not apply:

(1) Lands in the California Desert Conservation Area (CDCA) designated by the CDCA plan as “controlled” or “limited” use areas;

(2) Areas in the National Wild and Scenic Rivers System, and areas designated for potential addition to the system;

(3) Designated Areas of Critical Environmental Concern;

(4) Areas designated as part of the National Wilderness Preservation System and administered by BLM;

(5) Areas designated as “closed” to off-road vehicle use, as defined in § 8340.0–5 of this title;

(6) Any lands or waters known to contain Federally proposed or listed threatened or endangered species or their proposed or designated critical habitat, unless BLM allows for other action under a formal land-use plan or threatened or endangered species recovery plan; and

(7) National Monuments and National Conservation Areas administered by BLM.

## § 3809.21 When do I have to submit a notice?

(a) You must submit a complete notice of your operations 15 calendar days before you commence exploration causing surface disturbance of 5 acres or less of public lands on which reclamation has not been completed. See § 3809.301 for information on what you must include in your notice.

(b) You must not segment a project area by filing a series of notices for the purpose of avoiding filing a plan of operations. See §§ 3809.300 through 3809.336

## Bureau of Land Management, Interior

## § 3809.100

for regulations applicable to notice-level operations.

### **§ 3809.31 Are there any special situations that affect what submittals I must make before I conduct operations?**

(a) Where the cumulative effects of casual use by individuals or groups have resulted in, or are reasonably expected to result in, more than negligible disturbance, the State Director may establish specific areas as he/she deems necessary where any individual or group intending to conduct activities under the mining laws must contact BLM 15 calendar days before beginning activities to determine whether the individual or group must submit a notice or plan of operations. (See § 3809.300 through 3809.336 and § 3809.400 through 3809.434.) BLM will notify the public via publication in the FEDERAL REGISTER of the boundaries of such specific areas, as well as through posting in each local BLM office having jurisdiction over the lands.

(b) *Suction dredges.* (1) If your operations involve the use of a suction dredge, the State requires an authorization for its use, and BLM and the State have an agreement under § 3809.200 addressing suction dredging, then you need not submit to BLM a notice or plan of operations, unless otherwise provided in the agreement between BLM and the State.

(2) For all uses of a suction dredge not covered by paragraph (b)(1) of this section, you must contact BLM before beginning such use to determine whether you need to submit a notice or a plan to BLM, or whether your activities constitute casual use. If your proposed suction dredging is located within any lands or waters known to contain Federally proposed or listed threatened or endangered species or their proposed or designated critical habitat, regardless of the level of disturbance, you must not begin operations until BLM completes consultation the Endangered Species Act requires.

(c) If your operations require you to occupy or use a site for activities "reasonably incident" to mining, as defined in § 3715.0-5 of this title, whether you are operating under a notice or a

plan of operations, you must also comply with part 3710, subpart 3715, of this title.

(d) If your operations are located on lands patented under the Stock Raising Homestead Act and you do not have the written consent of the surface owner, then you must submit a plan of operations and obtain BLM's approval. Where you have surface-owner consent, you do not need a notice or a plan of operations under this subpart. See part 3810, subpart 3814, of this title.

(e) For other than Stock Raising Homestead Act lands, if your proposed operations are located on lands conveyed by the United States which contain minerals reserved to the United States, then you must submit a plan of operations under § 3809.11 and obtain BLM's approval or a notice under § 3809.21.

[65 FR 70112, Nov. 21, 2000, as amended at 66 FR 54860, Oct. 30, 2001]

### **§ 3809.100 What special provisions apply to operations on segregated or withdrawn lands?**

(a) *Mineral examination report.* After the date on which the lands are withdrawn from appropriation under the mining laws, BLM will not approve a plan of operations or allow notice-level operations to proceed until BLM has prepared a mineral examination report to determine whether the mining claim was valid before the withdrawal, and whether it remains valid. BLM may require preparation of a mineral examination report before approving a plan of operations or allowing notice-level operations to proceed on segregated lands. If the report concludes that the mining claim is invalid, BLM will not approve operations or allow notice-level operations on the mining claim. BLM will also promptly initiate contest proceedings.

(b) *Allowable operations.* If BLM has not completed the mineral examination report under paragraph (a) of this section, if the mineral examination report for proposed operations concludes that a mining claim is invalid, or if there is a pending contest proceeding for the mining claim,

(1) BLM may—

(i) Approve a plan of operations for the disputed mining claim proposing

operations that are limited to taking samples to confirm or corroborate mineral exposures that are physically disclosed and existing on the mining claim before the segregation or withdrawal date, whichever is earlier; and

(ii) Approve a plan of operations for the operator to perform the minimum necessary annual assessment work under § 3851.1 of this title; or

(2) A person may only conduct exploration under a notice that is limited to taking samples to confirm or corroborate mineral exposures that are physically disclosed and existing on the mining claim before the segregation or withdrawal date, whichever is earlier.

(c) *Time limits.* While BLM prepares a mineral examination report under paragraph (a) of this section, it may suspend the time limit for responding to a notice or acting on a plan of operations. See §§ 3809.311 and 3809.411, respectively.

(d) *Final decision.* If a final departmental decision declares a mining claim to be null and void, the operator must cease all operations, except required reclamation.

**§ 3809.101 What special provisions apply to minerals that may be common variety minerals, such as sand, gravel, and building stone?**

(a) *Mineral examination report.* On mining claims located on or after July 23, 1955, you must not initiate operations for minerals that may be “common variety” minerals, as defined in § 3711.1(b) of this title, until BLM has prepared a mineral examination report, except as provided in paragraph (b) of this section.

(b) *Interim authorization.* Until the mineral examination report described in paragraph (a) of this section is prepared, BLM will allow notice-level operations or approve a plan of operations for the disputed mining claim for—

(1) Operations limited to taking samples to confirm or corroborate mineral exposures that are physically disclosed and existing on the mining claim;

(2) Performance of the minimum necessary annual assessment work under § 3851.1 of this title; or

(3) Operations to remove possible common variety minerals if you estab-

lish an escrow account in a form acceptable to BLM. You must make regular payments to the escrow account for the appraised value of possible common variety minerals removed under a payment schedule approved by BLM. The funds in the escrow account must not be disbursed to the operator or to the U.S. Treasury until a final determination of whether the mineral is a common variety and therefore salable under part 3600 of this title.

(c) *Determination of common variety.* If the mineral examination report under paragraph (a) of this section concludes that the minerals are common variety minerals, you may either relinquish your mining claim(s) or BLM will initiate contest proceedings. Upon relinquishment or final departmental determination that the mining claim(s) is null and void, you must promptly close and reclaim your operations unless you are authorized to proceed under parts 3600 and 3610 of this title.

(d) *Disposal.* BLM may dispose of common variety minerals from unpatented mining claims in accordance with the provisions of § 3601.14 of this chapter.

[65 FR 70112, Nov. 21, 2000, as amended at 66 FR 58910, Nov. 23, 2001]

**§ 3809.111 Will BLM disclose to the public the information I submit under this subpart?**

Part 2 of this title applies to all information and data you submit under this subpart. If you submit information or data under this subpart that you believe is exempt from disclosure, you must mark each page clearly “CONFIDENTIAL INFORMATION.” You must also separate it from other materials you submit to BLM. BLM will keep confidential information or data marked in this manner to the extent required by part 2 of this title. If you do not mark the information as confidential, BLM, without notifying you, may disclose the information to the public to the full extent allowed under part 2 of this title.

**§ 3809.115 Can BLM collect information under this subpart?**

Yes, the Office of Management and Budget has approved the collections of information contained in this subpart

## Bureau of Land Management, Interior

## § 3809.202

under 44 U.S.C. 3501 *et seq.* and assigned clearance number 1004-0194. BLM will use this information to regulate and monitor mining and exploration operations on public lands.

### **§ 3809.116 As a mining claimant or operator, what are my responsibilities under this subpart for my project area?**

(a) Mining claimants and operators (if other than the mining claimant) are liable for obligations under this subpart that accrue while they hold their interests.

(b) Relinquishment, forfeiture, or abandonment of a mining claim does not relieve a mining claimant's or operator's responsibility under this subpart for obligations that accrued or conditions that were created while the mining claimant or operator was responsible for operations conducted on that mining claim or in the project area.

(c) Transfer of a mining claim or operation does not relieve a mining claimant's or operator's responsibility under this subpart for obligations that accrued or conditions that were created while the mining claimant or operator was responsible for operations conducted on that mining claim or in the project area until—

(1) BLM receives documentation that a transferee accepts responsibility for the transferor's previously accrued obligations, and

(2) BLM accepts an adequate replacement financial guarantee adequate to cover such previously accrued obligations and the transferee's new obligations.

[65 FR 70112, Nov. 21, 2000, as amended at 66 FR 54860, Oct. 30, 2001]

### FEDERAL/STATE AGREEMENTS

### **§ 3809.200 What kinds of agreements may BLM and a State make under this subpart?**

To prevent unnecessary administrative delay and to avoid duplication of administration and enforcement, BLM and a State may make the following kinds of agreements:

(a) An agreement to provide for a joint Federal/State program; and

(b) An agreement under § 3809.202 which provides that, in place of BLM administration, BLM defers to State administration of some or all of the requirements of this subpart subject to the limitations in § 3809.203.

### **§ 3809.201 What should these agreements address?**

(a) The agreements should provide for maximum possible coordination with the State to avoid duplication and to ensure that operators prevent unnecessary or undue degradation of public lands. Agreements should cover any or all sections of this subpart and should consider, at a minimum, common approaches to review of plans of operations, including effective cooperation regarding the National Environmental Policy Act; performance standards; interim management of temporary closure; financial guarantees; inspections; and enforcement actions, including referrals to enforcement authorities. BLM and the State should also include provisions for the regular review or audit of these agreements.

(b) To satisfy the requirements of § 3809.31(b), if BLM and the State elect to address suction dredge activities in the agreement, the agreement must require a State to notify BLM of each application to conduct suction dredge activities within 15 calendar days of receipt of the application by the State. BLM will inform the State whether Federally proposed or listed threatened or endangered species or their proposed or designated critical habitat may be affected by the proposed activities and any necessary mitigating measures. Operations must not begin until BLM completes consultation or conferencing under the Endangered Species Act.

### **§ 3809.202 Under what conditions will BLM defer to State regulation of operations?**

(a) *State request.* A State may request BLM enter into an agreement for State regulation of operations on public lands in place of BLM administration of some or all of the requirements of this subpart. The State must send the request to the BLM State Director with jurisdiction over public lands in the State.

(b) *BLM review.* (1) When the State Director receives the State's request, he/she will notify the public and provide an opportunity for comment. The State Director will then review the request and determine whether the State's requirements are consistent with the requirements of this subpart, and whether the State has necessary legal authorities, resources, and funding for an agreement. The State requirements may be contained in laws, regulations, guidelines, policy manuals, and demonstrated permitting practices.

(2) For the purposes of this subpart, BLM will determine consistency with the requirements of this subpart by comparing this subpart and State standards on a provision-by-provision basis to determine—

(i) Whether non-numerical State standards are functionally equivalent to BLM counterparts; and

(ii) Whether numerical State standards are the same as corresponding numerical BLM standards, except that State review and approval time frames do not have to be the same as the corresponding Federal time frames.

(3) A State environmental protection standard that exceeds a corresponding Federal standard is consistent with the requirements of this subpart.

(c) *State Director decision.* The BLM State Director will notify the State in writing of his/her decision regarding the State's request. The State Director will address whether the State requirements are consistent with the requirements of this subpart, and whether the State has necessary legal authorities, resources, and funding to implement any agreement. If BLM determines that the State's requirements are consistent with the requirements of this subpart and the State has the necessary legal authorities, resources, and funding, BLM must enter into an agreement with the State so that the State will regulate some or all of the operations on public lands, as described in the State request.

(d) *Appeal of State Director decision.* The BLM State Director's decision will be a final decision of BLM and may be appealed to the Assistant Secretary for Land and Minerals Management, but not to the Department of the Interior

Office of Hearings and Appeals. The items you should include in the appeal are the same as the items you must include under § 3809.802.

[65 FR 70112, Nov. 21, 2000, as amended at 68 FR 32656, June 2, 2003]

**§ 3809.203 What are the limitations on BLM deferral to State regulation of operations?**

Any agreement between BLM and a State in which BLM defers to State regulation of some or all operations on public lands is subject to the following limitations:

(a) *Plans of Operations.* BLM must concur with each State decision approving a plan of operations to assure compliance with this subpart, and BLM retains responsibility for compliance with the National Environmental Policy Act (NEPA). The State and BLM may decide who will be the lead agency in the plan review process, including preparation of NEPA documents.

(b) *Federal land-use planning and other Federal laws.* BLM will continue to be responsible for all land-use planning on public lands and for implementing other Federal laws relating to the public lands for which BLM is responsible.

(c) *Federal enforcement.* BLM may take any authorized action to enforce the requirements of this subpart or any term, condition, or limitation of a notice or an approved plan of operations. BLM may take this action regardless of the nature of its agreement with a State, or actions taken by a State.

(d) *Financial guarantee.* The amount of the financial guarantee must be calculated based on the completion of both Federal and State reclamation requirements, but may be held as one instrument. If the financial guarantee is held as one instrument, it must be redeemable by both the Secretary and the State. BLM must concur in the approval, release, or forfeiture of a financial guarantee for public lands.

(e) *State performance.* If BLM determines that a State is not in compliance with all or part of its Federal/State agreement, BLM will notify the State and provide a reasonable time for the State to comply.

(f) *Termination.* (1) If a State does not comply after being notified under paragraph (e) of this section, BLM will take

## Bureau of Land Management, Interior

## § 3809.300

appropriate action, which may include termination of all or part of the agreement.

(2) A State may terminate its agreement by notifying BLM 60 calendar days in advance.

### § 3809.204 Does this subpart cancel an existing agreement between BLM and a State?

(a) No, this subpart doesn't cancel a Federal/State agreement or memorandum of understanding in effect on January 20, 2001. A Federal/State agreement or memorandum of understanding will continue while BLM and the State perform a review to determine whether revisions are required under this subpart. BLM and the State must complete the review and make necessary revisions no later than one year from January 20, 2001.

(b) The BLM State Director may extend the review period described in

paragraph (a) of this section for one more year upon the written request of the Governor of the State or the delegated representative of the Governor, and if necessary, for a third year upon another written request. The existing agreement or memorandum of understanding terminates no later than one year after January 20, 2001 if this review and any necessary revision does not occur, unless extended under this paragraph.

(c) This subpart applies during the review period described in paragraphs (a) and (b) of this section. Where a portion of a Federal/State agreement or memorandum of understanding existing on January 20, 2001 is inconsistent with this subpart, that portion continues in effect until the agreement or memorandum of understanding is revised under this subpart or terminated.

OPERATIONS CONDUCTED UNDER NOTICES

### § 3809.300 Does this subpart apply to my existing notice-level operations?

To see how this subpart applies to your operations conducted under a notice and existing on January 20, 2001, follow this table:

If BLM has received your complete notice before January 20, 2001—	Then—
(a) You are the operator identified in the notice on file with BLM on January 20, 2001.	You may conduct operations for 2 years after January 20, 2001 under the terms of your existing notice and the regulations in effect immediately before that date. (See 43 CFR parts 1000-end, revised as of Oct. 1, 1999.) After 2 years, you may extend your notice under § 3809.333. BLM may require a modification under § 3809.331(a)(1). See § 3809.503 for financial guarantee requirements applicable to notices.
(b) You are a new operator, that is, you were not the operator identified in the notice on file with BLM on January 20, 2001.	The provisions of this subpart, including § 3809.320, govern your operations for 2 years after January 20, 2001, unless you extend your notice under § 3809.333.

If BLM has received your complete notice before January 20, 2001—	Then—
(c) You later modify your notice .....	<p>(1) You may conduct operations on the original acreage for 2 years after January 20, 2001 under the terms of your existing notice and the regulations in effect immediately before that date (See 43 CFR parts 1000-end, revised as of Oct. 1, 2000.) After 2 years, you may extend your notice under § 3809.333. BLM may require a modification under § 3809.331(a)(1). See § 3809.503(b) for financial guarantee requirements applicable to notices.</p> <p>(2) Your operations on any additional acreage come under the provisions of this subpart, including §§ 3809.11 and 3809.21, and may require approval of a plan of operations before the additional surface disturbance may.</p>
(d) Your notice has expired .....	You may not conduct operations under an expired notice. You must promptly submit either a new notice under § 3809.301 or a plan of operations under § 3809.401, whichever is applicable, or immediately begin to reclaim your project area. See §§ 3809.11 and 3809.21.

**§ 3809.301 Where do I file my notice and what information must I include in it?**

(a) If you qualify under § 3809.21, you must file your notice with the local BLM office with jurisdiction over the lands involved. BLM does not require that the notice be on a particular form.

(b) To be complete, your notice must include the following information:

(1) *Operator Information.* The name, mailing address, phone number, taxpayer identification number of the operator(s), and the BLM serial number(s) of any unpatented mining claim(s) where the disturbance would occur. If the operator is a corporation, you must identify one individual as the point of contact;

(2) *Activity Description, Map, and Schedule of Activities.* A description of the proposed activity with a level of detail appropriate to the type, size, and location of the activity. The description must include the following:

(i) The measures that you will take to prevent unnecessary or undue degradation during operations;

(ii) A map showing the location of your project area in sufficient detail for BLM to be able to find it and the location of access routes you intend to use, improve, or construct;

(iii) A description of the type of equipment you intend to use; and

(iv) A schedule of activities, including the date when you expect to begin operations and the date you expect to complete reclamation;

(3) *Reclamation Plan.* A description of how you will complete reclamation to the standards described in § 3809.420; and

(4) *Reclamation cost estimate.* An estimate of the cost to fully reclaim your operations as required by § 3809.552.

(c) BLM may require you to provide additional information, if necessary to ensure that your operations will comply with this subpart.

**Bureau of Land Management, Interior**

**§ 3809.313**

(d) You must notify BLM in writing within 30 calendar days of any change of operator or corporate point of contact, or of the mailing address of the operator or corporate point of contact.

**§ 3809.311 What action does BLM take when it receives my notice?**

(a) Upon receipt of your notice, BLM will review it within 15 calendar days to see if it is complete under § 3809.301.

(b) If your notice is incomplete, BLM will inform you in writing of the additional information you must submit. BLM may also take the actions described in § 3809.313.

(c) BLM will review your additional information within 15 calendar days to ensure it is complete. BLM will repeat this process until your notice is complete, or until we determine that you may not conduct operations because of your inability to prevent unnecessary or undue degradation.

**§ 3809.312 When may I begin operations after filing a complete notice?**

(a) If BLM does not take any of the actions described in § 3908.313, you may

begin operations no sooner than 15 calendar days after the appropriate BLM office receives your complete notice. BLM may send you an acknowledgement that indicates the date we received your notice. If you don't receive an acknowledgement or have any doubt about the date we received your notice, contact the office to which you sent the notice. This subpart does not require BLM to approve your notice or inform you that your notice is complete.

(b) If BLM completes our review sooner than 15 calendar days after receiving your complete notice, we may notify you that you may begin operations.

(c) You must provide to BLM a financial guarantee that meets the requirements of this subpart before beginning operations.

(d) Your operations may be subject to BLM approval under part 3710, subpart 3715, of this title relating to use or occupancy of unpatented mining claims.

**§ 3809.313 Under what circumstances may I not begin operations 15 calendar days after filing my notice?**

To see when you may not begin operations 15 calendar days after filing your notice, follow this table:

If BLM reviews your notice and, within 15 calendar days—	Then—
(a) Notifies you that BLM needs additional time, not to exceed 15 calendar days, to complete its review.	You must not begin operations until the additional review time period ends.
(b) Notifies you that you must modify your notice to prevent unnecessary or undue degradation.	You must not begin operations until you modify your notice to ensure that your operations prevent unnecessary or undue degradation.
(c) Requires you to consult with BLM about the location of existing or proposed access routes.	You must not begin operations until you consult with BLM and satisfy BLM's concerns about access.

If BLM reviews your notice and, within 15 calendar days—	Then—
(d) Determines that an on-site visit is necessary.	You must not begin operations until BLM visits the site, and you satisfy any concerns arising from the visit. BLM will notify you if we will not conduct the site visit within 15 calendar days of determining that a visit is necessary, including the reason(s) for the delay.
(e) BLM determines you don't qualify under §3809.11 as a notice-level operation.	You must file a plan of operations before beginning operations. See §§3809.400 through 3809.420.

**§3809.320 Which performance standards apply to my notice-level operations?**

Your notice-level operations must meet all applicable performance standards of §3809.420.

**§3809.330 May I modify my notice?**

(a) Yes, you may submit a notice modification at any time during operations under a notice.

(b) BLM will review your notice modification the same way it reviewed your initial notice under §§3809.311 and 3809.313.

**§3809.331 Under what conditions must I modify my notice?**

(a) You must modify your notice—  
(1) If BLM requires you to do so to prevent unnecessary or undue degradation; or

(2) If you plan to make material changes to your operations. Material changes are changes that disturb areas not described in the existing notice; change your reclamation plan; or result in impacts of a different kind, degree, or extent than those described in the existing notice.

(b) You must submit your notice modification 15 calendar days before making any material changes. If BLM determines your notice modification is complete before the 15-day period has elapsed, BLM may notify you to proceed. When BLM requires you to modify your notice, we may also notify you to proceed before the 15-day period has elapsed to prevent unnecessary or undue degradation.

**§3809.332 How long does my notice remain in effect?**

If you filed your complete notice on or after January 20, 2001, it remains in effect for 2 years, unless extended under §3809.333, or unless you notify BLM beforehand that operations have ceased and reclamation is complete. BLM will conduct an inspection to verify whether you have met your obligations, will notify you promptly in writing, and terminate your notice, if appropriate.

**§3809.333 May I extend my notice, and, if so, how?**

Yes, if you wish to conduct operations for 2 additional years after the expiration date of your notice, you must notify BLM in writing on or before the expiration date and meet the financial guarantee requirements of §3809.503. You may extend your notice more than once.

**§3809.334 What if I temporarily stop conducting operations under a notice?**

(a) If you stop conducting operations for any period of time, you must—

(1) Maintain public lands within the project area, including structures, in a safe and clean condition;

(2) Take all steps necessary to prevent unnecessary or undue degradation; and

(3) Maintain an adequate financial guarantee.

(b) If the period of non-operation is likely to cause unnecessary or undue degradation, BLM, in writing, will—

## Bureau of Land Management, Interior

## § 3809.401

(1) Require you to take all steps necessary to prevent unnecessary or undue degradation; and

(2) Require you, after an extended period of non-operation for other than seasonal operations, to remove all structures, equipment, and other facilities and reclaim the project area.

### **§ 3809.335 What happens when my notice expires?**

(a) When your notice expires, you must—

(1) Cease operations, except reclamation; and

(2) Complete reclamation promptly according to your notice.

(b) Your reclamation obligations continue beyond the expiration or any termination of your notice until you satisfy them.

### **§ 3809.336 What if I abandon my notice-level operations?**

(a) BLM may consider your operations to be abandoned if, for example, you leave inoperable or non-mining related equipment in the project area, remove equipment and facilities from the project area other than for purposes of completing reclamation according to your reclamation plan, do not maintain the project area, discharge local workers, or there is no sign of activity in the project area over time.

(b) If BLM determines that you abandoned your operations without completing reclamation, BLM may initiate forfeiture under § 3809.595. If the amount of the financial guarantee is inadequate to cover the cost of reclamation, BLM may complete the reclamation, and the operator and all other responsible persons are liable for the cost of reclamation.

#### OPERATIONS CONDUCTED UNDER PLANS OF OPERATIONS

### **§ 3809.400 Does this subpart apply to my existing or pending plan of operations?**

(a) You may continue to operate under the terms and conditions of a plan of operations that BLM approved before January 20, 2001. All provisions of this subpart except plan content (§ 3809.401) and performance standards (§§ 3809.415 and 3809.420) apply to such plan of operations. See § 3809.505 for the

applicability of financial guarantee requirements.

(b) If your unapproved plan of operations is pending on January 20, 2001, then the plan content requirements and performance standards that were in effect immediately before that date apply to your pending plan of operations. (See 43 CFR parts 1000–end, revised as of Oct. 1, 1999.) All other provisions of this subpart apply.

(c) If you want this subpart to apply to any existing or pending plan of operations, where not otherwise required, you may choose to have this subpart apply.

### **§ 3809.401 Where do I file my plan of operations and what information must I include with it?**

(a) If you are required to file a plan of operations under § 3809.11, you must file it with the local BLM field office with jurisdiction over the lands involved. BLM does not require that the plan be on a particular form. Your plan of operations must demonstrate that the proposed operations would not result in unnecessary or undue degradation of public lands.

(b) Your plan of operations must contain the following information and describe the proposed operations at a level of detail sufficient for BLM to determine that the plan of operations prevents unnecessary or undue degradation:

(1) *Operator Information.* The name, mailing address, phone number, taxpayer identification number of the operator(s), and the BLM serial number(s) of any unpatented mining claim(s) where disturbance would occur. If the operator is a corporation, you must identify one individual as the point of contact. You must notify BLM in writing within 30 calendar days of any change of operator or corporate point of contact or in the mailing address of the operator or corporate point of contact;

(2) *Description of Operations.* A description of the equipment, devices, or practices you propose to use during operations including, where applicable—

(i) Maps of the project area at an appropriate scale showing the location of exploration activities, drill sites, mining activities, processing facilities,

waste rock and tailing disposal areas, support facilities, structures, buildings, and access routes;

(ii) Preliminary or conceptual designs, cross sections, and operating plans for mining areas, processing facilities, and waste rock and tailing disposal facilities;

(iii) Water management plans;

(iv) Rock characterization and handling plans;

(v) Quality assurance plans;

(vi) Spill contingency plans;

(vii) A general schedule of operations from start through closure; and

(viii) Plans for all access roads, water supply pipelines, and power or utility services;

(3) *Reclamation Plan.* A plan for reclamation to meet the standards in § 3809.420, with a description of the equipment, devices, or practices you propose to use including, where applicable, plans for—

(i) Drill-hole plugging;

(ii) Regrading and reshaping;

(iii) Mine reclamation, including information on the feasibility of pit backfilling that details economic, environmental, and safety factors;

(iv) Riparian mitigation;

(v) Wildlife habitat rehabilitation;

(vi) Topsoil handling;

(vii) Revegetation;

(viii) Isolation and control of acid-forming, toxic, or deleterious materials;

(ix) Removal or stabilization of buildings, structures and support facilities; and

(x) Post-closure management;

(4) *Monitoring Plan.* A proposed plan for monitoring the effect of your operations. You must design monitoring plans to meet the following objectives: To demonstrate compliance with the approved plan of operations and other Federal or State environmental laws and regulations, to provide early detection of potential problems, and to supply information that will assist in directing corrective actions should they become necessary. Where applicable, you must include in monitoring plans details on type and location of monitoring devices, sampling parameters and frequency, analytical methods, reporting procedures, and procedures to respond to adverse monitoring results.

Monitoring plans may incorporate existing State or other Federal monitoring requirements to avoid duplication. Examples of monitoring programs which may be necessary include surface- and ground-water quality and quantity, air quality, revegetation, stability, noise levels, and wildlife mortality; and

(5) *Interim management plan.* A plan to manage the project area during periods of temporary closure (including periods of seasonal closure) to prevent unnecessary or undue degradation. The interim management plan must include, where applicable, the following:

(i) Measures to stabilize excavations and workings;

(ii) Measures to isolate or control toxic or deleterious materials (See also the requirements in § 3809.420(c)(12)(vii).);

(iii) Provisions for the storage or removal of equipment, supplies and structures;

(iv) Measures to maintain the project area in a safe and clean condition;

(v) Plans for monitoring site conditions during periods of non-operation; and

(vi) A schedule of anticipated periods of temporary closure during which you would implement the interim management plan, including provisions for notifying BLM of unplanned or extended temporary closures.

(c) In addition to the requirements of paragraph (b) of this section, BLM may require you to supply—

(1) Operational and baseline environmental information for BLM to analyze potential environmental impacts as required by the National Environmental Policy Act and to determine if your plan of operations will prevent unnecessary or undue degradation. This could include information on public and non-public lands needed to characterize the geology, paleontological resources, cave resources, hydrology, soils, vegetation, wildlife, air quality, cultural resources, and socioeconomic conditions in and around the project area, as well as information that may require you to conduct static and kinetic testing to characterize the potential for your operations to produce acid drainage or other leachate. BLM is available to advise you on the exact

type of information and level of detail needed to meet these requirements; and

(2) Other information, if necessary to ensure that your operations will comply with this subpart.

(d) *Reclamation cost estimate.* At a time specified by BLM, you must submit an estimate of the cost to fully reclaim your operations as required by § 3809.552. BLM will review your reclamation cost estimate and notify you of any deficiencies or additional information that must be submitted in order to determine a final reclamation cost. BLM will notify you when we have determined the final amount for which you must provide financial assurance.

[65 FR 70112, Nov. 21, 2000, as amended at 66 FR 54860, Oct. 30, 2001]

**§ 3809.411 What action will BLM take when it receives my plan of operations?**

(a) BLM will review your plan of operations within 30 calendar days and will notify you that—

(1) Your plan of operations is complete, that is, it meets the content requirements of § 3809.401(b);

(2) Your plan does not contain a complete description of the proposed operations under § 3809.401(b). BLM will identify deficiencies that you must address before BLM can continue processing your plan of operations. If necessary, BLM may repeat this process until your plan of operations is complete; or

(3) The description of the proposed operations is complete, but BLM cannot approve the plan until certain additional steps are completed, including one or more of the following:

(i) You collect adequate baseline data;

(ii) BLM completes the environmental review required under the National Environmental Policy Act;

(iii) BLM completes any consultation required under the National Historic Preservation Act, the Endangered Species Act, or the Magnuson-Stevens Fishery Conservation and Management Act;

(iv) BLM or the Department of the Interior completes other Federal re-

sponsibilities, such as Native American consultation;

(v) BLM conducts an on-site visit;

(vi) BLM completes review of public comments on the plan of operations;

(vii) For public lands where BLM does not have responsibility for managing the surface, BLM consults with the surface-managing agency;

(viii) In cases where the surface is owned by a non-Federal entity, BLM consults with the surface owner; and

(ix) BLM completes consultation with the State to ensure your operations will be consistent with State water quality requirements.

(b) Pending final approval of your plan of operations, BLM may approve any operations that may be necessary for timely compliance with requirements of Federal and State laws, subject to any terms and conditions that may be needed to prevent unnecessary or undue degradation.

(c) Following receipt of your complete plan of operations and before BLM acts on it, we will publish a notice of the availability of the plan in either a local newspaper of general circulation or a NEPA document and will accept public comment for at least 30 calendar days on your plan of operations.

(d) Upon completion of the review of your plan of operations, including analysis under NEPA and public comment, BLM will notify you that—

(1) BLM approves your plan of operations as submitted (See part 3810, subpart 3814 of this title for specific plan-related requirements applicable to operations on Stock Raising Homestead Act lands.);

(2) BLM approves your plan of operations subject to changes or conditions that are necessary to meet the performance standards of § 3809.420 and to prevent unnecessary or undue degradation. BLM may require you to incorporate into your plan of operations other agency permits, final approved engineering designs and plans, or other conditions of approval from the review of the plan of operations filed under § 3809.401(b); or

(3) BLM disapproves, or is withholding approval of your plan of operations because the plan:

## § 3809.412

## 43 CFR Ch. II (10–1–08 Edition)

(i) Does not meet the applicable content requirements of § 3809.401;

(ii) Proposes operations that are in an area segregated or withdrawn from the operation of the mining laws, unless the requirements of § 3809.100 are met; or

(iii) Proposes operations that would result in unnecessary or undue degradation of public lands.

[65 FR 70112, Nov. 21, 2000, as amended at 66 FR 54860, Oct. 30, 2001]

### **§ 3809.412 When may I operate under a plan of operations?**

You must not begin operations until BLM approves your plan of operations and you provide the financial guarantee required under § 3809.551.

### **§ 3809.415 How do I prevent unnecessary or undue degradation while conducting operations on public lands?**

You prevent unnecessary or undue degradation while conducting operations on public lands by—

(a) Complying with § 3809.420, as applicable; the terms and conditions of your notice or approved plan of operations; and other Federal and State laws related to environmental protection and protection of cultural resources;

(b) Assuring that your operations are “reasonably incident” to prospecting, mining, or processing operations and uses as defined in § 3715.0–5 of this title; and

(c) Attaining the stated level of protection or reclamation required by specific laws in areas such as the California Desert Conservation Area, Wild and Scenic Rivers, BLM-administered portions of the National Wilderness System, and BLM-administered National Monuments and National Conservation Areas.

[65 FR 70112, Nov. 21, 2000, as amended at 66 FR 54861, Oct. 30, 2001]

### **§ 3809.420 What performance standards apply to my notice or plan of operations?**

The following performance standards apply to your notice or plan of operations:

(a) *General performance standards*—(1) *Technology and practices*. You must use

equipment, devices, and practices that will meet the performance standards of this subpart.

(2) *Sequence of operations*. You must avoid unnecessary impacts and facilitate reclamation by following a reasonable and customary mineral exploration, development, mining and reclamation sequence.

(3) *Land-use plans*. Consistent with the mining laws, your operations and post-mining land use must comply with the applicable BLM land-use plans and activity plans, and with coastal zone management plans under 16 U.S.C. 1451, as appropriate.

(4) *Mitigation*. You must take mitigation measures specified by BLM to protect public lands.

(5) *Concurrent reclamation*. You must initiate and complete reclamation at the earliest economically and technically feasible time on those portions of the disturbed area that you will not disturb further.

(6) *Compliance with other laws*. You must conduct all operations in a manner that complies with all pertinent Federal and state laws.

(b) *Specific standards*—(1) *Access routes*. Access routes shall be planned for only the minimum width needed for operations and shall follow natural contours, where practicable to minimize cut and fill. When the construction of access routes involves slopes that require cuts on the inside edge in excess of 3 feet, the operator may be required to consult with the authorized officer concerning the most appropriate location of the access route prior to commencing operations. An operator is entitled to access to his operations consistent with provisions of the mining laws. Where a notice or a plan of operations is required, it shall specify the location of access routes for operations and other conditions necessary to prevent unnecessary or undue degradation. The authorized officer may require the operator to use existing roads to minimize the number of access routes, and, if practicable, to construct access roads within a designated transportation or utility corridor. When commercial hauling is involved and the use of an existing road is required, the authorized officer may

require the operator to make appropriate arrangements for use and maintenance.

(2) *Mining wastes.* All tailings, dumps, deleterious materials or substances, and other waste produced by the operations shall be disposed of so as to prevent unnecessary or undue degradation and in accordance with applicable Federal and state Laws.

(3) *Reclamation.* (i) At the earliest feasible time, the operator shall reclaim the area disturbed, except to the extent necessary to preserve evidence of mineralization, by taking reasonable measures to prevent or control on-site and off-site damage of the Federal lands.

(ii) Reclamation shall include, but shall not be limited to:

(A) Saving of topsoil for final application after reshaping of disturbed areas have been completed;

(B) Measures to control erosion, landslides, and water runoff;

(C) Measures to isolate, remove, or control toxic materials;

(D) Reshaping the area disturbed, application of the topsoil, and revegetation of disturbed areas, where reasonably practicable; and

(E) Rehabilitation of fisheries and wildlife habitat.

(iii) When reclamation of the disturbed area has been completed, except to the extent necessary to preserve evidence of mineralization, the authorized officer shall be notified so that an inspection of the area can be made.

(4) *Air quality.* All operators shall comply with applicable Federal and state air quality standards, including the Clean Air Act (42 U.S.C. 1857 *et seq.*).

(5) *Water quality.* All operators shall comply with applicable Federal and state water quality standards, including the Federal Water Pollution Control Act, as amended (30 U.S.C. 1151 *et seq.*).

(6) *Solid wastes.* All operators shall comply with applicable Federal and state standards for the disposal and treatment of solid wastes, including regulations issued pursuant to the Solid Waste Disposal Act as amended by the Resource Conservation and Recovery Act (42 U.S.C. 6901 *et seq.*). All garbage, refuse or waste shall either be removed from the affected lands or dis-

posed of or treated to minimize, so far as is practicable, its impact on the lands.

(7) *Fisheries, wildlife and plant habitat.* The operator shall take such action as may be needed to prevent adverse impacts to threatened or endangered species, and their habitat which may be affected by operations.

(8) *Cultural and paleontological resources.* (i) Operators shall not knowingly disturb, alter, injure, or destroy any scientifically important paleontological remains or any historical or archaeological site, structure, building or object on Federal lands.

(ii) Operators shall immediately bring to the attention of the authorized officer any cultural and/or paleontological resources that might be altered or destroyed on Federal lands by his/her operations, and shall leave such discovery intact until told to proceed by the authorized officer. The authorized officer shall evaluate the discoveries brought to his/her attention, take action to protect or remove the resource, and allow operations to proceed within 10 working days after notification to the authorized officer of such discovery.

(iii) The Federal Government shall have the responsibility and bear the cost of investigations and salvage of cultural and paleontology values discovered after a plan of operations has been approved, or where a plan is not involved.

(9) *Protection of survey monuments.* To the extent practicable, all operators shall protect all survey monuments, witness corners, reference monuments, bearing trees and line trees against unnecessary or undue destruction, obliteration or damage. If, in the course of operations, any monuments, corners, or accessories are destroyed, obliterated, or damaged by such operations, the operator shall immediately report the matter to the authorized officer. The authorized officer shall prescribe, in writing, the requirements for the restoration or reestablishment of monuments, corners, bearing and line trees.

(10) *Fire.* The operator shall comply with all applicable Federal and state fire laws and regulations, and shall

take all reasonable measures to prevent and suppress fires in the area of operations.

(11) *Acid-forming, toxic, or other deleterious materials.* You must incorporate identification, handling, and placement of potentially acid-forming, toxic or other deleterious materials into your operations, facility design, reclamation, and environmental monitoring programs to minimize the formation and impacts of acidic, alkaline, metal-bearing, or other deleterious leachate, including the following:

(i) You must handle, place, or treat potentially acid-forming, toxic, or other deleterious materials in a manner that minimizes the likelihood of acid formation and toxic and other deleterious leachate generation (source control);

(ii) If you cannot prevent the formation of acid, toxic, or other deleterious drainage, you must minimize uncontrolled migration of leachate; and

(iii) You must capture and treat acid drainage, or other undesirable effluent, to the applicable standard if source controls and migration controls do not prove effective. You are responsible for any costs associated with water treatment or facility maintenance after project closure. Long-term, or post-mining, effluent capture and treatment are not acceptable substitutes for source and migration control, and you may rely on them only after all reasonable source and migration control methods have been employed.

(12) *Leaching operations and impoundments.* (i) You must design, construct, and operate all leach pads, tailings impoundments, ponds, and solution-holding facilities according to standard engineering practices to achieve and maintain stability and facilitate reclamation.

(ii) You must construct a low-permeability liner or containment system that will minimize the release of leaching solutions to the environment. You must monitor to detect potential releases of contaminants from heaps, process ponds, tailings impoundments, and other structures and remediate environmental impacts if leakage occurs.

(iii) You must design, construct, and operate cyanide or other leaching facilities and impoundments to contain

precipitation from the local 100-year, 24-hour storm event in addition to the maximum process solution inventory. Your design must also include allowances for snowmelt events and draindown from heaps during power outages in the design.

(iv) You must construct a secondary containment system around vats, tanks, or recovery circuits adequate to prevent the release of toxic solutions to the environment in the event of primary containment failure.

(v) You must exclude access by the public, wildlife, or livestock to solution containment and transfer structures that contain lethal levels of cyanide or other solutions.

(vi) During closure and at final reclamation, you must detoxify leaching solutions and heaps and manage tailings or other process waste to minimize impacts to the environment from contact with toxic materials or leachate. Acceptable practices to detoxify solutions and materials include natural degradation, rinsing, chemical treatment, or equally successful alternative methods. Upon completion of reclamation, all materials and discharges must meet applicable standards.

(vii) In cases of temporary or seasonal closure, you must provide adequate maintenance, monitoring, security, and financial guarantee, and BLM may require you to detoxify process solutions.

(13) *Maintenance and public safety.* During all operations, the operator shall maintain his or her structures, equipment, and other facilities in a safe and orderly manner. Hazardous sites or conditions resulting from operations shall be marked by signs, fenced, or otherwise identified to alert the public in accordance with applicable Federal and state laws and regulations.

[66 FR 54861, Oct. 30, 2001]

**§ 3809.421 Enforcement of performance standards.**

Failure of the operator to prevent unnecessary or undue degradation or to complete reclamation to the standards described in this subpart may cause the operator to be subject to enforcement

**Bureau of Land Management, Interior**

**§ 3809.424**

as described in §§ 3809.600 through 3809.605 of this subpart.

[66 FR 54862, Oct. 30, 2001]

**§ 3809.423 How long does my plan of operations remain in effect?**

Your plan of operations remains in effect as long as you are conducting operations, unless BLM suspends or revokes your plan of operations for failure to comply with this subpart.

**§ 3809.424 What are my obligations if I stop conducting operations?**

(a) To see what you must do if you stop conducting operations, follow this table:

If—	Then—
(1) You stop conducting operations for any period of time.	(i) You must follow your approved interim management plan submitted under § 3809.401(b)(5); (ii) You must submit a modification to your interim management plan to BLM within 30 calendar days if it does not cover the circumstances of your temporary closure per § 3809.431(a); (iii) You must take all necessary actions to assure that unnecessary or undue degradation does not occur; and (iv) You must maintain an adequate financial guarantee.
(2) The period of non-operation is likely to cause unnecessary or undue degradation.	The BLM will require you to take all necessary actions to assure that unnecessary or undue degradation does not occur, including requiring you, after an extended period of non-operation for other than seasonal operations, to remove all structures, equipment, and other facilities and reclaim the project area.
(3) Your operations are inactive for 5 consecutive years.	BLM will review your operations and determine whether BLM should terminate your plan of operations and direct final reclamation and closure.
(4) BLM determines that you abandoned your operations.	BLM may initiate forfeiture under § 3809.595. If the amount of the financial guarantee is inadequate to cover the costs of reclamation, BLM may complete the reclamation, and the operator and all other responsible persons are liable for the costs of such reclamation. See § 3809.336(a) for indicators of abandonment.

**§ 3809.430**

**43 CFR Ch. II (10–1–08 Edition)**

(b) Your reclamation and closure obligations continue until satisfied.

**MODIFICATIONS OF PLANS OF OPERATIONS**

**§ 3809.430 May I modify my plan of operations?**

Yes, you may request a modification of the plan at any time during operations under an approved plan of operations.

**§ 3809.431 When must I modify my plan of operations?**

You must modify your plan of operations when any of the following apply:

- (a) Before making any changes to the operations described in your approved plan of operations;
- (b) When BLM requires you to do so to prevent unnecessary or undue degradation; and
- (c) Before final closure, to address impacts from unanticipated events or conditions or newly discovered circumstances or information, including the following:

- (1) Development of acid or toxic drainage;
- (2) Loss of surface springs or water supplies;
- (3) The need for long-term water treatment and site maintenance;
- (4) Repair of reclamation failures;
- (5) Plans for assuring the adequacy of containment structures and the integrity of closed waste units;
- (6) Providing for post-closure management; and (7) Eliminating hazards to public safety.

**§ 3809.432 What process will BLM follow in reviewing a modification of my plan of operations?**

- (a) BLM will review and approve a modification of your plan of operations in the same manner as it reviewed and approved your initial plan under §§ 3809.401 through 3809.420; or
- (b) BLM will accept a minor modification without formal approval if it is consistent with the approved plan of operations and does not constitute a substantive change that requires additional analysis under the National Environmental Policy Act.

**§ 3809.433 Does this subpart apply to a new modification of my plan of operations?**

To see how this subpart applies to a modification of your plan of operations that you submit to BLM after January 20, 2001, refer to the following table.

If you have an approved plan of operations on January 20, 2001	Then—
(a) <i>New facility.</i> You subsequently propose to modify your plan of operations by constructing a new facility, such as waste rock repository, leach pad, impoundment, drill site, or road.	The plan contents requirements (§ 3809.401) and performance standards (§ 3809.420) of this subpart apply to the new facility. Those facilities and areas not included in the modification may continue to operate under the terms of your existing plan of operations.

**Bureau of Land Management, Interior**

**§ 3809.500**

If you have an approved plan of operations on January 20, 2001	Then—
(b) <i>Existing facility.</i> You subsequently propose to modify your plan of operations by modifying an existing facility, such as expansion of a waste rock repository, leach pad, or impoundment; layback of a mine pit; or widening of a road.	The plan contents requirements (§3809.401) and performance standards (§3809.420) of this subpart apply to the modified portion of the facility, unless you demonstrate to BLM's satisfaction it is not practical to apply them for economic environmental, safety, or technical reasons. If you make the demonstration, the plan content requirements (43 CFR 3809.1-5) and performance standards (43 CFR 3809.1-3(d) and 3809.2-2) that were in effect immediately before January 20, 2001 apply to your modified facility. (See 43 CFR parts 1000-end, revised as of Oct. 1, 2000.)

**§ 3809.434 How does this subpart apply to pending modifications for new or existing facilities?**

(a) This subpart applies to modifications pending before BLM on January 20, 2001 to construct a new facility, such as a waste rock repository, leach pad, drill site, or access road; or to modify an existing mine facility such as expansion of a waste rock repository or leach pad.

(b) All provisions of this subpart, except plan content (§3809.401) and performance standards (§§3809.415 and 3809.420) apply to any modification of a plan of operations that was pending on January 20, 2001. See §3809.505 for appli-

cability of financial guarantee requirements.

(c) If your unapproved modification of a plan of operations is pending on January 20, 2001, then the plan content requirements (§3809.1-5) and the performance standards (§§3809.1-3(d) and 3809.2-2) that were in effect immediately before January 20, 2001 apply to your modification of a plan of operations. (See 43 CFR parts 1000-end, revised as of Oct. 1, 2000).

(d) If you want this subpart to apply to your pending modification of a plan of operations, where not otherwise required, you may choose to have this subpart apply.

**FINANCIAL GUARANTEE REQUIREMENTS—GENERAL**

**§ 3809.500 In general, what are BLM's financial guarantee requirements?**

To see generally what BLM's financial guarantee requirements are, follow this table:

If—	Then—
(a) Your operations constitute casual use,.	You do not have to provide any financial guarantee.

If—	Then—
(b) You conduct operations under a notice or a plan of operations.	You must provide BLM or the State a financial guarantee that meets the requirements of this subpart before starting operations. For more information, see §§ 3809.551 through 3809.573.

**§ 3809.503 When must I provide a financial guarantee for my notice-level operations?**

To see how this subpart applies to your notice, follow this table:

If—	Then—
(a) Your notice was on file with BLM on January 20, 2001.	You do not need to provide a financial guarantee unless you modify the notice or extend the notice under § 3809.333.
(b) Your notice was on file with BLM before January 20, 2001 and you choose to modify your notice as required by this subpart on or after that date.	You must provide a financial guarantee before you can begin operations under the modified notice. If you modify your notice, you must post a financial guarantee for the entire notice.
(c) You file a new notice on or after January 20, 2001.	You must provide a financial guarantee before you can begin operations under the notice.

**§ 3809.505 How do the financial guarantee requirements of this subpart apply to my existing plan of operations?**

For each plan of operations approved before January 20, 2001, for which you or your predecessor in interest posted a financial guarantee under the regulations in force before that date, you must post a financial guarantee according to the requirements of this subpart no later than November 20,

2001, at the local BLM office with jurisdiction over the lands involved. You do not need to post a new financial guarantee if your existing financial guarantee satisfies this subpart. If you are conducting operations under a plan of operations approved before January 20, 2001, but you have not provided a financial guarantee, you must post a financial guarantee under § 3809.551 by September 13, 2001.

[66 FR 32575, June 15, 2001]

**§ 3809.551 What are my choices for providing BLM with a financial guarantee?**

You must provide BLM with a financial guarantee using any of the 3 options in the following table:

If—	Then—
(a) You have only one notice or plan of operations, or wish to provide a financial guarantee for a single notice or plan of operations.	You may provide an individual financial guarantee that covers only the cost of reclaiming areas disturbed under the single notice or plan of operations. See §§ 3809.552 through 3809.556 for more information.
(b) You are currently operating under more than one notice or plan of operations.	You may provide a blanket financial guarantee covering statewide or nationwide operations. See § 3809.560 for more information.
(c) You do not choose one of the options in paragraphs (a) and (b) of this section.	You may provide evidence of an existing financial guarantee under State law or regulations. See §§ 3809.570 through 3809.573 for more information.

## INDIVIDUAL FINANCIAL GUARANTEE

**§ 3809.552 What must my individual financial guarantee cover?**

(a) If you conduct operations under a notice or a plan of operations and you provide an individual financial guarantee, it must cover the estimated cost as if BLM were to contract with a third party to reclaim your operations according to the reclamation plan, including construction and maintenance costs for any treatment facilities necessary to meet Federal and State environmental standards. The financial guarantee must also cover any interim stabilization and infrastructure maintenance costs needed to maintain the area of operations in compliance with applicable environmental requirements while third-party contracts are developed and executed.

(b) BLM will periodically review the estimated cost of reclamation and the adequacy of any funding mechanism established under paragraph (c) of this section and require increased coverage, if necessary.

(c) When BLM identifies a need for it, you must establish a trust fund or other funding mechanism available to BLM to ensure the continuation of long-term treatment to achieve water quality standards and for other long term, post-mining maintenance requirements. The funding must be adequate to provide for construction, long-

term operation, maintenance, or replacement of any treatment facilities and infrastructure, for as long as the treatment and facilities are needed after mine closure. BLM may identify the need for a trust fund or other funding mechanism during plan review or later.

**§ 3809.553 May I post a financial guarantee for a part of my operations?**

(a) Yes, BLM may authorize you to provide a financial guarantee covering a part of your operations if—

(1) Your operations do not go beyond what is specifically covered by the partial financial guarantee; and

(2) The partial financial guarantee covers all reclamation costs within the incremental area of operations.

(b) BLM will review the amount and terms of the financial guarantee for each increment of your operations at least annually.

**§ 3809.554 How do I estimate the cost to reclaim my operations?**

(a) You must estimate the cost to reclaim your operations as if BLM were hiring a third-party contractor to perform reclamation of your operations after you have vacated the project area. Your estimate must include BLM's cost to administer the reclamation contract. Contact BLM to obtain this administrative cost information.

## § 3809.555

(b) Your estimate of the cost to reclaim your operations must be acceptable to BLM.

### **§ 3809.555 What forms of individual financial guarantee are acceptable to BLM?**

You may use any of the following instruments for an individual financial guarantee, provided that the BLM State Director has determined that it is an acceptable financial instrument within the State where the operations are proposed:

(a) Surety bonds that meet the requirements of Treasury Department Circular 570, including surety bonds arranged or paid for by third parties;

(b) Cash in an amount equal to the required dollar amount of the financial guarantee, to be deposited and maintained in a Federal depository account of the United States Treasury by BLM;

(c) Irrevocable letters of credit from a bank or financial institution organized or authorized to transact business in the United States;

(d) Certificates of deposit or savings accounts not in excess of the maximum insurable amount as set by the Federal Deposit Insurance Corporation; and

(e) Either of the following instruments having a market value of not less than the required dollar amount of the financial guarantee and maintained in a Securities Investors Protection Corporation insured trust account by a licensed securities brokerage firm for the benefit of the Secretary of the Interior, acting by and through BLM:

(1) Negotiable United States Government, State and Municipal securities or bonds; or

(2) Investment-grade rated securities having a Standard and Poor's rating of AAA or AA or an equivalent rating from a nationally recognized securities rating service.

(f) Insurance, if its form and function is such that the funding or enforceable pledges of funding are used to guarantee performance of regulatory obligations in the event of default on such obligations by the operator. Insurance must have an A.M. Best rating of "superior" or an equivalent rating from a nationally recognized insurance rating service.

## 43 CFR Ch. II (10–1–08 Edition)

### **§ 3809.556 What special requirements apply to financial guarantees described in § 3809.555(e)?**

(a) If you choose to use the instruments permitted under § 3809.555(e) in satisfaction of financial guarantee requirements, you must provide BLM, before you begin operations and by the end of each calendar year thereafter, a certified statement describing the nature and market value of the instruments maintained in that account, and including any current statements or reports furnished by the brokerage firm to the operator or mining claimant concerning the asset value of the account.

(b) You must review the market value of the account instruments by December 31 of each year to ensure that their market value continues to be not less than the required dollar amount of the financial guarantee. When the market value of the account instruments has declined by more than 10 percent of the required dollar amount of the financial guarantee, you must, within 10 calendar days after its annual review or at any time upon the written request of BLM, provide additional instruments, as defined in § 3809.555(e), to the trust account so that the total market value of all account instruments is not less than the required dollar amount of the financial guarantee. You must send a certified statement to BLM within 45 calendar days thereafter describing your actions to raise the market value of its account instruments to the required dollar amount of the financial guarantee. You must include copies of any statements or reports furnished by the brokerage firm to you documenting such an increase.

(c) If your review under paragraph (b) of this section demonstrates that the total market value of trust account instruments exceeds 110 percent of the required dollar amount of the financial guarantee, you may ask BLM to authorize a written release of that portion of the account that exceeds 110 percent of the required financial guarantee. BLM will approve your request only if you are in compliance with the terms and conditions of your notice or approved plan of operations.

## Bureau of Land Management, Interior

## § 3809.574

### BLANKET FINANCIAL GUARANTEE

#### **§ 3809.560 Under what circumstances may I provide a blanket financial guarantee?**

(a) If you have more than one notice- or plan-level operation underway, you may provide a blanket financial guarantee covering statewide or nationwide operations instead of individual financial guarantees for each operation.

(b) BLM will accept a blanket financial guarantee if we determine that its terms and conditions are sufficient to comply with the regulations of this subpart.

### STATE-APPROVED FINANCIAL GUARANTEE

#### **§ 3809.570 Under what circumstances may I provide a State-approved financial guarantee?**

When you provide evidence of an existing financial guarantee under State law or regulations that covers your operations, you are not required to provide a separate financial guarantee under this subpart if—

(a) The existing financial guarantee is redeemable by the Secretary, acting by and through BLM;

(b) It is held or approved by a State agency for the same operations covered by your notice(s) or plan(s) of operations; and

(c) It provides at least the same amount of financial guarantee as required by this subpart.

#### **§ 3809.571 What forms of State-approved financial guarantee are acceptable to BLM?**

You may provide a State-approved financial guarantee in any of the following forms, subject to the conditions in §§ 3809.570 and 3809.574:

(a) The kinds of individual financial guarantees specified under § 3809.555;

(b) Participation in a State bond pool, if—

(1) The State agrees that, upon BLM's request, the State will use part of the pool to meet reclamation obligations on public lands; and

(2) The BLM State Director determines that the State bond pool provides the equivalent level of protection as that required by this subpart; or

(c) A corporate guarantee that existed on January 20, 2001, subject to the restrictions on corporate guarantees in § 3809.574.

#### **§ 3809.572 What happens if BLM rejects a financial instrument in my State-approved financial guarantee?**

If BLM rejects a submitted financial instrument in an existing State-approved financial guarantee, BLM will notify you and the State in writing, with a complete explanation of the reasons for the rejection within 30 calendar days of BLM's receipt of the evidence of State-approved financial guarantee. You must provide BLM with a financial guarantee acceptable under this subpart at least equal to the amount of the rejected financial instrument.

#### **§ 3809.573 What happens if the State makes a demand against my financial guarantee?**

When the State makes a demand against your financial guarantee, thereby reducing the available balance, you must do both of the following:

(a) Notify BLM within 15 calendar days; and

(b) Replace or augment the financial guarantee within 30 calendar days if the available balance is insufficient to cover the remaining reclamation cost.

#### **§ 3809.574 What happens if I have an existing corporate guarantee?**

(a) If you have an existing corporate guarantee on January 20, 2001 that applies to public lands under an approved BLM and State agreement, your corporate guarantee will continue in effect. BLM will not accept any new corporate guarantees or increases to existing corporate guarantees. You may not transfer your existing corporate guarantee to another operator.

(b) If the State revises existing corporate guarantee criteria or requirements that apply to a corporate guarantee existing on January 20, 2001, the BLM State Director will review the revisions to ensure that adequate financial coverage continues. If the BLM State Director determines it is in the

## **§ 3809.580**

public interest to do so, the State Director may terminate a revised corporate guarantee and require an acceptable replacement financial guarantee after due notice and a reasonable time to obtain a replacement.

### **MODIFICATION OR REPLACEMENT OF A FINANCIAL GUARANTEE**

#### **§ 3809.580 What happens if I modify my notice or approved plan of operations?**

(a) If you modify a notice or an approved plan of operations under § 3809.331 or § 3809.431 respectively, and your estimated reclamation cost increases, you must increase the amount of the financial guarantee to cover any estimated additional cost of reclamation and long-term treatment in compliance with § 3809.552.

(b) If you modify a notice or an approved plan of operations under § 3809.331 or § 3809.431 respectively, and your estimated reclamation cost decreases, you may request BLM decrease the amount of the financial guarantee for your operations.

#### **§ 3809.581 Will BLM accept a replacement financial instrument?**

(a) Yes, if you or a new operator have an approved financial guarantee, you may request BLM to accept a replacement financial instrument at any time after the approval of an initial instrument. BLM will review the offered instrument for adequacy and may reject any offered instrument, but will do so by a decision in writing, with a complete explanation of the reasons for the rejection, within 30 calendar days of the offering.

(b) A surety is not released from an obligation that accrued while the surety bond was in effect unless the replacement financial guarantee covers such obligations to BLM's satisfaction.

#### **§ 3809.582 How long must I maintain my financial guarantee?**

You must maintain your financial guarantee until you or a new operator replace it with another adequate financial guarantee, subject to BLM's written concurrence, or until BLM releases the requirement to maintain your financial guarantee after you have completed reclamation of your operation

## **43 CFR Ch. II (10–1–08 Edition)**

according to the requirements of § 3809.320 (for notices), including any measures identified as the result of consultation with BLM under § 3809.313, or § 3809.420 (for plans of operations).

### **RELEASE OF FINANCIAL GUARANTEE**

#### **§ 3809.590 When will BLM release or reduce the financial guarantee for my notice or plan of operations?**

(a) When you (the mining claimant or operator) have completed all or any portion of the reclamation of your operations in accordance with your notice or approved plan of operations, you may notify BLM that the reclamation has occurred and request a reduction in the financial guarantee or BLM approval of the adequacy of the reclamation, or both.

(b) BLM will then promptly inspect the reclaimed area. We encourage you to accompany the BLM inspector.

(c) For your plan of operations, BLM will either post in the local BLM office or publish notice of final financial guarantee release in a local newspaper of general circulation and accept comments for 30 calendar days. Subsequently, BLM will notify you, in writing, whether you may reduce the financial guarantee under § 3809.591, or the reclamation is acceptable, or both.

#### **§ 3809.591 What are the limitations on the amount by which BLM may reduce my financial guarantee?**

(a) This section applies to your financial guarantee, but not to any funding mechanism established under § 3809.552(c) to pay for long-term treatment of effluent or site maintenance. Calculation of bond percentages in paragraphs (b) and (c) of this section does not include any funds held in that kind of funding mechanism.

(b) BLM may release up to 60 percent of your financial guarantee for a portion of your project area when BLM determines that you have successfully completed backfilling; regrading; establishment of drainage control; and stabilization and detoxification of leaching solutions, heaps, tailings, and similar facilities on that portion of the project area.

(c) BLM may release the remainder of your financial guarantee for the

same portion of the project area when—

(1) BLM determines that you have successfully completed reclamation, including revegetating the area disturbed by operations; and

(2) Any effluent discharged from the area has met applicable effluent limitations and water quality standards for one year without needing additional treatment, or you have established a funding mechanism under § 3809.552(c) to pay for long-term treatment, and any effluent discharged from the area has met applicable effluent limitations and water quality standards for one year with or without treatment.

**§ 3809.592 Does release of my financial guarantee relieve me of all responsibility for my project area?**

(a) Release of your financial guarantee under this subpart does not release you (the mining claimant or operator) from responsibility for reclamation of your operations should reclamation fail to meet the standards of this subpart.

(b) Any release of your financial guarantee under this subpart does not release or waive any claim BLM or other persons may have against any person under the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended, 42 U.S.C. 9601 *et seq.*, or under any other applicable statutes or regulations.

**§ 3809.593 What happens to my financial guarantee if I transfer my operations?**

You remain responsible for obligations or conditions created while you conducted operations unless a transferee accepts responsibility under § 3809.116, and BLM accepts an adequate replacement financial guarantee. Therefore, your financial guarantee must remain in effect until BLM determines that you are no longer responsible for all or part of the operation. BLM can release your financial guarantee on an incremental basis. The new operator must provide a financial guarantee before BLM will allow the new operator to conduct operations.

**§ 3809.594 What happens to my financial guarantee when my mining claim or millsite is patented?**

(a) When your mining claim or millsite is patented, BLM will release the portion of the financial guarantee that applies to operations within the boundaries of the patented land. This paragraph does not apply to patents issued on mining claims within the boundaries of the California Desert Conservation Area.

(b) BLM will release the remainder of the financial guarantee, including the portion covering approved access outside the boundaries of the mining claim, when you have completed reclamation to the standards of this subpart.

**FORFEITURE OF FINANCIAL GUARANTEE**

**§ 3809.595 When may BLM initiate forfeiture of my financial guarantee?**

BLM may initiate forfeiture of all or part of your financial guarantee for any project area or portion of a project area if—

(a) You (the operator or mining claimant) refuse or are unable to conduct reclamation as provided in the reclamation measures incorporated into your notice or approved plan of operations or the regulations in this subpart;

(b) You fail to meet the terms of your notice or your approved plan of operations; or

(c) You default on any of the conditions under which you obtained the financial guarantee.

**§ 3809.596 How does BLM initiate forfeiture of my financial guarantee?**

When BLM decides to require the forfeiture of all or part of your financial guarantee, BLM will notify you (the operator or mining claimant) by certified mail, return receipt requested; the surety on the financial guarantee, if any; and the State agency holding the financial guarantee, if any, informing you and them of the following:

(a) BLM's decision to require the forfeiture of all or part of the financial guarantee;

(b) The reasons for the forfeiture;

(c) The amount that you will forfeit based on the estimated total cost of

#### **§ 3809.597**

achieving the reclamation plan requirements for the project area or portion of the project area affected, including BLM's administrative costs; and

(d) How you may avoid forfeiture, including—

(1) Providing a written agreement under which you or another person will perform reclamation operations in accordance with a compliance schedule which meets the conditions of your notice or your approved plan of operations and the reclamation plan, and a demonstration that such other person has the ability to satisfy the conditions; and

(2) Obtaining written permission from BLM for a surety to complete the reclamation, or the portion of the reclamation applicable to the bonded phase or increment, if the surety can demonstrate an ability to complete the reclamation in accordance with the reclamation measures incorporated in your notice or approved plan of operations.

#### **§ 3809.597 What if I do not comply with BLM's forfeiture decision?**

If you fail to meet the requirements of BLM's forfeiture decision provided under § 3809.596, and you fail to appeal the forfeiture decision under §§ 3809.800 to 3809.807, or the Interior Board of Land Appeals does not grant a stay under 43 CFR 4.321, or the decision appealed is affirmed, BLM will—

(a) Immediately collect the forfeited amount as provided by applicable laws for the collection of defaulted financial guarantees, other debts, or State bond pools; and

(b) Use funds collected from financial guarantee forfeiture to implement the reclamation plan, or portion thereof, on the area or portion of the area to which financial guarantee coverage applies.

#### **§ 3809.598 What if the amount forfeited will not cover the cost of reclamation?**

If the amount forfeited is insufficient to pay for the full cost of reclamation, the operators and mining claimants are liable for the remaining costs as set forth in § 3809.116. BLM may complete or authorize completion of reclamation

#### **43 CFR Ch. II (10–1–08 Edition)**

of the area covered by the financial guarantee and may recover from responsible persons all costs of reclamation in excess of the amount forfeited.

[66 FR 54862, Oct. 30, 2001]

#### **§ 3809.599 What if the amount forfeited exceeds the cost of reclamation?**

If the amount of financial guarantee forfeited is more than the amount necessary to complete reclamation, BLM will return the unused funds within a reasonable amount of time to the party from whom they were collected.

#### **INSPECTION AND ENFORCEMENT**

#### **§ 3809.600 With what frequency will BLM inspect my operations?**

(a) At any time, BLM may inspect your operations, including all structures, equipment, workings, and uses located on the public lands. The inspection may include verification that your operations comply with this subpart. See § 3715.7 of this title for special provisions governing inspection of the inside of structures used solely for residential purposes.

(b) At least 4 times each year, BLM will inspect your operations if you use cyanide or other leachate or where there is significant potential for acid drainage.

#### **§ 3809.601 What types of enforcement action may BLM take if I do not meet the requirements of this subpart?**

BLM may issue various types of enforcement orders, including the following:

(a) *Noncompliance order.* If your operations do not comply with any provision of your notice, plan of operations, or requirement of this subpart, BLM may issue you a noncompliance order; and

(b) *Suspension orders.* (1) BLM may order a suspension of all or any part of your operations after—

(i) You fail to timely comply with a noncompliance order for a significant violation issued under paragraph (a) of this section. A significant violation is one that causes or may result in environmental or other harm or danger or that substantially deviates from the

complete notice or approved plan of operations;

(ii) BLM notifies you of its intent to issue a suspension order; and

(iii) BLM provides you an opportunity for an informal hearing before the BLM State Director to object to a suspension.

(2) BLM may order an immediate, temporary suspension of all or any part of your operations without issuing a noncompliance order, notifying you in advance, or providing you an opportunity for an informal hearing if—

(i) You do not comply with any provision of your notice, plan of operations, or this subpart; and

(ii) An immediate, temporary suspension is necessary to protect health, safety, or the environment from imminent danger or harm. BLM may presume that an immediate suspension is necessary if you conduct plan-level operations without an approved plan of operations or conduct notice-level operations without submitting a complete notice.

(3) BLM will terminate a suspension order under paragraph (b)(1) or (b)(2) of this section when BLM determines you have corrected the violation.

(c) *Contents of enforcement orders.* Enforcement orders will specify—

(1) How you are failing or have failed to comply with the requirements of this subpart;

(2) The portions of your operations, if any, that you must cease or suspend;

(3) The actions you must take to correct the noncompliance and the time, not to exceed 30 calendar days, within which you must start corrective action; and

(4) The time within which you must complete corrective action.

**§ 3809.602 Can BLM revoke my plan of operations or nullify my notice?**

(a) BLM may revoke your plan of operations or nullify your notice upon finding that—

(1) A violation exists of any provision of your notice, plan of operation, or this subpart, and you have failed to correct the violation within the time specified in the enforcement order issued under § 3809.601; or

(2) a pattern of violations exists at your operations.

(b) The finding is not effective until BLM notifies you of its intent to revoke your plan or nullify your notice, and BLM provides you an opportunity for an informal hearing before the BLM State Director.

(c) If BLM nullifies your notice or revokes your plan of operations, you must not conduct operations on the public lands in the project area, except for reclamation and other measures specified by BLM.

**§ 3809.603 How does BLM serve me with an enforcement action?**

(a) BLM will serve a noncompliance order, a notification of intent to issue a suspension order, a suspension order, or other enforcement order on the person to whom it is directed or his or her designated agent, either by—

(1) Sending a copy of the notification or order by certified mail or by hand to the operator or his or her designated agent, or by any means consistent with the rules governing service of a summons and complaint under rule 4 of the Federal Rules of Civil Procedure. Service is complete upon offer of the notification or order or of the certified mail and is not incomplete because of refusal to accept; or

(2) Offering a copy at the project area to the designated agent or to the individual who, based upon reasonable inquiry, appears to be in charge. If no such individual can be located at the project area, BLM may offer a copy to any individual at the project area who appears to be an employee or agent of the person to whom the notification or order is issued. Service is complete when the notice or order is offered and is not incomplete because of refusal to accept. Following service at the project area, BLM will send an information copy by certified mail to the operator or the operator's designated agent.

(b) BLM may serve a mining claimant in the same manner an operator is served under paragraph (a)(1) of this section.

(c) The mining claimant or operator may designate an agent for service of notifications and orders. You must provide the designation in writing to the local BLM field office having jurisdiction over the lands involved.

## § 3809.604

### § 3809.604 What happens if I do not comply with a BLM order?

(a) If you do not comply with a BLM order issued under §§ 3809.601 or 3809.602, the Department of the Interior may request the United States Attorney to institute a civil action in United States District Court for an injunction or order to enforce its order, prevent you from conducting operations on the public lands in violation of this subpart, and collect damages resulting from unlawful acts. This relief may be in addition to the enforcement actions described in §§ 3809.601 and 3809.602 and the penalties described in § 3809.700.

(b) If you fail to timely comply with a noncompliance order issued under § 3809.601(a), and remain in noncompliance, BLM may order you to submit plans of operations under § 3809.401 for current and future notice-level operations.

[65 FR 70112, Nov. 21, 2000, as amended at 66 FR 54862, Oct. 30, 2001]

### § 3809.605 What are prohibited acts under this subpart?

Prohibited acts include, but are not limited to, the following:

(a) Causing any unnecessary or undue degradation;

(b) Beginning any operations, other than casual use, before you file a notice as required by § 3809.21 or receive an approved plan of operations as required by § 3809.412;

(c) Conducting any operations outside the scope of your notice or approved plan of operations;

(d) Beginning operations prior to providing a financial guarantee that meets the requirements of this subpart;

(e) Failing to meet the requirements of this subpart when you stop conducting operations under a notice (§ 3809.334), when your notice expires (§ 3809.335), or when you stop conducting operations under an approved plan of operations (§ 3809.424);

(f) Failing to comply with any applicable performance standards in § 3809.420;

(g) Failing to comply with any enforcement actions provided for in § 3809.601; or

(h) Abandoning any operation prior to complying with any reclamation re-

## 43 CFR Ch. II (10–1–08 Edition)

quired by this subpart or any order provided for in § 3809.601.

### PENALTIES

### § 3809.700 What criminal penalties apply to violations of this subpart?

The criminal penalties established by statute for individuals and organizations are as follows:

(a) *Individuals.* If you knowingly and willfully violate the requirements of this subpart, you may be subject to arrest and trial under section 303(a) of FLPMA (43 U.S.C. 1733(a)). If you are convicted, you will be subject to a fine of not more than \$100,000 or the alternative fine provided for in the applicable provisions of 18 U.S.C. 3571, or imprisonment not to exceed 12 months, or both, for each offense; and

(b) *Organizations.* If an organization or corporation knowingly and willfully violates the requirements of this subpart, it is subject to trial and, if convicted, will be subject to a fine of not more than \$200,000, or the alternative fine provided for in the applicable provisions of 18 U.S.C. 3571.

### § 3809.701 What happens if I make false statements to BLM?

Under Federal statute (18 U.S.C. 1001), you are subject to arrest and trial before a United States District Court if, in any matter under this subpart, you knowingly and willfully falsify, conceal, or cover up by any trick, scheme, or device a material fact, or make any false, fictitious, or fraudulent statements or representations, or make or use any false writings or document knowing the same to contain any false, fictitious, or fraudulent statement or entry. If you are convicted, you will be subject to a fine of not more than \$250,000 or the alternative fine provided for in the applicable provisions of 18 U.S.C. 3571 or imprisonment for not more than 5 years, or both.

### APPEALS

### § 3809.800 Who may appeal BLM decisions under this subpart?

(a) A party adversely affected by a decision under this subpart may ask the State Director of the appropriate

**Bureau of Land Management, Interior**

**§ 3809.805**

BLM State Office to review the decision.

(b) An adversely affected party may bypass State Director review and directly appeal a BLM decision under this subpart to the Office of Hearings and Appeals (OHA) under part 4 of this title. See § 3809.801.

**§ 3809.801 When may I file an appeal of the BLM decision with OHA?**

(a) If you intend to appeal a BLM decision under this subpart, use the following table to see when you must file a notice of appeal with OHA:

If—	And—	Then if you intend to appeal, you must file a notice of appeal with OHA—
(1) You do not request State Director review.	.....	Within 30 calendar days after the date you receive the original decision.
(2) You request State Director review.	The State Director does not accept your request for review.	On the original decision within 30 calendar days of the date you receive the State Director's decision not to review.
(3) You request State Director review.	The State Director has accepted your request for review, but has not made a decision on the merits of the appeal.	On the original decision before the State Director issues a decision.
(4) You request State Director review.	The State Director makes a decision on the merits of the appeal.	On the State Director's decision within 30 calendar days of the date you receive, or are notified of, the State Director's decision.

(b) In order for OHA to consider your appeal of a decision, you must file a notice of appeal in writing with the BLM office where the decision was made.

**§ 3809.802 What must I include in my appeal to OHA?**

(a) Your written appeal must contain:

- (1) Your name and address; and
- (2) The BLM serial number of the notice or plan of operations that is the subject of the appeal.

(b) You must submit a statement of your reasons for the appeal and any arguments you wish to present that would justify reversal or modification of the decision within the time frame specified in part 4 of this chapter (usually within 30 calendar days after filing your appeal).

**§ 3809.803 Will the BLM decision go into effect during an appeal to OHA?**

All decisions under this subpart go into effect immediately and remain in effect while appeals are pending before OHA unless OHA grants a stay under § 4.21(b) of this title.

**§ 3809.804 When may I ask the BLM State Director to review a BLM decision?**

The State Director must receive your request for State Director review no later than 30 calendar days after you receive or are notified of the BLM decision you seek to have reviewed.

**§ 3809.805 What must I send BLM to request State Director review?**

(a) Your request for State Director review must be a single package that

## **§ 3809.806**

includes a brief written statement explaining why BLM should change its decision and any documents that support your written statement. Mark your envelope "State Director Review." You must also provide a telephone or fax number for the State Director to contact you.

(b) When you submit your request for State Director review, you may also request a meeting with the State Director. The State Director will notify you as soon as possible if he or she can accommodate your meeting request.

### **§ 3809.806 Will the State Director review the original BLM decision if I request State Director review?**

(a) The State Director may accept your request and review a decision made under this subpart. The State Director will decide within 21 days of a timely filed request whether to accept your request and review the original BLM decision. If the State Director does not make a decision within 21 days on whether to accept your request for review, you should consider your request for State Director review declined, and you may appeal the original BLM decision to OHA.

(b) The State Director will not begin a review and will end an ongoing review if you or another affected party files an appeal of the original BLM decision with OHA under section § 3809.801 before the State Director issues a decision under this subpart, unless OHA agrees to defer consideration of the appeal pending a State Director decision.

(c) If you file an appeal with OHA after requesting State Director review, you must notify the State Director who, after receiving your notice, may request OHA to defer considering the appeal.

(d) If you fail to notify the State Director of your appeal to OHA, any decision issued by the State Director may be voided by a subsequent OHA decision.

### **§ 3809.807 What happens once the State Director agrees to my request for a review of a decision?**

(a) The State Director will promptly send you a written decision, which may be based on any of the following:

(1) The information you submit;

## **43 CFR Ch. II (10–1–08 Edition)**

(2) The original BLM decision and any information BLM relied on for that decision;

(3) Any additional information, including information obtained from your meeting, if any, with the State Director.

(b) Any decision issued by the State Director under this subpart may affirm the original BLM decision, reverse it completely, or modify it in part. The State Director's decision may incorporate any part of the original BLM decision.

(c) If the original BLM decision was published in the FEDERAL REGISTER, the State Director will also publish his or her decision in the FEDERAL REGISTER.

### **§ 3809.808 How will decisions go into effect when I request State Director review?**

(a) The original BLM decision remains in effect while State Director review is pending, except that the State Director may stay the decision during the pendency of his or her review.

(b) The State Director's decision will be effective immediately and remain in effect, unless a stay is granted by OHA under § 4.21 of this title.

### **§ 3809.809 May I appeal a decision made by the State Director?**

(a) An adversely affected party may appeal the State Director's decision to OHA under part 4 of this title, except that you may not appeal a denial of your request for State Director review or a denial of your request for a meeting with the State Director.

(b) Once the State Director issues a decision under this subpart, it replaces the original BLM decision, which is no longer in effect, and you may appeal only the State Director's decision.

## **PUBLIC VISITS TO MINES**

### **§ 3809.900 Will BLM allow the public to visit mines on public lands?**

(a) If requested by any member of the public, BLM may sponsor and schedule a public visit to a mine on public land once each year. The purpose of the visit is to give the public an opportunity to view the mine site and associated facilities. Visits will include

## Bureau of Land Management, Interior

## § 3811.1

surface areas and surface facilities ordinarily made available to visitors on public tours. BLM will schedule visits during normal BLM business hours at the convenience of the operator to avoid disruption of operations.

(b) Operators must allow the visit and must not exclude persons whose participation BLM authorizes. BLM may limit the size of a group for safety reasons. An operator's representative must accompany the group on the visit. Operators must make available any necessary safety training that they provide to other visitors. BLM will provide the necessary safety equipment if the operator is unable to do so.

(c) Members of the public must provide their own transportation to the mine site, unless provided by BLM. Operators don't have to provide transportation within the project area, but if they don't, they must provide access for BLM-sponsored transportation.

### PART 3810—LANDS AND MINERALS SUBJECT TO LOCATION

#### Subpart 3811—Lands Subject to Location and Purchase

Sec.

3811.1 Lands: General.

3811.2 Lands: Specific.

3811.2-1 States where locations may be made.

3811.2-2 Lands in national parks and national monuments.

3811.2-3 Lands in Indian reservations.

3811.2-4 Lands in national forests.

3811.2-5 O and C and Coos Bay Wagon Road lands.

3811.2-6 Lands in powersite withdrawals.

3811.2-9 Lands under Color of Title Act.

#### Subpart 3813—Disposal of Reserved Minerals Under the Act of July 17, 1914

3813.0-3 Authority.

3813.1 Minerals reserved by the Act of July 17, 1914, subject to mineral location, entry and patenting.

3813.2 Minerals subject to disposition.

3813.3 Provision of the mineral patent.

#### Subpart 3814—Disposal of Reserved Min- erals Under the Stockraising Home- stead Act

3814.1 Mineral reservation in entry and patent; mining and removal of reserved deposits; bonds.

3814.2 Mineral reservation in patent; conditions to be noted on mineral applications.

#### Subpart 3815—Mineral Locations in Stock Driveway Withdrawals

3815.1 Mineral locations.

3815.2 Prospecting and mining.

3815.3 Surface limitation.

3815.4 Protection of stock.

3815.5 Access to stock watering places.

3815.6 Locations subject to mining laws.

3815.7 Mining claims subject to stock driveway withdrawals.

3815.8 Notation required in application for patent; conditions required in patent.

#### Subpart 3816—Mineral Locations in Reclamation Withdrawals

3816.1 Mineral locations.

3816.2 Application to open lands to location.

3816.3 Recommendations of Bureau of Reclamation to open lands.

3816.4 Recommendations as to reservations and contract form.

AUTHORITY: 30 U.S.C. 22 *et seq.*; 43 U.S.C. 1201 and 1740.

#### Subpart 3811—Lands Subject to Location and Purchase

SOURCE: 35 FR 9742, June 13, 1970, unless otherwise noted.

#### § 3811.1 Lands: General.

Vacant public surveyed or unsurveyed lands are open to prospecting, and upon discovery of mineral, to location and purchase. The Act of June 4, 1897 (30 Stat. 36), provides that "any mineral lands in any forest reservation which have been or which may be shown to be such, and subject to entry under the existing mining laws of the United States and the rules and regulations applying thereto, shall continue to be subject to such location and entry," notwithstanding the reservation. This makes mineral lands in the forest reserves in the public land states, subject to location and entry under the general mining laws in the usual manner. Lands entered or patented under the stockraising homestead law (title to minerals and the use of the surface necessary for mining purposes can be acquired), lands entered under other agricultural laws but not perfected,

## **§ 3811.2**

where prospecting can be done peaceably are open to location.

### **§ 3811.2 Lands: Specific.**

#### **§ 3811.2-1 States where locations may be made.**

(a) Mining locations may be made in the States of Alaska, Arizona, Arkansas, California, Colorado, Florida, Idaho, Louisiana, Mississippi, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming.

(b) The laws of the United States relating to mining claims were extended to Alaska by section 8 of the Act of May 17, 1884 (23 Stat. 26), and sections 15, 16, and 26 of the Act of June 6, 1900 (31 Stat. 327, 329; 48 U.S.C. 119, 120, 381-383) again, in terms, extended the mining laws of the United States and all right incident thereto, to the State, with certain further provisions with respect to the acquisition of claims thereunder.

(c) The law in respect to placer claims in Alaska was modified and amended by the Act of August 1, 1912 (37 Stat. 242) and section 4 of that Act was amended by the Act of March 3, 1925 (43 Stat. 1118).

(d) By the Act of May 4, 1934 (43 Stat. 663; 48 U.S.C. 381a) the Acts of August 1, 1912, and March 3, 1925, were repealed and the general mining laws of the United States applicable to placer mining claims were declared to be in full force and effect in the State.

#### **§ 3811.2-2 Lands in national parks and monuments.**

The Mining in the Parks Act (16 U.S.C. 1901 *et seq.*), effectively withdrew all National Parks and Monuments from location and entry under the General Mining Law of 1872, as amended. Since September 28, 1976, all National Parks and Monuments and other units of the National Park System have been closed to the location of mining claims and sites under the General Mining Law of 1872, as amended. Valid existing rights are recognized, but access and permission to operate mining claims and sites within units of the National Park System are now governed by 36 CFR part 9.

[59 FR 44856, Aug. 30, 1994]

## **43 CFR Ch. II (10-1-08 Edition)**

### **§ 3811.2-3 Lands in Indian reservations.**

All lands contained within the boundaries of an established Indian Reservation are withdrawn from all location, entry, and appropriation under the General Mining Law of 1872, as amended. All minerals on Indian Reservations may only be acquired by lease pursuant to the Act of May 11, 1938 (25 U.S.C. 396a), the Act of March 3, 1909 (25 U.S.C. 396), or the Indian Mineral Development Act of 1982 (25 U.S.C. 2101 *et seq.*). The regulations governing the mineral leasing of Indian lands are found in 25 CFR Chapter I Subchapter I.

[59 FR 44857, Aug. 30, 1994]

### **§ 3811.2-4 Lands in national forests.**

For mining claims in national forests, see § 3811.1.

### **§ 3811.2-5 O and C and Coos Bay Wagon Road lands.**

Revested Oregon and California Railroad and Reconveyed Coos Bay Wagon Road Grant Lands, located in Oregon, are subject to mining locations in accordance with provisions of subpart 3821 of this chapter.

### **§ 3811.2-6 Lands in powersite withdrawals.**

Mining claims may be located on power site withdrawals subject to the provisions of part 3730 of this chapter.

### **§ 3811.2-9 Lands under Color of Title Act.**

Lands patented under the Color of Title Act (43 U.S.C. 1068), by exchange under the Taylor Grazing Act (43 U.S.C. 415g) and by Forest Exchanges (16 U.S.C. 485) with mineral reservation to the United States, are subject to appropriation under the mining or mineral leasing laws for the reserved materials. See Group 2200 and subpart 2540 of this chapter. Minerals in acquired lands of the United States are not subject to mining location but the minerals therein may be acquired in accordance with the regulations contained in part 3500.

## Bureau of Land Management, Interior

## § 3813.3

### Subpart 3813—Disposal of Reserved Minerals Under the Act of July 17, 1914

SOURCE: 35 FR 9743, June 13, 1970, unless otherwise noted.

#### § 3813.0-3 Authority.

The Act of July 20, 1956 (70 Stat. 592), which amended the Act of July 17, 1914 (38 Stat. 509; 30 U.S.C. sec. 122), was enacted to permit the disposal of certain reserved mineral deposits under the mining laws of the United States.

#### § 3813.1 Minerals reserved by the Act of July 17, 1914, subject to mineral location, entry and patenting.

The Act of July 17, 1914 (38 Stat. 509; 30 U.S.C. sec. 122), as amended by the act of July 20, 1956 (70 Stat. 592), provides in part as follows:

\* \* \* such deposits to be subject to disposal by the United States only as shall be hereafter expressly directed by law: *Provided, however,* That all mineral deposits heretofore or hereafter reserved to the United States under this Act which are subject, at the time of application for patent to valid and subsisting rights acquired by discovery and location under the mining laws of the United States made prior to the date of the Mineral Leasing Act of February 25, 1920 (41 Stat. 437), shall hereafter be subject to disposal to the holders of those valid and subsisting rights by patent under the mining laws of the United States in force at the time of such disposal. Any person qualified to acquire the reserved deposits may enter upon said lands with a view of prospecting for the same upon the approval of the Secretary of the Interior of a bond or undertaking to be filed with him as security for the payment of all damages of the crops and improvements on such lands by reason of such prospecting, the measure of any such damage to be fixed by agreement of parties or by a court of competent jurisdiction. Any person who has acquired from the United States the title to or the right to mine and remove the reserved deposits, should the United States dispose of the mineral deposits in lands, may re-enter and occupy so much of the surface thereof as may be required for all purposes reasonably incident to the mining and removal of the minerals therefrom; and mine and remove such minerals, upon payment of damages caused thereby to the owner of the land, or upon giving a good and sufficient bond or undertaking therefor in an action instituted in any competent court to ascertain and fix said damages:

#### § 3813.2 Minerals subject to disposition.

The Act of July 20, 1956, applies only to any mineral deposit discovered and located under the U.S. mining laws prior to February 25, 1920, and reserved to the United States under the Act of July 17, 1914 (38 Stat. 509; 30 U.S.C. 122), and which, at the time of application for mineral patent, is subject to valid and subsisting rights under the said mining laws. Only that mineral deposit together with the right to use the surface to prospect for, mine, and remove the said deposit shall, on or after July 20, 1956, be subject to disposal to the holders of such valid and subsisting rights by patent under the mining laws in force at the time of such disposal. "Oil" reserved under the Act of 1914 has been held to include oil shale. See 52 L.D. 329.

#### § 3813.3 Provisions of the mineral patent.

(a) Each patent issued under the Act of July 20, 1956, shall specifically name the discovered mineral deposit which had been reserved to the United States under the Act of July 17, 1914, and shall recite that, in accordance with the reservation in the land patent, the mineral patentee and its successors (or his heirs and assigns, if a person) shall have the right to prospect for, mine and remove the mineral deposit for which the patent is issued.

(b) If, when it is determined that mineral deposit is subject to patenting under the mining laws pursuant to the Act of July 20, 1956, there is a subsisting mineral lease or permit covering such deposit, the mineral patent shall be issued subject to the mineral lease or permit for so long as rights under the lease or permit shall exist, the patentee being substituted for the United States as lessor or permittor and the patentee being entitled to all revenues derived subsequent to the issuance of patent from any such lease or permit.

**Subpart 3814—Disposal of Reserved Minerals Under the Stockraising Homestead Act****§ 3814.1 Mineral reservation in entry and patent; mining and removal of reserved deposits; bonds.**

(a) Section 9 of the Act of December 29, 1916 (39 Stat. 864; 43 U.S.C. 299), provides that all entries made and patents issued under its provisions shall contain a reservation to the United States of all coal and other minerals in the lands so entered and patented, together with the right to prospect for, mine, and remove the same; also that the coal and other mineral deposits in such lands shall be subject to disposal by the United States in accordance with the provisions of the coal and mineral land laws in force at the time of such disposal.

(b) Said section 9 also provides that any person qualified to locate and enter the coal or other mineral deposits, or having the right to mine and remove the same under the laws of the United States, shall have the right at all times to enter upon the lands entered or patented under the Act, for the purpose of prospecting for the coal or other mineral therein, provided he shall not injure, damage, or destroy the permanent improvements of the entryman or patentee and shall be liable to and shall compensate the entryman or patentee for all damages to the crops on the land by reason of such prospecting. Under the Act of June 21, 1949 (30 U.S.C. 54), a mineral entryman on a stock raising or other homestead entry or patent is also held liable for any damage that may be caused to the value of the land for grazing by such prospecting for, mining, or removal of minerals except that vested rights existing prior to June 21, 1949, are not impaired.

(c) It is further provided in said section 9 that any person who has acquired from the United States the coal or other mineral deposits in any such land or the right to mine and remove the same, may reenter and occupy so much of the surface thereof as may be required for all purposes reasonably incident to the mining or removal of the coal, or other minerals, first, upon securing the written consent or waiver of

the homestead entryman or patentee; or, second, upon payment of the damages to crops or other tangible improvements to the owner thereof under agreement; or, third, in lieu of either of the foregoing provisions, upon the execution of a good and sufficient bond or undertaking to the United States for the use and benefit of the entryman or owner of the land, to secure payment of such damages to the crops or tangible improvements of the entryman or owner as may be determined and fixed in an action brought upon the bond or undertaking in a court of competent jurisdiction against the principal and sureties thereon. This bond on Form 3814 must be executed by the person who has acquired from the United States the coal or other mineral deposits reserved, as directed in said section 9, as principal, with two competent individual sureties, or a bonding company which has complied with the requirements of the Act of August 13, 1894 (28 Stat. 279; 6 U.S.C. 6-13), as amended by the Act of March 23, 1910 (36 Stat. 241; 6 U.S.C. 8, 9), and must be in the sum of not less than \$1,000. Qualified corporate sureties are preferred and may be accepted as sole surety. Except in the case of a bond given by a qualified corporate surety there must be filed therewith affidavits of justification by the sureties and a certificate by a judge or clerk of a court of record, a United States district attorney, a United States commissioner, or a United States postmaster as to the identity, signatures, and financial competency of the sureties. Said bond, with accompanying papers, must be filed with the authorized officer of the proper office, and there must also be filed with such bond evidence of service of a copy of the bond upon the homestead entryman or owner of the land.

(d) If at the expiration of 30 days after the receipt of the aforesaid copy of the bond by the entryman or owner of the land, no objections are made by such entryman or owner of the land and filed with the authorized officer against the approval of the bond by them, he may, if all else be regular, approve said bond. If, however, after receipt by the homestead entryman or owner of the lands of copy of the bond, such homestead entryman or owner of

## Bureau of Land Management, Interior

## § 3815.2

the land timely objects to the approval of the bond by said authorized officer, the said officer will immediately give consideration to said bond, accompanying papers, and objections filed as aforesaid to the approval of the bond, and if, in consequence of such consideration he shall find and conclude that the proffered bond ought not to be approved, he will render decision accordingly and give due notice thereof to the person proffering the bond, at the same time advising such person of his right of appeal to the Director of the Bureau of Land Management from the action in disapproving the bond so filed and proffered. If, however, the authorized officer, after full and complete examination and consideration of all the papers filed, is of the opinion that the proffered bond is a good and sufficient one and that the objections interposed as provided herein against the approval thereof do not set forth sufficient reasons to justify him in refusing to approve said proffered bond, he will, in writing, duly notify the homestead entryman or owner of the land of his decision in this regard and allow such homestead entryman or owner of the land 30 days in which to appeal to the Director of the Bureau of Land Management. If appeal from the adverse decision of the authorized officer be not timely filed by the person proffering the bond, the authorized officer will indorse upon the bond "disapproved" and other appropriate notations, and close the case. If, on the other hand, the homestead entryman or owner of the lands fails to timely appeal from the decision of the authorized officer adverse to the contentions of said homestead entryman or owners of the lands, said authorized officer may, if all else be regular, approve the bond.

(e) The coal and other mineral deposits in the lands entered or patented under the Act of December 29, 1916, will become subject to existing laws, as to purchase or lease, at any time after allowance of the homestead entry unless the lands or the coal or other mineral deposits are, at the time of said allowance, withdrawn or reserved from disposition.

[35 FR 9743, June 13, 1970, as amended at 41 FR 29122, July 15, 1976]

### § 3814.2 Mineral reservation in patent; conditions to be noted on mineral applications.

(a) There will be incorporated in patents issued on homestead entries under this Act the following:

Excepting and reserving, however, to the United States all the coal and other minerals in the lands so entered and patented, and to it, or persons authorized by it, the right to prospect for, mine, and remove all the coal and other minerals from the same upon compliance with the conditions, and subject to the provisions and limitations, of the Act of December 29, 1916 (39 Stat. 862).

(b) Mineral applications for the reserved deposits disposable under the Act must bear on the face of the same, before being signed by the declarant or applicant and presented to the authorized officer the following notation:

Patents shall contain appropriate notations declaring same subject to the provisions of the Act of December 29, 1916 (39 Stat. 862), with reference to disposition, occupancy, and use of the land as permitted to an entryman under said Act.

[35 FR 9743, June 13, 1970]

## Subpart 3815—Mineral Locations in Stock Driveway Withdrawals

SOURCE: 35 FR 9744, June 13, 1970, unless otherwise noted.

### § 3815.1 Mineral locations.

Under authority of the provisions of the Act of January 29, 1929 (45 Stat. 1144; 43 U.S.C. 300), the rules, regulations, and restrictions in this section are prescribed for prospecting for minerals of the kinds subject to the United States mining laws, and the locating of mining claims upon discovery of such minerals in lands within stock driveway withdrawals made before or after May 4, 1929.

### § 3815.2 Prospecting and mining.

All prospecting and mining operations shall be conducted in such manner as to cause no interference with the use of the surface of the land for stock driveway purposes, except such as may actually be necessary.

### **§ 3815.3**

#### **§ 3815.3 Surface limitation.**

While a mining location will be made in accordance with the usual procedure for locating mining claims, and will describe a tract of land, having due regard to the limitations of area fixed by the mining laws, the locator will be limited under his location to the right to the minerals discovered in the land and to mine and remove the same, and to occupy so much of the surface of the claim as may be required for all purposes reasonably incident to the mining and removal of the minerals.

#### **§ 3815.4 Protection of stock.**

All excavations and other mining work and improvements made in prospecting and mining operations shall be fenced or otherwise protected to prevent the same from being a menace to stock on the land.

#### **§ 3815.5 Access to stock watering places.**

No watering places shall be inclosed, nor proper and lawful access of stock thereto prevented, nor the watering of stock thereat interfered with.

#### **§ 3815.6 Locations subject to mining laws.**

Prospecting for minerals and the location of mining claims on lands in such withdrawals shall be subject to the provisions and conditions of the mining laws and the regulations thereunder.

#### **§ 3815.7 Mining claims subject to stock driveway withdrawals.**

Mining claims on lands within stock driveway withdrawals, located prior to May 4, 1929, and subsequent to the date of the withdrawal, may be held and perfected subject to the provisions and regulations in this section.

#### **§ 3815.8 Notation required in application for patent; conditions required in patent.**

(a) Every application for patent for any minerals located subject to this Act must bear on its face, before being executed by the applicant and presented for filing, the following notation:

### **43 CFR Ch. II (10–1–08 Edition)**

Subject to the provisions of section 10 of the Act of December 29, 1916 (39 Stat. 862), as amended by the Act of January 29, 1929 (45 Stat. 1144).

Like notation will be made by the manager on the final certificates issued on such a mineral application.

(b) Patents issued on such applications will contain the added condition:

That this patent is issued subject to the provisions of the Act of December 29, 1916 (39 Stat. 862), as amended by the Act of January 29, 1929 (45 Stat. 1144), with reference to the disposition, occupancy and use of the land as permitted to an entryman under said Act.

### **Subpart 3816—Mineral Locations in Reclamation Withdrawals**

SOURCE: 35 FR 9744, June 13, 1970, unless otherwise noted.

#### **§ 3816.1 Mineral locations.**

The Act of April 23, 1932 (47 Stat. 136; 43 U.S.C. 154), authorizes the Secretary of the Interior in his discretion to open to location, entry and patent under the general mining laws with reservation of rights, ways and easements, public lands of the United States which are known or believed to contain valuable deposits of minerals and which are withdrawn from development and acquisition because they are included within the limits of withdrawals made pursuant to section 3 of the reclamation Act of June 17, 1902 (32 Stat. 388; 43 U.S.C. 416).

#### **§ 3816.2 Application to open lands to location.**

Application to open lands to location under the Act may be filed by a person, association or corporation qualified to locate and purchase claims under the general mining laws. The application must be executed in duplicate and filed in the proper office, must describe the land the applicant desires to locate, by legal subdivision if surveyed, or by metes and bounds if unsurveyed, and must set out the facts upon which is based the knowledge or belief that the lands contain valuable mineral deposits, giving such detail as the applicant may be able to furnish as to the nature of the formation, kind and character of the mineral deposits. Each application must be accompanied by the filing fee

## Bureau of Land Management, Interior

## § 3821.1

for application to open lands to location found in the fee schedule in § 3000.12 of this chapter.

[35 FR 9744, June 13, 1970, as amended at 72 FR 50889, Sept. 5, 2007]

### § 3816.3 Recommendations of Bureau of Reclamation to open lands.

When the application is received in the Bureau of Land Management, if found satisfactory, the duplicate will be transmitted to the Bureau of Reclamation with request for report and recommendation. In case the Bureau of Reclamation makes an adverse report on the application, it will be rejected subject to right of appeal.

### § 3816.4 Recommendations as to reservations and contract form.

If in the opinion of the Bureau of Reclamation the lands may be opened under the Act without prejudice to the rights of the United States, the report will recommend the reservation of such ways, rights and easements considered necessary or appropriate, and/or the form of contract to be executed by the intending locator or entryman as a condition precedent to the vesting of any rights in him, which may be necessary for the protection of the irrigation interests.

## PART 3820—AREAS SUBJECT TO SPECIAL MINING LAWS

### Subpart 3821—O and C Lands

Sec.

3821.0–3 Authority.

3821.1 General provisions.

3821.2 Requirements for filing notices of locations of claims; descriptions.

3821.3 Requirement for filing statements of assessment work.

3821.4 Restriction on use of timber; application for such use.

3821.5 Application for final certificates and patents.

### Subpart 3822—Lands Patented Under the Alaska Public Sale Act

3825.0–3 Authority.

3825.1 Mining locations in Tohono O’Odham Indian Reservation in Arizona.

### Subparts 3826–3827 [Reserved]

AUTHORITY: 30 U.S.C. 22 *et seq.*; 43 U.S.C. 1201; 43 U.S.C. 1740; 62 Stat. 162.

## Subpart 3821—O and C Lands

SOURCE: 35 FR 9745, June 13, 1970, unless otherwise noted.

### § 3821.0–3 Authority.

The authorities for the regulations in this subpart are the Act of April 8, 1948 (62 Stat. 162); Section 314 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1744); and 30 U.S.C. 28f–28k, as amended by the Act of November 5, 2001 (115 Stat. 414).

[67 FR 38206, June 3, 2002]

### § 3821.1 General provisions.

(a) The Act of April 8, 1948 (62 Stat. 162) reopens the revested Oregon and California Railroad and Reconveyed Coos Bay Wagon Road Grant Lands (hereinafter referred to in this section as the O. and C. lands) in Oregon, except power sites, to exploration, location, entry, and disposition under the United States Mining Laws. The Act also validates mineral claims, if otherwise valid, located on the O. and C. lands during the period from August 28, 1937 to April 8, 1948.

## **§ 3821.2**

(b) The procedure in the locating of mining claims, performance of annual labor, and the prosecution of mineral patent proceedings in connection with O. and C. lands is the same as provided by the United States Mining Laws and the general regulations in this part, and is also subject to the additional conditions and requirements herein-after set forth.

### **§ 3821.2 Requirements for filing notices of locations of claims; descriptions.**

The owner of any unpatented mining claim, mill site, or tunnel site located on land described in § 3821.1 shall file all notices or certificates of location, amended notices or certificates, and transfers of interest in the proper State Office of the Bureau of Land Management pursuant to part 3833 of this chapter of this title and shall pay the applicable maintenance, location, and service fees required by parts 3830 through 3839 of this chapter. The notice or certificate of location, or amendment thereto, shall be marked by the owner as being filed under the Act of April 8, 1948, and, if located on powersite lands, also the Act of August 11, 1955, as prescribed by §§ 3734.1 and part 3833 of this chapter.

[59 FR 44857, Aug. 30, 1994, as amended at 68 FR 61064, Oct. 24, 2003]

### **§ 3821.3 Requirement for filing statement of assessment work.**

The owner of an unpatented mining claim, mill site, or tunnel site located on O and C lands may either:

(a) Perform and record proof of annual assessment work if qualified as a small miner under part 3835 of this chapter; or

(b) Pay an annual maintenance fee of \$100 per unpatented mining claim, mill site, or tunnel site under part 3834 of this chapter.

[68 FR 61064, Oct. 24, 2003]

### **§ 3821.4 Restriction on use of timber; application for such use.**

The owner of any unpatented mining claim located upon O. and C. lands on or after August 28, 1937, shall not acquire title, possessory or otherwise, to the timber, now or hereafter growing upon such claim. Such timber may be

## **43 CFR Ch. II (10–1–08 Edition)**

managed and disposed of under existing law or as may be provided by subsequent law. The owner of such unpatented mining claim, until such time as the timber is otherwise disposed of by the United States, if he wishes to cut and use so much of the timber upon his claim as may be necessary in the development and operation of his mine, shall file a written application with the district forester for permission to do so. The application shall set forth the estimated quantity and kind of timber desired and the use to which it will be put. The applicant shall not cut any of the timber prior to the approval of the application therefor.

### **§ 3821.5 Applications for final certificates and patents.**

Applications for patents and final certificates in connection with mining claims located upon O. and C. lands on or after August 28, 1937 must be noted "Mining claims on O. and C. lands, under the Act of April 8, 1948." All patents issued on such claims located on or after August 28, 1937, shall contain an appropriate reference to the Act of April 8, 1948, and shall indicate that the patent is issued subject to the conditions and limitations of the Act.

## **Subpart 3822—Lands Patented Under the Alaska Public Sale Act**

### **§ 3822.1 Subject to mining location.**

Lands segregated for classification or sold under the Alaska Public Sale Act of August 30, 1949 (63 Stat. 679, 48 U.S.C. 364a–364e) are subject to mining location, under the provision of section 3 of that Act for the development of the reserved minerals under applicable law, including the United States mining laws, and subject to the rules and regulations of the Secretary of the Interior necessary to provide protection and compensation for damages from mining activities to the surface and improvements thereon. Such mining locations are subject to the applicable general regulations in Group 3800 and to the additional conditions and requirements in § 2771.6–2 of this chapter.

[35 FR 9746, June 13, 1970]

## Bureau of Land Management, Interior

## § 3823.2

### § 3822.2 Compensation to surface rights holder.

Any party who obtains the right, whether by license, permit, lease, or location, to prospect for, mine, or remove the minerals after the land shall have been segregated or disposed of under the Act, will be required to compensate the holder of the surface rights for any damages that may be caused to the value of the land and to the tangible improvements thereon by such mining operations or prospecting, and may be required by an authorized officer, as to mining claims, or by the terms of the mineral license, permit or lease, to post a surety bond not to exceed \$20,000 in amount to protect the surface owner against such damage, prior to the commencement of mining operations.

[35 FR 9746, June 13, 1970]

### Subpart 3823—Prospecting, Mineral Locations, and Mineral Patents Within National Forest Wilderness

SOURCE: 35 FR 9746, June 13, 1970, unless otherwise noted.

#### § 3823.0-3 Purpose.

This subpart sets forth procedures to be followed by persons wishing to prospect on lands within National Forest Wilderness, and special provisions pertaining to mineral locations and mineral patents within National Forest Wilderness.

#### § 3823.0-5 Definition.

As used in this subpart the term *National Forest Wilderness* means an area or part of an area of National Forest lands designated by the Wilderness Act as a wilderness area within the National Wilderness Preservation System.

#### § 3823.1 Prospecting within National Forest Wilderness for the purpose of gathering information about mineral resources.

(a) The provisions of the Wilderness Act do not prevent any activity, including prospecting, within National Forest Wilderness for the purpose of gathering information about mineral

or other resources if such activity is conducted in a manner compatible with the preservation of the wilderness environment. While information gathered by prospecting concerning mineral resources within National Forest Wilderness may be utilized in connection with the location of valuable mineral deposits which may be discovered through such activity and which may be open to such location, attention is directed to the fact that no claim may be located after midnight, December 31, 1983, and no valid discovery may be made after that time on any location purportedly made before that time.

(b) All persons wishing to carry on any activity, including prospecting, for the purpose of gathering information about mineral or other resources on lands within National Forest Wilderness should make inquiry of the officer in charge of the National Forest in which the lands are located concerning the regulations of the Secretary of Agriculture governing surface use of the lands for such activity.

#### § 3823.2 Mineral locations within National Forest Wilderness.

(a) Until midnight, December 31, 1983, the mining laws of the United States and the regulations of this chapter pertaining thereto, including any amendments thereto effective during such period, shall to the same extent as applicable before September 3, 1964, extend to National Forest Wilderness, subject to the provisions of such regulations as may be prescribed by the Secretary of Agriculture pursuant to section 4(d)(3) of the Wilderness Act.

(b) All mineral locations established after September 3, 1964, and lying within the National Forest Wilderness, shall be held and used solely for mining or processing operations and uses incident thereto, and such locations shall carry with them no rights in excess of those rights which may be patented under the provisions of § 3823.3 of this chapter.

(c) All persons wishing to carry on any activity under the mining laws on lands within National Forest Wilderness, on or after September 3, 1964, should make inquiry of the officer in charge of the National Forest in which the lands are located concerning the

### § 3823.3

regulations of the Secretary of Agriculture governing activities to be performed thereon in connection with the locations of mining claims.

#### **§ 3823.3 Mineral patents within National Forest Wilderness.**

(a) Each patent issued under the U.S. mining laws for mineral locations established after September 3, 1964, or validated by discovery of minerals occurring after September 3, 1964, and lying within National Forest Wilderness shall, in accordance with the provisions of section 4(d)(3) of the Wilderness Act:

(1) Convey title to the mineral deposits within the patented lands, together with the right to cut and use so much of the mature timber therefrom as may be needed in the extraction, removal, and beneficiation of the mineral deposits, if needed timber is not otherwise reasonably available, and if the timber is cut under sound principles of forest management as defined by the National Forest rules and regulations;

(2) Reserve to the United States all title in or to the surface of the lands and products thereof; and

(3) Provide that no use of the surface of the patented lands or the resources therefrom not reasonably required for carrying on mining or prospecting shall be allowed except as expressly provided in the Wilderness Act.

(b) Each patent to which the provisions of this section are applicable shall contain the express condition that the use of the patented lands shall be subject to regulations prescribed by the Secretary of Agriculture as referred to in § 3823.2 of this subpart and that the patented lands shall be held open for reasonable inspection by authorized officers of the U.S. Government for the purpose of observing compliance with the provisions thereof.

#### **§ 3823.4 Withdrawal from operation of the mining laws.**

Effective at midnight, December 31, 1983, subject to valid rights then existing, the minerals in lands within National Forest Wilderness are withdrawn from the operation of the mining laws by virtue of the provisions of section 4(d)(3) of the Wilderness Act.

### 43 CFR Ch. II (10–1–08 Edition)

#### **Subpart 3825—Tohono O'Odham (Formerly Papago) Indian Reservation, Arizona**

##### **§ 3825.0–3 Authority.**

(a) The Act of June 18, 1934 (48 Stat. 984; 25 U.S.C. 461–479), as amended by the Act of August 28, 1937 (50 Stat. 862; 25 U.S.C. 463), revokes departmental order of October 28, 1932, which temporarily withdrew from all forms of mineral entry or claim the lands within the Tohono O'Odham Indian Reservation and restores, as of June 18, 1934, such lands to exploration, location and purchase under the existing mining laws of the United States.

(b) The regulations in this part apply to entries made prior to May 27, 1955. By virtue of the Act of May 27, 1955 (69 Stat. 67; 25 U.S.C. 463) mineral entries may no longer be made within the Tohono O'Odham Indian Reservation.

[35 FR 9747, June 13, 1970, as amended at 62 FR 65378, Dec. 12, 1997]

##### **§ 3825.1 Mining locations in Tohono O'Odham Indian Reservation in Arizona.**

(a) The procedure in the location of mining claims, performance of annual labor and the prosecution of patent proceedings therefor shall be the same as provided by the United States mining laws and regulations thereunder, with the additional requirements prescribed in this section.

(b) In addition to complying with the existing laws and regulations governing the recording of mining locations with the proper local recording officer, the locator of a mining claim within the Tohono O'Odham Indian Reservation shall furnish to the superintendent or other officer in charge of the reservation, within 90 days of such location, a copy of the location notice, together with a sum amounting to 5 cents for each acre and 5 cents for each fractional part of an acre embraced in the location for deposit with the Treasury of the United States to the credit of the Tohono O'Odham Tribe as yearly rental. Failure to make the required annual rental payment in advance each year until an application for patent has been filed for the claim shall be deemed sufficient grounds for invalidating the

claim. The payment of annual rental must be made to the superintendent or other officer in charge of the reservation each year on or prior to the anniversary date of the mining location.

(c) Where a mining claim is located within the reservation, the locator shall pay to the superintendent or other officer in charge of the reservation damages for the loss of any improvements on the land in such a sum as may be determined by the Secretary of the Interior to be a fair and reasonable value of such improvements, for the credit of the owner thereof. The value of such improvements may be fixed by the Commissioner, Bureau of Indian Affairs, with the approval of the Secretary of the Interior, and payment in accordance with such determination shall be made within 1 year from date thereof.

(d) At the time of filing with the manager an application for mineral patent for lands within the Tohono O'Odham Indian Reservation the applicant shall furnish, in addition to the showing required under the general mining laws, a statement from the superintendent or other officer in charge of the reservation, that he has deposited with the proper official in charge of the reservation for deposit in the Treasury of the United States to the credit of the Tohono O'Odham Tribe a sum equal to \$1 for each acre and \$1 for each fractional part of an acre embraced in the application for patent in lieu of annual rental, together with a statement from the superintendent or other officer in charge of the reservation that the annual rentals have been paid each year and that damages for loss of improvements, if any, have been paid.

(e) The Act provides that in case patent is not acquired the sum deposited in lieu of annual rentals shall be refunded. Where patent is not acquired, such sums due as annual rentals but not paid during the period of patent application shall be deducted from the sum deposited in lieu of annual rental. Applications for refund shall be filed in the office of the manager and should follow the general procedure in applications for repayment.

(f) Water reservoirs, charcos, water holes, springs, wells, or any other form

of water development by the United States or the Tohono O'Odham Indians shall not be used for mining purposes under the terms of the said Act of August 28, 1937, except under permit from the Secretary of the Interior approved by the Tohono O'Odham Indian Council.

(g) A mining location may not be located on any portion of a 10 acre legal subdivision containing water reservoirs, charcos, water holes, springs, wells or any other form of water development by the United States or the Indians except under a permit from the Secretary of the Interior approved by the Tohono O'Odham Indian Council which permit shall contain such stipulations, restrictions, and limitations regarding the use of the land for mining purposes as may be deemed necessary and proper to permit the free use of the water thereon by the United States or the Tohono O'Odham Indians.

(h) The term *locator* wherever used in this section shall include and mean his successors, assigns, grantees, heirs, and all others claiming under or through him.

[35 FR 9747, June 13, 1970, as amended at 62 FR 65378, Dec. 12, 1997]

### Subparts 3826–3827 [Reserved]

## PART 3830—LOCATING, RECORDING, AND MAINTAINING MINING CLAIMS OR SITES; GENERAL PROVISIONS

### Subpart A—Introduction

Sec.

3830.1 What is the purpose of parts 3830–3839?

3830.2 What is the scope of parts 3830–3839?

3830.3 Who may locate mining claims?

3830.5 Definitions.

### Subpart B—Providing Information to BLM

3830.8 How will BLM use the information it collects and what does it estimate the burden is on the public?

3830.9 What will happen if I record a document with BLM that I know contains false, erroneous, or fictitious information or statements?

### Subpart C—Mining Law Minerals

3830.10 Locatable minerals.

## § 3830.1

## 43 CFR Ch. II (10–1–08 Edition)

3830.11 Which minerals are locatable under the General Mining Law?

3830.12 What are the characteristics of a locatable mineral?

### Subpart D—BLM Service Charge and Fee Requirements

3830.20 Payment of service charges, location fees, initial maintenance fees, annual maintenance fees, and oil shale fees.

3830.21 What are the different types of service charges and fees?

3830.22 Will BLM refund service charges or fees?

3830.23 What types of payment will BLM accept?

3830.24 How do I make payments?

3830.25 When do I pay for recording a new notice or certificate of location for a mining claim or site?

### Subpart E—Failure To Comply With These Regulations

3830.90 Failure to comply with these regulations.

3830.91 What happens if I fail to comply with these regulations?

3830.92 What special provisions apply to oil placer mining claims?

3830.93 When are defects curable?

3830.94 How do I cure a defect in my compliance with parts 3830–3839?

3830.95 What if I pay only part of the service charges, location fees, or first-year maintenance fees for newly-recorded claims or sites?

3830.96 What if I pay only part of the service charges and fees for oil shale claims or previously-recorded mining claims or sites?

3830.97 What if I pay only part of the service charges for a notice of intent to locate mining claims on SRHA lands?

### Subpart F—Appeals

3830.100 How do I appeal a final decision by BLM?

SOURCE: 68 FR 61064, Oct. 24, 2003, unless otherwise noted.

## Subpart A—Introduction

### § 3830.1 What is the purpose of parts 3830–3839?

In this part 3830, references to “these regulations” are references to parts 3830 through 3839 of this chapter.

(a) These regulations describe the steps you, as a mining claimant, must take regarding mining claims or sites on the Federal lands under Federal law, to—

(1) Locate (see part 3832 of this chapter);

(2) Maintain (see parts 3834 through 3836 of this chapter);

(3) Amend (see part 3833, subpart B, of this chapter); and

(4) Transfer (see part 3833, subpart C, and part 3835, subpart B, of this chapter) mining claims or sites on the Federal lands under Federal law.

(b) These regulations apply to—

(1) Lode and placer mining claims (see part 3832, subpart B, of this chapter);

(2) Mill sites (see part 3832, subpart C, of this chapter);

(3) Tunnel sites (see part 3832, subpart D, of this chapter);

(4) Oil shale claims (see § 3830.92);

(5) Location of uncommon varieties of mineral materials (see § 3830.12(b));

(6) Delinquent co-claimants (see part 3837 of this chapter); and

(7) Mining claims and tunnel sites on Stockraising Homestead Act lands (see part 3838 of this chapter).

(c) In addition to these regulations, there are State law requirements that apply to you. If any State law conflicts with the requirements in these regulations, you must still comply with these regulations. These regulations do not describe State law requirements.

### § 3830.2 What is the scope of these regulations?

These regulations govern locating, recording, and maintaining mining claims, mill sites, and tunnel sites on all Federal lands. These regulations do not authorize locating any new mining claims on Federal lands closed to mineral entry, including units of the National Park Service.

(a) You must follow the recording and maintenance requirements in this part even if BLM has actual knowledge of the existence of your mining claims or sites through other means.

(b) Part 3838 of this chapter describes supplemental procedures for locating mining claims or sites on land subject to the Stockraising Homestead Act, 43 U.S.C. 291–299.

## Bureau of Land Management, Interior

## § 3830.5

(c) BLM is not the official recording office for ancillary documents concerning mining claims or sites, including but not limited to, leases, wills, judgments, liens, option agreements, and grubstake contracts.

### § 3830.3 Who may locate mining claims?

Persons qualified to locate mining claims or sites under this part include:

(a) United States citizens who have reached the age of discretion under the law of their State of residence;

(b) Legal immigrants who have filed an application for citizenship with the proper Federal agency;

(c) Business entities organized under the laws of any state, including but not limited to corporations and partnerships; or

(d) Duly constituted and appointed agents acting on behalf of locators qualified under paragraph (a), (b), or (c) of this section.

### § 3830.5 Definitions.

*Aliquot part* means a legal subdivision of a section of a township and range, except fractional lots, by division into halves or quarters.

*Amendment* means the act of making a change in a previously recorded mining claim or site as described in § 3833.21 of this chapter.

*Annual FLPMA documents* means either a notice of intent to hold, or an affidavit of assessment work, as prescribed in section 314(a) of FLPMA (43 U.S.C. 1744(a)). The term “proof of labor” (commonly used to describe this document) means the same as “affidavit of assessment work” as used in this part. See parts 3835 and 3836 of this chapter for further information.

*Assessment year* means a period of 12 consecutive months beginning at 12 noon on September 1 each year. See part 3836 of this chapter for further information.

*Bench placer claim* means a placer mining claim located on terraces or former floodplains made of gravel or sediment or both on the valley wall or slope above the current riverbed, and created when the river previously was at a higher topographic level than now.

*BLM State Office* means the Bureau of Land Management State Office listed

in § 1821.10 of this chapter having jurisdiction over the land in which the mining claims or sites are situated. The Northern District Office in Fairbanks may also receive and accept documents, filings, and fees for mining claims or sites in Alaska.

*Claimant* means the person under state or Federal law who is the owner of all or any part of an unpatented mining claim or site.

*Closed to mineral entry* means the land is not available for the location of mining claims or sites because Congress, BLM, or another surface managing agency has withdrawn or otherwise segregated the lands from the operation of the General Mining Law, often subject to valid existing rights.

*Control* means actual control, legal control, or the power to exercise control, through or by common directors, officers, stockholders, a voting trust, or a holding company or investment company, or any other means. BLM may determine, based on evidence that we find adequate, that a stockholder who is not an officer or director, or who is not a majority shareholder, of a company or corporation exercises control as defined in these regulations.

*Discovery* means that a mining claimant has found a valuable mineral deposit.

*Federal lands* means any lands or interest in lands owned by the United States, subject to location under the General Mining Law, including, but not limited to, those lands within forest reservations in the National Forest System and wildlife refuges in the National Wildlife Refuge System.

*Filed* means a document is—

(a) Received by BLM on or before the due date; or

(b)(1) Postmarked or otherwise clearly identified as sent on or before the due date by a *bona fide* mail delivery service, and

(2) Received by the appropriate BLM state office either:

(i) Within 15 calendar days after the due date; or

(ii) On the next business day after the 15th day, if the 15th day is not a business day (see subpart 1822 of this chapter).

*Final certificate* means a form that BLM issues during its processing of a

mineral patent application. (In 1999, BLM changed this form from two-part form to a single form that BLM completes toward the end of the patenting process.) The form indicates that BLM has reviewed the mineral patent application and conducted a validity determination and concluded that the applicant has:

- (a) Met all of the paperwork requirements;
- (b) Published notice of the patent application and received no adverse claims;
- (c) Paid the purchase price; and
- (d) Discovered a valuable mineral deposit on mining claims or located mill sites on lands that are not mineral-in-character and are properly used or occupied.

*FLPMA* means the Federal Land Policy and Management Act of 1976, as amended (43 U.S.C. 1701 *et seq.*).

*Forfeit* or *forfeiture* means the voidance or invalidation of an unpatented mining claim or site. The terms “abandoned and void”, “null and void,” “void ab initio” and “forfeited” have the same effect in these regulations.

*General Mining Law* means the Act of May 10, 1872, as amended, (codified as 30 U.S.C. 22–54).

*Gulch placer claim* means a placer claim located on the bed of a river contained within steep, nonmineral canyon walls. The form of the river valley and nonmineral character of the valley walls preclude the location of the claim by aliquot parts and a metes and bounds description is necessary.

*Local recording office* means the county or state government office established under state law where you are usually required to record all legal documents including, but not limited to, deeds and wills.

*Location fee* means the one-time fee that 30 U.S.C. 28g requires you to pay for all new mining claims and sites at the time you record them with BLM. See § 3830.21 for the table of fees.

*Maintenance fee* means the initial or annual fee that 30 U.S.C. 28f requires you to pay to hold and maintain mining claims or sites. See § 3830.21 for the table of fees.

*Metes and bounds* means a method of describing a parcel of land that does not conform to the rectangular U.S.

Public Land Survey System, using compass bearings and distances from a known point to a specified point on the parcel and then by using a continuous and sequential set of compass bearings and distances beginning at the point of beginning, continuing along and between the corners or boundary markers of the parcel’s outer perimeter, until returning to the point of beginning.

*Mineral-in-character* means land that is known, or can reasonably be inferred from the available geologic evidence, to contain:

- (a) Valuable minerals subject to location under the general mining law for purpose of locating mining claims or sites;
- (b) Mineral materials for purposes of disposal under part 3600 of this chapter.

*Mineral Leasing Acts* means the Mineral Leasing Act of [February 25,] 1920, as amended (30 U.S.C. 181 *et seq.*); the Geothermal Steam Act of 1970, as amended (30 U.S.C. 1001 *et seq.*); the Mineral Leasing Act for Acquired Lands of 1947, as amended, (30 U.S.C. 351 *et seq.*); and including all Acts referenced in 30 U.S.C. 505. The definition pertains to all minerals that BLM administers under Groups 3100, 3200, 3400, and 3500 of this chapter.

*Mineral materials* means those materials that—

- (a) BLM may sell under the Mineral Materials Act of July 31, 1947 (30 U.S.C. 601–604), as amended by the Surface Resources Act of 1955 (30 U.S.C. 601, 603, and 611–615); and
- (b) BLM administers under part 3600 of this chapter.

*Multiple Mineral Development Act* means the Act of August 13, 1954, as amended (30 U.S.C. 521–531).

*Nonmineral land* means land that is not mineral-in-character.

*Open to mineral entry* means that the land is open to the location of mining claims or sites under the General Mining Law.

*Patent* means a document conveying title to Federal surface and/or minerals.

*Recording* means the act of filing a notice or certificate of location with the local recording office and BLM, as required by FLPMA.

*Related party* means:

(a) The spouse and dependent children of the claimant as defined in section 152 of the Internal Revenue Code of 1986; or

(b) A person who controls, is controlled by, or is under common control with the claimant.

*Segregate or segregation* means the Department of the Interior has closed the affected lands to mineral entry or withdrawn the affected lands from mining claim location, land transactions, or other uses as specified in a statute, regulation, or public land order affecting the land in question. The land remains segregated until the statutory period has expired, BLM ends the segregation under §2091.2-2 of this chapter, or the Department of the Interior removes the notation of segregation from its records, whichever occurs first.

*Service charge* means an administrative fee that BLM assesses under this part to cover the cost of processing documents.

*Site* means either an unpatented mill site authorized under 30 U.S.C. 42 or a tunnel site authorized under 30 U.S.C. 27.

*Small miner* means a claimant who, along with all related parties, holds no more than 10 mining claims or sites on Federal lands on the date annual maintenance fees are due, and meets the additional requirements of part 3835 of this chapter.

*Split estate lands* means that lands where United States owns the mineral estate as part of the public domain, but not the surface.

*Surface Resources Act* means the Act of July 23, 1955 (30 U.S.C. 601, 603, and 611-615).

*Unpatented mining claim* means a lode mining claim or a placer mining claim located and maintained under the General Mining Law for which BLM has not issued a mineral patent under 30 U.S.C. 29.

## Subpart B—Providing Information to BLM

### § 3830.8 How will BLM use the information it collects and what does it estimate the burden is on the public?

(a) The Office of Management and Budget has approved the collections of information contained in parts 3830-3838 of this chapter under 44 U.S.C. 3501 *et seq.* and has assigned clearance number 1004-0114.

(b) BLM will use the information collected to:

(1) Keep records of mining claims or sites;

(2) Maintain ownership records to those mining claims or sites;

(3) Determine the geographic location of the mining claims or sites recorded for proper land management purposes; and

(4) Determine which mining claims or sites the claimant wishes to continue to hold under applicable Federal statutes.

(c) BLM estimates that the public reporting burden for this information averages 8 minutes per response. This burden includes time for reviewing instructions, searching existing records, gathering and maintaining the data collected, and completing and reviewing the information collected.

(d) Send any comments on information collection, including your views on the burden estimate and how to reduce the burden, to: the Information Collection Clearance Officer (WO-630), Bureau of Land Management, Eastern States Office, 7450 Boston Boulevard, Springfield, Virginia 22153; and the Office of Management and Budget, Paperwork Reduction Project, 1004-0114, Washington, D.C. 20503.

### § 3830.9 What will happen if I file a document with BLM that I know contains false, erroneous, or fictitious information or statements?

If you file a document that you know contains false, erroneous, or fictitious information or statements, you may be subject to criminal penalties under 18 U.S.C. 1001 and 43 U.S.C. 1212. The maximum penalty is 5 years in prison and/or a fine of \$250,000.

**Subpart C—Mining Law Minerals**

**§ 3830.10 Locatable minerals.**

**§ 3830.11 Which minerals are locatable under the General Mining Law?**

Minerals are locatable if they are:

- (a) Subject to the General Mining Law;
- (b) Not leasable under the Mineral Leasing Acts; and
- (c) Not salable under the Mineral Materials Act of 1947 and Surface Resources Act of 1955, 30 U.S.C. 601–615 (see parts 3600 through 3620 of this chapter).

**§ 3830.12 What are the characteristics of a locatable mineral?**

(a) Minerals are locatable if they meet the requirements in § 3830.11 and are:

- (1) Recognized as a mineral by the scientific community; and
- (2) Found on Federal lands open to mineral entry.

(b) Under the Surface Resources Act, certain varieties of mineral materials are locatable if they are uncommon because they possess a distinct and special value. As provided in *McClarty v. Secretary of the Interior*, 408 F.2d 907 (9th Cir. 1969), we determine whether mineral materials have a distinct and special value by:

- (1) Comparing the mineral deposit in question with other deposits of such minerals generally;

(2) Determining whether the mineral deposit in question has a unique physical property;

(3) Determining whether the unique property gives the deposit a distinct and special value;

(4) Determining whether, if the special value is for uses to which ordinary varieties of the mineral are put, the deposit has some distinct and special value for such use; and

(5) Determining whether the distinct and special value is reflected by the higher price that the material commands in the market place.

(c) Block pumice having one dimension of 2 or more inches is an uncommon variety of mineral material under the Surface Resources Act, and is subject to location under the mining laws.

(d) Limestone of chemical or metallurgical grade, or that is suitable for making cement, is subject to location under the mining laws.

(e) Gypsum suitable for the manufacture of wall board or plaster, or uses requiring a high state of purity, is subject to location under the mining laws.

**Subpart D—BLM Service Charge and Fee Requirements**

**§ 3830.20 Payment of service charges, location fees, initial maintenance fees, annual maintenance fees and oil shale fees.**

**§ 3830.21 What are the different types of service charges and fees?**

The following table lists service charges, maintenance fees, location fees, and oil shale fees (all cross-references refer to this chapter):

Transaction	Amount due per mining claim or site	Waiver available
(a) Recording a mining claim or site location (part 3833).	(1) A total sum which includes (i) the processing fee for notices of location found in the fee schedule in § 3000.12 of this chapter. (ii) A one-time \$30 location fee ..... (iii) An initial \$125 maintenance fee .....	No. No. No.
(b) Amending a mining claim or site location (§ 3833.20).	The processing fee for amendment of location found in the fee schedule in § 3000.12 of this chapter.	No.
(c) Transferring a mining claim or site (§ 3833.30).	The processing fee for transfer of mining claim/site found in the fee schedule in § 3000.12 of this chapter.	No.
(d) Maintaining a mining claim or site for one assessment year (part 3834).	A \$125 annual maintenance fee .....	Yes, see part 3835.
(e) Recording an annual FLPMA filing (§ 3835.30).	The processing fee for recording an annual FLPMA filing found in the fee schedule in § 3000.12 of this chapter.	No.

## Bureau of Land Management, Interior

## § 3830.25

Transaction	Amount due per mining claim or site	Waiver available
(f) Submitting a petition for deferment of assessment work (§ 3836.20).	The processing fee for deferment of assessment work found in the fee schedule in § 3000.12 of this chapter.	No.
(g) Maintaining an oil shale placer mining claim (§ 3834.11(b)).	An annual \$550 fee .....	No.
(h) Recording a notice of intent to locate mining claims on Stockraising Homestead Act Lands (part 3838).	The filing fee for recording a notice of intent to locate mining claims on Stockraising Homestead Act Lands found in the fee schedule in § 3000.12 of this chapter.	No.

[68 FR 61064, Oct. 24, 2003, as amended at 69 FR 40296, July 1, 2004; 70 FR 58879, Oct. 7, 2005; 72 FR 50889, Sept. 5, 2007]

### § 3830.22 Will BLM refund service charges or fees?

(a) BLM will not refund service charges, except for overpayments.

(b) BLM will refund maintenance and location fees if:

(1) At the time you or your predecessor in interest located the mining claim or site, the location was on land not open to mineral entry or otherwise not available for mining claim or site location; or

(2) At the time you paid the fees, the mining claim or site was void.

(c) BLM will apply maintenance and location fee overpayments to future years if you so request.

### § 3830.23 What types of payment will BLM accept?

(a) BLM will accept the following types of payments:

(1) U.S. currency;

(2) Postal money order payable in U.S. dollars to the Department of the Interior—Bureau of Land Management;

(3) Check or other negotiable instrument payable in U.S. dollars to the Department of the Interior—Bureau of Land Management;

(4) Valid credit card that is acceptable to the BLM; or

(5) An authorized debit from a declining deposit account with BLM.

(i) You may maintain a declining deposit account with the BLM State Office where your mining claims or sites are recorded.

(ii) BLM will deduct service charges and fees or add overpayments to the account only when you authorize us to do so.

(b) If the issuing institution of your check, negotiable instrument, or credit card refuses to pay and it is not be-

cause the institution made a mistake, BLM will treat the service charges and fees as unpaid.

### § 3830.24 How do I make payments?

(a) You or your representative may bring payments to the BLM State Office by close of business on or before the due date.

(b) If you use a credit card—

(1) On or before the due date, you must send or fax a written authorization, bearing your signature; or

(2) You may authorize BLM to use your credit card by telephone if you can satisfactorily establish your identity.

(c) You may send payments using a *bona fide* mail delivery service.

(1) The payment must be postmarked or clearly identified by the mail delivery service as being sent on or before the due date; and

(2) The BLM State Office must receive the payment no later than 15 calendar days after the due date.

### § 3830.25 When do I pay for recording a new notice or certificate of location for a mining claim or site?

You must pay the service charge, location fee, and initial maintenance fee, in full, as provided in § 3830.21 of this chapter, at the time you record new notices or certificates of location with BLM.

**Subpart E—Failure To Comply With These Regulations**

**§ 3830.90 Failure to comply with these regulations.**

**§ 3830.91 What happens if I fail to comply with these regulations?**

(a) You will forfeit your mining claims or sites if you fail to—

(1) Record a mining claim or site within 90 days after you locate it;

(2) Pay the location fee or initial maintenance fee within 90 days after you locate it;

(3) Pay the annual maintenance fee on or before the due date;

(4) Submit a small miner waiver request on or before the due date (see § 3835.1) and also fail to pay the annual maintenance fee on or before the due date;

(5) List any claims or sites that you own on your small miner waiver request and fail to pay an annual maintenance fee for the missing claims or sites on or before the due date;

(6) Cure any defects in your timely small miner waiver request or pay the maintenance fee within the allowed time after BLM notifies you of the defects;

(7) File an annual FLPMA filing on or before the due date, as applicable; or

(8) Submit missing documentation or a complete payment after BLM notifies you that a filing or payment you made was defective, within the time allowed in the BLM notice.

(b) You will forfeit your mining claim or site if you locate your mining claim or site on lands closed to mineral entry at the time you locate it.

(c) Even if you forfeit your mining claims or sites, you remain responsible for—

(1) All reclamation and performance requirements imposed by subparts 3802, 3809, or 3814 of this chapter; and

(2) All other legal responsibilities imposed by other agencies or parties who have management authority over surface or subsurface operations.

(d) Under the circumstances described in §§ 3830.93 through 3830.97, you may cure a failure to comply with these regulations.

**§ 3830.92 What special provisions apply to oil placer mining claims?**

(a) Under 30 U.S.C. 188(f), you, as an oil placer mining claimant, may seek to convert an oil placer mining claim to a noncompetitive oil and gas lease under section 17(e) of the Mineral Leasing Act (30 U.S.C. 226(e)), if:

(1) BLM declared your oil placer mining claim abandoned and void under section 314 of FLPMA;

(2) Your failure to comply with section 314 of FLPMA was inadvertent, justifiable, or not due to lack of reasonable diligence;

(3) You or your predecessors in interest validly located the unpatented oil placer mining claim before February 25, 1920;

(4) The claim has been or is currently producing or is capable of producing oil or gas; and

(5) You have submitted a petition asking BLM to issue a noncompetitive oil and gas lease. Your petition must include the required rental and royalty payments, including back rental and royalty accruing from the statutory date of abandonment of the oil placer mining claim.

(b) If BLM chooses to issue a noncompetitive oil and gas lease, the lease will be effective on the date that BLM declared your unpatented oil placer mining claim abandoned and void.

**§ 3830.93 When are defects curable?**

(a) If there is a defect in your compliance with a statutory requirement, the defect is incurable if the statute does not give the Secretary authority to permit exceptions (see §§ 3830.91 and 3833.91 of this chapter). If your payment, recording, or filing has incurable defects, the affected mining claims or sites are statutorily forfeited.

(b) If there is a defect in your compliance with a regulatory, but not statutory, requirement, the defect is curable. You may correct curable defects when BLM gives you notice. If you fail to cure the defect within the time BLM allows, you will forfeit your mining claims or sites.

[68 FR 61064, Oct. 24, 2003; 68 FR 74197, Dec. 23, 2003]

**§ 3830.94 How may I cure a defect in my compliance with these regulations?**

(a)(1) When BLM determines that you have filed any document that is defective or underpaid a fee or service charge, BLM will send a notice to you by certified mail-return receipt requested at the address you gave on:

- (i) Your notice or certificate of location;
- (ii) An address correction you have filed with BLM; or
- (iii) A valid transfer document filed with BLM.

(2) The notice provided for in paragraph (a)(1) of this section constitutes legal service even if you do not actually receive the notice or decision. See § 1810.2 of this chapter.

(b) If you have filed any defective document other than a defective fee waiver request, you must cure the defects within 30 days of receiving BLM's notification of the defects.

(c) If you have submitted a defective fee waiver request, you must cure the defects or pay the annual maintenance fees within 60 days of receiving BLM's notification of the defects.

(d) If BLM does not receive the requested information in the time allowed, or if the matter is statutorily not curable, you will receive a final decision from BLM that you forfeited the affected mining claims or sites.

**§ 3830.95 What if I pay only part of the service charges, location fees, or first year maintenance fees for newly-recorded claims or sites?**

(a) If you pay only part of the service charges, maintenance fees, or location fees when recording new claims or sites, BLM will—

(1) Assign serial numbers to each mining claim or site;

(2) Treat the partial payment as payment of location and maintenance fees and apply the partial payment to the mining claims or sites in serial number order until the money runs out; and

(3) Send a notice to you that you must pay any outstanding service charges as described in § 3830.94. For example, BLM will apply the money to cover the location and maintenance fees for as many mining claims or sites as possible. BLM will return any re-

maining certificates or notices for which we cannot apply full payment of location and maintenance fees. BLM will apply any remaining funds as service charges in serial number order until the money runs out. BLM will then notify you if you must pay any outstanding service charges for mining claims or sites for which you paid location and maintenance fees, as provided in § 3830.94.

(b) If you want to resubmit the new location notices or certificates that BLM returned to you, you must do so with the complete service charges, location fees and maintenance fees within 90 days of the original date of location of the claim or site as defined under state law, or you will forfeit the affected mining claims or sites.

(c) BLM will not record your mining claims or sites until you pay the full amount of all charges and fees for those claims or sites.

**§ 3830.96 What if I pay only part of the service charges and fees for oil shale claims or previously-recorded mining claims or sites?**

(a) If you pay only part of the service charges due for any document filings or only part of the annual maintenance fees, or oil shale fees, for previously-recorded mining claims or sites, or any combination of these fees and charges, absent other instructions from you, BLM will apply the partial payment in serial number order until the money runs out.

(b) For any claims or sites for which there are no funds in your partial payment to pay the maintenance fees, oil shale fees, or location fees, you will forfeit the mining claims or sites not covered by your partial payment unless you submit the additional funds necessary to complete the full payment by the due date.

(c) For any claims or sites for which there are no funds in your partial payment to pay the service charges, BLM will send a notice to you that you must pay the outstanding service charges as described in § 3830.94.

## § 3830.97

### § 3830.97 What if I pay only part of the service charges for a notice of intent to locate mining claims on SRHA lands?

For notices of intent to locate mining claims (NOITL) under the Stockraising Homestead Act (see part 3838 of this chapter for information regarding the Stockraising Homestead Act and NOITLs), BLM will not accept a NOITL unless we receive your payment of the required service charges. BLM will return the NOITL to you without taking any further action. See § 3830.21 of this part for the amount of the service charge for a NOITL.

## Subpart F—Appeals

### § 3830.100 How do I appeal a final decision by BLM?

If you are adversely affected by a BLM decision under parts 3830–3839, you may appeal the decision in accordance with parts 4 and 1840 of this title.

## PART 3831—MINERAL LANDS AVAILABLE FOR LOCATING MINING CLAIMS OR SITES [RESERVED]

## PART 3832—LOCATING MINING CLAIMS OR SITES

### Subpart A—Locating Mining Claims or Sites

Sec.

3832.1 What does it mean to locate mining claims or sites?

3832.10 Procedures for locating mining claims or sites.

3832.11 How do I locate mining claims or sites?

3832.32 How much land may I include in my mill site?

3832.33 How do I locate a mill site?

## 43 CFR Ch. II (10–1–08 Edition)

3832.34 How may I use my mill site?

### Subpart D—Tunnel Sites

3832.40 Tunnel sites.

3832.41 What is a tunnel site?

3832.42 How do I locate a tunnel site?

3832.43 How may I use a tunnel site?

3832.44 What rights do I have to minerals within my tunnel site?

3832.45 How do I obtain any minerals that I discover within my tunnel site?

### Subpart E—Defective Locations

3832.90 Defects in the location of mining claims and sites.

3832.91 How do I amend a mining claim or site location if it exceeds the size limitations?

AUTHORITY: 30 U.S.C. 22 *et seq.*; 43 U.S.C. 2, 1201, 1457, 1740, 1744.

SOURCE: 68 FR 61069, Oct. 24, 2003, unless otherwise noted.

## Subpart A—Locating Mining Claims or Sites

### § 3832.1 What does it mean to locate mining claims or sites?

(a) Locating a mining claim or site means:

(1) Establishing the exterior lines of a mining claim or site on lands open to mineral entry to identify the exact land claimed; and

(2) Recording a notice or certificate of location as required by state and Federal law and by this part.

(b) You will find—

(1) Location requirements in this part;

(2) Recording requirements in part 3833 of this chapter;

(3) Requirements for transferring an interest in a mining claim or site in § 3833.30 of this chapter; and

(4) Annual fee requirements for mining claims and sites in parts 3834, 3835, and 3836 of this chapter.

### § 3832.10 Procedures for locating mining claims or sites.

### § 3832.11 How do I locate mining claims or sites?

(a) You must follow both state and Federal law.

(b) Your lode or placer claim is not valid until you make a discovery within the boundaries of the claim.

(c) To locate a claim or site, you must—

(1) Make certain that the land on which you are locating the claim or site is Federal land that is open to mineral entry

(2) Stake and monument the corners of a mining claim or site which meets applicable state monumenting requirements and the size limitations described in § 3832.22 for lode and placer claims, § 3832.32 for mill sites, and § 3832.42 for tunnel sites;

(3) Post the notice of location in a conspicuous place on the claim or site. The notice must include:

(i) The name or names of the locators;

(ii) The date of the location; and

(iii) A description of the claim or site;

(iv) The name or number of the claim or site, or both, if the claim or site has both;

(4) Record the notice or certificate of location in the local recording office and the BLM State Office with jurisdiction according to the procedures in part 3833;

(5) Follow all other relevant state law requirements; and

(6) Comply with the specific requirements for lode claims, placer claims, mill sites, or tunnel sites in this part.

**§ 3832.12 When I record a mining claim or site, how do I describe the lands I have claimed?**

(a) *General requirements.* (1) All claims and sites. You must describe the land by state, meridian, township, range, section and by aliquot part to the quarter section. To obtain the land description, you must use an official survey plat or other U.S. Government map that is based on the surveyed or protracted U.S. Public Land Survey System. If you cannot describe the land by aliquot part (e.g., the land is unsurveyed), you must provide a metes and bounds description that fixes the position of the claim corners with respect to a specified claim corner, discovery monument, or official survey monument. In all cases, your description of the land must be as compact and regular in form as reasonably possible and should conform to the U.S. Public Land Survey System and its

rectangular subdivisions as much as possible; and

(2)(i) You must file either—

(A) A topographical map published by the U.S. Geological Survey with a depiction of the claim or site; or

(B) A narrative or sketch describing the claim or site and tying the description to a natural object, permanent monument or topographic, hydrographic, or man-made feature.

(ii) You must show on a map or sketch the boundaries and position of the individual claim or site by aliquot part within the quarter section accurately enough for BLM to identify the mining claims or sites on the ground.

(iii) You may show more than one claim or site on a single map or describe more than one claim or site in a single sketch—

(A) If they are located in the same general area; and

(B) If the individual mining claims or sites are clearly identified.

(iv) You are not required to employ a professional surveyor or engineer to establish the location's position on the ground.

(b) *Lode claims.* You must describe lode claims by metes and bounds beginning at the discovery point on the claim and include a tie to natural objects or permanent monuments including:

(1) Township and section survey monuments;

(2) Official U.S. mineral survey monuments;

(3) Monuments of the National Geodetic Reference System;

(4) The confluence of streams or point of intersection of well-known gulches, ravines, or roads, prominent buttes, and hills; or

(5) Adjoining claims or sites.

(c) *Placer claims.* (1) You must describe placer claims by aliquot part and complete lots using the U.S. Public Land Survey System and its rectangular subdivisions except when placer claims are—

(i) On unsurveyed Federal lands;

(ii) Gulch or bench placer claims; or

(iii) Bounded by other mining claims or nonmineral lands.

(2) For placer mining claims that are on unsurveyed Federal lands or are gulch or bench placer claims:

(i) You must describe the lands by protracted survey if the BLM has a protracted survey of record; or

(ii) You may describe the lands by metes and bounds, if a protracted survey is not available or if the land is not amenable to protraction.

(3) If you are describing an association placer claim by metes and bounds, you must meet the following requirements, according to the number of persons in your association, as described in *Snow Flake Fraction Placer*, 37 Pub. Lands Dec. 250 (1908), in order to keep your claim in compact form and not split Federal lands into narrow, long or irregular shapes:

(i) A location by 1 or 2 persons must fit within the exterior boundaries of a square 40-acre parcel;

(ii) A location by 3 or 4 persons must fit within the exterior boundaries of 2 square 40-acre contiguous parcels;

(iii) A location by 5 or 6 persons must fit within the exterior boundaries of 3 square contiguous 40-acre parcels; and

(iv) A location by 7 or 8 persons must fit within the exterior boundaries of 4 square contiguous 40-acre parcels.

### Subpart B—Types of Mining Claims

#### § 3832.20 Lode and placer mining claims.

#### § 3832.21 How do I locate a lode or placer mining claim?

(a) *Lode claims.* (1) Your lode claim is not valid until you have made a discovery.

(2) *Locating a lode claim.* You may locate a lode claim for a mineral that:

(i) Occurs as veins, lodes, ledges, or other rock in place;

(ii) Contains base and precious metals, gems and semi-precious stones, and certain industrial minerals, including but not limited to gold, silver, cinnabar, lead, tin, copper, zinc, fluorite, barite, or other valuable deposits; and

(iii) Does not occur as bedded rock (stratiform deposits such as gypsum or limestone) or is not a deposit of placer, alluvial (deposited by water), eluvial (deposited by wind), colluvial (deposited by gravity), or aqueous origin.

(3) *Establishing extralateral rights.* If the minerals are contained within a

vein, lode, or ledge and the vein, lode, or ledge extends through the endlines of your lode claim, you have extra-lateral rights to pursue the down-dip extension of the vein, lode, or ledge to the point where the vein, lode, or ledge intersects a vertical plain projected parallel to the end lines and outside the sideline boundaries of your lode claim if—

(i) The top or apex of the vein, lode, or ledge lies on or under the surface within the interior boundaries of the lode claim; and

(ii) The long axis, and therefore the side lines, of the lode claim are substantially parallel to the course of the vein, lode, or ledge.

(4) *Preserving extralateral rights.* In order to preserve your extralateral rights, you should determine, if possible, the general course of the vein in either direction from the point of discovery in order to mark the correct boundaries of the claim. You should expose the vein, lode, or ledge by—

(i) Tracing the vein or lode on the surface; or

(ii) Drilling a hole, sinking a shaft, or running a tunnel or drift to a sufficient depth.

(b) *Placer claims.* (1) Your placer claim is not valid until you have made a discovery.

(2) Each 10-acre aliquot part of your placer claim must be mineral-in-character.

(3) You may locate a placer claim for minerals that are—

(i) River sands or gravels bearing gold or valuable detrital minerals;

(ii) Hosted in soils, alluvium (deposited by water), eluvium (deposited by wind), colluvium (deposited by gravity), talus, or other rock not in its original place;

(iii) Bedded gypsum, limestone, cinders, pumice, and similar mineral deposits; or

(iv) Mineral-bearing brine (water saturated or strongly impregnated with salts and containing ancillary locatable minerals) not subject to the mineral leasing acts where a mineral subject to the General Mining Law can be extracted as the primary valuable mineral.

(4) Building stone deposits must by law be located as placer mining claims

## Bureau of Land Management, Interior

## § 3832.34

(30 U.S.C. 161). If you have located a building stone placer claim, the lands on which you located the claim must be chiefly valuable for mining building stone.

### § 3832.22 How much land may I include in my mining claim?

(a) *Lode claims.* Lode claims must not exceed 1,500 by 600 feet. If there is a vein, lode, or ledge, each lode claim is limited to a maximum of 1,500 feet along the course of the vein, lode, or ledge and a maximum of 300 feet in width on each side of the middle of the vein, lode, or ledge.

(b) *Placer claims.* (1) An individual placer claim may not exceed 20 acres in size.

(2) An association placer claim may not exceed 160 acres. Within the association, each person or business entity may locate up to 20 acres. To obtain the full 160 acres, the association must consist of at least eight co-locators. You may locate smaller association claims. Thus, three co-locators may jointly locate an association placer claim no larger than 60 acres. You may not use the names of other persons as dummy locators (fictitious locators) to locate an association placer claim for your own benefit.

## Subpart C—Mill Sites

### § 3832.30 Mill sites.

#### § 3832.31 What is a mill site?

A mill site is a location of nonmineral land not contiguous to a vein or lode that you can use for activities reasonably incident to mineral development on, or production from, the unpatented or patented lode or placer claim with which it is associated.

(a) A dependent mill site is used for activities that support a particular patented or unpatented lode or placer mining claim or group of mining claims.

(b) An independent or custom mill site—

(1) Is not dependent on a particular mining claim but provides milling or reduction processing for nearby lode mines or a lode mining district;

(2) Is used to mill, process, and reduce either—

(i) Ores for other miners on a contractual basis; or

(ii) Ores that are purchased by the independent or custom mill site owner.

(3) You may not have a custom or independent mill site for processing materials from placer mining claims.

### § 3832.32 How much land may I include in my mill site?

The maximum size of an individual mill site is 5 acres. You may locate more than one mill site per mining claim if you use each site for at least one of the purposes described in § 3832.34 of this part. You may locate only that amount of mill site acreage that is reasonably necessary to be used or occupied for efficient and reasonably compact mining or milling operations.

### § 3832.33 How do I locate a mill site?

(a) You may locate a mill site in the same manner as a lode or placer mining claim, except that—

(1) It must be on land that is not mineral-in-character; and

(2) You must use or occupy each two and a half acre portion of a mill site in order for that portion of the mill site to be valid.

(b) If the United States does not own the surface estate of a particular parcel of land, you may not locate a mill site on that land under the General Mining Law or the Stockraising Homestead Act (see part 3838 of this chapter).

### § 3832.34 How may I use my mill site?

(a) Upon obtaining authorization under the surface management regulations of the surface managing agency, you may use and occupy dependent mill sites for:

(1) Placement of grinding, crushing, or milling facilities (such as rod and ball mills, cone crushers, and floatation cells) and reduction facilities (such as smelting, electro-winning, roasters, autoclaves, and leachate recovery);

(2) Mine administrative and support buildings, warehouses and maintenance buildings, electrical plants and substations;

(3) Tailings ponds and leach pads;

(4) Rock and soil dumps;

(5) Water and process treatment plants; and

## **§ 3832.40**

(6) Any other use that is reasonably incident to mine development and operation, except for uses exclusively supporting reclamation or mine closure.

(b) Upon obtaining authorization under the surface management regulations of the surface managing agency, you may use and occupy independent mill sites for processing metallic minerals from lode claims using:

(1) Quartz or stamp mills; or

(2) Reduction works, including placement of grinding, crushing, or milling facilities (such as rod and ball mills, cone crushers, and floatation cells), reduction facilities (such as smelting, electro-winning, roasters, autoclaves, and leachate recovery), tailings ponds, and leach pads.

### **Subpart D—Tunnel Sites**

#### **§ 3832.40 Tunnel sites.**

##### **§ 3832.41 What is a tunnel site?**

A tunnel site is a subsurface right-of-way under Federal land open to mineral entry. It is used for access to lode mining claims or to explore for blind or undiscovered veins, lodes, or ledges not currently claimed or known to exist on the surface.

##### **§ 3832.42 How do I locate a tunnel site?**

You may locate a tunnel site by:

(a) Erecting a substantial post, board, or monument at the face of the tunnel, which is the point where the tunnel enters cover;

(b) Placing a location notice or certificate on the post, board, or monument that includes:

(1) The names of the claimants;

(2) The actual or proposed course or direction of the tunnel;

(3) The height and width of the tunnel; and

(4) The course and distance from the face or starting point to some permanent well-known natural objects or permanent monuments, in the same manner as required to describe a lode claim (see § 3832.12(a) and (b)); and

(c) Placing stakes or monuments on the surface along the boundary lines of the tunnel at proper intervals as required under state law from the face of

## **43 CFR Ch. II (10–1–08 Edition)**

the tunnel for 3,000 feet or to the end of the tunnel, whichever is shorter.

[68 FR 61064, Oct. 24, 2003; 68 FR 74197, Dec. 23, 2003]

##### **§ 3832.43 How may I use a tunnel site?**

You may use the tunnel site for subsurface access to a lode claim or to explore for and acquire previously unknown lodes, veins, or ledges within the confines of the tunnel site.

##### **§ 3832.44 What rights do I have to minerals within my tunnel site?**

(a) If you located your tunnel site in good faith, you may acquire the right to any blind veins, ledges, or lodes cut, discovered, or intersected by your tunnel, by locating a lode claim, if they—

(1) Are located within a radius of 1,500 feet from the tunnel axis; and

(2) Were not previously known to exist on the surface and within the limits of your tunnel.

(b) Your site is protected from other parties making locations of lodes within the sidelines of the tunnel and within the 3,000-foot length of the tunnel, unless such lodes appear upon the surface or were previously known to exist.

(c) You must diligently work on the tunnel site. If you cease working on it for more than 6 consecutive months, you will lose your right to possess all unknown, undiscovered veins, lodes, or ledges that your tunnel may intersect.

##### **§ 3832.45 How do I obtain any minerals that I discover within my tunnel site?**

(a) Even if you have located the tunnel site, you must separately locate a lode claim to acquire the possessory right to a blind vein, lode, or ledge you have discovered within the boundaries of the tunnel site sidelines.

(b) The date of location of your lode claim is retroactive to the date of location of your tunnel site.

**Subpart E—Defective Locations****§ 3832.90 Defects in the location of mining claims and sites.****§ 3832.91 How do I amend a mining claim or site location if it exceeds the size limitations?**

(a) You may correct defects in your location of a mining claim, mill site, or tunnel site by filing an amended notice of location (see § 3833.20 of this chapter on conditions allowing amendments and how to record them.)

(b) For placer claims or mill sites that you located using an irregular survey or lotting of irregular sections, you may use the “Rule of Approximation” to determine allowable acreage. The Rule of Approximation applies only to surveyed public lands. It was developed to determine maximum allowable acreage for land entries (placer claims in this part) where the excess acreage is less than the difference would be if the smallest legal subdivision is excluded from the location or entry. In no case may you use the rule to obtain more acreage than allowed under the applicable law. (See *Henry C. Tingley*, 8 Pub. Lands Dec. 205 (1889)).

**PART 3833—RECORDING MINING CLAIMS AND SITES****Subpart A—Recording Process**

Sec.

3833.1 Why must I record mining claims and sites?

3833.10 Procedures for recording mining claims and sites.

3833.11 How do I record mining claims and sites?

**Subpart B—Amending Mining Claims and Sites**

3833.20 Amending mining claims and sites.

3833.21 When may I amend a notice or certificate of location?

3833.22 How do I amend my location?

**Subpart C—Filing Transfers of Interest**

3833.30 Filing transfers of interest in mining claims or sites.

3833.31 What is a transfer of interest?

3833.32 How do I transfer a mining claim or site?

3833.33 How may I transfer, sell, or otherwise convey an association placer mining claim?

**Subpart D—Defective Filings**

3833.90 Defects in recordings or filings for mining claims and sites.

3833.91 What defects cannot be cured under this part?

3833.92 What happens if I do not file a transfer of interest?

AUTHORITY: 30 U.S.C. 22 *et seq.*, 621–625; 43 U.S.C. 2, 1201, 1457, 1701 *et seq.*; 62 Stat. 162; 115 Stat. 414.

SOURCE: 68 FR 61071, Oct. 24, 2003, unless otherwise noted.

**Subpart A—Recording Process****§ 3833.1 Why must I record mining claims and sites?**

FLPMA requires you to record all mining claims and sites with BLM and the local recording office in order to maintain a mining claim or site under the General Mining Law.

(a) If you fail to record a mining claim or site with the BLM and the local recording office by the 90th day after the date of location, it is abandoned and void by operation of law.

(b) Recording a mining claim or site, filing any other documents with BLM, or paying fees or service charges, as this part requires, does not make a claim or site valid if it not otherwise valid under applicable law.

**§ 3833.10 Procedures for recording mining claims and sites.****§ 3833.11 How do I record mining claims and sites?**

(a) You must record in the proper BLM State Office a copy of the notice of certificate of location that you recorded or will record in the local recording office by the 90th day after the date of location. If there is no recording requirement under state law (as in Arkansas), you still must record a document with BLM and the local recording office that contains the information required by this part.

(b) Your notice or certificate of location must include:

- (1) The name or number, or both, of the claim or site;
- (2) The names and current mailing addresses of the locators of the claim;
- (3) The type of claim or site;
- (4) The date of location; and

## **§ 3833.20**

(5) A complete description of the lands you have claimed as required in part 3832 of this chapter.

(c) When you record a notice or certificate of location, you must pay a processing fee, location fee, and initial maintenance fee as provided in §3830.21 of this chapter.

(d) When you record a mining claim or site under this part, you still must comply with any other separate recording requirements existing under other Federal law. However, notices or certificates of location that you mark as being recorded under the Act of April 8, 1948, or the Act of August 11, 1955, satisfy the additional filing requirements of those Acts under subpart 3821 of this chapter for Oregon and California Revested Wagon Road Grant Lands (O & C Lands) and part 3730 of this chapter for Powersite Withdrawals.

[68 FR 61071, Oct. 24, 2003, as amended at 70 FR 58879, Oct. 7, 2005]

### **Subpart B—Amending Mining Claims and Sites**

#### **§ 3833.20 Amending mining claims and sites.**

##### **§ 3833.21 When may I amend a notice or certificate of location?**

(a) You may amend a notice or certificate of location if—

(1) BLM recognizes the original location as a properly recorded and maintained mining claim or site; and

(2) There are omissions or other defects in the original notice or certificate of location that you need to correct or clarify; or

(3) You need to correct the legal land description of the claim or site, the mining claim name, or accurately describe the position of discovery or boundary monuments or similar items; or

(4) You need to reposition the sidelines of your lode claim so that they are parallel to the discovered lode, ledge, or vein, if there are no intervening rights to the land; or

(5) You are reducing the size of the mining claim or site.

(b) You may not amend a notice or certificate of location to—

(1) Transfer any interest or add owners;

## **43 CFR Ch. II (10–1–08 Edition)**

(2) Relocate or re-establish mining claims or sites you previously forfeited or BLM declared void for any reason;

(3) Change the type of claim or site; or

(4) Enlarge the size of the mining claim or site.

(c) You may not amend legal descriptions of mining claims or sites after the land is closed to mineral entry, unless—

(1) You are reducing the size of the mining claim or site;

(2) You need to correct or clarify defects or omissions in the original notice or certificate of location;

(3) You need to correct the legal land description of the claim or site, the mining claim name; or

(4) You need to submit an accurate description of the position of discovery or boundary monuments or similar items.

#### **§ 3833.22 How do I amend my location?**

(a) You must record an amended location certificate or notice with BLM within 90 days after you record the amended notice or certificate in the local recording office. BLM will not recognize any amendment to your mining claim until you file it properly.

(b) You must pay a processing fee for each claim or site you amend. See the table of fees and service charges in §3830.21 of this chapter.

(c) An amended location notice or certificate relates back to the original location date. The amendment takes effect when you record it with the local recording office under state law or such other time as provided by state law.

[68 FR 61071, Oct. 24, 2003, as amended at 70 FR 58879, Oct. 7, 2005]

### **Subpart C—Filing Transfers of Interest**

#### **§ 3833.30 Filing transfers of interest in mining claims or sites.**

##### **§ 3833.31 What is a transfer of interest?**

A transfer of interest is a sale, assignment, transfer through inheritance, or conveyance of total or partial ownership or legal interest in a mining claim or site.

**§ 3833.32 How do I transfer a mining claim or site?**

(a) State law governs transferring mining claims or sites. A transfer is effective in the manner and on the date provided by state law, not the date you file it with BLM.

(b) You must file in the BLM State Office a notice of the transfer that includes:

(1) The name and, if available, the serial number BLM assigned to the claim or site when the notice or certificate of location was originally recorded (the person who transferred you ownership or legal interest should have this number);

(2) Your name and current mailing address; and

(3) A copy of the legal instrument or document that you used to transfer the interest in the claim or site under state law.

(c) For each mining claim or site transferred, each transferee must pay the full processing fee specified in the table of service charges and fees in § 3830.21 of this chapter.

(d) BLM will notify the claimant of record with BLM of any action it takes regarding a mining claim or site. If BLM is required by law to give a claimant notice of any new legal requirements, BLM has properly given notice by sending the notice to the claimant of record with BLM.

[68 FR 61071, Oct. 24, 2003, as amended at 70 FR 58879, Oct. 7, 2005]

**§ 3833.33 How may I transfer, sell, or otherwise convey an association placer mining claim?**

You may transfer, sell, or otherwise convey an association placer mining claim at any time to an equal or greater number of mining claimants. If you want to transfer an association placer claim to an individual or an association that is smaller in number than the association that located the claim, you—

(a) Must have discovered a valuable mineral deposit before the transfer; or

(b) Upon notice from BLM, you must reduce the acreage of the claim, if necessary, so that you meet the 20-acre per locator limit.

**Subpart D—Defective Filings****§ 3833.90 Defects in recordings or filings for mining claims and sites.****§ 3833.91 What defects cannot be cured under this part?**

Defects or other problems that cannot be cured and therefore result in forfeiture of your mining claims or sites are:

(a) Failing to record a mining claim or site within 90 days after you locate it;

(b) Failing to pay the location fee or initial maintenance fee within 90 days after you locate it; and

(c) Locating a mining claim or site on lands withdrawn from mineral entry at the time you locate it.

**§ 3833.92 What happens if I do not file a transfer of interest?**

Even if you record your transfer or amendment with the local recording office, BLM will not recognize the interest you acquire, or send you notice of any BLM action, decision, or contest, regarding the mining claim or site until you file the transfer with BLM (see § 1810.2 of this chapter). The Department will treat the last owner of record as the responsible party for maintaining the mining claim or site until you file a transfer notice. You cannot claim that BLM failed to give you notice of any BLM action, decision, or contest regarding a mining claim or site if you failed to file a transfer notice showing that you have an interest in the mining claim or site, before BLM took the action, made the decision, or issued a contest complaint.

**PART 3834—REQUIRED FEES FOR MINING CLAIMS OR SITES****Subpart A—Fee Payment**

Sec.

3834.10 Paying maintenance, location, and oil shale fees.

3834.11 Which fees must I pay to maintain a mining claim or site and when do I pay them?

3834.12 How will BLM know for which mining claims or sites I am paying the fees?

3834.13 Will BLM prorate annual maintenance or oil shale fees?

3834.14 May I obtain a waiver from these fees?

## § 3834.10

### Subpart B—Fee Adjustment

3834.20 Adjusting location and maintenance fees.

3834.21 How will BLM adjust the location and maintenance fees?

3834.22 How will I know that BLM has adjusted location and maintenance fees?

3834.23 When do I start paying the adjusted fees?

AUTHORITY: 43 U.S.C. 1201, 1740; 30 U.S.C. 28f; 115 Stat 414; 30 U.S.C. 242.

SOURCE: 68 FR 61073, Oct. 24, 2003, unless otherwise noted.

### Subpart A—Fee Payment

**§ 3834.10 Paying maintenance, location, and oil shale fees.**

**§ 3834.11 Which fees must I pay to maintain a mining claim or site and when do I pay them?**

(a) *All mining claims or sites (except oil shale placer claims).* Paying the maintenance fee(s) in lieu of performing assessment work satisfies the requirements of the mining law and FLPMA. See § 3830.21 for fee amounts.

(1) *Location fee and initial maintenance fee.* When you first record a mining claim or site with BLM, you must pay a location fee and an initial maintenance fee for the assessment year in which you located the mining claim or site.

(2) *Annual maintenance fee.* You must pay an annual maintenance fee on or before September 1st of each year in order to maintain a mining claim or site for the upcoming assessment year.

(b) *Oil shale placer claims.* (1) Under the Energy Policy Act of 1992, 30 U.S.C. 242, if you own an oil shale placer claim, you must pay an annual \$550 fee and file a notice of intent to hold, with the applicable service charge, each calendar year on or before December 30—

(i) If you elected to maintain an oil shale placer claim;

(ii) If you elected to apply for limited patent; or

(iii) If you filed a patent application for an oil shale placer claim but did not receive a first half final certificate on or before October 24, 1992.

(2) See part 3835 of this chapter for notice of intent to hold requirements, and the table of fees and service charges in § 3830.21 of this chapter.

## 43 CFR Ch. II (10–1–08 Edition)

(3) You need not pay the annual \$550 fee, or file a notice of intent to hold, if you filed a patent application and received a first half of the mineral entry final certificate on or before October 24, 1992.

**§ 3834.12 How will BLM know for which mining claims or sites I am paying the fees?**

When you pay any fees to BLM, you must include a list of the mining claims or sites that you are paying for by claim name, and by the BLM serial number if BLM has notified you what the serial numbers are.

**§ 3834.13 Will BLM prorate annual maintenance or oil shale fees?**

BLM will not prorate annual maintenance or oil shale fees if you hold a mining claim or site for only part of a year. You must pay the full annual fee even if you hold the claim or site for just one day in an assessment year.

**§ 3834.14 May I obtain a waiver from these fees?**

(a) No waivers are available for the initial maintenance fee or the annual \$550 oil shale fee.

(b) You may request a waiver from annual maintenance fees under certain circumstances. See part 3835 of this chapter.

### Subpart B—Fee Adjustment

**§ 3834.20 Adjusting location and maintenance fees.**

**§ 3834.21 How will BLM adjust the location and maintenance fees?**

BLM will adjust the location and maintenance fees at least every 5 years, based upon the CPI, as required by 30 U.S.C. 28j(c), or at any other time as required by other statute.

[70 FR 52030, Sept. 1, 2005]

**§ 3834.22 How will I know that BLM has adjusted location and maintenance fees?**

BLM will publish a notice in the FEDERAL REGISTER about the adjustment on or before July 1st of a given year in order to make the adjusted fees due on September 1st of the same year.

## Bureau of Land Management, Interior

## § 3835.1

### § 3834.23 When do I start paying the adjusted fees?

(a) In the case of a CPI adjustment required by 30 U.S.C. 28j(c), you must pay the adjusted initial maintenance and location fees when you record a new mining claim or site located on or after the September 1 that immediately follows the date BLM published its notice about the adjustment.

(b) In the case of adjustments required by other statute, you must pay the adjusted initial maintenance and location fees for a new mining claim or site as provided in the statute.

(c) For previously recorded mining claims and sites, you must pay the CPI-based adjusted maintenance fee on or before the September 1 that immediately follows the date BLM published its notice about the adjustment.

(d) Notwithstanding 43 CFR 3830.91(a)(3) and 3830.96, in any year in which BLM adjusts the maintenance and location fees, if you pay the fees timely, but pay an amount based on the fee in effect immediately before the adjustment was made, BLM will send you a notice, as provided in § 3830.94, giving you 30 days in which to pay the additional amount required to meet the adjusted fees. If you do not pay the additional amount due within 30 days after the date you received the notice, you will forfeit the affected mining claims or sites.

[70 FR 52030, Sept. 1, 2005]

## PART 3835—WAIVERS FROM ANNUAL MAINTENANCE FEES

### Subpart A—Filing Requirements

Sec.

3835.1 How do I qualify for a waiver?

3835.10 How do I request a waiver?

3835.11 What special filing and reporting requirements pertain to the different types of waivers?

3835.12 What are my obligations once I receive a waiver?

3835.13 How long do the waivers last and how do I renew them?

3835.14 How do I submit a small miner waiver request for newly-recorded mining claims?

3835.15 If I qualify as a small miner, how do I apply for a waiver if I paid the maintenance fee in the last assessment year?

3835.16 If I am a qualified small miner, and I obtained a waiver in one assessment

year, what must I do if I want to pay the maintenance fee for the following assessment year?

3835.17 What additional requirements must I fulfill to obtain a small miner waiver for my mining claims or sites on National Park System lands?

### Subpart B—Conveying Mining Claims or Sites Under Waiver

3835.20 Transferring, selling, inheriting, or otherwise conveying mining claims or sites already subject to a waiver.

### Subpart C—Annual FLPMA Documents

3835.30 Annual FLPMA documents.

3835.31 When do I file an annual FLPMA document?

3835.32 What should I include when I submit an affidavit of assessment work?

3835.33 What should I include when I submit a notice of intent to hold?

### Subpart D—Defective Waivers and FLPMA Filings

3835.90 Failure to comply with this part.

3835.91 What if I fail to file annual FLPMA documents?

3835.92 What if I fail to submit a timely waiver request?

3835.93 What happens if BLM finds a defect in my waiver request?

AUTHORITY: 30 U.S.C. 22, 28, 28f-28k; 43 U.S.C. 2, 1201, 1457, 1701 *et seq.*; 50 U.S.C. App. 501, 565; 115 Stat. 414.

SOURCE: 68 FR 61073, Oct. 24, 2003, unless otherwise noted.

### Subpart A—Filing Requirements

#### § 3835.1 How do I qualify for a waiver?

(a) Under certain conditions, you may qualify for a waiver from the annual maintenance fee requirements. You cannot obtain a waiver from service charges, the location fee, the initial maintenance fee, or the \$550 oil shale fee.

(b) The following table lists the types of waivers available and how you qualify for them (detailed requirements for each category appear in § 3835.10):

Type of waiver	Qualifications
(a) Small Miner .....	All related parties must hold no more than a total of 10 mining claims or sites nationwide, not including oil shale claims; and All co-claimants must qualify for the small miner waiver.

## § 3835.10

Type of waiver	Qualifications
(b) Soldiers' and Sailor's Civil Relief Act.	You and all co-claimants must be military personnel on active duty status.
(c) Reclamation .....	Maintenance fees are waived for your mining claims or sites that are undergoing final reclamation under subparts 3802, 3809, or 3814, if you do not intend to continue mining, milling, or processing operations on those sites.
(d) Denial of Access	You have received a declaration of taking or a notice of intent to take from the National Park Service (NPS) or other Federal agency; or the United States has otherwise denied you access to your mining claim or site.
(e) Mineral Patent Application.	You have submitted an application for a mineral patent under part 3860 and the Secretary has granted you a final certificate.

## § 3835.10 How do I request a waiver?

(a) You must submit BLM's waiver certification form on or before September 1 of each assessment year for which you are seeking a waiver. You must submit your waiver on or before September 1 for BLM to exempt your claims or sites from the annual maintenance fee requirement that is due on the same date. You may have an agent submit a waiver form on your behalf if you file or have filed with BLM a power of attorney or other legal documentation which shows that the agent is acting on your behalf.

(b) All waiver requests must include:

(1) The names and addresses of all claimants who maintain an interest in the mining claims or sites listed on the waiver document;

(2) The original signatures of the claimants of the mining claims or sites who are requesting the waiver, or the original signature of the authorized agent of the owner or owners of those mining claims or sites;

(3) The names of the mining claims or sites for which you request a waiver;

(4) The serial numbers, if available, that BLM assigned to the mining claims or sites; and

(5) The date the maintenance fee was due from which you are seeking a waiver.

## 43 CFR Ch. II (10–1–08 Edition)

## § 3835.11 What special filing and reporting requirements pertain to the different types of waivers?

(a) *Small miner waivers.* Small miner waiver requests must include a declaration that:

(1) You and all related parties hold no more than a total of 10 mining claims and sites nationwide;

(2) You have completed or will complete all assessment work required by the General Mining Law and part 3836 of this chapter to maintain your claims by the end of the applicable assessment year.

(3) If you were not required to perform assessment work in the previous assessment year, you must include the reason why assessment work was not required in your certification, whether it is because:

(i) Your claim was located in that assessment year;

(ii) You paid a maintenance fee to maintain your claim during that assessment year;

(iii) Assessment work was deferred for that year; or

(iv) Any other reason recognized under Federal law.

(b) *Soldiers' and Sailors' Civil Relief Act waivers.* Your application for waiver must include a notice of active military service or entry into active military service. You must also notify BLM in writing when you leave active duty status.

(c) *Reclamation waivers.* Your application must include a certified and/or notarized statement that:

(1) States that you are reclaiming the mining claims or sites;

(2) States your intent to end mining operations on the claims or sites permanently; and

(3) References a reclamation plan that you submitted to BLM or that BLM approved; or references a reclamation plan approved by a surface managing agency other than BLM.

(d) *Denial-of-access waivers.* (1) Your application must include a statement that you have received a declaration of taking or a notice of intent to take from the National Park Service or other Federal agency or have otherwise been denied access to your mining claim or site in writing by the surface management agency or a court.

## Bureau of Land Management, Interior

## § 3835.15

(2) You must submit copies of all official documents you have received that demonstrate the declaration of taking, notice of intent to take, or denial of access.

(3) Applying for National Park Service (NPS) approval of a complete plan of operations does not justify your denial-of-access waiver. While the NPS is reviewing your plan of operations, or if the NPS disapproves it but has not denied you access, or issued a declaration of taking or a notice of intent to take, you must pay the annual maintenance fee.

(e) *Contest actions.* If the Secretary contests your mining claim or site under part 4 of this title, you must maintain the mining claim or site

until the Department of the Interior issues a final decision.

(f) *Appeals.* If you forfeit your mining claim or site and you file an appeal under part 4 of this title and the Interior Board of Land Appeals stays BLM's voidance decision, you must maintain your mining claim or site through the appeals process.

### § 3835.12 What are my obligations once I receive a waiver?

If BLM allows you the waiver, you must then perform annual assessment work on time and file annual FLPMA documents. You will find more information about annual FLPMA documents in § 3835.30 of this part, and about assessment work in part 3836 of this chapter.

### § 3835.13 How long do the waivers last and how do I renew them?

The following table states how long waivers last and explains how to renew them:

Type of waiver	Duration	Renewal requirements
(a) Small Miner .....	One assessment year .....	Apply for a small miner waiver by each September 1.
(b) Soldiers' and Sailors' Civil Relief Act.	Until six months after you are released from active duty status or from a military hospital, whichever is later.	Your waiver is automatically renewed if you continue to meet the qualifications. You must notify BLM when you leave active duty status.
(c) Reclamation .....	One assessment year .....	Apply for a reclamation waiver by each September 1.
(d) Denial of Access .....	One assessment year .....	Apply for waiver certification by each September 1.
(e) Mineral Patent Application with Final Certificate.	Until patent issues or the final certificate is canceled. BLM will not refund previously deposited annual maintenance fees to a mineral patent applicant.	None. If the final certificate is canceled, you must pay the required fees beginning on the September 1 immediately following the cancellation or file a different form of waiver if you qualify.

### § 3835.14 How do I submit a small miner waiver request for newly-recorded mining claims?

In order to obtain a small miner waiver for newly-recorded mining claims, you must—

(a)(1) Submit the waiver request on or before September 1; or

(2) If the mining claim or site was located before September 1 and recorded after September 1 in a timely manner, you must submit the waiver request at the time of recording the mining claim or site with BLM, and

(b) File on or before the December 30 immediately following the September 1st for which you applied for a waiver a notice of intent to hold the mining

claim or site. The Mining Law does not require you to perform assessment work in the assessment year in which you locate a mining claim. The notice of intent to hold must conform to §§ 3835.31 through 3835.33.

[68 FR 61064, Oct. 24, 2003; 68 FR 74197, Dec. 23, 2003]

### § 3835.15 If I qualify as a small miner, how do I apply for a waiver if I paid the maintenance fee in the last assessment year?

You must submit a waiver request complying with § 3835.10 before the assessment year begins for which you wish to obtain a waiver. In addition, you must—

## § 3835.16

## 43 CFR Ch. II (10–1–08 Edition)

(a) Make a FLPMA filing, in the form of a notice of intent to hold under §§ 3835.31 and 3835.33 of this part on or before December 30th immediately following the submission of a waiver request;

(b) Perform your assessment work in the assessment year for which BLM waived the maintenance fee; and

(c) Make a FLPMA filing in the form of an affidavit of assessment work under §§ 3835.31 and 3835.33 of this part on or before the December 30th immediately following the close of the assessment year in which you performed assessment work.

[68 FR 61064, Oct. 24, 2003; 68 FR 74197, Dec. 23, 2003]

### **§ 3835.16 If I am a qualified small miner, and I obtained a waiver in one assessment year, what must I do if I want to pay the maintenance fee for the following assessment year?**

(a) You must perform the required assessment work in the assessment year for which you obtained a waiver from payment of the annual maintenance fee, and file the annual FLPMA document required by the December 30th immediately following the payment of the maintenance fee; and

(b) You must pay the maintenance fee by the proper deadline for the following assessment year.

### **§ 3835.17 What additional requirements must I fulfill to obtain a small miner waiver for my mining claims or sites on National Park System lands?**

(a) Before performing assessment work on National Park System lands, you must submit and obtain the National Park Service (NPS)'s approval of a complete plan of operations in compliance with regulations at 36 CFR parts 6 and 9. Your proposed activities must further the ultimate commercial mineral development of each claim, such as delineation of the mineral deposit or commencement of production. Once you submit a proposed plan, NPS will evaluate the plan, conduct a validity exam if necessary, and either approve or disapprove the plan.

(b)(1) If NPS approves your plan of operations, by the September 1 on

which you want to submit a small miner waiver request you must:

(i) Post a reclamation bond with NPS;

(ii) Begin the approved activity; and

(iii) Submit a waiver request complying with § 3835.10 before the assessment year begins for which you wish to obtain a waiver.

(2) By December 30, you must file your affidavit of assessment work for the mining claims and a notice of intent to hold for your mill or tunnel sites.

(c) If NPS does not approve your proposed plan of operations by July 1, to allow you sufficient time to conduct assessment work before September 1, you may—

(1) Pay BLM the maintenance fees by September 1;

(2) Petition BLM before September 1 for a deferment of assessment work; or

(3) Submit a request for a lack of access waiver.

## **Subpart B—Conveying Mining Claims or Sites Under Waiver**

### **§ 3835.20 Transferring, selling, inheriting, or otherwise conveying mining claims or sites already subject to a waiver.**

(a) If you purchase, inherit, or otherwise obtain mining claims or sites that are subject to a waiver, you must also qualify for the waiver in order for BLM to continue to apply the waiver to the mining claims you have received in the transfer; or

(b) If you purchase, inherit, or otherwise obtain mining claims or sites that are subject to a waiver and you do not qualify for the waiver, you must pay the annual maintenance fee by the September 1 following the date the transfer became effective under state law.

## **Subpart C—Annual FLPMA Documents**

### **§ 3835.30 Annual FLPMA documents.**

### **§ 3835.31 When do I file an annual FLPMA document?**

(a) If you must file an annual FLPMA document as required in paragraph (d) of this section, you must file your annual FLPMA documents with

## Bureau of Land Management, Interior

## § 3835.33

BLM on or before the December 30th of the calendar year in which the assessment year ends. (For example, if the assessment year ends on September 1, 2003, you must file your annual FLPMA document no later than December 30, 2003.)

(b) If part 3836 of this chapter requires you to perform assessment work, you must file an affidavit of assessment work. You do not need to complete assessment work in the assessment year when you located your claim. (For example, if you locate a claim on September 2, 2002, you first need to perform assessment work sometime between September 2, 2003, and September 1, 2004.)

(c) If part 3836 of this chapter does not require you to perform assessment work, either because you located the claim during the current assessment year or because BLM has deferred assessment work, you must submit a notice of intent to hold under §§ 3835.32 and 3835.33 of this part as an annual FLPMA document filing. You must state in the notice of intent to hold either that BLM has deferred the assessment work requirement or that you located the claim during the current assessment year.

(d) The following table describes the circumstances under which you must file annual FLPMA documents:

Your situation	Affidavit of assessment work required	Notice of intent to hold required
(1) You have paid annual maintenance fees.	No .....	No.
(2) You have an oil shale placer claim ....	No .....	Yes, by December 30 of each year you must pay the \$550 oil shale fee.
(3) You have a small miner waiver that covers mining claims.	Yes, by December 30 for each assessment year you obtained a small miner waiver.	Yes, but only as described in paragraph (c) of this section.
(4) You have a small miner waiver that covers mill or tunnel sites.	No affidavit assessment work is required for mill or tunnel sites.	Yes, notices of intent to hold are required for mill and tunnel sites.
(5) You have a Soldiers and Sailor's Civil Relief Act Waiver.	No .....	No.
(6) You have a reclamation waiver .....	No .....	Yes.
(7) You have a waiver because you have been denied access.	No .....	Yes.
(8) You have a deferment of assessment work.	No .....	Yes, but only as described in paragraph (c) of this section.
(9) You have applied for a mineral patent and BLM has issued a final certificate.	No .....	No.

[68 FR 61064, Oct. 24, 2003; 68 FR 74197, Dec. 23, 2003]

### § 3835.32 What should I include when I submit an affidavit of assessment work?

When you submit an affidavit of assessment work as required in § 3835.31(d), you must include the following:

(a) The name and, if available, the BLM serial number of the claim for which you did assessment work;

(b) Any known changes in the mailing addresses of the claimants;

(c) A processing fee for each mining claim affected. (See the table of service charges and fees in § 3830.21 of this chapter); and

(d) An exact legible reproduction or duplicate, other than microfilm or other electronic media, of either:

(1) The affidavit of assessment work that you filed or will file in the county where the claim is located; or

(2) The report of geological, geochemical, and geophysical surveys you filed in the county where the claim is located, as provided for in part 3836 of this chapter.

[68 FR 61064, Oct. 24, 2003, as amended at 70 FR 58879, Oct. 7, 2005]

### § 3835.33 What should I include when I submit a notice of intent to hold?

When you submit a notice of intent to hold as required in § 3835.31(d), you must include the following:

(a) An exact legible reproduction or duplicate of a letter or other notice with signatures of one or more of the

## § 3835.90

claimants or their agent that states your intention to hold the mining claims or sites for the calendar year in which the assessment year ends, and that you filed or will file a notice of intent to hold in the county where the claim is located;

(b) If applicable:

(1) A copy of a BLM decision granting a deferment of the annual assessment work;

(2) A copy of a pending petition for deferment of the annual assessment work including the date you submitted the petition; or

(3) Any other documentation in the notice of intent to hold supporting why you are filing a notice of intent to hold instead of an assessment work filing;

(c) The name and, if available, the BLM serial number of the mining claim or site;

(d) Any known changes in the mailing addresses of the claimants; and

(e) A processing fee for each mining claim or site affected. (See the table of service charges and fees in § 3830.21 of this chapter.)

[68 FR 61064, Oct. 24, 2003, as amended at 70 FR 58879, Oct. 7, 2005]

## Subpart D—Defective Waivers and FLPMA Filings

### § 3835.90 Failure to comply with this part.

### § 3835.91 What if I fail to file annual FLPMA documents?

If you fail to file an annual FLPMA document by December 30, as required in § 3835.31(d), you forfeit the affected mining claims or sites.

### § 3835.92 What if I fail to submit a timely waiver request?

(a) If you fail to submit a qualified waiver request (see § 3835.1) and also fail to pay an annual maintenance fee by September 1st, you forfeit the affected mining claims or sites.

(b) If you fail to list any mining claims or sites that you and all related parties own on your small miner waiver request and fail to pay an annual maintenance fee by September 1st, you forfeit the unlisted mining claims or sites.

## 43 CFR Ch. II (10–1–08 Edition)

(c) If you fail to cure any defects in your timely waiver request or pay the maintenance fee within the allowed time after BLM notifies you of the defects, you forfeit the affected mining claims or sites.

(d) If you, a co-claimant, or any related parties, submit small miner waiver requests for more than 10 mining claims or sites and fail to pay the \$100 maintenance fee for each claim on or before the due date, you forfeit the mining claims and sites and you may be subject to criminal penalties under 18 U.S.C. 1001.

### § 3835.93 What happens if BLM finds a defect in my waiver request?

(a) BLM will send you a notice describing the defect by certified mail-return receipt requested at the most recent address you gave us on—

(1) Your notice or certificate of location;

(2) An address correction you have filed with BLM;

(3) A valid transfer document filed with BLM; or

(4) The waiver request form.

(b) If the certified mail is delivered to your most recent address of record, this constitutes legal service even if you do not actually receive the notice or decision. (See 43 CFR 1810.2.)

(c) You must cure the defective waiver or pay the annual maintenance fees within 60 days of receiving BLM notification of the defects, or forfeit the claim or site.

## PART 3836—ANNUAL ASSESSMENT WORK REQUIREMENTS FOR MINING CLAIMS

### Subpart A—Performing Assessment Work

Sec.

3836.10 Performing assessment work.

3836.11 What are the general requirements for performing assessment work?

3836.12 What work qualifies as assessment work?

3836.13 What are geological, geochemical, or geophysical surveys?

3836.14 What other requirements must geological, geochemical, or geophysical surveys meet to qualify as assessment work?

3836.15 What happens if I fail to perform required assessment work?

## Bureau of Land Management, Interior

## § 3836.14

- 3836.27 When must I complete my deferred assessment work?

AUTHORITY: 30 U.S.C. 22, 28, 28b-28e; 43 U.S.C. 2, 1201, 1457, 1701 *et seq.*; 50 U.S.C. App. 501, 565.

SOURCE: 68 FR 61077, Oct. 24, 2003, unless otherwise noted.

### Subpart A—Performing Assessment Work

#### § 3836.10 Performing assessment work.

#### § 3836.11 What are the general requirements for performing assessment work?

(a) Beginning in the assessment year that begins after you locate your mining claim, you must expend \$100 in labor or improvements for each claim for each assessment year preceding the date on which you file for a small miner waiver.

(b) You may perform assessment work on:

- (1) Each individual claim;
- (2) One or more claims in a group of contiguous lode or placer claims that you own or hold an interest in and that cover the same mineral deposit; or
- (3) Adjacent or nearby lands if the work supports development of the minerals on the claim(s).

(c) Your total expenditure must equal at least \$100 per claim.

#### § 3836.12 What work qualifies as assessment work?

Assessment work includes, but is not limited to—

(a) Drilling, excavations, driving shafts and tunnels, sampling (geochemical or bulk), road construction

on or for the benefit of the mining claim; and

(b) Geological, geochemical, and geophysical surveys.

#### § 3836.13 What are geological, geochemical, or geophysical surveys?

(a) Geological surveys are surveys of the geology of mineral deposits. These are done by, among other things, taking mineral samples, mapping rock units, mapping structures, and mapping mineralized zones.

(b) Geochemical surveys are surveys of the chemistry of mineral deposits. They are done by, among other things, sampling soils, waters, and bedrock to identify areas of anomalous mineral values and quantities that may in turn identify mineral deposits.

(c) Geophysical surveys are surveys of the physical characteristics of mineral deposits to measure physical differences between rock types or physical discontinuities in geological formations. These surveys include, among other things, magnetic and electromagnetic surveys, gravity surveys, seismic surveys, and multispectral surveys.

#### § 3836.14 What other requirements must geological, geochemical, or geophysical surveys meet to qualify as assessment work?

(a) Qualified experts must conduct the surveys and verify the results in a detailed report filed in the county or recording district office where the claim is recorded. A qualified expert is a geologist or mining engineer qualified by education and experience to conduct geological, geochemical, or geophysical surveys.

(b) You must record the report on the surveys with BLM and the local recording office, as provided in part 3835 of this chapter. This report must set forth fully the following:

- (1) The location of the work performed in relation to the point of discovery and boundaries of the claim;
- (2) The nature, extent, and cost of the work performed;
- (3) The basic findings of the surveys; and

#### **§ 3836.15**

(4) The name, address, and professional background of persons conducting the work and analyzing the data.

(c) You may not count these surveys as assessment work for more than 2 consecutive years or for more than a total of 5 years on any one mining claim.

(d) No survey may repeat any previous survey of the same claim and still qualify as assessment work.

#### **§ 3836.15 What happens if I fail to perform required assessment work?**

If you are required to perform assessment work and—

(a) You fail to perform the assessment work as required in this part, your claim is open to relocation by a rival claimant as if no location had ever been made; or

(b) You fail substantially to perform the assessment work as required in this part and the land is withdrawn from mineral entry or the mineral for which the claim was located is no longer subject to the Mining Law, BLM may declare your claim forfeited.

### **Subpart B—Deferring Assessment Work**

#### **§ 3836.20 Deferring assessment work.**

(a) Under some circumstances, you may obtain a temporary deferment that relieves you from performing annual assessment work on your mining claims. You may include more than one mining claim in one deferment petition if the claims are contiguous.

(b) If BLM grants you a deferment, you have merely deferred doing the assessment work. You still must complete that assessment work for that assessment year after the deferment period ends, as provided in § 3836.27.

#### **§ 3836.21 How do I qualify for a deferment of assessment work on my mining claims?**

You qualify for a deferment of assessment work if—

(a) You have a mining claim or group of mining claims that you cannot enter or gain access to because—

(1) The claims are surrounded by lands owned by others, including BLM, and the land owner has refused to give

#### **43 CFR Ch. II (10–1–08 Edition)**

you a right-of-way or you are in litigation regarding the right-of-way or in the process of acquiring the right-of-way under state law; or

(2) Some other legal impediment prevents your access.

(b) You have received a declaration of taking or notice of intent by the Federal Government to take the claim.

#### **§ 3836.22 How do I qualify for a deferment of assessment work on my mining claims that are on National Park System (NPS) lands?**

Correspondence from NPS merely denying your Plan of Operations for incompleteness or inadequacy will not suffice for a deferment of assessment work. To qualify for a deferment of assessment work on claims situated on NPS lands—

(a) You must obtain a letter from NPS stating that—

(1) NPS received and found your proposed Plan of Operations to be complete;

(2) NPS cannot act on the plan until it conducts a validity exam; and

(3) NPS anticipates completing the validity exam after the assessment year ends.

(b) You must send NPS's letter to BLM, along with other documents and information that BLM requires (see § 3836.23) to support your petition for deferment of assessment work.

#### **§ 3836.23 How do I petition for deferment of assessment work?**

In order to apply for deferment—

(a) You must submit a petition with the BLM State Office that includes:

(1) The names of the claims;

(2) The BLM serial numbers assigned to the claims;

(3) The starting date of the one-year period of the requested deferment; and

(4) A statement that you plan to file a small miner waiver form by September 1st.

(b) If you are submitting the petition because BLM or another party has denied you a right-of-way, you must also describe—

(1) The ownership and nature of the land, including topography, vegetation, surface water, and existing roads, over which you were seeking a right-of-way to reach your claims;

(2) The land over which you are seeking a right-of-way by legal subdivision if the land is surveyed;

(3) Why present use of the right-of-way is denied or prevented;

(4) The steps you have taken to acquire the right to cross the lands; and

(5) Whether any other right-of-way is available and if so, why it is not feasible to use that right-of-way.

(c) If you are submitting the petition because of other legal impediments to your access to the claim, you must describe the legal impediments and submit copies of any documents you have that evidence the legal impediments.

(d) You must record in the local recording office a notice that you are petitioning BLM for a deferment of assessment work.

(e) You must attach a copy of the notice required by paragraph (d) of this section to the petition you submit to BLM.

(f) At least one of the claimants of each of the mining claims for which you request a deferment must sign:

(1) The petition you submit to BLM; and

(2) The original notice you record with the local recording office.

(g) You must pay a processing fee with each petition. (See the table of service charges and fees in §3830.21 of this chapter.)

[68 FR 61077, Oct. 24, 2003, as amended at 70 FR 58879, Oct. 7, 2005]

**§ 3836.24 If BLM approves my petition, what else must I do to obtain a deferment of assessment work?**

You must record a copy of BLM's decision regarding your petition in the local recording office.

**§ 3836.25 What if BLM denies my petition for deferment of assessment work?**

If BLM denies your petition for deferment of assessment work, and the assessment year has ended, BLM will give you 60 days from the date you receive the BLM decision denying the petition in which to pay the maintenance fee to maintain your claim.

**§ 3836.26 How long may a deferment of assessment work last?**

(a) BLM may grant a deferment for up to one assessment year. However, the deferment ends automatically if the reason for the deferment ends.

(b) The deferment period will begin on the date you request in the petition unless BLM's approval sets a different date.

(c) You may petition to renew the deferment for one additional assessment year if a valid reason for a deferment continues. BLM cannot renew your deferment of assessment work more than once.

**§ 3836.27 When must I complete my deferred assessment work?**

(a) You may begin the deferred assessment work any time after the deferment ends. However, you must complete it before the end of the following assessment year. For example, if your deferment ends on July 15, 2008, you must complete all the deferred assessment work by September 1, 2009, in addition to completing the regular assessment work due on that date.

(b) You may also choose to pay the annual maintenance fees for the years deferred instead of performing the deferred assessment work.

**PART 3837—ACQUIRING A DELINQUENT CO-CLAIMANT'S INTERESTS IN A MINING CLAIM OR SITE**

**Subpart A—Conditions for Acquiring a Delinquent Co-Claimant's Interests in a Mining Claim or Site**

Sec.

3837.10 Conditions for acquiring a delinquent co-claimant's interests.

3837.11 When may I acquire a delinquent co-claimant's interest in a mining claim or site?

**Subpart B—Acquisition Procedures**

3837.20 Acquisition.

3837.21 How do I notify the delinquent co-claimant that I want to acquire his or her interests?

3837.22 How long does a delinquent co-claimant have after notification to contribute a proportionate share of the assessment work, expenditures, or maintenance fees?

## **§ 3837.10**

3837.23 How do I notify BLM that I have acquired a delinquent co-claimant's interests in a mining claim or site?

3837.24 What kind of evidence must I submit to BLM to show I have properly notified the delinquent co-claimant?

### **Subpart C—Resolving Co-Claimant Disputes About Acquiring a Delinquent Co-Claimant's Interests**

3837.30 Disputes about acquiring a delinquent co-claimant's interests.

AUTHORITY: 43 U.S.C. 2, 1201, 1457; 50 U.S.C. App. 501, 565; 30 U.S.C. 28.

SOURCE: 68 FR 61078, Oct. 24, 2003, unless otherwise noted.

### **Subpart A—Conditions for Acquiring a Delinquent Co-Claimant's Interests in a Mining Claim or Site**

**§ 3837.10 Conditions for acquiring a delinquent co-claimant's interests.**

**§ 3837.11 When may I acquire a delinquent co-claimant's interests in a mining claim or site?**

(a) You may acquire a co-claimant's interest in a mining claim or site under the following circumstances:

(1) You are a co-claimant who has performed the assessment work, made improvements, or paid the maintenance fees required under parts 3834 and 3836 of this chapter;

(2) Your co-claimant fails to contribute a proportionate share of the assessment work, expenditures, or maintenance fees by the end of the assessment year concerned;

(3) You notify the delinquent co-claimant of the alleged delinquency as provided in § 3837.21; and

(4) If, within 90 days following the date the delinquent co-claimant received the notice provided for under § 3837.21 or 90 days following the end of the publication period described in § 3837.21, the delinquent co-claimant fails or refuses to contribute a proportionate share of the assessment work, expenditures, or maintenance fees, the remaining co-claimants acquire the delinquent co-claimant's share in the mining claim or site.

(b) You may not acquire a co-claimant's interest in a mining claim or site

if the co-claimant is on active military duty.

## **Subpart B—Acquisition Procedures**

### **§ 3837.20 Acquisition.**

**§ 3837.21 How do I notify the delinquent co-claimant that I want to acquire his or her interests?**

(a) You must give the delinquent co-claimant written notice by mail using registered or certified mail, return receipt requested, or by personal service; or

(b) If, after diligent search, you cannot locate the delinquent co-claimant, you must publish notification in a newspaper nearest the location of the claims or sites at least once a week for 90 days.

**§ 3837.22 How long does a delinquent co-claimant have after notification to contribute a proportionate share of the assessment work, expenditures, or maintenance fees?**

The delinquent co-claimant must contribute a proportionate share of the assessment work, expenditures, or maintenance fees within 90 days after the date on which—

(a) The co-claimant received written notice by mail or personal service; or

(b) The 90-day newspaper publication period ended.

**§ 3837.23 How do I notify BLM that I have acquired a delinquent co-claimant's interests in a mining claim or site?**

If you acquire a delinquent co-claimant's interests in a mining claim or site, you must submit—

(a) Evidence that you properly notified the delinquent co-claimant;

(b) An originally signed and dated statement by all the compliant co-claimants that the delinquent co-claimant failed to contribute the proper proportion of assessment work, expenditures, or maintenance fees within the period fixed by the statute; and

(c) A non-refundable service charge for a transfer of interest, as found in the table of fees in § 3830.21 of this chapter.

**§ 3837.24 What kind of evidence must I submit to BLM to show I have properly notified the delinquent co-claimant?**

(a) If you gave written notice to the delinquent co-claimant by personal service, you must sign and submit a notarized affidavit explaining how and when you delivered the written notice to the delinquent co-claimant.

(b) If you gave written notice to the delinquent co-claimant by mail, you must submit:

(1) A copy of the notice you mailed to the delinquent co-claimant; and

(2) A copy of the signed U.S. Postal Service return receipt from the registered or certified envelope in which you sent the notice to the delinquent co-claimant.

(c) If you published the notice in a newspaper, you must submit:

(1) A statement from the newspaper publisher or the publisher's authorized representative describing the publication, including the beginning and ending dates of publication;

(2) A printed copy of the published notice; and

(3) A notarized affidavit attesting that you conducted a diligent search for the delinquent co-claimant, you could not locate the delinquent co-claimant, and therefore notification by publication was necessary.

**Subpart C—Resolving Co-Claimant Disputes About Acquiring a Delinquent Co-Claimant's Interests**

**§ 3837.30 Disputes about acquiring a delinquent co-claimant's interests.**

If co-claimants are engaged in a dispute regarding the acquisition of a delinquent co-claimant's interests—

(a) The co-claimants must resolve the dispute, without BLM involvement, in a court of competent jurisdiction or proceeding as permitted within the state where the disputed claims are located.

(b) The co-claimants must file with BLM a certified copy of the judgment, decree, or settlement agreement resolving the dispute before BLM will update its records.

**PART 3838—SPECIAL PROCEDURES FOR LOCATING AND RECORDING MINING CLAIMS AND TUNNEL SITES ON STOCKRAISING HOMESTEAD ACT (SRHA) LANDS**

**Subpart A—General Provisions**

Sec.

3838.1 What are SRHA lands?

3838.2 How are SRHA lands different from other Federal lands?

3838.3 What rules must I follow to explore for minerals and locate mining claims on SRHA lands?

**Subpart B—Locating and Recording Mining Claims and Tunnel Sites on SRHA Lands**

3838.10 Procedures for locating and recording a mining claim or tunnel site on SRHA lands.

3838.11 How do I locate and record mining claims or tunnel sites on SRHA lands?

3838.12 What must I include in a NOITL on SRHA lands?

3838.13 What restrictions are there on submitting a NOITL on SRHA lands?

3838.14 What will BLM do when I submit a NOITL for SRHA lands?

3838.15 How do I benefit from properly submitting a NOITL on SRHA lands?

3838.16 What happens if the surface owner of the SRHA lands changes?

3838.17 How do I locate mining claims or tunnel sites after I follow the NOITL Procedures?

**Subpart C—Compliance Problems**

3838.90 Failure to comply with this part.

3838.91 What if I fail to comply with this part?

AUTHORITY: 43 U.S.C. 299(b), 1201, 1457, 1740, 1744; 30 U.S.C. 22 *et seq.*

SOURCE: 68 FR 61079, Oct. 24, 2003, unless otherwise noted.

**Subpart A—General Provisions**

**§ 3838.1 What are SRHA lands?**

SRHA lands are lands that were—

(a) Patented under the Stockraising Homestead Act of 1916, as amended (30 U.S.C. 54 and 43 U.S.C. 299); or

(b) Originally entered under the Homestead Act of 1862, as amended, and patented under the SRHA after December 29, 1916.

**§ 3838.2 How are SRHA lands different from other Federal lands?**

SRHA lands are different from other Federal lands in that the United States owns the mineral estate of SRHA lands, but not the surface estate. Patents issued under the SRHA, and Homestead Act entries patented under the SRHA, reserved the mineral estate to the United States along with the right to enter, mine, and remove any reserved minerals that may be present in the mineral estate.

**§ 3838.3 What rules must I follow to explore for minerals and locate mining claims on SRHA lands?**

(a) The regulations in this part describe how to notify the surface owner before exploring for minerals or locating a mining claim on the mineral estate of SRHA lands.

(b) If you own the surface estate of SRHA lands and want to explore for minerals or locate a mining claim on the Federally-reserved mineral estate, you do not need to follow the requirements in this part, but you must follow the requirements in parts 3832, 3833, 3834 and 3835 of this chapter.

**Subpart B—Locating and Recording Mining Claims and Tunnel Sites on SRHA Lands**

**§ 3838.10 Procedures for locating and recording a mining claim or tunnel site on SRHA lands.**

**§ 3838.11 How do I locate and record mining claims or tunnel sites on SRHA lands?**

(a) You must—

(1) Submit a notice of intent to locate mining claims form (NOITL), which you may obtain from BLM, with the proper BLM State Office and submit a non-refundable service charge for processing the NOITL (see the table of fees in § 3830.21 of this chapter);

(2) Serve a copy of the NOITL on the surface owner(s) of record, by registered or certified mail, return receipt requested; and

(3) Submit proof to BLM that you served a copy of the NOITL on the surface owner(s) to complete submission of a NOITL with BLM.

(b) You can submit the NOITL to BLM and serve a copy of the NOITL on the surface owner(s) at the same time.

(c) If you want to explore parcels of land that are owned by different people, you must submit a separate NOITL for each parcel of land.

(d) You must—

(1) Wait 30 days after you serve the surface owner(s) with the NOITL before entering the lands to explore for minerals or locate a mining claim or tunnel site; and

(2) Follow procedures for locating mining claims and tunnel sites in part 3832, recording mining claim and tunnel sites in part 3833, and annual maintenance of mining claims in parts 3834 and 3835 of this chapter.

**§ 3838.12 What must I include in a NOITL on SRHA lands?**

A NOITL must include:

(a) The names, mailing address, and telephone numbers of everyone who is filing the NOITL. An agent may file the NOITL on behalf of others as long as the NOITL is accompanied with proof that the agent is authorized to act on behalf of the others.

(b) Information about the surface owners, including:

(1) The names, mailing addresses, and telephone numbers of all known surface owners of the parcel of land you want to enter;

(2) Evidence of surface ownership of all parcels covered by the NOITL obtained from the tax records of the local government. The evidence must show the name of the persons paying the taxes, and must contain a legal description of the taxed parcel.

(3) A description of the lands covered by the NOITL, including:

(i) The total number of acres to the nearest whole acre; and

(ii) A map and legal land description to the nearest 5-acre subdivision or lot based on a U.S. Public Land Survey of the lands covered by the NOITL, including access routes; and

(4) A brief description of the proposed mineral activities, including:

(i) The name, mailing address, and telephone number of the person who will be managing the activities, and

(ii) A list of the dates on which the activities will take place.

**§ 3838.13 What restrictions are there on submitting a NOITL on SRHA lands?**

(a) At any one time, you or your affiliates may not hold NOITLs for more than 1,280 acres of land owned by a single surface owner in any one state.

(b) At any one time, you or your affiliates may not hold NOITLs for more than 6,400 acres of land in any one state.

(c) Your NOITL will expire 90 days after you submit it with BLM, unless you submit to BLM a plan of operations that complies with part 3809 of this chapter within the 90-day period.

(d) After your NOITL expires, you are not allowed to submit another NOITL for the same lands until 30 days after the expiration of the previously-filed NOITL.

(e) Only those persons whose names are listed on the properly-submitted NOITL, or their agents, will be allowed to explore for minerals or locate mining claims or tunnel sites on the lands covered by the NOITL.

(f) For purposes of this section, the term “affiliates” means, with respect to any person, any other person which controls, is controlled by, or is under common control with, such person.

**§ 3838.14 What will BLM do when I submit a NOITL for SRHA lands?**

When BLM accepts a properly completed and executed NOITL, we will note the official land status records. The 90-day segregation period begins the day we receive a complete NOITL.

**§ 3838.15 How do I benefit from properly submitting a NOITL on SRHA lands?**

(a) For a 90-day period after you submit a NOITL with BLM and 30 days after you give notice to the surface owner:

(1) You may enter the lands covered by the NOITL to explore for minerals and locate mining claims (see § 3838.10 for location procedures);

(2) You may cause only minimal disturbance of the surface resources on the lands covered by the NOITL;

(3) You must not use mechanized earthmoving equipment, explosives, or toxic or hazardous materials; and

(4) You must not construct roads or drill pads.

(b) For 90 days after BLM accepts your NOITL, no other person, including the surface owner, may—

(1) Submit a NOITL for any lands included in your NOITL;

(2) Explore for minerals or locate a mining claim on the lands included in your NOITL; or

(3) File an application to acquire any interest under section 209 of FLPMA and part 2720 of this chapter in the lands included in your NOITL.

(c) If you file a plan of operations under subpart 3809 of this chapter with BLM, as provided in Section 1 of the Act of April 16, 1993, 43 U.S.C. 299(b), within the 90-day period, BLM will extend the effects of the 90-day period until BLM approves or denies the plan of operations under subpart 3809.

(d) Before you conduct mineral activities, you must post a bond or other financial guarantee to cover completion of reclamation (see subpart 3809 of this chapter), compensation to the surface owner for permanent damages to the surface and loss or impairment of the surface, and to cover permanent loss of income due to reduction in the owner’s use of the land.

**§ 3838.16 What happens if the surface owner of the SRHA lands changes?**

If the surface owner transfers all or part of the surface to a new owner after you have recorded a NOITL and served it on the surface owner, you do not have to serve a copy of the NOITL on the new surface owners.

**Subpart C—Compliance Problems****§ 3838.90 Failure to comply with this part.****§ 3838.91 What if I fail to comply with this part?**

If you fail to comply with the requirements in this part, the NOITL is void. Mining claims or tunnel sites located under a void NOITL are null and void from the beginning and we will cancel them.

**PART 3839—SPECIAL LAWS, IN ADDITION TO FLPMA, THAT REQUIRE**

**RECORDING OR NOTICE [RESERVED]****PART 3860—MINERAL PATENT APPLICATIONS****Subpart 3860—General**

## Sec.

## 3860.1 Fees.

## § 3861.2-1

preparing the validity examination and report.

[70 FR 58879, Oct. 7, 2005]

### Subpart 3861—Surveys and Plats

SOURCE: 35 FR 9754, June 13, 1970, unless otherwise noted.

#### § 3861.1 Surveys of mining claims.

##### § 3861.1-1 Application for survey.

The claimant is required, in the first place, to have a correct survey of his claim made under authority of the proper cadastral engineer, such survey to show with accuracy the exterior surface boundaries of the claim, which boundaries are required to be distinctly marked by monuments on the ground. He is required to have a correct survey where patent is applied for and where the mining claim is in vein or lode formation, or covers lands not surveyed in accordance with the U.S. system of rectangular surveys, or where the mining claim fails to conform with the legal subdivisions of the federal surveys. Application for authorization of survey should be made to the appropriate land office (see § 1821.2-1 of this chapter).

[Circ. 2220, 31 FR 16785, Dec. 31, 1966]

##### § 3861.1-2 Survey must be made subsequent to recording notice of location.

The survey and plat of mineral claims required to be filed in the proper office with application for patent must be made subsequent to the recording of the location of the claim (if the laws of the State or the regulations of the mining district require the notice of location to be recorded), and when the original location is made by survey of a mineral surveyor such location survey cannot be substituted for that required by the statute, as above indicated. All matters relating to the duties of mineral surveyors, and to the field and office procedure to be observed in the execution of mineral surveys, are set forth in Chapter X of the Manual of Instructions for the Survey of the Public Lands of the United States, 1947.

#### § 3861.1-3 Plats and field notes of mineral surveys.

When the patent is issued, one copy of the plat and field notes shall accompany the patent and be delivered to the patentee.

#### § 3861.2 Surveys: Specific.

##### § 3861.2-1 Particulars to be observed in mineral surveys.

(a) The following particulars should be observed in the survey of every mining claim:

(1) The exterior boundaries of the claim, the number of feet claimed along the vein, and, as nearly as can be ascertained, the direction of the vein, and the number of feet claimed on the vein in each direction from the point of discovery or other well-defined place on the claim should be represented on the plat of survey and in the field notes.

(2) The intersection of the lines of the survey with the lines of conflicting prior surveys should be noted in the field notes and represented upon the plat.

(3) Conflicts with unsurveyed claims, where the applicant for survey does not claim the area in conflict, should be shown by actual survey.

(4) The total area of the claim embraced by the exterior boundaries should be stated, and also the area in conflict with each intersecting survey, substantially as follows:

	Acres
Total area of claim .....	10.50
Area in conflict with survey No. 302 .....	1.56
Area in conflict with survey No. 948 .....	2.33
Area in conflict with Mountain Maid lode mining claim, unsurveyed .....	1.48

(b) It does not follow that because mining surveys are required to exhibit all conflicts with prior surveys the area of conflict with prior surveys the area of conflict are to be excluded. The field notes and plat are made a part of the application for patent, and care should be taken that the description does not inadvertently exclude portions intended to be retained. The application for patent should state the portions to be excluded in express terms.

## **§ 3861.2-2**

### **§ 3861.2-2 Certificate of expenditures and improvements.**

(a) The claimant at the time of filing the application for patent, or at any time within the 60 days of publication, is required to file with the authorized officer a certificate of the office cadastral engineer that not less than \$500 worth of labor has been expended or improvements made, by the applicant or his grantors, upon each location embraced in the application, or if the application embraces several contiguous locations held in common, that an amount equal to \$500 for each location has been so expended upon, and for the benefit of, the entire group; that the plat filed by the claimant is correct; that the field notes of the survey, as filed, furnish such an accurate description of the claim as will, if incorporation in a patent, serve to identify the premises fully, and that such reference is made therein to natural objects or permanent monuments as will perpetuate and fix the locus thereof.

(b) In case of a lode and mill-site claim in the same survey the expenditure of \$500 must be shown upon the lode claim.

### **§ 3861.2-3 Mineral surveyor's report of expenditures and improvements.**

(a) In the mineral surveyor's report of the value of the improvements all actual expenditures and mining improvements made by the claimant or his grantors, having a direct relation to the development of the claim, must be included in the estimate.

(b) The expenditures required may be made from the surface or in running a tunnel, drifts, or crosscuts for the development of the claim. Expenditures for drill holes for the purpose of prospecting and securing data upon which further development of a group of lode mining claims held in common may be based are available toward meeting the statutory provision requiring an expenditure of \$500 as a basis for patent as to all of the claims of the group situated in close proximity to such common improvement. Improvements of any other character, such as buildings, machinery, or roadways, must be excluded from the estimate, unless it is shown clearly that they are associated with actual excavations,

## **43 CFR Ch. II (10-1-08 Edition)**

such as cuts, tunnels, shafts, etc., are essential to the practical development of and actually facilitate the extraction of mineral from the claim.

(c) Improvements made by a former locator who has abandoned his claim cannot be included in the estimate, but should be described and located in the notes and plat.

### **§ 3861.2-4 Supplemental proof of expenditures and improvements.**

If the value of the labor and improvements upon a mineral claim is less than \$500 at the time of survey the mineral surveyor may file with the cadastral engineer supplemental proof showing \$500 expenditure made prior to the expiration of the period of publication.

### **§ 3861.2-5 Amended mineral surveys.**

(a) Inasmuch as amended surveys are ordered only by special instructions from the Bureau of Land Management, and the conditions and circumstances peculiar to each separate case and the object sought by the required amendment, alone govern all special matters relative to the manner of making such survey and the form and subject matter to be embraced in the field notes thereof, but few general rules applicable to all cases can be laid down.

(b) The expense of amended surveys, including amendment of plat and field notes, and office work in the Bureau of Land Management office will be borne by the claimant.

(c) The amended survey must be made in strict conformity with, or be embraced within, the lines of the original survey. If the amended and original surveys are identical, that fact must be clearly and distinctly stated in the field notes. If not identical, a bearing and distance must be given from each established corner of the amended survey to the corresponding corner of the original survey. The lines of the original survey, as found upon the ground, must be laid down upon the preliminary plat in such manner as to contrast and show their relation to the lines of the amended survey.

## **Bureau of Land Management, Interior**

## **§ 3861.6-1**

### **§ 3861.3 Mineral surveyors.**

#### **§ 3861.3-1 Extent of duties.**

The duty of a mineral surveyor in any particular case ceases when he has executed the survey and returned the field notes and preliminary plat, with his report, to the cadastral engineer. He will not be allowed to prepare for the mining claimant the papers in support of his application for patent. He is not permitted to combine the duties of surveyor and notary public in the same case by administering oaths. It is preferable that both preliminary and final oaths of assistants should be taken before some officer duly authorized to administer oaths, other than the mineral surveyor. In cases, however, where great delay, expense, or inconvenience would result from a strict compliance with this section, the mineral surveyor is authorized to administer the necessary oaths to his assistants, but in each case where this is done, he will submit to the proper cadastral engineer a full written report of the circumstances which required his stated action; otherwise he must have absolutely nothing to do with the case, except in his official capacity as surveyor. He will not employ field assistants interested therein in any manner.

#### **§ 3861.3-2 Assistants.**

The employing of claimants, their attorneys, or parties in interest, as assistants in making surveys of mineral claims will not be allowed.

### **§ 3861.4 Contract for surveys.**

#### **§ 3861.4-1 Payment.**

(a) The claimant is required, in all cases, to make satisfactory arrangements with the surveyor for the payment for his services and those of his assistants in making the survey, as the United States will not be held responsible for the same.

(b) The state director has no jurisdiction to settle differences relative to the payment of charges for field work, between mineral surveyors and claimants. These are matters of private contract and must be enforced in the ordinary manner, i.e., in the local courts. The Department has, however, authority to investigate charges affecting the

official actions of mineral surveyors, and will, on sufficient cause shown, suspend or revoke their appointment.

### **§ 3861.5 Appointment and employment of mineral surveyors.**

#### **§ 3861.5-1 Appointment.**

Pursuant to section 2334 of the Revised Statutes (30 U.S.C. 39), the Director or his delegate will appoint only a sufficient number of surveyors for the survey of mining claims to meet the demand for that class of work. Each appointee shall qualify as prescribed by the Director or his delegate. Applications for appointment as a mineral surveyor may be made at any office of the Bureau of Land Management listed in § 1821.2-1 of these regulations. A roster of appointed mineral surveyors will be available at these offices. Each appointee may execute mineral surveys in any State where mineral surveys are authorized.

[38 FR 30001, Oct. 31, 1973]

#### **§ 3861.5-2 Employment.**

A mineral claimant may employ any United States mineral surveyor qualified as indicated in paragraph (a) of this section to make the survey of his claim. All expenses of the survey of mining claims and the publication of the required notices of application for patent are to be borne by the mining claimants.

### **§ 3861.6 Plats and notices.**

#### **§ 3861.6-1 Payment of charges of the public survey office.**

With regard to the platting of the claim and other office work in the Bureau of Land Management office, including the preparation of the copies of the plat and field notes to be furnished the claimant, that office will make an estimate of the cost thereof, which amount the claimant will deposit with it to be passed to the credit of the fund created by "Deposits by Individuals for Surveying Public Lands."

**§ 3861.7 Posting.**

**§ 3861.7–1 Plat and notice to be posted on claim.**

The claimant is required to post a copy of the plat of survey in a conspicuous place upon the claim, together with notice of his intention to apply for a patent therefor, which notice will give the date of posting, the name of the claimant, the name of the claim, the number of the survey, the mining district and county, and the names of adjoining and conflicting claims as shown by the plat of survey.

**§ 3861.7–2 Proof of posting on the claim.**

After posting the said plat and notice upon the premises the claimant will file with the proper manager two copies of such plat and the field notes of survey of the claim, accompanied by two copies of the statement of at least two credible witnesses that such plat and notice are posted conspicuously upon the claim, giving the date and place of such posting, and two copies of the notice so posted to be attached to and form a part of said statement.

**Subpart 3862—Lode Mining Claim Patent Applications**

SOURCE: 35 FR 9756, June 13, 1970, unless otherwise noted.

**§ 3862.1 Lode claim patent applications: General.**

**§ 3862.1–1 Application for patent.**

(a) At the time the proof of posting is filed the claimant must file in duplicate an application for patent showing that he has the possessory right to the claim, in virtue of a compliance by himself (and by his grantors, if he claims by purchase) with the mining rules, regulations, and customs of the mining district or State in which the claim lies, and with the mining laws of Congress, such statement to narrate briefly, but as clearly as possible, the facts constituting such compliance, the origin of his possession, and the basis of his claim to a patent. The application should contain a full description of the kind and character of the vein or lode and should state whether ore has

been extracted therefrom; and if so, in what amount and of what value. It should also show the precise place within the limits of each of the locations embraced in the application where the vein or lode has been exposed or discovered and the width thereof. The showing in these regards should contain sufficient data to enable representatives of the Government to confirm the same by examination in the field and also enable the Bureau of Land Management to determine whether a valuable deposit of mineral actually exists within the limits of each of the locations embraced in the application.

(b) Every application for patent, based on a mining claim located after August 1, 1946, shall state whether the claimant has or has not had any direct or indirect part in the development of the atomic bomb project. The application must set forth in detail the exact nature of the claimant's participation in the project, and must also state whether as a result of such participation he acquired any confidential, official information as to the existence of deposits of uranium, thorium, or other fissionable source materials in the lands covered by his application.

(c) In applying for patent to a mining claim embracing land lying partly within one proper office and partly within another, a full set of papers must be filed in each office, except that one abstract of title and one proof of patent expenditures will be sufficient. Only one newspaper publication and one posting on the claim will be required, but proof thereof must be filed in both offices, the statements as to posting plat and notice on the claim to be signed within the respective land districts, as well, also, as all of the other statements required in mineral patent proceedings, except such as, under the law, may be signed outside of the land district wherein the land applied for is situated. Publication, payment of fees, and the purchase price of the land will be further governed by the provisions of §§ 1823.4(a) and 1861.2 of this chapter.

## Bureau of Land Management, Interior

## § 3862.2-2

### § 3862.1-2 Fees.

An applicant for a lode mining claim patent must pay fees as described in § 3860.1.

[70 FR 58880, Oct. 7, 2005]

### § 3862.1-3 Evidence of title.

(a) Each patent application must be supported by either a certificate of title or an abstract of title certified to by the legal custodian of the records of locations and transfers of mining claims or by an abstracter of titles. The certificate of title or certificate to an abstract of title must be by a person, association, or corporation authorized by the State laws to execute such a certificate and acceptable to the Bureau of Land Management.

(b) A certificate of title must conform substantially to a form approved by the Director.

(c) Each certificate of title or abstract of title must be accompanied by single copies of the certificate or notice of the original location of each claim, and of the certificates of amended or supplemental locations thereof, certified to by the legal custodian of the record of mining locations.

(d) A certificate to an abstract of title must state that the abstract is a full, true, and complete abstract of the location certificates or notices, and all amendments thereof, and of all deeds, instruments, or actions appearing of record purporting to convey or to affect the title to each claim.

(e) The application for patent will be received and filed if the certificate of title or an abstract is brought down to a day reasonably near the date of the presentation of the application and shows full title in the applicant, who must as soon as practicable thereafter file a supplemental certificate of title or an abstract brought down so as to include the date of the filing of the application.

### § 3862.1-4 Evidence relating to destroyed or lost records.

In the event of the mining records in any case having been destroyed by fire or otherwise lost, a statement of the fact should be made, and secondary evidence of possessory title will be received, which may consist of the state-

ment of the claimant, supported by those of any other parties cognizant of the facts relative to his location, occupancy, possession, improvements, etc.; and in such case of lost records, any deeds, certificates of location or purchase, or other evidence which may be in the claimant's possession and tend to establish his claim, should be filed.

### § 3862.1-5 Statement required that land is unreserved, unoccupied, unimproved, and unappropriated.

Each person making application for patent under the mining laws, for lands in Alaska, must furnish a duly corroborated statement showing that no portion of the land applied for is occupied or reserved by the United States, so as to prevent its acquisition under said laws; that the land is not occupied or claimed by natives of Alaska; and that the land is unoccupied, unimproved and unappropriated by any person claiming the same other than the applicant.

## § 3862.2 Citizenship.

### § 3862.2-1 Citizenship of corporations and of associations acting through agents.

The proof necessary to establish the citizenship of applicants for mining patents must be made in the following manner: In case of an incorporated company, a certified copy of its charter or certificate of incorporation must be filed. In case of an association of persons unincorporated, the statement of their duly authorized agent, made upon his own knowledge or upon information and belief, setting forth the residence of each person forming such association, must be submitted. This statement must be accompanied by a power of attorney from the parties forming such association, authorizing the person who makes the citizenship showing to act for them in the matter of their application of patent.

### § 3862.2-2 Citizenship of individuals.

(a) In case of an individual or an association of individuals who do not appear by their duly authorized agent, the statement of each applicant, showing whether he is a native or naturalized citizen, when and where born, and his residence, will be required.

### § 3862.2-3

(b) In case an applicant has declared his intention to become a citizen or has been naturalized, his statement must show the date, place, and the court before which he declared his intention, or from which his certificate of citizenship issued, and present residence.

#### § 3862.2-3 Trustee to disclose nature of trust.

Any party applying for patent as trustee must disclose fully the nature of the trust and the name of the cestui que trust; and such trustee, as well as the beneficiaries, must furnish satisfactory proof of citizenship; and the names of beneficiaries, as well as that of the trustee, must be inserted in the final certificate of entry.

#### § 3862.3 Possessory rights.

##### § 3862.3-1 Right by occupancy.

(a) The provisions of R.S. 2332 (30 U.S.C. 38), greatly lessen the burden of proof, more especially in the case of old claims located many years since, the records of which, in many cases, have been destroyed by fire, or lost in other ways during the lapse of time, but concerning the possessory right to which all controversy or litigation has long been settled.

(b) When an applicant desires to make his proof of possessory right in accordance with this provision of law, he will not be required to produce evidence of location, copies of conveyances, or abstracts of title, as in other cases, but will be required to furnish a duly certified copy of the statute of limitation of mining claims for the State, together with his statement giving a clear and succinct narration of the facts as to the origin of his title, and likewise as to the continuation of his possession of the mining ground covered by his application; the area thereof; the nature and extent of the mining that has been done thereon; whether there has been any opposition to his possession, or litigation with regard to his claim, and if so, when the same ceased; whether such cessation was caused by compromise or by judicial decree, and any additional facts within the claimant's knowledge having a direct bearing upon his possession

### 43 CFR Ch. II (10-1-08 Edition)

and *bona fides* which he may desire to submit in support of his claim.

#### § 3862.3-2 Certificate of court required.

There should likewise be filed a certificate, under seal of the court having jurisdiction of mining cases within the judicial district embracing the claim, that no suit or action of any character whatever involving the right of possession to any portion of the claim applied for is pending, and that there has been no litigation before said court affecting the title to said claim or any part thereof for a period equal to the time fixed by the statute of limitations for mining claims in the State as aforesaid other than that which has been finally decided in favor of the claimant.

#### § 3862.3-3 Corroborative proof required.

The claimant should support his narrative of facts relative to his possession, occupancy, and improvements by corroborative testimony of any disinterested person or persons of credibility who may be cognizant of the facts in the case and are capable of testifying understandingly in the premises.

#### § 3862.4 Publication of notice.

##### § 3862.4-1 Newspaper publication.

Upon the receipt of applications for mineral patent and accompanying papers, if no reason appears for rejecting the application, the authorized officer will, at the expense of the claimant (who must furnish the agreement of the publisher to hold applicant for patent alone responsible for charges of publication), publish a notice of such application for the period of 60 days in a newspaper published nearest to the claim. If the notice is published in a daily paper, it shall be published in the Wednesday issue for nine consecutive weeks; if weekly, in nine consecutive issues; if semiweekly or triweekly, in the issue of the same day of each week for nine consecutive weeks. In all cases the first day of issues shall be excluded in estimating the period of 60 days.

[35 FR 9756, June 13, 1970, as amended at 41 FR 21642, May 27, 1976]

## Bureau of Land Management, Interior

## § 3862.4-6

### § 3862.4-2 Contents of published notice.

The notices published as required by the preceding section must embrace all the data given in the notice posted upon the claim. In addition to such data the published notice must further indicate the locus of the claim by giving the connecting line, as shown by the field notes and plat, between a corner of the claim and a United States mineral monument or a corner of the public survey, and thence the boundaries of the claim by courses and distances.

### § 3862.4-3 Authorized officer to designate newspaper.

The authorized officer shall have the notice of application for patent published in a paper of established character and general circulation, to be by him designated as being the newspaper published nearest the land.

### § 3862.4-4 Charges for publication.

(a) The charge for the publication of notice of application for patent in a mining case in all districts shall not exceed the legal rates allowed by the laws of the several States for the publication of legal notices wherein the notice is published.

(b) It is expected that these notices shall not be so abbreviated as to curtail the description essential to a perfect notice, and on the other hand that they shall not be of unnecessary length. The printed matter must be set solid without paragraphing or any display in the heading and shall be in the usual body type used in legal notices. If other type is used, no allowance will be made for additional space on that account. The number of solid lines only used in advertising by actual count will be allowed. All abbreviations and copy must be strictly followed. The following is a sample of advertisement set up in accordance with Government requirements and contains all the essential data necessary for publication:

M. A. No. 04421, U. S. Land Office, Elko, Nevada, October 5, 1921. Notice is hereby given that the Jarbidge Buhl Mining Company by W. H. Hudson, attorney in fact, of Jarbidge, Nevada, has made application for patent to the Altitude, Altitude No. 1, Altitude No. 3, and Altitude Annex, lode mining

claims. Survey No. 4470, in unsurveyed T. 46 N., R. 58 E., M. D. B. and M., in the Jarbidge mining district, Elko County, Nevada, described as follows: Beginning at corner No. 1, Altitude No. 3, whence the quarter corner of the south boundary of sec. 34 T. 46 N., R. 58 E., M. D. B. and M., bears south 41°54' west 7285.63 feet, thence north 20°14' west 1500 feet to corner No. 2 of said lode; thence north 69°46' east 569 feet to corner No. 3 of said lode; thence south 20°14' east 417.5 feet to corner 2, Altitude No. 1; thence north 69°46' east 1606.1 feet to corner No. 3, Altitude lode; thence south 20°14' east 1500 feet, to corner No. 4 of said lode; thence south 69°46' west 1606.1 feet, to corner No. 1, Altitude No. 1 lode; thence North 20°14' west 417.5 feet to corner No. 4, Altitude No. 3; thence south 69°46' west 569 feet to point of beginning. There are no adjoining or conflicting claims. The location notices are recorded in Book 17, pages 373 and 374, and in Book 15, pages 52 and 53, mining locations, Elko County, Nevada, John E. Robbins, Manager.

(c) For the publication of citations in contests or hearings, involving the character of lands, the charges may not exceed the rates provided for similar notices by the law of the State.

### § 3862.4-5 Proof by applicant of publication and posting.

After the 60-day period of newspaper publication has expired, the claimant will furnish from the office of publication a sworn statement that the notice was published for the statutory period, giving the first and last day of such publication, and his own statement showing that the plat and notice aforesaid remained conspicuously posted upon the claim sought to be patented during said 60-day publication, giving the dates.

### § 3862.4-6 Payment of purchase price and statement of charges and fees.

Upon the filing of the statement required by the preceding section, the authorized officer will, if no adverse claim was filed in his office during the period of publication, and no other objection appears, permit the claimant to pay for the land to which he is entitled at the rate of \$5 for each acre and \$5 for each fractional part of an acre, except as otherwise provided by law, issuing the usual receipt therefor. The claimant will also make a statement of all charges and fees paid by him for publication and surveys, together with all

**§ 3862.5**

fees and money paid the authorized officer of the proper office, and a patent shall be issued thereon if found regular.

**§ 3862.5 Entry and transfers.****§ 3862.5–1 Allowance of entry; transfers subsequent to application not recognized.**

No entry will be allowed until the authorized officer has satisfied himself, by careful examination, that proper proofs have been filed upon the points indicated in the law and official regulations. Transfers made subsequent to the filing of the application for patent will not be considered, but entry will be allowed and patent issued in all cases in the name of the applicant for patent, the title conveyed by the patent, of course, in each instance inuring to the transferee of such applicant where a transfer has been made pending the application for patent.

**§ 3862.6 Diligent prosecution.****§ 3862.6–1 Failure to prosecute application with diligence.**

The failure of an applicant for patent to a mining claim to prosecute his application to completion, by filing the necessary proofs and making payment for the land, within a reasonable time after the expiration of the period of publication of notice of the application, or after the termination of adverse proceedings in the courts, constitutes a waiver by the applicant of all rights obtained by the earlier proceedings upon the application.

**§ 3862.7 Application processing upon contest or protest.****§ 3862.7–1 Resumption of patent proceedings after suspension due to adverse claim or protest.**

The proceedings necessary to the completion of an application for patent to a mining claim, against which an adverse claim or protest has been filed, if taken by the applicant at the first opportunity afforded therefor under the law and departmental practice, will be as effective as if taken at the date when, but for the adverse claim or protest, the proceedings on the application could have been completed.

**§ 3862.8 Patents for mining claims.****§ 3862.8–1 Land descriptions in patents.**

The land description in a patent for a lode mining claim, for a millsite, or for a placer claim not consisting of legal subdivisions, shall hereafter consist of the names and survey numbers of the claims being patented and those being excluded, or of the names of the excluded claims if they are unsurveyed, or of the legal subdivisions of excluded land covered by homestead or other nonmineral entry. The land description shall refer to the field notes of survey and the plat thereof for a more particular description and the patent shall expressly make them a part thereof. Where shown by the mineral entry the patent shall give the actual or approximate legal subdivision, section, township and range, the name of the county and of the mining district, if any, wherein the claims are situated. A copy of the plat and field notes of each mineral survey patented will be furnished to the patentee.

**§ 3862.9 Public availability of information.**

(a) All data and information concerning Federal and Indian minerals submitted under this part 3860 are subject to part 2 of this title. Part 2 of this title includes the regulations of the Department of the Interior covering the public disclosure of data and information contained in Department of the Interior records. Certain mineral information not protected from public disclosure under part 2 of this title may be made available for inspection without a Freedom of Information Act (5 U.S.C. 552) request.

(b) When you submit data and information under this part 3860 that you believe to be exempt from disclosure to the public, you must clearly mark each page that you believe includes confidential information. BLM will keep all data and information confidential to the extent allowed by § 2.13(c) of this title.

[63 FR 52955, Oct. 1, 1998]

### Subpart 3863—Placer Mining Claim Patent Applications

SOURCE: 35 FR 9758, June 13, 1970, unless otherwise noted.

#### § 3863.1 Placer mining claim patent applications: General.

(a) The proceedings to obtain patents for placer claims, including all forms of mineral deposits excepting veins of quartz or other rock in place, are similar to the proceedings prescribed for obtaining patents for vein or lode claims; but where a placer claim shall be upon surveyed lands, and conforms to legal subdivisions, no further survey or plat will be required. Where placer claims cannot be conformed to legal subdivisions, survey and plat shall be made as on unsurveyed lands.

(b) The price of placer claims is fixed at \$2.50 per acre or fractional part of an acre.

(c) An applicant for a placer mining claim patent must pay fees as described in § 3860.1.

[35 FR 9758, June 13, 1970, as amended at 70 FR 58880, Oct. 7, 2005]

#### § 3863.1-1 Application for patent.

#### § 3863.1-2 Proof of improvements for patent.

The proof of improvements must show their value to be not less than \$500 and that they were made by the applicant for patent or his grantors. This proof should consist of the statement of two or more disinterested witnesses.

#### § 3863.1-3 Data to be filed in support of application.

(a) In placer applications, in addition to the recitals necessary in and to both vein or lode and placer applications, the placer application should contain, in detail, such data as will support the claim that the land applied for is placer ground containing valuable mineral deposits not in vein or lode formation and that title is sought not to control water courses or to obtain valuable timber but in good faith because of the mineral therein. This statement, of course, must depend upon the character of the deposit and the natural features of the ground, but the fol-

lowing details should be covered as fully as possible: If the claim be for a deposit of placer gold, there must be stated the yield per pan, or cubic yard, as shown by prospecting and development work, distance to bedrock, formation and extent of the deposit, and all other facts upon which he bases his allegation that the claim is valuable for its deposits of placer gold. If it be a building stone or other deposit than gold claimed under the placer laws, he must describe fully the kind, nature, and extent of the deposit, stating the reasons why same is by him regarded as a valuable mineral claim. He will also be required to describe fully the natural features of the claim; streams, if any, must be fully described as to their course, amount of water carried, fall within the claim; and he must state kind and amount of timber and other vegetation thereon and adaptability to mining or other uses.

(b) If the claim be all placer ground, that fact must be stated in the application and corroborated by accompanying proofs; if of mixed placers and lodes, it should be so set out, with a description of all known lodes situated within the boundaries of the claim. A specific declaration, such as is required by R.S. 2333 (30 U.S.C. 37) must be furnished as to each lode intended to be claimed. All other known lodes are, by the silence of the applicant, excluded by law from all claim by him, of whatsoever nature, possessory or otherwise.

(c) While these data are required as a part of the mineral surveyor's report in case of placers taken by special survey, it is proper that the application for patent incorporate these facts.

(d) Inasmuch as in case of claims taken by legal subdivisions, no report by a mineral surveyor is required, the claimant, in his application in addition to the data above required, should describe in detail the shafts, cuts, tunnels, or other workings claimed as improvements, giving their dimensions, value, and the course and distance thereof to the nearest corner of the public surveys.

(e) The statement as to the description and value of the improvements must be corroborated by the statements of two disinterested witnesses.

The proof showing must be made in duplicate. See 51 L.D. 265 and 52 L.D. 190.

(f) Applications awaiting entry, whether published or not, must be made to conform to this part, with respect to proof as to the character of the land. Entries already made will be suspended for such additional proofs as may be deemed necessary in each case.

**§ 3863.1-4 Applications for placers containing known lodes.**

Applicants for patent to a placer claim, who are also in possession of a known vein or lode included therein, must state in their application that the placer includes such vein or lode. The published and posted notices must also include such statement. If veins or lodes lying within placer locations are owned by other parties, the fact should be distinctly stated in the application for patent and in all the notices. But in all cases whether the lode is claimed or excluded, it must be surveyed and marked upon the plat, the field notes and plat giving the area of the lode claim or claims and the area of the placer separately. An application which omits to claim such known vein or lode must be construed as a conclusive declaration that the applicant has no right of possession to the vein or lode. Where there is no known lode or vein, the fact must appear by the statement of two or more witnesses.

**Subpart 3864—Millsite Patents**

SOURCE: 35 FR 9758, June 13, 1970, unless otherwise noted.

**§ 3864.1 Millsite patents: General.**

**§ 3864.1-1 Application for patent.**

(a) Land entered as a millsite must be shown to be nonmineral. Millsites are simply auxiliary to the working of mineral claims. R.S. 2337 (30 U.S.C. 42) provides for the patenting of millsites.

(b) To avail themselves of this provision of law, parties holding the possessory right to a vein or lode claim, and to a piece of nonmineral land not contiguous thereto for mining or milling purposes, not exceeding the quantity allowed for such purpose by R.S. 2337, or prior laws, under which the land was appropriated, the propri-

etors of such vein or lode may file in the proper office their application for a patent, which application, together with the plat and field notes, may include, embrace, and describe, in addition to the vein or lode claim, such noncontiguous millsite, and after due proceedings as to notice, etc., a patent will be issued conveying the same as one claim. The owner of a patented lode may, by an independent application, secure a millsite, if good faith is manifest in its use or occupation in connection with the lode and no adverse claim exists.

(c) The Act of March 18, 1960 (74 Stat. 7; 43 U.S.C. 42(b)), amends R.S. 2337 to allow the holders of possessory right in a placer claim to hold nonmineral land for mining, milling, processing, beneficiation, or other operations in connection with the placer claim. Applications for patent for such millsites are subject to the same requirements as to survey and notice as one applicable to placer mining claims. No one millsite may exceed five acres and payment will be \$2.50 per acre or fraction thereof.

**§ 3864.1-2 Millsites applied for in conjunction with a lode claim.**

Where the original survey includes a lode claim and also a millsite the lode claim should be described in the plat and field notes as "Sur. No. 37, A," and the millsite as "Sur. No. 37, B," or whatever may be its appropriate numerical designation; the course and distance from a corner of the millsite to a corner of the lode claim to be invariably given in such plat and field notes, and a copy of the plat and notice of application for patent must be conspicuously posted upon the millsite as well as upon the vein or lode claim for the statutory period of 60 days. In making the entry no separate receipt or certificate need be issued for the millsite, but the whole area of both lode and millsite will be embraced in one entry, the price being \$5 for each acre and fractional part of an acre embraced by such lode and millsite claim.

**§ 3864.1-3 Millsites for quartz mills or reduction works.**

In case the owner of a quartz mill or reduction works is not the owner or

## Bureau of Land Management, Interior

## § 3871.2

claimant of a vein or lode claim the law permits him to make application therefor in the same manner prescribed for mining claims, and after due notice and proceedings, in the absence of a valid adverse filing, to enter and receive a patent for his millsite at the price named in the preceding section.

### § 3864.1–4 Proof of nonmineral character.

In every case there must be satisfactory proof that the land claimed as a millsite is not mineral in character, which proof may, where the matter is unquestioned, consist of the statement of two or more persons capable, from acquaintance with the land to testify understandingly.

### § 3864.1–5 Fees.

An applicant for a millsite patent must pay fees as described in § 3860.1.

[70 FR 58880, Oct. 7, 2005]

## PART 3870—ADVERSE CLAIMS, PROTESTS AND CONFLICTS

### Subpart 3871—Adverse Claims

Sec.

3871.1 Filing of claim.

3871.2 Statement of claim.

3871.3 Action by authorized officer.

3871.4 Patent proceedings stayed when adverse claim is filed; exception.

3871.5 Termination of adverse suit.

3871.6 Certificate required when no suit commenced.

### Subpart 3872—Protests, Contests and Conflicts

3872.1 Protest against mineral applications.

3872.2 Procedure in contest cases.

3872.3 Presumption as to land returned as mineral.

3872.4 Procedure to dispute record character of land.

3872.5 Testimony at hearings to determine character of lands.

### Subpart 3873—Segregation

3873.1 Segregation of mineral from non-mineral land.

3873.2 Effect of decision that land is mineral.

3873.3 Non-mineral entry of residue of subdivisions invaded by mining claims.

AUTHORITY: 30 U.S.C. 30; 43 U.S.C. 1201, 1457, 1701 *et seq.*

## Subpart 3871—Adverse Claims

SOURCE: 35 FR 9759, June 13, 1970, unless otherwise noted.

### § 3871.1 Filing of claim.

(a) An adverse claim must be filed with the authorized officer of the proper office where the application for patent is filed or with the manager of the district in which the land is situated at the time of filing the adverse claim. The claim may be filed by the adverse claimant, or by his duly authorized agent or attorney in fact cognizant of the facts stated.

(b) Where an agent or attorney in fact files the adverse claim he must furnish proof that he is such agent or attorney.

(c) The agent or attorney in fact must sign the statement of the adverse claim within the land district where the claim is situated, stating that it was so signed.

(d) Each adverse claim filed must include the processing fee for adverse claims found in the fee schedule in § 3000.12 of this chapter.

[35 FR 9759, June 13, 1970, as amended at 70 FR 58880, Oct. 7, 2005]

### § 3871.2 Statement of claim.

(a) The adverse claim must fully set forth the nature and extent of the interference or conflict; whether the adverse party claims as a purchaser for valuable consideration or as a locator. If the former, a certified copy of the original location, the original conveyance, a duly certified copy thereof, or an abstract of title from the office of the proper recorder should be furnished, or if the transaction was a merely verbal one he will narrate the circumstances attending the purchase, the date thereof, and the amount paid, which facts should be supported by the statement of one or more witnesses, if any were present at the time, and if he claims as a locator he must file a duly certified copy of the location from the office of the proper recorder.

(b) In order that the “boundaries” and “extent” of the claim may be shown, it will be incumbent upon the adverse claimant to file a plat showing his entire claim, its relative situation

### § 3871.3

or position with the one against which he claims, and the extent of the conflict: *Provided, however,* That if the application for patent describes the claim by legal subdivisions, the adverse claimant, if also claiming by legal subdivisions, may describe his adverse claim in the same manner without further survey or plat. If the claim is not described by legal subdivisions it will generally be more satisfactory if the plat thereof is made from an actual survey by a mineral surveyor and its correctness officially certified thereon by him.

#### § 3871.3 Action by authorized officer.

(a) Upon the adverse claim being filed within the 60-day period of publication, the authorized officer will immediately give notice in writing to the parties that such adverse claim has been filed, informing them that the party who filed the adverse claim will be required within 30 days from the date of such filing to commence proceedings in a court of competent jurisdiction to determine the question of right of possession, and to prosecute the same with reasonable diligence to final judgment, and that should such adverse claimant fail to do so, his adverse claim will be considered waived and the application for patent be allowed to proceed upon its merits.

(b) The Act of September 21, 1961 (Pub. L. 87-260; 75 Stat. 541), amends the Act of June 7, 1910 (36 Stat. 459; 48 U.S.C. 386), and provides that adverse suits against mineral entries in Alaska shall be instituted within the 60-day time limit set forth in R.S. 2325 and 2326, (30 U.S.C. 29, 30). The act further provides that where a mineral patent application was filed prior to the effective date of the act, the time in which to file adverse suits is governed by the Act of June 7, 1910. Where a mineral patent application was filed prior to September 21, 1961, the entry will not be allowed until after the expiration of eight months following the publication period.

#### § 3871.4 Patent proceedings stayed when adverse claim is filed; exception.

When an adverse claim is filed as aforesaid, the authorized officer will

### 43 CFR Ch. II (10-1-08 Edition)

endorse upon the same the precise date of filing and preserve a record of the date of notifications issued thereon; and thereafter all proceedings on the application for patent will be stayed with the exception of the completion of the publication and posting of notices and plat and the filing of the necessary proof thereof, until the controversy shall have been finally adjudicated in court or the adverse claim waiver or withdrawn.

#### § 3871.5 Termination of adverse suit.

(a) Where an adverse claim has been filed and suit thereon commenced within the statutory period and final judgment rendered determining the right of possession, it will not be sufficient to file with the authorized officer a certificate of the clerk of the court setting forth the facts as to such judgment, but the successful party must, before he is allowed to make entry, file a certified copy of the judgment roll, together with the other evidence required by R.S. 2326 (30 U.S.C. 30), and a certificate of the clerk of the court under the seal of the court showing, in accord with the record facts of the case, that the judgment mentioned and described in the judgment roll aforesaid is a final judgment; that the time for appeal therefrom has, under the law, expired, and that no such appeal has been filed, or that the defeated party has waived his right to appeal. Other evidence showing such waiver or an abandonment of the litigation may be filed.

(b) Where such suit has been dismissed, a certificate of the clerk of the court to that effect or a certified copy of the order of dismissal will be sufficient.

(c) After an adverse claim has been filed and suit commenced, a relinquishment or other evidence of abandonment of the adverse claim will not be accepted, but the case must be terminated and proof thereof furnished as required by the last two paragraphs.

#### § 3871.6 Certificate required when no suit commenced.

Where an adverse claim has been filed but no suit commenced against the applicant for patent within the statutory period, a certificate to that

## Bureau of Land Management, Interior

## § 3872.5

effect by the clerk of the State court having jurisdiction in the case, and also by the clerk of the district court of the United States for the district in which the claim is situated, will be required.

### Subpart 3872—Protests, Contests and Conflicts

SOURCE: 35 FR 9760, June 13, 1970, unless otherwise noted.

#### § 3872.1 Protest against mineral applications.

(a) At any time prior to the issuance of patent, protest may be filed against the patenting of the claim as applied for, upon any ground tending to show that the applicant has failed to comply with the law in any matter essential to a valid entry under the patent proceedings. Such protest cannot, however, be made the means of preserving a surface conflict lost by failure to adverse or lost by the judgment of the court in an adverse suit. One holding a present joint interest in a mineral location included in an application for patent who is excluded from the application, so that his interest would not be protected by the issue of patent thereon, may protest against the issuance of a patent as applied for, setting forth in such protest the nature and extent of his interest in such location, and such a protestant will be deemed a party in interest entitled to appeal. This results from the holding that a co-owner excluded from an application for patent does not have an "adverse" claim within the meaning of R.S. 2325 and 2326 (30 U.S.C. 29, 30). (See *Turner v. Sawyer*, 150 U.S. 578-586, 37 L. ed. 1189-1191.)

(b) A protest by any party, except a Federal agency, must include the processing fee for protests found in the fee schedule in § 3000.12 of this chapter.

[35 FR 9760, June 13, 1970, as amended at 70 FR 58880, Oct. 7, 2005]

#### § 3872.2 Procedure in contest cases.

Parts 1840 and 1850 of this chapter, in cases before the United States, the Bureau of Land Management, and the Department of the Interior will, so far as applicable, govern in all cases and pro-

ceedings arising in contests and hearings to determine the character of lands.

#### § 3872.3 Presumption as to land returned as mineral.

Public land returned upon the survey records as mineral shall be withheld from entry as agricultural land until the presumption arising from such a return shall be overcome.

#### § 3872.4 Procedure to dispute record character of land.

(a) When lands returned as mineral are sought to be entered as agricultural under laws which require the submission of final proof after due notice by publication and posting, the filing of the proper nonmineral statement in the absence of allegations that the land is mineral will be deemed sufficient as a preliminary requirement. A satisfactory showing as to character of land must be made when final proof is submitted.

(b) In case of application to enter, locate, or select such lands as agricultural, under laws in which the submission of final proof after due publication and posting is not required, notice thereof must first be given by publication for 60 days and posting in the local office during the same period, and affirmative proof as to the character of the land submitted. In the absence of allegations that the land is mineral, and upon compliance with this requirement, the entry location, or selection will be allowed, if otherwise regular.

(c) Where as against the claimed right to enter such lands as agricultural it is alleged that the same are mineral, or are applied for as mineral lands, the proceedings in this class of cases will be in the nature of a contest, and the practice will be governed by the rules in force in contest cases.

#### § 3872.5 Testimony at hearings to determine character of lands.

(a) At hearings to determine the character of lands the claimants and witnesses will be thoroughly examined with regard to the character of the land; whether the same has been thoroughly prospected; whether or not there exists within the tract or tracts claimed any lode or vein of quartz or

### § 3873.1

other rock in place bearing gold, silver, cinnabar, lead, tin, copper, or other valuable deposit which has ever been claimed, located, recorded, or worked; whether such work is entirely abandoned, or whether occasionally resumed; if such lode does exist, by whom claimed, under what designation, and in which subdivision of the land it lies; whether any placer mine or mines exist upon the land; if so, what is the character thereof, whether of the shallow-surface description, or of the deep cement, blue lead, or gravel deposits; to what extent mining is carried on when water can be obtained, and what the facilities are for obtaining water for mining purposes; upon what particular 10-acre subdivisions mining has been done, and at what time the land was abandoned for mining purposes, if abandoned at all. In every case, where practicable, an adequate quantity or number of representative samples of the alleged mineral-bearing matter or material should be offered in evidence, with proper identification, to be considered in connection with the record, with which they will be transmitted upon each appeal that may be taken. Testimony may be submitted as to the geological formation and development of mineral on adjoining or adjacent lands and their relevancy.

(b) The testimony should also show the agricultural capacities of the land, what kind of crops are raised thereon, the value thereof; the number of acres actually cultivated for crops of cereals or vegetables, and within which particular 10-acre subdivision such crops are raised; also which of these subdivisions embrace the improvements, giving in detail the extent and value of the improvements, such as house, barn, vineyard, orchard, fencing, etc., and mining improvements.

(c) The testimony should be as full and complete as possible; and in addition to the leading points indicated above, where an attempt is made to prove the mineral character of lands which have been entered under the agricultural laws, it should show at what date, if at all, valuable deposits of minerals were first known to exist on the lands.

### 43 CFR Ch. II (10-1-08 Edition)

#### Subpart 3873—Segregation

SOURCE: 35 FR 9760, June 13, 1970, unless otherwise noted.

##### § 3873.1 Segregation of mineral from non-mineral land.

Where a survey is necessary to set apart mineral from non-mineral land the appropriate authorized officer will have special instructions prepared outlining the procedure to be followed in the required survey. The survey will be executed at the expense of the United States. Where, in stock-raising homestead entries, it has been satisfactorily established that there are existent prior unpatented mining claims, the segregation of the latter is not strictly a segregation of mineral from non-mineral land, but rather the procedure adopted to define the boundaries of and provide a legal description for that part of the homestead entry which is not within the segregated mining claims.

##### § 3873.2 Effect of decision that land is mineral.

The fact that a certain tract of land is decided upon testimony to the mineral in character is by no means equivalent to an award of the land to a miner. In order to secure a patent for such land, he must proceed as in other cases, in accordance with this part.

##### § 3873.3 Non-mineral entry of residue of subdivisions invaded by mining claims.

(a) The authorized officer will accept and approve any application (if otherwise regular), to make a non-mineral entry of the residue of any original lot or legal subdivision which is invaded by mining claims if the tract has already been lotted to exclude such claims. If not so lotted, and if the original lot or legal subdivision is invaded by patented mining claims, or by mining claims covered by pending applications for patent which the non-mineral applicant does not desire to contest, or by approved mining claims of established mineral character, the authorized officer will accept and approve the application (if otherwise regular), exclusive of the conflict with the mining claims.

**Bureau of Land Management, Interior**

**§ 3873.3**

(b) The authorized officer will allow no non-mineral application for any portion of an original lot or 40-acre legal subdivision, where the tract has not been lotted to show the reduced area by reason of approved surveys of mining claims for which applications for patent have not been filed, until the non-mineral applicant submits a satisfactory showing that such surveyed claims are in fact mineral in character. Applications to have lands which are asserted to be mineral, or mining loca-

tions, segregated by survey with a view to the non-mineral appropriation of the remainder, will be made to the authorized officer of the proper office. Such applications must be supported by a written statement of the party in interest, duly corroborated by two or more disinterested persons, or by such other or further evidence as may be required, that the land sought to be segregated as mineral is in fact mineral in character.

## SUBCHAPTER D—RANGE MANAGEMENT (4000)

### Group 4100—Grazing Administration

NOTE: The information collection requirements contained in subparts 4120 and 4130 of Group 4100 have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance numbers 1004-0005, 1004-0019, 1004-0020, 1004-0041, 1004-0047, 1004-0051, 1004-0068 and 1004-0131. The information is being collected to permit the authorized officer to determine whether an application to utilize the public lands for grazing purposes should be granted. The information will be used to make this determination. A response is required to obtain a benefit.

[48 FR 40890, Sept. 12, 1983]

### PART 4100—GRAZING ADMINISTRATION—EXCLUSIVE OF ALASKA

#### Subpart 4100—Grazing Administration—Exclusive of Alaska; General

##### Sec.

- 4100.0-1 Purpose.
- 4100.0-2 Objectives.
- 4100.0-3 Authority.
- 4100.0-5 Definitions.
- 4100.0-7 Cross reference.
- 4100.0-8 Land use plans.
- 4100.0-9 Information collection.

#### Subpart 4110—Qualifications and Preference

- 4110.1 Mandatory qualifications.
- 4110.1-1 Acquired lands.
- 4110.2 Grazing preference.
- 4110.2-1 Base property.
- 4110.2-2 Specifying grazing preference.
- 4110.2-3 Transfer of grazing preference.
- 4110.2-4 Allotments.
- 4110.3 Changes in grazing preference.
- 4110.3-1 Increasing active use.
- 4110.3-2 Decreasing active use.
- 4110.3-3 Implementing changes in active use.
- 4110.4 Changes in public land acreage.
- 4110.4-1 Additional land acreage.
- 4110.4-2 Decrease in land acreage.
- 4110.5 Interest of Member of Congress.

#### Subpart 4120—Grazing Management

- 4120.1 [Reserved]
- 4120.2 Allotment management plans and resource activity plans.
- 4120.3 Range improvements.

- 4120.3-1 Conditions for range improvements.
- 4120.3-2 Cooperative range improvement agreements.
- 4120.3-3 Range improvement permits.
- 4120.3-4 Standards, design and stipulations.
- 4120.3-5 Assignment of range improvements.
- 4120.3-6 Removal and compensation for loss of range improvements.
- 4120.3-7 Contributions.
- 4120.3-8 Range improvement fund.
- 4120.3-9 Water rights for the purpose of livestock grazing on public lands.
- 4120.4 Special rules.
- 4120.5 Cooperation.
- 4120.5-1 Cooperation in management.
- 4120.5-2 Cooperation with Tribal, state, county, and Federal agencies.

#### Subpart 4130—Authorizing Grazing Use

- 4130.1 Applications.
- 4130.1-1 Filing applications.
- 4130.1-2 Conflicting applications.
- 4130.2 Grazing permits or leases.
- 4130.3 Terms and conditions.
- 4130.3-1 Mandatory terms and conditions.
- 4130.3-2 Other terms and conditions.
- 4130.3-3 Modification of permits or leases.
- 4130.4 Authorization of temporary changes in grazing use within the terms and conditions of permits and leases, including temporary nonuse.
- 4130.5 Free-use grazing permits.
- 4130.6 Other grazing authorizations.
- 4130.6-1 Exchange-of-use grazing agreements.
- 4130.6-2 Nonrenewable grazing permits and leases.
- 4130.6-3 Crossing permits.
- 4130.6-4 Special grazing permits or leases.
- 4130.7 Ownership and identification of livestock.
- 4130.8 Fees.
- 4130.8-1 Payment of fees.
- 4130.8-2 Refunds.
- 4130.8-3 Service charge.
- 4130.9 Pledge of permits or leases as security for loans.

#### Subpart 4140—Prohibited Acts

- 4140.1 Acts prohibited on public lands.

#### Subpart 4150—Unauthorized Grazing Use

- 4150.1 Violations.
- 4150.2 Notice and order to remove.
- 4150.3 Settlement.
- 4150.4 Impoundment and disposal.
- 4150.4-1 Notice of intent to impound.
- 4150.4-2 Impoundment.
- 4150.4-3 Notice of public sale.
- 4150.4-4 Redemption.
- 4150.4-5 Sale.

- 4180.1 Fundamentals of rangeland health.
- 4180.2 Standards and guidelines for grazing administration.

### Subpart 4190—Effect of Wildfire Management Decisions

- 4190.1 Effect of wildfire management decisions.

AUTHORITY: 43 U.S.C. 315, 315a-315r, 1181d, 1740.

SOURCE: 43 FR 29067, July 5, 1978, unless otherwise noted.

### Subpart 4100—Grazing Administration—Exclusive of Alaska; General

#### § 4100.0-1 Purpose.

The purpose is to provide uniform guidance for administration of grazing on the public lands exclusive of Alaska.

[49 FR 6449, Feb. 21, 1984]

#### § 4100.0-2 Objectives.

(a) The objectives of these regulations are to promote healthy sustainable rangeland ecosystems; to accelerate restoration and improvement of public rangelands to properly functioning conditions; to promote the orderly use, improvement and development of the public lands; to establish efficient and effective administration of grazing of public rangelands; and to provide for the sustainability of the western livestock industry and communities that are dependent upon productive, healthy public rangelands.

(b) These objectives will be realized in a manner consistent with land use plans, multiple use, sustained yield, environmental values, economic and other objectives stated in the Taylor Grazing Act of June 28, 1934, as amended (43 U.S.C. 315, 315a-315r); section 102 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701) and the Public Rangelands Improvement Act of 1978 (43 U.S.C. 1901(b)(2)).

[60 FR 9960, Feb. 22, 1995, as amended at 71 FR 39503, July 12, 2006]

#### § 4100.0-3 Authority.

(a) The Taylor Grazing Act of June 28, 1934 as amended (43 U.S.C. 315, 315a through 315r);

(b) The Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 *et seq.*) as amended by the Public Rangelands Improvement Act of 1978 (43 U.S.C. 1901 *et seq.*);

(c) Executive orders that transfer land acquired under the Bankhead-Jones Farm Tenant Act of July 22, 1937, as amended (7 U.S.C. 1012), to the Secretary and authorize administration under the Taylor Grazing Act.

(d) Section 4 of the Oregon and California Railroad Land Act of August 28, 1937 (43 U.S.C. 1181d);

(e) The Public Rangelands Improvement Act of 1978 (43 U.S.C. 1901 *et seq.*); and

(f) Public land orders, Executive orders, and agreements that authorize the Secretary to administer livestock grazing on specified lands under the Taylor Grazing Act or other authority as specified.

[43 FR 29067, July 5, 1978, as amended at 49 FR 6449, Feb. 21, 1984; 49 FR 12704, Mar. 30, 1984; 50 FR 45827, Nov. 4, 1985; 61 FR 4227, Feb. 5, 1996; 71 FR 39503, July 12, 2006]

#### § 4100.0-5 Definitions.

Whenever used in this part, unless the context otherwise requires, the following definitions apply:

The *Act* means the Taylor Grazing Act of June 28, 1934, as amended (43 U.S.C. 315, 315a-315r).

*Active use* means that portion of the grazing preference that is:

(1) Available for livestock grazing use under a permit or lease based on livestock carrying capacity and resource conditions in an allotment; and

(2) Not in suspension.

*Activity plan* means a plan for managing a resource use or value to achieve specific objectives. For example, an allotment management plan is an activity plan for managing livestock grazing use to improve or maintain rangeland conditions.

*Actual use* means where, how many, what kind or class of livestock, and how long livestock graze on an allotment, or on a portion or pasture of an allotment.

*Actual use report* means a report of the actual livestock grazing use submitted by the permittee or lessee.

*Affiliate* means an entity or person that controls, is controlled by, or is under common control with, an applicant, permittee or lessee. The term "control" means having any relationship which gives an entity or person authority directly or indirectly to determine the manner in which an applicant, permittee or lessee conducts grazing operations.

*Allotment* means an area of land designated and managed for grazing of livestock.

*Allotment management plan (AMP)* means a documented program developed as an activity plan, consistent with the definition at 43 U.S.C. 1702(k), that focuses on, and contains the necessary instructions for, the management of livestock grazing on specified public lands to meet resource condition, sustained yield, multiple use, economic and other objectives.

*Animal unit month (AUM)* means the amount of forage necessary for the sustenance of one cow or its equivalent for a period of 1 month.

*Annual rangelands* means those designated areas in which livestock forage production is primarily attributable to annual plants and varies greatly from year to year.

*Authorized officer* means any person authorized by the Secretary to administer regulations in this part.

*Base property* means: (1) Land that has the capability to produce crops or forage that can be used to support authorized livestock for a specified period of the year, or (2) water that is suitable for consumption by livestock and is available and accessible, to the author-

ized livestock when the public lands are used for livestock grazing.

*Cancelled or cancellation* means a permanent termination of a grazing permit or grazing lease and grazing preference, or free-use grazing permit or other grazing authorization, in whole or in part.

*Class of livestock* means ages and/or sex groups of a kind of livestock.

*Consultation, cooperation, and coordination* means interaction for the purpose of obtaining advice, or exchanging opinions on issues, plans, or management actions.

*Control* means being responsible for and providing care and management of base property and/or livestock.

*District* means the specific area of public lands administered by a District Manager or a Field Manager.

*Ephemeral rangelands* means areas of the Hot Desert Biome (Region) that do not consistently produce enough forage to sustain a livestock operation, but from time to time produce sufficient forage to accommodate livestock grazing.

*Grazing district* means the specific area within which the public lands are administered under section 3 of the Act. Public lands outside grazing district boundaries are administered under section 15 of the Act.

*Grazing fee year* means the year, used for billing purposes, which begins on March 1, of a given year and ends on the last day of February of the following year.

*Grazing lease* means a document that authorizes grazing use of the public lands under Section 15 of the Act. A grazing lease specifies grazing preference and the terms and conditions under which lessees make grazing use during the term of the lease.

*Grazing permit* means a document that authorizes grazing use of the public lands under Section 3 of the Act. A grazing permit specifies grazing preference and the terms and conditions under which permittees make grazing use during the term of the permit.

*Grazing preference or preference* means the total number of animal unit months on public lands apportioned and attached to base property owned or controlled by a permittee, lessee, or an applicant for a permit or lease. Grazing

preference includes active use and use held in suspension. Grazing preference holders have a superior or priority position against others for the purpose of receiving a grazing permit or lease.

*Interested public* means an individual, group, or organization that has:

(1)(i) Submitted a written request to BLM to be provided an opportunity to be involved in the decisionmaking process as to a specific allotment, and

(ii) Followed up that request by submitting written comment as to management of a specific allotment, or otherwise participating in the decisionmaking process as to a specific allotment, if BLM has provided them an opportunity for comment or other participation; or

(2) Submitted written comments to the authorized officer regarding the management of livestock grazing on a specific allotment.

*Land use plan* means a resource management plan, developed under the provisions of 43 CFR part 1600, or a management framework plan. These plans are developed through public participation in accordance with the provisions of the Federal Land Policy and Management Act of 1976 (43 U.S.C 1701 *et seq.*) and establish management direction for resource uses of public lands.

*Livestock or kind of livestock* means species of domestic livestock—cattle, sheep, horses, burros, and goats.

*Livestock carrying capacity* means the maximum stocking rate possible without inducing damage to vegetation or related resources. It may vary from year to year on the same area due to fluctuating forage production.

*Monitoring* means the periodic observation and orderly collection of data to evaluate:

(1) Effects of management actions; and

(2) Effectiveness of actions in meeting management objectives.

*Preference* means grazing preference (see definition of “grazing preference”).

*Public lands* means any land and interest in land outside of Alaska owned by the United States and administered by the Secretary of the Interior through the Bureau of Land Management, except lands held for the benefit of Indians.

*Range improvement* means an authorized physical modification or treatment which is designed to improve production of forage; change vegetation composition; control patterns of use; provide water; stabilize soil and water conditions; restore, protect and improve the condition of rangeland ecosystems to benefit livestock, wild horses and burros, and fish and wildlife. The term includes, but is not limited to, structures, treatment projects, and use of mechanical devices or modifications achieved through mechanical means.

*Rangeland studies* means any study methods accepted by the authorized officer for collecting data on actual use, utilization, climatic conditions, other special events, and trend to determine if management objectives are being met.

*Secretary* means the Secretary of the Interior or his authorized officer.

*Service area* means the area that can be properly grazed by livestock watering at a certain water.

*State Director* means the State Director, Bureau of Land Management, or his or her authorized representative.

*Supplemental feed* means a feed which supplements the forage available from the public lands and is provided to improve livestock nutrition or rangeland management.

*Suspension* means the withholding from active use, through a decision issued by the authorized officer or by agreement, of part or all of the grazing preference specified in a grazing permit or lease.

*Temporary nonuse* means that portion of active use that the authorized officer authorizes not to be used, in response to an application made by the permittee or lessee.

*Trend* means the direction of change over time, either toward or away from desired management objectives.

*Unauthorized leasing and subleasing* means—

(1) The lease or sublease of a Federal grazing permit or lease, associated with the lease or sublease of base property, to another party without a required transfer approved by the authorized officer;

(2) The lease or sublease of a Federal grazing permit or lease to another

#### § 4100.0-7

party without the assignment of the associated base property;

(3) Allowing another party, other than sons and daughters of the grazing permittee or lessee meeting the requirements of § 4130.7(f), to graze on public lands livestock that are not owned or controlled by the permittee or lessee; or

(4) Allowing another party, other than sons and daughters of the grazing permittee or lessee meeting the requirements of § 4130.7(f), to graze livestock on public lands under a pasturing agreement without the approval of the authorized officer.

*Utilization* means the portion of forage that has been consumed by livestock, wild horses and burros, wildlife and insects during a specified period. The term is also used to refer to the pattern of such use.

[43 FR 29067, July 5, 1978, as amended at 46 FR 5788, Jan. 19, 1981; 53 FR 10232, Mar. 29, 1988; 60 FR 9961, Feb. 22, 1995; 71 FR 39503, July 12, 2006]

#### § 4100.0-7 Cross reference.

The regulations at part 1600 of this chapter govern the development of land use plans; the regulations at part 1780, subpart 1784 of this chapter govern advisory committees; and the regulations at subparts B and E of part 4 of this title govern appeals and hearings.

[60 FR 9962, Feb. 22, 1995]

#### § 4100.0-8 Land use plans.

The authorized officer shall manage livestock grazing on public lands under the principle of multiple use and sustained yield, and in accordance with applicable land use plans. Land use plans shall establish allowable resource uses (either singly or in combination), related levels of production or use to be maintained, areas of use, and resource condition goals and objectives to be obtained. The plans also set forth program constraints and general management practices needed to achieve management objectives. Livestock grazing activities and management actions approved by the authorized officer shall be in conformance with the land use plan as defined at 43 CFR 1601.0-5(b).

[53 FR 10233, Mar. 29, 1988]

#### 43 CFR Ch. II (10-1-08 Edition)

#### § 4100.0-9 Information collection.

The information collection requirements contained in Group 4100 have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* The information is collected to enable the authorized officer to determine whether to approve an application to utilize public lands for grazing or other purposes.

[71 FR 39503, July 12, 2006]

### Subpart 4110—Qualifications and Preference

#### § 4110.1 Mandatory qualifications.

(a) Except as provided under §§ 4110.1-1, 4130.5, and 4130.6-3, to qualify for grazing use on the public lands an applicant must own or control land or water base property, and must be:

(1) A citizen of the United States or have properly filed a valid declaration of intention to become a citizen or a valid petition for naturalization; or

(2) A group or association authorized to conduct business in the State in which the grazing use is sought, all members of which are qualified under paragraph (a) of this section; or

(3) A corporation authorized to conduct business in the State in which the grazing use is sought.

(b) Applicants for the renewal or issuance of new permits and leases and any affiliates must be determined by the authorized officer to have a satisfactory record of performance under § 4130.1-1(b).

(c) Applicants shall submit an application and any other relevant information requested by the authorized officer in order to determine that all qualifications have been met.

[43 FR 29067, July 5, 1978, as amended at 49 FR 6450, Feb. 21, 1984; 60 FR 9962, Feb. 22, 1995; 71 FR 39503, July 12, 2006]

#### § 4110.1-1 Acquired lands.

Where lands have been acquired by the Bureau of Land Management through purchase, exchange, Act of Congress or Executive Order, and an agreement or the terms of the act or Executive Order provide that the Bureau of Land Management shall honor existing grazing permits or leases, such permits or leases are governed by the

## Bureau of Land Management, Interior

## §4110.2-2

terms and conditions in effect at the time of acquisition by the Bureau of Land Management, and are not subject to the requirements of §4110.1.

[60 FR 9962, Feb. 22, 1995]

### §4110.2 Grazing preference.

#### §4110.2-1 Base property.

(a) The authorized officer shall find land or water owned or controlled by an applicant to be base property (see §4100.0-5) if:

(1) It is capable of serving as a base of operation for livestock use of public lands within a grazing district; or

(2) It is contiguous land, or, when no applicant owns or controls contiguous land, noncontiguous land that is capable of being used in conjunction with a livestock operation which would utilize public lands outside a grazing district.

(b) After appropriate consultation, cooperation, and coordination, the authorized officer shall specify the length of time for which land base property shall be capable of supporting authorized livestock during the year, relative to the multiple use management objective of the public lands.

(c) An applicant shall provide a legal description, or plat, of the base property and shall certify to the authorized officer that this base property meets the requirements under paragraphs (a) and (b) of this section.

(d) A permittee's or lessee's interest in water previously recognized as base property on public land shall be deemed sufficient in meeting the requirement that the applicant control base property. Where such waters become unusable and are replaced by newly constructed or reconstructed water developments that are the subject of a range improvement permit or cooperative range improvement agreement, the permittee's or lessee's interest in the replacement water shall be deemed sufficient in meeting the requirement that the applicant control base property.

(e) If a permittee or lessee loses ownership or control of all or part of his/her base property, the permit or lease, to the extent it was based upon such lost property, shall terminate immediately without further notice from the authorized officer. However, if, prior to

losing ownership or control of the base property, the permittee or lessee requests, in writing, that the permit or lease be extended to the end of the grazing season or grazing year, the termination date may be extended as determined by the authorized officer after consultation with the new owner. When a permit or lease terminates because of a loss of ownership or control of a base property, the grazing preference shall remain with the base property and be available through application and transfer procedures at 43 CFR 4110.2-3, to the new owner or person in control of that base property.

(f) Applicants who own or control base property contiguous to or cornering upon public land outside a grazing district where such public land consists of an isolated or disconnected tract embracing 760 acres or less shall, for a period of 90 days after the tract has been offered for lease, have a preference right to lease the whole tract.

[43 FR 29067, July 5, 1978, as amended at 46 FR 5788, Jan. 19, 1981; 49 FR 6450, Feb. 21, 1984; 53 FR 10233, Mar. 29, 1988; 60 FR 9962, Feb. 22, 1995; 71 FR 39503, July 12, 2006]

#### §4110.2-2 Specifying grazing preference.

(a) All grazing permits and grazing leases will specify grazing preference, except for permits and leases for designated ephemeral rangelands, where BLM authorizes livestock use based upon forage availability, or designated annual rangelands. Preference includes active use and any suspended use. Active use is based on the amount of forage available for livestock grazing as established in the land use plan, activity plan, or decision of the authorized officer under §4110.3-3, except, in the case of designated ephemeral or annual rangelands, a land use plan or activity plan may alternatively prescribe vegetation standards to be met in the use of such rangelands.

(b) The grazing preference specified is attached to the base property supporting the grazing permit or grazing lease.

(c) The animal unit months of grazing preference are attached to:

(1) The acreage of land base property on a pro rata basis, or

### §4110.2-3

### 43 CFR Ch. II (10-1-08 Edition)

(2) Water base property on the basis of livestock forage production within the service area of the water.

[71 FR 39503, July 12, 2006]

#### **§4110.2-3 Transfer of grazing preference.**

(a) Transfers of grazing preference in whole or in part are subject to the following requirements:

(1) The transferee shall meet all qualifications and requirements of §§ 4110.1, 4110.2-1, and 4110.2-2.

(2) The transfer applications under paragraphs (b) and (c) of this section shall evidence assignment of interest and obligation in range improvements authorized on public lands under §4120.3 and maintained in conjunction with the transferred preference (see §4120.3-5). The terms and conditions of the cooperative range improvement agreements and range improvement permits are binding on the transferee.

(3) The transferee shall accept the terms and conditions of the terminating grazing permit or lease (see §4130.2) with such modifications as he may request which are approved by the authorized officer or with such modifications as may be required by the authorized officer.

(4) The transferee shall file an application for a grazing permit or lease to the extent of the transferred preference simultaneously with filing a transfer application under paragraph (b) or (c) of this section.

(b) If base property is sold or leased, the transferee shall within 90 days of the date of sale or lease file with BLM a properly executed transfer application showing the base property and the grazing preference, in animal unit months, attached to that base property.

(c) If a grazing preference is being transferred from one base property to another base property, the transferor shall own or control the base property from which the grazing preference is being transferred and file with the authorized officer a properly completed transfer application for approval. No transfer will be allowed without the written consent of the owner(s), and any person or entity holding an encumbrance of the base property from which the transfer is to be made.

(d) At the date of approval of a transfer, the existing grazing permit or lease shall terminate automatically and without notice to the extent of the transfer.

(e) If an unqualified transferee acquires rights in base property through operation of law or testamentary disposition, such transfer will not affect the grazing preference or any outstanding grazing permit or lease, or preclude the issuance or renewal of a grazing permit or lease based on such property for a period of 2 years after the transfer. However, such a transferee shall qualify under paragraph (a) of this section within the 2-year period or the grazing preference shall be subject to cancellation. The authorized officer may grant extensions of the 2-year period where there are delays solely attributable to probate proceedings.

(f) Transfers shall be for a period of not less than 3 years unless a shorter term is determined by the authorized officer to be consistent with management and resource condition objectives.

(g) Failure of either the transferee or the transferor to comply with the regulations of this section may result in rejection of the transfer application or cancellation of grazing preference.

[43 FR 29067, July 5, 1978, as amended at 46 FR 5788, Jan. 19, 1981; 47 FR 41709, Sept. 21, 1982; 49 FR 6450, Feb. 21, 1984; 53 FR 10233, Mar. 29, 1988; 60 FR 9963, Feb. 22, 1995; 61 FR 4227, Feb. 5, 1996; 71 FR 39504, July 12, 2006]

#### **§4110.2-4 Allotments.**

After consultation, cooperation, and coordination with the affected grazing permittees or lessees and the state having lands or responsibility for managing resources within the area, the authorized officer may designate and adjust grazing allotment boundaries. The authorized officer may combine or divide allotments, through an agreement or by decision, when necessary for the proper and efficient management of public rangelands.

[71 FR 39504, July 12, 2006]

#### **§4110.3 Changes in grazing preference.**

(a) The authorized officer will periodically review the grazing preference

## Bureau of Land Management, Interior

## §4110.3-3

specified in a grazing permit or lease and make changes in the grazing preference as needed to:

(1) Manage, maintain, or improve rangeland productivity;

(2) Assist in making progress toward restoring ecosystems to properly functioning condition;

(3) Conform with land use plans or activity plans; or

(4) Comply with the provisions of subpart 4180 of this part.

(b) The authorized officer will support these changes by monitoring, documented field observations, ecological site inventory, or other data acceptable to the authorized officer.

(c) Before changing grazing preference, the authorized officer will undertake the appropriate analysis as required by the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 *et seq.*). Under NEPA, the authorized officer will analyze and, if appropriate, document the relevant social, economic, and cultural effects of the proposed action.

[71 FR 39504, July 12, 2006]

### §4110.3-1 Increasing active use.

When monitoring or documented field observations show that additional forage is available for livestock grazing, either on a temporary or sustained yield basis, BLM may apportion additional forage to qualified applicants for livestock grazing use consistent with multiple-use management objectives specified in the applicable land use plan.

(a) *Additional forage temporarily available.* When the authorized officer determines that additional forage is temporarily available for livestock, he may authorize its use on a nonrenewable basis under §4130.6-2 in the following order:

(1) To permittees or lessees who have preference for grazing use in the allotment where the forage is available, in proportion to their active use; and

(2) To other qualified applicants under §4130.1-2.

(b) *Additional forage available on a sustained yield basis.* When the authorized officer determines that additional forage is available for livestock use on a sustained yield basis, he will apportion it in the following manner:

(1) First, to remove all or a part of the suspension of preference of permittees or lessees with permits or leases in the allotment where the forage is available; and

(2) Second, if additional forage remains after ending all suspensions, the authorized officer will consult, cooperate, and coordinate with the affected permittees or lessees, the state having lands or responsibility for managing resources within the area, the interested public, and apportion it in the following order:

(i) Permittees or lessees in proportion to their contribution to stewardship efforts that result in increased forage production;

(ii) Permittees or lessees in proportion to the amount of their grazing preference; and

(iii) Other qualified applicants under §4130.1-2.

[71 FR 39504, July 12, 2006]

### §4110.3-2 Decreasing active use.

(a) The authorized officer may suspend active use in whole or in part on a temporary basis due to reasons specified in §4110.3-3(b)(1), or to facilitate installation, maintenance, or modification of range improvements.

(b) When monitoring or documented field observations show grazing use or patterns of use are not consistent with the provisions of subpart 4180 of this part, or grazing use is otherwise causing an unacceptable level or pattern of utilization, or when use exceeds the livestock carrying capacity as determined through monitoring, ecological site inventory, or other acceptable methods, the authorized officer will reduce active use, otherwise modify management practices, or both. To implement reductions under this paragraph, BLM will suspend active use.

[71 FR 39504, July 12, 2006]

### §4110.3-3 Implementing changes in active use.

(a)(1) After consultation, cooperation, and coordination with the affected permittee or lessee and the state having lands or responsibility for managing resources within the area, the authorized officer will implement

#### §4110.4

changes in active use through a documented agreement or by a decision. The authorized officer will implement changes in active use in excess of 10 percent over a 5-year period unless:

(i) After consultation with the affected permittees or lessees, an agreement is reached to implement the increase or decrease in less than 5 years, or

(ii) The changes must be made before 5 years have passed in order to comply with applicable law.

(2) Decisions implementing §4110.3-2 will be issued as proposed decisions pursuant to §4160.1, except as provided in paragraph (b) of this section.

(b)(1) After consultation with, or a reasonable attempt to consult with, affected permittees or lessees and the state having lands or responsibility for managing resources within the area, the authorized officer will close allotments or portions of allotments to grazing by any kind of livestock or modify authorized grazing use notwithstanding the provisions of paragraph (a) of this section when the authorized officer determines and documents that—

(i) The soil, vegetation, or other resources on the public lands require immediate protection because of conditions such as drought, fire, flood, or insect infestation; or

(ii) Continued grazing use poses an imminent likelihood of significant resource damage.

(2) Notices of closure and decisions requiring modification of authorized grazing use may be issued as final decisions effective upon issuance or on the date specified in the decision. Such decisions will remain in effect pending the decision on appeal unless the Office of Hearings and Appeals grants a stay in accordance with §4.472 of this title.

[71 FR 39504, July 12, 2006]

#### §4110.4 Changes in public land acreage.

##### §4110.4-1 Additional land acreage.

When lands outside designated allotments become available for livestock grazing under the administration of the Bureau of Land Management, the forage available for livestock shall be made available to qualified applicants

#### 43 CFR Ch. II (10-1-08 Edition)

at the discretion of the authorized officer. Grazing use shall be apportioned under §4130.1-2 of this title.

[53 FR 10234, Mar. 29, 1988]

##### §4110.4-2 Decrease in land acreage.

(a) Where there is a decrease in public land acreage available for livestock grazing within an allotment:

(1) Grazing permits or leases may be cancelled or modified as appropriate to reflect the changed area of use.

(2) Grazing preference may be canceled in whole or in part. Cancellations determined by the authorized officer to be necessary to protect the public lands will be apportioned by the authorized officer based upon the level of available forage and the magnitude of the change in public land acreage available, or as agreed to among the authorized users and the authorized officer.

(b) When public lands are disposed of or devoted to a public purpose which precludes livestock grazing, the permittees and lessees shall be given 2 years' prior notification except in cases of emergency (national defense requirements in time of war, natural disasters, national emergency needs, etc.) before their grazing permit or grazing lease and grazing preference may be canceled. A permittee or lessee may unconditionally waive the 2-year prior notification. Such a waiver shall not prejudice the permittee's or lessee's right to reasonable compensation for, but not to exceed the fair market value of his or her interest in authorized permanent range improvements located on these public lands (see §4120.3-6).

[43 FR 29067, July 5, 1978, as amended at 49 FR 6451, Feb. 21, 1984; 49 FR 12704, Mar. 30, 1984; 54 FR 31485, July 28, 1989; 60 FR 9963, Feb. 22, 1995; 71 FR 39505, July 12, 2006]

##### §4110.5 Interest of Member of Congress.

Title 18 U.S.C. 431 through 433 (1970) generally prohibits a Member of or Delegate to Congress from entering into any contract or agreement with the United States. Title 41 U.S.C. 22 (1970) generally provides that in every contract or agreement to be made or entered into, or accepted by or on behalf of the United States, there shall be inserted an express condition that no

## Bureau of Land Management, Interior

## § 4120.3-1

Member of or Delegate to Congress shall be admitted to any share or part of such contract or agreement, or to any benefit to arise thereupon. The provisions of these laws are incorporated herein by reference and apply to all permits, leases, and agreements issued under these regulations.

[43 FR 29067, July 5, 1978. Redesignated at 49 FR 6451, Feb. 21, 1984]

### Subpart 4120—Grazing Management

#### § 4120.1 [Reserved]

#### § 4120.2 Allotment management plans and resource activity plans.

Allotment management plans or other activity plans intended to serve as the functional equivalent of allotment management plans may be developed by permittees or lessees, other Federal or State resource management agencies, interested citizens, and the Bureau of Land Management. When such plans affecting the administration of grazing allotments are developed, the following provisions apply:

(a) An allotment management plan or other activity plans intended to serve as the functional equivalent of allotment management plans shall be prepared in careful and considered consultation, cooperation, and coordination with affected permittees or lessees, landowners involved, the resource advisory council, any State having lands or responsible for managing resources within the area to be covered by such a plan, and the interested public. The plan shall become effective upon approval by the authorized officer. The plans shall—

(1) Include terms and conditions under §§ 4130.3, 4130.3-1, 4130.3-2 4130.3-3, and subpart 4180 of this part;

(2) Prescribe the livestock grazing practices necessary to meet specific resource objectives;

(3) Specify the limits of flexibility, to be determined and granted on the basis of the operator's demonstrated stewardship, within which the permittee(s) or lessee(s) may adjust operations without prior approval of the authorized officer; and

(4) Provide for monitoring to evaluate the effectiveness of management

actions in achieving the specific resource objectives of the plan.

(b) Private and State lands may be included in allotment management plans or other activity plans intended to serve as the functional equivalent of allotment management plans dealing with rangeland management with the consent or at the request of the parties who own or control those lands.

(c) The authorized officer shall provide opportunity for public participation in the planning and environmental analysis of proposed plans affecting the administration of grazing and shall give public notice concerning the availability of environmental documents prepared as a part of the development of such plans, prior to implementing the plans. The decision document following the environmental analysis will be issued in accordance with § 4160.1.

(d) A requirement to conform with completed allotment management plans or other applicable activity plans intended to serve as the functional equivalent of allotment management plans shall be incorporated into the terms and conditions of the grazing permit or lease for the allotment.

(e) Allotment management plans or other applicable activity plans intended to serve as the functional equivalent of allotment management plans may be revised or terminated by the authorized officer after consultation, cooperation, and coordination with the affected permittees or lessees, landowners involved, the resource advisory council, any State having lands or responsible for managing resources within the area to be covered by the plan, and the interested public.

[60 FR 9964, Feb. 22, 1995, as amended at 61 FR 4227, Feb. 5, 1996; 71 FR 39505, July 12, 2006]

#### § 4120.3 Range improvements.

#### § 4120.3-1 Conditions for range improvements.

(a) Range improvements shall be installed, used, maintained, and/or modified on the public lands, or removed from these lands, in a manner consistent with multiple-use management.

## § 4120.3-2

(b) Prior to installing, using, maintaining, and/or modifying range improvements on the public lands, permittees or lessees shall have entered into a cooperative range improvement agreement with the Bureau of Land Management or must have an approved range improvement permit.

(c) The authorized officer may require a permittee or lessee to maintain and/or modify range improvements on the public lands under § 4130.3-2 of this title.

(d) The authorized officer may require a permittee or lessee to install range improvements on the public lands in an allotment with two or more permittees or lessees and/or to meet the terms and conditions of agreement.

(e) A range improvement permit or cooperative range improvement agreement does not convey to the permittee or cooperator any right, title, or interest in any lands or resources held by the United States.

(f) The authorized officer will review proposed range improvement projects as required by the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*). The decision document following the environmental analysis shall be issued in accordance with § 4160.1.

[49 FR 6452, Feb. 21, 1984, as amended at 60 FR 9964, Feb. 22, 1995; 61 FR 4227, Feb. 5, 1996; 71 FR 39505, July 12, 2006]

## § 4120.3-2 Cooperative range improvement agreements.

(a) The Bureau of Land Management may enter into a cooperative range improvement agreement with a person, organization, or other government entity for the installation, use, maintenance, and/or modification of permanent range improvements or rangeland developments to achieve management or resource condition objectives. The cooperative range improvement agreement shall specify how the costs or labor, or both, shall be divided between the United States and cooperator(s).

(b) Subject to valid existing rights, cooperators and the United States will share title to permanent structural range improvements such as fences, wells, and pipelines where authorization is granted after August 11, 2006 in proportion to their contribution to on-

## 43 CFR Ch. II (10-1-08 Edition)

the-ground project development and construction costs. The authorization for all new permanent water developments, such as spring developments, wells, reservoirs, stock tanks, and pipelines, shall be through cooperative range improvement agreements. The authorized officer will document a permittee's or lessee's interest in contributed funds, labor, and materials to ensure proper credit for the purposes of §§ 4120.3-5 and 4120.3-6(c).

(c) The United States shall have title to nonstructural range improvements such as seeding, spraying, and chaining.

(d) Range improvement work performed by a cooperator or permittee on the public lands or lands administered by the Bureau of Land Management does not confer the exclusive right to use the improvement or the land affected by the range improvement work.

[60 FR 9964, Feb. 22, 1995, as amended at 61 FR 4227, Feb. 5, 1996; 71 FR 39505, July 12, 2006]

## § 4120.3-3 Range improvement permits.

(a) Any permittee or lessee may apply for a range improvement permit to install, use, maintain, and/or modify removable range improvements that are needed to achieve management objectives for the allotment in which the permit or lease is held. The permittee or lessee shall agree to provide full funding for construction, installation, modification, or maintenance. Such range improvement permits are issued at the discretion of the authorized officer.

(b) The permittee or lessee may hold the title to authorized removable range improvements used as livestock handling facilities such as corrals, creep feeders, and loading chutes, and to temporary structural improvements such as troughs for hauled water.

(c) If forage available for livestock is not or will not be used by the preference permittee or lessee, BLM may issue nonrenewable grazing permits or leases to other qualified applicants to use it under §§ 4130.6-2 and 4130.4(d), or § 4110.3-1(a)(2). The term "forage available for livestock" does not include temporary nonuse that BLM approves

## Bureau of Land Management, Interior

## §4120.3-7

for reasons of natural resource conservation, enhancement, or protection, or use suspended by BLM under §4110.3-2(b). Before issuing a nonrenewable permit or lease, BLM will consult, cooperate, and coordinate as provided in §4130.6-2. If BLM issues such a nonrenewable permit or lease, the preference permittee or lessee shall cooperate with the temporary authorized use of forage by another operator.

(1) A permittee or lessee shall be reasonably compensated for the use and maintenance of improvements and facilities by the operator who has an authorization for temporary grazing use.

(2) The authorized officer may mediate disputes about reasonable compensation and, following consultation with the interested parties, make a determination concerning the fair and reasonable share of operation and maintenance expenses and compensation for use of authorized improvements and facilities.

(3) Where a settlement cannot be reached, the authorized officer shall issue a temporary grazing authorization including appropriate terms and conditions and the requirement to compensate the preference permittee or lessee for the fair share of operation and maintenance as determined by the authorized officer under subpart 4160 of this part.

[49 FR 6452, Feb. 21, 1984; 49 FR 12704, Mar. 30, 1984, as amended at 60 FR 9964, Feb. 22, 1995; 71 FR 39505, July 12, 2006]

### §4120.3-4 Standards, design and stipulations.

Range improvement permits and cooperative range improvement agreements shall specify the standards, design, construction and maintenance criteria for the range improvements and other additional conditions and stipulations or modifications deemed necessary by the authorized officer.

[49 FR 6452, Feb. 21, 1984, as amended at 61 FR 4227, Feb. 5, 1996]

### §4120.3-5 Assignment of range improvements.

The authorized officer shall not approve the transfer of a grazing preference under §4110.2-3 of this title or approve use by the transferee of existing range improvements, unless the

transferee has agreed to compensate the transferor for his/her interest in the authorized improvements within the allotment as of the date of the transfer.

[53 FR 10234, Mar. 29, 1988]

### §4120.3-6 Removal and compensation for loss of range improvements.

(a) Range improvements shall not be removed from the public lands without authorization.

(b) The authorized officer may require permittees or lessees to remove range improvements which they own on the public lands if these improvements are no longer helping to achieve land use plan or allotment goals and objectives or if they fail to meet the criteria under §4120.3-4 of this title.

(c) Whenever a grazing permit or lease is cancelled in order to devote the public lands covered by the permit or lease to another public purpose, including disposal, the permittee or lessee shall receive from the United States reasonable compensation for the adjusted value of their interest in authorized permanent improvements placed or constructed by the permittee or lessee on the public lands covered by the cancelled permit or lease. The adjusted value is to be determined by the authorized officer. Compensation shall not exceed the fair market value of the terminated portion of the permittee's or lessee's interest therein. Where a range improvement is authorized by a range improvement permit, the livestock operator may elect to salvage materials and perform rehabilitation measures rather than be compensated for the adjusted value.

(d) Permittees or lessees shall be allowed 180 days from the date of cancellation of a range improvement permit or cooperative range improvement agreement to salvage material owned by them and perform rehabilitation measures necessitated by the removal.

[49 FR 6452, Feb. 21, 1984; 49 FR 12704, Mar. 30, 1984, as amended at 61 FR 4227, Feb. 5, 1996]

### §4120.3-7 Contributions.

The authorized officer may accept contributions of labor, material, equipment, or money for administration, protection, and improvement of the

#### **§ 4120.3-8**

public lands necessary to achieve the objectives of this part.

[49 FR 6452, Feb. 21, 1984]

#### **§ 4120.3-8 Range improvement fund.**

(a) In addition to range developments accomplished through other resource management funds, authorized range improvements may be secured through the use of the appropriated range improvement fund. One-half of the available funds shall be expended in the State and district from which they were derived. The remaining one-half of the fund shall be allocated, on a priority basis, by the Secretary for on-the-ground rehabilitation, protection and improvement of public rangeland ecosystems.

(b) Funds appropriated for range improvements are to be used for investment in all forms of improvements that benefit rangeland resources including riparian area rehabilitation, improvement and protection, fish and wildlife habitat improvement or protection, soil and water resource improvement, wild horse and burro habitat management facilities, vegetation improvement and management, and livestock grazing management. The funds may be used for activities associated with on-the-ground improvements including the planning, design, layout, contracting, modification, maintenance for which the Bureau of Land Management is responsible, and monitoring and evaluating the effectiveness of specific range improvement projects.

(c) During the planning of the range development or range improvement programs, the authorized officer shall consult the resource advisory council, affected permittees, lessees, and members of the interested public.

[60 FR 9965, Feb. 22, 1995, as amended at 61 FR 4227, Feb. 5, 1996; 71 FR 39505, July 12, 2006]

#### **§ 4120.3-9 Water rights for the purpose of livestock grazing on public lands.**

Any right that the United States acquires to use water on public land for the purpose of livestock watering on public land will be acquired, perfected, maintained, and administered under the substantive and procedural laws of

#### **43 CFR Ch. II (10-1-08 Edition)**

the state within which such land is located.

[71 FR 39505, July 12, 2006]

#### **§ 4120.4 Special rules.**

(a) When a State Director determines that local conditions require a special rule to achieve improved administration consistent with the objectives of this part, the Director may approve such rules. The rules shall be subject to public review and comment, as appropriate, and upon approval, shall become effective when published in the FEDERAL REGISTER as final rules. Special rules shall be published in a local newspaper.

(b) Where the Bureau of Land Management administers the grazing use of other Federal Agency lands, the terms of an appropriate Memorandum of Understanding or Cooperative Agreement shall apply.

[49 FR 6452, Feb. 21, 1984]

#### **§ 4120.5 Cooperation.**

##### **§ 4120.5-1 Cooperation in management.**

The authorized officer shall, to the extent appropriate, cooperate with Federal, State, Indian tribal and local governmental entities, institutions, organizations, corporations, associations, and individuals to achieve the objectives of this part.

[60 FR 9965, Feb. 22, 1995]

##### **§ 4120.5-2 Cooperation with Tribal, state, county, and Federal agencies.**

Insofar as the programs and responsibilities of other agencies and units of government involve grazing upon the public lands and other lands administered by the Bureau of Land Management, or the livestock which graze thereon, the Bureau of Land Management will cooperate, to the extent consistent with applicable laws of the United States, with the involved agencies and government entities. The authorized officer will cooperate with Tribal, state, county, and Federal agencies in the administration of laws and regulations relating to livestock, livestock diseases, sanitation, and noxious weeds, including—

## Bureau of Land Management, Interior

## §4130.1-2

(a) State cattle and sheep sanitary or brand boards in control of stray and unbranded livestock, to the extent such cooperation does not conflict with the Wild Free-Roaming Horse and Burro Act of 1971 (16 U.S.C. 1331 et seq.);

(b) County or other local weed control districts in analyzing noxious weed problems and developing control programs for areas of the public lands and other lands administered by the Bureau of Land Management; and

(c) Tribal, state, county, or local government-established grazing boards in reviewing range improvements and allotment management plans on public lands.

[60 FR 9965, Feb. 22, 1995, as amended at 71 FR 39505, July 12, 2006]

### Subpart 4130—Authorizing Grazing Use

#### §4130.1 Applications.

##### §4130.1-1 Filing applications.

(a) Applications for grazing permits or leases (active use and nonuse), free-use grazing permits and other grazing authorizations shall be filed with the authorized officer at the local Bureau of Land Management office having jurisdiction over the public lands involved.

(b) The authorized officer will determine whether applicants for the renewal of permits and leases or issuance of permits and leases that authorize use of new or transferred preference, and any affiliates, have a satisfactory record of performance. The authorized officer will not renew or issue a permit or lease unless the applicant and all affiliates have a satisfactory record of performance.

(1) *Renewal of permit or lease.* (i) The authorized officer will deem the applicant for renewal of a grazing permit or lease, and any affiliate, to have a satisfactory record of performance if the authorized officer determines the applicant and affiliates to be in substantial compliance with the terms and conditions of the existing Federal grazing permit or lease for which renewal is sought, and with the rules and regulations applicable to the permit or lease.

(ii) The authorized officer may take into consideration circumstances beyond the control of the applicant or affiliate in determining whether the applicant and affiliates are in substantial compliance with permit or lease terms and conditions and applicable rules and regulations.

(2) *New permit or lease or transfer of grazing preference.* The authorized officer will deem applicants for new permits or leases or transfer of grazing preference, including permits or leases that arise from transfer of preference, and any affiliates, to have a record of satisfactory performance when—

(i) The applicant or affiliate has not had any Federal grazing permit or lease canceled, in whole or in part, for violation of the permit or lease within the 36 calendar months immediately preceding the date of application; and

(ii) The applicant or affiliate has not had any state grazing permit or lease, for lands within the grazing allotment for which a Federal permit or lease is sought, canceled, in whole or in part, for violation of the permit or lease within the 36 calendar months immediately preceding the date of application; and

(iii) A court of competent jurisdiction has not barred the applicant or affiliate from holding a Federal grazing permit or lease.

(c) In determining whether affiliation exists, the authorized officer will consider all appropriate factors, including, but not limited to, common ownership, common management, identity of interests among family members, and contractual relationships.

[71 FR 39505, July 12, 2006]

##### §4130.1-2 Conflicting applications.

When more than one qualified applicant applies for livestock grazing use of the same public lands and/or where additional forage for livestock or additional acreage becomes available, the authorized officer may authorize grazing use of such land or forage on the basis of §4110.3-1 of this title or on the basis of any of the following factors:

(a) Historical use of the public lands (see §4130.2(e));

(b) Proper use of rangeland resources;

(c) General needs of the applicant's livestock operations;

## §4130.2

## 43 CFR Ch. II (10–1–08 Edition)

(d) Public ingress or egress across privately owned or controlled land to public lands;

(e) Topography;

(f) Other land use requirements unique to the situation.

(g) Demonstrated stewardship by the applicant to improve or maintain and protect the rangeland ecosystem; and

(h) The applicant's and affiliate's history of compliance with the terms and conditions of grazing permits and leases of the Bureau of Land Management and any other Federal or State agency, including any record of suspensions or cancellations of grazing use for violations of terms and conditions of agency grazing rules.

[49 FR 6453, Feb. 21, 1984; 49 FR 12704, Mar. 30, 1984, as amended at 53 FR 10234, Mar. 29, 1988; 60 FR 9965, Feb. 22, 1995; 61 FR 4227, Feb. 5, 1996]

### §4130.2 Grazing permits or leases.

(a) Grazing permits and leases authorize use on the public lands and other BLM-administered lands that are designated in land use plans as available for livestock grazing. Permits and leases will specify the grazing preference, including active and suspended use. These grazing permits and leases will also specify terms and conditions pursuant to §§4130.3, 4130.3–1, and 4130.3–2.

(b) The authorized officer will consult, cooperate, and coordinate with affected permittees and lessees, and the state having lands or responsibility for managing resources within the area, before issuing or renewing grazing permits and leases.

(c) Grazing permits or leases convey no right, title, or interest held by the United States in any lands or resources.

(d) The term of grazing permits or leases authorizing livestock grazing on the public lands and other lands under the administration of the Bureau of Land Management shall be 10 years unless—

(1) The land is being considered for disposal;

(2) The land will be devoted to a public purpose which precludes grazing prior to the end of 10 years;

(3) The term of the base property lease is less than 10 years, in which

case the term of the Federal permit or lease shall coincide with the term of the base property lease; or

(4) The authorized officer determines that a permit or lease for less than 10 years is in the best interest of sound land management.

(e) Permittees or lessees holding expiring grazing permits or leases shall be given first priority for new permits or leases if:

(1) The lands for which the permit or lease is issued remain available for domestic livestock grazing;

(2) The permittee or lessee is in compliance with the rules and regulations and the terms and conditions in the permit or lease; and

(3) The permittee or lessee accepts the terms and conditions to be included by the authorized officer in the new permit or lease.

(f) A permit or lease is not valid unless both BLM and the permittee or lessee have signed it.

(g) Permits or leases may incorporate the percentage of public land livestock use (see §4130.3–2(g)) or may include private land offered under exchange-of-use grazing agreements (see §4130.6–1).

(h) Provisions explaining how grazing permits or authorizations may be granted for grazing use on state, county or private land leased by the Bureau of Land Management under “The Pierce Act” and located within grazing districts are explained in 43 CFR part 4600.

[43 FR 29067, July 5, 1978, as amended at 47 FR 41711, Sept. 21, 1982; 49 FR 6453, Feb. 21, 1984; 49 FR 12704, Mar. 30, 1984; 53 FR 10234, Mar. 29, 1988; 53 FR 22326, June 15, 1988; 60 FR 9965, Feb. 22, 1995; 61 FR 29031, June 7, 1996; 61 FR 4227, Feb. 5, 1996; 71 FR 39506, July 12, 2006]

### §4130.3 Terms and conditions.

(a) Livestock grazing permits and leases shall contain terms and conditions determined by the authorized officer to be appropriate to achieve management and resource condition objectives for the public lands and other lands administered by the Bureau of Land Management, and to ensure conformance with the provisions of subpart 4180 of this part.

(b) Upon a BLM offer of a permit or lease, the permit or lease terms and

## Bureau of Land Management, Interior

## §4130.3-3

conditions may be protested and appealed under part 4 and subpart 4160 of this part.

(c) If any term or condition of a BLM-offered permit or lease is stayed pending appeal, BLM will authorize grazing use as provided in §4160.4 with respect to the stayed term or condition.

[60 FR 9966, Feb. 22, 1995, as amended at 71 FR 39506, July 12, 2006]

### §4130.3-1 Mandatory terms and conditions.

(a) The authorized officer shall specify the kind and number of livestock, the period(s) of use, the allotment(s) to be used, and the amount of use, in animal unit months, for every grazing permit or lease. The authorized livestock grazing use shall not exceed the livestock carrying capacity of the allotment.

(b) All permits and leases shall be made subject to cancellation, suspension, or modification for any violation of these regulations or of any term or condition of the permit or lease.

(c) Permits and leases shall incorporate terms and conditions that ensure conformance with subpart 4180 of this part.

[49 FR 6453, Feb. 21, 1984, as amended at 53 FR 10234, Mar. 29, 1988. Redesignated at 60 FR 9965, Feb. 22, 1995, and amended at 60 FR 9966, Feb. 22, 1995]

### §4130.3-2 Other terms and conditions.

The authorized officer may specify in grazing permits or leases other terms and conditions which will assist in achieving management objectives, provide for proper range management or assist in the orderly administration of the public rangelands. These may include but are not limited to:

(a) The class of livestock that will graze on an allotment;

(b) The breed of livestock in allotments within which two or more permittees or lessees are authorized to graze;

(c) Authorization to use, and directions for placement of supplemental feed, including salt, for improved livestock and rangeland management on the public lands;

(d) A requirement that permittees or lessees operating under a grazing per-

mit or lease submit within 15 days after completing their annual grazing use, or as otherwise specified in the permit or lease, the actual use made;

(e) The kinds of indigenous animals authorized to graze under specific terms and conditions;

(f) Provision for livestock grazing temporarily to be delayed, discontinued or modified to allow for the reproduction, establishment, or restoration of vigor of plants, provide for the improvement of riparian areas to achieve proper functioning condition or for the protection of other rangeland resources and values consistent with objectives of applicable land use plans, or to prevent compaction of wet soils, such as where delay of spring turnout is required because of weather conditions or lack of plant growth;

(g) The percentage of public land use determined by the proportion of livestock forage available on public lands within the allotment compared to the total amount available from both public lands and those owned or controlled by the permittee or lessee; and

(h) A statement disclosing the requirement that permittees or lessees shall provide reasonable administrative access across private and leased lands to the Bureau of Land Management for the orderly management and protection of the public lands.

[49 FR 6453, Feb. 21, 1984; 49 FR 12704, Mar. 30, 1984. Redesignated at 60 FR 9965, Feb. 22, 1995, and amended at 60 FR 9966, Feb. 22, 1995]

### §4130.3-3 Modification of permits or leases.

(a) Following consultation, cooperation, and coordination with the affected lessees or permittees and the state having lands or responsibility for managing resources within the area, the authorized officer may modify terms and conditions of the permit or lease when the active use or related management practices:

(1) Do not meet management objectives specified in:

(i) The land use plan;

(ii) The pertinent allotment management plan or other activity plan; or

(iii) An applicable decision issued under §4160.3; or

(2) Do not conform to the provisions of subpart 4180 of this part.

#### § 4130.4

#### 43 CFR Ch. II (10–1–08 Edition)

(b) To the extent practical, during the preparation of reports that evaluate monitoring and other data that the authorized officer uses as a basis for making decisions to increase or decrease grazing use, or otherwise to change the terms and conditions of a permit or lease, the authorized officer will provide the following with an opportunity to review and offer input:

- (1) Affected permittees or lessees;
- (2) States having lands or responsibility for managing resources within the affected area; and
- (3) The interested public.

[71 FR 39506, July 12, 2006]

#### **§ 4130.4 Authorization of temporary changes in grazing use within the terms and conditions of permits and leases, including temporary nonuse.**

(a) The authorized officer may authorize temporary changes in grazing use within the terms and conditions of the permit or lease.

(b) For the purposes of this subpart, “temporary changes in grazing use within the terms and conditions of the permit or lease” means temporary changes in livestock number, period of use, or both, that would:

- (1) Result in temporary nonuse; or
- (2) Result in forage removal that—
  - (i) Does not exceed the amount of active use specified in the permit or lease; and
  - (ii) Occurs either not earlier than 14 days before the begin date specified on the permit or lease, and not later than 14 days after the end date specified on the permit or lease, unless otherwise specified in the appropriate allotment management plan under § 4120.2(a)(3); or
- (3) Result in both temporary nonuse under paragraph (b)(1) of this section and forage removal under paragraph (b)(2) of this section.

(c) The authorized officer will consult, cooperate, and coordinate with the permittees or lessees regarding their applications for changes within the terms and conditions of their permit or lease.

(d) Permittees and lessees must apply if they wish—

- (1) Not to use all or a part of their active use by applying for temporary

nonuse under paragraph (e) of this section;

- (2) To use forage previously authorized as temporary nonuse; or

- (3) To use forage that is temporarily available on designated ephemeral or annual ranges.

(e)(1) Temporary nonuse is authorized—

- (i) Only if the authorized officer approves in advance; and

- (ii) For no longer than one year at a time.

(2) Permittees or lessees applying for temporary nonuse use must state on their application the reasons supporting nonuse. The authorized officer may authorize nonuse to provide for:

- (i) Natural resource conservation, enhancement, or protection, including more rapid progress toward meeting resource condition objectives or attainment of rangeland health standards; or
- (ii) The business or personal needs of the permittee or lessee.

(f) Under § 4130.6–2, the authorized officer may authorize qualified applicants to graze forage made available as a result of temporary nonuse approved for the reasons described in paragraph (e)(2)(ii) of this section. The authorized officer will not authorize anyone to graze forage made available as a result of temporary nonuse approved under paragraph (e)(2)(i) of this section.

(g) Permittees or lessees who wish to obtain temporary changes in grazing use within the terms and conditions of their permit or lease must file an application in writing with BLM on or before the date they wish the change in grazing use to begin. The authorized officer will assess a service charge under § 4130.8–3 to process applications for changes in grazing use that require the issuance of a replacement or supplemental billing notice.

[71 FR 39506, July 12, 2006]

#### **§ 4130.5 Free-use grazing permits.**

(a) A free-use grazing permit shall be issued to any applicant whose residence is adjacent to public lands within grazing districts and who needs these public lands to support those domestic livestock owned by the applicant whose products or work are used directly and exclusively by the applicant and his

## Bureau of Land Management, Interior

## §4130.6-4

family. The issuance of free-use grazing permits is subject to §4130.1-2. These permits shall be issued on an annual basis. These permits cannot be transferred or assigned.

(b) The authorized officer may also authorize free use under the following circumstances:

(1) The primary objective of grazing use is the management of vegetation to meet resource objectives other than the production of livestock forage and such use is in conformance with the requirements of this part;

(2) The primary purpose of grazing use is for scientific research or administrative studies; or

(3) The primary purpose of grazing use is the control of noxious weeds.

[43 FR 29067, July 5, 1978, as amended at 49 FR 6453, Mar. 30, 1984. Redesignated at 60 FR 9965, Feb. 22, 1995, and amended at 60 FR 9966, Feb. 22, 1995; 71 FR 39507, July 12, 2006]

### §4130.6 Other grazing authorizations.

Exchange-of-use grazing agreements, nonrenewable grazing permits or leases, crossing permits, and special grazing permits or leases have no priority for renewal and cannot be transferred or assigned.

[43 FR 29067, July 5, 1978, as amended at 47 FR 41711, Sept. 21, 1982. Redesignated at 60 FR 9965, Feb. 22, 1995]

#### §4130.6-1 Exchange-of-use grazing agreements.

(a) An exchange-of-use grazing agreement may be issued to an applicant who owns or controls lands that are unfenced and intermingled with public lands in the same allotment when use under such an agreement will be in harmony with the management objectives for the allotment and will be compatible with the existing livestock operations. The agreements shall contain appropriate terms and conditions required under §4130.3 that ensure the orderly administration of the range, including fair and equitable sharing of the operation and maintenance of range improvements. The term of an exchange-of-use agreement may not exceed the length of the term for any leased lands that are offered in exchange-of-use.

(b) An exchange-of-use grazing agreement may be issued to authorize use of

public lands to the extent of the livestock carrying capacity of the lands offered in exchange-of-use. No fee shall be charged for this grazing use.

[45 FR 47105, July 11, 1980, as amended at 49 FR 6453, Feb. 21, 1984; 53 FR 10234, Mar. 29, 1988. Redesignated at 60 FR 9965, Feb. 22, 1995, and amended at 60 FR 9967, Feb. 22, 1995]

#### §4130.6-2 Nonrenewable grazing permits and leases.

(a) Nonrenewable grazing permits or leases may be issued on an annual basis, as provided in §4110.3-1(a), to qualified applicants when forage is temporarily available, provided this use is consistent with multiple-use objectives and does not interfere with existing livestock operations on the public lands. The authorized officer shall consult, cooperate, and coordinate with affected permittees or lessees, and the state having lands or responsibility for managing resources within the area, before issuing nonrenewable grazing permits and leases.

(b) Notwithstanding the provisions of §4.21(a)(1) of this title, when BLM determines that it is necessary for orderly administration of the public lands, the authorized officer may make a decision that issues a nonrenewable grazing permit or lease, or that affects an application for grazing use on annual or designated ephemeral rangelands, effective immediately or on a date established in the decision.

[71 FR 39507, July 12, 2006]

#### §4130.6-3 Crossing permits.

A crossing permit may be issued by the authorized officer to any applicant showing a need to cross the public land or other land under Bureau of Land Management control, or both, with livestock for proper and lawful purposes. A temporary use authorization for trailing livestock shall contain terms and conditions for the temporary grazing use that will occur as deemed necessary by the authorized officer to achieve the objectives of this part.

[60 FR 9967, Feb. 22, 1995]

#### §4130.6-4 Special grazing permits or leases.

Special grazing permits or leases authorizing grazing use by privately

## §4130.7

owned or controlled indigenous animals may be issued at the discretion of the authorized officer. This use shall be consistent with multiple-use objectives. These permits or leases shall be issued for a term deemed appropriate by the authorized officer not to exceed 10 years.

[43 FR 29067, July 5, 1978, as amended at 47 FR 41711, Sept. 21, 1982. Redesignated at 60 FR 9965, Feb. 22, 1995]

### §4130.7 Ownership and identification of livestock.

(a) The permittee or lessee shall own or control and be responsible for the management of the livestock which graze the public land under a grazing permit or lease.

(b) Authorized users shall comply with the requirements of the State in which the public lands are located relating to branding of livestock, breed, grade, and number of bulls, health and sanitation.

(c) The authorized officer may require counting and/or additional special marking or tagging of the authorized livestock in order to promote the orderly administration of the public lands.

(d) Except as provided in paragraph (f) of this section, where a permittee or lessee controls but does not own the livestock which graze the public lands, the agreement that gives the permittee or lessee control of the livestock by the permittee or lessee shall be filed with the authorized officer and approval received prior to any grazing use. The document shall describe the livestock and livestock numbers, identify the owner of the livestock, contain the terms for the care and management of the livestock, specify the duration of the agreement, and shall be signed by the parties to the agreement.

(e) The brand and other identifying marks on livestock controlled, but not owned, by the permittee or lessee shall be filed with the authorized officer.

(f) Livestock owned by sons and daughters of grazing permittees and lessees may graze public lands included within the permit or lease of their parents when all the following conditions exist:

(1) The sons and daughters are participating in educational or youth pro-

## 43 CFR Ch. II (10-1-08 Edition)

grams related to animal husbandry, agribusiness or rangeland management, or are actively involved in the family ranching operation and are establishing a livestock herd with the intent of assuming part or all of the family ranch operation.

(2) The livestock owned by the sons and daughters to be grazed on public lands do not comprise greater than 50 percent of the total number authorized to occupy public lands under their parent's permit or lease.

(3) The brands or other markings of livestock that are owned by sons and daughters are recorded on the parent's permit, lease, or grazing application.

(4) Use by livestock owned by sons and daughters, when considered in addition to use by livestock owned or controlled by the permittee or lessee, does not exceed authorized livestock use and is consistent with other terms and conditions of the permit or lease.

[49 FR 6453, Feb. 21, 1984; 49 FR 12704, Mar. 30, 1984, as amended at 50 FR 45827, Nov. 4, 1985. Redesignated at 60 FR 9965, Feb. 22, 1995, and amended at 60 FR 9967, Feb. 22, 1995]

### §4130.8 Fees.

#### §4130.8-1 Payment of fees.

(a) Grazing fees shall be established annually by the Secretary.

(1) Except as provided in paragraphs (a)(2) and (a)(3) of this section, the calculated fee or grazing fee shall be equal to the \$1.23 base established by the 1966 Western Livestock Grazing Survey multiplied by the result of the Forage Value Index (computed annually from data supplied by the National Agricultural Statistics Service) added to the Combined Index (Beef Cattle Price Index minus the Prices Paid Index) and divided by 100; as follows:

$$CF = \$1.23 \times \frac{FVI + BCPI - PPI}{100}$$

CF = Calculated Fee (grazing fee) is the estimated economic value of livestock grazing, defined by the Congress as fair market value (FMV) of the forage;

\$1.23=The base economic value of grazing on public rangeland established by the 1966 Western Livestock Grazing Survey;

FVI=Forage Value Index means the weighted average estimate of the annual rental charge per head per month for pasturing cattle on private rangelands in the 11

## Bureau of Land Management, Interior

## §4130.8-1

Western States (Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, and California) (computed by the National Agricultural Statistics Service from the June Enumerative Survey) divided by \$3.65 and multiplied by 100;

BCPI=*Beef Cattle Price Index* means the weighted average annual selling price for beef cattle (excluding calves) in the 11 Western States (Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, and California) for November through October (computed by the National Agricultural Statistics Service divided by \$22.04 per hundred weight and multiplied by 100; and  
PPI=*Prices Paid Index* means the following selected components from the National Agricultural Statistics Service's Annual National Index of Prices Paid by Farmers for Goods and Services adjusted by the weights indicated in parentheses to reflect livestock production costs in the Western States: 1. Fuels and Energy (14.5); 2. Farm and Motor Supplies (12.0); 3. Autos and Trucks (4.5); 4. Tractors and Self-Propelled Machinery (4.5); 5. Other Machinery (12.0); 6. Building and Fencing Materials (14.5); 7. Interest (6.0); 8. Farm Wage Rates (14.0); 9. Farm Services (18.0).

(2) Any annual increase or decrease in the grazing fee for any given year shall be limited to not more than plus or minus 25 percent of the previous year's fee.

(3) The grazing fee for any year shall not be less than \$1.35 per animal unit month.

(b) Fees shall be charged for livestock grazing upon or crossing the public lands and other lands administered by the Bureau of Land Management at a specified rate per animal unit month.

(c) Except as provided in §4130.5, the full fee will be charged for each animal unit month of grazing use. For the purposes of calculating the fee, an animal unit month is defined as a month's use and occupancy of range by 1 cow, bull, steer, heifer, horse, burro, mule, 5 sheep, or 5 goats:

(1) Over the age of 6 months at the time of entering the public lands or other lands administered by BLM;

(2) Weaned regardless of age; or

(3) Becoming 12 months of age during the authorized period of use.

(d) BLM will not charge grazing fees for animals that are less than 6 months of age at the time of entering BLM-administered lands, provided that they

are the progeny of animals upon which fees are paid, and they will not become 12 months of age during the authorized period of use.

(e) In calculating the billing, the authorized officer will prorate the grazing fee on a daily basis and will round charges to reflect the nearest whole number of animal unit months.

(f) A surcharge shall be added to the grazing fee billings for authorized grazing of livestock owned by persons other than the permittee or lessee except where such use is made by livestock owned by sons and daughters of permittees and lessees as provided in §4130.7(f). The surcharge shall be over and above any other fees that may be charged for using public land forage. Surcharges shall be paid prior to grazing use. The surcharge for authorized pasturing of livestock owned by persons other than the permittee or lessee will be equal to 35 percent of the difference between the current year's Federal grazing fee and the prior year's private grazing land lease rate per animal unit month for the appropriate State as determined by the National Agricultural Statistics Service.

(g) Fees are due on due date specified on the grazing fee bill. Payment will be made prior to grazing use. Grazing use that occurs prior to payment of a bill, except where specified in an allotment management plan, is unauthorized and may be dealt with under subparts 4150 and 4170 of this part. If allotment management plans provide for billing after the grazing season, fees will be based on actual grazing use and will be due upon issuance. Repeated delays in payment of actual use billings or non-compliance with the terms and conditions of the allotment management plan and permit or lease shall be cause to revoke provisions for after-the-grazing-season billing.

(h) Failure to pay the grazing bill within 15 days of the due date specified in the bill shall result in a late fee assessment of \$25.00 or 10 percent of the grazing bill, whichever is greater, but not to exceed \$250.00. Payment made later than 15 days after the due date, shall include the appropriate late fee assessment. Failure to make payment within 30 days after the due date is a violation of §4140.1(b)(1) and may result

## § 4130.8-2

in action by the authorized officer under § 4150.1 and subpart 4160 of this part.

[49 FR 6454, Feb. 21, 1984, as amended at 53 FR 2993, Feb. 2, 1988; 53 FR 10235, Mar. 29, 1988; 53 FR 22326, June 15, 1988. Redesignated at 60 FR 9965, Feb. 22, 1995, and amended at 60 FR 9967, Feb. 22, 1995; 61 FR 4227, Feb. 5, 1996; 71 FR 39507, July 12, 2006]

### § 4130.8-2 Refunds.

(a) Grazing fees may be refunded where applications for change in grazing use and related refund are filed prior to the period of use for which the refund is requested.

(b) No refunds shall be made for failure to make grazing use, except during periods of range depletion due to drought, fire, or other natural causes, or in case of a general spread of disease among the livestock that occurs during the term of a permit or lease. During these periods of range depletion the authorized officer may credit or refund fees in whole or in part, or postpone fee payment for as long as the emergency exists.

[49 FR 6454, Feb. 21, 1984; 49 FR 12705, Mar. 30, 1984. Redesignated at 60 FR 9965, Feb. 22, 1995]

### § 4130.8-3 Service charge.

(a) Under section 304(a) of the Federal Land Policy and Management Act of 1976, BLM may establish reasonable charges for various services such as application processing. BLM may adjust these charges periodically to account for cost changes. BLM will inform the public of any changes by publishing a notice in the FEDERAL REGISTER.

(b) The following table of service charges is applicable until changed through a FEDERAL REGISTER notice as provided in paragraph (a) of this section. Except when the action is initiated by BLM, the authorized officer will assess the following service charges:

Action	Service charge
Issue crossing permit .....	\$75
Transfer grazing preference .....	145
Cancel and replace or supplement a grazing fee billing .....	50

[71 FR 39507, July 12, 2006]

## 43 CFR Ch. II (10-1-08 Edition)

### § 4130.9 Pledge of permits or leases as security for loans.

Grazing permits or leases that have been pledged as security for loans from lending agencies shall be renewed by the authorized officer under the provisions of these regulations for a period of not to exceed 10 years if the loan is for the purpose of furthering the permittee's or lessee's livestock operation, *Provided*, That the permittee or lessee has complied with the rules and regulations of this part and that such renewal will be in accordance with other applicable laws and regulations. While grazing permits or leases may be pledged as security for loans from lending agencies, this does not exempt these permits or leases from the provisions of these regulations.

[43 FR 29067, July 5, 1978. Redesignated at 49 FR 6454, Feb. 21, 1984. Further redesignated at 60 FR 9965, Feb. 22, 1995]

## Subpart 4140—Prohibited Acts

### § 4140.1 Acts prohibited on public lands.

(a) Grazing permittees or lessees performing the following prohibited acts may be subject to civil penalties under § 4170.1:

(1) Violating special terms and conditions incorporated in permits or leases;

(2) Failing to make substantial grazing use as authorized by a permit or lease for 2 consecutive fee years. This does not include approved temporary nonuse or use temporarily suspended by the authorized officer;

(3) Placing supplemental feed on these lands without authorization, or contrary to the terms and conditions of the permit or lease;

(4) Failing to comply with the terms, conditions, and stipulations of cooperative range improvement agreements or range improvement permits;

(5) Refusing to install, maintain, modify, or remove range improvements when so directed by the authorized officer.

(6) Unauthorized leasing or subleasing as defined in this part.

(b) Persons performing the following prohibited acts on BLM-administered lands are subject to civil and criminal

## Bureau of Land Management, Interior

## §4140.1

penalties set forth at §§4170.1 and 4170.2:

(1) Allowing livestock or other privately owned or controlled animals to graze on or be driven across these lands:

(i) Without a permit or lease or other grazing use authorization (see §4130.6) and timely payment of grazing fees;

(ii) In violation of the terms and conditions of a permit, lease, or other grazing use authorization including, but not limited to, livestock in excess of the number authorized;

(iii) In an area or at a time different from that authorized; or

(iv) Failing to comply with a requirement under §4130.7(c) of this title.

(2) Installing, using, maintaining, modifying, and/or removing range improvements without authorization;

(3) Cutting, burning, spraying, destroying, or removing vegetation without authorization;

(4) Damaging or removing U.S. property without authorization;

(5) Molesting, harassing, injuring, poisoning, or causing death of livestock authorized to graze on these lands and removing authorized livestock without the owner's consent;

(6) Littering;

(7) Interfering with lawful uses or users including obstructing free transit through or over public lands by force, threat, intimidation, signs, barrier or locked gates;

(8) Knowingly or willfully making a false statement or representation in base property certifications, grazing applications, range improvement permit applications, cooperative range improvement agreements, actual use reports and/or amendments thereto;

(9) Failing to pay any fee required by the authorized officer pursuant to this part, or making payment for grazing use of public lands with insufficiently funded checks on a repeated and willful basis;

(10) Failing to reclaim and repair any lands, property, or resources when required by the authorized officer;

(11) Failing to reclose any gate or other entry during periods of livestock use.

(c)(1) A grazing permittee or lessee performing any of the prohibited acts listed in paragraphs (c)(2) or (c)(3) of

this section on an allotment where he is authorized to graze under a BLM permit or lease may be subject to the civil penalties set forth at §4170.1-1, if:

(i) The permittee or lessee performs the prohibited act while engaged in activities related to grazing use authorized by his permit or lease;

(ii) The permittee or lessee has been convicted or otherwise found to be in violation of any of these laws or regulations by a court or by final determination of an agency charged with the administration of these laws or regulations; and

(iii) No further appeals are outstanding.

(2) Violation of Federal or state laws or regulations pertaining to the:

(i) Placement of poisonous bait or hazardous devices designed for the destruction of wildlife;

(ii) Application or storage of pesticides, herbicides, or other hazardous materials;

(iii) Alteration or destruction of natural stream courses without authorization;

(iv) Pollution of water sources;

(v) Illegal take, destruction, or harassment, or aiding and abetting in the illegal take, destruction, or harassment of fish and wildlife resources; and

(vi) Illegal removal or destruction of archaeological or cultural resources.

(3)(i) Violation of the Bald and Golden Eagle Protection Act (16 U.S.C. 668 *et seq.*), ESA (16 U.S.C. 1531 *et seq.*), or any provision of part 4700 of this chapter concerning the protection and management of wild free-roaming horses and burros; or

(ii) Violation of State livestock laws or regulations relating to the branding of livestock; breed, grade, and number of bulls; health and sanitation requirements; and violating State, county, or local laws regarding the straying of livestock from permitted public land grazing areas onto areas that have been formally closed to open range grazing.

[43 FR 29067, July 5, 1978, as amended at 46 FR 5790, Jan. 19, 1981; 47 FR 41712, Sept. 21, 1982; 49 FR 6454, Feb. 21, 1984; 50 FR 45827, Nov. 4, 1985; 53 FR 10235, Mar. 29, 1988; 53 FR 22326, June 15, 1988; 60 FR 9968, Feb. 22, 1995; 61 FR 4227, Feb. 5, 1996; 71 FR 39507, July 12, 2006]

## **§ 4150.1**

## **43 CFR Ch. II (10–1–08 Edition)**

### **Subpart 4150—Unauthorized Grazing Use**

#### **§ 4150.1 Violations.**

Violation of § 4140.1(b)(1) constitutes unauthorized grazing use.

(a) The authorized officer shall determine whether a violation is nonwillful, willful, or repeated willful.

(b) Violators shall be liable in damages to the United States for the forage consumed by their livestock, for injury to Federal property caused by their unauthorized grazing use, and for expenses incurred in impoundment and disposal of their livestock, and may be subject to civil penalties or criminal sanction for such unlawful acts.

[43 FR 29067, July 5, 1978, as amended at 47 FR 41712, Sept. 21, 1982; 60 FR 9968, Feb. 22, 1995]

#### **§ 4150.2 Notice and order to remove.**

(a) Whenever it appears that a violation exists and the owner of the unauthorized livestock is known, written notice of unauthorized use and order to remove livestock by a specified date shall be served upon the alleged violator or the agent of record, or both, by certified mail or personal delivery. The written notice shall also allow a specified time from receipt of notice for the alleged violator to show that there has been no violation or to make settlement under § 4150.3.

(b) Whenever a violation has been determined to be nonwillful and incidental, the authorized officer shall notify the alleged violator that the violation must be corrected, and how it can be settled, based upon the discretion of the authorized officer.

(c) When neither the owner of the unauthorized livestock nor his agent is known, the authorized officer may proceed to impound the livestock under § 4150.4.

(d) The authorized officer may temporarily close areas to grazing by specified kinds or class of livestock for a period not to exceed 12 months when necessary to abate unauthorized grazing use. Such notices of closure may be issued as final decisions effective upon issuance or on the date specified in the decision and shall remain in effect pending the decision on appeal unless a

stay is granted by the Office of Hearings and Appeals in accordance with 43 CFR 4.472(d).

[43 FR 29067, July 5, 1978, as amended at 47 FR 41712, Sept. 21, 1982; 49 FR 6454, Feb. 21, 1984; 60 FR 9968, Feb. 22, 1995; 71 FR 39507, July 12, 2006]

#### **§ 4150.3 Settlement.**

Where violations are repeated willful, the authorized officer shall take action under § 4170.1–1(b) of this title. The amount due for settlement shall include the value of forage consumed as determined in accordance with paragraph (a), (b), or (c) of this section. Settlement for willful and repeated willful violations shall also include the full value for all damages to the public lands and other property of the United States; and all reasonable expenses incurred by the United States in detecting, investigating, resolving violations, and livestock impoundment costs.

(a) For nonwillful violations: The value of forage consumed as determined by the average monthly rate per AUM for pasturing livestock on privately owned land (excluding irrigated land) in each State as published annually by the Department of Agriculture. The authorized officer may approve nonmonetary settlement of unauthorized use only when the authorized officer determines that each of the following conditions is satisfied:

(1) Evidence shows that the unauthorized use occurred through no fault of the livestock operator;

(2) The forage use is insignificant;

(3) The public lands have not been damaged; and

(4) Nonmonetary settlement is in the best interest of the United States.

(b) For willful violations: Twice the value of forage consumed as determined in paragraph (a) of this section.

(c) For repeated willful violations: Three times the value of the forage consumed as determined in paragraph (a) of this section.

(d) Payment made under this section does not relieve the alleged violator of any criminal liability under Federal or State law.

(e) Violators shall not be authorized to make grazing use on the public lands administered by the Bureau of Land Management until any amount

## Bureau of Land Management, Interior

## §4150.4-5

found to be due the United States under this section has been paid. The authorized officer may take action under subpart 4160 of this part to cancel or suspend grazing authorizations or to deny approval of applications for grazing use until such amounts have been paid.

(f) Upon a stay of a decision issued under paragraph (e) of this section, the authorized officer will allow a permittee or lessee to graze in accordance with this part 4100 pending completion of the administrative appeal process.

[49 FR 6454, Feb. 21, 1984, as amended at 53 FR 10235, Mar. 29, 1988; 60 FR 9968, Feb. 22, 1995; 61 FR 4227, Feb. 5, 1996; 71 FR 39508, July 12, 2006]

### §4150.4 Impoundment and disposal.

Unauthorized livestock remaining on the public lands or other lands under Bureau of Land Management control, or both, after the date set forth in the notice and order to remove sent under §4150.2 may be impounded and disposed of by the authorized officer as provided herein.

[43 FR 29067, July 5, 1978. Redesignated at 47 FR 41712, Sept. 21, 1982]

#### §4150.4-1 Notice of intent to impound.

(a) A written notice of intent to impound shall be sent by certified mail or personally delivered to the owner or his agent, or both. The written notice shall indicate that unauthorized livestock on the specified public lands or other lands under Bureau of Land Management control, or both, may be impounded any time after 5 days from delivery of the notice.

(b) Where the owner and his agent are unknown, or where both a known owner and his agent refuses to accept delivery, a notice of intent to impound shall be published in a local newspaper and posted at the county courthouse and a post office near the public land involved. The notice shall indicate that unauthorized livestock on the specified public lands or other lands under Bureau of Land Management control, or both, may be impounded any time after

5 days from publishing and posting the notice.

[43 FR 29067, July 5, 1978. Redesignated and amended at 47 FR 41712, Sept. 21, 1982; 49 FR 6454, Feb. 21, 1984]

#### §4150.4-2 Impoundment.

After 5 days from delivery of the notice under §4150.4-1(a) of this title or any time after 5 days from publishing and posting the notice under §4150.4-1(b) of this title, unauthorized livestock may be impounded without further notice any time within the 12-month period following the effective date of the notice.

[47 FR 41712, Sept. 21, 1982, as amended at 49 FR 6454, Feb. 21, 1984; 49 FR 12705, Mar. 30, 1984]

#### §4150.4-3 Notice of public sale.

Following the impoundment of livestock under this subpart the livestock may be disposed of by the authorized officer under these regulations or, if a suitable agreement is in effect, they may be turned over to the State for disposal. Any known owners or agents, or both, shall be notified in writing by certified mail or by personal delivery of the sale and the procedure by which the impounded livestock may be redeemed prior to the sale.

[43 FR 29067, July 5, 1982. Redesignated and amended at 47 FR 41712, Sept. 21, 1982; 49 FR 6454, Feb. 21, 1984]

#### §4150.4-4 Redemption.

Any owner or his agent, or both, or lien-holder of record of the impounded livestock may redeem them under these regulations or, if a suitable agreement is in effect, in accordance with State law, prior to the time of sale upon settlement with the United States under §4150.3 or adequate showing that there has been no violation.

[43 FR 29067, July 5, 1978. Redesignated at 47 FR 41712, Sept. 21, 1982]

#### §4150.4-5 Sale.

If the livestock are not redeemed on or before the date and time fixed for their sale, they shall be offered at public sale to the highest bidder by the authorized officer under these regulations or, if a suitable agreement is in effect, by the State. If a satisfactory bid is

## **§ 4160.1**

not received, the livestock may be re-offered for sale, condemned and destroyed or otherwise disposed of under these regulations, or if a suitable agreement is in effect, in accordance with State Law.

[43 FR 29067, July 5, 1978. Redesignated and amended at 47 FR 41712, Sept. 21, 1982]

### **Subpart 4160—Administrative Remedies**

#### **§ 4160.1 Proposed decisions.**

(a) Proposed decisions shall be served on any affected applicant, permittee or lessee, and any agent and lien holder of record, who is affected by the proposed actions, terms or conditions, or modifications relating to applications, permits and agreements (including range improvement permits) or leases, by certified mail or personal delivery. Copies of proposed decisions shall also be sent to the interested public.

(b) Proposed decisions shall state the reasons for the action and shall reference the pertinent terms, conditions and the provisions of applicable regulations. As appropriate, decisions shall state the alleged violations of specific terms and conditions and provisions of these regulations alleged to have been violated, and shall state the amount due under §§ 4130.8 and 4150.3 and the action to be taken under § 4170.1.

(c) The authorized officer may elect not to issue a proposed decision prior to a final decision where the authorized officer has made a determination in accordance with §§ 4110.3–3(b), 4130.6–2(b), 4150.2(d), or 4190.1(a).

(d) A biological assessment or biological evaluation prepared by BLM for purposes of an ESA consultation or conference is not a proposed or final decision for purposes of protest or appeal.

[60 FR 9968, Feb. 22, 1995, as amended at 71 FR 39508, July 12, 2006]

#### **§ 4160.2 Protests.**

Any applicant, permittee, lessee or other interested public may protest the proposed decision under § 4160.1 of this title in person or in writing to the au-

## **43 CFR Ch. II (10–1–08 Edition)**

thorized officer within 15 days after receipt of such decision.

[47 FR 41713, Sept. 21, 1982, as amended at 49 FR 6455, Feb. 21, 1984; 61 FR 4227, Feb. 5, 1996]

#### **§ 4160.3 Final decisions.**

(a) In the absence of a protest, the proposed decision will become the final decision of the authorized officer without further notice unless otherwise provided in the proposed decision.

(b) Upon the timely filing of a protest, the authorized officer shall reconsider her/his proposed decision in light of the protestant's statement of reasons for protest and in light of other information pertinent to the case. At the conclusion to her/his review of the protest, the authorized officer shall serve her/his final decision on the protestant or her/his agent, or both, and the interested public.

(c) Notwithstanding the provisions of § 4.21(a) of this title pertaining to the period during which a final decision will not be in effect, the authorized officer may provide that the final decision shall be effective upon issuance or on a date established in the decision, and shall remain in effect pending the decision on appeal unless a stay is granted by the Office of Hearings and Appeals when the authorized officer has made a determination in accordance with §§ 4110.3–3(b), 4130.6–2(b), 4150.2(d), or 4190.1(a). Nothing in this section shall affect the authority of the Director of the Office of Hearings and Appeals, the Interior Board of Land Appeals, or an administrative law judge to provide that the decision becomes effective immediately as provided in §§ 4.21(a)(1) and 4.479(c) of this title.

[43 FR 29067, July 5, 1978, as amended at 46 FR 5791, Jan. 19, 1981; 47 FR 41713, Sept. 21, 1982; 47 FR 46702, Oct. 20, 1982; 49 FR 6455, Feb. 21, 1984; 49 FR 12705, Mar. 30, 1984; 60 FR 9969, Feb. 22, 1995; 61 FR 4227, Feb. 5, 1996; 71 FR 39508, July 12, 2006]

#### **§ 4160.4 Appeals.**

(a) Any person whose interest is adversely affected who wishes to appeal or seek a stay of a final BLM grazing decision must follow the requirements set forth in § 4.472 of this title. The appeal and any petition for stay must be filed with the BLM office that issued

## Bureau of Land Management, Interior

## § 4170.1-1

the decision within 30 days after its receipt or within 30 days after the proposed decision becomes final as provided in § 4160.3(a).

(b) When OHA stays all or a portion of a BLM grazing decision that affects a grazing permit or lease, BLM will authorize grazing use as follows:

(1) When OHA stays implementation of all or part of a grazing decision that cancels or suspends a permit or lease, changes any term or condition of a permit or lease during its current term, or renews a permit or lease, BLM will continue to authorize grazing under the permit or lease, or the relevant term or condition thereof, that was in effect immediately before the decision was issued, subject to any relevant provisions of the stay order. This continued authorization will expire upon the resolution of the administrative appeal. Such continued authorization is not subject to protest or appeal.

(2) When OHA stays implementation of a grazing decision that issues or denies issuance of a permit or lease to a preference transferee, BLM will issue the preference applicant a permit or lease with terms and conditions that are the same as the terms and conditions of the most recent permit or lease applicable to the allotment or portion of the allotment in question, subject to any relevant provisions of the stay order. This temporary permit will expire upon the resolution of the administrative appeal. Issuance of the temporary permit is not a decision subject to protest or appeal.

(3) When OHA stays implementation of a grazing decision that issues a permit or lease to a preference transferee with terms and conditions different from terms and conditions of the most recent permit or lease applicable to the allotment or portion of the allotment in question, BLM will issue the preference applicant a permit or lease that, with respect to any stayed term or condition, is the same as the terms and conditions of the most recent permit or lease applicable to the allotment or portion of the allotment in question, subject to any relevant provisions of the stay order. This temporary permit will expire upon the resolution of the administrative appeal. Issuance of the

temporary permit is not a decision subject to protest or appeal.

[71 FR 39508, July 12, 2006]

### Subpart 4170—Penalties

#### § 4170.1 Civil penalties.

##### § 4170.1-1 Penalty for violations.

(a) The authorized officer may withhold issuance of a grazing permit or lease, or suspend the grazing use authorized under a grazing permit or lease, in whole or in part, or cancel a grazing permit or lease and grazing preference, or a free use grazing permit or other grazing authorization, in whole or in part, under subpart 4160 of this title, for violation by a permittee or lessee of any of the provisions of this part.

(b) The authorized officer shall suspend the grazing use authorized under a grazing permit, in whole or in part, or shall cancel a grazing permit or lease and grazing preference, in whole or in part, under subpart 4160 of this title for repeated willful violation by a permittee or lessee of § 4140.1(b)(1) of this title.

(c) Whenever a nonpermittee or nonlessee violates § 4140.1(b) of this title and has not made satisfactory settlement under § 4150.3 of this title the authorized officer shall refer the matter to proper authorities for appropriate legal action by the United States against the violator.

(d) Any person found to have violated the provisions of § 4140.1(a)(6) after August 21, 1995, shall be required to pay twice the value of forage consumed as determined by the average monthly rate per AUM for pasturing livestock on privately owned land (excluding irrigated land) in each State as supplied annually by the National Agricultural Statistics Service, and all reasonable expenses incurred by the United States in detecting, investigating, and resolving violations. If the dollar equivalent value is not received by the authorized officer within 30 days of receipt of the final decision, the grazing permit or lease shall be cancelled. Such payment

## **§ 4170.1-2**

shall be in addition to any other penalties the authorized officer may impose under paragraph (a) of this section.

[46 FR 5792, Jan. 19, 1981, as amended at 50 FR 45827, Nov. 4, 1985; 60 FR 9969, Feb. 22, 1995]

### **§ 4170.1-2 Failure to use.**

If a permittee or lessee has, for 2 consecutive grazing fee years, failed to make substantial use as authorized in the lease or permit, or has failed to maintain or use water base property in the grazing operation, the authorized officer, after consultation, cooperation, and coordination with the permittee or lessee and any lienholder of record, may cancel whatever amount of active use the permittee or lessee has failed to use.

[71 FR 39508, July 12, 2006]

### **§ 4170.2 Penal provisions.**

#### **§ 4170.2-1 Penal provisions under the Taylor Grazing Act.**

Under section 2 of the Act any person who willfully commits an act prohibited under § 4140.1(b), or who willfully violates approved special rules and regulations is punishable by a fine of not more than \$500.

[60 FR 9969, Feb. 22, 1995]

#### **§ 4170.2-2 Penal provisions under the Federal Land Policy and Management Act.**

Under section 303(a) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 *et seq.*), any person who knowingly and willfully commits an act prohibited under § 4140.1(b) or who knowingly and willfully violates approved special rules and regulations may be brought before a designated U.S. magistrate and is punishable by a fine in accordance with the applicable provisions of Title 18 of the United States Code, or imprisonment for no more than 12 months, or both.

[60 FR 9969, Feb. 22, 1995]

## **43 CFR Ch. II (10-1-08 Edition)**

### **Subpart 4180—Fundamentals of Rangeland Health and Standards and Guidelines for Grazing Administration**

#### **§ 4180.1 Fundamentals of rangeland health.**

Standards and guidelines developed or revised by a Bureau of Land Management State Director under § 4180.2(b) must be consistent with the following fundamentals of rangeland health:

(a) Watersheds are in, or are making significant progress toward, properly functioning physical condition, including their upland, riparian-wetland, and aquatic components; soil and plant conditions support infiltration, soil moisture storage, and the release of water that are in balance with climate and landform and maintain or improve water quality, water quantity, and timing and duration of flow.

(b) Ecological processes, including the hydrologic cycle, nutrient cycle, and energy flow, are maintained, or there is significant progress toward their attainment, in order to support healthy biotic populations and communities.

(c) Water quality complies with State water quality standards and achieves, or is making significant progress toward achieving, established BLM management objectives such as meeting wildlife needs.

(d) Habitats are, or are making significant progress toward being, restored or maintained for Federal threatened and endangered species, Federal proposed or candidate threatened and endangered species, and other special status species.

[60 FR 9969, Feb. 22, 1995, as amended at 71 FR 39508, July 12, 2006]

#### **§ 4180.2 Standards and guidelines for grazing administration.**

(a) The Bureau of Land Management State Director, in consultation with the affected resource advisory councils where they exist, will identify the geographical area for which standards and guidelines are developed. Standards and guidelines will be developed for an entire state, or an area encompassing portions of more than 1 state, unless

## Bureau of Land Management, Interior

## §4180.2

the Bureau of Land Management State Director, in consultation with the resource advisory councils, determines that the characteristics of an area are unique, and the rangelands within the area could not be adequately protected using standards and guidelines developed on a broader geographical scale.

(b) The Bureau of Land Management State Director, in consultation with affected Bureau of Land Management resource advisory councils, shall develop and amend State or regional standards and guidelines. The Bureau of Land Management State Director will also coordinate with Indian tribes, other State and Federal land management agencies responsible for the management of lands and resources within the region or area under consideration, and the public in the development of State or regional standards and guidelines. State or regional standards or guidelines developed by the Bureau of Land Management State Director may not be implemented prior to their approval by the Secretary. Standards and guidelines made effective under paragraph (f) of this section may be modified by the Bureau of Land Management State Director, with approval of the Secretary, to address local ecosystems and management practices.

(c)(1) If a standards assessment indicates to the authorized officer that the rangeland is failing to achieve standards or that management practices do not conform to the guidelines, then the authorized officer will use monitoring data to identify the significant factors that contribute to failing to achieve the standards or to conform with the guidelines. If the authorized officer determines through standards assessment and monitoring that existing grazing management practices or levels of grazing use on public lands are significant factors in failing to achieve the standards and conform with the guidelines that are made effective under this section, the authorized officer will, in compliance with applicable laws and with the consultation requirements of this part, formulate, propose, and analyze appropriate action to address the failure to meet standards or to conform to the guidelines.

(i) Parties will execute a documented agreement and/or the authorized officer

will issue a final decision on the appropriate action under §4160.3 as soon as practicable, but not later than 24 months after a determination.

(ii) BLM may extend the deadline for meeting the requirements established in paragraph (c)(1)(i) of this section when legally required processes that are the responsibility of another agency prevent completion of all legal obligations within the 24-month time frame. BLM will make a decision as soon as practicable after the legal requirements are met.

(2) Upon executing the agreement and/or in the absence of a stay of the final decision, the authorized officer will implement the appropriate action as soon as practicable, but not later than the start of the next grazing year.

(3) The authorized officer will take appropriate action as defined in this paragraph by the deadlines established in paragraphs (c)(1) and (c)(2) of this section. Appropriate action means implementing actions pursuant to subparts 4110, 4120, 4130, and 4160 of this part that will result in significant progress toward fulfillment of the standards and significant progress toward conformance with the guidelines. Practices and activities subject to standards and guidelines include the development of grazing-related portions of activity plans, establishment of terms and conditions of permits, leases, and other grazing authorizations, and range improvement activities such as vegetation manipulation, fence construction, and development of water.

(d) At a minimum, state and regional standards developed or revised under paragraphs (a) and (b) of this section must address the following:

- (1) Watershed function;
- (2) Nutrient cycling and energy flow;
- (3) Water quality;
- (4) Habitat for endangered, threatened, proposed, candidate, and other special status species; and
- (5) Habitat quality for native plant and animal populations and communities.

(e) At a minimum, State or regional guidelines developed under paragraphs (a) and (b) of this section must address the following:

(1) Maintaining or promoting adequate amounts of vegetative ground cover, including standing plant material and litter, to support infiltration, maintain soil moisture storage, and stabilize soils;

(2) Maintaining or promoting subsurface soil conditions that support permeability rates appropriate to climate and soils;

(3) Maintaining, improving or restoring riparian-wetland functions including energy dissipation, sediment capture, groundwater recharge, and stream bank stability;

(4) Maintaining or promoting stream channel morphology (e.g., gradient, width/depth ratio, channel roughness and sinuosity) and functions appropriate to climate and landform;

(5) Maintaining or promoting the appropriate kinds and amounts of soil organisms, plants and animals to support the hydrologic cycle, nutrient cycle, and energy flow;

(6) Promoting the opportunity for seedling establishment of appropriate plant species when climatic conditions and space allow;

(7) Maintaining, restoring or enhancing water quality to meet management objectives, such as meeting wildlife needs;

(8) Restoring, maintaining or enhancing habitats to assist in the recovery of Federal threatened and endangered species;

(9) Restoring, maintaining or enhancing habitats of Federal proposed, Federal candidate, and other special status species to promote their conservation;

(10) Maintaining or promoting the physical and biological conditions to sustain native populations and communities;

(11) Emphasizing native species in the support of ecological function; and

(12) Incorporating the use of non-native plant species only in those situations in which native species are not available in sufficient quantities or are incapable of maintaining or achieving properly functioning conditions and biological health.

(f) Until such time as state or regional standards and guidelines are developed and in effect, the following standards provided in paragraph (f)(1) of this section and guidelines provided

in paragraph (f)(2) of this section will apply and will be implemented in accordance with paragraph (c) of this section.

(1) *Fallback standards.* (i) Upland soils exhibit infiltration and permeability rates that are appropriate to soil type, climate and landform.

(ii) Riparian-wetland areas are in properly functioning condition.

(iii) Stream channel morphology (including but not limited to gradient, width/depth ratio, channel roughness and sinuosity) and functions are appropriate for the climate and landform.

(iv) Healthy, productive and diverse populations of native species exist and are maintained.

(2) *Fallback guidelines.* (i) Management practices maintain or promote adequate amounts of ground cover to support infiltration, maintain soil moisture storage, and stabilize soils;

(ii) Management practices maintain or promote soil conditions that support permeability rates that are appropriate to climate and soils;

(iii) Management practices maintain or promote sufficient residual vegetation to maintain, improve or restore riparian-wetland functions of energy dissipation, sediment capture, groundwater recharge and stream bank stability;

(iv) Management practices maintain or promote stream channel morphology (e.g., gradient, width/depth ratio, channel roughness and sinuosity) and functions that are appropriate to climate and landform;

(v) Management practices maintain or promote the appropriate kinds and amounts of soil organisms, plants and animals to support the hydrologic cycle, nutrient cycle, and energy flow;

(vi) Management practices maintain or promote the physical and biological conditions necessary to sustain native populations and communities;

(vii) Desired species are being allowed to complete seed dissemination in 1 out of every 3 years (Management actions will promote the opportunity for seedling establishment when climatic conditions and space allow.);

(viii) Conservation of Federal threatened or endangered, proposed, candidate, and other special status species

## Bureau of Land Management, Interior

## § 4200.1

is promoted by the restoration and maintenance of their habitats;

(ix) Native species are emphasized in the support of ecological function;

(x) Non-native plant species are used only in those situations in which native species are not readily available in sufficient quantities or are incapable of maintaining or achieving properly functioning conditions and biological health;

(xi) Periods of rest from disturbance or livestock use during times of critical plant growth or regrowth are provided when needed to achieve healthy, properly functioning conditions (The timing and duration of use periods shall be determined by the authorized officer.);

(xii) Continuous, season-long livestock use is allowed to occur only when it has been demonstrated to be consistent with achieving healthy, properly functioning ecosystems;

(xiii) Facilities are located away from riparian-wetland areas wherever they conflict with achieving or maintaining riparian-wetland function;

(xiv) The development of springs and seeps or other projects affecting water and associated resources shall be designed to protect the ecological functions and processes of those sites; and

(xv) Grazing on designated ephemeral (annual and perennial) rangeland is allowed to occur only if reliable estimates of production have been made, an identified level of annual growth or residue to remain on site at the end of the grazing season has been established, and adverse effects on perennial species are avoided.

[60 FR 9969, Feb. 22, 1995, as amended at 61 FR 59835, Nov. 25, 1996; 71 FR 39508, July 12, 2006]

### Subpart 4190—Effect of Wildfire Management Decisions

#### § 4190.1 Effect of wildfire management decisions.

(a) Notwithstanding the provisions of 43 CFR 4.21(a)(1), when BLM determines that vegetation, soil, or other resources on the public lands are at substantial risk of wildfire due to drought, fuels buildup, or other reasons, or at immediate risk of erosion or other damage due to wildfire, BLM

may make a rangeland wildfire management decision effective immediately or on a date established in the decision. Wildfire management includes but is not limited to:

(1) Fuel reduction or fuel treatment such as prescribed burns and mechanical, chemical, and biological thinning methods (with or without removal of thinned materials); and

(2) Projects to stabilize and rehabilitate lands affected by wildfire.

(b) The Interior Board of Land Appeals will issue a decision on the merits of an appeal of a wildfire management decision under paragraph (a) of this section within the time limits prescribed in 43 CFR 4.416.

[68 FR 33804, June 5, 2003]

### Group 4200—Grazing Administration; Alaska; Livestock

#### PART 4200—GRAZING ADMINISTRATION; ALASKA; LIVESTOCK

AUTHORITY: 43 U.S.C. 316, 316a–316o; 32 U.S.C. 1701 *et seq.*

#### § 4200.1 Authority for grazing privileges.

The BLM is authorized under the Alaska Livestock Grazing Act (Act of March 4, 1927, 43 U.S.C. 316, 316a–316o) to lease to qualified applicants the grazing privileges on the grazing districts established in Alaska.

[63 FR 51855, Sept. 29, 1998]

### Group 4300—Grazing Administration; Alaska; Reindeer; General

NOTE: The information collection requirements contained in subpart 4320 of Group 4300 have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance number 1004-0024. The information is being collected to permit the authorized officer to determine whether an application to utilize the public lands in Alaska for reindeer grazing should be granted. The information will be used to make this determination. The obligation to respond is required to obtain a benefit.

4300.25 Does my filed application mean I will automatically receive a permit?

## **PROTESTS AGAINST A GRAZING PERMIT APPLICATION**

4300.30 Can someone else protest my permit application?

## **CONDITIONS OF YOUR APPROVED PERMIT**

4300.40 How long can I graze reindeer with my permit?

4300.41 What will the permit say about the number of reindeer and where I can graze them?

4300.42 If I have existing improvements on the land, will these be allowed in the initial permit?

4300.43 What should I do if I want to construct and maintain improvements on the land?

4300.44 Are there any major restrictions on my grazing permit that I might otherwise think are allowed?

4300.45 Must I submit any reports?

## **CHANGES THAT CAN AFFECT YOUR PERMIT**

### **Other Uses of the Land**

4300.50 Are there other uses of the land that may affect my permit?

4300.51 Will I be notified if another use, disposal, or withdrawal occurs on the land?

4300.52 Can other persons use the land in my permit for mineral exploration or production?

## **CHANGES IN THE SIZE OF THE PERMIT AREA**

4300.53 Can BLM reduce the size of the land in my permit?

4300.54 Can BLM increase the size of the land in my permit?

4300.55 What if I don't agree with an adjustment of my permit area?

## **PERMIT RENEWALS**

4300.57 How do I apply for a renewal of my permit?

4300.58 Will the renewed permit be exactly the same as the old permit?

## **ASSIGNING YOUR PERMIT TO ANOTHER PARTY**

4300.59 If I want to assign my permit to another party, when must I notify BLM?

4300.60 What must be included in my assignment document?

4300.61 Can I sublease any part of the land in my permit?

## **CLOSING OUT YOUR PERMIT**

4300.70 May I relinquish my permit?

4300.71 Under what circumstances can BLM modify, reduce or cancel my permit?

4300.72 May I remove my personal property or improvements when the permit expires or terminates?

## **REINDEER CROSSING PERMIT**

4300.80 How can I get a permit to cross reindeer over public lands?

## **TRESPASS**

4300.90 That is a trespass?

**AUTHORITY:** 25 U.S.C. 500k, and 43 U.S.C. 1701 *et seq.*

**SOURCE:** 63 FR 55550, Oct. 16, 1998, unless otherwise noted.

## **GENERAL INFORMATION**

### **§ 4300.1 What is a reindeer?**

Reindeer, *Rangifer tarandus*, are a semi-domesticated member of the deer family, Cervidae. They are essentially the same animal as their wild cousins, the caribou, but tend to be smaller than caribou. Reindeer and caribou are different subspecies of the same family, genus, and species. The term “reindeer” includes caribou that have been introduced into animal husbandry or have joined reindeer herds, the offspring of these caribou, and the offspring of reindeer.

## Bureau of Land Management, Interior

## § 4300.24

### § 4300.2 Is there a special form for my application?

All applications you submit to BLM must be on a BLM-approved form and in duplicate. The forms to be used in this part are the Grazing Lease or Permit Application (Form 4201-1), the Reindeer Grazing Permit (Form 4132-2), and the Range Improvement Permit (Form 4120-7).

#### BEFORE YOU APPLY FOR A REINDEER GRAZING PERMIT

### § 4300.10 On what types of public land can I obtain a reindeer grazing permit?

(a) You may apply for public lands that are vacant and unappropriated.

(b) You may apply for public lands which have been withdrawn for any purpose, but the Department or agency with administrative jurisdiction of the withdrawn lands must give its prior consent, and may impose terms or conditions on the use of the land.

(c) If the lands you apply for are within natural caribou migration routes, or if they have other important values for wildlife, BLM will consult with the Alaska Department of Fish and Game before issuing a permit. BLM may include such lands in a permit at its discretion, and a permit will contain any special terms and conditions to protect wildlife resources.

### § 4300.11 Who qualifies to apply for a permit?

Natives, groups, associations or corporations of Natives as defined by the Act of September 1, 1937 (50 Stat. 900) qualify. If you are a Native corporation, you must be organized under the laws of the United States or the State of Alaska. Native corporations organized under the Alaska Native Claims Settlement Act also qualify.

### § 4300.12 What is the definition of a Native?

Natives are:

(a) Native Indians, Eskimos, and Aleuts of whole or part blood living in Alaska at the time of the Treaty of Cession of Alaska to the United States, and their descendants of whole or part blood; and

(b) Indians and Eskimos who, between 1867 and September 1, 1937, migrated into Alaska from Canada, and their descendants of whole or part blood.

#### APPLYING FOR A GRAZING PERMIT

### § 4300.20 How do I apply for a permit?

You must execute a completed application for a grazing permit (Form 4201-1) and file it in the BLM office with jurisdiction over the lands for which you are applying.

### § 4300.21 What must I include in my application?

(a) You must include a certification of reindeer allotment to you, signed by the Bureau of Indian Affairs, if you are to receive a herd from the Government. If you obtain reindeer from a source other than the Government, you should state the source and show evidence of purchase or option to purchase.

(b) Your initial application must list the location of and describe the improvements you own in the application area. You must have this statement verified by the Bureau of Indian Affairs before you submit it to BLM.

### § 4300.22 What fees must I pay?

You must pay a \$10 filing fee with each application. No grazing fee will be charged.

### § 4300.23 After I file my application, can I use the land before BLM issues my permit?

No. You cannot use the land until BLM issues you a permit. Generally, BLM will issue a permit within 120 days after receiving an application and will keep you informed if there are delays in meeting that timeframe.

### § 4300.24 Does my filed application mean that no one else can file an application?

No. The filing of your application will not segregate the land. Anyone else may file an application and BLM may dispose of the lands under the public land laws.

## § 4300.25

### **§ 4300.25 Does my filed application mean I will automatically receive a permit?**

No. BLM issues grazing permits at its discretion. Our decisionmaking is based on resource management guidelines developed in land use plans and in consultation with other State and Federal resource management agencies.

#### PROTESTS AGAINST A GRAZING PERMIT APPLICATION

### **§ 4300.30 Can someone else protest my permit application?**

(a) Yes, anyone may file a protest with BLM. The protest does not have to be in a particular format nor on a BLM-approved form but it must:

- (1) Be filed in duplicate with BLM;
- (2) Contain a complete description of all facts upon which it is based;
- (3) Describe the lands involved; and
- (4) Be accompanied by evidence of service of a copy of the protest on the applicant.

(b) If the person protesting also wants a grazing permit for all or part of the land described in the protested application, the protest must be accompanied by a grazing permit application.

#### CONDITIONS OF YOUR APPROVED PERMIT

### **§ 4300.40 How long can I graze reindeer with my permit?**

BLM issues permits for a maximum of 10 years, except when you request a shorter term, or when BLM determines that a shorter period is in the public interest. The issued permit will specify the number of years you can graze reindeer.

### **§ 4300.41 What will the permit say about the number of reindeer and where I can graze them?**

(a) The permit will indicate the maximum number of reindeer you can graze on the permit area based on range conditions. BLM can adjust this number if range conditions change, as for example, by natural causes, overgrazing, or fire.

(b) The permit will restrict grazing to a definitely described area which BLM feels is usable and adequate for your needs.

## 43 CFR Ch. II (10–1–08 Edition)

### **§ 4300.42 If I have existing improvements on the land, will these be allowed in the initial permit?**

Yes, any improvements existing on the land will be allowed.

### **§ 4300.43 What should I do if I want to construct and maintain improvements on the land?**

(a) You should file an application (Form 4120-7) with BLM for a permit to do this. A permit will allow you to construct, maintain, and use any fence, building, corral, reservoir, well or other improvement needed for grazing under the grazing permit; and

(b) You must comply with Alaska state law in the construction and maintenance of fences, but any fence must be constructed to permit ingress and egress of miners, mineral prospectors, and other persons entitled to enter the area for lawful purposes.

### **§ 4300.44 Are there any major restrictions on my grazing permit that I might otherwise think are allowed?**

Yes. You must not:

- (a) Enclose roads, trails and highways as to disturb public travel there;
- (b) Interfere with existing communication lines or other improvements;
- (c) Prevent legal hunting, fishing or trapping on the land;
- (d) Prevent access by persons, such as miners and mineral prospectors, entitled to lawfully enter; or
- (e) Graze reindeer without complying with applicable State and Federal laws on livestock quarantine and sanitation.

### **§ 4300.45 Must I submit any reports?**

Yes. Before April 1 of the second permit year and each year afterwards, you must submit a report in duplicate to BLM which describes your grazing operations during the preceding year. Reports do not have to be on a BLM-approved form nor in a particular format.

#### CHANGES THAT CAN AFFECT YOUR PERMIT

##### *Other Uses of the Land*

### **§ 4300.50 Are there other uses of the land that may affect my permit?**

Yes. The lands described in your grazing permit and the subsurface can be affected by uses that BLM considers

## Bureau of Land Management, Interior

## § 4300.60

more important than grazing. Your permit can be modified or reduced in size or canceled by BLM to allow for:

(a) Protection, development and use of the natural resources, e.g., minerals, timber, and water, under applicable laws and regulations;

(b) Agricultural use;

(c) Applications for and the acquisition of homesites, easements, permits, leases or other rights and uses, or any disposal or withdrawal, under the applicable public land laws; or

(d) Temporary closing of portions of the permitted area to grazing whenever, because of improper handling of reindeer, overgrazing, fire or other cause, BLM judges this necessary to restore the range to its normal condition.

### § 4300.51 Will I be notified if another use, disposal, or withdrawal occurs on the land?

Yes. If there is a settlement, location, entry, disposal, or withdrawal on any lands described in your permit, BLM will notify you and will reduce your permit area by the amount of the area involved.

### § 4300.52 Can other persons use the land in my permit for mineral exploration or production?

Yes. Unless the land is otherwise withdrawn, the land in your permit is subject to lease or leasing under the mineral leasing laws and under the Geothermal Steam Act, and mineral materials disposal under the Materials Act. Also, it can be prospected, located, and purchased under the mining laws and applicable regulations at 43 CFR Group 3800.

#### CHANGES IN THE SIZE OF THE PERMIT AREA

### § 4300.53 Can BLM reduce the size of the land in my permit?

Yes. BLM may reduce it at any time but must notify you at least 30 days before taking this action. BLM can reduce the area when:

(a) BLM determines that the area is too large for the number of reindeer you are grazing; or

(b) When disposal, withdrawal, natural causes, such as drought or fire, or any other reason in § 4300.50 so requires.

### § 4300.54 Can BLM increase the size of the land in my permit?

Yes. BLM may increase the area on its own initiative or by your request if BLM determines that the area is too small for the number of reindeer you are grazing. BLM will give you at least 30 days' notice of this action.

### § 4300.55 What if I don't agree with an adjustment of my permit area?

You must contact BLM within the notice period to show cause why the area should not be adjusted. After the BLM field office manager makes a decision on the adjustment, you have the right to appeal that decision to the Interior Board of Land Appeals (IBLA) under 43 CFR part 4. The IBLA makes the final decision.

#### PERMIT RENEWALS

### § 4300.57 How do I apply for a renewal of my permit?

You must submit an application for renewal, using the same form as the original application, between four and eight months before the permit expires. A \$10 filing fee must accompany the application.

### § 4300.58 Will the renewed permit be exactly the same as the old permit?

At its discretion, BLM may offer you a renewed grazing permit with such terms, conditions, and duration that it determines are in the public interest.

#### ASSIGNING YOUR PERMIT TO ANOTHER PARTY

### § 4300.59 If I want to assign my permit to another party, when must I notify BLM?

You must file a proposed assignment of your permit, in whole or in part, in duplicate with BLM within 90 days of the assignment execution date. No particular format is required. The assignment is effective when BLM approves it.

### § 4300.60 What must be included in my assignment document?

Assignments must contain:

(a) All terms and conditions agreed to by the parties;

## § 4300.61

(b) A showing under §§ 4300.11 and 4300.12 that the assignee is qualified to hold a permit;

(c) A showing under § 4300.21(a) regarding a reindeer allotment; and

(d) The assignee's statement agreeing to be bound by the provisions of the permit.

### § 4300.61 Can I sublease any part of the land in my permit?

No.

#### CLOSING OUT YOUR PERMIT

### § 4300.70 May I relinquish my permit?

Yes. You may relinquish the permit by filing advance written notice with BLM. Your relinquishment will be effective on the date you indicate, as long as it is at least 30 days after the date you file.

### § 4300.71 Under what circumstances can BLM modify, reduce or cancel my permit?

(a) BLM may cancel the permit if:

(1) BLM issued it improperly through error as to a material fact;

(2) You fail to comply with any of the provisions of the permit or the regulations of this part; or

(3) Disposal, withdrawal, natural causes, such as drought or fire, or any other reason in § 4300.50 so requires.

(b) BLM will not cancel the permit for failure to comply until BLM has notified you in writing of the nature of your noncompliance, and you have been given at least 30 days to show why BLM should not cancel your permit.

(c) BLM may modify or reduce a permit in accordance with § 4300.50.

### § 4300.72 May I remove my personal property or improvements when the permit expires or terminates?

(a) Yes. Within 90 days of the expiration or termination of the grazing permit, or within any extension period, you may remove all your personal property and any removable range improvements you own, such as fences, corrals, and buildings.

(b) Property that is not removed within the time allowed will become property of the United States.

## 43 CFR Ch. II (10–1–08 Edition)

#### REINDEER CROSSING PERMITS

### § 4300.80 How can I get a permit to cross reindeer over public lands?

(a) BLM may issue a crossing permit free of charge when you file an application with BLM at least 30 days before the crossing is to begin. Lands crossed may include lands under a grazing permit.

(b) The application does not have to be on a BLM-approved form nor in a particular format, but it must show:

(1) The number of reindeer to be driven;

(2) The start date;

(3) The approximate period of time required for the crossing; and

(4) The land to be crossed.

(c) You must comply with applicable State and Federal laws on livestock quarantine and sanitation when crossing reindeer on public land.

#### TRESPASS

### § 4300.90 What is a trespass?

(a) A trespass is any use of Federal land for reindeer grazing purposes without a valid permit issued under the regulations of this part; a trespass is unlawful and is prohibited.

(b) Any person who willfully violates the regulations in this part will be deemed guilty of a misdemeanor, and upon conviction is punishable by imprisonment for not more than one year, or by a fine of not more than \$500.

## Group 4600—Leases

### PART 4600—LEASES OF GRAZING LAND—PIERCE ACT

- 4610.3 Payment of rental.
- 4610.4 Fees.
- 4610.4-1 Computation of fees.
- 4610.4-2 Disposition of receipts.
- 4610.4-3 Allocation of funds appropriated.
- 4610.5 Improvements by the United States on leased lands.

AUTHORITY: 48 Stat. 1270; 43 U.S.C. 315a.

SOURCE: 35 FR 9546, June 13, 1970, unless otherwise noted. Redesignated at 61 FR 29031, June 7, 1996.

### Subpart 4600—General

#### § 4600.0-2 Objectives.

When it is determined by the authorized officer that any State, county, or privately owned lands located within grazing districts are chiefly valuable for grazing, and are necessary to promote the orderly use, improvement, and development of grazing districts, steps should be taken to secure offers of leases of such lands from the owners thereof.

#### § 4600.0-3 Authority.

(a) *The Act of June 23, 1938.* The Act of June 23, 1938 (52 Stat. 1033; 43 U.S.C. 315m-1, 315m-4 inclusive), known as the Pierce Act, authorizes the Secretary of the Interior in his discretion to lease, at rates to be determined by him, any State, county, or privately owned lands chiefly valuable for grazing purposes and lying within the exterior boundaries of grazing districts created under the Taylor Grazing Act of June 28, 1934 (48 Stat. 1269, as amended; 43 U.S.C. 315 *et seq.*) when in his judgment, the leasing of such lands will promote the orderly use of the district and aid in conserving the forage resources of the public lands therein, and the authorized officer of the Bureau of Land Management may approve leases under the Pierce Act on behalf of the United States in accordance with this part. Leases so approved need not be submitted for Secretarial approval.

### Subpart 4610—Procedures

#### § 4610.1 Evidence of ownership.

Parties offering to lease lands to the United States under the provisions of this Act will be required to furnish evidence of ownership as follows:

#### § 4610.1-1 Certificate of ownership for State or county lands.

Where State and county lands are offered for lease, a certificate from the proper State or county official will be required showing that title to the lands is in the State or county and that the officer or agency of the State or county offering them for lease is empowered by the laws of such State to lease such lands.

#### § 4610.1-2 Certificate of ownership for private lands.

Where privately owned lands are offered for lease, the party offering them will be required to file with the local office of the Bureau of Land Management certificates from either the proper county officials, a licensed abstractor, or an administrative officer of the Bureau of Land Management whichever is required by an authorized officer, certifying that the records of the county in which the lands are situated show that the party offering the lands for lease is the record owner thereof or in legal control of such lands under appropriate recorded lease permitting the subleasing of the property, and including an itemized statement showing the nature and extent of any liens, tax assessments, mortgages, or other encumbrances.

#### § 4610.2 Leases.

##### § 4610.2-1 Form of lease.

Leases under the Pierce Act should conform in general to a form approved by the Director. This form is believed adaptable for use in all of the States within which grazing districts have been established under the Taylor Grazing Act. Leases under the Pierce Act must be executed by the lessor in the manner prescribed by the laws of the State within which the lands leased are situated.

##### § 4610.2-2 Period of lease.

Leases may be made for such periods as are deemed proper by an authorized officer in promoting a proper land-use program in connection with the public range, not to exceed, however, the 10-year period as limited by the Pierce Act, beginning with the date of the approval of such lease.

## **§ 4610.2-3**

### **§ 4610.2-3 Approval of lease; renewal.**

Local negotiations for leasing of lands under this act will not be effective until the lease and any renewal thereof has been approved by an authorized officer of the Bureau of Land Management. Upon such approval the lease should be recorded in the land records of the county in which the land is situated.

### **§ 4610.3 Payment of rental.**

The carrying capacity of the lands will be taken into consideration in negotiating the rental to be paid. Payment of rentals will be made annually by the United States at the end of the period for which licenses or permits to graze on the lands involved have been granted, or as soon thereafter as the moneys collected by the United States from its licensees or permittees for the use of such lands have been appropriated by the Congress in accordance with the provisions of the Pierce Act, and made available for such purpose, or moneys for the payment of such rentals have been made available through contributions under section 9 of the Taylor Grazing Act (48 Stat. 1273; 43 U.S.C. 315h).

### **§ 4610.4 Fees.**

#### **§ 4610.4-1 Computation of fees.**

The aggregate of the grazing fees collected for the use of the lands leased under the provisions of the Pierce Act must be sufficient to insure a return to the United States of an amount equal to the aggregate of the rentals paid for such lands and the aggregate of the grazing fees collected for the use of all the lands leased in any one State must be at least equal to the aggregate of the rentals paid in that State.

#### **§ 4610.4-2 Disposition of receipts.**

All moneys received in the administration of lands leased under the Pierce Act will be deposited in the Treasury of the United States as provided in section 4 of that Act and will be available when appropriated by the Congress for the leasing of lands. Distribution of such receipts, therefore, will not be made as provided in sections 10 and 11 of the Taylor Grazing Act (48 Stat. 1273; 43 U.S.C. 315i, 315j).

## **43 CFR Ch. II (10-1-08 Edition)**

### **§ 4610.4-3 Allocation of funds appropriated.**

Moneys received in the administration of lands leased under the Pierce Act, when appropriated by the Congress, will be allocated to the budgets of the State Director for disbursement in accordance with that Act and the regulations in this part. Records of disbursements thereof will be maintained under existing procedure.

### **§ 4610.5 Improvements by the United States on leased lands.**

The procedure in placing improvements on any lands leased under the Pierce Act, will, so far as practicable, be the same as provided under subpart 4120 of subchapter D.

[35 FR 9546, June 13, 1970. Redesignated and amended at 61 FR 29031, June 7, 1996]

## **Group 4700—Wild Free-Roaming Horse and Burro Management**

NOTE: The information collection requirements contained in Group 4700 have been approved by the Office of Management and Budget and assigned clearance number 1004-0042. The information is being collected to permit the authorized officer to remove wild horses and burros from private land and to determine whether an application for adoption of and title to wild horses or burros should be granted. Responses are required to obtain benefits.

Public reporting burden for this information is estimated to average 0.165 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Information Collection Clearance Officer, Division of Information Resources Management, Bureau of Land Management (770), 1849 C Street NW., Washington, DC 20240, and the Office of Management and Budget, Paperwork Reduction Project 1004-0042, Washington, DC 20503.

AUTHORITY: 16 U.S.C. 1331-1340; 18 U.S.C. 47; 43 U.S.C. 315 and 1740.

SOURCE: 51 FR 7414, Mar. 3, 1986, unless otherwise noted.

**Subpart 4700—General**

**§ 4700.0-1 Purpose.**

The purpose of these regulations is to implement the laws relating to the protection, management, and control of wild horses and burros under the administration of the Bureau of Land Management.

**§ 4700.0-2 Objectives.**

The objectives of these regulations are management of wild horses and burros as an integral part of the natural system of the public lands under the principle of multiple use; protection of wild horses and burros from unauthorized capture, branding, harassment or death; and humane care and treatment of wild horses and burros.

**§ 4700.0-3 Authority.**

The Act of September 8, 1959 (18 U.S.C. 47); the Act of December 15, 1971, as amended (16 U.S.C. 1331-1340); the Federal Land Policy and Management

## § 4700.0-5

Act of 1976 (43 U.S.C. 1711, 1712, and 1734); the Act of June 28, 1934, as amended (43 U.S.C. 315); and the National Environmental Policy Act of 1969 (42 U.S.C. 4321, 4331-4335, and 4341-4347).

### § 4700.0-5 Definitions.

As used in this part, the term:

(a) *Act* means the Act of December 15, 1971, as amended (16 U.S.C. 1331-1340), commonly referred to as the Wild Free-Roaming Horse and Burro Act.

(b) *Authorized officer* means any employee of the Bureau of Land Management to whom has been delegated the authority to perform the duties described herein.

(c) *Commercial exploitation* means using a wild horse or burro because of its characteristics of wildness for direct or indirect financial gain. Characteristics of wildness include the rebellious and feisty nature of such animals and their defiance of man as exhibited in their undomesticated and untamed state. Use as saddle or pack stock and other uses that require domestication of the animal are not commercial exploitation of the animals because of their characteristics of wildness.

(d) *Herd area* means the geographic area identified as having been used by a herd as its habitat in 1971.

(e) *Humane treatment* means handling compatible with animal husbandry practices accepted in the veterinary community, without causing unnecessary stress or suffering to a wild horse or burro.

(f) *Inhumane treatment* means any intentional or negligent action or failure to act that causes stress, injury, or undue suffering to a wild horse or burro and is not compatible with animal husbandry practices accepted in the veterinary community.

(g) *Lame wild horse or burro* means a wild horse or burro with one or more malfunctioning limbs that permanently impair its freedom of movement.

(h) *Old wild horse or burro* means a wild horse or burro characterized because of age by its physical deterioration and inability to fend for itself, suffering, or closeness to death.

(i) *Private maintenance* means the provision of proper care and humane treat-

## 43 CFR Ch. II (10-1-08 Edition)

ment to excess wild horses and burros by qualified individuals under the terms and conditions specified in a Private Maintenance and Care Agreement.

(j) *Public lands* means any lands or interests in lands administered by the Secretary of the Interior through the Bureau of Land Management.

(k) *Sick wild horse or burro* means a wild horse or burro with failing health, infirmity or disease from which there is little chance of recovery.

(l) *Wild horses and burros* means all unbranded and unclaimed horses and burros that use public lands as all or part of their habitat, that have been removed from these lands by the authorized officer, or that have been born of wild horses or burros in authorized BLM facilities, but have not lost their status under section 3 of the Act. Foals born to a wild horse or burro after approval of a Private Maintenance and Care Agreement are not wild horses or burros. Such foals are the property of the adopter of the parent mare or jenny. Where it appears in this part the term *wild horses and burros* is deemed to include the term *free-roaming*.

[51 FR 7414, Mar. 3, 1986, as amended at 59 FR 28275, June 1, 1994]

### § 4700.0-6 Policy.

(a) Wild horses and burros shall be managed as self-sustaining populations of healthy animals in balance with other uses and the productive capacity of their habitat.

(b) Wild horses and burros shall be considered comparably with other resource values in the formulation of land use plans.

(c) Management activities affecting wild horses and burros shall be undertaken with the goal of maintaining free-roaming behavior.

(d) In administering these regulations, the authorized officer shall consult with Federal and State wildlife agencies and all other affected interests, to involve them in planning for and management of wild horses and burros on the public lands.

(e) Healthy excess wild horses and burros for which an adoption demand by qualified individuals exists shall be made available at adoption centers for private maintenance and care.

## Bureau of Land Management, Interior

## § 4710.5

(f) Fees shall normally be required from qualified individuals adopting excess wild horses and burros to defray part of the costs of the adoption program.

### § 4700.0-9 Collections of information.

(a) The collections of information contained in this part have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and assigned clearance number 1004-0042. The information will be used to permit the authorized officer to remove wild horses and burros from private lands and to determine whether an application for adoption of and title to wild horses or burros should be granted. Response is required to obtain benefits under 16 U.S.C. 1333 and 1334.

(b) Public reporting burden for this information is estimated to average 0.1652 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Information Collection Clearance Officer (783), Bureau of Land Management, Washington, DC 20240, and the Office of Management and Budget, Paperwork Reduction Project, 1004-0042, Washington, DC 20503.

[57 FR 29654, July 6, 1992]

## Subpart 4710—Management Considerations

### § 4710.1 Land use planning.

Management activities affecting wild horses and burros, including the establishment of herd management areas, shall be in accordance with approved land use plans prepared pursuant to part 1600 of this title.

### § 4710.2 Inventory and monitoring.

The authorized officer shall maintain a record of the herd areas that existed in 1971, and a current inventory of the numbers of animals and their areas of use. When herd management areas are established, the authorized officer shall

also inventory and monitor herd and habitat characteristics.

### § 4710.3 Management areas.

#### § 4710.3-1 Herd management areas.

Herd management areas shall be established for the maintenance of wild horse and burro herds. In delineating each herd management area, the authorized officer shall consider the appropriate management level for the herd, the habitat requirements of the animals, the relationships with other uses of the public and adjacent private lands, and the constraints contained in § 4710.4. The authorized officer shall prepare a herd management area plan, which may cover one or more herd management areas.

#### § 4710.3-2 Wild horse and burro ranges.

Herd management areas may also be designated as wild horse or burro ranges to be managed principally, but not necessarily exclusively, for wild horse or burro herds.

### § 4710.4 Constraints on management.

Management of wild horses and burros shall be undertaken with the objective of limiting the animals' distribution to herd areas. Management shall be at the minimum level necessary to attain the objectives identified in approved land use plans and herd management area plans.

### § 4710.5 Closure to livestock grazing.

(a) If necessary to provide habitat for wild horses or burros, to implement herd management actions, or to protect wild horses or burros, to implement herd management actions, or to protect wild horses or burros from disease, harassment or injury, the authorized officer may close appropriate areas of the public lands to grazing use by all or a particular kind of livestock.

(b) All public lands inhabited by wild horses or burros shall be closed to grazing under permit or lease by domestic horses and burros.

(c) Closure may be temporary or permanent. After appropriate public consultation, a Notice of Closure shall be issued to affected and interested parties.

## **§ 4710.6**

### **§ 4710.6 Removal of unauthorized livestock in or near areas occupied by wild horses or burros.**

The authorized officer may establish conditions for the removal of unauthorized livestock from public lands adjacent to or within areas occupied by wild horses or burros to prevent undue harassment of the wild horses or burros. Liability and compensation for damages from unauthorized use shall be determined in accordance with subpart 4150 of this title.

### **§ 4710.7 Maintenance of wild horses and burros on privately controlled lands.**

Individuals controlling lands within areas occupied by wild horses and burros may allow wild horses or burros to use these lands. Individuals who maintain wild free-roaming horses and burros on their land shall notify the authorized officer and shall supply a reasonable estimate of the number of such animals so maintained. Individuals shall not remove or entice wild horses or burros from the public lands.

## **Subpart 4720—Removal**

### **§ 4720.1 Removal of excess animals from public lands.**

Upon examination of current information and a determination by the authorized officer that an excess of wild horses or burros exists, the authorized officer shall remove the excess animals immediately in the following order.

(a) Old, sick, or lame animals shall be destroyed in accordance with subpart 4730 of this title;

(b) Additional excess animals for which an adoption demand by qualified individuals exists shall be humanely captured and made available for private maintenance in accordance with subpart 4750 of this title; and

(c) Remaining excess animals for which no adoption demand by qualified individuals exists shall be destroyed in accordance with subpart 4730 of this title.

## **43 CFR Ch. II (10–1–08 Edition)**

### **§ 4720.2 Removal of strayed or excess animals from private lands.**

#### **§ 4720.2–1 Removal of strayed animals from private lands.**

Upon written request from the private landowner to any representative of the Bureau of Land Management, the authorized officer shall remove stray wild horses and burros from private lands as soon as practicable. The private landowner may also submit the written request to a Federal marshal, who shall notify the authorized officer. The request shall indicate the numbers of wild horses or burros, the date(s) the animals were on the land, legal description of the private land, and any special conditions that should be considered in the gathering plan.

#### **§ 4720.2–2 Removal of excess animals from private lands.**

If the authorized officer determines that proper management requires the removal of wild horses and burros from areas that include private lands, the authorized officer shall obtain the written consent of the private owner before entering such lands. Flying aircraft over lands does not constitute entry.

## **Subpart 4730—Destruction of Wild Horses or Burros and Disposal of Remains**

### **§ 4730.1 Destruction.**

Except as an act of mercy, no wild horse or burro shall be destroyed without the authorization of the authorized officer. Old, sick, or lame animals shall be destroyed in the most humane manner possible. Excess animals for which adoption demand does not exist shall be destroyed in the most humane and cost efficient manner possible.

### **§ 4730.2 Disposal of remains.**

Remains of wild horses or burros that die after capture shall be disposed of in accordance with State or local sanitation laws. No compensation of any kind shall be received by any agency or individual disposing of remains. The products of rendering are not considered remains.

**Bureau of Land Management, Interior**

**§ 4750.2-2**

**Subpart 4740—Motor Vehicles  
and Aircraft**

**§ 4740.1 Use of motor vehicles or aircraft.**

(a) Motor vehicles and aircraft may be used by the authorized officer in all phases of the administration of the Act, except that no motor vehicle or aircraft, other than helicopters, shall be used for the purpose of herding or chasing wild horses or burros for capture or destruction. All such use shall be conducted in a humane manner.

(b) Before using helicopters or motor vehicles in the management of wild horses or burros, the authorized officer shall conduct a public hearing in the area where such use is to be made.

**§ 4740.2 Standards for vehicles used for transport of wild horses and burros.**

(a) Use of motor vehicles for transport of wild horses or burros shall be in accordance with appropriate local, State and Federal laws and regulations applicable to the humane transportation of horses and burros, and shall include, but not be limited to, the following standards:

(1) The interior of enclosures shall be free from protrusion that could injure animals;

(2) Equipment shall be in safe conditions and of sufficient strength to withstand the rigors of transportation;

(3) Enclosures shall have ample head room to allow animals to stand normally;

(4) Enclosures for transporting two or more animals shall have partitions to separate them by age and sex as deemed necessary by the authorized officer;

(5) Floors of enclosures shall be covered with nonskid material;

(6) Enclosures shall be adequately ventilated and offer sufficient protection to animals from inclement weather and temperature extremes; and

(7) Unless otherwise approved by the authorized officer, transportation shall be limited in sequence to a maximum of 24 hours followed by a minimum of 5 hours of on-the-ground rest with adequate feed and water.

(b) The authorized officer shall not load wild horses or burros if he/she de-

termines that the vehicle to be used for transporting the wild horses or burros is not satisfactory for that purpose.

**Subpart 4750—Private  
Maintenance**

**§ 4750.1 Private maintenance.**

The authorized officer shall make available for private maintenance all healthy excess wild horses or burros for which an adoption demand by qualified individuals exists.

**§ 4750.2 Health, identification, and inspection requirements.**

**§ 4750.2-1 Health and identification requirements.**

(a) An individual determined to be qualified by the authorized officer shall verify each excess animal's soundness and good health, determine its age and sex, and administer immunizations, worming compounds, and tests for communicable diseases.

(b) Documentation conforming compliance with State health inspection and immunization requirements for each wild horse or burro shall be provided to each adopter by the authorized officer.

(c) Each animal offered for private maintenance, including orphan and unweaned foals, shall be individually identified by the authorized officer with a permanent freeze mark of alpha numeric symbols on the left side of its neck. The freeze mark identifies the animal as Federal property subject to the provisions of the Act and these regulations by a patented symbol, the animal's year of birth, and its individual identification number. The authorized officer shall record the freeze mark on the documentation of health and immunizations. For purposes of this subpart, a freeze mark applied by the authorized officer is not considered a brand.

**§ 4750.2-2 Brand inspection.**

The authorized officer shall make arrangements on behalf of an adopter for State inspection of brands, where applicable, of each animal to be transported across the State where the adoption center is located. The adopter

### § 4750.3

shall be responsible for obtaining inspections for brands required by other States to or through which the animal may be transported.

#### **§ 4750.3 Application requirements for private maintenance.**

##### **§ 4750.3-1 Application for private maintenance of wild horses and burros.**

An individual applying for a wild horse or burro shall file an application with the Bureau of Land Management on a form approved by the Director.

##### **§ 4750.3-2 Qualification standards for private maintenance.**

(a) To qualify to receive a wild horse or burro for private maintenance, an individual shall:

- (1) Be 18 years of age or older;
- (2) Have no prior conviction for inhumane treatment of animals or for violation of the Act or these regulations;
- (3) Have adequate feed, water, and facilities to provide humane care to the number of animals requested. Facilities shall be in safe condition and of sufficient strength and design to contain the animals. The following standards apply:
  - (i) A minimum space of 144 square feet shall be provided for each animal maintained, if exercised daily; otherwise, a minimum of 400 square feet shall be provided for each animal;
  - (ii) Until fence broken, adult horses shall be maintained in an enclosure at least 6 feet high; burros in an enclosure at least 4½ feet high; and horses less than 18 months old in an enclosure at least 5 feet high. Materials shall be protrusion-free and shall not include large-mesh woven or barbed wire;
  - (iii) Shelter shall be available to mitigate the effects of inclement weather and temperature extremes. The authorized officer may require that the shelter be a structure, which shall be well-drained and adequately ventilated;
  - (iv) Feed and water shall be adequate to meet the nutritional requirements of the animals, based on their age, physiological condition and level of activity; and
- (4) Have obtained no more than 4 wild horses and burros within the preceding 12-month period, unless specifically au-

### 43 CFR Ch. II (10-1-08 Edition)

thorized in writing by the authorized officer.

(b) The authorized officer shall determine an individual's qualifications based upon information provided in the application form required by § 4750.3-1 of this subpart and Bureau of Land Management records of any previous private maintenance by the individual under the Act.

##### **§ 4750.3-3 Supporting information and certification for private maintenance of more than 4 wild horses or burros.**

(a) An individual applying to adopt more than 4 wild horses or burros within a 12-month period, or an individual or group of individuals requesting to maintain more than 4 wild horses or burros at a single location shall provide a written report prepared by the authorized officer, or by a local humane official, veterinarian, cooperative extension agent, or similarly qualified person approved by the authorized officer, verifying that the applicant's facilities have been inspected, appear adequate to care for the number of animals requested, and satisfy the requirements contained in § 4750.3-2(a).

(1) The report shall include a description of the facilities, including corral sizes, pasture size, and shelter, barn, or stall dimensions, and shall note any discrepancies between the facilities inspected and representations made in the application form.

(2) When an applicant requests 25 or more animals or when 25 or more animals will be maintained at any single location regardless of the number of applicants, the facilities for maintaining the adopted animals shall be inspected by the authorized officer prior to approving the application.

(b) The Bureau of Land Management will not allow the use of a power of attorney or any other instrument or writing authorizing one person to act as an agent for another in the adoption of wild horses and burros.

[51 FR 7414, Mar. 3, 1986, as amended at 55 FR 39152, Sept. 25, 1990; 63 FR 18340, Apr. 15, 1998]

## Bureau of Land Management, Interior

## § 4750.4-3

### § 4750.3-4 Approval or disapproval of applications.

If an application is approved, the authorized officer shall offer the individual an opportunity to select the appropriate number, sex, age and species of animals from those available. If the authorized officer disapproves an application for private maintenance because the applicant lacks adequate facilities or transport, the individual may correct the shortcoming and file a new application.

### § 4750.4 Private maintenance of wild horses and burros.

#### § 4750.4-1 Private Maintenance and Care Agreement.

To obtain a wild horse or burro, a qualified applicant shall execute a Private Maintenance and Care Agreement and agree to abide by its terms and conditions, including but not limited to the following:

(a) Title to wild horses and burros covered by the agreement shall remain in the Federal Government for at least 1 year after the Private Maintenance and Care Agreement is executed and until a Certificate of Title is issued by the authorized officer;

(b) Wild horses and burros covered by the agreement shall not be transferred for more than 30 days to another location or to the care of another individual without the prior approval of the authorized officer;

(c) Wild horses and burros covered by the agreement shall be made available for physical inspection within 7 days of receipt of a written request by the authorized officer;

(d) The authorized officer shall be notified within 7 days of discovery of the death, theft or escape of wild horses and burros covered by the agreement;

(e) Adopters are financially responsible for the proper care and treatment of all wild horses and burros covered by the agreement;

(f) Adopters are responsible, as provided by State law, for any personal injury, property damage, or death caused by animals in their care; for pursuing animals that escape or stray; and for costs of recapture.

(g) Adopters shall notify the authorized officer within 30 days of any change in the adopter's address; and

(h) Adopters shall dispose of remains in accordance with applicable sanitation laws.

#### § 4750.4-2 Adoption fee.

(a) Does BLM charge an adoption fee for wild horses and burros?

You must pay an adoption fee for each wild horse or burro you adopt. Usually BLM will charge you a \$125 base fee. BLM will not charge you an adoption fee for orphan foals.

(b) Can BLM increase the adoption fee?

Yes, BLM may increase the adoption fee. BLM may hold competitive adoption events for wild horses or burros. At competitive adoptions, qualified adopters set adoption fees through competitive bidding. For these adoptions, the fee is the highest bid received over the base fee of \$125. Horses or burros remaining at the end of a competitive adoption event will be available for adoption at the established adoption fee.

(c) May BLM reduce or waive the adoption fee?

(1) The BLM Director may reduce or waive the fee when wild horses or burros are un-adoptable at the base adoption fee.

(2) A reduction or waiver of the adoption fee is available only if you are willing to comply with all regulations relating to wild horses and burros.

[62 FR 5339, Feb. 5, 1997]

### § 4750.4-3 Request to terminate Private Maintenance and Care Agreement.

An adopter may request to terminate his/her responsibility for an adopted animal by submitting a written relinquishment of the Private Maintenance and Care Agreement for that animal. The authorized officer shall arrange to transfer the animal to another qualified applicant or take possession of the animal at a location specified by the authorized officer within 30 days of receipt of the written request for relinquishment.

**§ 4750.4-4 Replacement animals.**

The authorized officer shall replace an animal, upon request by the adopter, if (a) within 6 months of the execution of the Private Maintenance and Care Agreement the animal dies or is required to be destroyed due to a condition that existed at the time of placement with the adopter; and (b) the adopter provides, within a reasonable time, a statement by a veterinarian certifying that reasonable care and treatment would not have corrected the condition. Transportation of the replacement animal shall be the responsibility of the adopter.

**§ 4750.5 Application for title to wild horses and burros.**

(a) The adopter shall apply for title, using a form designated by the Director, upon signing the Private Maintenance and Care Agreement.

(b) The authorized officer shall issue a Certificate of Title after 12 months, if the adopter has complied with the terms and conditions of the agreement and the authorized officer determines, based either on a field inspection or a statement provided by the adopter from a veterinarian, extension agent, local humane official, or other individual acceptable to the authorized officer, that the animal or animals covered by the Agreement have received proper care and humane treatment.

(c) An adopter may not obtain title to more than 4 animals per 12-month period of private maintenance. Effective the date of issuance of the Certificate of Title, Federal ownership of the wild horse or burro ceases and the animal loses its status as a wild horse or burro and is no longer under the protection of the Act or regulations under this title.

**Subpart 4760—Compliance**

**§ 4760.1 Compliance with the Private Maintenance and Care Agreement.**

(a) An adopter shall comply with the terms and conditions of the Private Maintenance and Care Agreement and these regulations. The authorized officer may verify compliance by visits to an adopter, physical inspections of the animals, and inspections of the facilities and conditions in which the ani-

mals are being maintained. The authorized officer may authorize a cooperative extension agent, local humane official or similarly qualified individual to verify compliance.

(b) The authorized officer shall verify compliance with the terms of the Private Maintenance and Care Agreement when an adopter has received 25 or more animals or when 25 or more animals are maintained at a single location.

(c) The authorized officer shall conduct an investigation when a complaint concerning the care, treatment, or use of a wild horse or burro is received by the Bureau of Land Management.

(d) The authorized officer may require, as a condition for continuation of a Private Maintenance and Care Agreement, that an adopter take specific corrective actions if the authorized officer determines that an animal is not receiving proper care or is being maintained in unsatisfactory conditions. The adopter shall be given reasonable time to complete the required corrective actions.

**Subpart 4770—Prohibited Acts, Administrative Remedies, and Penalties**

**§ 4770.1 Prohibited acts.**

The following acts are prohibited:

(a) Maliciously or negligently injuring or harassing a wild horse or burro;

(b) Removing or attempting to remove a wild horse or burro from the public lands without authorization from the authorized officer;

(c) Destroying a wild horse or burro without authorization from the authorized officer except as an act of mercy;

(d) Selling or attempting to sell, directly or indirectly, a wild horse or burro or its remains;

(e) Commercially exploiting a wild horse or burro;

(f) Treating a wild horse or burro inhumanely;

(g) Violating a term or condition of the Private Maintenance and Care Agreement;

(h) Branding a wild horse or burro;

(i) Removing or altering a freeze mark on a wild horse or burro;

## Bureau of Land Management, Interior

## § 4770.5

(j) Violating an order, term, or condition established by the authorized officer under this part.

### § 4770.2 Civil penalties.

(a) A permittee or lessee who has been convicted of any of the prohibited acts found in § 4770.1 of this title may be subject to suspension or cancellation of the permit or lease.

(b) An adopter's failure to comply with the terms and conditions of the Private Maintenance and Care Agreement may result in the cancellation of the agreement, repossession of wild horses and burros included in the agreement and disapproval of requests by the adopted for additional excess wild horses and burros.

### § 4770.3 Administrative remedies.

(a) Any person who is adversely affected by a decision of the authorized officer in the administration of these regulations may file an appeal. Appeals and petitions for stay of a decision of the authorized officer must be filed within 30 days of receipt of the decision in accordance with 43 CFR part 4.

(b) Notwithstanding the provisions of paragraph (a) of § 4.21 of this title, the authorized officer may provide that decisions to cancel a Private Maintenance and Care Agreement shall be effective upon issuance or on a date established in the decision so as to allow repossession of wild horses or burros from adopters to protect the animals' welfare.

(c) Notwithstanding the provisions of paragraph (a) of § 4.21 of this title, the authorized officer may provide that de-

cisions to remove wild horses or burros from public or private lands in situations where removal is required by applicable law or is necessary to preserve or maintain a thriving ecological balance and multiple use relationship shall be effective upon issuance or on a date established in the decision.

[59 FR 7643, Feb. 16, 1994]

### § 4770.4 Arrest.

The Director of the Bureau of Land Management may authorize an employee who witnesses a violation of the Act or these regulations to arrest without warrant any person committing the violation, and to take the person immediately for examination or trial before an officer or court of competent jurisdiction. Any employee so authorized shall have power to execute any warrant or other process issued by an officer or court of competent jurisdiction to enforce the provisions of the Act or these regulations.

### § 4770.5 Criminal penalties.

Any person who commits any act prohibited in § 4770.1 of these regulations shall be subject to a fine of not more than \$2,000 or imprisonment for not more than 1 year, or both, for each violation. Any person so charged with such violation by the authorized officer may be tried and sentenced by a United States Commissioner or magistrate, designated for that purpose by the court by which he/she was appointed, in the same manner and subject to the same conditions as provided in 18 U.S.C. 3401.

## SUBCHAPTER E—FOREST MANAGEMENT (5000)

### Group 5000—Forest Management General

#### PART 5000—ADMINISTRATION OF FOREST MANAGEMENT DECISIONS

##### Subpart 5003—Administrative Remedies

Sec.

5003.1 Effect of decisions; general.

5003.2 Notice of forest management decisions.

5003.3 Protests.

SOURCE: 49 FR 28561, July 13, 1984, unless otherwise noted.

##### Subpart 5003—Administrative Remedies

###### § 5003.1 Effect of decisions; general.

(a) Filing a notice of appeal under part 4 of this title does not automatically suspend the effect of a decision governing or relating to forest management as described under sections 5003.2 and 5003.3.

(b) Notwithstanding the provisions of 43 CFR 4.21(a)(1), when BLM determines that vegetation, soil, or other resources on the public lands are at substantial risk of wildfire due to drought, fuels buildup, or other reasons, or at immediate risk of erosion or other damage due to wildfire, BLM may make a wildfire management decision made under this part and parts 5400 through 5510 of this chapter effective immediately or on a date established in the decision. Wildfire management includes but is not limited to:

(1) Fuel reduction or fuel treatment such as prescribed burns and mechanical, chemical, and biological thinning methods (with or without removal of thinned materials); and

(2) Projects to stabilize and rehabilitate lands affected by wildfire.

(c) The Interior Board of Land Appeals will issue a decision on the merits of an appeal of a wildfire management decision under paragraph (b) of this section within the time limits prescribed in 43 CFR 4.416.

[68 FR 33804, June 5, 2003]

###### § 5003.2 Notice of forest management decisions.

(a) The authorized officer shall, when the public interest requires, specify when a decision governing or relating to forest management shall be implemented through the publication of a notice of decision in a newspaper of general circulation in the area where the lands affected by the decision are located, establishing the effective date of the decision. The notice in the newspaper shall reference 43 CFR subpart 5003—Administrative remedies.

(b) When a decision is made to conduct an advertised timber sale, the notice of such sale shall constitute the decision document.

(c) For all decisions relating to forest management except advertised timber sales, the notice and decision document shall contain a concise statement of the circumstances requiring the action.

(43 U.S.C. 1181(a); 30 U.S.C. 601 *et seq.*; 43 U.S.C. 1701)

[49 FR 28561, July 13, 1984]

###### § 5003.3 Protests.

(a) Protests of a forest management decision, including advertised timber sales, may be made within 15 days of the publication of a notice of decision or notice of sale in a newspaper of general circulation.

(b) Protests shall be filed with the authorized officer and shall contain a written statement of reasons for protesting the decision.

(c) Protests received more than 15 days after the publication of the notice of decision or the notice of sale are not timely filed and shall not be considered.

(d) Upon timely filing of a protest, the authorized officer shall reconsider the decision to be implemented in light of the statement of reasons for the protest and other pertinent information available to him/her.

(e) The authorized officer shall, at the conclusion of his/her review, serve his/her decision in writing on the protesting party.

(f) Upon denial of a protest filed under paragraph (a) of this section the

## Bureau of Land Management, Interior

## § 5040.5

authorized officer may proceed with implementation of the decision.

(43 U.S.C. 1181(a); 30 U.S.C. 601 *et seq.*; 43 U.S.C. 1701)

[49 FR 28561, July 13, 1984]

### PART 5040—SUSTAINED-YIELD FOREST UNITS

Sec.

5040.1 Under what authority does BLM establish sustained-yield forest units?

5040.2 What will BLM do before it establishes sustained-yield forest units?

5040.3 How does BLM establish sustained-yield forest units?

5040.4 What is the effect of designating sustained-yield forest units?

5040.5 How does BLM determine and declare the annual productive capacity?

AUTHORITY: 43 U.S.C. 1181e; 43 U.S.C. 1740.

SOURCE: 63 FR 13132, Mar. 18, 1998, unless otherwise noted.

#### § 5040.1 Under what authority does BLM establish sustained-yield forest units?

BLM is authorized, under the O. and C. Lands Act (43 U.S.C. 1181a *et seq.*) and the Federal Land Policy and Management Act, to divide the lands it manages in western Oregon into sustained-yield forest units. These lands are hereafter referred to as "the O. and C. lands." BLM establishes units that contain enough forest land to provide, insofar as practicable, a permanent source of raw materials to support local communities and industries, giving due consideration to established forest products operations.

#### § 5040.2 What will BLM do before it establishes sustained-yield forest units?

Before BLM designates sustained-yield forest units, it will:

(a) Hold a public hearing in the area where it proposes to designate the units. BLM will provide notice, approved by the BLM Director, to the public of any hearing concerning sustained-yield forest units. This notice must be published once a week for four consecutive weeks in a newspaper of general circulation in the county or counties in which the forest units are situated. BLM may also publish the notice in a trade publication; and

(b) Forward the minutes or meeting records to the BLM Director, along with an appropriate recommendation concerning the establishment of the units.

#### § 5040.3 How does BLM establish sustained-yield forest units?

After a public hearing, BLM will publish a notice in a newspaper of general circulation in the county or counties affected by the proposed units, stating whether or not the BLM Director has decided to establish the units. If the BLM Director determines that the units should be established, BLM will include in its notice information on the geographical description of the sustained-yield forest units, how the public may review the BLM document that will establish the units, and the date the units will become effective. BLM will publish the notice before the units are established.

#### § 5040.4 What is the effect of designating sustained-yield units?

Designating new sustained-yield forest units abolishes previous O. and C. master unit or sustained-yield forest unit designations. Until new sustained-yield forest units are designated for the first time in accordance with 43 CFR part 5040, the current master unit designations will continue to be in effect.

#### § 5040.5 How does BLM determine and declare the annual productive capacity?

(a) If BLM has not established sustained-yield forest units under part 5040, then BLM will determine and declare the annual productive capacity by applying the sustained-yield principle to the O. and C. lands, treating them as a single unit.

(b) If BLM has established sustained-yield forest units under part 5040, then BLM will determine and declare the annual productive capacity by applying the sustained-yield principle to each separate forest unit.

(c) If it occurs that BLM has established sustained-yield forest units for less than all of the O. and C. lands, then BLM will determine and declare the annual productive capacity as follows:

(1) BLM will treat sustained-yield forest units as in paragraph (b) of this section; and

(2) BLM will treat any O. and C. lands not located within sustained-yield forest units as a single unit.

**AUTHORITY:** 61 Stat. 681, as amended, 69 Stat. 367, 48 Stat. 1269, sec. 11, 30 Stat. 414, as amended, sec. 5, 50 Stat. 875; 30 U.S.C. 601 *et seq.*, 43 U.S.C. 315, 1181a, 16 U.S.C. 607a, and 43 U.S.C. 1701 *et seq.*

## **Subpart 5400—Sales of Forest Products; General**

### **§ 5400.0–3 Authority.**

(a) The Act of August 28, 1937 (43 U.S.C. 1181a) authorizes the sale of timber from the Revested Oregon and California Railroad and Reconveyed Coos Bay Wagon Road Grant Lands and directs that such lands shall be managed for permanent forest production and the timber thereon sold, cut and removed in conformity with the principle of sustained yield for the purpose of providing a permanent source of timber supply, protecting watersheds, regulating streamflow and contributing to the economic stability of local communities and industries, and providing recreational facilities.

(b) The Act of July 31, 1947, as amended (30 U.S.C. 601 *et seq.*) authorizes the disposal of timber and other vegetative resources on public lands of the United

States including lands embraced within an unpatented mining claim located after July 23, 1955, if the disposal of such resources is not otherwise expressly authorized by law including, but not limited to, the Act of June 28, 1934, as amended (43 U.S.C. 315 through 315o–1) and the U.S. mining laws; is not expressly prohibited by laws of the United States; and would not be detrimental to the public interest.

(1) The Act also authorizes the United States, its permittees, and licensees to use so much of the surface of any unpatented mining claim located under the mining law of the United States after July 23, 1955, as may be necessary for access to adjacent land for the purposes of such permittees or licensees. Any authorized use of the surface of any such mining claim shall be such as not to endanger or materially interfere with prospecting, mining, or processing operations or uses reasonably incident thereto.

(2) Where the lands have been withdrawn in aid of a function of a Federal department or agency other than the Department of the Interior, or of a State county, municipality, water district, or other local governmental subdivision or agency, the Secretary of the Interior may make disposals under the regulations in this subpart only with the consent of such other Federal department or agency or of such State, or local governmental unit. The Act provides, however, that the Secretary of Agriculture shall dispose of materials if such materials are on lands administered by the Secretary of Agriculture for national forest purposes or for purposes of title III of the Bankhead-Jones Farm Tenant Act or where withdrawn for the purpose of any other function of the Department of Agriculture.

(3) The provisions of the Act in disposal of vegetative or mineral materials do not apply to lands in any national park, or national monument or to any Indian lands or lands set aside or held for the use or benefit of Indians including lands over which jurisdiction has been transferred to the Department of the Interior by Executive order for the use of Indians.

(c) The Department of the Interior and Related Agencies Appropriation Act, 1976 (Pub. L. 94–165) prohibits the

use of funds appropriated thereunder for sale of unprocessed timber from Federal lands west of the 100th meridian in the contiguous 48 States which will be exported from the United States, or which will be used as a substitute for timber from private lands which is exported by the purchaser. The law also provides that the export restriction shall not apply to specific quantities of grades and species of timber which the Secretary of the Interior determines to be surplus to domestic lumber and plywood manufacturing needs.

(d) Authority for small sales of timber for use in Alaska is contained in the Act of May 14, 1898, as amended (16 U.S.C. 615a).

(e) Authority to enforce the provisions of this title is contained in the Federal Land Policy and Management Act of 1976, as amended (43 U.S.C. 1701 *et seq.*).

[37 FR 22797, Oct. 25, 1972, as amended at 41 FR 12659, Mar. 26, 1976; 56 FR 10174, Mar. 11, 1991]

#### § 5400.0-5 Definitions.

Except as the context may otherwise indicate, as the terms are used in parts 5400-5490 of this chapter and in contracts issued thereunder:

*Affiliate* means a business entity including but not limited to an individual, partnership, corporation, or association, which controls or is controlled by a purchaser, or, along with a purchaser, is controlled by a third business entity.

*Authorized Officer* means an employee of the Bureau of Land Management, to whom has been delegated the authority to take action.

*Bureau* means the Bureau of Land Management, Department of the Interior.

*Commercial use* means use intended for resale, barter, or trade, or for profit.

*Director* means the Director of the Bureau of Land Management.

*Fair Market value* means the price for best products will return when offered for competitive sale on the open market. Determination of fair market value will be made in accordance with procedures in BLM Manual 9354.

*Federal lands* means all lands administered by the Department of the Interior west of the 100th meridian in the contiguous 48 States with the exception of tribal and trust allotted lands managed by the Bureau of Indian Affairs on behalf of the Indians.

*Federal timber* means timber sold by the Bureau of Land Management as used under these regulations.

*Incidental use* means personal use of other vegetative resources on the site where they are obtained, or, if they are transported to a secondary location, personal use of the resources within a reasonable period of time by the person obtaining them.

*Loading point* means any landing or other area in which logs are capable of being loaded for transportation out of the contract area: *Provided, however*, That right-of-way timber which has been cut shall not be considered to be at a loading point until such time as logs from any source are actually transported over that portion of the right-of-way.

*Nonwillful* means an action which is inadvertent, mitigated in character by the belief that the conduct is reasonable or legal.

*O. and C. Lands* means the Revested Oregon and California Railroad and Reconveyed Coos Bay Wagon Road Grant Lands and other lands administered by the Bureau of Land Management under the provisions of the Act of August 28, 1937 (50 Stat. 874).

*Operating season* means the time of the year in which operations of the type required to complete the contract are normally conducted in the location encompassing the subject timber sale, or the time of the year specified in the timber sale contract when such operations are permitted.

*Operating time* means a period of time during the operating season.

*Other vegetative resources* means all vegetative material that is not normally measured in board feet, but can be sold or removed from public lands by means of the issuance of a contract or permit.

*Permit* means authorization in writing by the authorized officer or other person authorized by the United States Government, and is a contract between the permittee and the United States.

*Personal use* means use other than for sale, barter, trade, or obtaining a profit.

*Product value* means the stumpage value of timber or the fair market value of other vegetative resources.

*Public lands* means any land and interest in land owned by the United States within the several States and administered by the Secretary of the Interior through the Bureau of Land Management, without regard to how the United States acquired ownership.

*Purchaser* means a business entity including, but not limited to, an individual, partnership, corporation, or association that buys Federal timber or other vegetative resources.

*Sale value* means the contract value of the stumpage sold under the contract.

*Set-aside* means a designation of timber for sale which is limited to bidding by small business concerns as defined by the Small Business Administration in its regulations (13 CFR part 121) under the authority of section 15 of the Small Business Act of July 18, 1958 (72 Stat. 384).

*Substitution* means:

(1) The purchase of a greater volume of Federal timber by an individual purchaser than has been his historic pattern within twelve (12) months of the sale of export by the same purchaser of a greater volume of his private timber than has been his historic pattern during the preceding twelve (12) months, exclusive of Federal timber purchased by negotiated sale for right-of-way purposes, and

(2) The increase of both the purchase of Federal timber and export of timber from private lands tributary to the plant for which Bureau of Land Management timber covered by a specific contract is delivered or expected to be delivered.

*Third party scaling* means the measurement of logs by a scaling organization, other than a Government agency, approved by the Bureau.

*Timber* means standing trees, downed trees or logs which are capable of being measured in board feet.

*Trespass* means the severance, removal, or unlawful use of timber or other vegetative resources without the consent (authorization) of the Federal

Government, or failure to comply with contract or permit requirements that causes direct injury or damage to timber or other vegetative resources, or undue environmental degradation.

*Trespasser* means any person, partnership, association, or corporation responsible for committing a trespass.

*Unprocessed timber* means:

(1) Any logs except those of utility grade or below, such as sawlogs, peeler logs, and pulp logs;

(2) Cants or squares to be subsequently remanufactured exceeding eight and three-quarters (8¾) inches in thickness;

(3) Split or round bolts, or other roundwood not processed to standards and specifications suitable for end product use.

*Willful* means a knowing act or omission that constitutes the voluntary or conscious performance of a prohibited act or indifference to or reckless disregard for the law.

[35 FR 9783, June 13, 1970, as amended at 38 FR 6280, Mar. 8, 1973; 41 FR 12659, Mar. 26, 1976; 41 FR 31381, July 28, 1976; 56 FR 10175, Mar. 11, 1991; 57 FR 62235, Dec. 30, 1992]

**§ 5400.0-7 Public hearings to determine surplus quantities and species of unprocessed timber.**

(a) Public hearings will be held when authorized by the Director to seek advice and counsel as to the specific quantities of grades and species of unprocessed timber surplus to the needs of domestic users and processors. Such species and quantities thereby determined to be surplus by the Secretary, may be designated as available for export by the Secretary.

(b) Such hearings will be coordinated with the Department of Agriculture and held at convenient, centralized locations within the range of the species under consideration.

(c) Before any hearing is held in this regard, a notice will be published in a newspaper of general circulation within the range of the species under consideration at least 15 days prior to the hearing. In addition, known parties or groups with special interest in the species concerned should be notified directly. The record of the hearing shall be kept open for at least 5 consecutive calendar days from the date of the

## Bureau of Land Management, Interior

## § 5410.0-6

hearing for receipt of additional statements.

(d) The hearing will be conducted by a representative or representatives of the Department of the Interior and the Department of Agriculture, respectively. At the conclusion of the hearing, the record thereof together with appropriate recommendations shall be forwarded to the Director for further action deemed appropriate. The Director shall give the public due notice as to the quantities and species of unprocessed timber determined to be surplus to the needs of domestic users and processors.

[35 FR 9783, June 13, 1970, as amended at 41 FR 12659, Mar. 26, 1976]

### Subpart 5401—Advertised Sales; General

#### § 5401.0-6 Policy.

(a) All sales other than those specified in § 5402.0-6 shall be made only after inviting competitive bids through publication and posting. Sales shall not be held sooner than one week after the last advertisement. Competitive sales shall be offered by the authorized officer when access to the sale area is available to anyone who is qualified to bid. Further, timber or other vegetative resources that would normally be sold by negotiated sale because of lack of legal access may be sold competitively without access if the authorized officer determines that there is competitive interest in such a sale.

(b) All competitive sales shall be subject to the restrictions relating to the export and substitution from the United States of unprocessed timber.

(Sec. 5, 50 Stat. 875, 61 Stat. 681, as amended, 69 Stat. 367; 43 U.S.C. 1181e, 30 U.S.C. 601 *et seq.*)

[35 FR 9783, June 13, 1970, as amended at 41 FR 12659, Mar. 26, 1976; 49 FR 23839, June 8, 1984; 56 FR 10175, Mar. 11, 1991]

### Subpart 5402—Other Than Advertised Sales; General

#### § 5402.0-6 Policy.

(a) When it is determined by the authorized officer to be in the public interest, he may sell at not less than the appraised value, without advertising or

calling for bids, timber where the contract is for the sale of less than 250 M board feet.

(b) Timber on the right-of-way of a logging road and danger trees adjacent to the right-of-way on O. and C. lands may be sold at not less than the appraised value without advertising or calling for bids to (1) permittee who constructs a road pursuant to a permit issued under Subpart 2800 of this chapter, or (2) a contractor who is constructing a road with Government funds.

(c) In addition to paragraph (b) of this section, negotiated sales with no limitations as to volume may be made if:

(1) The contract is for the disposal of materials to be used in connection with a public works improvement program on behalf of a Federal, State or local government agency and the public exigency will not permit the delay incident to advertising; or if

(2) The contract is for the disposal of timber or other vegetative resources, for which it is impracticable to obtain competition.

(d) All negotiated sales shall be subject to the restrictions relating to the export and substitution from the United States of unprocessed timber. Timber purchased for right-of-way purposes will not be subject to substitution restrictions.

(Sec. 5, 50 Stat. 875, 61 Stat. 681, as amended, 69 Stat. 367; 43 U.S.C. 1181e, 30 U.S.C. 601 *et seq.*)

[35 FR 9784, June 13, 1970, as amended at 41 FR 12660, Mar. 26, 1976; 56 FR 10175, Mar. 11, 1991]

## PART 5410—ANNUAL TIMBER SALE PLAN

### Subpart 5410—Annual Timber Sale Plan; General

#### § 5410.0-6 Policy.

Plans for the sale of timber from the O. and C. and public lands will be developed annually. Suggestions from prospective purchasers of such timber may be received to assist in the development of a sound annual timber sale plan. Such plan may be advertised in a newspaper of general circulation in the

area in which the timber is located. Such advertisement shall indicate generally the probable time when the various tracts of timber included in the plan will be offered for sale, set-asides if any, and the probable location and anticipated volumes of such tracts. The authorized officer may subsequently change, alter or amend the annual timber sale plan.

[35 FR 9785, June 13, 1970]

## **PART 5420—PREPARATION FOR SALE**

Sec.

5420.0–6 Policy.

### **Subpart 5422—Volume Measurements**

5422.1 Cruise sales.

5422.2 Scale sales.

### **Subpart 5424—Preparation of Contract**

5424.0–6 Policy.

5424.1 Reporting provisions for substitution determination.

**AUTHORITY:** 61 Stat. 681, as amended, 69 Stat. 367; Sec. 5, 50 Stat. 875; 30 U.S.C. 601 *et seq.*; 43 U.S.C. 1181e.

**SOURCE:** 35 FR 9785, June 13, 1970, unless otherwise noted.

### **Subpart 5420—Preparation for Sale; General**

#### **§ 5420.0–6 Policy.**

All timber or other vegetative resources to be sold shall be appraised and in no case shall be sold at less than the appraised value. Measurement shall be by tree cruise, log scale, weight, or such other form of measurement as may be determined to be in the public interest.

### **Subpart 5422—Volume Measurements**

#### **§ 5422.1 Cruise sales.**

As the general practice, the Bureau will sell timber on a tree cruise basis.

#### **§ 5422.2 Scale sales.**

(a) Scaling by the Bureau will be used from time to time for administrative reasons. Such reasons would include but not be limited to the following: To improve cruising standards; check accuracy of cruising practices; for volumetric analysis; and for highly defective timber where it is impossible to determine the tree cruise volume within a reasonable degree of accuracy.

(b) (1) BLM may order third party scaling after determining that all of the following factors exist:

- (i) A timber disaster has occurred;
- (ii) A critical resource loss is imminent; and

(iii) Measurement practices listed in § 5422.1 and paragraph (a) of this section are inadequate to permit orderly disposal of the damaged timber.

(2) BLM may also order third party scaling, only by scalers or scaling bureaus under contract to BLM, for the scaling of density management timber sales when the quadratic mean diameter of the trees to be cut and removed is equal to or less than 20 inches.

(3) Third party scaling volumes must be capable of being equated to BLM standards in use for timber depletion computations, to insure conformance with sustained yield principles.

[35 FR 9785, June 13, 1970, as amended at 71 FR 30294, May 26, 2006]

### **Subpart 5424—Preparation of Contract**

#### **§ 5424.0–6 Policy.**

(a) All timber sales shall be made on contract or permit forms approved by the Director, BLM.

(b) Other than for incidental use, the severance and/or removal of any vegetative resource for personal or commercial use requires a written contract or permit issued by the authorized officer or other person authorized by the United States. All contracts or permits shall contain the following:

(1) The name of the purchaser or his/her authorized representative with complete mailing address.

(2) The specific vegetative resources authorized for removal and their respective quantities and values.

## Bureau of Land Management, Interior

## § 5430.1

(3) The specific location from which the vegetative resources are to be removed.

(4) The term for which the contract or permit is valid.

(5) Contract or permit conditions and stipulations.

(6) Signature of purchaser or authorized representative.

(c) The authorized officer may include additional provisions in the contract or permit to cover conditions peculiar to the sale area, such as road construction, logging methods, silvicultural practices, reforestation, snag felling, slash disposal, fire prevention, fire control, and the protection of improvements, watersheds, recreational values, and the prevention of pollution or other environmental degradation.

(d) The contract or permit from and any additional provisions shall be made available for inspection by prospective bidders during the advertising period. When sales are negotiated, all additional provisions shall be made part of the contract or permit.

(e) Except for such specific quantities of grades and species of unprocessed timber determined to be surplus to domestic lumber and plywood manufacturing needs, each timber sale contract shall include provisions that prohibit:

(1) The export of any unprocessed timber harvested from the area under contract; and

(2) The use of any timber of sawing or peeler grades, sold pursuant to the contract, as a substitute for timber from private lands which is exported or sold for export by the purchaser, an affiliate of the purchaser, or any other parties.

[56 FR 10175, Mar. 11, 1991]

### § 5424.1 Reporting provisions for substitution determination.

(a) To determine whether substitution has occurred, the authorized officer may require that information identified in the contract be reported by:

(1) A purchaser who has exported private timber within one year preceding the purchase date of Federal timber, and/or

(2) An affiliate of a timber purchaser who exported private timber within

one year before the acquisition of Federal timber from the purchaser.

(b) Purchasers or affiliates of purchasers shall retain a record of Federal timber acquisitions and private timber exports for three years from the date the activity occurred.

(Information collection requirements contained in paragraph (a) were approved by the Office of Management and Budget under control number 1004-0058)

[46 FR 29263, June 1, 1981]

## PART 5430—ADVERTISEMENT

### Subpart 5430—Advertisement; General

Sec.

5430.0-6 Policy.

5430.1 Requirements.

SOURCE: 35 FR 9785, June 13, 1970, unless otherwise noted.

### Subpart 5430—Advertisement; General

AUTHORITY: Sec. 5, 50 Stat. 875, 61 Stat. 681, as amended, 69 Stat. 367; 43 U.S.C. 1181e, 30 U.S.C. 601 *et seq.*

#### § 5430.0-6 Policy.

Competitive timber sales shall be advertised in a newspaper of general circulation in the area in which the timber or other vegetative resources are located and a notice of the sale shall be posted in a conspicuous place in the office where bids are to be submitted. Such advertisement shall be published on the same day once a week for two consecutive weeks, except that sales amounting to less than 500 M board feet, need be published once only. When in the discretion of the authorized officer longer advertising periods are desired, such longer periods are permitted.

[35 FR 9785, June 13, 1970]

#### § 5430.1 Requirements.

The advertisement of sale shall state the location by county, section, township, range, meridian, of the tract or tracts on which timber or other vegetative resources are being offered, the estimated total quantity, the unit of measure, the total appraised value, the minimum deposit, time and place for

receiving bids, the office where additional information may be obtained, and such additional information as the authorized officer may deem necessary.

[35 FR 14135, Sept. 5, 1970]

## PART 5440—CONDUCT OF SALES

### Subpart 5441—Advertised Sales

Sec.

5441.1 Qualification of bidders.

5441.1-1 Bid deposits.

5441.1-2 Special considerations.

5441.1-3 SBA set-aside sales.

### Subpart 5442—Bidding Procedure

5442.1 Bidding.

5442.2 Resale of timber from uncompleted contract.

5442.3 Rejection of bids; waiver of minor deficiencies.

### Subpart 5443—90-Day Sales

5443.1 General.

AUTHORITY: Sec. 5, 50 Stat. 875, 61 Stat. 631, as amended, 69 Stat. 367; 43 U.S.C. 1181e, 30 U.S.C. 601 *et seq.*

### Subpart 5441—Advertised Sales

#### § 5441.1 Qualification of bidders.

(a) A bidder or purchaser for the sale of timber must be (1) an individual who is a citizen of the United States, (2) a partnership composed wholly of such citizens, (3) an unincorporated association composed wholly of such citizens, or (4) a corporation authorized to transact business in the States in which the timber is located. A bidder must also have submitted a deposit in advance, as required by § 5441.1-1. To qualify for bidding to purchase set-aside timber, the bidder must not have been determined by the Small Business Administration to be ineligible for preferential award of set-aside sales and must accompany his deposit with a self-certification statement that he is qualified as a small business concern as defined by the Small Business Administration (13 CFR part 121).

(b) At the request of the authorized officer, or the officer conducting the sale, bidders must furnish evidence of qualification in conformance with paragraphs (a) and (c) of this section or if such evidence has already been fur-

nished, make appropriate reference to the record containing it.

(c)(1) A purchaser who is under review for debarment may continue to bid on timber purchase contracts until a final debarment determination has been made by the debarring official. However, contracts will not be awarded during the review period.

(2) Debarred purchasers are prohibited from bidding on timber purchase contracts.

[35 FR 9785, June 13, 1970, as amended at 47 FR 38696, Sept. 2, 1982; 52 FR 26983, July 17, 1987]

#### § 5441.1-1 Bid deposits.

Sealed bids shall be accompanied by a deposit of not less than 10 percent of the appraised value of the timber or other vegetative resources. For offerings at oral auction, bidders shall make a deposit of not less than 10 percent of the appraised value prior to the opening of the bidding. The authorized officer may, in his discretion, require larger deposits. Deposits may be in the form of cash, money orders, bank drafts, cashiers or certified checks made payable to the Bureau of Land Management, bid bonds of a corporate surety shown on the approved list of the United States Treasury Department or any guaranteed remittance approved by the authorized officer. Upon conclusion of the bidding, the bid deposits of all bidders, except the high bidder, will be returned. The deposit of the successful bidder will be applied on the purchase price at the time the contract is signed by the authorized officer unless the deposit is a corporate surety bid bond, in which case the surety bond will be returned to the purchaser.

[55 FR 22917, June 5, 1990]

#### § 5441.1-2 Special considerations.

Where a timber sale notice provides that the successful bidder may use a Small Business Administration road construction loan, and the bidder has reason to believe that he qualifies for such road construction loan under SBA regulations (13 CFR part 121), the bidder shall submit to the authorized officer a statement of his intention to file with SBA for such SBA road construction loan. The purpose of the filing is

## Bureau of Land Management, Interior

## § 5443.1

to facilitate action by the authorized officer and the Small Business Administration on the loan application.

[35 FR 9785, June 13, 1970]

### § 5441.1-3 SBA set-aside sales.

Only bids of small business concerns which have filed a self-certification statement as required by § 5441.1 may be considered for sales subject to set-asides. When no such bids are received, the timber may be sold under § 5443.1 in the same manner as timber not previously made subject to a set-aside. When timber subject to a set-aside is not sold for any other reason, the sale may be rescheduled for a set-aside sale.

[35 FR 9785, June 13, 1970]

## Subpart 5442—Bidding Procedure

### § 5442.1 Bidding.

(a) Bidding at competitive sales shall be conducted by the submission of sealed bids, written bids, oral bids, or a combination of bidding methods as directed by the authorized officer.

(b) In sealed bid sales, the bidder submitting the highest sealed bid shall be declared the high bidder. In the event of a tie in high sealed bids, the high bidder shall be determined by lot from among those who submitted the tie bids.

(c) In oral auction sales, submission of the required minimum bid deposit and a written bid at not less than the advertised appraised price shall be required to participate in oral bidding. The officer conducting the sale shall declare a specific period, prior to oral bidding on each tract, during which bid deposits and written bids may be submitted. Bid deposits and written bids also may be submitted any time prior to the specific period declared by the officer conducting the sale. Oral bidding to determine the high bidder shall begin from the highest written bid after closure of the submittal period. In the event there is a tie in high written bids, and no oral bidding occurs, the bidder who was the first to submit his bid deposit and written bid shall be declared the high bidder. If the officer conducting the sale cannot determine who made the first submission of high tie written bids, the high bidder shall

be determined by lot. The declared high bidder must confirm his oral bid in writing immediately after the sale, but failure to do so shall not relieve him of his purchase obligation.

[38 FR 6280, Mar. 8, 1973]

### § 5442.2 Resale of timber from uncompleted contract.

(a) This section applies to the sale of timber only when 50 percent or more of the timber included in the sale is timber remaining from an uncompleted contract. A bid from a purchaser who held the uncompleted contract, or an affiliate of such purchaser, will be considered only if:

(1) The contract was not canceled because of breach by the purchaser, and

(2) The purchaser has made full payment of the total purchase price and any related charges by the expiration date.

(b) The purchaser who held the uncompleted contract, or affiliate of such purchaser, shall, upon execution of the resale contract, agree that the Bureau of Land Management shall retain the original payment for timber not removed under the uncompleted contract, less the cost of resale, as a credit toward the purchase price of the resale contract.

[55 FR 17755, Apr. 27, 1990]

### § 5442.3 Rejection of bids; waiver of minor deficiencies.

When the authorized officer determines it to be in the interest of the Government to do so, he may reject any or all bids and may waive minor deficiencies in the bids or the timber sale advertisement.

[38 FR 6280, Mar. 8, 1973]

## Subpart 5443—90-Day Sales

### § 5443.1 General.

If no bid is received within the time specified in the advertisement of sale, and if the authorized officer determines that there has been no significant rise in the market value, he may in his discretion, keep the sale open for not to exceed 90 days by posting notice thereof in a conspicuous place in the office where bids are to be submitted. If

during such period a written bid is submitted, together with the required deposit, for not less than the advertised appraised value, a notice of such bid shall be posted immediately after receipt of such bid for seven successive days in the same office and in the same manner. If no other written bid is received during the seven day posting period, the sole bidder shall be deemed the high bidder. If, however, during such seven day posting period other written bids are received, an oral auction shall be conducted in the usual manner for those who have submitted written bids. The authorized officer shall notify those who have submitted written bids of the time and place of the oral auction. The written bids shall be considered the initial bids in such oral auction. If there is a tie in the high written bids that are submitted during the seven day posting period and if no higher bid is offered during the oral auction, the party who first submitted the high bid shall be deemed the high bidder.

[35 FR 9786, June 13, 1970]

## **PART 5450—AWARD OF CONTRACT**

### **Subpart 5450—Award of Contract; General**

Sec.

5450.1 Pre-award qualifications of high bidder.

#### **Subpart 5451—Bonds**

5451.1 Minimum performance bond requirements; types.

5451.2 Performance bonds in excess of minimum.

5451.3 Performance bond reduction.

5451.4 Payment bond.

#### **Subpart 5452—Method of Payment**

5452.1 Cash sales.

5452.2 Installment payments.

AUTHORITY: Sec. 5, 50 Stat. 875; 61 Stat. 681, as amended; 69 Stat. 367; 43 U.S.C. 1181e; 30 U.S.C. 601 *et seq.*

### **Subpart 5450—Award of Contract; General**

#### **§ 5450.1 Pre-award qualifications of high bidder.**

(a) The authorized officer may require the high bidder to furnish such information as is necessary to determine the ability of the bidder to perform the obligations of the contract. The contract shall be awarded to the high bidder, unless he is not qualified or responsible, or unless all bids are rejected. If the high bidder is not qualified or responsible or fails to sign and return the contract together with the required performance bond and any required payment; the contract may be offered and awarded for the amount of the high bid to the highest of the bidders who is qualified, responsible, and willing to accept the contract.

(b) A purchaser who has defaulted on a timber sale contract under this title by failing to complete payment of its total purchase price by the expiration date of the contract is considered a risk for purposes of being awarded future timber sale contracts. If a purchaser deemed a risk is the high bidder on a new timber sale, the authorized officer shall send a notice by registered mail requiring such purchaser to establish bidder responsibility by paying or bonding, or a combination of payment and bonding, for any one of the following: The total unpaid balance of the purchase price of all defaulted sales, the unsettled damages on all defaults, or 50 percent of the purchase price of contracts bid after the most recent default. Any payment applied toward 50 percent of a contract's bid price after the default(s) will be held as final payment for timber cut and/or removed under terms of the contracts. Acceptable bonding options are listed at § 5451.1 of this title. Payment and bonding are due within time limits stated in § 5450.1(c). Should the purchaser fail to demonstrate responsibility within 30 days of receipt of the notice, the authorized officer shall offer the contract for the amount of the high bid to the highest of the bidders who is qualified, responsible, and willing to accept the contract. Failure to demonstrate responsibility within 30 days of receipt of the notice indicates that the purchaser

## Bureau of Land Management, Interior

## § 5451.3

is not responsible, and debarment proceedings shall be considered under § 5441.1 of this title.

(c) Within 30 days after receipt of the contract the successful bidder shall sign and return the contract, together with any required performance bond and any required payment: *Provided*, That the authorized officer may, in his discretion, extend such period an additional 30 days if the extension is applied for in writing and granted in writing within the first 30-day period. If the successful bidder fails to comply within the stipulated time, his bid deposit shall be retained as liquidated damages.

(d) Award of contracts or permits on negotiated sales occurs upon the execution of the contract or permit. Terms and conditions shall reflect the contractor's ability to perform, and shall require prevention or mitigation of environmental degradation associated with the removal of the timber or other vegetative resource.

[35 FR 9786, June 13, 1970, as amended at 55 FR 3955, Feb. 6, 1990; 56 FR 10175, Mar. 11, 1991; 56 FR 47916, Sept. 23, 1991]

### Subpart 5451—Bonds

#### § 5451.1 Minimum performance bond requirements; types.

(a) A minimum performance bond of not less than 20 percent of the total contract price shall be required for all contracts of \$2,500 or more, but the amount of the bond shall not be in excess of \$500,000, except when the purchaser opts to increase the minimum bond as provided in § 5451.2 of this title. A minimum performance bond of not less than \$500 will be required for all installment contracts less than \$2,500. For cash sales less than \$2,500, bond requirements, if any, will be in the discretion of the authorized officer. The performance bond may be:

(1) Bond of a corporate surety shown on the approved list issued by the United States Treasury Department and executed on an approved standard form; or

(2) Personal surety bond, executed on an approved standard form if the authorized officer determines the principals and bondsmen are capable of carrying out the terms of the contract; or

(3) Cash bond; or

(4) Negotiable securities of the United States.

(5) Any guaranteed remittance approved by the authorized officer.

[35 FR 9786, June 13, 1970, as amended at 38 FR 6281, Mar. 8, 1973; 46 FR 42673, Aug. 24, 1981; 47 FR 38696, Sept. 2, 1982]

#### § 5451.2 Performance bonds in excess of minimum.

(a) The purchaser may cut timber before payment of the second or subsequent installments required by § 5461.2(a) of this part by increasing the minimum bond required by § 5451.1(a) of this part by an amount equal to one or more installment payments; *Provided, however*, That the authorized officer may grant permission to cut timber only when the value of the timber to be cut does not exceed the amount by which the minimum bond has been increased. The purchaser shall secure approval in writing of the adjusted bond by the authorized officer prior to cutting any timber under the adjusted bond.

(b) If payment and bonding for 50 percent of the purchase price of a contract is provided in accordance with § 5450.1(b) of this title, the amount of performance bond in excess of the minimum performance bond required by § 5451.1(a) of this title may be used as an increased performance bond as specified in § 5451.2(a) of this title.

[47 FR 38697, Sept. 2, 1982; 47 FR 51868, Nov. 18, 1982, as amended by 55 FR 3955, Feb. 6, 1990; 55 FR 19886, May 14, 1990]

#### § 5451.3 Performance bond reduction.

(a) As contract provisions are satisfactorily completed, the authorized officer may, in his discretion, reduce the amount of the required performance bond: *Provided, however*, That the amount of the performance bond shall not be reduced below the minimum required by § 5451.1 until

(1) Payment of no less than 60 percent of the total purchase price has been made, or

(2) Road construction required under the contract has been completed, the value of which when combined with contract payments is equal to no less than 60 percent of the total purchase price.

#### **§ 5451.4**

(b) At the request of the purchaser, when the requirements set forth in the proviso to paragraph (a) of this section have been met, the amount of the performance bond may be reduced to 10 percent of the total purchase price or the entire cost of the uncompleted post-harvest contract requirements, whichever is greater. The amount of the performance bond shall not be reduced below 10 percent of the total purchase price until payment for all the timber sold under the terms of the contract is complete.

(c) For the purpose of this section, the value of completed road construction shall be based on the Bureau's appraisal allowance.

Satisfactory completion of portions of the required road construction, to reasonable points that can be easily identified in the road construction appraisal, shall be considered as completed road construction for the purpose of this section.

[55 FR 19886, May 14, 1990]

#### **§ 5451.4 Payment bond.**

To obtain permission to (a) cut and remove timber, or (b) remove timber already cut, which has been secured by an increased performance bond as provided for in § 5451.2, before payment of the first or subsequent installments, the purchaser must obtain a payment bond in an amount equal to one or more installment payments as determined by the authorized officer. The payment bond may be a bond of a corporate surety shown on the approved list issued by the U.S. Treasury Department and executed on an approved form or negotiable securities of the United States. The payment bond may be a bond of a corporate surety shown on the approved list issued by the United States Treasury Department and executed on an approved form, negotiable securities of the United States, or any guaranteed remittance approved by the authorized officer. If a bond of a corporate surety is used, the payment bond shall provide that if the purchaser fails to make payment as required by § 5461.2(c) of this chapter, the surety will make such payment including any required interest to the Bureau within 60 days after demand therefor by the Bureau. With the written ap-

#### **43 CFR Ch. II (10–1–08 Edition)**

proval of the authorized officer a single blanket payment bond may be allocated to two or more contracts with the same purchaser in the same Bureau of Land Management administrative district. When operations cease for 60 days or more, the amount of a payment bond may be adjusted downward to an amount equal to the value of the timber cut. Before operations resume, a reduced bond shall be increased to the amount of a full installment.

[38 FR 6281, Mar. 8, 1973, as amended at 46 FR 42674, Aug. 24, 1981; 47 FR 38697, Sept. 2, 1982]

### **Subpart 5452—Method of Payment**

#### **§ 5452.1 Cash sales.**

For sales under \$500 the full amount shall be paid prior to or at the time the authorized officer signs the contract.

[35 FR 9787, June 13, 1970]

#### **§ 5452.2 Installment payments.**

For sales of \$500 or more the authorized officer may allow payment by installments as provided by § 5461.2 of this chapter.

[35 FR 9787, June 13, 1970]

## **PART 5460—SALES ADMINISTRATION**

### **Subpart 5461—Contract Payments**

Sec.

5461.1 Payment in advance of cutting or removal.

5461.2 Required payment schedule.

5461.3 Total payment.

### **Subpart 5462—Contract and Permit Requirements**

5462.1 Contract and permit compliance.

5462.2 Prohibited acts.

5462.3 Penalties.

### **Subpart 5463—Expiration of Time for Cutting and Removal**

5463.1 Time for cutting and removal.

AUTHORITY: 30 U.S.C. 601 *et seq.*, 43 U.S.C. 1181e.

**Subpart 5461—Contract Payments****§ 5461.1 Payment in advance of cutting or removal.**

Except as provided in §§ 5451.2 and 5451.4 no part of any timber or other vegetative resources sold may be cut or removed unless advance payment has been made as provided in the contract.

[35 FR 9787, June 13, 1970, as amended at 38 FR 6281, Mar. 8, 1973]

**§ 5461.2 Required payment schedule.**

(a)(1) For sales of less than \$500,000, installment payments shall not be less than 10 percent of the total purchase price. For sales of \$500,000 or more, installment payments shall be \$50,000.

(2) The first installment shall be paid prior to or at the time the authorized officer signs the contract. A purchaser cannot apply any portion of the first installment to cover other payments due on the contract until either 60 percent of the total purchase price has been paid or road construction required by the contract, the value of which when combined with contract payments is equal to 60 percent of the total purchase price, has been completed. When either of these 60-percent levels has been reached, one-half of the first installment may be applied to other payments due on the contract.

(3) Notwithstanding the provisions of paragraph (a)(2) of this section, when the contracting officer suspends or requests the purchaser to interrupt or delay operations during the operating season for a reason beyond the control of the purchaser, the contracting officer may reduce the amount of the first installment to 5 percent of the installment amount listed in the timber sale contract. Reductions may be made when the suspension, interruption, or delay can reasonably be expected to last longer than 30 days or has been in effect for more than 30 days for existing contracts. The purchaser shall request such reduction in writing from the contracting officer. The contracting officer will answer such requests within 15 days. The funds released may be refunded or credited to other contracts. When the contracting officer notifies the purchaser that operations may proceed, the purchaser shall have 15 days after such notification

to return the first installment to the full amount specified in the timber sale contract. Failure to pay the full first installment amount within the specified time will be considered a material breach of contract, and the contracting officer may cancel the contract. No timber may be cut or removed from the contract area until the first installment is restored to the full amount required by the contract.

(4) The second installment shall be paid prior to the cutting or removal of the material sold. Each subsequent installment shall be due and payable without notice when the value of material cut or removed equals the sum of all payments made up to that point, not including the first installment, or one-half of the first installment after the other one-half of the first installment has been released as provided in paragraph (a)(2) of this section.

(5) Timber sale contracts shall contain provisions requiring periodic payments for all sales with a contract term of 19 months or longer. For sales with a contract term of 19-26 months, one periodic payment of 20 percent of the total purchase price will be required. For all sales with a contract term of 27 months or longer, two periodic payments will be required. The first payment shall be 20 percent of the total purchase price and the second payment shall be 40 percent of the total purchase price. The value of satisfactorily completed road construction required by the contract and all completed contract payments may be used as a credit against the amount due for periodic payments. The due dates for the periodic payments will be specified in the timber sale contract. Adjustment of the periodic payment dates in the contract may be made when the contracting officer suspends, interrupts, or delays operations during the operating season prior to the due date for a periodic payment for a reason beyond the control of the purchaser. The adjustment may be made when the suspension, interruption, or delay can reasonably be expected to last longer than 30 days or has been in effect for more than 30 days for existing contracts. The purchaser shall request such adjustment in writing from

### § 5461.3

the contracting officer. The contracting officer will answer such requests within 15 days.

(6) For the purpose of this section, the value of satisfactorily completed road construction shall be based on the Bureau of Land Management's appraisal allowance. Satisfactory completion of portions of the required road construction, to reasonable points that can be easily identified in the road construction appraisal, shall be considered as completed road construction for purposes of this section.

(b) Delayed payment of installments shall be allowed if the purchaser furnishes a bond as provided in § 5451.2 of this title. A deposit shall be paid in the same manner as prescribed in paragraph (a) of this section. If cutting is permitted before payment, as prescribed in § 5451.2 of this title, payment by installment shall be made before any timber may be skidded or yarded to a loading point or removed from the contract area. Each subsequent installment shall be due and payable without notice when the sale value of the timber skidded or yarded to a loading point or removed equals the sum of all payments not including the deposit. The unenhanced value of timber allowed to be cut in advance of payment shall be limited to the amount of the increase over and above the required performance bond. Upon payment, the amount of the bond may be applied to other timber sold under the contract to permit its cutting in advance of payment.

(c) Where cutting or removal is permitted under payment bond under § 5451.4 of this title, a deposit shall be paid as provided in paragraph (a) of this section. If cutting and/or removal is permitted before payment, as provided in § 5451.4 of this title, the purchaser shall be billed monthly for timber skidded or yarded to a loading point or removed from the contract area and for any related road maintenance fees unless a lesser period is agreed to by the authorized officer and the purchaser. Payment shall be made within 15 days of the billing date shown on the billing form. The unenhanced value of timber allowed to be cut and/or removed in advance of payment is limited to the amount of the payment

### 43 CFR Ch. II (10–1–08 Edition)

bond. Upon payment, the amount of the bond may be applied to other timber.

[47 FR 38697, Sept. 2, 1982; 47 FR 51868, Nov. 18, 1982, as amended at 55 FR 19886, May 14, 1990; 57 FR 62235, Dec. 30, 1992]

#### § 5461.3 Total payment.

The total amount of the contract purchase price must be paid prior to expiration of the time for cutting and removal under the contract. For a cruise sale the purchaser shall not be entitled to a refund even though the amount of timber cut, removed, or designated for cutting may be less than the estimated total volume shown in the contract. For a scale sale, if it is determined after all designated timber has been cut and measured that the total payments made under the contract exceed the total sale value of the timber measured, such excess shall be refunded to the purchaser within 60 days after such determination is made.

[35 FR 9787, June 13, 1970]

### Subpart 5462—Contract and Permit Requirements

#### § 5462.1 Contract and permit compliance.

(a) The following minimum requirements shall be met in order to assure contract or permit compliance:

(1) Contracts or permits shall be executed by authorized purchasers or their formally designated representatives.

(2) For other than lump sum sales, only the specific timber or other vegetative resource designated for removal, in their respective quantities, shall be removed.

(3) Timber or other vegetative resources shall be removed only from designated locations or areas.

(4) Transportation of timber or other vegetative resources shall be in accordance with contract or permit requirements and shall include appropriate load or product tagging if required.

(5) Contract or permit stipulations and specification shall be adhered to.

(6) Payments shall be made in accordance with subpart 5461 of this title.

## Bureau of Land Management, Interior

## § 5462.2

(b) All contract and permit provisions and special provisions shall be adhered to unless the contract is modified in accordance with part 5470 of this title.

(c)(1) The authorized officer may cancel a contract or permit upon determining that the holder has failed to comply with a law or regulation pertinent to the contract or permit. The authorized officer may also cancel a contract or permit upon determining that the holder has failed to comply with a stipulation or requirement contained in the contract or permit and the non-compliance is detrimental to the public interest. Individual contracts or permits may contain specific language defining the remedies or penalties associated with noncompliance.

(2) Cancellation shall be mandatory in cases of intentional falsification of information used to obtain the permit or contract.

[56 FR 10176, Mar. 11, 1991, as amended at 60 FR 50450, Sept. 29, 1995]

### § 5462.2 Prohibited acts.

(a) The acts or omissions listed in paragraph (b) of this section apply only to BLM-administered lands and will render the person(s) responsible liable to the United States in a civil action for trespass, and such person(s) may be prosecuted criminally. If the authorized officer determines such acts or omissions to be detrimental to the public interest, the timber sale contract or permit held by the purchaser responsible for such acts or omissions may be canceled.

(b) The following activities are prohibited:

(1) Cutting, removing, or otherwise damaging any timber, tree, or other vegetative resource, except as authorized by a forest product sale contract, permit, or Federal law or regulation.

(2) Cutting any standing tree, under a permit or timber sale contract, before a BLM employee has marked it or has otherwise designated it for cutting.

(3) Removing any timber or other vegetative resource cut under a permit or timber sale contract, except to a place designated for scaling or measurement, or removing it from that place before it is scaled, measured,

counted, or otherwise accounted for by a BLM employee.

(4) Stamping, marking with paint, tagging, or otherwise identifying any tree or other vegetative resources on BLM-administered lands in a manner similar to that employed by BLM employees to mark or designate a tree or other vegetative resources for cutting, removal, or transportation.

(5) Transporting timber or other vegetative resources without a valid haul ticket that pertains to the material in question, except as authorized by Federal law or regulation.

(6) Except as authorized by Federal law or regulation, purchasers or their designated representatives, while engaging in any activity connected with the harvest or removal of forest products, failing to have in their possession and/or failing to produce any required permit or forest product sale contract for inspection upon demand by a BLM employee or any official of a cooperating law enforcement agency acting within his or her designated authority as a sale inspector, administrator, contracting officer, or law enforcement officer.

(7) Violating any State or local laws and ordinances relating to local permits, tagging, and transportation of timber, trees, or other vegetative resources.

(8) Violating any of the provisions regulating export and substitution contained in subparts 5400, 5403, and 5420 of this title.

(9) Obtaining any forest product sale contract or permit or taking any timber, trees, or other vegetative resources through falsifying, concealing, or covering up by any trick, scheme, or device a material fact, or making any false, fictitious, or fraudulent statement or representation, or making or using a false, fictitious, or fraudulent statement or entry, including altering any forest product sales contract or permit or using an unauthorized reproduction of any official load tag.

(10) Negligent or intentional destruction of or injury to any timber or other vegetative resource during operations under a forest product sale contract or permit.

[60 FR 50450, Sept. 29, 1995]

### § 5462.3

#### § 5462.3 Penalties.

Under section 303(a) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1733(a)), any individual who knowingly and willfully commits the prohibited acts under § 5462.2(b) is subject to arrest and trial by the United States Magistrate and, if convicted, shall be subject to a fine of not more than \$100,000 in accordance with the applicable provisions of the Sentencing Reform Act of 1984 (18 U.S.C. 3551 *et seq.*), or imprisonment not to exceed 12 months, or both, for each offense, and any organization that commits these prohibited acts is subject to arrest and trial by the United States Magistrate and, if convicted, shall be subject to a fine of not more than \$200,000.

[60 FR 50450, Sept. 29, 1995]

### Subpart 5463—Expiration of Time for Cutting and Removal

#### § 5463.1 Time for cutting and removal.

Time for cutting and removal of timber or other vegetative resources sold shall not exceed a period of thirty-six months except that such time for cutting and removal may be extended as provided in subpart 5473.

[35 FR 9787, June 13, 1970, as amended at 56 FR 33832, July 23, 1991]

## 43 CFR Ch. II (10-1-08 Edition)

### Subpart 5473—Extension of Time for Cutting and Removal

#### § 5473.1 Application.

In order to be considered, written requests for extension shall be delivered to the appropriate BLM office prior to the expiration of the time for cutting and removal.

[57 FR 37477, Aug. 19, 1992]

#### § 5473.4 Approval of request.

(a) If the purchaser shows that his delay in cutting or removal was due to causes beyond his control and without his fault or negligence, the contracting officer may grant an extension of time, upon written request by the purchaser. Such extension will not exceed one year, and will require an appraisal, if the delay was not imposed by the United States or any State government agency as provided by paragraph (c) of this section. Market fluctuations are not cause for consideration of contract extensions. Additional extensions may be granted upon written request by the purchaser.

(b) Notwithstanding the provisions of paragraph (a) of this section requiring reappraisal if the delay was not imposed by the United States or any State government under paragraph (c) of this section, the contracting officer may grant an extension of time, without reappraisal, not to exceed enough time to provide 30 days of operating time, if the delay was due to causes beyond the purchaser's control and without his fault or negligence. No additional extensions may be granted without reappraisal under the provisions of this paragraph.

(c) On a showing that the purchaser performed as the average prudent operator would be expected to perform in a like time period prior to any delaying event listed in this paragraph, the contracting officer may grant, without reappraisal, an extension of time not to exceed that necessary to provide an additional amount of operating time equal to operating time lost as a result of:

(1) Additional contract requirements incorporated in contract modifications requested by the Government;

## Bureau of Land Management, Interior

§ 5500.0-3

(2) Delays necessitated by the requirements for consultation with the U.S. Fish and Wildlife Service under the Endangered Species Act;

(3) Reviews for cultural resource values;

(4) Court injunctions obtained by parties outside the contract; or

(5) Closure of operations by State fire protection agencies due to fire danger.

(d) Upon written request of the purchaser, the State Director may extend a contract to harvest green timber to allow that purchaser to harvest as salvage from Federal lands timber that has been damaged by fire or other natural or man-made disaster. The duration of the extension shall not exceed the time necessary to meet the salvage objectives. The State Director may also waive reappraisal for such extension.

[57 FR 37477, Aug. 19, 1992, as amended at 57 FR 62235, Dec. 30, 1992]

### § 5473.4-1 Reappraisal.

(a) If an extension is granted under § 5473.4(a), reappraisal by the contracting officer of the material sold will be in accordance with this section.

(b) For a cruise sale the timber sold remaining on the contract area shall be reappraised for the purpose of computing the reappraised total purchase price. The reappraised total purchase price shall not be less than the total purchase price established by the contract or last extension. The authorized officer may require that the reappraised total purchase price shall be paid in advance as a condition of granting an extension.

(c) For a scale sale each species of timber remaining on the contract area shall be reappraised. The reappraised unit price for each species shall be effective for the remaining life of the contract: *Provided, however*, The reappraised unit price for each species shall not be less than the unit price established by the contract or previous extension.

[52 FR 42587, Nov. 5, 1987 and 53 FR 31002, Aug. 17, 1988, as amended at 56 FR 33833, July 23, 1991; 57 FR 37477, Aug. 19, 1992]

## Subpart 5474—Contract Assignment

### § 5474.1 Conditions; general.

(a) The purchaser may not assign the contract or any interest therein without the written approval of the authorized officer. An assignment shall contain all the terms and conditions agreed upon by the parties thereto.

(b) The authorized officer will not approve any proposed assignment involving contract performance unless the assignee (1) is authorized to transact business in the State in which the timber or other vegetative resource is located; (2) submits such information as is necessary to assure the authorized officer of his ability to fulfill the contract; and (3) furnishes a performance bond as required by subpart 5451 of this chapter or obtains a commitment from the previous surety to be bound by the assignment when approved. Upon approval of an assignment by the authorized officer, the assignee shall be entitled to all the rights and subject to all the obligations under the contract, and the assignor shall be released from any further liability under the contract.

#### Subpart 5500—Nonsale Disposals; General

AUTHORITY: 61 Stat. 681, as amended, 69 Stat. 367, 48 Stat. 1269, sec. 11, 30 Stat. 414, as amended, 30 U.S.C. 601 *et seq.*, 43 U.S.C. 315, 423.

### § 5500.0-3 Authority.

(a) The Act of July 31, 1947 (61 Stat. 681), as amended by the Acts of July 23, 1955 (69 Stat. 367, 30 U.S.C. 601 *et seq.*) and the Act of September 25, 1962 (76 Stat. 587) authorizes the disposal of

## § 5500.0-5

timber and other vegetative resources on public lands of the United States including lands embraced within an unpatented mining claim located after July 23, 1955, if the disposal of such resources is not otherwise expressly authorized by law including, but not limited to, the Act of June 28, 1934 (48 Stat. 1269; 43 U.S.C. 315 through 315o-1), as amended, and the United States mining laws; is not expressly prohibited by laws of the United States; and would not be detrimental to the public interest.

(1) The Act also authorizes the United States, its permittees, and licensees to use so much of the surface of any unpatented mining claim located under the mining law of the United States after July 23, 1955, as may be necessary for access to adjacent land for the purposes of such permittees or licensees. Any authorized use of the surface of any such mining claim shall be such as not to endanger or materially interfere with prospecting, mining or processing operations or uses reasonably incident thereto.

(2) Where the lands have been withdrawn in aid of a function of a Federal department or agency other than the Department of the Interior, or of a State, county, municipality, water district, or other local governmental subdivision or agency, the Secretary of the Interior may make disposals under the regulations in this subpart only with the consent of such other Federal department or agency or of such State, or local governmental unit. The Act of July 23, 1955, *supra*, provides, however, that the Secretary of Agriculture shall dispose of materials under the Act of July 31, 1947, as amended, *supra*, if such materials are on lands administered by the Secretary of Agriculture for national forest purposes or for purposes of Title III of the Bankhead-Jones Farm Tenant Act or where withdrawn for the purpose of any other function of the Department of Agriculture.

(3) The provisions of the Act of July 23, 1955, *supra*, in disposal of vegetative or mineral materials do not apply to lands in any national park, or national monument or to any Indian lands or lands set aside or held for the use or benefit of Indians including lands over which jurisdiction has been transferred

## 43 CFR Ch. II (10-1-08 Edition)

to the Department of the Interior by Executive order for the use of Indians.

### § 5500.0-5 Definitions.

Except as the context may otherwise indicate, as the terms are used in parts 5500 through 5520 of this chapter and in contracts issued thereunder:

(a) *Bureau* means the Bureau of Land Management, Department of the Interior.

(b) *Director* means the Director of the Bureau of Land Management.

(c) *Authorized Officer* means an employee of the Bureau of Land Management, to whom has been delegated the authority to take action.

(d) *O. and C. Lands* means the Revested Oregon and California Railroad and Reconveyed Coos Bay Wagon Road Grant Lands and other lands administered by the Bureau of Land Management under the provisions of the Act of August 28, 1937 (50 Stat. 874).

(e) *Public Lands* means the public domain and its surface resources under the jurisdiction of the Bureau of Land Management.

(f) *Timber* means standing trees, downed trees or logs which are capable of being measured in board feet.

(g) *Other vegetative resources* means all vegetative material which cannot be measured in units of board feet of timber.

## PART 5510—FREE USE OF TIMBER

### Subpart 5510—Free Use of Timber; General

Sec.

5510.0-3 Authority.

### Subpart 5511—Free Use Regulations

5511.1 Act of 1878.

5511.1-1 Free use of timber on mineral and nonmineral public lands.

5511.1-2 [Reserved]

5511.1-3 Use of timber on lands covered by grazing leases, by lessees, and others.

5511.2 Act of 1898 (Alaska).

5511.2-1 Free use privilege; cutting by agent.

5511.2-2 Free use of timber for Government purposes.

5511.2-3 Permits.

5511.2-4 Timber on withdrawn lands.

5511.3 Act of 1947.

5511.3-1 Free use of timber under other statutes.

5511.3-2 Permits.

### Subpart 5510—Free Use of Timber; General

#### §5510.0-3 Authority.

(a) *Nonsale disposals Act of June 3, 1878.* (1) Authority for free use of timber on mineral and nonmineral public lands. Section 5511 is issued under authority of the Act of June 3, 1878 (20 Stat. 88; 16 U.S.C. 604 through 606) and March 3, 1891 (26 Stat. 1093; 16 U.S.C. 607), as supplemented by the Act of January 11, 1921 (41 Stat. 1088; 16 U.S.C. 604, 612), settlers upon public lands, citizens and *bona fide* residents of the State, and corporations doing business in the State may obtain free use permit for timber.

(2) Authority for the issuance of regulations governing the free use of timber for fuel in drilling operations by oil and gas lessees is contained in section 32 of the Act of February 25, 1920 (41 Stat. 405; 30 U.S.C. 189).

CROSS REFERENCE: For additional free use privileges, see §5511.3.

(b) *Nonsale disposals Act of July 23, 1955.* The Act of July 23, 1955, *supra*, authorizes the Secretary of the Interior in his discretion to permit free use of timber or other vegetative resources or mineral materials by any Federal or State governmental agency, unit or subdivision, including municipalities, or any association or corporation not organized for profit for use other than for commercial or industrial purposes or resale. The Act of July 23, 1955, *supra*, also provides in part, under certain circumstances, for a mining claimant to obtain free-use of timber from other Bureau administered land

in lieu of timber disposed of by the Bureau from lands covered by his mining locations. See §5511.3-8.

(c) *Nonsale disposals Act of May 14, 1898.* Section 5511.2 is issued under the authority of section 11, 30 Stat. 414, as amended; 48 U.S.C. 423. Section 5511.2 appears at 19 FR 8880, Dec. 23, 1954. (1) Section 11 of the Act of May 14, 1898 (30 Stat. 414; 48 U.S.C. 423), empowers the Secretary of the Interior to permit the use of timber found upon the public lands in Alaska by actual settlers residents, individual miners, and prospectors for minerals for firewood, fencing, buildings, mining, prospecting, and for domestic purposes as may actually be needed by such persons for such purposes. This section was amended by the Act of June 15, 1938 (52 Stat. 699), so as to permit the use of such timber by churches, hospitals, and charitable institutions for firewood, fencing, buildings, and for other domestic purposes.

### Subpart 5511—Free Use Regulations

#### §5511.1 Act of 1878.

##### §5511.1-1 Free use of timber on mineral and nonmineral public lands.

(a) *Lands on which timber may be cut.* Free-use permits to cut timber may be issued covering public lands as follows:

(1) Mineral lands, unoccupied and unreserved and not subject to entry under existing laws of the United States, except for mineral entry, in the States of Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, North Dakota, South Dakota, Utah, and Wyoming. (Act of June 3, 1878, 20 Stat. 88; 16 U.S.C. 604 through 606);

(2) Nonmineral, unoccupied, and unreserved public lands in the States mentioned and also in the States of California, Oregon, and Washington.

(b) *Kind of timber which may be cut.* The proper protection of the timber and undergrowth necessarily varies with the nature of the topography, soil, and forest. No timber not matured may be cut, and each tree taken must be utilized for some beneficial domestic purpose. Persons taking timber for specific purposes will be required to take only such matured trees as will work

up to such purpose without unreasonable waste. Stumps will be cut so as to cause the least possible waste and all trees will be utilized to as low a diameter in the tops as possible. All brush, tops, logs, and other forest debris made in felling and removing timber under this section shall be disposed of as best adapted to the protection of the remaining growth and in such manner as shall be prescribed by the authorized officer, and failure on the part of the applicant, or an agent cutting for an applicant, to comply with this requirement will render him liable for all expenses incurred by the authorized officer in putting this regulation into effect.

(c) *Area of land to be cut over.* The permits shall limit the area of cutting to embrace only so much land as is necessary to produce the quantity of timber applied for.

(d) *Use which may be made of timber.* Timber may be cut under approved permit when actually needed for firewood, fencing, building, or other agricultural, mining, manufacturing, and domestic purposes.

(e) *Exportation of timber.* Timber may not be exported from the State in which it is cut except:

(1) Timber from a specified area in Wyoming may be exported into Idaho (Act of July 1, 1898, 30 Stat. 618; 16 U.S.C. 607, 611);

(2) Timber from a specified area in Montana may be exported into Wyoming (Act of March 3, 1901, 31 Stat. 1439; 16 U.S.C. 607, 613);

(3) Under the Act of March 3, 1919 (40 Stat. 1321; 16 U.S.C. 608), citizens of Malheur County, Oregon, may cut timber in Idaho and remove such timber to Malheur County, Oregon;

(4) Under the Act of March 3, 1919 (40 Stat. 1322; 16 U.S.C. 609), citizens of Modoc County, California, may cut timber in Nevada and remove such timber to Modoc County, California;

(5) Timber from a specified area in Arizona may be exported into Utah (Act of February 27, 1922, 42 Stat. 398; 16 U.S.C. 610);

(6) Citizens of Bear Lake County, Idaho, may cut timber from public lands in Lincoln County, Wyoming, and remove such timber to Bear Lake County, Idaho, but no live standing

timber may be taken without compensation (Act of August 21, 1935, 49 Stat. 665; 16 U.S.C. 611a).

(f) *Application and permit*—(1) *Information to be furnished by applicant.* (i) Applications should be filed in duplicate and should set forth the names and post-office addresses of the applicants, and any agent or agents who may be employed to procure the timber. Where a corporation is the applicant, the State in which it was incorporated should also be shown.

(ii) Blank forms for making application may be procured from the State Director for the State in which the timber to be removed is located.

(iii) Applications should show the amount of timber required by each applicant; the use to be made thereof; a description of the land from which the timber is to be cut, by subdivision, section, township, and range, if surveyed, or by natural objects sufficient to identify the same if unsurveyed; and the date it is desired to begin cutting.

(2) *Duration of permit.* All rights and privileges under a permit shall terminate at the expiration of the period of 1 year from the date of approval of the permit.

(g) *Agents*—(1) *Cutting of timber by agents.* Where one or more persons desire timber, and are not in a position to procure the same for themselves, an agent or agents may be appointed for that purpose. Such agent shall not be paid more than a fair recompense for the time, labor, and money expended in procuring the timber and manufacturing the same into lumber, and no charge shall be made for the timber itself. The said compensation must be set forth in a written contract to be entered into by the parties, and a copy thereof must be filed with the application.

(2) *Cutting of timber by agent who is a sawmill operator.* If the amount of timber applied for exceeds \$50 in stumpage value, for any continuous period of 12 months, and the timber is to be procured by an agent who is a sawmill operator, a bond equal to three times the amount of the stumpage value of the timber applied for will be required,

## Bureau of Land Management, Interior

## §5511.2-3

conditioned upon the faithful performance of the requirements.

[35 FR 9790, June 13, 1970, as amended at 60 FR 50450, Sept. 29, 1995]

### §5511.1-2 [Reserved]

### §5511.1-3 Use of timber on lands covered by grazing leases, by lessees, and others.

(a) Before taking timber under a lease issued under section 15 of the Taylor Grazing Act, as amended by the Act of June 26, 1936 (49 Stat. 1978; 43 U.S.C. 315m), the lessee should file application for and procure a permit in accordance with the regulations issued under the Acts of June 3, 1878 (20 Stat. 88; 16 U.S.C. 604 through 606), and March 3, 1891 (26 Stat. 1093; 16 U.S.C. 607), §§5510.0-3(a) and 5511.1-1(a) to 5511.1-1(g).

(b) Where application is made by a person other than the lessee to take timber from lands embraced in a grazing lease issued under section 15 of the said Act, investigation should be made to ascertain the facts in the case and whether or not the cutting of the timber applied for would adversely affect the lands for grazing purposes. If no objection appears, the permit may issue but should contain a provision that the timber cutting thereunder must be done in such manner as will not interfere with the rights of the lessee.

(c) All applications for timber should be filed with the State Director for the State in which the timber to be cut is located and should comply with the regulations contained in §5511.1-1.

(Sec. 1, 20 Stat. 88, as amended, 26 Stat. 1003, as amended; 16 U.S.C. 604, 607)

### §5511.2 Act of 1898 (Alaska).

### §5511.2-1 Free use privilege; cutting by agent.

Free use permits will not be issued where the applicant owns or controls lands having an adequate supply of timber to meet his needs.

[35 FR 9790, June 13, 1970, as amended at 60 FR 50451, Sept. 29, 1995; 62 FR 51377, Oct. 1, 1997]

### §5511.2-2 Free use of timber for Government purposes.

Persons contracting with Government officials to furnish firewood or timber for United States Army posts or for other authorized Government purposes may procure it from the vacant and unreserved public lands in Alaska free of charge, provided the contracts do not include any charge for the value of the firewood or timber. Where it is desired to procure timber for such use, an application for permit in duplicate on a form approved by the Director must be filed, as in other cases, and a copy of the contract must be attached to the application.

### §5511.2-3 Permits.

(a) *Application for permit.* Before timber is cut for free use, an application for permit in duplicate on a form approved by the Director must be filed in an office or with an employee of the Bureau of Land Management in Alaska.

(b) *Issuance and cancellation of permit; removal of timber; bond.* (1) A permit may be issued and shall incorporate the provisions, if any, governing the selection, removal, and use of the materials. One copy of the official form shall be returned to the applicant showing the approval or rejection of such application.

(2) The authorized officer may cancel a permit if the permittee fails to observe its terms and conditions, or the regulations in §§5511.2-1 to 5511.2-6, or if the permit has been issued erroneously.

(3) No timber shall be removed until the permit is issued. If deemed necessary by the signing officer, a bond, satisfactory to him, may be required as a guarantee of faithful performance of the provisions of the permit and the regulations in §§5511.2-1 to 5511.2-6.

(c) *Cutting rules and restrictions.* All free-use timber shall be cut and removed in accordance with approved forestry and conservation practices so as to preserve to the maximum extent feasible all scenic, recreational, watershed, and other values of the land and resources. In the free-use disposal of timber, the cutting and removal shall be accomplished in such manner as to

leave the stand in condition for continuous production. Moreover, no green timber shall be cut within 300 feet of either side of the center line of a highway or public road, or bordering streams or the shores of lakes designated for recreational use unless specifically authorized by the authorized officer, to prevent or control fungus infection or insect attacks, or for other reasons found sufficient to justify such cutting.

(d) *Amount of timber which may be cut.* During each calendar year each applicant entitled to the benefits of section 11 of the Act of May 14, 1898, may take a total of 100,000 feet board measure or 200 cords in saw logs, piling, cordwood, or other timber. This amount may be taken in whole in any one of such classes of timber or in part of one kind and in part of another kind or other kinds. Where a cord is the unit of measure, it shall be estimated in relation with saw timber in the ratio of 500 feet board measure to the cord. Permits to take timber in excess of the amount stated may be granted to churches, hospitals, and charitable institutions upon a showing of special necessity therefor, and with the approval of the authorized officer.

(e) *Notice of completion of timber cutting operations.* Upon completion of the cutting and the removal of the timber, the permittee must notify the State Director, or other forest officer, stating when the work was completed, the land from which the timber was taken, the amount and kind of timber which was cut and removed, and the use to which the timber was put.

(f) *Termination of permit; extensions.* Permits shall be granted for periods not to exceed one year and shall terminate on the expiration dates shown therein unless extended by the signing officer.

**§ 5511.2-4 Timber on withdrawn lands.**

Sections 5511.2-1 to 5511.2-5 are inapplicable to timber on withdrawn areas unless the order of withdrawal so permits.

[35 FR 9790, June 13, 1970, as amended at 60 FR 50451, Sept. 29, 1995]

**§ 5511.3 Act of 1947.**

**§ 5511.3-1 Free use of timber under other statutes.**

Free use will be allowed under the following circumstances:

(a) In certain States by settlers on public lands, citizens and *bona fide* residents of the State, and corporations doing business in the State (§ 5511.1), and

(b) In Alaska by actual settlers, residents, individual miners, prospectors for minerals, churches, hospitals and charitable institutions (§ 5511.2).

(c) Free-use of timber by Governmental units, nonprofit organizations, and certain mining claimants may be authorized under the act and these regulations only when such applicants cannot qualify under the provisions of §§ 5511.1 to 5511.1-4 and § 5511.2.

**§ 5511.3-2 Permits.**

(a) *Application for permit.* An application for permit in duplicate, must be made on a form approved by the Director and filed in any office or with any employee of the Bureau of Land Management authorized to issue a permit. A free-use permit may be applied for without formal application for the removal of not more than three Christmas trees upon oral or written request.

(b) *Issuance and cancellation of free-use permits; bond.* (1) A free-use permit, on a form approved by the Director, shall incorporate the provisions, if any, governing the selection, removal, and use of timber. Free-use permits shall not be issued when the applicant owns or controls an adequate supply of the material to meet his needs. Timber applied for must be for the applicant's own use and may not be bartered or sold. No timber may be cut or removed until the permit is issued.

(2) The authorized officer may cancel a permit if the permittee fails to observe its terms and conditions or the regulations, or if the permit has been issued erroneously.

(3) A bond satisfactory to the authorized officer may be required as a guarantee of faithful performance of the provisions of the permit and applicable regulations.

(4) A free-use permit issued under this part may not be assigned.

(c) *Duration, extension, and termination of permit.* (1) Permits shall be granted for periods not to exceed 6 months and shall terminate on the expiration dates shown therein unless extended by the authorized officer. An extension not to exceed 3 months may be granted by the authorized officer. The permittee must notify the officer-in-charge upon the completion of removal.

(2) Permits issued for the benefit of a mining claimant under authority of the act shall terminate upon transfer of the ownership of the claim by any means. Reapplication must be made by the new claimants.

#### §5511.3-3 Conservation practices.

All free-use timber disposed of under the act shall be severed, or removed in accordance with sound forestry and conservation practices so as to preserve to the maximum extent feasible all scenic, recreational, watershed and other values of the land and resources. In the free-use disposal of timber, cutting and removal shall be accomplished in such a manner as to leave the stand in condition for continuous production.

#### §5511.3-4 Removal by agent.

A free-use permittee may procure the timber by agent. Such agent shall not, however, be paid more than fair compensation for the time, labor and money expended in procuring timber and processing it, and no charge shall be made by such agent for the timber itself. No part of the timber may be used in payment for services in obtaining it or processing it.

#### §5511.3-5 Removal of improvements.

Upon expiration of the permit period the permittee will be given 90 days to remove equipment, personal property and any improvements he has placed on the land, except roads, culverts and bridges are to be left in place, in good condition and will become the property of the United States upon expiration of the 90-day removal period.

#### §5511.3-6 Permits to governmental units.

A free-use permit may be issued to a Federal or State agency, unit, or subdivision, including a municipality,

only if the applicant makes a satisfactory showing to the authorized officer that such timber will be used for a public project. The right to remove timber under the permit is not revoked or terminated by (a) any subsequent claim or entry of the lands, (b) by any mining claim located prior to the issuance of the permit if such location was subsequent to July 23, 1955, nor (c) by any other mining claim as to which the Government's right to manage the surface resources has been established in accordance with Group 3800 of this chapter, or other proceedings.

#### §5511.3-7 Permits to nonprofit organizations.

A free-use permit issued to a nonprofit association or corporation may not provide for the disposition of more than \$100 worth of timber to the permittee during any one calendar year. Such permittee is granted a right to remove timber as against a subsequent applicant who may wish to obtain the same timber by purchase. The timber may not be removed by the permittee after the land has been included in a valid claim by reason of settlement, entry, or similar rights obtained under the public land laws.

#### §5511.3-8 Permits to mining claimants.

(a) Free-use timber shall be granted under §5510.0-3(b) to the record owner of a valid mining claim if such claim was located subsequent to July 23, 1955, or if the Government's right to manage the surface resources has been established in accordance with Group 3400 of this chapter, and he requires more timber than is available to him for prospecting, mining, or processing operations on his claim or claims after disposition of timber from his claim by the United States. The claimant shall be entitled to the free use of timber for such requirements from the nearest timber administered by the Bureau which is substantially equal in kind and quantity to the timber estimated by the authorized officer at the time of application to have been disposed of by the Bureau from the claim. Upon issuance of a patent to the mining claims, the free-use privilege will automatically terminate.

#### § 5511.4

(b) The application required to be filed for free-use timber under this section must contain a statement that the timber applied for will be used for *bona fide* prospecting, mining, or prospecting operations on the claim or group of claims designated in the application. The applicant must also include a statement that he is the record owner of a valid mining claim or claims from which the timber was originally removed by the Government.

#### § 5511.4 Prohibited acts.

(a) In addition to the prohibited acts listed in § 5462.2, the acts or omissions listed in paragraph (b) will render the person(s) responsible liable to the United States in a civil action for trespass and such persons may be prosecuted criminally.

(b) The following acts are prohibited:

(1) Obtaining any free use permit or taking any timber, trees, or other vegetative resources through falsifying, concealing, or covering up by any trick, scheme, or device a material fact, or making any false, fictitious, or fraudulent statements or representations, or making or using any false, fictitious or fraudulent statement or entry, including altering of any free use permit or using a reproduction of any official load tags.

(2) [Reserved]

(3) Violating any of the terms and conditions of a free use permit.

#### 43 CFR Ch. II (10–1–08 Edition)

(4) Exporting timber cut under a free use permit from the State in which it was cut, except as provided in § 5511.1–1(e).

(5) The cutting of timber under a free use permit for sale, barter, speculation, or use by others than the permittee.

[60 FR 50451, Sept. 29, 1995, as amended at 62 FR 51377, Oct. 1, 1997]

#### § 5511.5 Penalties.

Under section 303(a) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1733(a), any individual who knowingly and willfully commits the prohibited acts under § 5511.4(b) is subject to arrest and trial by the United States Magistrate and, if convicted, shall be subject to a fine of not more than \$100,000, or not more than \$250,000 if commission of the prohibited acts results in death, in accordance with the applicable provisions of the Sentencing Reform Act of 1984 (18 U.S.C. 3551 *et. seq.*), or imprisonment not to exceed 12 months, or both, for each offense, and any organization that commits these prohibited acts is subject to arrest and trial by the United States Magistrate and, if convicted, shall be subject to a fine of not more than \$200,000, or not more than \$500,000 if commission of the prohibited acts results in death.

[60 FR 50451, Sept. 29, 1995]

## SUBCHAPTER F—PRESERVATION AND CONSERVATION (6000)

### PART 6300—MANAGEMENT OF DESIGNATED WILDERNESS AREAS

#### Subpart 6301—Introduction

Sec.

- 6301.1 Purpose.
- 6301.3 What is a BLM wilderness area?
- 6301.5 Definitions.

#### Subpart 6302—Use of Wilderness Areas, Prohibited Acts, and Penalties

##### USE OF WILDERNESS AREAS

- 6302.10 Use of wilderness areas.
- 6302.11 How may I use wilderness areas?
- 6302.12 When do I need an authorization and to pay a fee to use a wilderness area?
- 6302.13 Where do I obtain an authorization to use a wilderness area?
- 6302.14 What authorization do I need to climb in BLM wilderness?
- 6302.15 When and how may I collect or disturb natural resources such as rocks and plants in wilderness areas?
- 6302.16 When and how may I gather scientific information about resources in BLM wilderness?
- 6302.17 When may I use a wheelchair in BLM wilderness?
- 6302.18 How may American Indians use wilderness areas for traditional religious purposes?
- 6302.19 When may BLM close or restrict use of wilderness areas?

##### PROHIBITED ACTS

- 6302.20 What is prohibited in wilderness?

##### PENALTIES

- 6302.30 What penalties apply if I commit one or more of the prohibited acts?

#### Subpart 6303—Administrative and Emergency Functions

- 6303.1 How does BLM carry out administrative and emergency functions?

#### Subpart 6304—Uses Addressed in Special Provisions of the Wilderness Act

##### MINING UNDER THE GENERAL MINING LAWS

- 6304.10 Mining law administration.
- 6304.11 What special provisions apply to operations under the mining laws?
- 6304.12 How will BLM determine the validity of unpatented mining claims or sites?

##### OTHER USES SPECIFICALLY ADDRESSED BY THE WILDERNESS ACT

- 6304.20 Other uses addressed in special provisions of the Wilderness Act.
- 6304.21 What special provisions cover aircraft and motorboat use?
- 6304.22 What special provisions apply to control of fire, insects, and diseases?
- 6304.23 What special provisions apply to mineral leasing and material sales?
- 6304.24 What special provisions apply to water and power resources?

AUTHORITY: 16 U.S.C. 1131 *et seq.*; 43 U.S.C. 1733, 1740, 1782.

SOURCE: 65 FR 78372, Dec. 14, 2000, unless otherwise noted.

#### Subpart 6301—Introduction

##### § 6301.1 Purpose.

This part governs the management of BLM wilderness areas outside of Alaska. It tells you what wilderness areas are, how BLM manages them, and how you can use them. These regulations also tell you what activities BLM does not allow in wilderness areas, the penalties for performing prohibited acts, and the special provisions for some uses and access that the Wilderness Act explicitly allows.

### § 6301.3

### 43 CFR Ch. II (10–1–08 Edition)

#### § 6301.3 What is a BLM wilderness area?

A BLM wilderness area is an area of public lands that Congress has designated for BLM to manage as a component of the National Wilderness Preservation System in accordance with the Wilderness Act of 1964. The Wilderness Act provides a detailed definition of wilderness that applies to BLM wilderness areas. See 16 U.S.C. 1131(c) and 43 U.S.C. 1702(i).

#### § 6301.5 Definitions.

Terms used in this part have the following meanings:

*Access* means the physical ability of property owners and their successors in interest to have ingress to and egress from State or private inholdings, valid mining claims, or other valid occupancies. It does not include rights-of-way or permits under section 501 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1761) (FLPMA) or parts 2800 and 2880 of this chapter.

*Inholding* means State-owned or privately owned land that is completely surrounded by Congressionally designated wilderness.

*Mechanical transport* means any vehicle, device, or contrivance for moving people or material in or over land, water, snow, or air that has moving parts. This includes, but is not limited to, sailboats, sailboards, hang gliders, parachutes, bicycles, game carriers, carts, and wagons. The term does not include wheelchairs, nor does it include horses or other pack stock, skis, snowshoes, non-motorized river craft including, but not limited to, drift boats, rafts, and canoes, or sleds, travois, or similar devices without moving parts.

*Mining operations* is defined in subpart 3715 of this chapter.

*Motor vehicle* means any vehicle that is self-propelled.

*Motorized equipment* means any machine that uses or is activated by a motor, engine, or other power source. This includes, but is not limited to, chainsaws, power drills, aircraft, generators, motorboats, motor vehicles, snowmobiles, tracked snow vehicles, snow blowers or other snow removal equipment, and all other snow machines. The term does not include shavers, wrist watches, clocks, flashlights,

cameras, camping stoves, cellular telephones, radio transceivers, radio transponders, radio signal transmitters, ground position satellite receivers, or other similar small hand held or portable equipment.

*Primitive and unconfined recreation* means non-motorized types of outdoor recreation activities that do not require developed facilities or mechanical transport.

*Public lands* means any lands and interests in lands owned by the United States and administered by the Secretary of the Interior through BLM without regard to how the United States acquired ownership.

*Valid occupancy* means an occupancy under a current permit, lease, or other written authorization from BLM to occupy public lands. For a definition of occupancy related to development of locatable minerals, see subpart 3715 of this chapter.

*Wheelchair* means a device that is designed solely for use by a mobility-impaired person for locomotion, and that is suitable for use in an indoor pedestrian area.

### Subpart 6302—Use of Wilderness Areas, Prohibited Acts, and Penalties

#### USE OF WILDERNESS AREAS

#### § 6302.10 Use of wilderness areas.

#### § 6302.11 How may I use wilderness areas?

Unless otherwise provided by BLM, the Wilderness Act, or the Act of Congress designating the area as wilderness, all wilderness areas will be open to uses consistent with the preservation of their wilderness character and their future use and enjoyment as wilderness. In subpart 6304 you will find provisions implementing the special provisions of the Wilderness Act that allow specific uses of wilderness areas. In § 6302.20 you will find a list of acts that are explicitly prohibited within wilderness areas.

## Bureau of Land Management, Interior

## § 6302.18

### **§ 6302.12 When do I need an authorization and to pay a fee to use a wilderness area?**

(a) In general, you do not need an authorization to use wilderness areas.

(b) BLM may require an authorization and charge fees for some uses of wilderness areas. You must obtain authorization from BLM and pay fees to use a wilderness area when required by:

(1) The regulations in this part (see § 6302.15 on collecting natural resource materials, § 6302.16 on gathering scientific information, and subpart 6305 on access to inholdings and valid occupancies);

(2) Regulations in this chapter II—Bureau of Land Management, Department of the Interior—governing the specific activities in which you are engaged;

(3) The management plan for the wilderness area; or

(4) A BLM closure or restriction under § 6302.19 of this part.

(c) To determine whether you need an authorization under paragraph (b)(2) of this section, you should refer to the applicable BLM regulations for your particular activity.

### **§ 6302.13 Where do I obtain an authorization to use a wilderness area?**

You may request an authorization to use a wilderness area from the BLM field office with jurisdiction over the wilderness area you want to use.

### **§ 6302.14 What authorization do I need to climb in BLM wilderness?**

(a) You do not need a permit or other authorization to climb in BLM wilderness.

(b) [Reserved]

(c) You must not use power drills for climbing. See § 6302.20(d).

### **§ 6302.15 When and how may I collect or disturb natural resources such as rocks and plants in wilderness areas?**

(a) You may remove or disturb natural resources for non-commercial purposes in wilderness areas, including prospecting, provided—

(1) You do it in a manner that preserves the wilderness environment, using no more than non-motorized

hand tools and causing minimal surface disturbance; and

(2)(i) Your proposed activity conforms to the applicable management plan; or

(ii) You have a BLM authorization if one is required by statute or regulation.

(b) Where BLM allows campfires in a wilderness, you may gather a reasonable amount of wood for use in your campfire.

### **§ 6302.16 When and how may I gather scientific information about resources in BLM wilderness?**

(a) You may conduct research, including gathering information and collecting natural or cultural resources in wilderness areas, using methods that may cause greater impacts on the wilderness environment than allowed under § 6302.15(a), if—

(1) Similar research opportunities are not reasonably available outside wilderness;

(2) You carry out your proposed activity in a manner compatible with the preservation of the wilderness environment and conforming to the applicable management plan;

(3) Any ground disturbance or removal of material is the minimum necessary for the scientific purposes of the research; and

(4) You have an authorization from BLM.

(b) You must reclaim disturbed areas, and BLM may require you to post a bond.

### **§ 6302.17 When may I use a wheelchair in BLM wilderness?**

If you have a disability that requires the use of a wheelchair, you may use a wheelchair in a wilderness. Consistent with the Wilderness Act and the Americans with Disabilities Act of 1990 (42 U.S.C. 12207), BLM is not required to facilitate such use by building any facilities or modifying any conditions of lands within a wilderness area.

### **§ 6302.18 How may American Indians use wilderness areas for traditional religious purposes?**

In accordance with the American Indian Religious Freedom Act (42 U.S.C. 1996), American Indians may use wilderness areas for traditional religious

## § 6302.19

purposes, subject to the provisions of the Wilderness Act, the prohibitions in § 6302.20, and other applicable law.

### § 6302.19 When may BLM close or restrict use of wilderness areas?

When necessary to carry out the provisions of the Wilderness Act and other Federal laws, BLM may close or restrict the use of lands or waters within the boundaries of a BLM wilderness area, using the procedures in § 8364.1 of this chapter. BLM will limit any such closure to affect the smallest area necessary for the shortest time necessary.

#### PROHIBITED ACTS

### § 6302.20 What is prohibited in wilderness?

Except as specifically provided in the Wilderness Act, the individual statutes designating the particular BLM wilderness area, or the regulations of this part, and subject to valid existing rights, in BLM wilderness areas you must not:

- (a) Operate a commercial enterprise;
- (b) Build temporary or permanent roads;
- (c) Build aircraft landing strips, heliports, or helispots;
- (d) Use motorized equipment; or motor vehicles, motorboats, or other forms of mechanical transport;
- (e) Land aircraft, or drop or pick up any material, supplies or person by means of aircraft, including a helicopter, hang-glider, hot air balloon, parasail, or parachute;
- (f) Build, install, or erect structures or installations, including transmission lines, motels, vacation homes, sheds, stores, resorts, organization camps, hunting and fishing lodges, electronic installations, and similar structures, other than tents, tarpaulins, temporary corrals, and similar devices for overnight camping;
- (g) Cut trees;
- (h) Enter or use wilderness areas without authorization, where BLM requires authorization under § 6302.12;
- (i) Engage or participate in competitive use as defined in section 2932.5 of this chapter, including those activities involving physical endurance of a person or animal, foot races, water craft races, survival exercises, war games, or other similar exercises;

## 43 CFR Ch. II (10–1–08 Edition)

- (j) [Reserved]; or
- (k) Violate any BLM regulation, authorization, or order.

[65 FR 78372, Dec. 14, 2000, as amended at 67 FR 61745, Oct. 1, 2002]

#### PENALTIES

### § 6302.30 What penalties apply if I commit one or more of the prohibited acts?

(a) If you commit a prohibited act listed in § 6302.20 in a BLM wilderness area, you are subject to criminal prosecution on each offense. If convicted, you may be fined not more than \$100,000 under 18 U.S.C. 3571. In addition, you may be imprisoned for not more than 12 months, as provided for by 43 U.S.C. 1733(a).

(b) At the request of the Secretary of the Interior, the United States Attorney General may institute a civil action in any United States district court for an injunction or other appropriate order to prevent you from using public lands in violation of the regulations of this part.

## Subpart 6303—Administrative and Emergency Functions.

### § 6303.1 How does BLM carry out administrative and emergency functions?

As necessary to meet minimum requirements for the administration of the wilderness area, BLM may:

- (a) Use, build, or install temporary roads, motor vehicles, motorized equipment, mechanical transport, structures or installations, and land aircraft, in designated wilderness;
- (b) Prescribe conditions under which other Federal, State, or local agencies or their agents may use, build, or install such items to meet the minimum requirements for protection and administration of the wilderness area, its resources and users;
- (c) Authorize officers, employees, agencies, or agents of the Federal, State, and local governments to occupy and use wilderness areas to carry out the purposes of the Wilderness Act or other Federal statutes; and
- (d) Prescribe measures that may be used in emergencies involving the health and safety of persons in the

area, including, but not limited to, the conditions for use of motorized equipment, mechanical transport, aircraft, installations, structures, rock drills, and fixed anchors. BLM will require any restoration activities that we find necessary to be undertaken concurrently with the emergency activities or as soon as practicable when the emergency ends.

### **Subpart 6304—Uses Addressed in Special Provisions of the Wilderness Act**

#### **MINING UNDER THE GENERAL MINING LAWS**

#### **§ 6304.10 Mining law administration.**

#### **§ 6304.11 What special provisions apply to operations under the mining laws?**

The general mining laws apply to valid existing mining claims and mill sites within BLM wilderness, except as provided in this section.

(a) After the date on which the general mining laws cease to apply to a specific wilderness area—

(1) You cannot locate a mining claim or establish any right to or interest in any mineral deposits discovered in that wilderness area; and

(2) You cannot locate a mill site in that wilderness area.

(b) If you hold a valid existing mining claim or mill site within a wilderness area—

(1) You must conduct any mining operations following the applicable standards provided in—

(i) The Wilderness Act;

(ii) The legislation designating the wilderness;

(iii) Your approved plan of operations;

(iv) Subpart 3809 of this chapter; and

(v) Subpart 3715 of this chapter;

(2) You must minimize impairment of wilderness characteristics to the extent BLM determines practicable, consistent with the use of a valid claim or site for mineral activities; and

(3) Your temporary structures used in mining operations are subject to the use and occupancy regulations in subpart 3715 of this chapter.

(4) You must post a financial guarantee under subpart 3809 of this chapter in order to ensure completion of reclamation.

(c) If you hold a valid mining claim, mill site, or tunnel site located in any BLM wilderness area before the general mining laws ceased to apply to that area, you may maintain your mining claim or site, so long as you comply with the general mining laws, the regulations in part 3830 of this chapter, and the Act of Congress designating the wilderness.

(d) As required in your approved plan of operations, when you complete mining operations in a wilderness area—

(1) You must remove all structures, equipment, and other facilities and begin reclamation as soon as feasible after mining operations end. However, you must start reclamation no later than 18 months after mining operations end.

(2) You must restore the surface as near as practicable to the appearance and contour of the surface before mining operations began, following the regulations in subpart 3809 of this chapter.

(e)–(f) [Reserved]

#### **§ 6304.12 How will BLM determine the validity of unpatented mining claims or sites?**

(a) BLM will conduct a mineral examination to determine whether your claim or site was valid as of the date that lands within the wilderness area were withdrawn from appropriation under the mining laws. We also will determine whether your claim or site remains valid at the time of the examination.

(1) If you do not have an approved plan of operations, BLM must complete this validity determination before approving your plan of operations.

(2) If you have a plan of operations that was approved before the wilderness designation, BLM will determine whether operations may begin or continue while we conduct the validity determination.

(b) If BLM concludes that your mining claim lacks a discovery of a valuable mineral deposit or your claim or site is invalid for any other reason, we will disapprove your application for a

## **§ 6304.20**

plan of operations. For an existing approved operation, BLM may issue a notice ordering suspension or cessation of operations. We will begin contest proceedings to determine the validity of your mining claim or site under subpart E of part 4 of this title. However, you may take samples and gather other evidence to confirm or corroborate mineral exposures that were physically disclosed on the claim before the date the wilderness area was withdrawn.

(c) If the Department of the Interior issues a final administrative decision declaring your claim or site null and void, you must cease all operations and complete all reclamation required under subpart 3809 of this chapter and § 6304.11(d) of this part.

### **OTHER USES SPECIFICALLY ADDRESSED BY THE WILDERNESS ACT**

## **§ 6304.20 Other uses addressed in special provisions of the Wilderness Act.**

### **§ 6304.21 What special provisions cover aircraft and motorboat use?**

(a) Subject to such restrictions as BLM determines necessary to protect wilderness values, we may authorize you to land aircraft and use motorboats at places within any wilderness area if these uses were established and active at the time Congress designated the area as wilderness.

(b) BLM may also authorize you to maintain, utilizing non-motorized means, aircraft landing strips, heliports or helispots that existed and were in active use when Congress designated the area as wilderness.

### **§ 6304.22 What special provisions apply to control of fire, insects, and diseases?**

BLM may prescribe measures to control fire, noxious weeds, non-native invasive plants, insects, and diseases. BLM may require restoration concurrent with or as soon as practicable upon completion of such measures.

### **§ 6304.23 What special provisions apply to mineral leasing and material sales?**

(a) After Congress designates any area of public lands as wilderness, BLM

## **43 CFR Ch. II (10–1–08 Edition)**

will not issue mineral or geothermal leases, licenses, or permits under the mineral or geothermal leasing laws, or sales contracts or free use permits under the Materials Act (30 U.S.C. 601 *et seq.*)

(b) You may continue to hold and operate mineral or geothermal leases, licenses, contracts, or permits under their original terms and conditions after Congress designates the affected BLM lands as wilderness.

### **§ 6304.24 What special provisions apply to water and power resources?**

If the President specifically authorizes you under 16 U.S.C. 1133(d)(4)(I), BLM will permit you to prospect for water resources and establish new reservoirs, water-conservation works, power projects, transmission lines, and other facilities needed in the public interest, and to maintain such facilities.

### **§ 6304.25 What special provisions apply to livestock grazing?**

(a) If you hold a BLM grazing permit or grazing lease for land within a wilderness area, you may continue to graze your livestock provided that you or your predecessors began such use under a permit or lease before Congress established the wilderness area.

(b) Your grazing activities within wilderness areas, including the construction, use, and maintenance of livestock management improvements, must comply with the livestock grazing regulations in part 4100 of this chapter.

(c) If the management plan for the area allows, you may maintain or reconstruct grazing support facilities that existed before designation of the wilderness area. BLM will not authorize new support facilities for the purpose of increasing your number of livestock. The construction of new livestock management facilities must be for the purposes of protection and improved management of wilderness resources.

(d) BLM may authorize an increase in livestock numbers only if you demonstrate that the additional use will not have an adverse impact on wilderness values.

### Subpart 6305—Access to State and Private Lands Or Valid Occupancies Within Wilderness Areas

#### ACCESS TO NON-FEDERAL INHOLDINGS

##### § 6305.10 How will BLM allow access to State and private land within wilderness areas?

(a) If you own land completely surrounded by wilderness, BLM will only approve that combination of routes and modes of travel to your land that—

(1) BLM finds existed on the date Congress designated the area surrounding the inholding as wilderness, and

(2) BLM determines will serve the reasonable purposes for which the non-Federal lands are held or used and cause the least impact on wilderness character.

(b) If you own land completely surrounded by wilderness, and no routes or modes of travel to your land existed on the date Congress designated the area surrounding the inholding as wilderness, BLM will only approve that combination of routes and non-motorized modes of travel to non-Federal inholdings that BLM determines will serve the reasonable purposes for which the non-Federal lands are held or used and cause the least impact on wilderness character.

(c) If BLM approves your access route under paragraph (a) or (b) of this section, we will authorize it under part 2920 of this chapter.

(d) BLM will not allow construction of new access routes to State and private inholdings in wilderness.

(e) BLM will not allow improvement of access routes to a condition more highly developed than that which existed on the date Congress designated the area as wilderness, except such improvements BLM determines are necessary to protect wilderness resources from degradation.

(f) If you own land completely surrounded by wilderness and you have a valid existing right of access which is greater than the access described in paragraph (a) or (b) of this section, BLM may manage such access to protect wilderness resources while ensur-

ing your reasonable use and enjoyment of the inholding.

##### § 6305.11 What alternatives to granting access will BLM consider in cases of State and private inholdings?

To reduce or eliminate the need to use wilderness areas for access to State and private land, BLM may—

(a) Accept donation of the inholding, or

(b) Acquire the inholding from the owner by an exchange for federally owned land in the same State of approximately equal value or, if the owner concurs, by purchase.

#### ACCESS TO OTHER VALID OCCUPANCIES

##### § 6305.20 How will BLM allow access to valid mining claims or other valid occupancies within wilderness areas?

If you hold a valid mining claim or other valid occupancy wholly within a wilderness area, BLM will allow you access by means that are consistent with the preservation of the area as wilderness and that have been or are being customarily enjoyed with respect to other mining claims or similar occupancies surrounded by wilderness.

(a) BLM approves plans of operation under subpart 3809 of this chapter. The plan of operation will prescribe the routes of travel that you may use for access to claims or sites surrounded by wilderness. These plans will also identify the mode of travel, and other conditions reasonably necessary to preserve the wilderness area.

(b) BLM issues written authorizations under part 2920 of this chapter. Your authorization will prescribe the routes of travel that you may use for access to occupancies surrounded by wilderness. The authorizations will also identify the mode of travel and other conditions reasonably necessary to minimize adverse impacts on the natural resource values of the wilderness area.

**§ 6305.30**

**43 CFR Ch. II (10–1–08 Edition)**

ACCESS PROCEDURES FOR VALID  
OCCUPANCIES

**§ 6305.30 What are the steps BLM must take in issuing an access authorization to valid occupancies?**

(a) Before issuing an access authorization to mining claims or other valid occupancies wholly surrounded by wilderness, BLM will make certain that:

(1) You have demonstrated a lack of any existing access rights or alternate routes of access available by deed or under applicable State or common law and that access by non-federally owned routes is not reasonably obtainable;

(2) Your combination of routes and modes of travel, including non-motor-

ized modes, will cause the least impact on the wilderness but, at the same time, will permit the reasonable use of the non-Federal land, valid mining claim, or other valid occupancy; and

(3) The location, construction, maintenance, and use of the access route that BLM approves will be as consistent as possible with the management of the wilderness area.

(b) After issuing an access authorization, BLM will make certain that you situate and build the route that BLM approves to minimize adverse impacts on the natural resource values of the wilderness area.

**SUBCHAPTER G (7000) [RESERVED]**

## SUBCHAPTER H—RECREATION PROGRAMS

### Group 8100—Cultural Resource Management [Reserved]

### Group 8200—Natural History Resource Management

#### PART 8200—PROCEDURES

##### Subpart 8200—General

###### § 8200.0-1 Purpose.

This part 8200 provides procedures and practices for the management and use of public lands that have ecological or other natural history values of scientific interest.

##### Subpart 8223—Research Natural Areas

###### § 8223.0-1 Purpose.

The purpose of this part is to provide procedures for the management and protection of public lands having natural characteristics that are unusual or that are of scientific or other special interest.

###### § 8223.0-5 Definitions.

(a) *Research natural area* means an area that is established and maintained for the primary purpose of research and education because the land has one or more of the following characteristics:

(1) A typical representation of a common plant or animal association;

(2) An unusual plant or animal association;

(3) A threatened or endangered plant or animal species;

(4) A typical representation of common geologic, soil, or water features; or

(5) Outstanding or unusual geologic, soil, or water features.

(b) [Reserved]

###### § 8223.0-6 Policy.

Areas established as research natural areas shall be of sufficient number and size to adequately provide for scientific study, research, and demonstration purposes.

###### § 8223.1 Use of research natural areas.

(a) No person shall use, occupy, construct, or maintain facilities in a research natural area except as permitted by law, other Federal regulations, or authorized under provisions of this subpart 8223.

(b) No person shall use, occupy, construct, or maintain facilities in a manner inconsistent with the purpose of the research natural area.

(c) Scientists and educators shall use the area in a manner that is non-destructive and consistent with the purpose of the research natural area.

##### Subpart 8224—Fossil Forest Research Natural Area

AUTHORITY: Sec. 103, San Juan Basin Wilderness Protection Act of 1984 (Pub. L. 98-603, 98 Stat. 3155), the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 *et seq.*), and 18 U.S.C. 641.

SOURCE: 50 FR 42123, Oct. 17, 1985, unless otherwise noted.

## § 8224.0-1

### § 8224.0-1 Purpose.

The purpose of this subpart is to provide procedures for the management and use of the public lands in the Fossil Forest of New Mexico.

### § 8224.0-2 Objectives.

The objectives are management in accordance with the Federal Land Policy and Management Act of 1976 and for protection of the aesthetic, natural, educational, and scientific research values of the Fossil Forest, including paleontological study, excavation and interpretation projects within the Fossil Forest, until Congress determines otherwise.

### § 8224.0-3 Authority.

This subpart is issued under the authority of the San Juan Basin Wilderness Protection Act of 1984 (Pub. L. 98-603, 98 Stat. 3155), the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 *et seq.*), and 18 U.S.C. 641.

### § 8224.0-5 Definitions.

As used in this subpart, the term:

(a) *Authorized officer* means any employee of the Bureau of Land Management designated to perform the duties described in this subpart:

(b) *Fossil* means the remains or trace(s) of an organism or assemblage of organisms which have been preserved by natural processes in the earth's crust. The term does not mean energy minerals, such as coal, oil and gas, oil shale, bitumen, lignite, asphaltum and tar sands, even though they are of biologic origin:

(c) *Fossil Forest* or *Fossil Forest Research Natural Area* means those public lands as described in section 103(a) of the San Juan Basin Wilderness Protection Act of 1984 (Pub. L. 98-603, 98 Stat. 3155).

### § 8224.0-6 Policy.

No activities will be permitted within the Fossil Forest that would significantly disturb the land surface or impair the existing natural, educational, and scientific research values of the area.

## 43 CFR Ch. II (10-1-08 Edition)

### § 8224.1 Use of the Fossil Forest Research Natural Area.

(a) Fossils may be collected, excavated, or removed only under a permit issued under § 2920.2-2 of this title by the Director, New Mexico State Office, Bureau of Land Management, P.O. Box 1449, Santa Fe, NM 87504-1419. Permits shall be issued only to institutions and individuals engaged in research, museum, or educational projects that are approved by the authorized officer and that provide for detailed recordation, reporting, care of specimens, and availability of specimens to other scientists and museums.

(b) Petrified wood shall not be collected and removed from the Fossil Forest either for free use as permitted under § 3622.3 of this title or for commercial sale as permitted under subpart 3602.

(c) The Fossil Forest is closed to motorized use, except as permitted by the authorized officer.

(d) Except as otherwise provided in paragraphs (a), (b), and (c) of this section, the provisions of part 8360 of this title apply to recreational use in the Fossil Forest.

(e) Rights-of-way may be approved only for temporary projects which do not significantly disturb the surface of the land or impair the existing values of the area.

(f) The grazing of livestock where such use was established before October 30, 1984, shall be allowed to continue under the regulations on the grazing of livestock on public lands in part 4100 of this title, so long as it does not disturb the natural, educational, and scientific research values of the Fossil Forest. Grazing permits or leases may be modified under § 4130.6-3 of this title, if necessary to protect these resources.

(g) The lands in Fossil Forest shall not be sold or exchanged except as authorized by section 105(b) of the San Juan Basin Wilderness Protection Act of 1984 (Pub. L. 98-603, 98 Stat. 3157).

(h) The Fossil Forest is closed to the operation of the mining laws and to disposition under the mineral leasing laws and geothermal leasing laws, as of October 30, 1984, subject to valid existing rights.

## Bureau of Land Management, Interior

## § 8340.0-5

(i) Operations on oil and gas leases issued before October 30, 1984, are subject to the applicable provisions of Group 3100 of this title, including those set forth in §3162.5-1, and such other terms, stipulations, and conditions as the authorized officer deems necessary to avoid significant disturbance of the land surface or impairment of the area's existing natural, educational, and scientific research values, including paleontological study, excavation, and interpretation.

(j) The regulations in 43 CFR part 7 apply to the management and protection of archaeological resources in Fossil Forest.

(k) The paleontological resources of the Fossil Forest shall not be willfully destroyed, defaced, damaged, vandalized, or otherwise altered.

[50 FR 42123, Oct. 17, 1985; 67 FR 68778, Nov. 13, 2002]

### § 8224.2 Penalties.

(a) Any person who willfully violates any prohibition under either §8224.1(b), (c) or (k) of this title shall be subject to a fine not to exceed \$1,000 or imprisonment of not to exceed 12 months, or both.

(b) Any person who willfully and without authorization collects or removes paleontological resources whose value is greater than \$100, for which a permit is required under §8224.1(a) or (b) of this title, shall be subject to a fine not to exceed \$10,000, or imprisonment not to exceed 10 years, or both (18 U.S.C. 641).

SOURCE: 44 FR 34836, June 15, 1979, unless otherwise noted.

## Subpart 8340—General

### § 8340.0-1 Purpose.

The purpose of this part is to establish criteria for designating public lands as open, limited or closed to the use of off-road vehicles and for establishing controls governing the use and operation of off-road vehicles in such areas.

### § 8340.0-2 Objectives.

The objectives of these regulations are to protect the resources of the public lands, to promote the safety of all users of those lands, and to minimize conflicts among the various uses of those lands.

### § 8340.0-3 Authority.

The provisions of this part are issued under the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 *et seq.*); the Taylor Grazing Act (43 U.S.C. 315a); the Endangered Species Act (16 U.S.C. 1531 *et seq.*); the Wild and Scenic Rivers Act (16 U.S.C. 1281c); the Act of September 15, 1960, as amended (16 U.S.C. 670 *et seq.*); the Land and Water Conservation Fund Act (16 U.S.C. 4601-6a); the National Trails System Act (16 U.S.C. 1241 *et seq.*) and E.O. 11644 (Use of Off-Road Vehicles on the Public Lands), 37 FR 2877, 3 CFR part 74, 332, as amended by E.O. 11989 42 FR 26959 (May 25, 1977).

### § 8340.0-5 Definitions.

As used in this part:

## § 8340.0-7

(a) *Off-road vehicle* means any motorized vehicle capable of, or designed for, travel on or immediately over land, water, or other natural terrain, excluding:

(1) Any nonamphibious registered motorboat;

(2) Any military, fire, emergency, or law enforcement vehicle while being used for emergency purposes;

(3) Any vehicle whose use is expressly authorized by the authorized officer, or otherwise officially approved;

(4) Vehicles in official use; and

(5) Any combat or combat support vehicle when used in times of national defense emergencies.

(b) *Public lands* means any lands the surface of which is administered by the Bureau of Land Management.

(c) *Bureau* means the Bureau of Land Management.

(d) *Official use* means use by an employee, agent, or designated representative of the Federal Government or one of its contractors, in the course of his employment, agency, or representation.

(e) *Planning system* means the approach provided in Bureau regulations, directives and manuals to formulate multiple use plans for the public lands. This approach provides for public participation within the system.

(f) *Open area* means an area where all types of vehicle use is permitted at all times, anywhere in the area subject to the operating regulations and vehicle standards set forth in subparts 8341 and 8342 of this title.

(g) *Limited area* means an area restricted at certain times, in certain areas, and/or to certain vehicular use. These restrictions may be of any type, but can generally be accommodated within the following type of categories: Numbers of vehicles; types of vehicles; time or season of vehicle use; permitted or licensed use only; use on existing roads and trails; use on designated roads and trails; and other restrictions.

(h) *Closed area* means an area where off-road vehicle use is prohibited. Use of off-road vehicles in closed areas may be allowed for certain reasons; however, such use shall be made only with the approval of the authorized officer.

## 43 CFR Ch. II (10-1-08 Edition)

(i) *Spark arrester* is any device which traps or destroys 80 percent or more of the exhaust particles to which it is subjected.

[44 FR 34836, June 15, 1979, as amended at 53 FR 31003, Aug. 17, 1988]

### § 8340.0-7 Penalties.

Any person who violates or fails to comply with the regulations of subparts 8341 and 8343 is subject to arrest, conviction, and punishment pursuant to appropriate laws and regulations. Such punishment may be a fine of not more than \$1,000 or imprisonment for not longer than 12 months, or both.

### § 8340.0-8 Applicability.

The regulations in this part apply to all public lands, roads, and trails under administration of the Bureau.

## Subpart 8341—Conditions of Use

### § 8341.1 Regulations governing use.

(a) The operation of off-road vehicles is permitted on those areas and trails designated as open to off-road vehicle use.

(b) Any person operating an off-road vehicle on those areas and trails designated as limited shall conform to all terms and conditions of the applicable designation orders.

(c) The operation of off-road vehicles is prohibited on those areas and trails closed to off-road vehicle use.

(d) It is prohibited to operate an off-road vehicle in violation of State laws and regulations relating to use, standards, registration, operation, and inspection of off-road vehicles. To the extent that State laws and regulations do not exist or are less stringent than the regulations in this part, the regulations in this part are minimum standards and are controlling.

(e) No person may operate an off-road vehicle on public lands without a valid State operator's license or learner's permit where required by State or Federal law.

(f) No person shall operate an off-road vehicle on public lands:

(1) In a reckless, careless, or negligent manner;

(2) In excess of established speed limits;

## Bureau of Land Management, Interior

## § 8342.2

(3) While under the influence of alcohol, narcotics, or dangerous drugs;

(4) In a manner causing, or likely to cause significant, undue damage to or disturbance of the soil, wildlife, wildlife habitat, improvements, cultural, or vegetative resources or other authorized uses of the public lands; and

(5) During night hours, from a half-hour after sunset to a half-hour before sunrise, without lighted headlights and taillights.

(g) Drivers of off-road vehicles shall yield the right-of-way to pedestrians, saddle horses, pack trains, and animal-drawn vehicles.

(h) Any person who operates an off-road vehicle on public lands must comply with the regulations in this part, and in § 8341.2 as applicable, while operating such vehicle on public lands.

[44 FR 34836, June 15, 1979, as amended at 45 FR 47843, July 17, 1980]

### § 8341.2 Special rules.

(a) Notwithstanding the consultation provisions in § 8342.2(a), where the authorized officer determines that off-road vehicles are causing or will cause considerable adverse effects upon soil, vegetation, wildlife, wildlife habitat, cultural resources, historical resources, threatened or endangered species, wilderness suitability, other authorized uses, or other resources, the authorized officer shall immediately close the areas affected to the type(s) of vehicle causing the adverse effect until the adverse effects are eliminated and measures implemented to prevent recurrence. Such closures will not prevent designation in accordance with procedures in subpart 8342 of this part, but these lands shall not be opened to the type(s) of off-road vehicle to which it was closed unless the authorized officer determines that the adverse effects have been eliminated and measures implemented to prevent recurrence.

(b) Each State director is authorized to close portions of the public lands to use by off-road vehicles, except those areas or trails which are suitable and specifically designated as open to such use pursuant to subpart 8342 of this part.

[44 FR 34836, June 15, 1979, as amended at 53 FR 31003, Aug. 17, 1988]

## Subpart 8342—Designation of Areas and Trails

### § 8342.1 Designation criteria.

The authorized officer shall designate all public lands as either open, limited, or closed to off-road vehicles. All designations shall be based on the protection of the resources of the public lands, the promotion of the safety of all the users of the public lands, and the minimization of conflicts among various uses of the public lands; and in accordance with the following criteria:

(a) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, air, or other resources of the public lands, and to prevent impairment of wilderness suitability.

(b) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats. Special attention will be given to protect endangered or threatened species and their habitats.

(c) Areas and trails shall be located to minimize conflicts between off-road vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

(d) Areas and trails shall not be located in officially designated wilderness areas or primitive areas. Areas and trails shall be located in natural areas only if the authorized officer determines that off-road vehicle use in such locations will not adversely affect their natural, esthetic, scenic, or other values for which such areas are established.

### § 8342.2 Designation procedures.

(a) *Public participation.* The designation and redesignation of trails is accomplished through the resource management planning process described in part 1600 of this title. Current and potential impacts of specific vehicle types on all resources and uses in the planning area shall be considered in the process of preparing resource management plans, plan revisions, or plan amendments. Prior to making designations or redesignations, the authorized officer shall consult with interested

user groups, Federal, State, county and local agencies, local landowners, and other parties in a manner that provides an opportunity for the public to express itself and have its views given consideration.

(b) *Designation.* The approval of a resource management plan, plan revision, or plan amendment constitutes formal designation of off-road vehicle use areas. Public notice of designation or redesignation shall be provided through the publication of the notice required by § 1610.5–1(b) of this title. Copies of such notice shall be available to the public in local Bureau offices.

(c) *Identification of designated areas and trails.* The authorized officer shall, after designation, take action by marking and other appropriate measures to identify designated areas and trails so that the public will be aware of locations and limitations applicable thereto. The authorized officer shall make appropriate informational material, including maps, available for public review.

[53 FR 31003, Aug. 17, 1988]

**§ 8342.3 Designation changes.**

*Monitoring use.* The authorized officer shall monitor effects of the use of off-road vehicles. On the basis of information so obtained, and whenever the authorized officer deems it necessary to carry out the objectives of this part, designations may be amended, revised, revoked, or other actions taken pursuant to the regulations in this part.

**Subpart 8343—Vehicle Operations**

**§ 8343.1 Standards.**

(a) No off-road vehicle may be operated on public lands unless equipped with brakes in good working condition.

(b) No off-road vehicle equipped with a muffler cutout, bypass, or similar device, or producing excessive noise exceeding Environmental Protection Agency standards, when established, may be operated on public lands.

(c) By posting appropriate signs or by marking a map which shall be available for public inspection at local Bureau offices, the authorized officer may indicate those public lands upon which no off-road vehicle may be operated un-

less equipped with a properly installed spark arrester. The spark arrester must meet either the U.S. Department of Agriculture—Forest Service Standard 5100–1a, or the 80-percent efficiency level standard when determined by the appropriate Society of Automotive Engineers (SAE) Recommended Practices J335 or J350. These standards include, among others, the requirements that: (1) The spark arrester shall have an efficiency to retain or destroy at least 80 percent of carbon particles for all flow rates, and (2) the spark arrester has been warranted by its manufacturer as meeting this efficiency requirement for at least 1,000 hours subject to normal use, with maintenance and mounting in accordance with the manufacturer's recommendation. A spark arrester is not required when an off-road vehicle is being operated in an area which has 3 or more inches of snow on the ground.

(d) Vehicles operating during night hours, from a half-hour after sunset to a half-hour before sunrise, shall comply with the following:

(1) Headlights shall be of sufficient power to illuminate an object at 300 feet at night under normal, clear atmospheric conditions. Two- or three-wheeled vehicles or single-tracked vehicles will have a minimum of one headlight. Vehicles having four or more wheels or more than a single track will have a minimum of two headlights, except double tracked snowmachines with a maximum capacity of two people may have only one headlight.

(2) Red taillights, capable of being seen at a distance of 500 feet from the rear at night under normal, clear atmospheric conditions, are required on vehicles in the same numbers as headlights.

**Subpart 8344—Permits**

**§ 8344.1 Permit requirements.**

Permits are required for certain types of ORV use and shall be issued in accordance with the special recreation permit procedures under part 2930 of this chapter.

SOURCE: 43 FR 40736, Sept. 12, 1978, unless otherwise noted.

**Subpart 8351—Designated  
National Area**

**§ 8351.0-1 Purpose.**

To provide procedures for the management of lands administered under provisions of the Wild and Scenic Rivers Act and the National Trails System Act.

**§ 8351.0-2 Objective.**

To assure that all public lands administered under provisions of the Wild and Scenic Rivers Act and the National Trails System Act are managed in a manner consistent with the purposes of these Acts.

**§ 8351.0-3 Authority.**

The Wild and Scenic Rivers Act of 1968 (16 U.S.C. 1271 *et seq.*).

The National Trails System Act of 1968 (16 U.S.C. 1241 *et seq.*).

**§ 8351.0-6 Policy.**

(a) Hiking, horse riding, and motor trails shall be located, constructed, and maintained where they are found to be feasible and would improve recreation opportunity and quality. Established trails shall be marked or signed and made known to the public by other means.

(b) Certain rivers and sections of rivers that are flowing free of the influence of dams or other major man-made alterations and that possess outstanding scenic, recreational, geological, biological, cultural, or historical features shall be preserved as free flowing streams. The immediate river area

shall be managed to protect the natural, cultural, or historical features that make the river or river segment outstanding.

**§ 8351.1 National trails systems.**

**§ 8351.1-1 National scenic trails.**

(a) *Motorized vehicle use.* No one shall operate a motorized vehicle along a national scenic trail except:

(1) When motorized vehicular use is necessary to meet emergencies involving health, safety, fire suppression, or law enforcement; or

(2) Where the authorized officer determines that adjacent landowners and land users have a need for reasonable access to their lands, interests in lands, or timber rights; or

(3) On roads that are designated segments of the National Scenic Trail System and are posted as open to motorized vehicles.

(b) *Penalties.* In accordance with section 7(i) of the National Trails System Act of 1968, as amended (16 U.S.C. 1246), anyone convicted of violating this regulation is subject to a fine not to exceed \$500 and/or imprisonment not to exceed six months.

[47 FR 23103, May 26, 1982]

**§ 8351.2 Rivers.**

**§ 8351.2-1 Special rules.**

(a) The authorized officer may issue written orders which close or restrict the use of the lands and water surface administered by the Bureau of Land Management within the boundary of any component of the National Wild and Scenic River System when necessary to carry out the intent of the Wild and Scenic Rivers Act. Each order shall:

(1) Describe the lands, road, trail or waterway to which the order applies;

(2) Specify the time during which the closure or restriction applies;

(3) State each prohibition which is applied; and

(4) Be posted in accordance with paragraph (d) of this section.

(b) A written order may exempt any of the following persons from any of the prohibitions contained in the order:

(1) Persons with written permission authorizing the otherwise prohibited

**Pt. 8360**

act or omission. The authorized officer may include in any written permission such conditions considered necessary for the protection of a person, or the lands or water surface and resources or improvements located thereon.

(2) Owners or lessees of property within the boundaries of the designated wild and scenic river area.

(3) Residents within the boundaries of the designated wild and scenic river area.

(4) Any Federal, State, or local government officer or member of an organized rescue or fire suppression force in the performance of an official duty.

(5) Persons in a business, trade or occupation within the boundaries of the designated wild and scenic river area.

(c) The violation of the terms or conditions of any written permission issued under paragraph (b)(1) of this section is prohibited.

(d) Posting is accomplished by:

(1) Placing a copy of an order in each local office having jurisdiction over the lands affected by the order; and

(2) Displaying each order near and/or within the affected wild and scenic river area in such locations and manner as to reasonably bring the prohibitions contained in the order to the attention of the public.

(e) When provided by a written order, the following are prohibited:

(1) Going onto or being upon land or water surface;

(2) Camping;

(3) Hiking;

(4) Building, maintaining, attending or using a fire;

(5) Improper disposal of garbage, trash or human waste;

(6) Disorderly conduct; and

(7) Other acts that the authorized officer determines to be detrimental to the public lands or other values of a wild and scenic river area.

(f) Any person convicted of violating any prohibition established in accordance with this section shall be punished by a fine of not to exceed \$500 or by imprisonment for a period not to exceed 6 months, or both, and shall be adjudged to pay all costs of the proceedings.

**Subpart 8360—General**

**§ 8360.0–3 Authority.**

The regulations of this part are issued under the provisions of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 *et seq.*), the Sikes Act (16 U.S.C. 670g), the Taylor Grazing Act (43 U.S.C. 315a), the Wild and Scenic Rivers Act (16 U.S.C. 1281c), the Act of September 18, 1960, as amended, (16 U.S.C. 877 *et seq.*), the Land and Water Conservation Fund Act (16 U.S.C. 460l–6a) and the National Trails System Act (16 U.S.C. 1241 *et seq.*).

## Bureau of Land Management, Interior

## § 8365.0-2

### § 8360.0-5 Definitions.

As used in this part, the term:

(a) *Authorized officer* means any employee of the Bureau of Land Management who has been delegated the authority to perform the duties described in this part.

(b) *Campfire* means a controlled fire occurring out of doors, used for cooking, branding, personal warmth, lighting, ceremonial or aesthetic purposes.

(c) *Developed sites and areas* means sites and areas that contain structures or capital improvements primarily used by the public for recreation purposes. Such sites or areas may include such features as: delineated spaces for parking, camping or boat launching; sanitary facilities; potable water; grills or fire rings; tables; or controlled access.

(d) *Public lands* means any lands and interests in lands owned by the United States and administered by the Secretary of the Interior through the Bureau of Land Management without regard to how the United States acquired ownership.

(e) *Vehicle* means any motorized transportation conveyance designed and licensed for use on roadways, such as an automobile, bus, or truck, and any motorized conveyance originally equipped with safety belts.

[48 FR 36384, Aug. 10, 1983, as amended at 57 FR 61243, Dec. 23, 1992]

### § 8360.0-7 Penalties.

Violations of any regulations in this part by a member of the public, except for the provisions of § 8365.1-7, are punishable by a fine not to exceed \$1,000 and/or imprisonment not to exceed 12 months. Violations of supplementary rules authorized by § 8365.1-6 are punishable in the same manner.

### Subpart 8361—Emergency Services [Reserved]

### Subpart 8362—Interpretive Services [Reserved]

### Subpart 8363—Resource and Visitor Protection [Reserved]

## Subpart 8364—Closures and Restrictions

### § 8364.1 Closure and restriction orders.

(a) To protect persons, property, and public lands and resources, the authorized officer may issue an order to close or restrict use of designated public lands.

(b) Each order shall:

(1) Identify the public lands, roads, trails or waterways that are closed to entry or restricted as to use;

(2) Specify the uses that are restricted;

(3) Specify the period of time during which the closure or restriction shall apply;

(4) Identify those persons who are exempt from the closure or restrictions;

(5) Be posted in the local Bureau of Land Management Office having jurisdiction over the lands to which the order applies;

(6) Be posted at places near and/or within the area to which the closure or restriction applies, in such manner and location as is reasonable to bring prohibitions to the attention of users;

(7) Include a statement on the reasons for the closure; and

(c) In issuing orders pursuant to this section, the authorized officer shall publish them in the FEDERAL REGISTER.

(d) Any person who fails to comply with a closure or restriction order issued under this subpart may be subject to the penalties provided in § 8360.0-7 of this title.

## Subpart 8365—Rules of Conduct

### § 8365.0-1 Purpose.

The purpose of this subpart is to set forth rules of conduct for the protection of public lands and resources, and for the protection, comfort and well-being of the public in its use of recreation areas, sites and facilities on public lands.

### § 8365.0-2 Objective.

The objective of this subpart is to insure that public lands, including recreation areas, sites and facilities, can be used by the maximum number of people with minimum conflict among

## § 8365.1

## 43 CFR Ch. II (10–1–08 Edition)

users and minimum damage to public lands and resources.

### § 8365.1 Public lands—general.

The rules in this subsection shall apply to use and occupancy of all public lands under the jurisdiction of the Bureau of Land Management. Additional rules for developed sites and areas are found in § 8365.2 of this title.

#### § 8365.1–1 Sanitation.

(a) Whenever practicable, visitors shall pack their trash for disposal at home.

(b) On all public lands, no person shall, unless otherwise authorized:

(1) Dispose of any cans, bottles and other nonflammable trash and garbage except in designated places or receptacles;

(2) Dispose of flammable trash or garbage except by burning in authorized fires, or disposal in designated places or receptacles;

(3) Drain sewage or petroleum products or dump refuse or waste other than wash water from any trailer or other vehicle except in places or receptacles provided for that purpose;

(4) Dispose of any household, commercial or industrial refuse or waste brought as such from private or municipal property;

(5) Pollute or contaminate water supplies or water used for human consumption; or

(6) Use a refuse container or disposal facility for any purpose other than for which it is supplied.

#### § 8365.1–2 Occupancy and use.

On all public lands, no person shall:

(a) Camp longer than the period of time permitted by the authorized officer; or

(b) Leave personal property unattended longer than 10 days (12 months in Alaska), except as provided under § 8365.2–3(b) of this title, unless otherwise authorized. Personal property left unattended longer than 10 days (12 months in Alaska), without permission of the authorized officer, is subject to disposition under the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 484(m)).

### § 8365.1–3 Vehicles.

(a) When operating a vehicle on the public lands, no person shall exceed posted speed limits, willfully endanger persons or property, or act in a reckless, careless or negligent manner.

(b)(1) The operator of a motor vehicle is prohibited from operating a motor vehicle in motion, unless the operator and each front seat passenger is restrained by a properly fastened safety belt that conforms to applicable United States Department of Transportation standards, except that children, as defined by State law, shall be restrained as provided by State law.

(2) Paragraph (b) applies on public lands, or portions thereof, that are located within a State in which there is no State law in effect that requires the mandatory use of a safety belt by the vehicle operator and any front seat passenger. It also applies on public lands, or portions thereof, located within a State in which the mandatory safety belt law of the State does not apply to the public lands or in which any provision of State law renders the mandatory safety belt law of the State unenforceable by the authorized officer as to acts or omissions occurring on the public lands.

(3) This section does not apply to an operator or a passenger of a motor vehicle occupying a seat that was not originally equipped by the manufacturer with a safety belt, nor does it apply to an operator or passenger with a medical condition that prevents restraint by a safety belt or other occupant restraining device.

(4) An authorized officer may not stop a motor vehicle for the sole purpose of determining whether a violation of paragraph (b)(1) of this section is being committed.

[48 FR 36384, Aug. 10, 1983, as amended at 57 FR 61243, Dec. 23, 1992]

### § 8365.1–4 Public health, safety and comfort.

(a) No person shall cause a public disturbance or create a risk to other persons on public lands by engaging in activities which include, but are not limited to, the following:

(1) Making unreasonable noise;

(2) Creating a hazard or nuisance;

## Bureau of Land Management, Interior

## § 8365.1-6

(3) Refusing to disperse, when directed to do so by an authorized officer;

(4) Resisting arrest or issuance of citation by an authorized officer engaged in performance of official duties; interfering with any Bureau of Land Management employee or volunteer engaged in performance of official duties; or

(5) Assaulting, committing a battery upon, or

(6) Knowingly giving any false or fraudulent report of an emergency situation or crime to any Bureau of Land Management employee or volunteer engaged in the performance of official duties.

(b) No person shall engage in the following activities on the public lands:

(1) Cultivating, manufacturing, delivering, distributing or trafficking a controlled substance, as defined in 21 U.S.C. 802(6) and 812 and 21 CFR 1308.11 through 1308.15, except when distribution is made by a licensed practitioner in accordance with applicable law. For the purposes of this paragraph, delivery means the actual, attempted or constructive transfer of a controlled substance whether or not there exists an agency relationship; or

(2) Possessing a controlled substance, as defined in 21 U.S.C. 802(6) and 812 and 21 CFR 1308.11 through 1308.15, unless such substance was obtained, either directly or pursuant to a valid prescription or order or as otherwise allowed by Federal or State law, by the possessor from a licensed practitioner acting in the course of professional practice.

[48 FR 36384, Aug. 10, 1983; 48 FR 52058, Nov. 16, 1983, as amended at 54 FR 21624, May 19, 1989]

### § 8365.1-5 Property and resources.

(a) On all public lands, unless otherwise authorized, no person shall:

(1) Willfully deface, disturb, remove or destroy any personal property, or structures, or any scientific, cultural, archaeological or historic resource, natural object or area;

(2) Willfully deface, remove or destroy plants or their parts, soil, rocks or minerals, or cave resources, except as permitted under paragraph (b) or (c) of this paragraph; or

(3) Use on the public lands explosive, motorized or mechanical devices, except metal detectors, to aid in the collection of specimens permitted under paragraph (b) or (c) of this paragraph.

(b) Except on developed recreation sites and areas, or where otherwise prohibited and posted, it is permissible to collect from the public lands reasonable amounts of the following for non-commercial purposes:

(1) Commonly available renewable resources such as flowers, berries, nuts, seeds, cones and leaves;

(2) Nonrenewable resources such as rocks, mineral specimens, common invertebrate fossils and semiprecious gemstones;

(3) Petrified wood as provided under subpart 3622 of this title;

(4) Mineral materials as provided under subpart 3604; and

(5) Forest products for use in campfires on the public lands. Other collection of forest products shall be in accordance with the provisions of Group 5500 of this title.

(c) The collection of renewable or nonrenewable resources from the public lands for sale or barter to commercial dealers may be done only after obtaining a contract or permit from an authorized officer in accordance with part 3600 or 5400 of this chapter.

[48 FR 36384, Aug. 10, 1983; 67 FR 68778, Nov. 13, 2002]

### § 8365.1-6 Supplementary rules.

The State Director may establish such supplementary rules as he/she deems necessary. These rules may provide for the protection of persons, property, and public lands and resources. No person shall violate such supplementary rules.

(a) The rules shall be available for inspection in each local office having jurisdiction over the lands, sites or facilities affected;

(b) The rules shall be posted near and/or within the lands, sites or facilities affected;

(c) The rules shall be published in the FEDERAL REGISTER; and

(d) The rules shall be published in a newspaper of general circulation in the affected vicinity, or be made available to the public by such other means as

## **§ 8365.1-7**

deemed most appropriate by the authorized officer.

### **§ 8365.1-7 State and local laws.**

Except as otherwise provided by Federal law or regulation, State and local laws and ordinances shall apply and be enforced by the appropriate State and local authorities. This includes, but is not limited to, State and local laws and ordinances governing:

- (a) Operation and use of motor vehicles, aircraft and boats;
- (b) Hunting and fishing;
- (c) Use of firearms or other weapons;
- (d) Injury to persons, or destruction or damage to property;
- (e) Air and water pollution;
- (f) Littering;
- (g) Sanitation;
- (h) Use of fire;
- (i) Pets;
- (j) Forest products; and
- (k) Caves.

### **§ 8365.2 Developed recreation sites and areas.**

The rules governing conduct and use of a developed recreation site or area shall be posted at a conspicuous location near the entrance to the site or area.

#### **§ 8365.2-1 Sanitation.**

On developed recreation sites and areas, no person shall, unless otherwise authorized:

- (a) Clean fish, game, other food, clothing or household articles at any outdoor hydrant, pump, faucet or fountain, or restroom water faucet;
- (b) Deposit human waste except in toilet or sewage facilities provided for that purpose; or
- (c) Bring an animal into such an area unless the animal is on a leash not longer than 6 feet and secured to a fixed object or under control of a person, or is otherwise physically restricted at all times.

#### **§ 8365.2-2 Audio devices.**

On developed recreation sites or areas, unless otherwise authorized, no person shall:

- (a) Operate or use any audio device such as a radio, television, musical instrument, or other noise producing device or motorized equipment in a man-

## **43 CFR Ch. II (10-1-08 Edition)**

ner that makes unreasonable noise that disturbs other visitors;

- (b) Operate or use a public address system;

- (c) Construct, erect or use an antenna or aerial for radiotelephone, radio or television equipment, other than on a vehicle or as an integral part of such equipment.

### **§ 8365.2-3 Occupancy and use.**

In developed camping and picnicking areas, no person shall, unless otherwise authorized:

- (a) Fail to pay any fees imposed in accordance with 36 CFR part 71.

- (b) Pitch any tent, park any trailer, erect any shelter or place any other camping equipment in any area other than the place designed for it within a designated campsite;

- (c) Leave personal property unattended for more than 24 hours in a day use area, or 72 hours in other areas. Personal property left unattended beyond such time limit is subject to disposition under the Federal Property and Administration Services Act of 1949, as amended (40 U.S.C. 484(m));

- (d) Build any fire except in a stove, grill, fireplace or ring provided for such purpose;

- (e) Enter or remain in campgrounds closed during established night periods except as an occupant or while visiting persons occupying the campgrounds for camping purposes;

- (f) Enter or use a site or a portion of a site closed to public use; or

- (g) Occupy a site with more people than permitted within the developed campsite. Limits on the number of occupants permitted at any site shall be clearly posted near the entrance of the developed campsite or facility in such a manner as to bring it to the reasonable attention of the user.

- (h) Move any table, stove, barrier, litter receptacle or other campground equipment.

### **§ 8365.2-4 Vehicles.**

Unless otherwise authorized, no motor vehicle shall be driven within developed recreation sites or areas except on roads or places provided for this purpose.

**Bureau of Land Management, Interior**

**§ 8365.2-5**

**§ 8365.2-5 Public health, safety and comfort.**

On developed recreation sites and areas, unless otherwise authorized, no person shall:

(a) Discharge or use firearms, other weapons, or fireworks; or

(b) Bring an animal, except a Seeing Eye or Hearing Ear dog, to a swimming area.

**Group 8600—Environmental Education and Protection [Reserved]**

## SUBCHAPTER I—TECHNICAL SERVICES (9000)

### Group 9100—Engineering

NOTE: The information collection requirements contained in part 9180 of Group 9100 have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance number 1004-0033. The information is being collected to permit the authorized officer to determine whether an application for survey of islands or other omitted lands that are part of the public lands should be granted. The information will be used to make this determination. A response is required to obtain a benefit.

[48 FR 40890, Sept. 12, 1983]

9185.3-1 Eligibility.

9185.3-2 Showing required.

9185.3-3 Majority of land owners.

9185.4 Requirements for resurvey; with cost prorated.

9185.4-1 Estimate of cost.

9185.4-2 Showing required.

9185.4-3 Three-fourths of land owners.

AUTHORITY: R.S. 2478; 43 U.S.C. 1201; 40 Stat. 965, as amended; 43 U.S.C. 773.

#### Subpart 9180—Cadastral Surveys; General

SOURCE: 35 FR 9797, June 13, 1970, unless otherwise noted.

#### § 9180.0-2 Objectives.

(a) *Alaska; existing surveys and extension thereof.* The surveys up to the present time have been confined to known agricultural areas, the coal fields, and such other lands as have been considered to be suitable for development by settlers or otherwise. The extensions of the surveys to other areas will be governed largely by the character of the lands and their suitability for use, development, and administration under the public land laws applicable to Alaska.

(b) *Resurveys.* The real interest of the Government in the resurvey of the public lands is well stated in the said Act of March 3, 1909, "to properly mark the boundaries of the public lands remaining undisposed of." Its duty being thus defined, the Bureau of Land Management will refrain from attempting to do more in the relocation of the corners of privately owned lands in a township being resurveyed than to reestablish such corners from the best available evidence of the original survey.

#### § 9180.0-3 Authority.

(a) *Delegation to Director, Bureau of Land Management.* (1) In the establishment of the Bureau of Land Management by Reorganization Plan No. 3 of 1946, the office of Supervisor of Surveys was abolished and the functions and powers thereof were transferred to the Secretary of the Interior, to be performed by such officers or agencies of the Department as might be designated by the Secretary. Under that authority, the functions and powers formerly exercised by the Supervisor of Surveys were delegated to the Chief Cadastral Engineer, subject to the supervision of the Director, Bureau of Land Management. In the general reorganization and realignment of functions of the Bureau, the office of Chief Cadastral Engineer has been abolished, and the functions of that office have been delegated to the Director.

(2) By this sequence, the cadastral surveying work of the Bureau of Land Management has been placed under the

immediate jurisdiction of the Director, subject to the direction and control of the Secretary of the Interior. Certain functions relating to specific phases of the cadastral surveying work have been delegated to the State Director.

(b) *Alaska*. The rectangular system of survey of the public lands was extended to the State of Alaska by the Act of March 3, 1899 (30 Stat. 1098; 48 U.S.C. 351). The regular township surveys in Alaska conform to that system, but departures therefrom are permitted under the conditions stated in the Act of April 13, 1926 (44 Stat. 243; 48 U.S.C. 379), and in certain other cases, such as special surveys for trade and manufacturing sites, headquarters sites, and homesites under section 10 of the Act of May 14, 1898 (30 Stat. 413; 48 U.S.C. 461), as amended; for soldiers additional entries, pursuant to sections 2306 and 2307 of the Revised Statutes (43 U.S.C. 274, 278); and for small tracts under the Act of June 1, 1938 (52 Stat. 609; 43 U.S.C. 682a), as amended.

(1) Administration of the public land surveying activities in Alaska is under the general supervision of the State Director, Bureau of Land Management, at Anchorage, Alaska. The office, in which the records relating to the public land surveys in the State are maintained, is located at Anchorage, Alaska. Correspondence relating to local survey matters should be addressed to the State Director, Juneau, Alaska.

(c) *Resurvey of township*—(1) *Without cost to applicant when title to at least 50 percent of the area is in the United States*. The Act of March 3, 1909 (35 Stat. 845), as amended by the Joint Resolution of June 25, 1910 (36 Stat. 884; 43 U.S.C. 772), authorizes the Secretary of the Interior to cause to be made such resurveys of the public lands as after full investigation he may deem essential to properly mark the boundaries of the public lands remaining undisposed of.

(2) *Cost to be prorated between applicants and United States, when more than 50 percent of the area is privately owned*. (i) The Act of September 21, 1918 (40 Stat. 965; 43 U.S.C. 773), provides authority for the resurvey by the Government of townships heretofore held to be ineligible for resurvey under existing departmental regulations by reason

of disposals in excess of 50 percent of the total area thereof.

(ii) Under the Act mentioned, and upon the application of the owners of three-fourths of the privately owned lands in any township previously surveyed, or upon the application of a court of competent jurisdiction, accompanied by a deposit of funds sufficient to cover the estimated cost, inclusive of the necessary office work, of the resurvey of all of the privately owned lands in such township, the State Director, Bureau of Land Management, is authorized, in his discretion, to cause to be made a resurvey of the township in question in accordance with the laws and regulations governing surveys and resurveys of the public lands; the cost of the resurvey of the residue of the public lands in such township to be paid by the Government from the current annual appropriation for the survey and resurvey of the public lands in addition to the portion thereof made available for resurveys and retracements by the provisions of the Act of March 3, 1909 (35 Stat. 845), as amended by Joint Resolution of June 25, 1910 (36 Stat. 884; 43 U.S.C. 772). The total cost of the resurvey of the township is thus divided between the Government and the petitioners in proportion to the extent of their respective holdings.

(iii) It is further provided that any portion of such deposit in excess of the actual cost of the field and office work incident to such resurvey of privately owned lands shall be repaid pro rata to the applicants for resurvey or to their legal representatives.

#### §9180.1 Interpretation of survey records.

##### §9180.1-1 Meridians.

(a) *Alaska*. The public land surveys in Alaska are governed by three principal meridians established as follows: The Seward Meridian, initiated just north of Resurrection Bay and extending to the Matanuska coal fields; the Fairbanks Meridian, commencing near the town of Fairbanks and controlling the surveys in that vicinity, including the Nenana coal fields; and the Copper River Meridian which lies in the valley of the Copper River and from which

surveys have been executed as far north as the Tanana River and south to the Bering River coal fields and the Gulf of Alaska.

(b) *Copies of records.* Copies of plats of surveys in Alaska, or other records of the Public Survey Office, will be sold at the cost of production, in accordance with section 1 of the Act of August 24, 1912 (37 Stat. 497), as amended (5 U.S.C. 488), and § 2.3 of this title.

### Subpart 9183—Special Surveys

#### § 9183.0-2 Objectives.

Information respecting special surveys of soldier's additional entries, homesites, homesteads, and trade and manufacturing sites is given in subparts 2610, 2511, 2562, and 2730 of this chapter, respectively.

[35 FR 9798, June 13, 1970]

### Subpart 9185—Instructions and Methods

SOURCE: 35 FR 9798, June 13, 1970, unless otherwise noted.

#### § 9185.1 Applications.

##### § 9185.1-1 Surveys.

(a) *Original surveys.* Application for the original extension of the rectangular system of public land surveys to include unsurveyed townships should be filed in duplicate with the State Director for the State in which the lands are situated. The application may be in letter form, and should describe the unsurveyed area by township and range of the public surveys, and should set forth the interest of the applicant in the land and the basis of need for extension of the surveys.

(b) *Lands omitted from original survey.* Application for the survey of an unsurveyed island or other land omitted from the original survey shall be made on Form 9600-2, or its equivalent, and filed in duplicate with the State director for the State in which lands are situated.

[35 FR 9798, June 13, 1970, as amended at 44 FR 41795, July 18, 1979]

#### § 9185.1-2 Resurveys.

(a) *Filing of applications for survey without cost to applicant.* The application prepared in accordance with this part, should be submitted to the State Director for the State in which the lands are situated.

(b) *Filing of applications for survey with cost prorated.* Applications for resurvey based upon the provisions of the Act of September 21, 1918, prepared in accordance with this part should be submitted to the State Director for the State in which the lands are situated. Prior to filing formal application, however, the interested parties should obtain from the proper office, as above designated, an estimate of the cost of the proposed resurvey.

#### § 9185.1-3 Mining claims.

(a) *Application for survey.* Application for the survey of a mining claim should be filed with the State Director for the State in which the claim is situated.

(b) *Mineral surveyors.* See § 3861.5-1 for the appointment of mineral surveyors pursuant to section 2334 of the Revised Statutes (30 U.S.C. 39).

[35 FR 9798, June 13, 1970, as amended at 38 FR 30001, Oct. 31, 1973]

#### § 9185.2 Requirements for surveys.

##### § 9185.2-1 [Reserved]

##### § 9185.2-2 Lands omitted from original survey.

(a) *Notice of intended application.* Notice of intention to apply for survey of an island or other land omitted from the original survey shall be served on the adjacent land owners, and the Attorney General and the Secretary of State for the State in which the land is situated, at least 30 days prior to the date of application for survey. Service may be had by return receipt mail or in person, evidence of which may consist of the return receipt or signed acknowledgment of service. A copy of each notice, with proof of service thereof, shall be filed with the application. Failure to obtain evidence of service may be explained.

(b) *Form of notice.* No particular form of notice is prescribed. The notice must make it clear, however, that the land covered by the application is contended

to be public land of the United States and subject to survey and administration as such, and that any protest against the proposed survey should be filed with the appropriate State Director. It must be shown what particular surveyed lands opposite the island, or adjoining the unsurveyed land, are owned by the adjacent land owner on whom the notice is served.

(c) *Evidence required as to character of land in existence at time of original survey.* An application for the survey of an island or other land omitted from the original survey must be accompanied by evidence showing that the land was in existence and above ordinary high-water elevation when the State was admitted into the Union, and when the adjacent lands were surveyed. Such evidence should consist of statements from at least two persons familiar with the land, as to its size, elevation, and appearance, and the species, size, and age of the timber growth thereon, or nature of other vegetation.

(d) *Diagram required with application.* A diagram showing the approximate configuration of the island or other land applied for, and its location with reference, to the public land surveys, must accompany the application.

(e) *Cost of survey.* In the event of approval of the application, the costs of the survey will be borne by the Government.

(f) *No preference right.* Should the island or other land be surveyed as public land, no preference right to acquire the same under the laws governing the disposal of public lands will be gained by the filing of the application for survey.

[35 FR 9798, June 13, 1970, as amended at 44 FR 41795, July 18, 1979]

#### **§9185.2-3 Unsurveyed islands and omitted lands.**

(a) Section 211(a) of the Federal Land Policy and Management Act of 1976 (90 Stat. 2758), provides for the conveyance under the Recreation and Public Purposes Act of unsurveyed islands determined by the Secretary to be public lands of the United States. The conveyance of any such island may be made without survey; however, such island shall be surveyed at the request of the qualified applicant. If the applicant re-

quests that a survey be executed, the applicant shall be required to:

(1) Furnish a written statement identifying his choice of donation of money, services, or both for the survey.

(2) If the applicant elects to donate money, such donation shall equal the Bureau of Land Management's estimated cost of survey. The donated money shall be credited and expended in accordance with section 307(c) of the Act. A written estimate of such costs shall be furnished to the applicant by the Bureau.

(3) If the applicant elects to donate services, such services shall be conducted and performed pursuant to the criteria established by the Director of the Bureau of Land Management.

(b) Section 211(b) of the Act, provides for conveyance, under the Recreation and Public Purposes Act (43 U.S.C. 869), of lands other than islands determined by the Secretary by survey to be public lands of the United States erroneously or fraudulently omitted from the original surveys. An applicant may be required to donate money, services, or a combination thereof for such survey. The procedures contained in §9185.2-3(a) of this title shall be followed.

[44 FR 41795, July 18, 1979]

#### **§9185.3 Requirements for resurveys; without cost to applicant.**

##### **§9185.3-1 Eligibility.**

(a) *Determined by ownership of land.* As a general rule, and in the absence of any particular governmental purpose to be subserved, no township is eligible for resurvey unless title to at least 50 percent of the area of the lands embraced therein remains in the United States. For the purpose of determining the eligibility of a township under this rule, lands covered by approved selections, school sections, and entries upon which final certificates or patents have been issued are to be considered as alienated lands. Townships within the primary limits of railroad land grants are generally ineligible.

(b) *Determined by physical character of remaining public land.* In general no resurvey will be undertaken unless the preliminary examination of the township develops evidence of existing settlement and agricultural possibilities

## §9185.3-2

sufficient to support the presumption that the unappropriated lands therein are such as to attract *bona fide* entrymen, thus eliminating townships which, although theoretically eligible, are of such a physical character that the resurvey thereof would serve no useful purpose.

(c) *Small areas.* In the application of the terms of the Act of March 3, 1909 (35 Stat. 845), as amended, is not intended that there shall be undertaken any work involving the mere reestablishment of lost or obliterated or misplaced corners in a limited area of a township, such work being within the province of the local surveyors, and the authority of the public survey office will be limited to the giving of advice in accordance with the circular for the restoration of lost or obliterated corners. Employees of the Bureau of Land Management are prohibited from participating in the resurvey of a township, the reestablishment of lost corners, or in the subdivision of sections for private parties, even if the expense is borne by the county or municipal authorities or by individuals.

### §9185.3-2 Showing required.

(a) *Necessity.* The applicants for the resurvey of any township are required to present satisfactory prima facie evidence of the necessity for such action, based either upon general obliteration of evidences of the original survey or upon conditions so grossly defective as to preclude the possibility of a reasonably certain identification of the subdivisions of the subsisting survey or a satisfactory local restoration thereof.

(b) *Condition of original survey.* Applications for the resurvey of each township must be supported by evidence in the form of a statement, preferably from the county or other competent surveyor, showing in detail that the evidences of the original survey have been obliterated to such an extent as to make it impracticable to apply the suggestions of the circular issued by the Bureau of Land Management for the necessary restoration of the lines and corners in the proper identification of the legal subdivisions occupied by the present or prospective entrymen or that the obliteration of the original monuments has become so advanced

## 43 CFR Ch. II (10-1-08 Edition)

that the land boundaries can be identified only through extensive retracements by experienced engineers of the Bureau of Land Management.

### §9185.3-3 Majority of land owners.

A majority of the settlers in each township are required to join in the application, and, in addition, there must appear the endorsements of the entrymen and owners, including the State, whose holdings represent the major part of the area entered or patented, with a description opposite each name of the lands actually occupied, entered, or owned, and a statement as to whether the applicant is a settler, entryman, or owner thereof. Where an entryman or owner, including the State, has failed for any reason whatsoever to join in the application, evidence of service of notice upon him for at least 30 days in advance of the filing of the application is required in order that he may be afforded ample opportunity to make timely protest against the granting of such resurvey if in his opinion such action is undesirable.

### §9185.4 Requirements for resurvey; with cost prorated.

#### §9185.4-1 Estimate of cost.

(a) The cost of resurvey procedure is as a rule considerably in excess of that incident to the execution of original surveys and may range between rather wide limits. Where the obliteration is not excessive and the evidences of the original survey are harmoniously related, extensive verifying retracements will be unnecessary and ordinary dependent methods of resurvey can usually be applied. If, however, the obliteration is general or total, many miles of preliminary retracement may be required in order to obtain technical control, and where, by reason of errors in the original survey, the existing evidences thereof are discordant and conflicting locations have resulted, the procedure required may, in the case of densely entered townships, involve an expense of \$5,000 or more per township.

(b) The applicants for resurvey should understand, therefore, that although the estimate supplied will be as

nearly correct as the available information will permit, its accuracy cannot be guaranteed, and, consequently, all such estimates are subject to revision, if necessary, as the work proceeds and the field conditions are more fully developed. Any deposit in excess of actual cost will be returned to the applicants as provided by law, but in cases where the cost exceeds the deposit made in accordance with the estimate, an additional deposit will be required, failing which, operations will be suspended.

(c) In the application of the terms of this Act it is not intended that there shall be undertaken any work involving the mere reestablishment of lost or obliterated or misplaced corners in a limited area of a township, such work being within the province of the local surveyor, and the authority of the State Director will be restricted to the giving of advice in accordance with the circular for the restoration of lost or obliterated corners. Employees of the Government are prohibited from participating in the resurvey of a township or the reestablishment of lost corners or in the subdivision of sections for private parties, even if the expense is borne by the county or State authorities or by individuals, except as such action is specifically authorized by the Director, Bureau of Land Management, in accordance with the provisions of existing statutes.

(d) Deposit required: The deposit required of the petitioners by law must accompany the application and must be made in the amount, at the place and in the manner prescribed by the instructions which will accompany the estimate.

#### **§ 9185.4-2 Showing required.**

(a) *Necessity.* The applicants for the resurvey of any township are required to present satisfactory prima facie evidence of the necessity for such action. In general, it must be shown that the evidences of the original survey are so widely obliterated or that the prevailing survey conditions are so grossly defective as to preclude the satisfactory identification of the subdivisions of the subsisting survey or that the evidences of the original survey are in such an advanced state of deterioration

that action looking to their preservation and perpetuation is expedient as in the public interest.

(b) *Ownership of land.* The applicants for resurvey are required to preface their petition by the statement that the extent of privately owned lands within the township is in excess of 50 percent of the total area thereof. If necessary, information in this connection may be obtained by the petitioners from the manager of the land office having local jurisdiction. Failure to comply with the condition set forth in this section or material error in the showing made, will not only result in delaying action upon the petition, but may require its rejection if it is found that the township is not properly subject to resurvey under the terms of the governing Act.

#### **§ 9185.4-3 Three-fourths of land owners.**

The owners of three-fourths of the privately owned lands within the township are required to join in the application, and all petitioners in whom ownership is vested, either individuals, the State, or corporations such as railroad companies whose interests are involved, are further required to supply, following their respective signatures, an accurate description by legal subdivision, section, township, and range of the lands to which title is claimed. Moreover, it must appear that notice of the proposed resurvey has been served upon all owners who have for any reason failed to join in the petition, and, in addition, it is highly desirable that all record entrymen who, under the terms of the act are not required to become parties to the petition, be similarly informed to the end that their objections, if any, may be heard and subsequent protest based upon the plea of ignorance may, insofar as possible, be avoided.

## Subpart 9212—Wildfire Prevention

### § 9212.0-1 Purpose.

The purpose of this subpart is to set forth procedures to prevent wildfires on the public lands.

### § 9212.0-2 Objective.

The objective of this subpart is to prevent wildfires on the public lands.

### § 9212.0-3 Authority.

This subpart is issued under the authority of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 *et seq.*).

### § 9212.0-5 Definitions.

As used in this subpart, the term:

(a) *Person* means individuals, corporations, companies, associations, firms, partnerships, societies or joint stock companies.

(b) *Authorized officer* means any employee of the Bureau of Land Management to whom has been delegated the authority to perform the duties described in this subpart.

(c) *Public lands* means any lands and interest in lands owned by the United States within the several States and administered by the Secretary of the Interior through the Bureau of Land Management, without regard to how the United States acquired ownership, except:

(1) Lands located on the Outer Continental Shelf; and

(2) Lands held for the benefit of Indians, Aleuts, and Eskimos.

(d) *Fire* means the burning of timber, trees, slash, brush, tundra, grass or other flammable material such as, but not limited to, petroleum products, trash, rubbish, lumber, paper, cloth or agricultural refuse occurring out of doors and includes *campfire* as defined in this section.

## 43 CFR Ch. II (10-1-08 Edition)

(e) *Campfire* means a controlled fire occurring out of doors used for cooking, branding, personal warmth, lighting, ceremonial or esthetic purposes.

(f) *Permit* means authorization in writing by the authorized officer.

(g) *Closed area* means public lands closed to entry by a Bureau of Land Management fire prevention order.

(h) *Wildlife* means any wildland fire that requires a suppression response.

(i) *Restricted area* means public lands restricted as to use(s) by a Bureau of Land Management fire prevention order.

### § 9212.0-6 Policy.

It is the policy of the Bureau of Land Management to take all necessary actions to protect human life, the public lands and the resources and improvements thereon through the prevention of wildfires. Wherever possible, the Bureau of Land Management's actions will complement and support State and local wildfire prevention actions.

### § 9212.1 Prohibited acts.

Unless permitted in writing by the authorized officer, it is prohibited on the public lands to:

(a) Cause a fire, other than a campfire, or the industrial flaring of gas, to be ignited by any source;

(b) Fire a tracer or incendiary device;

(c) Burn, timber, trees, slash, brush, tundra or grass except as used in campfires;

(d) Leave a fire without extinguishing it, except to report it if it has spread beyond control;

(e) Build, attend, maintain or use a campfire without removing all flammable material from around the campfire adequate to prevent its escape;

(f) Resist or interfere with the efforts of firefighter(s) to extinguish a fire;

(g) Enter an area which is closed by a fire prevention order, or

(h) perform any act restricted by a fire prevention order.

### § 9212.2 Fire prevention orders.

(a) To prevent wildfire or facilitate its suppression, an authorized officer may issue fire prevention orders that close entry to, or restrict uses of, designated public lands.

(b) Each fire prevention order shall:

## Bureau of Land Management, Interior

## § 9239.0-7

(1) Identify the public lands, roads, trails or waterways that are closed to entry or restricted as to use;

(2) Specify the time during which the closure or restriction shall apply;

(3) Identify those persons who, without a written permit, are exempt from the closure or restrictions;

(4) Be posted in the local Bureau of Land Management office having jurisdiction over the lands to which the order applies; and

(5) Be posted at places near the closed or restricted area where it can be readily seen.

### § 9212.3 Permits.

(a) Permits may be issued to enter and use public lands designated in fire prevention orders when the authorized officer determines that the permitted activities will not conflict with the purpose of the order.

(b) Each permit shall specify:

(1) The public lands, roads, trails or waterways where entry or use is permitted;

(2) The person(s) to whom the permit applies;

(3) Activities that are permitted in the closed area;

(4) Fire prevention requirements with which the permittee shall comply; and

(5) An expiration date.

(c) An authorized officer may cancel a permit at any time.

### § 9212.4 Penalties.

Any person who knowingly and willfully violates the regulations at § 9212.1 of this title shall, upon conviction, be subject to a fine of not more than \$1,000 or to imprisonment of not more than 12 months, or both.

## PART 9230—TRESPASS

### Subpart 9239—Kinds of Trespass

Sec.

9239.0-3 Authority.

9239.0-7 Penalty for unauthorized removal of material.

9239.0-8 Measure of damage.

SOURCE: 35 FR 9800, June 13, 1970, unless otherwise noted.

### Subpart 9239—Kinds of Trespass

#### § 9239.0-3 Authority.

(a) Sections 9239.0-3 to 9239.7 are issued under the authority of R.S. 2478; 43 U.S.C. 1201.

(b) In addition to liability for trespass on the public lands, as indicated in this part, persons responsible for such trespass may be prosecuted criminally under any applicable Federal law. Penalties are prescribed by the following statutes:

(1) Timber trespass. 18 U.S.C. 1852, 1853.

(2) Turpentine trespass. 18 U.S.C. 1854.

(3) Coal trespass. 18 U.S.C. 1851; 30 U.S.C. 201(b)(4).

[35 FR 9800, June 13, 1970, as amended at 42 FR 4460, Jan. 25, 1977]

#### § 9239.0-7 Penalty for unauthorized removal of material.

The extraction, severance, injury, or removal of timber or other vegetative resources or mineral materials from public lands under the jurisdiction of the Department of the Interior, except when authorized by law and the regulations of the Department, is an act of trespass. Trespassers will be liable in damages to the United States, and will be subject to prosecution for such unlawful acts.

[35 FR 9800, June 13, 1970, as amended at 56 FR 10176, Mar. 11, 1991]

## **§ 9239.0-8**

### **§ 9239.0-8 Measure of damage.**

The rule of damages to be applied in cases of timber or other vegetative resources, coal, oil, and other trespass in accordance with the decision of the Supreme Court of the United States in the case of *Mason et al. v. United States* (260 U.S. 545, 67 L. ed. 396), will be the measure of damages prescribed by the laws of the State in which the trespass is committed, unless by Federal law a different rule is prescribed or authorized.

[35 FR 9800, June 13, 1970, as amended at 56 FR 10176, Mar. 11, 1991]

### **§ 9239.0-9 Sale, lease, permit, or license to trespassers.**

(a) For the purpose of this section, a trespasser is any person, partnership, association, or corporation responsible for the unlawful use of, or injury to, property of the United States.

(b) The authorized officer may refuse to sell to a trespasser timber or materials, or to issue to him a lease, permit, or license if, after a demand for payment has been served by certified or registered mail on the trespasser, a satisfactory arrangement for payment of the debt due the United States has not been made within reasonable time, and there is reason for the authorized officer to believe payment will not be made. Satisfactory arrangement shall be deemed to have been made by:

(1) Payment by the trespasser of the amount found to be due by the authorized officer, by a final judgment of a court, or pursuant to a compromise settlement accepted by the United States; or

(2) Execution by the trespasser of a promissory note or installment agreement, satisfactory to the authorized officer, so long as the agreed-upon payments are made on schedule; or

(3) Delivery by the trespasser of a bond guaranteeing payment to the United States of the amount found to be due by the authorized officer or by a court of competent jurisdiction; or

(4) Cancellation of the debt due the United States by a discharge in bankruptcy.

(c) Notwithstanding the provisions of paragraph (b) of this section, the authorized officer may sell to a trespasser

## **43 CFR Ch. II (10-1-08 Edition)**

timber or materials or issue to him a lease, permit, or license for materials despite lack of a satisfactory arrangement for payment if such officer establishes in writing that:

(1) There is no other qualified bidder or no other qualified bidder will meet the high bid, and

(2) The sale, lease, permit, or license to the trespasser is necessary to protect substantial interests of the United States either by preventing deterioration of, or damage to, resources of the United States or by accepting an advantageous offer, and

(3) The timber management or other resource management program of the United States will not be adversely affected by the action.

### **§ 9239.1 Timber and other vegetative resources.**

#### **§ 9239.1-1 Unauthorized cutting, removal, or injury.**

(a) All of the definitions in § 5400.0-5 of this title apply to this section.

(b) Commission of any of the acts listed in §§ 5462.2 and 5511.4 of this title constitutes a trespass.

[56 FR 10176, Mar. 11, 1991, as amended at 60 FR 50451, Sept. 29, 1995]

#### **§ 9239.1-2 Penalty for trespass.**

(a) In accordance with §§ 9239.0-7, 9239.0-8, and 9239.1-1 of this subpart, anyone responsible for a trespass act is liable to the United States in a civil action for damages and may be prosecuted under criminal law as provided in § 9265.6 of this chapter.

(b) The cutting of timber from the public land in Alaska, other than in accordance with the terms of the law and §§ 5511.2 to 5511.2-6 of this chapter will render the persons responsible liable to the United States in a civil action for trespass and such persons may be prosecuted criminally under title 18 U.S.C., or under State law.

[35 FR 9800, June 13, 1970, as amended at 56 FR 10176, Mar. 11, 1991; 60 FR 50451, Sept. 29, 1995]

#### **§ 9239.1-3 Measure of damages.**

(a) Unless State law provides stricter penalties, in which case the State law shall prevail, the following minimum

## Bureau of Land Management, Interior

## § 9239.2-3

damages apply to trespass of timber and other vegetative resources:

(1) Administrative costs incurred by the United States as a consequence of the trespass.

(2) Costs associated with the rehabilitation and stabilization of any resources damaged as a result of the trespass.

(3) Twice the fair market value of the resource at the time of the trespass when the violation was nonwillful, and 3 times the fair market value at the time of the trespass when the violation was willful.

(4) In the case of a purchase from a trespasser, if the purchaser has no knowledge of the trespass, but should have had such knowledge through reasonable diligence, the value at the time of the purchase.

(b) The provisions of paragraph (a) of this section shall not be deemed to limit the measure of damages that may be determined under State law.

[56 FR 10176, Mar. 11, 1991, as amended at 60 FR 50451, Sept. 29, 1995]

### § 9239.2 Unlawful enclosures or occupancy.

#### § 9239.2-1 Enclosures of public lands in specified cases declared unlawful.

(a) Section 1 of the Act of February 25, 1885 (23 Stat. 321; 43 U.S.C. 1061), declares any enclosure of public lands made or maintained by any party, association, or corporation who "had no claim or color of title made or acquired in good faith, or an asserted right thereto, by or under claim, made in good faith with a view to entry thereof at the proper land office under the general laws of the United States at the time any such enclosure was or shall be made" to be unlawful and prohibits the maintenance of erection thereof.

(b) Section 4 of the Taylor Grazing Act of June 28, 1934 (48 Stat. 1271; 43 U.S.C. 315o) provides:

Fences \* \* \* and other improvements necessary to the care and management of the permitted livestock may be constructed on the public lands within such grazing districts under permit issued by the authority of the Secretary, or under such cooperative arrangement as the Secretary may approve.

(c) Section 10, paragraph (4) of the Federal Range Code, §4112.3 of this chapter, containing rules for the administration of grazing districts prohibits "Constructing or maintaining any kind of improvements, structures, fences, or enclosures on the Federal range, including stock driveways, without authority of law or a permit."

(d) Section 2 of the Taylor Grazing Act of June 28, 1934 (48 Stat. 1270; 43 U.S.C. 315a), provides that "any willful violation of the provisions of this act" or of "rules and regulations thereunder after actual notice thereof shall be punishable by a fine of not more than \$500."

(e) Violations of any of the provisions of the Act of February 25, 1885, constitute a misdemeanor (Sec. 4, 23 Stat. 322; 35 Stat. 40; 43 U.S.C. 1064).

#### § 9239.2-2 Duty of district attorney.

Section 2 of the Act of February 25, 1885 (23 Stat. 321; 43 U.S.C. 1062, 28 U.S.C. 41, Par. 21), provides that it shall be the duty of the district attorney of the United States for the proper district on affidavit filed with him by any citizen of the United States that such unlawful enclosure is being made or maintained, showing the description of the lands enclosed with reasonable certainty so that the enclosure may be identified, to institute a civil suit in the proper United States district or circuit court or territorial district court in the name of the United States and against the parties named or described who shall be in charge of or controlling the enclosure complained of.

#### § 9239.2-3 Responsibility for execution of law.

The execution of this law devolves primarily upon the officers of the Department of Justice, but as it is the purpose to free the public lands from unlawful enclosures and obstructions, it is deemed incumbent upon the officers of the Department of the Interior to furnish the officers of the Department of Justice with the evidence necessary to a successful prosecution of the law.

**§ 9239.2-4 Filing of charges or complaints.**

All charges or complaints against unlawful enclosures or obstructions upon the public lands should be filed with the proper State Director. Such charges or complaints, when possible, should give the name and address of the party or parties making or maintaining such enclosure or obstruction and should describe the land enclosed in such a way that it may be readily identified. The section, township, and range numbers should be given, if possible.

**§ 9239.2-5 Settlement and free passage over public lands not to be obstructed.**

Section 3 of the Act of February 25, 1885 (23 Stat. 322; 43 U.S.C. 1063), provides that no person by force, threats, intimidation, or by any fencing or enclosing or any other unlawful means shall prevent or obstruct or shall combine or confederate with others to prevent or obstruct any person from peaceably entering upon or establishing a settlement or residence upon any tract of public land subject to settlement or entry under the public land laws of the United States or shall prevent or obstruct free passage or transit over or through the public lands.

**§ 9239.3 Grazing, Alaska.**

(a) *Reindeer.* (1) Any use of the Federal lands for reindeer grazing purposes, unless authorized by a valid permit issued in accordance with the regulations in subpart 4132 of this chapter, is unlawful and is prohibited.

(2) Any person who willfully violates any of the rules and regulations in subpart 4132 of this chapter shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punishable by imprisonment for not more than one year, or by a fine of not more than \$500.

(b) *Livestock.* (1) Grazing livestock upon, allowing livestock to drift and graze on, or driving livestock across lands that are subject to lease or permit under the provisions of this part or within a stock driveway, without a lease or other authorization from the Bureau of Land Management, is prohibited and constitutes trespass. Tres-

passers will be liable in damages to the United States for the forage consumed and for injury to Federal property, and may be subject to civil and criminal prosecution for such unlawful acts. A lessee who grazes livestock in violation of the terms and conditions of his lease by exceeding numbers specified, or by allowing the livestock to be on Federal land in an area or at a time different from that designated in his lease shall be in default and shall be subject to the provisions of § 4131.2-7 (g) and (h) of this chapter. Under section 2 of the Act, any person who willfully grazes livestock on public lands without authority, shall, upon conviction, be punished by a fine of not more than \$500.

(2) Whenever it appears that a violation exists the authorized officer shall serve written notice upon the alleged violator. The notice shall set forth the act or omission constituting such violation and will allow the party involved a reasonable specified time from receipt of notice to demonstrate that there has been no violation or that he has since achieved compliance. If the showing is satisfactory to the authorized officer he will close the case. If satisfactory showing is not made within the time allowed, the violation alleged in the notice will be deemed to have been willful.

(3) Where the owner of the trespassing livestock, or his representative, is known, the authorized officer shall determine the amount of the damage to the public land and other property of the United States and shall make a demand for payment upon the alleged violator setting forth the foregoing values including the value of the forage consumed. Such forage value shall be computed at the commercial rates, if susceptible to proof by reasonably available and reliable data; otherwise, a minimum charge of \$2 per animal unit month for trespass not clearly willful will be made. Where the trespasses are repeated and/or willful, a minimum charge of \$4 per animal unit month for forage consumed will be charged. All offers for settlement for value of forage consumed and for damage to the public land or to other property of the United States resulting from an alleged violation of any provision of the act or regulations found

## Bureau of Land Management, Interior

## § 9239.5-3

within § 4131.0-3 *et seq.* of this chapter in the amount of \$2,000 or less may be accepted by the authorized officer. Offers for settlement in excess of \$2,000 will be transmitted to the State Director for appropriate action. An offer of settlement will not constitute satisfaction of civil liability for consumed forage and damage involved until finally accepted by the authorized officer or the State Director, and in no event will it relieve the violator of criminal liability. No lease or permit will be issued or renewed until payment of any amount found to be due the United States under this section has been offered.

[35 FR 9800, June 13, 1970. Redesignated at 43 FR 29076, July 5, 1978]

### § 9239.5 Minerals.

#### § 9239.5-1 Ores.

(a) For ores trespass in a State where there is no State law governing such trespass, the measure of damages will be as follows:

(1) Measure of damages is the same as in the case of coal. *Benson Mining and Smelting Co. v. Alta Mining and Smelting Co.* (145 U.S. 428, 36 L. ed. 762; *Durant Mining Co. v. Percy Consolidated Mining Co.* (93 Fed. 166)).

#### § 9239.5-2 Oil.

For oil trespass in a State where there is no State law governing such trespass, the measure of damages will be as follows:

(a) *Innocent trespass.* Value of oil taken, less amount of expense incurred in taking the same.

(b) *Willful trespass.* Value of the oil taken without credit or deduction for the expense incurred by the wrongdoers in getting it. *Mason v. United States* (273 Fed. 135).

#### § 9239.5-3 Coal.

(a) *Determination of payment in coal trespass.* For coal trespass in a State where there is no State law governing such trespass, the measure of damages will be as follows:

(1) For innocent trespass, payment must be made for the value of the coal in place before severance. *United States v. Homestake Mining Company* (117 Fed. 481).

(2) For willful trespass, payment must be made for the full value of the coal at the time of conversion without deduction for labor bestowed or expense incurred in removing and marketing the coal. *Liberty Bell Gold Mining Company v. Smuggler-Union Mining Company* (203 Fed. 795). The mining of coal in trespass is presumed to be willful, in the absence of persuasive evidence of the innocence and good faith of the trespasser. *United States v. Ute Coal and Coke Company* (158 Fed. 20).

(b) *Coal mined when there is no lease in effect.* Any mining of coal which is not pursuant to a coal lease in effect at the time of the mining shall constitute a trespass, and the coal so mined must be paid for on a trespass basis.

(c) *Coal mined by successful bidder at public sale.* The successful bidder at public sale for a coal leasing unit does not acquire any right to mine coal until he has complied with all the formalities required by the regulations, including the furnishing of a bond, and a lease has been issued to him. Coal mined by such applicant prior to the date of the issuance of a lease is in trespass and must be paid for on a trespass basis.

(d) *Coal permit, lease, or license not to issue until trespass account settled.* No coal permit, lease, or license will be issued to anyone known to have mined coal in trespass until the trespass account is settled.

(e) *Right of surface owner to mine coal for domestic use.* The owner of land patented with a reservation of the coal deposits, either under the act of March 3, 1909 (35 Stat. 844; 30 U.S.C. 81), or under the Act of June 22, 1910 (36 Stat. 583; 30 U.S.C. 83-85), has the right to mine coal for use upon the land for domestic purposes at any time prior to the disposal by the United States of the coal deposits.

(f) *Penalties for unauthorized exploration for coal.* (1) Any person who willfully conducts coal exploration for commercial purposes without an exploration license issued under subpart 3507 of this chapter shall be subject to a fine of not more than \$1,000 for each day of violation.

(2) All data collected by said person on any Federal lands as a result of such

## § 9239.6

violations shall immediately be made available to the Secretary, who shall make the data available to the public as soon as possible.

(3) No penalty under this section may be assessed unless such person is given notice and opportunity for a hearing with respect to such violation pursuant to part 4 of this chapter.

[35 FR 9800, June 13, 1970, as amended at 41 FR 36023, Aug. 26, 1976; 42 FR 4460, Jan. 25, 1977]

## § 9239.6 Materials.

### § 9239.6-1 Turpentine.

For turpentine trespass in a State where there is no State law governing such trespass, the measure of damages will be as follows:

(a) *Innocent trespass.* Value of the gum and injury done to the trees. *United States v. Taylor* (35 Fed. 484).

(b) *Willful trespass.* Value of the product manufactured from the crude turpentine by the settler, or any person into whose possession same may have passed, without credit for labor bestowed on the turpentine by the wrongdoer. *Union Naval Stores Co. v. United States* (240 U.S. 284, 60 L. ed. 644).

## § 9239.7 Right-of-way.

### § 9239.7-1 Public lands.

The filing of an application under part 2800, 2810, or 2880, of this chapter does not authorize the applicant to use or occupy the public lands for right-of-way purposes, except as provided by the definition of "Casual use" in § 2801.5(b) and by §§ 2804.29 and 2884.25 of this chapter, until written authorization has been issued by the authorized officer. Any unauthorized occupancy or use of public lands or improvements for right-of-way purposes constitutes a trespass against the United States for which the trespasser is liable for costs, damages, and penalties as provided in subpart 2808 and §§ 2812.1-3 and 2888.10 of this chapter. No new permit, license, authorization, or grant of any kind shall be issued to a trespasser until:

(a) The trespass claim is fully satisfied; or

(b) The trespasser files a bond conditioned upon payment of the amount of

damages determined to be due the United States; or

(c) The authorized officer determines in writing that there is a legitimate dispute as to the fact of the trespasser's liability or as to the extent of his liability and the trespasser files a bond in an amount determined by the authorized officer to be sufficient to cover payment of a future court judgment in favor of the United States.

[54 FR 25855, June 20, 1989, as amended at 70 FR 21090, Apr. 22, 2005]

SOURCE: 45 FR 31276, May 12, 1980, unless otherwise noted.

### Subpart 9260—Law Enforcement, General

#### § 9260.0-1 Purpose.

This part establishes a single regulatory section in title 43 where the law enforcement provisions of all the various public land use regulations can be found.

#### § 9260.0-2 Objective.

To provide in a single part a compilation of all criminal violations relating to public lands that appear throughout title 43 of the Code of Federal Regulations.

#### § 9260.0-3 Authority.

Under section 303(a) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1733), the Secretary of the Interior is authorized to issue regulations with respect to the management, use, and protection of the public lands, including property located thereon, the violation of which is punishable as a criminal offense. Section

303(c) of the Act authorizes the Secretary to enter into contracts with appropriate local officials having law enforcement authority and to authorize Federal personnel to carry out the enforcement of Federal laws and regulations relating to the public lands and their resources. Section 303(d) of the Act authorizes the Secretary to enter into cooperative agreements with State and local regulatory and law enforcement officials for the enforcement of State laws and local ordinances on the public lands. In addition to general authority under FLPMA, other specific authorities are noted where applicable.

#### §§ 9260.0-4—9260.0-6 [Reserved]

#### § 9260.0-7 Penalties.

Any person violating any provision of part 9260 of this title shall be subject to the specific penalties as noted under this part.

### Subpart 9261—General Management [Reserved]

### Subpart 9262—Land Resource Management

#### § 9262.0 Authority.

43 U.S.C. 1732, 1733, 1740, 1761-1771.

[54 FR 25855, June 20, 1989]

#### § 9262.1 Penalties for unauthorized use, occupancy, or development of public lands.

Under section 303(a) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1733(a)) any person who knowingly and willfully violates the provisions of §§ 2808.10(a), 2812.1-3, 2888.10, or 2920.1-2(a) of this chapter, by using public lands without the requisite authorization, may be tried before a United States magistrate and fined no more than \$1,000 or imprisoned for no more than 12 months, or both.

[70 FR 21090, Apr. 22, 2005]

**Subpart 9263—Minerals  
Management**

**§ 9263.1 Operations conducted under  
the 1872 Mining Law.**

See subpart 3809 of this title for law enforcement provisions applicable to operations conducted on public lands under the 1872 Mining Law.

[65 FR 70132, Nov. 21, 2000]

**Subpart 9264—Range  
Management**

**§ 9264.0–3 Authority.**

(a) The provisions of this subpart are issued under section 303(a) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 *et seq.*) and section 2 of the Taylor Grazing Act of 1934 (43 U.S.C. 315 *et seq.*).

(b) The provisions of § 9264.7 of this title are issued under section 8 of the Wild Free-Roaming Horse and Burro Act of 1971 (16 U.S.C. 1331 *et seq.*).

**§ 9264.1 Grazing administration—exclusive of Alaska.**

Persons performing the following prohibited acts on public and other lands under Bureau of Land Management control may be subject to criminal penalties under § 9264.1(k) of this title:

(a) Allowing livestock or other privately owned or controlled animals to graze on or be driven across those lands without a permit or lease or in violation of the terms and conditions of a permit or lease, either by exceeding the number of livestock authorized, or by allowing livestock to be on these lands in an area or at a time different from that designated;

(b) Installing, using, maintaining, modifying, and/or removing range improvements without authorization;

(c) Cutting, burning, spraying, destroying, or removing vegetation without authorization;

(d) Damaging or removing United States property without authorization;

(e) Molesting livestock authorized to graze on these lands;

(f) Littering;

(g) Violating any provision of 43 CFR part 4700 concerning the protection and

management of wild free-roaming horses and burros;

(h) Violating any Federal or State laws or regulations concerning conservation or protection of natural and cultural resources or the environment including, but not limited to, those relating to air and water quality, protection of fish and wildlife, plants, and the use of chemical toxicants;

(i) Interfering with lawful uses or users;

(j) Knowingly or willfully making a false statement or representation in base property certification, grazing applications, and/or amendments thereto;

(k) Penalties. (1) Under section 2 of the Taylor Grazing Act of 1934 (43 U.S.C. 315 *et seq.*), any person who willfully violates the provisions of § 9264.1 of this title or of approved special rules and regulations is punishable by a fine of not more than \$500.

(2) Under section 303(a) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 *et seq.*), any person who knowingly and willfully violates the provisions of § 9264.1 of this title or of approved special rules and regulations may be brought before a designated United States magistrate and is punishable by a fine of not more than \$1,000 or imprisonment for no more than 12 months, or both.

[45 FR 31276, May 12, 1980, as amended at 47 FR 41713, Sept. 21, 1982]

**§ 9264.2 Grazing administration—Alaska; livestock. [Reserved]**

**§ 9264.3 Grazing administration—Alaska; reindeer. [Reserved]**

**§ 9264.7 Wild free-roaming horse and burro protection, management, and control.**

(a) *Prohibited acts.* In accordance with section 8 of the Wild Free-Roaming Horse and Burro Act (16 U.S.C. 1338), any person who:

(1) Willfully removes or attempts to remove a wild free-roaming horse or burro from the public lands, without authority from the authorized officer, or

(2) Converts a wild free-roaming horse or burro to private use, without authority from the authorized officer, or

## Bureau of Land Management, Interior

## § 9265.6

(3) Maliciously causes the death or harassment of any wild free-roaming horse or burro, or

(4) Processes, or permits to be processed, into commercial products the remains of a wild free-roaming horse or burro, or

(5) Sells, directly or indirectly, a wild free-roaming horse or burro, or the remains thereof, which have not lost their status as a wild free-roaming horse or burro, or

(6) Uses a wild free-roaming horse or burro for commercial exploitation, or

(7) Causes or is responsible for the inhumane treatment of a wild free-roaming horse or burro, or

(8) Uses a wild free-roaming horse or burro for bucking stock, or

(9) Fails, upon written notice, to produce for inspection by an authorized officer those animals assigned to him for private maintenance under a cooperative agreement, or

(10) Fails to notify the authorized officer of the death of a wild free-roaming horse or burro within 7 days of death pursuant to §4740.4-2(f) of this title, or

(11) Removes or attempts to remove, alters or destroys any official mark identifying a wild horse or burro, or its remains, or

(12) Being the assignee of a wild free-roaming horse or burro, or having charge or custody of the animal, abandons the animal without making arrangements for necessary food, water and shelter, or

(13) Being the assignee of a wild free-roaming horse or burro, or having charge or custody of the animal, fails to diligently pursue in an attempt to capture the escaped animal, or

(14) Accepts for slaughter or destruction a horse or burro bearing an official Bureau of Land Management identification mark, and which is not accompanied by a certificate that title to the animal has been transferred, or

(15) After acceptance of an animal for slaughter or destruction, fails to retain for one year the certificate of title to a horse or burro bearing an official Bureau of Land Management identification mark, or

(16) Willfully violates any provisions of the regulations under §9264.7 of this title shall be subject to a fine of not

more than \$2,000 or imprisonment for not more than 1 year, or both. Any person so charged with such violation by the authorized officer may be tried and sentenced by a U.S. Commissioner or magistrate, designated for that purpose by the court by which he/she was appointed, in the same manner and subject to the same conditions as provided in section 3401, title 18, U.S.C.

### Subpart 9265—Timber and Other Vegetative Resources Management

#### § 9265.0-3 Authority.

The provisions of §9265.5 of this title are issued under sections 1852 and 1853 of title 18 U.S.C., and section 1733 of title 43 U.S.C., unless otherwise specified.

[45 FR 31276, May 12, 1980, as amended at 60 FR 50451, Sept. 29, 1995]

#### § 9265.4 Sales of forest products, general.

Commission of any of the acts listed in §5462.2 of this title is a violation of Federal regulations and may subject the responsible person(s) to criminal penalties under titles 18 and 43 of the United States Code.

[60 FR 50451, Sept. 29, 1995]

#### § 9265.5 Non-sale disposals, general.

Commission of any of the acts listed in §5511.4 of this title is a violation of Federal regulations and may subject the responsible person(s) to criminal penalties under titles 18 and 43 U.S.C.

[60 FR 50451, Sept. 29, 1995]

#### § 9265.6 Penalties.

(a) *Sales administration.* Under section 303(a) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1733(a)), any individual who knowingly and willfully commits the prohibited acts under §5462.2(b) of this title is subject to arrest and trial by the United States Magistrate and, if convicted, shall be subject to a fine of not more than \$100,000 in accordance with the applicable provisions of the Sentencing Reform Act of 1984 (18 U.S.C. 3551 *et seq.*), or imprisonment not to exceed 12 months, or both, for each offense, and

any organization that commits these prohibited acts is subject to arrest and trial by the United States Magistrate and, if convicted, shall be subject to a fine of not more than \$200,000, or not more than \$500,000 if commission of the prohibited acts results in death.

(b) *Free use of timber.* (1) Under section 303(a) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1733(a)), any individual who knowingly and willfully commits the prohibited acts under 5511.4(b) of this title is subject to arrest and trial by the United States Magistrate and, if convicted, shall be subject to a fine of not more than \$100,000, or not more than \$250,000 if commission of the prohibited acts results in death, in accordance with the applicable provisions of the Sentencing Reform Act of 1984 (18 U.S.C. 3551 *et seq.*), or imprisonment not to exceed 12 months, or both, for each offense, and any organization that commits these prohibited acts is subject to arrest and trial by the United States Magistrate and, if convicted, shall be subject to a fine of not more than \$200,000, or not more than \$500,000 if commission of the prohibited acts results in death.

(2) *Exceptions for mining and agriculture.* This section shall not prevent any miner or agriculturist from clearing his land in the ordinary working of his mining claim, or in the preparation of his farm for tillage, or from taking the timber necessary to support his improvements, or the taking of timber for the use of the United States; or take away any right or privilege under any existing law of the United States to cut or remove timber from any public lands. Use or taking of timber for these exceptions is subject to the regulations provided in part 2920—Leases, Permits and Easements, part 3715—Use and Occupancy of Mining Claims, subpart 3802—Exploration and Mining, Wilderness Review Program, and/or subpart 3809—Surface Management.

(c) *Timber removed or transported.* Under 18 U.S.C. 1852, any person:

(1) Who unlawfully cuts, or wantonly destroys, any timber growing on the public lands of the United States;

(2) Who unlawfully removes any timber from said public lands, with intent to export or dispose of the same; or

(3) Who, being the owner, master, pilot, operator, or consignee of any vessel, motor vehicle, or aircraft or the owner, director, or agent of any railroad, knowingly transports any timber unlawfully cut or removed from said lands, or lumber manufactured therefrom; shall be subject to arrest and trial by the United States Magistrate and, if convicted, shall be subject to a fine of not more than \$100,000, or not more than \$250,000 if commission of the prohibited acts results in death, in accordance with the applicable provisions of the Sentencing Reform Act of 1984 (18 U.S.C. 3551 *et seq.*), or imprisonment not to exceed 12 months, or both, for each offense, and any organization that commits these prohibited acts is subject to arrest and trial by the United States Magistrate and, if convicted, shall be subject to a fine of not more than \$200,000, or not more than \$500,000 if commission of the prohibited acts results in death.

(d) *Trees cut or injured.* Under 18 U.S.C. 1853, whoever unlawfully cuts, or wantonly injures or destroys any tree growing, standing, or being upon any land of the United States which, in pursuance of law, has been reserved or purchased by the United States for any public use, or upon any Indian reservation, or lands belonging to or occupied by any tribe of Indians under the authority of the United States, or any Indian allotment while the title to the same shall be held in trust by the Government, or while the same shall remain inalienable by the allottee without the consent of the United States, shall be subject to arrest and trial by the United States Magistrate and, if convicted, shall be subject to a fine of not more than \$100,000 in accordance with the Sentencing Reform Act of 1984 (18 U.S.C. 3551 *et seq.*), or imprisonment not to exceed 12 months, or both, for each offense, and any organization that commits these prohibited acts is subject to arrest and trial by the United States Magistrate and, if convicted, shall be subject to a fine of not more than \$200,000.

[60 FR 50451, Sept. 29, 1995]

## Bureau of Land Management, Interior

## § 9268.3

### Subpart 9266—Wildlife Management

#### § 9266.0–3 Authority.

The provisions of this subpart are issued under section 5 of the Outer Continental Shelf Lands Act of 1953 (43 U.S.C. 1334).

#### § 9266.4 Viable coral communities.

(a) *Requirement for a permit.* No person shall engage in any operation which directly causes damage or injury to a viable coral community that is located on the Outer Continental Shelf without having obtained a permit for said operations.

(b) *Penalty.* Any person who knowingly and willingly violates the regulations of § 9266.4 of this title shall be guilty of a misdemeanor and punishable by a fine of not more than \$2,000 or imprisonment for not more than 6 months or by both such fine and imprisonment. Each day of violation shall be deemed a separate offense.

### Subpart 9267—Water Management [Reserved]

### Subpart 9268—Recreation Programs

#### § 9268.0–3 Authority.

The provisions of this subpart are issued under section 303(a) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1733), and other authorities where specifically noted.

#### § 9268.1 Cultural resource management. [Reserved]

#### § 9268.2 Natural history resource management procedures. [Reserved]

#### § 9268.3 Recreation management—procedures.

(a) *Off-road vehicles, use of public lands—(1) Applicability.* The regulations in this subpart apply to all public lands, roads and trails under administration of the Bureau of Land Management.

(2) *Conditions of use—regulations governing use.* (i) The operation of off-road vehicles is permitted on those areas and trails designated as open to off-road vehicle use.

(ii) Any person operating an off-road vehicle on those areas and trails designated as limited shall conform to all terms and conditions of the applicable designation orders.

(iii) The operation of off-road vehicles is prohibited on those areas and trails closed to off-road vehicle use.

(iv) It is prohibited to operate an off-road vehicle in violation of State laws and regulations relating to use, standards, registration, operation, and inspection of off-road vehicles. To the extent that State laws and regulations do not exist or are less stringent than the regulations in part 8340 of this title, the regulations in this part are minimum standards and are controlling.

(v) No person may operate an off-road vehicle on public lands without a valid State operator's license or learner's permit. Exceptions are:

(A) A person under the direct supervision of an individual 18 years of age or older who has a valid operator's license and who is responsible for the acts of the person supervised.

(B) A person certified by State government as competent to drive off-road vehicles after successfully completing a State approved operator's training program.

(C) Operation of an off-road vehicle in areas of Alaska designated by the Bureau's State Director for Alaska.

(vi) Any person supervising a non-licensed driver shall be responsible for the operation of the vehicle and shall be responsible for the actions of the driver.

(vii) No person shall operate an off-road vehicle on public lands:

(A) In a reckless, careless, or negligent manner;

(B) In excess of established speed limits;

(C) While under the influence of alcohol, narcotics, or dangerous drugs;

(D) In a manner causing, or likely to cause significant, undue damage to or disturbance of the soil, wildlife, wildlife habitat, improvements, cultural, or vegetative resources or other authorized uses of the public lands; and

(E) During night hours, from a half-hour after sunset to a half-hour before sunrise, without lighted headlights and taillights.

(viii) Drivers of off-road vehicles shall yield the right-of-way to pedestrians, saddle horses, pack trains, and animal-drawn vehicles.

(ix) Any person who operates an off-road vehicle on public lands must comply with the regulations in part 8340 and §8341.2 of this title as applicable, while operating such vehicle on public lands.

(3) *Vehicle operations—standards.* (i) No off-road vehicle may be operated on public lands unless equipped with brakes in good working condition.

(ii) No off-road vehicle equipped with a muffler cutout, bypass, or similar device, or producing excessive noise exceeding Environmental Protection Agency standards, when established, may be operated on public lands.

(iii) By posting appropriate signs or by marking a map which shall be available for public inspection at local Bureau offices, the authorized officer may indicate those public lands upon which no off-road vehicle may be operated unless equipped with a properly installed spark arrester. The spark arrester must meet either the U.S. Department of Agriculture—Forest Service Standard 5100-1a, or the 80 percent efficiency level standard when determined by the appropriate Society of Automotive Engineers (SAE) Recommended Practices J335 or J350. These standards include, among others, the requirements that:

(A) The spark arrester shall have an efficiency to retain or destroy at least 80 percent of carbon particles for all flow rates, and

(B) The spark arrester has been warranted by its manufacturer as meeting this efficiency requirement for at least 1,000 hours subject to normal use, with maintenance and mounting in accordance with the manufacturer's recommendation. A spark arrester is not required when an off-road vehicle is being operated in an area which has 3 or more inches of snow on the ground.

(iv) Vehicles operating during night hours, from a half-hour after sunset to a half-hour before sunrise, shall comply with the following:

(A) Headlights shall be of sufficient power to illuminate an object at 300 feet at night under normal, clear atmospheric conditions. Two- or three-wheeled vehicles or single-tracked ve-

hicles will have a minimum of one headlight. Vehicles having four or more wheels or more than a single track will have a minimum of two headlights, except double tracked snowmachines with a maximum capacity of two people may have only one headlight.

(B) Red taillights, capable of being seen at a distance of 500 feet from the rear at night under normal, clear atmospheric conditions, are required on vehicles in the same numbers as headlights.

(4) *Penalties.* Any person who violates or fails to comply with the regulations of §9268.3 of this title is subject to arrest, conviction, and punishment pursuant to appropriate laws and regulations. Such punishment may be a fine of not more than \$1,000 or imprisonment for not longer than 12 months, or both.

(b) *Management areas.* [Reserved]

(c) *Operations—Rules of conduct—(1) Developed sites and areas.* The following rules are adopted to protect public property and to conserve the resources in developed recreation sites for public use and enjoyment. The user shall not:

(i) Intentionally or wantonly destroy, deface or remove any natural feature or plant;

(ii) Intentionally or wantonly destroy, injure, deface, remove, or disturb in any manner any public building, sign, equipment, marker, or other structure or property.

(2) *Undeveloped sites and areas—prohibited activities.* In the use of lands for public outdoor recreation purposes, no one shall:

(i) Intentionally or wantonly destroy, deface, injure, sign, remove or disturb any public building, sign, equipment, marker, or other public property;

(ii) Harvest or remove any vegetative or mineral resources or object of antiquity, historic, or scientific interest unless such removal is in accordance with part 3 or §8363.2-1 of this title, or is otherwise authorized by law;

(iii) Appropriately mutilate, deface, or destroy any natural feature, object of natural beauty, antiquity, or other public or private property;

(iv) Dig, remove, or destroy any tree or shrub;

## Bureau of Land Management, Interior

## § 9268.3

(v) Gather or collect renewable or nonrenewable resources for the purpose of sale or barter unless specifically permitted or authorized by law;

(vi) Drive or operate motorized vehicles or otherwise conduct himself in a manner that may result in unnecessary frightening or chasing of people or domestic livestock and wildlife;

(vii) Use motorized mechanical devices or explosives for digging, scraping, or trenching for purposes of collecting.

(3) *Penalties.* Any person who knowingly and willfully violates any rule of conduct described in §9268.3(c) (1) and (2) of this title shall be fined not more than \$1,000 or imprisoned for not more than 12 months, or both.

(d) *Operations—closures—*(1) *Closure of lands.* In the management of lands to protect the public and assure proper resource utilization, conservation, and protection, public use and travel may be temporarily restricted. For instance, areas may be closed during a period of high fire danger or unsafe conditions, or where use will interfere with or delay mineral development, timber and livestock operations, or other authorized use of the lands. Areas may also be closed temporarily to:

(i) Protect the public health and safety;

(ii) Prevent excessive erosion;

(iii) Prevent unnecessary destruction of plant life and wildlife habitat;

(iv) Protect the natural environment;

(v) Preserve areas having cultural or historical value; or

(vi) Protect scientific studies or preserve scientific values.

(2) *Penalties.* Any person who knowingly and willfully violates any closure order issued under §9268.3(c)(2) of this title shall be fined not more than \$1,000 or imprisoned for not more than 12 months, or both.

(e) *Use authorization—*(1) *Rules for visitor uses, other than on developed recreation sites—enforcement.* Failure to pay any fee or failure to obtain a permit required by part 2930 of this chapter or operating with a suspended permit shall be punishable pursuant to the Federal Land Policy and Management Act of 1976, the Land and Water Conservation Fund Act, as amended, the

Wild and Scenic Rivers Act, the National Trails Act, the Sikes Act, and other laws when applicable [see §9268.3(e)(2)].

(2) *Penalties.* (i) Section 303(a) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1733) provides: any person who knowingly and willfully violates any such regulation which is lawfully issued under this Act shall be fined no more than \$1,000 or imprisoned no more than twelve months, or both. Any person charged with a violation of such regulation may be tried and sentenced by any United States magistrate designated for that purpose by the court by which he was appointed, in the same manner and subject to the same conditions and limitations as provided for in section 3401 of Title 18 of the United States Code.

(ii) Section 2, Land and Water Conservation Fund Act of 1964 (16 U.S.C. 4601-6a), provides that any person violating the rules and regulations issued under section 4601-6e of title 16 U.S.C. shall be punishable by a fine of not more than \$100.

Any person so arrested may be tried and sentenced by any United States magistrate specifically designated for that purpose by the court by which he was appointed, in the same manner and subject to the same conditions as provided for in title 18 U.S.C., section 3401, subsections (b), (c), (d), and (e), as amended.

(iii) Section 204(a) of the Sikes Act of 1974 (16 U.S.C. 670g-n), provides that:

(A) Any person who hunts, traps, or fishes on any public land which is subject to a conservation and rehabilitation program implemented under this Act without having on his person a valid public land management area stamp, if the possession of such a stamp is required, shall be fined not more than \$1,000, or imprisoned for not more than 6 months, or both.

(B) Any person who knowingly violates or fails to comply with any regulations prescribed under section 670h(c)(5) of title 16 U.S.C. shall be fined not more than \$500, or imprisoned not more than six months, or both.

(iv) Section 7 of the National Trails Act of 1968 (16 U.S.C. 1241-1249), provides: Any person who violates such regulations issued under section 1246 (i)

#### § 9268.4

of title 16 U.S.C., and deemed necessary by the Secretary of the Interior, shall be guilty of a misdemeanor, and may be punished by a fine of not more than \$500, or by imprisonment not exceeding 6 months, or by both such fine and imprisonment.

[45 FR 31276, May 12, 1980, as amended at 46 FR 46810, Sept. 22, 1981; 67 FR 61745, Oct. 1, 2002]

#### § 9268.4 Visual resource management. [Reserved]

#### § 9268.5 Wilderness management. [Reserved]

#### § 9268.6 Environmental education and protection. [Reserved]

### Subpart 9269—Technical Services

#### § 9269.0–3 Authority.

(a) The provisions of this subpart are issued under the authority of R.S. 2478; 43 U.S.C. 1201.

(b) In addition to liability for trespass on the public lands, as indicated in parts 9230 and 9260 of this title, persons responsible for such trespass may be prosecuted criminally under any applicable Federal law. Penalties are prescribed by the following statutes:

(1) Timber trespass. 18 U.S.C. 1852, 1953.

(2) Turpentine trespass. 18 U.S.C. 1854.

(3) Coal trespass. 18 U.S.C. 1851, 30 U.S.C. 201(b)(4).

#### § 9269.3 Criminal trespass.

#### § 9269.3–1 General management. [Reserved]

#### § 9269.3–2 Land resource management. [Reserved]

#### § 9269.3–3 Minerals management.

(a) *Oil and gas leasing.* [Reserved]

(b) *Geothermal resources leasing.* [Reserved]

(c) *Outer continental shelf leasing.* [Reserved]

(d) *Coal management*—(1) *Trespass.* Mining operations conducted prior to the effective date of a lease shall constitute an act of trespass and be subject to penalties specified in § 9239.5 of this title.

#### 43 CFR Ch. II (10–1–08 Edition)

(2) *Penalty for unauthorized exploration for coal.* (i) Any person who willfully conducts coal exploration for commercial purposes without an exploration license issued under subpart 3410 of this title shall be subject to a fine of not more than \$1,000 for each day of violation.

(ii) All data collected by said person on any Federal lands as a result of such violations shall immediately be made available to the Secretary, who shall make the data available to the public as soon as possible.

(iii) No penalty under this section may be assessed unless such person is given notice and opportunity for a hearing with respect to such violation pursuant to part 4 of this title.

(e) *Minerals other than oil, gas and coal.* [Reserved]

(f) *Minerals materials disposal.* [Reserved]

(g) *Multiple use mining.* [Reserved]

(h) *Mining claims under the general mining laws.* [Reserved]

#### § 9269.3–4 Range management.

(a) *Grazing administration—exclusive of Alaska*—(1) *Unlawful enclosures or occupancy.* Section 1 of the Act of February 25, 1885 (43 U.S.C. 1061), declares any enclosure of public lands made or maintained by any party, association, or corporation who “had no claim or color of title made or acquired in good faith, or an asserted right thereto, by or under claim, made in good faith with a view to entry thereof at the proper land office under the general laws of the United States at the time any such enclosure was or shall be made” to be unlawful and prohibits the maintenance or erection thereof. (See § 9269.3–4(a)(2) of this title).

(2) *Penalties.* Under section 4 of the Act of February 25, 1885 (43 U.S.C. 1064), any person violating any of the provisions of this Act, whether as owner, part owner, or agent, or who shall aid, abet, counsel, advise, or assist in any violation hereof, shall be deemed guilty of a misdemeanor and fined a sum not exceeding \$1,000, or be imprisoned not exceeding one year, or both, for each offense.

(b) *Grazing administration; Alaska; livestock.* (1) Grazing livestock upon, allowing livestock to drift and graze on,

## Bureau of Land Management, Interior

## § 9269.3-5

or driving livestock across lands that are subject to lease or permit under the provisions of part 9230 of this title or within a stock driveway, without a lease or other authorization from the Bureau of Land Management, is prohibited and constitutes trespass. Trespassers will be liable in damages to the United States for forage consumed and for injury to Federal property, and may be subject to criminal prosecution for such unlawful acts. A lessee who grazes livestock in violation of the terms and conditions of his lease by exceeding numbers specified, or by allowing the livestock to be on Federal land in an area or at a time different from that designated in his lease shall be in default and shall be subject to the provisions of § 4220.7 (g) and (h) of this title.

(2) *Penalties.* Under section 2 of the Taylor Grazing Act, any person who willfully grazes livestock in such areas without such authority shall, upon conviction, be punished by a fine of not more than \$500.

(c) *Grazing administration; Alaska; reindeer.* (1) Any use of the Federal lands for reindeer grazing purposes, unless authorized by a valid permit issued in accordance with the regulations in part 4300 of this title, is unlawful and is prohibited.

(2) *Penalties.* Any person who willfully violates any of the rules and regulations in part 4300 of this title shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be pun-

ishable by imprisonment for not more than one year, or by a fine of not more than \$500.

(d) *Wild free-roaming horse and burro protection, management, and control.* [Reserved]

### § 9269.3-5 Timber management.

(a) *Sales of forest products; general.* [Reserved]

(b) *Non-sale disposals; general—*(1) *Unauthorized cutting of timber-mineral and non-mineral lands.* (i) The cutting or removing of the timber referred to in §§ 5511.1 to 5511.1-4 of this title in any other manner than that authorized by such sections will be considered a trespass.

(ii) The cutting of timber for sale and speculation, or for use by others than the permittee, is strictly prohibited.

(iii) Where permits are secured by fraud or timber is not used in accordance with § 5511.1-4 of this title, the Government will enforce the same civil and criminal liabilities as in other cases of timber trespass upon public lands.

(2) *Unauthorized cutting of timber—Alaska.* The cutting of the timber from the public land in Alaska, other than in accordance with the terms of the law and §§ 5511.2 to 5511.2-6 of this title shall render the persons responsible for trespass and such persons may be prosecuted criminally under title 18 U.S.C., (see § 9265.5(d) of this title), or under State law.

SOURCE: 60 FR 49446, Sept. 25, 1995, unless otherwise noted.

### § 10000.1 Purpose.

This part describes the general organization of the agency and the major functions of the operating units established within it.

### § 10000.2 Authority.

This part is issued under the authority of 5 U.S.C. 552 and section 301(g)(3)(A) of the Central Utah Project Completion Act (Public Law 102-575, 106 Stat. 4600, 4625, October 30, 1992).

### § 10000.3 Definitions.

*Act* refers to the Central Utah Project Completion Act, Titles II, III, IV, V, and VI of Public Law 102-575, October 30, 1992.

### § 10000.4 Objective.

Section 301 of the Act established the Commission to coordinate the implementation of the mitigation and conservation provisions of the Act among Federal and State fish, wildlife, and recreation agencies in the State of Utah.

### § 10000.5 Mission statement.

(a) The mission of the Utah Reclamation Mitigation and Conservation Commission is to formulate and implement the policies and objectives to accomplish the mitigation and conservation projects authorized in the Act in coordination with Federal and State fish, wildlife and recreation agencies and with local governmental entities and the general public.

(b) In fulfillment of this mission, the Commission acknowledges and adopts

the following Guiding Principles for the conduct of its responsibilities.

(1) The Commission will conduct its activities in accordance with the mandate and spirit of the Act, including all other pertinent laws and regulations, and will emphasize and assure full public involvement.

(2) The Commission recognizes the existing authorities of other Federal and State agencies for the management of fish, wildlife and recreation resources and habitats in the State, and pledges to cooperate with said agencies to the fullest extent possible.

(3) The Commission is committed to raising the awareness and appreciation of fish and wildlife and their importance to the quality of life, as well as the fundamental and intrinsic right to coexistence as fellow species on our planet.

(4) Whenever and wherever pertinent, the Commission will strive to implement projects in accordance with ecosystem-based management and principles.

(5) The Commission will strive to implement projects which offer long-term benefits to fish, wildlife and recreation resources wherever and whenever pertinent.

(6) The Commission is committed to operate in a cost-effective manner, minimize overhead and operating expenses so as to maximize funds available for projects, and encourage and seek out joint-venture funding and partnerships for projects.

### § 10000.6 Organization and functions.

(a) The Commission is an executive branch agency independent from the Department of the Interior, except that the Department is the vehicle through which the Commission receives appropriated funds.

(b) The five member Commission appointed by the President is the policy-making body for the agency and has the following duties and responsibilities:

(1) Formulating the agency policies and objectives, and approving plans and projects, for implementation of the fish, wildlife, and recreation mitigation and conservation projects and features authorized in the Act;

(2) Reviewing and approving agency fiscal year budgets formulated and recommended by the Executive Director;

(3) Conducting public meetings on agency plans, programs, and projects;

(4) Representing the agency at Congressional hearings on annual agency appropriations or agency programs; and

(5) Reviewing and approving plans for the appointment or acquisition by the Executive Director of such permanent, temporary, and intermittent personnel services as the Executive Director considers appropriate.

(c)(1) The Executive Director is the chief executive officer of the agency and has, but is not limited to, the following duties and responsibilities:

(i) Implementing the policies, plans, objectives, and projects adopted by the Commission for implementation of the fish, wildlife, and recreation mitigation and conservation projects and features authorized in the Act;

(ii) Representing the Commission as directed and authorized, including serving as the liaison with Federal, State, and local government agencies and public interest groups, and providing for public notice and involvement and agency consultation with respect to Commission activities;

(iii) Attending all meetings of the Commission and participating in its discussions and deliberations; making inquiries into and conducting investigations into all agency activities; examining all proposed projects, agreements, and contracts to which the agency may become a party; preparing technical and administrative reports, agency correspondence, and other documents and materials as required; notifying the Commission of any emergency that may arise within or affect the agency; and keeping the Commission fully informed on all important aspects of the agency's administration and management;

(iv) Appointing agency staff in accordance with the staffing plan approved by the Commission and in accordance with the Federal personnel rules and regulations applicable under the Act, including: Appointing and managing qualified staff capable of carrying out assigned responsibilities; establishing compensation and stand-

ards, qualifications, and procedures for agency personnel; procuring temporary and intermittent personnel services as necessary and as are within the annual budget approved by the Commission; terminating personnel; ensuring compliance with Federal Safety Program and prescribed health and safety standards; and giving positive direction in accomplishing equal employment opportunity commitments for fair selection, encouragement, and recognition of employees;

(v) Formulating the agency budget and cost estimates to support agency plans, programs, and activities, and providing such budget recommendations and estimates to the Commission;

(vi) Executing, administering, and monitoring contracts, cooperative agreements, and such other documents as are necessary to implement mitigation and conservation projects approved by the Commission through the execution of Memoranda of Agreements, motions, or other official actions, including approving, administering, and monitoring expenditures of funds and other actions taken pursuant to such contracts, cooperative agreements, and other such documents;

(vii) Monitoring, measuring, and reporting to the Commission progress in carrying out mitigation and conservation plans and projects;

(viii) Directing the day-to-day administration of the agency, including:

(A) Approving expenditures and executing contracts and leases for the acquisition of property or services as are necessary for the administration of the agency, provided such expenditures are within the agency's annual appropriations and the annual budget as approved by the Commission, and provided further that the Executive Director shall consult with the Commission prior to the approval of any such expenditure in excess of \$25,000;

(B) Enforcing, observing, and administering all laws, rules, regulations, leases, permits, contracts, licenses and privileges applicable to or enforceable by the agency; consulting with and advising agency employees; designating, in the absence of the Executive Director, a qualified agency employee to direct agency activities and to make such decisions as are required during

such absence; delegating responsibility to agency personnel as in the judgment of the Executive Director will benefit agency operations and functions; and

(C) Managing and maintaining agency office space, equipment, and facilities in a sound and efficient manner; establishing and maintaining agency files and archives; and preparing and maintaining an up-to-date inventory of all agency property; and

(ix) Exercising the full power of the Commission in times of emergency until such time as the emergency ends or the Commission meets in formal session.

(2) Except in emergency situations and when specifically delegated such responsibility by the Commission, the Executive Director has no authority to formulate mitigation and conservation policies and objectives or to approve or disapprove agency plans or projects, for implementation of the fish, wildlife, and recreation mitigation and conservation projects and features authorized in the Act.

(d) The agency staff is organized into four functional areas:

(1) Project Administration, through the Project Manager, responsible for development and management of mitigation and conservation projects;

(2) Planning Administration, through the Planning Manager, responsible for development and coordination of mitigation and conservation plans and for environmental compliance in general;

(3) Public Information, through the Public Information Officer, responsible for preparation of reports and documents and dissemination to the public of information regarding agency programs and projects; and

(4) Administrative Services, through the Administrative Officer, responsible for administrative support services and office management.

#### **§ 10000.7 Place of business; service of process.**

(a) The principle place of business and offices of the agency are located at 111 East Broadway, Suite 310, Salt Lake City, Utah 84111. All correspondence and requests for information or other materials should be submitted to the agency at this address.

(b) The Executive Director is the agency official designated to accept service of process on behalf of the agency.

AUTHORITY: 43 U.S.C. 620k(note); sec. 301(g)(3) (A) and (C) of Pub. L. 102-575, 106 Stat. 4600, 4625.

SOURCE: 60 FR 49448, Sept. 25, 1995, unless otherwise noted.

#### **§ 10005.1 Purpose.**

The planning rule in this part establishes the Commission's policies regarding the mitigation and conservation plan required by the Central Utah Project Completion Act, Public Law 102-575, 106 Stat. 4600, 4625, October 30, 1992. It defines the procedures that the Commission will follow in preparing and implementing the plan and provides information to other agencies and the public regarding how they might participate.

## § 10005.2

## 43 CFR Ch. III (10–1–08 Edition)

### § 10005.2 Definitions.

*The Act* refers to the Central Utah Project Completion Act, Titles II, III, IV, V, and VI of Public Law 102–575, October 30, 1992.

*Applicant* refers to an agency, organization, or individual providing formal recommendations to the Commission regarding projects to be considered for inclusion in the Commission's plan.

*Commission* means the Utah Reclamation Mitigation and Conservation Commission, as established by section 301 of the Act.

*Interested parties* refers to Federal and State agencies, Indian tribes, non-profit organizations, county and municipal governments, special districts, and members of the general public with an interest in the Commission's plan and plan development activities.

*Other applicable Federal laws* refers to all Federal acts and agency regulations that have a bearing on how the Commission conducts its business, with specific reference to the Fish and Wildlife Coordination Act of 1934, as amended (16 U.S.C. 661 et seq.); the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 et seq.); and the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 et seq.).

*Plan* and *five-year plan* refer to the Commission's mitigation and conservation plan as required by section 301 of the Act.

*Planning rule* refers to this part, which is a component of the Commission's administrative rules and which provides guidance for the development, and implementation, of the Commission's plan.

*Section 8 funds* refers to the section of the Colorado River Storage Project Act that provides for congressionally authorized funds to be used in mitigating the effects of the Colorado River Storage Project on fish, wildlife, and related recreation resources.

### § 10005.3 Policy.

(a) As directed in section 301(a) of the Act, the Commission was established “to coordinate the implementation of the mitigation and conservation provisions of this Act among the Federal and State fish, wildlife, and recreation agencies. The United States Senate Committee on Energy and Natural Re-

sources report accompanying the Act provided further clarification of Congressional intent: “Focusing of such authority into a single entity is intended to eliminate past dispersion among several Federal and State resource management agencies of the responsibility, and therefore accountability, for reclamation mitigation in Utah.”

(b) It is the policy of the Commission that the mitigation and conservation plan, in tandem with the Act, serve as the principal guidance for the Commission in fulfilling its mitigation and conservation responsibilities. Further, the Commission will use the development of the plan, and subsequent amendment processes, as the primary means to involve agencies and the public in the Commission's decision making process.

### § 10005.4 Planning rule authority.

(a) The Commission is required to adopt administrative rules pursuant to the Administrative Procedures Act. The Commission adopts the rule in this part pursuant to that authority and to Section 301(g)(3)(A) and (C) of the Act, which provide for establishment of a rule to guide applicants in making recommendations to the Commission, and to ensure appropriate public involvement.

(b) Adoption of the planning rule constitutes a policy decision on the part of the Commission and, as such, requires formal public notification and approval by the Commission according to established procedures. The planning rule is a component of the administrative rules of the Commission and has the authority accorded to such administrative rules, as described in the Administrative Procedures Act.

### § 10005.5 Directives from the Act relating to the plan.

The basic directions for preparation of the plan are contained in Section 301 of the Act. Sections 304, 314, and 315 provide additional guidance. Provisions that hold particular relevance are identified below.

(a) *Primary authority.* Section 301(f)(1) directs that the mitigation and conservation funds available under the Act are to be used to “conserve, mitigate,

and enhance fish, wildlife, and recreation resources affected by the development and operation of Federal reclamation projects in the State of Utah," and, further, that these funds are to be administered in accordance with "the mitigation and conservation schedule in Section 315 of this Act, and if in existence, the applicable five-year plan." Section 301 further clarifies that Commission expenditures "shall be in addition to, not in lieu of, other expenditures authorized or required from other entities under other agreements or provisions of law."

(b) *Reallocation of funds.* Section 301(f)(2) provides for the reallocation of Section 8 funds if the Commission determines "after public involvement and agency consultation \* \* \* that the benefits to fish, wildlife, or recreation will be better served by allocating such funds in a different manner." Such reallocation requires the approval of the U.S. Fish and Wildlife Service if funds are to be reallocated from fish and wildlife purposes to recreation purposes. The Commission's authority to depart from the mitigation and conservation schedule specified in Section 315 of the Act is reiterated in Section 301(h)(1).

(c) *Funding priority.* Section 301(f)(3) directs that the Commission "shall annually provide funding on a priority basis for environmental mitigation measures adopted as a result of compliance with the National Environmental Policy Act of 1969 for project features constructed pursuant to titles II and III of this Act."

(d) *Plan adoption and content.* Section 301(g)(1) directs that the Commission adopt a plan "for carrying out its duties" and that the plan "shall consist of the specific objectives and measures the Commission intends to administer \* \* \* to implement the mitigation and conservation projects and features authorized in this Act."

(e) *Recommendations.* Section 301(g)(3)(A) directs that "the Commission shall request in writing from the Federal and State fish, wildlife, recreation, and water management agencies, the appropriate Indian tribes, and county and municipal entities, and the public, recommendations for objectives and measures to implement the mitiga-

tion and conservation projects and features authorized in this Act or amendments thereto."

(f) *Public involvement.* Section 301(g)(3)(C) directs the Commission to provide for appropriate public involvement in the review of Commission documents produced subsequent to receiving recommendations.

(g) *Guidance on selecting measures.* Section 301(g)(4) identifies the types of measures that are to be included in the plan, namely those that will—

(1) Restore, maintain, or enhance the biological productivity and diversity of natural ecosystems within the State and have substantial potential for providing fish, wildlife, and recreation mitigation and conservation opportunities;

(2) Be based on, and supported by, the best available scientific knowledge;

(3) Utilize, where equally effective alternative means of achieving the same sound biological or recreational objectives exist, the alternative that will also provide public benefits through multiple resource uses;

(4) Complement the existing and future activities of the Federal and State fish, wildlife, and recreation agencies and appropriate Indian tribes;

(5) Utilize, when available, cooperative agreements and partnerships with private landowners and nonprofit conservation organizations; and

(6) Be consistent with the legal rights of appropriate Indian tribes.

(h) *Definite plan report.* Section 304 directs that mitigation commitments included in the 1988 draft Definite Plan Report for the Bonneville Unit of the Central Utah Project (DPR) which have not yet been completed are to be undertaken in accordance with that report and the schedule specified in Section 315 of the Act, unless otherwise provided for in the Act.

(i) *Implementation schedule.* Section 315 identifies mitigation and conservation projects to be implemented and provides a schedule and budget for doing so. Details on select components of Section 315 may be found in Sections 302 through 313, excluding Section 304.

## § 10005.6

### § 10005.6 Responsibilities.

Responsibilities concerning implementation of this planning rule are assigned as follows:

(a) *Commission.* The Commission is responsible for adopting this planning rule, including the project evaluation procedures contained herein. The Commission is also responsible for formal adoption of the final plan and, following this, approving, on a project by project basis, of agreements to implement the specific elements contained in the plan.

(b) *Executive Director and Commission staff.* The Executive Director and Commission staff are responsible for preparing planning documents, including preliminary evaluation of projects, and for consultation with agencies and other interested parties regarding the various aspects of the planning process, in accordance with procedures set forth in this planning rule.

(c) *Department of Interior Solicitor.* The Department of the Interior's Regional Solicitor acts as the agency's attorney-advisor and is responsible for advising the Commission on legal matters related to the planning rule, the plan, and the planning process as agreed upon between the Department and the Commission.

(d) *Secretary of the Interior's Representative to the Central Utah Project.* The Secretary's Representative is responsible for monitoring the plan, and activities undertaken as components of the plan, with regard to their consistency with the Act and their compatibility with other activities required by the Act. The Secretary's Representative is also responsible for coordinating relevant activities of other agencies within the Department of the Interior and for coordinating the process by which Congressionally appropriated funds are made available for Commission mitigation and conservation activities.

(e) *Interested parties.* Federal and State resource agencies, Indian tribes, and other interests are, should they choose to become involved, responsible for providing meaningful recommendations regarding potential projects, for coordinating the development of these recommendations with other appropriate agencies and organizations, and,

## 43 CFR Ch. III (10–1–08 Edition)

as applicable, for participation in implementation of projects.

### § 10005.7 Agency consultation and public involvement.

The Commission considers agency consultation and public involvement to be central components of the planning process. Interested parties will be given the opportunity to become involved at several stages in the plan development, process. The major opportunities are as follows:

(a) *Planning rule development.* The initial opportunity for involvement occurs in the preparation of this planning rule, through providing written or oral comment to the Commission prior to adoption.

(b) *Project recommendations.* The next opportunity is in the preparation of recommendations for projects to be included in the Commission's plan. The Commission will make a formal announcement that it is soliciting recommendations for potential projects. Interested parties will have ninety days within which to respond. Commission staff will, upon request and as dictated by work load, provide guidance and other assistance in the preparation of project recommendations. Interested parties are encouraged to work cooperatively with others in the preparation of joint recommendations. Commission staff will facilitate this as appropriate. Section 10005.18 provides additional direction on this. At the end of the ninety day period the Commission will make all recommendations received during that time available for public review. These will be available at the Commission office during normal business hours. Copies will also be provided to those requesting them at a reasonable charge.

(c) *Plan preparation.* At the close of the ninety day project solicitation period, the Commission will proceed to prepare a draft plan. Several opportunities for agency consultation and public involvement will be provided during the preparation of the plan. One or more public briefings will be held during this period. Briefings will be announced in appropriate local and regional media. Work sessions may also

be held, sponsored either by the Commission or jointly with other interested parties, to discuss individual projects or other topics of general interest. Interested parties may also request meetings with Commission staff to discuss specific projects or issues. The availability of staff for such meetings will be dictated by work load. During this time, interested parties may also attend, and participate in, Commission meetings where the various aspects of the plan are discussed. Written comments will also be accepted during the plan preparation period.

(d) *Review of draft plan.* Following release of the draft plan, interested parties will be given thirty days within which to provide formal written comments. During this time, interested parties may request meetings with Commission staff to discuss aspects of the draft plan. The Commission will also receive comments on the draft plan at appropriate times during regularly scheduled Commission meetings. The Commission may, at its discretion, convene one or more public meetings to discuss issues related to the draft plan.

(e) *Final plan.* The release of the final plan will be announced in the media and copies made available to the public. As warranted, the Commission may hold one or more meetings to brief interested parties on the final plan.

(f) *Amendments to the plan.* The opportunities for agency consultation and public involvement described above will also be provided each time the Commission undertakes a comprehensive revision of the plan. In addition, the Commission will give appropriate public notice and grant an opportunity to comment at such times as the Commission is considering other, less comprehensive amendments. Section 10005.21 provides additional information on how agencies and the public may become involved in the plan amendment process.

#### § 10005.8 Mitigation obligations.

While the Act authorizes the Commission to undertake a wide range of general planning and mitigation activities, it also specifies certain projects or groups of projects that the Commission is to implement. The Commission con-

siders these obligations from the Act to be integral components of the mitigation and conservation plan and of the planning process used to develop this plan. From the perspective of the plan, two issues are germane. These are the extent to which these obligations must take priority over other projects, either in terms of funding or sequencing and the extent to which there is flexibility in the specific actions to be taken in fulfillment of these obligations. Through this planning rule and other means the Commission will ensure that interested parties are made aware of the implications of these obligations in order that they might use this information when participating in the development and implementation of the plan.

(a) *Description of mitigation obligations.* Obligations principally derive from three portions of the Act: Title II, section 304, and section 315. Following is a description of the obligations contained in each.

(1) *Title II.* Title II authorizes funding and provides guidance for completion of certain features of the Central Utah Project. It also provides for Commission involvement in several specific activities relating to Central Utah Project mitigation, including funding for specific Section 8 mitigation activities. In the future, additional Title II features will be implemented. These will be subject to environmental review through NEPA or other applicable Federal laws and will, in many instances, be coupled with mitigation measures. Section 301(f)(3) of the Act directs that priority be given for funding of mitigation measures that are associated with Central Utah Project features identified in either Title II or III of the Act that have been, or will be, authorized through compliance with NEPA.

(2) *Section 304.* This section directs that mitigation and conservation projects contained in the DPR be completed and that this be accomplished in accordance with the DPR and the schedule specified in section 315 of the Act. Several elements of the DPR have been either completed or initiated.

(3) *Section 315.* This section identifies several mitigation and conservation projects that are to be implemented to

enhance fish, wildlife, and recreation resources. It also identifies the funds that are to be authorized for each project. Initial phases of selected section 315 projects have already received Commission funding approval. Additional section 315 projects have undergone substantial review and detailed implementation plans have, in some cases, been prepared.

(b) *Commission policy on fulfilling obligations.* As referenced in §10005.5, Section 301(f)(1) and (2) of the Act provides for re-programming of Section 8 funds to other projects in accordance with the plan and/or following appropriate public involvement and agency consultation, and provided “that the benefits to fish, wildlife, or recreation will be better served” by doing so. The Commission interprets this as giving the Commission broad discretion to determine, with appropriate agency consultation and public involvement, whether to implement projects delineated in the above stated sections and, should the Commission choose to implement these, the form that this implementation will take.

(1) This notwithstanding, the Commission recognizes that the projects referenced in Title II, Section 304, and Section 315 have, in most cases, undergone considerable planning as well as agency and public scrutiny. Their inclusion in the Act represents a consensus among Federal and state agencies, water developers, and the national and state environmental communities that these mitigation measures have merit. Further, NEPA proceedings have, in some instances, been completed.

(2) Absent the plan, the Commission will rely on Title II, Section 304, and Section 315 as the principal guidance in authorizing projects. Once adopted, the plan will become the principal form of guidance. In selecting projects for the plan, mitigation measures referenced in Title II, Section 304, and Section 315 will be given priority consideration. They will, however, be subjected to the same analysis as other proposed projects. Should these projects be found to not meet the Commission’s standards for project approval, they will be rejected. Title II, Section 304, and Section 315 projects that meet

Commission standards will only be superseded in the plan if it can be demonstrated that the contributions to be made by other projects proposed through the project solicitation process significantly outweigh those of the aforementioned Title II, Section 304, and/or Section 315 projects.

(3) Regardless, the Commission will retain flexibility regarding how Title II, Section 304, and Section 315 projects will be implemented. Interested parties may, if they choose, propose modifications or enhancements to these projects through the normal project solicitation process. The Commission will pay particular attention to proposals that will accomplish Title II, Section 304, or Section 315 measures at lower cost, thereby freeing up funds for heretofore unidentified projects.

(4) The Commission is aware that future NEPA procedures related to the development of Title II features may result in the identification of additional impacts and mitigation measures. The Commission considers implementation of measures that result from a formal NEPA procedure to be non-discretionary. The Commission recognizes a commitment to implement such measures as are within its authority. Further, in accordance with Section 301(f)(3), the Commission is committed to giving these measures high priority. In order to ensure that such measures are consistent with the Commission’s overall program, and can be implemented within budget, the Commission will take an active role in NEPA procedures that are likely to result in significant mitigation obligations for the Commission.

(5) If the Commission chooses not to implement a mitigation measure or, for any reason be unable to implement a measure resulting from NEPA procedures, the Commission will conduct, or cause to have conducted, a supplemental environmental evaluation to determine suitable alternative mitigation measures. The Commission will implement the findings of that evaluation to the extent possible. The only exception will be when the Commission proposes to substitute an equivalent mitigation measure that meets with the approval of applicable Federal,

## Utah Reclamation Mit. and Con. Com.

## § 10005.10

State, or Tribal fish and wildlife agencies, the Secretary of the Interior, and other affected parties.

(6) In order to assist agencies and other interested parties in understanding the scope of the obligations contained in Title II, Section 304, and Section 315, and others that may arise in the future, the Commission will, at the time it invites recommendations on measures to be included in the plan, prepare and distribute a list of projects that the Commission considers to be obligations as defined in this section.

### **§ 10005.9 Relationship of the plan to congressional appropriations and Commission expenditures.**

(a) The plan itself does not constitute a commitment of resources for any given project. The commitment to expend resources is dependent upon Congressional appropriation, and, following this, Commission approval of specific projects.

(b) The Commission will rely on the plan as the primary source of information for the development of the agency's annual budget. For each fiscal year, projects identified in the plan will be arranged into a series of programs based on project type or ecological and geographical associations. These programs will serve as the basis for the agency's budget request.

(c) Once the budget request is formulated and submitted to the Congress, the request may be altered or reformulated by the Congress before the appropriation statute is finally approved. The appropriation statute will then control the implementation of the plan. In light of the controlling nature of the appropriation statute over the implementation of the plan, the plan must maintain sufficient flexibility to allow adjustments to comply with appropriations. The amendment process described in § 10005.21 provides the mechanism for modifying the plan to correspond to changes in Congressional appropriations. Changes to the annual project portfolio will, in most instances, constitute a "substantive" amendment as described in § 10005.21.

(d) Once appropriations have been approved by the Congress, the plan will serve as the principal guidance to the Commission in entering into agree-

ments and approving the expenditure of funds for specific projects.

### **§ 10005.10 Relationship of the plan to the authorities and responsibilities of other agencies.**

Within Utah, several federal agencies, state agencies, and tribal governments have authorities and responsibilities related to the management of fish and wildlife resources, through management of the resource itself, through management of the land and water upon which fish and wildlife depend, or, in the case of Federal reclamation projects, through involvement in mitigation activities. The Act specifically recognizes the authority of other Federal and State agencies to take actions in accordance with other applicable laws. The guidance for this is provided by Section 301(a)(2), which states that "Nothing herein is intended to limit or restrict the authorities of Federal, State, or local governments, or political subdivisions thereof, to plan, develop, or implement mitigation, conservation, or enhancement of fish, wildlife, or recreation resources in the State in accordance with applicable provisions of Federal or State law." In preparing and implementing its plan, it is the Commission's intent to form a cooperative partnership with other agencies having fish, wildlife, and recreation responsibilities and authorities, both recognizing and relying upon their authorities. The Commission recognizes that these agencies may have specific legal obligations to take actions to maintain or restore fish, wildlife, or recreation resources that are independent of Commission mandates. While the Commission will, as appropriate, authorize the use of funds to complement the resource protection and restoration activities of these agencies, Commission involvement should not be viewed as a replacement for funding or other actions that are rightfully the responsibility of another agency.

(a) *Agencies with land management authority.* The Commission recognizes that the Federal government, the State of Utah, and applicable Indian tribes each own and/or manage lands that are important to fish and wildlife resources

and provide significant outdoor recreation opportunities. At the Federal level, the Forest Service manages National Forest System lands, the Fish and Wildlife Service manages national wildlife refuges, the National Park Service manages national parks, monuments, and recreation areas, the Bureau of Reclamation manages reservoirs and lands adjoining those reservoirs, and the Bureau of Land Management manages other public lands. Indian tribes own and manage lands in accordance with treaties between the tribes and the United States Government. The State of Utah owns and manages state parks, wildlife management areas, and public trust lands. The Commission recognizes the importance of federal, tribal, and state lands to fish, wildlife, and recreation and will entertain proposals for mitigation and conservation activities involving these lands when the following conditions are met:

(1) The managing agency concurs with the proposed action,

(2) All appropriate legal procedures have been followed, and

(3) The land management agency is willing to assume long-term responsibility for operation and maintenance of mitigation and conservation features and to refrain from management activities that may negate or significantly diminish the effects of the project on fish, wildlife, or recreation.

(b) *Agencies with Federal reclamation project mitigation responsibilities and/or authorities.* Several agencies also have direct authorities and responsibilities relating to mitigation for the effects of Federal reclamation projects in Utah. These include the Department of the Interior Central Utah Project Office, the Bureau of Reclamation, the Central Utah Water Conservancy District, the Fish and Wildlife Service, and the Utah Division of Wildlife Resources. The remainder of this section summarizes the authorities and responsibilities of these agencies with regards to Federal reclamation projects, with emphasis on the Commission's relationship to these agencies. This section does not identify or describe all of the potential relationships between the Commission and other agencies with Federal reclamation project mitigation obligations. As

appropriate, the Commission may enter into formal agreements with any or all of the above agencies in order to provide additional detail regarding the relationship or to assign specific program or project responsibilities. The arrangements that are described in this section may also be modified through interagency agreement.

(1) *Secretary of the Interior's Representative to the Central Utah Project.* As required by Section 201(e) of the Act, the Secretary of the Interior is ultimately responsible for carrying out all responsibilities specifically identified in the Act. The Secretary's Representative serves as the Secretary's official representative to the Central Utah Project. The Secretary's Representative monitors activities undertaken in fulfillment of the various aspects of the Act to ensure that these activities, including mitigation activities, are in accordance with applicable law and that Federal funds are used appropriately. The Secretary's Representative also coordinates activities among Department of the Interior agencies involved with the Central Utah Project. The Commission is a Federal Commission within the executive branch of government and its activities are subject to the direct oversight of Congress. While essentially independent of the Secretary of the Interior, the Commission nevertheless has a vital relationship with the Department via both the budget process and the similarity in missions. The Secretary's Representative serves as the principal link between the Commission and the Department of the Interior and is responsible for transmitting Congressional appropriations to fund the Commission's mitigation, conservation, and administrative activities. For purposes of plan development and implementation, the following will guide the Commission's relationship to the Secretary's Representative:

(i) The Commission acknowledges the authority of the Secretary in overseeing implementation of the Act and recognizes that the Secretary's Representative plays an essential role in ensuring the compatibility of mitigation and conservation measures with the overall Central Utah Project. The Commission is committed to a strong

and productive partnership with the Secretary's Representative in fulfilling the Commission's mitigation and conservation responsibilities.

(ii) The Commission will maintain close communication with the Secretary's Representative regarding the relationship between the plan and Congressional appropriations. The Commission will provide the Secretary's Representative with both long range and annual funding proposals and otherwise assist in preparing the Commission's budget requests to Congress.

(iii) The Commission and the Secretary's Representative will independently and cooperatively monitor the plan in terms of meeting Section 8 mitigation obligations as directed by the Act.

(iv) The Commission will actively involve the Secretary's Representative in the Commission's NEPA related activities, including the identification of appropriate roles for the Secretary's Representative and Department of the Interior agencies in the preparation and review of NEPA documents.

(v) The Commission will, as appropriate, involve the Secretary's Representative in coordinating Commission mitigation and conservation activities with the Bureau of Indian Affairs and with individual Indian tribes.

(vi) The Commission will utilize the Secretary's Representative as its principal contact for matters regarding the Department of the Interior and, when appropriate, will seek assistance from the Secretary's Representative in coordinating activities involving agencies within the Department, especially when activities involve several agencies. The Commission will, as appropriate, involve the Secretary's Representative in resolving differences that might arise among the various agencies within the Department with regard to the Commission's plan, or the implementation of any measure contained in the plan. This provision does not alter the direct working relationships that the Commission maintains with the U.S. Fish and Wildlife Service, the Bureau of Reclamation, the Bureau of Land Management, and other applicable agencies.

(2) *U.S.D.I. Bureau of Reclamation.* Prior to the Act, the Bureau of Rec-

lamation (Bureau) had the responsibility for implementing mitigation measures associated with Federal reclamation projects within the State of Utah. Section 301(a)(1) of the Act granted authority to the Commission "to coordinate the implementation of the mitigation and conservation provisions of this Act." Section 301(n) further transferred from the Bureau to the Commission "the responsibility for implementing Section 8 funds for mitigation and conservation projects and features authorized in this Act." While the Act therefore clearly transfers mitigation responsibilities concerning the Bonneville Unit of the Central Utah Project from the Bureau to the Commission, it does not alter the Bureau's mitigation responsibilities with respect to other components of the Colorado River Storage Project or other Federal reclamation projects in Utah. For purposes of plan development and implementation, the following will guide the Commission's relationship to the Bureau:

(i) The Commission recognizes that the Bureau and the Commission share fish, wildlife, and recreation mitigation responsibilities associated with Federal reclamation projects within the State of Utah and is committed to maintaining a strong and productive partnership with the Bureau in this regard.

(ii) Except for those features that the Secretary has assigned to others in allocating the \$214,352,000 increase in CRSP authorization specified in Section 201(a) of the Act, the Commission has the primary authority and responsibility for all mitigation projects involving use of Section 8 funds for the Bonneville Unit and for alternative formulations of the Uintah and Upalco units of the Central Utah Project, and all mitigation projects identified in Section 315 of the Act, or as modified in the plan.

(iii) The Bureau retains the responsibility and primary authority to undertake fish, wildlife, and recreation mitigation and conservation activities for Federal reclamation projects in Utah other than those as described in paragraph (b)(2)(ii) of this section wherein the Bureau acts at the direction of the Commission. The Commission also has

the authority to undertake selective fish, wildlife, and recreation mitigation and conservation activities concerning these same projects, as authorized in Section 315 of the Act or in the plan. The Commission will actively consult with the Bureau with regard to potential mitigation or enhancement activities in those areas in order to ensure that Bureau and Commission mitigation activities are coordinated.

(iv) The Bureau retains responsibility for implementation of fish, wildlife, and recreation mitigation measures associated with Federal reclamation projects in Utah that were initiated prior to the establishment of the Act where that responsibility has not specifically been transferred to the Commission, a water district, or other entity.

(v) The Bureau retains responsibility for operation, maintenance, and replacement of facilities related to fish, wildlife, and recreation mitigation measures undertaken by the Bureau where that responsibility has not specifically been transferred to the Commission, a water district, or other entity.

(vi) The Bureau retains responsibility for mitigating future impacts to fish, wildlife, and recreation caused by operation, maintenance, and replacement of water resource development facilities where that responsibility has not specifically been transferred to the Commission, a water district, or other entity.

(vii) The Commission has no responsibility or authority for mitigation or replacement measures associated with Federal reclamation projects in Utah that are not related to fish, wildlife, and recreation.

(3) *Central Utah Water Conservancy District.* The Central Utah Water Conservancy District (District) is responsible for construction, operation, and management of the various features of the Central Utah Project. NEPA compliance regarding many of these features has resulted in the identification of several measures that are to be undertaken as mitigation for the Central Utah Project's impacts to fish, wildlife, and/or recreation. NEPA compliance for future project features is likely to identify additional fish, wildlife, and

recreation mitigation and conservation measures. The Act directs that the Commission give funding priority to measures that result from applicable NEPA procedures. The Act does not, however, specify what role the Commission is to have in determining, or planning for, these measures. For purposes of plan development and implementation, the following will guide the Commission's relationship to the District:

(i) The Commission is committed to maintaining a strong and productive partnership with the District in order to adequately plan for and implement mitigation measures associated with the Central Utah Project.

(ii) The Commission recognizes that the District and the Commission have complementary responsibilities for fish, wildlife, and recreation mitigation regarding the Central Utah Project. The District retains the overall responsibility for planning for mitigation activities associated with its completion of the Central Utah Project. The Commission has the responsibility for ensuring that mitigation measures meet with the intent of the Act with regard to protection and restoration of fish, wildlife, and recreation resources and for approving and implementing mitigation and conservation measures. Accordingly, the Commission will monitor District mitigation and conservation planning activities and provide such assistance as is mutually agreed upon.

(iii) The Commission will actively monitor or, as appropriate, participate in NEPA procedures undertaken by the District that may result in the identification of mitigation and conservation measures that, if implemented, would require Commission funding or may affect other mitigation activities of interest to the Commission. For NEPA procedures that are likely to result in significant Commission obligations, the Commission may request "joint lead agency" status with the District. In such instances the specific involvement of the Commission in the preparation of NEPA documentation will be determined through agreement with the District.

(iv) The District retains responsibility for mitigating future impacts to

fish, wildlife, and recreation caused by the operation, maintenance, and replacement of its water resource development facilities, unless that responsibility has been specifically transferred to the Commission or other entity.

(v) The District retains responsibility for operation, maintenance, and, where necessary, replacement of fish, wildlife, and recreation mitigation features managed by the District, unless that responsibility has been specifically transferred to the Commission or other entity.

(4) *U.S. Fish and Wildlife Service.* The U.S. Fish and Wildlife Service (Service) has mandated responsibility to implement several acts relevant to the Commission's activities. In Section 301(b)(3), the Act specifically references a Commission obligation to comply with the Fish and Wildlife Coordination Act (FWCA) and the Endangered Species Act (ESA). Other acts administered by the Service and relevant to Commission activities include, but are not necessarily limited to, the Migratory Bird Treaty Act (16 U.S.C. 703 et seq.) and the Bald Eagle Protection Act (16 U.S.C. 668-668d). The FWCA directs that the Service, and the state fish and wildlife agency, must be consulted where the "waters of any stream or other body of water are proposed or authorized to be impounded, diverted \* \* \* or otherwise controlled or modified \* \* \* by any department or agency of the United States, or by any public or private agency under Federal permit or license. \* \* \*" The purpose of this consultation is to provide for "the conservation of wildlife resources by preventing loss of and damage to such resources." The FWCA provides the major mechanism for Service involvement in the Federal reclamation project decision process. The Service's most important role in Federal reclamation projects is in the development and later the monitoring of fish and wildlife mitigation measures. The Service is also responsible for reporting to the Secretary of the Interior on the status of mitigation programs. The Fish and Wildlife Coordination Act provides for the funding of Service FWCA consultation by the agency sponsoring the proposed activity. The Service's ESA responsibilities that are

most relevant to Commission activities include listing of new species, preparation and implementation of recovery plans and consultations regarding adverse effects on listed species. Section 7(a)(1) of the Endangered Species Act authorizes Federal agencies to carry out programs for the conservation of endangered and threatened species. Participating in, and being consistent with, recovery plans is a fundamental component of this obligation. Section 7(a)(2) of the ESA requires that, prior to taking any action that may affect a listed species, a Federal agency must consult with the Service to ensure that the action will not jeopardize the continued existence of the species or adversely modify critical habitat. The Migratory Bird Treaty Act (MBTA) establishes a Federal role in protecting bird species that generally migrate across national boundaries. In Utah, these include most indigenous bird species. The MBTA is not intended as a substitute for state wildlife management authority but rather as a complement. The Service is responsible for implementing many of the features of the MBTA, and for encouraging states to undertake actions to protect migratory bird species. The Bald Eagle Protection Act prohibits the taking or possession of either bald or golden eagles, both of which commonly inhabit areas near Utah's rivers and wetlands. For purposes of plan development and implementation, the following will guide the Commission's relationship to the Service:

(i) The Commission acknowledges the biological expertise of the Service with regard to Federal reclamation projects and other Commission activities relating to the protection and restoration of fish and wildlife resources and will seek to utilize this expertise to the fullest extent. The Commission further recognizes the similarity in agency missions with regard to fish and wildlife mitigation and conservation and is committed to a strong and productive partnership with the Service in this regard.

(ii) The Commission acknowledges the Service's mandated responsibility with regard to Federal reclamation projects and will specifically consult with the Service regarding activities

that are subject to the FWCA. These include both projects directly related to mitigation for Federal water resource projects and applicable fish, wildlife, and recreation conservation projects. In developing its plan and adopting specific projects, the Commission will give significant weight to the Service's recommendations. Should the Commission choose to not follow Service recommendations, it will seek resolution through active consultation with the Service. As appropriate, the Utah Division of Wildlife Resources will be asked to be involved in these consultations as that agency also has co-responsibilities under the FWCA. Should no agreement be reached, the Commission will document its decision and provide this to the Service. The Commission recognizes that the Service has a responsibility to forward its FWCA reports to the Secretary regardless of the resolution of issues contained in the reports. The Commission recognizes that several projects contained in Title II, Section 304, and Section 315 have previously been subjected to Service evaluation pursuant to FWCA. Prior to reallocating funds authorized for these projects, the Commission will formally consult with the Service regarding the relative adequacy of proposed new projects, or significant modifications to Title II, Section 304, or Section 315 projects, in mitigating for impacts to fish and wildlife resources.

(iii) The Commission will comply with applicable provisions of the ESA and, accordingly, will consult with the Service regarding activities that may affect a listed or candidate species, regardless whether the effect is beneficial or adverse. In addition, the Commission will endeavor to undertake mitigation and conservation projects that are consistent with an adopted recovery plan for a listed species and that aid in the protection of candidate species.

(iv) The Commission will, in accordance with the Act, formally seek the Service's approval prior to reallocating funds from a project whose primary objectives are the protection and/or restoration of fish and wildlife resources to a project whose objectives are primarily related to recreation. No such

funds will be reallocated unless this meets with the approval of the Service.

(v) The Commission anticipates that the Service will be an active participant in the planning for, and implementation, of mitigation and conservation projects undertaken pursuant to the Commission's plan.

(vi) The Commission will invite the Service to participate in NEPA activities undertaken or funded by the Commission that bear on fish and/or wildlife resources. The form that this participation will take will be determined on a case-by-case basis and will require agreement on the part of both agencies.

(5) *Utah Division of Wildlife Resources.* As is the case with other states, the State of Utah has the exclusive jurisdiction over non-migratory fish and wildlife and shared jurisdiction (with the U.S. Fish and Wildlife Service) over all migratory birds and Federally listed threatened and endangered fish and wildlife within the state. The applicable state law is Utah Code, Section 23-15-2, which states that "All wildlife within the state, including but not limited to wildlife on public or private lands or in public or private waters within the state, shall fall within the jurisdiction of the Division of Wildlife Resources." The Utah Division of Wildlife Resources (UDWR) has authorities and responsibilities at the state level similar to those of the U.S. Fish and Wildlife Service at the Federal level, and, like the Service, has mandated authorities under the Federal Fish and Wildlife Coordination Act that relate directly to Federal Reclamation project mitigation. These authorities are described in paragraph (b)(4) of this section. In addition, the Act provides for the UDWR to assume primary responsibility for implementing measures associated with the Act after the Commission expires. In addition to the UDWR's responsibilities and authorities discussed above, the State of Utah also has jurisdiction over other activities that are relevant to the Commission's plan, including the granting of water rights and, except on Federal and tribal lands, management of land use. For purposes of plan development and implementation, the following will

guide the Commission's relationship to the UDWR:

(i) The Commission acknowledges the biological expertise of the UDWR with regard to Federal reclamation projects and other Commission activities relating to the protection and restoration of fish and wildlife resources and will seek to utilize this expertise to the fullest extent practicable. The Commission further recognizes the similarity in agency missions with regard to fish and wildlife mitigation and conservation and is committed to a strong and productive partnership with the UDWR in this regard.

(ii) The Commission acknowledges the UDWR's authority over the management of fish and wildlife within the State and will take no action that is inconsistent with this authority.

(iii) The Commission acknowledges that the UDWR has a mandated authority regarding the planning and monitoring of Federal reclamation mitigation. As is the case with the Service, the Commission will formally consult with the UDWR regarding projects that are subject to the FWCA. These include both projects directly related to mitigation for Federal reclamation projects and applicable fish and wildlife conservation projects not directly related to any Federal reclamation project. Consultation will be in accordance with procedures defined in the FWCA. It is anticipated that this consultation will be conducted in conjunction with the Service. However, the Commission recognizes that the UDWR has the right to prepare recommendations independent of the Service should it so desire. The Commission will, in making its decisions, give significant weight to recommendations made by the UDWR. Should the Commission choose to not follow the UDWR's recommendations, it will seek to resolve outstanding issues through active consultation with the UDWR. As appropriate, the Service will be asked to be involved in these consultations. Should no agreement be reached, the Commission will document its decision and provide this to the UDWR. The Commission recognizes that several mitigation projects contained in Title II, Section 304, and Section 315 have previously been sub-

jected to the UDWR evaluation pursuant to FWCA. As is the case with the Service, the Commission will specifically consult with the UDWR prior to significantly modifying or reallocating funds away from these projects.

(iv) The Commission will specifically consult with the UDWR regarding any project that might have an affect on species identified by the UDWR as wildlife species of special concern and species listed by the UDWR Natural Heritage Program as G1 and G2 plant and animal species.

(v) The Commission anticipates that the UDWR will be an active participant in the planning for, and implementation, of mitigation and conservation projects undertaken pursuant to the Commission's plan.

(vi) The Commission will invite the UDWR to participate in NEPA activities undertaken or funded by the Commission that bear on fish and/or wildlife resources. The form that this participation will take will be determined on a case-by-case basis and will require agreement on the part of both agencies.

#### **§ 10005.11 Environmental compliance.**

(a) Section 301(c)(3) establishes that the Commission is to be considered a Federal agency "for purposes of compliance with the requirements of all Federal fish, wildlife, recreation, and environmental laws, including (but not limited to) the Fish and Wildlife Coordination Act, the National Environmental Policy Act of 1969 (NEPA), and the Endangered Species Act of 1973." While not specifically referenced in that section, the Federal Water Pollution Control Act (Clean Water Act) (33 U.S.C. 1251 et seq.) also contains environmental compliance provisions that are directly relevant to the Commission's mitigation and conservation activities. The Commission is committed to full and active compliance with these laws as well as applicable State environmental law.

(b) The Commission's NEPA procedures are addressed in a different chapter of the agency's administrative rules. Because the plan is subject to alteration or amendment under a number of circumstances, the plan does not

constitute an irretrievable commitment of resources and thus is not subject to NEPA. Projects preliminarily selected for funding by the Commission will, however, be subject to formal NEPA review. The Commission recognizes that these procedures may affect both project budgets and scheduling and will therefore give specific consideration to this when preparing the plan. As described in §10005.16 the plan will identify, at a reconnaissance level, the need for individual projects to comply with NEPA and other Federal and State environmental laws and the opportunities available for consolidating NEPA review into programmatic or watershed-wide analysis as appropriate.

**§ 10005.12 Policy regarding the scope of measures to be included in the plan.**

The terms “mitigation” and “conservation” are used repeatedly throughout the Act and committee reports accompanying the Act. The importance of these terms is exemplified by the fact that Congress saw fit to include them in the official name of the Commission. The Commission interprets the term “mitigation” to mean activities undertaken to avoid or lessen environmental impacts associated with a Federal reclamation project or, should impact occur, to protect, restore, or enhance fish, wildlife, and recreation resources adversely affected by the project. Mitigation at the site of the impact typically involves restoration or replacement. Off-site mitigation might involve protection, restoration, or enhancement of a similar resource value at a different location. Mitigation may also involve substituting one resource feature for another. In meeting its mitigation responsibilities, the Commission sees an obligation to give priority to protection and restoration activities that are within the same watershed as the original impact and that address the same fish, wildlife, or recreation resource that was originally affected. The Commission’s “conservation” authority allows it to invest in the conservation of fish, wildlife, and recreation resources generally, and not directly associated with any Federal reclamation project.

Conservation projects may, therefore, be considered for any area of the state, regardless of the presence of a reclamation project. Nothing in this section is meant to restrict consideration of conservation projects directly associated with a Federal reclamation project. The Commission recognizes that, with limited resources, it is not possible to address the entire range of fish, wildlife, and recreation needs throughout the State. Indeed, addressing only the most critical issues will require prudent and judicious planning and use of resources. This section defines the areas where the Commission intends to focus its attention over the long-term and, in so doing, provides guidance for the development of the Commission’s mitigation and conservation plan. By defining priorities, the Commission narrows the options of applicants in making recommendations for potential projects, and of the Commission itself in selecting measures to be incorporated into the plan.

(a) *Priority resources.* The Commission’s intent is to focus expenditures and activities on those areas and resources where the Commission believes that it can, consistent with its mandate, have the greatest positive impact. Accordingly, it is the policy of the Commission that projects selected for the plan must accomplish one or more of the following:

- (1) Protect and/or restore aquatic systems that provide essential habitat for fish and wildlife,
- (2) Protect and/or restore wetland and riparian systems that provide essential habitat for fish and wildlife,
- (3) Protect and/or restore upland areas that contribute to important terrestrial ecosystems and/or support aquatic systems,
- (4) Provide outdoor recreation opportunities that are dependent on the natural environment and that support the conservation of aquatic systems, and/or
- (5) Address fish, wildlife, or recreation resources from a statewide context in order to provide essential information on aquatic systems or to assist in the establishment of statewide programs for fish, wildlife, or recreation conservation.

(b) *Priority projects.* In recognition of its responsibility to mitigate for Federal reclamation projects, the Commission will give special consideration to projects that:

(1) Address fish, wildlife, and recreation resources affected by the development of the Central Utah Project, including projects authorized in Title II, section 304, or section 315 of the Act, as described in § 10005.8,

(2) Address fish, wildlife, and recreation resources affected by the development of other features of the Colorado River Storage Project in Utah, or

(3) Address fish, wildlife, and recreation resources affected by the development of other Federal reclamation projects in Utah.

(c) *Specific objectives for five-year plans.* Each five-year plan will contain a set of specific objectives derived from the above elements. Objectives will be based on the Commission's determinations of the issues and resources that are in most need of attention, and the potential for making a substantial contribution to fish, wildlife, and recreation resources. Objectives may include the targeting of certain watersheds and/or basins for priority attention based on these same two factors.

#### **§ 10005.13 Geographic and ecological context for the plan.**

In accordance with the Act, the Commission has the authority to implement projects throughout the State of Utah. The Commission believes that, to be effective, the plan must be prepared, and evaluated, from a state-wide perspective and that, within the state, an ecosystem-based approach is appropriate. There is no one correct way to define an ecosystem or to approach ecosystem planning. The Commission concludes that, for its planning purposes, the watershed provides the appropriate geographic and ecological reference within which to evaluate proposed projects and otherwise plan its activities. In delineating watersheds, the Commission will be consistent with the best ecological and hydrological science and, to the extent possible, with the ecological and hydrological units currently used by the State of Utah, the U.S. Fish and Wildlife Service, and other applicable Federal agen-

cies. The Commission recognizes that mitigation and conservation projects may vary in scale and that, therefore, one standard set of watersheds is not necessarily appropriate for all projects. For example, a more localized project may best be analyzed from a "watershed within a watershed" perspective. Alternatively, a large-scaled project may need to be visualized from the perspective of a major river basin consisting of several watersheds. The Commission will prepare, and have available for public use, a list or map that identifies major basins, watersheds, and, where appropriate, hydrologic units within watersheds, that the Commission will use to organize its mitigation and conservation activities. This list or map may be revised from time to time as circumstances change.

#### **§ 10005.14 Resource features applicable to the plan.**

In accordance with the Act, projects selected for funding must make substantial contributions to fish, wildlife and/or recreation resources. Biological projects may focus on the protection or restoration of an individual species, a group of inter-related species, or the habitats upon which these species depend. Projects that target sensitive plant species may also be included in the plan, particularly if they contribute to the overall health of the ecosystem. Recreation projects should be targeted at increasing the quality of and/or access to outdoor recreation opportunities that rely on the natural environment or at providing opportunities that have been reduced through Federal reclamation projects. Following is a representative list of the types of resources that projects may target, along with examples of possible activities that might be undertaken for each. The following list is not intended to limit the scope of projects that may qualify for inclusion in the Commission's plan:

(a) Fish and Wildlife Production, including:

- (1) Enhancement of natural production,
- (2) Restoration of indigenous species,
- (3) Scientific studies,
- (4) Development of new or upgraded culture facilities.

- (b) Plant Propagation, including:
  - (1) Protection of critical habitat for sensitive species or communities,
  - (2) Reintroduction of native plants in conjunction with habitat restoration projects,
  - (3) Vegetation manipulation to achieve desired ecological conditions.
- (c) Stream Habitat, including:
  - (1) Protection or enhancement of instream flow,
  - (2) Restoration of natural flow regimes,
  - (3) Improvement to water quality,
  - (4) Restoration of natural channel, bank, and riparian conditions,
  - (5) Restoration of natural instream and bank cover conditions.
- (d) Lake Habitat, including:
  - (1) Stabilization of water level,
  - (2) Water quality protection or improvement,
  - (3) Restoration of natural lakebed conditions,
  - (4) Riparian area maintenance,
  - (5) Outlet flow maintenance.
- (e) Wetlands Habitat, including:
  - (1) Protection of existing wetlands,
  - (2) Restoration of drained or otherwise degraded wetlands,
  - (3) Enhancement of wetland habitat.
- (f) Upland Habitat, including:
  - (1) Protection or restoration of migration corridors,
  - (2) Re-connection of fragmented habitats,
  - (3) Protection of critical habitats,
  - (4) Habitat condition improvement.
- (g) Outdoor Recreation, including:
  - (1) Establishment of fishing and boating access,
  - (2) Establishment of greenways and low impact trails,
  - (3) Providing opportunities for wildlife related recreation, including hunting and observation,
  - (4) Providing opportunities for passive recreation and sightseeing,
  - (5) Stocking waters with fish (where not incompatible with biological objectives),
  - (6) Education and interpretation related to fish, wildlife, and their habitats.

**§ 10005.15 Planning and management techniques applicable to the plan.**

The Commission recognizes that there are a wide range of techniques

that may be employed to protect or restore natural resources. The Commission will consider projects that make use of techniques that either have previously been proven to be effective at meeting stated objectives or represent new and innovative approaches that hold promise for being effective and establishing positive precedents for future activities. Following is a representative list of techniques that the Commission may choose to fund. This list is not exhaustive. Other appropriate techniques may exist or be developed in the future.

- (a) Acquisition of property (land or water), or an interest in property, for fish, wildlife, or recreation purposes.
- (b) Physical restoration of ecological functions and habitat values of lands or water courses.
- (c) Construction and reconstruction of facilities, such as trails, fish culture facilities, instream spawning facilities, water control structures, and fencing that aid in the conservation of fish and wildlife resources, and/or provide recreation opportunities.
- (d) Regional planning aimed at conserving fish and wildlife, and/or providing recreation opportunities.
- (e) Management and operations agreements, strategies, and other institutional arrangements aimed at conserving fish and wildlife and their habitats, and/or providing recreation opportunities.
- (f) Inventory and assessment of biological resources.
- (g) Applied research that targets specific biological information or management needs.
- (h) Development of educational materials and programs aimed at increasing public enjoyment and awareness of fish and wildlife resources and the ecosystems upon which they depend.

**§ 10005.16 Plan content.**

- (a) *Minimum requirements.* At a minimum, the plan will include:
  - (1) A summary of basic information from the planning rule, including project evaluation procedures and plan amendment procedures,
  - (2) The identification of measurable objectives for the term of the plan,
  - (3) A list, and description, of the projects selected for implementation

during the term of the plan—with particular emphasis on projects to be implemented early in the planning cycle.

(4) A description of the relationship between the projects to be included in the plan and the Commission's mitigation obligations,

(5) A preliminary determination regarding environmental review requirements for each project,

(6) A preliminary determination of management and operation requirements and how these will be met,

(7) A budget, both for the next fiscal year and for the entire five-year period,

(8) A project phasing plan spanning the term of the plan, and

(9) A strategy for monitoring progress and evaluating accomplishments, and

(b) *Potential additions.* At the Commission's discretion, the plan may also include:

(1) A discussion of the relationship of the plan to other activities affecting fish, wildlife, and recreation resources within the State of Utah, and/or

(2) Discussions of, or information on, other topics that the Commission determines to be relevant. For example, the Commission may wish to identify mitigation and/or conservation measures that the Commission may wish to consider in later years of the five-year plan or in subsequent five-year plans.

#### **§ 10005.17 Plan development process.**

Following adoption of the planning rule, the Commission will proceed with the preparation of the plan, in adherence with the following procedures and in the order stated:

(a) A formal request for recommendations regarding potential projects will be made to Federal and State resource agencies, Indian tribes, and other interested parties. An appropriate announcement will also be made in the FEDERAL REGISTER. Those choosing to participate will have 90 days to submit project proposals. The project solicitation process is discussed in detail in § 10005.18.

(b) The Commission will compile all recommendations and make these available for public review at the Commission's office. The Commission will also provide copies upon request for a reasonable cost.

(c) The Commission will evaluate each project proposal according to the decision factors, standards, and evaluation procedures described in § 10005.19 and prepare a preliminary list of priority projects.

(d) One or more public meetings will be scheduled in which Commission staff will present the Commission's analysis and preliminary conclusions.

(e) The Commission will prepare a final list of projects proposed for implementation during the term of the plan.

(f) A draft plan will be prepared, approved by the Commission, and released for public review. Availability of the document will be announced in the FEDERAL REGISTER. The public will be given a minimum of thirty days to review the draft and submit written comments.

(g) The Commission will make necessary revisions and formally adopt a final version of the plan. Completion of the plan will be announced in the FEDERAL REGISTER. The Act requires that the initial final plan be completed by March 31, 1996 and be revised at least every five years thereafter.

#### **§ 10005.18 Project solicitation procedures.**

As provided for in Section 301 of the Act, the Commission will make a formal invitation to Federal and State resource agencies, Indian tribes, and other interested parties to prepare recommendations concerning projects that will be considered for funding. This invitation will take the form of a "project solicitation packet." The packet will contain a cover letter, this planning rule or a reference as to where it may be obtained, a format for preparing applications, and other materials that the Commission concludes will assist in the preparation of recommendations. Appropriate announcement will also be made in the Utah media and in the FEDERAL REGISTER in order that other interested parties might be made aware of the opportunity to participate. To assist applicants, the format for preparing application may be made available in electronic form upon request. As warranted, the Commission may propose specific projects and/or assist others in

the preparation of recommendations in order to fully execute its obligations as described in §10005.8. The following information will be requested of applicants:

- (a) An abstract of the proposed project,
- (b) Information on the applicant, including the name of the person preparing the recommendation, the official authorizing the recommendation, and partners to the application, if any,
- (c) The location of the proposed project,
- (d) The overall goal for the project and the specific fish, wildlife, or recreation objective(s) that the project's proponent seeks to achieve,
- (e) The relationship, if any, of the proposed project to Federal reclamation mitigation and, especially, to measures delineated in Title II, Section 304, or Section 315,
- (f) A description of the project, including tasks to be undertaken, products to be produced, and the expected results,
- (g) A proposed budget, including, where applicable, a description of contributions to be provided by project implementors or other sources,
- (h) A proposed time schedule,
- (i) The identification of the entity(ies) to be involved with the project (project implementation and post-project operation and management), including their qualifications for undertaking this type of work,
- (j) A description of any consultation with landowners, agencies, or other affected entities, to include documentation where appropriate,
- (k) An evaluation of the project in relationship to the Commission's first five decision factors identified in §10005.19,
- (l) An evaluation of the anticipated need for NEPA documentation and compliance with the ESA, the Clean Water Act, and other applicable environmental laws, and
- (m) At the option of the applicant, other information that might assist the Commission in evaluating the recommendation.

**§ 10005.19 Decision factors.**

This section identifies the principle decision factors that the Commission

will use to evaluate the relative merit of proposed projects and the way that the Commission will apply these decision factors. The Commission has selected six general decision factors that will be used to evaluate the relative priority of proposed projects. "Standards" related to each decision factor provide a means for measuring the extent to which each proposed project responds to the decision factors. The Commission's decision factors and standards are as follows:

(a) *Decision Factor 1: Benefits to fish, wildlife, and recreation resources.* The following three standards apply:

(1) *Biological integrity.* Projects will contribute to the productivity, integrity, and diversity of fish and wildlife resources within the State of Utah. To meet the Biological Integrity standard, projects should accomplish one or more of the following:

- (i) Protect, restore, or enhance the ecological functions, values, and integrity of natural ecosystems supporting fish and wildlife resources,
- (ii) Provide conservation benefits to both species and their habitats,
- (iii) Provide benefits to multiple species,
- (iv) Promote biodiversity and/or genetic conservation,
- (v) Aid long-term survival/recovery of species, or groups of species, that are of special concern, including:
  - (A) Species on the Federal List of Endangered or Threatened Wildlife and Plants,
  - (B) Federal category 1 or 2 candidates for listing,
  - (C) Species identified by the UDWR as wildlife species of special concern,
  - (D) UDWR Natural Heritage Program G1 and G2 plant and animal species,
  - (E) On lands managed by the U.S. Forest Service or the Bureau of Land Management, species of special concern as recognized by the appropriate agency, and
  - (F) the sensitive species conservation list developed by the Utah Interagency Conservation Committee,
- (vi) Provide protection to important aquatic, riparian, or upland habitats, especially those that are either critical to a sensitive indigenous species or useful to a variety of species over a

range of environmental conditions, and/or

(vii) Restore self-sustaining, naturally functioning aquatic or riparian systems, especially through the use of natural recovery methods.

(2) *Recreation opportunities.* Projects with recreation objectives will provide opportunities for high quality outdoor recreation experiences for the general public that are compatible with, and support, the conservation of biological resources and natural systems. To meet the Recreation Opportunities standard, projects should accomplish one or more of the following:

(i) Create opportunities for the public to enjoy fish, wildlife, and native plants in their natural habitats,

(ii) Provide permanent access to aquatic areas for recreation purposes,

(iii) Create opportunities for walking or bicycling that complement protection and restoration of riparian and aquatic corridors,

(iv) Create opportunities for fishing, boating, and other water-based recreation activities that complement protection and restoration of aquatic areas,

(v) Provide outdoor recreation opportunities that are lacking within the watershed or State,

(vi) Provide outdoor recreation opportunities near to or accessible by urban populations,

(vii) Provide outdoor recreation opportunities for people who are physically challenged or economically disadvantaged,

(viii) Provide opportunities for environmental education and interpretation, and/or

(ix) Do not cause a disruption to the natural environment that will, itself, require mitigation.

(3) *Scientific Foundation.* Projects will be based on and supported by the best available scientific knowledge. To meet the Scientific Foundation standard, projects should accomplish one or more of the following:

(i) Include specific and sound biological objectives,

(ii) Be supported by appropriate population and/or habitat inventories or other scientific documentation,

(iii) Provide tangible results and, to the extent possible, measurable bene-

fits to species, habitats, and/or recreation opportunities,

(iv) Involve accepted techniques that have been demonstrated to produce significant results, or, alternatively, innovative techniques that hold promise for resolving significant issues and that might serve as models for other initiatives,

(v) Make a significant contribution to the scientific knowledge concerning ecosystem protection and restoration, and/or

(vi) Be recognized as scientifically valid by the American Fisheries Society, the Wildlife Society, or other applicable professional scientific organization.

(b) *Decision Factor 2: Fiscal responsibility.* The following three standards apply:

(1) *Fiscal accountability.* Projects will provide a substantial return on the public's investment. To meet the Fiscal Accountability standard, projects should accomplish one or more of the following:

(i) Provide significant benefit at reasonable cost,

(ii) Where alternatives exist, utilize the least cost alternative that fully meets objectives,

(iii) Continue to provide value over the long term, and/or

(iv) Encourage and facilitate economic efficiency among agencies.

(2) *Shared funding.* While not an absolute requirement, projects should, when practical, be funded through cost sharing with project participants or involve other contributions. To meet the Shared Funding standard, projects should accomplish one or more of the following:

(i) Have guaranteed partial funding from other sources,

(ii) Have a high potential for leveraging additional funding by others in the future,

(iii) Be coupled with other ongoing or proposed projects that have compatible objectives and secured non-Commission funding, and/or

(iv) Involve significant in-kind contributions by the applicant and participating agencies or organizations.

(3) *Protection of investment.* Successful implementation of projects over time

will be ensured. To meet the Protection of Investment standard, projects should accomplish one or more of the following:

- (i) Result in permanent, as opposed to temporary, protection to fish and/or wildlife habitats,
- (ii) Have low maintenance cost and/or be self sustaining over the long term,
- (iii) Have clearly assigned operations and management responsibilities and assurances of long term support on the part of implementors,
- (iv) For those projects likely to require substantial operations and management expenditures, have in place a realistic strategy for obtaining the necessary funds, including, where applicable, a commitment by the applicable agency(ies) to seek necessary appropriations,
- (v) Contain guarantees on the part of the applicable landowner(s) or manager(s) that incompatible land uses will not be allowed, and/or
- (vi) Have a high probability that action will not be negated by other activities outside of the control of the land owner/manager.

(c) *Decision Factor 3: Agency and public involvement and commitment.* The following three standards apply:

(1) *Partnerships.* Projects should, when practical, involve a partnership among Federal and State agencies, local governments, private organizations, and/or landowners or other citizens. To meet the Partnerships standard, projects should accomplish one or more of the following:

- (i) Span multiple jurisdictions or otherwise require, or benefit from, inter-organizational cooperation and involvement,
- (ii) Have been proposed through a cooperative effort among two or more agencies, governments, and/or private entities, each having a stake in the outcome and/or possessing complementary expertise, and/or
- (iii) Encourage, or facilitate, the establishment of complementary management plans and programs among land and resource managers.

(2) *Authority and capability.* The entities charged with undertaking and, after completion, managing each project must have the authority to be involved in the proposed activity and

possess the administrative, financial, technical, and logistical capability necessary for successful implementation. To meet the Authority and Capability standard, projects should:

- (i) Be supported by documented evidence that the entities involved have previously undertaken similar work successfully, and/or
- (ii) Be supported by fully developed implementation plans.

(3) *Public support.* Projects should, wherever possible, enjoy broad support within the natural resource community, and/or with the public at-large. To meet the Public Support standard, projects should:

- (i) Build upon previous compatible efforts that have undergone public involvement and are widely supported,
- (ii) Be supported by implementation plans that have previously been subjected to peer and/or public review,
- (iii) Have documented support from affected interests, and/or
- (iv) Have a high probability that agency and public support will be sustained into the future. This is especially important for multi-year projects and projects that are part of a larger, long-term initiative.

(d) *Decision factor 4: Consistency with laws and programs.* The following two standards apply:

(1) *Laws and tribal rights.* Projects will be consistent with the legal rights of Indian tribes and with applicable State and Federal laws.

(2) *Complementary activities.* Projects will complement the policies, plans, and management activities of Federal and State resource management agencies and appropriate Indian tribes. To meet the Complementary Activities standard, projects should:

- (i) Complement, or contribute to, established, documented fish and wildlife protection and/or restoration programs,
- (ii) Be a component of, or support, a recognized ecosystem or watershed planning initiative where protection or restoration of fish, wildlife, or recreation is a primary goal, and/or
- (iii) For projects involving Federal or state lands, be consistent with, and supported by, an adopted management plan.

(e) *Decision Factor 5: Other contributions.* The following two standards apply:

(1) *Public benefits.* Projects will, wherever practicable, provide benefits in addition to those provided to fish, wildlife, and recreation. To meet the Public Benefits standard, projects should:

(i) To the extent that this is compatible with the primary objective of protecting or restoring fish, wildlife, or outdoor recreation, provide opportunities for multiple use of resources,

(ii) Provide benefits to aspects of the environment beyond fish, wildlife, and recreation,

(iii) Not result in unacceptable impacts to other aspects of the environment, and/or

(iv) Contribute to the social and/or economic well-being of the community, the region, and/or the State.

(2) *Unmet needs.* Projects will satisfy significant needs that would not otherwise be met. To meet the Unmet Needs standard, projects should:

(i) Address significant fish, wildlife, or recreation needs that are unable to secure adequate funding from other sources,

(ii) Not duplicate actions already taken or underway, and/or

(iii) Not substitute for actions that are the responsibility of another agency and that must be implemented regardless of Commission involvement. This is not meant to restrict the Commission's ability to be involved in projects advanced by land management or other agencies that, while within the general responsibility of the agency, cannot be implemented because of internal funding limitations.

(f) *Decision Factor 6: Compatibility with the Commission's overall program.* This decision factor is relevant to the overall project portfolio rather than to individual projects. The following five standards apply:

(1) *Commission obligations.* Taken as a whole, the project portfolio must help fulfill the Commission's obligations for mitigation of Federal reclamation projects as described in § 10005.8.

(2) *Project mix.* The Commission's portfolio should provide an appropriate mix of projects in terms of project type, geographical distribution, and other appropriate factors. While the

Commission desires to implement a broad range of projects, and to have an effect throughout the State, this alone will not determine the Commission's mix of projects. Among the factors that the Commission will consider when selecting projects are the following:

(i) The Commission will consider concentrating projects in one watershed or basin if these projects are ecologically connected and are likely to result in a significant cumulative effect on fish, wildlife, and/or recreation that could not otherwise be realized.

(ii) The Commission will consider implementing a major, high cost project—as opposed to several smaller projects with the same total cost—if that project is likely to produce net cumulative benefits to fish, wildlife, and/or recreation that exceed those of the smaller projects.

(iii) The Commission will consider small projects that appear unconnected to other Commission activities if these can serve to demonstrate the viability of a certain type of protection and restoration project, or to establish the groundwork for additional fish, wildlife, and recreation initiatives.

(3) *Timing.* Projects should address needs that are time sensitive. To meet the Timing standard, projects should:

(i) Target immediate, high priority needs,

(ii) Target opportunities that are of limited duration,

(iii) Preempt future crises, and/or

(iv) Be consistent with identified “critical paths” or other logical, multiple-year project phasing plans.

(4) *Project completion.* Ongoing projects that are making satisfactory progress will generally be approved for continued funding prior to allocating funds for new projects.

(5) *Budget.* The total cost of proposed projects for any given fiscal year must not exceed the Commission's anticipated budget allocation for that year. When the total cost of qualified projects exceeds funding capability, the Commission will re-evaluate all qualified projects and identify those that, in combination, produce the most meaningful results. High cost projects will be subjected to particular scrutiny and may be scaled back, phased over

## § 10005.20

multiple years, or deferred if doing otherwise would preclude other worthwhile but lower cost projects.

### § 10005.20 Project evaluation procedures.

Projects proposed for inclusion in the plan will be subjected to a systematic evaluation using the decision factors delineated in §10005.19. The Commission may, at any time in the project evaluation process, contact applicants to ask for clarification, to propose modifications, or to otherwise cause the formulation of project proposals that are in keeping with the Commission's authority and mission. The result of the evaluation will be a preliminary list of eligible projects, arrayed by year over the term of the plan. The evaluation will adhere to the following process:

(a) Each project will be arrayed according to location (by watershed), project type, and the resource that the project seeks to address.

(b) Each project's consistency with Commission policy delineated in §10005.12 will be determined.

(c) Complementary, competing, and duplicative projects will be identified. (If warranted, applicants may be asked to combine efforts or otherwise modify projects.)

(d) Projects that satisfy obligations described in §10005.8 will be identified.

(e) Using best professional judgement, Commission staff will evaluate each project according to the standards delineated in §10005.19 with the exception of Decision Factor 6, which relates to the Commission's overall portfolio and is, therefore, not applicable to the evaluation of a specific project.

(1) For each standard, a preliminary rating will be made, with the project rated as:

- (i) Exceeding minimum standard,
- (ii) Meeting minimum standard,
- (iii) Minor deficiency in meeting standard,
- (iv) Deficient, or
- (v) Not applicable.

(2) Commission ratings will be contrasted to those of applicants and major discrepancies re-evaluated. Commission findings will be recorded and will be available for review.

## 43 CFR Ch. III (10–1–08 Edition)

(f) Each project will be given an overall rating based on the extent to which it meets Commission criteria as defined in paragraphs (b) through (e) of this section. The rating will be made on the basis of best professional judgement using quantitative and/or qualitative rating techniques as appropriate. A given project need not meet all standards to be selected for inclusion in the Commission's plan. A project may, for example, be deficient in an area that the Commission determines is not important for that type of project or, alternatively, deficiencies in some areas may be off-set by major assets in others. A tiered rating scale will be used, with projects grouped into two or more categories according to how well they meet Commission criteria.

(g) Projects with moderate to high ratings will then be re-evaluated from a multiple project perspective. Decision Factor 6, Compatibility with the Commission's Overall Program, will be the focus of this evaluation. For those areas with a concentration of projects this might involve a watershed-wide analysis. It will also involve a state-wide analysis. As with the previous step, the evaluation will be conducted using best professional judgement and may involve a variety of applicable techniques.

### § 10005.21 Amending the plan.

The Commission considers the plan to be a dynamic instrument that guides decisions over time and is capable of responding to changing circumstances. Amendments to the plan provide the vehicle for maintaining this dynamic quality.

(a) *Types of plan amendment.* The Commission recognizes three distinct types of plan amendment: comprehensive revisions, substantive revisions, and technical revisions. The particulars regarding each is as follows:

(1) *Comprehensive revision.* The Act requires that the Commission "develop and adopt" a plan every five years. At the end of each five year period the Commission will undertake a comprehensive review of the plan to determine its adequacy and the need for revision. The need to revise, and add to, the Commission's portfolio of proposed

projects will be central to this review. Other elements, for example, reconsideration of the Commission's objectives for the preceding five-year period and the Commission's standards for selecting projects, may also be reconsidered. Based on this review the Commission may call for the preparation of a new plan. The consultation procedures described in §10005.7 will apply, as will the procedures described in §10005.17, and the procedures described in §10005.18. The Commission is not obligated to wait five years to undertake such revision to the plan. This may be undertaken at any time that the Commission deems appropriate.

(2) *Substantive revision.* The Commission may, from time to time, determine that changes to the plan's list of projects are in order. Typically this will take the form of substituting a project in the plan with a new project, changing the order for implementation, or making significant modifications to previously selected projects. When the Commission determines that there is a need for such substantive changes, a formal announcement will be made and interested parties will be given the opportunity to provide recommendations following the procedures described in §10005.18. Changes of this nature will not necessitate a total revision to the plan but rather involve select modifications to specific portions of the plan. Changes to other specific elements of the plan may also be amended in this way. Portions of the plan that are proposed for modification will be released in draft form, with the public given thirty days to provide comments prior to formal adoption by the Commission. Substantive amendments provide a way to incrementally amend the plan over time without the necessity of a major rewrite and will be central to the Commission's planning process. The Commission will specifically consider the need for substantive amendments on at least an annual basis. Consideration of substantive amendments will typically be made in concert with preparation of the annual budget request.

(3) *Technical revision.* Technical revisions include changes that correct inadvertent errors or provide current information, other minor revisions that

do not substantively modify the plan, or, changes in the particulars of one or more projects that do not change basic project goals and objectives nor substantively modify expected environmental effects. Technical revisions to projects might include, but are not limited to, changes in the list of participating organizations, changes in the exact location of certain project activities, and changes to specific tasks. Substitution of one project for another, or aggregation of projects, may also be considered a technical revision if the projects possess similar qualities and the action is supported by affected parties and the general public. Technical revisions do not constitute a formal amendment to the plan and do not require the notification and reporting procedures of a formal amendment. Affected agencies and interests must, however, be consulted, and the rationale for making the technical revision documented. The plan document will be corrected to reflect technical revisions, and a historical record kept in order to track the plan's evolution.

(b) *Public petitions.* Agencies and members of the public have the right to, at any time, petition the Commission to open the plan to comprehensive or substantive amendments. Petitions must be made in writing and should state the specific reason why the action is requested. The petition may be accompanied by a specific project recommendation. The Commission will, during the public session of the next official Commission meeting, announce that such a petition has been received. The Commission may choose to vote on the petition at that time or to take the matter under advisement until the following Commission meeting at which time the Commission must vote to determine if the petition has merit. Following acceptance of a petition the Commission will promptly establish the procedures and schedule that will be followed in considering amendments. Project recommendations made pursuant to a petition must be presented using the format described in §10005.18 and will be evaluated in the manner described in §10005.20. Proposals for technical amendments do not require a formal petition. Written requests for technical amendment will

**Pt. 10010**

**43 CFR Ch. III (10–1–08 Edition)**

be acted upon by the Commission in a timely manner.

**PART 10010—POLICIES AND PROCEDURES FOR IMPLEMENTING THE NATIONAL ENVIRONMENTAL POLICY ACT**

**Subpart A—Protection and Enhancement of Environmental Quality**

**Sec.**

AUTHORITY: 43 U.S.C. 620k (note).

SOURCE: 61 FR 16721, Apr. 17, 1996, unless otherwise noted.

**Subpart A—Protection and Enhancement of Environmental Quality**

**§ 10010.1 Purpose.**

This Subpart establishes the Commission's policies for complying with Title 1 of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321–4347) (NEPA); Section 2 of Executive Order 11514, Protection and Enhancement of Environmental Quality, as amended by Executive Order 11991; and the regulations of the Council on Environmental Quality (CEQ)

implementing the procedural provisions of NEPA (40 CFR parts 1500 through 1508).

#### § 10010.2 Policy.

It is the policy of the Commission:

(a) To provide leadership in protecting and enhancing those aspects of the quality of the Nation's environment which relate to or may be affected by the Commission's policies, goals, programs, plans, or functions in furtherance of national environmental policy;

(b) To use all practicable means to improve, coordinate, and direct its policies, plans, functions, programs, and resources in furtherance of national environmental goals;

(c) To interpret and administer, to the fullest extent possible, the policies, regulations, and public laws of the United States administered by the Commission in accordance with the policies of NEPA;

(d) To consider and give significant weight to environmental factors, along with other essential considerations, in developing proposals and making decisions in order to achieve a proper balance between the development and utilization of natural, cultural, and human resources and the protection and enhancement of environmental quality;

(e) To consult, coordinate, and cooperate with other Federal agencies and State, local, and Indian tribal governments in the development and implementation of the Commission's plans and programs affecting environmental quality and, in turn, to provide to the fullest extent practicable, these entities with information concerning the environmental impacts of their respective plans and programs;

(f) To provide, to the fullest extent practicable, timely information to the public to better assist in understanding the Commission's plans and programs affecting environmental quality and to facilitate their involvement in the development of such plans and programs; and

(g) To cooperate with and assist the CEQ.

#### § 10010.3 General responsibilities.

The following responsibilities reflect the Commission's decision that the officials responsible for making program decisions are also responsible for taking the requirements of NEPA into account in those decisions and will be held accountable for that responsibility:

(a) Executive Director. (1) Is the Commission's focal point on NEPA matters and is responsible for overseeing the Commission's implementation of NEPA.

(2) Serves as the Commission's principle contact with the CEQ.

(3) Assigns to Commission staff the responsibilities outlined in this part.

(4) Must comply with the provisions of NEPA, E.O. 11514 as amended, the CEQ regulations, and this part.

(5) Will interpret and administer, to the fullest extent possible, the policies, regulations, and public laws of the United States administered under the Commission's jurisdiction in accordance with the policies of NEPA.

(6) Will continue to review the Commission's statutory authorities, administrative regulations, policies, programs, and procedures, in order to identify any deficiencies or inconsistencies therein which prohibit or limit full compliance with the intent, purpose, and provisions of NEPA and, in consultation with the Department of the Interior Office of the Solicitor, shall take or recommend, as appropriate, corrective actions as may be necessary to bring these authorities and policies into conformance with the intent, purpose, and procedures of NEPA.

(7) Will monitor, evaluate, and control on a continuing basis the Commission's activities so as to protect and enhance the quality of the environment. Such activities will include those directed to conserving and enhancing the environment and designed to accomplish other program objectives which may affect the quality of the environment. The Executive Director will develop programs and measures to protect and enhance environmental quality and assess progress in meeting the specific objectives of such activities as they affect the quality of the environment.

#### § 10010.4

(b) Members of the Commission. (1) Are responsible for compliance with NEPA, E.O. 11514, as amended, the CEQ regulations, and this part.

(2) Will insure that, to the fullest extent possible, the policies, regulations, and public laws of the United States administered under the Commission's jurisdiction are interpreted and administered in accordance with the policies of NEPA.

(c) Department of the Interior Office of the Solicitor. Is responsible for providing legal advice to the Commission regarding compliance with NEPA.

#### **§ 10010.4 Consideration of environmental values.**

(a) In Commission management. (1) In the management of the natural, cultural, and human resources under its jurisdiction, the Commission must consider and balance a wide range of economic, environmental, and social objectives at the local, regional, and national levels, not all of which are quantifiable in comparable terms. In considering and balancing these objectives, Commission plans, proposals, and decisions often require recognition of complements and resolution of conflicts among interrelated uses of these natural, cultural, and human resources within technological, budgetary, and legal constraints.

(2) Commission project reports, program proposals, issue papers, and other decision documents must carefully analyze the various objectives, resources, and constraints, and comprehensively and objectively evaluate the advantages and disadvantages of the proposed actions and their reasonable alternatives. Where appropriate, these documents will utilize and reference supporting and underlying economic, environmental, and other analyses.

(3) The underlying environmental analyses will factually, objectively, and comprehensively analyze the environmental effects of proposed actions and their reasonable alternatives. They will systematically analyze the environmental impacts of alternatives, and particularly those alternatives and measures which would reduce, mitigate, or prevent adverse environmental

#### **43 CFR Ch. III (10–1–08 Edition)**

impacts or which would enhance environmental quality.

(b) In internally initiated proposals. Officials responsible for development or conduct of planning and decision making systems within the Commission shall incorporate to the maximum extent necessary environmental planning as an integral part of these systems in order to insure that environmental values and impacts are fully considered and in order to facilitate any necessary documentation of those considerations.

(c) In externally initiated proposals. Officials responsible for development or conduct of grant, contract, or other externally initiated activities shall require applicants, to the extent necessary and practicable, to provide environmental information, analyses, and reports as an integral part of their applications. This will serve to encourage applicants to incorporate environmental considerations into their planning processes as well as provide the Commission with necessary information to meet its own environmental responsibilities.

#### **§ 10010.5 Consultation, coordination, and cooperation with other agencies and organizations.**

(a) Commission plans and programs. (1) Officials responsible for planning or implementing Commission plans and programs will develop and utilize procedures to consult, coordinate, and cooperate with relevant State, local, and Indian tribal governments; other Federal agencies; and public and private organizations and individuals concerning the environmental effects of these plans and programs on their jurisdictions and/or interests.

(2) The Commission will utilize, to the maximum extent possible, existing notification, coordination, and review mechanisms established by the Office of Management and Budget, the Water Resource Council, and CEQ. However, use of these mechanisms must not be a substitute for early and positive consultation, coordination, and cooperation with others, especially State, local, and Indian tribal governments.

(b) Other Commission activities. (1) Technical assistance, advice, data, and

information useful in restoring, maintaining, and enhancing the quality of the environment will be made available to other Federal agencies, State, local, and Indian tribal governments, institutions, and individuals as appropriate.

(2) Information regarding existing or potential environmental problems and control methods developed as a part of research, development, demonstration, test, or evaluation activities will be made available to other Federal agencies, State, local, and Indian tribal governments, institutions and other entities as appropriate.

(c) Plans and programs of other agencies and organizations. (1) Officials responsible for protecting, conserving, developing, or managing resources under the Commission's jurisdiction shall coordinate and cooperate with State, local and Indian tribal governments, other Federal agencies, and public and private organizations and individuals, and provide them with timely information concerning the environmental effects of these entities' plans and programs.

(2) The Commission will participate early in applicable planning processes of other agencies and organizations in order to ensure full cooperation with and understanding of the Commission's programs and interests in natural, cultural, and human resources.

(3) The Commission will utilize to the fullest extent possible, existing review mechanisms to avoid unnecessary duplication of effort and to avoid confusion by other organizations.

#### **§ 10010.6 Public involvement.**

The Commission will develop and utilize procedures to ensure the fullest practicable provision of timely public information and understanding of its plans and programs including information on the environmental impacts of alternative courses of action. These procedures will include, wherever appropriate, provision for public meetings or hearings in order to obtain the views of interested parties. The Commission will also encourage State and local agencies and Indian tribal governments to adopt similar procedures for informing the public concerning their activities affecting the quality of the environment.

#### **§ 10010.7 Mandate.**

(a) This part provides instructions for complying with NEPA and Executive Order 11514, Protection and Enhancement of Environmental Quality, as amended by Executive Order 11991.

(b) The Commission hereby adopts the regulations of the CEQ, implementing the procedural provisions of NEPA (sec. 102(2)(C)) except where compliance would be inconsistent with other statutory requirements. In the case of any apparent discrepancies between these procedures and the mandatory provisions of the CEQ regulations the regulations shall govern.

(c) Instructions supplementing the CEQ regulations are provided in subparts B through G of this part. Citations in brackets refer to the CEQ regulations. In addition, the Commission may prepare a handbook or other technical guidance, or adopt an appropriate handbook or guidance prepared by another agency, for its personnel on how to apply this part to principal programs.

### **Subpart B—Initiating the NEPA Process**

#### **§ 10010.8 Purpose.**

This subpart provides supplemental instructions for implementing those portions of the CEQ regulations pertaining to initiating the NEPA process (40 CFR Parts 1501 through 1506).

#### **§ 10010.9 Apply NEPA early.**

(a) The Commission will initiate early consultation and coordination with other Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved, and with appropriate Federal, State, local and Indian tribal agencies authorized to develop and enforce environmental standards.

(b) The Commission will also consult early with interested private parties and organizations, including when the Commission's own involvement is reasonably foreseeable in a private or non-Federal application.

(c) The Commission will insure that applicants are informed of any environmental information required, to be included in their applications and of any

## § 10010.10

consultation with other Federal agencies, and State, local or Indian tribal governments required prior to making the application.

### § 10010.10 Whether to prepare an EIS.

(a) Categorical exclusions (CX) (40 CFR 1508.4).

(1) The following criteria will be used to determine categories of actions to be excluded from preparation of an EA or EIS:

(i) Analysis or experience shows that the action or group of actions would have no significant effect on the quality of the human environment; and

(ii) The action or group of actions would not involve unresolved conflicts concerning alternative uses of available resources.

(2) Based on the criteria in paragraph (a)(1) of this section, the categories of actions listed in subpart G of this part are excluded from the preparation of an EA or EIS.

(3) The exceptions listed in subpart G of this part apply to individual actions subject to CX. Appropriate environmental documents must be prepared for any actions involving these exceptions.

(4) Notwithstanding the criteria, exclusions, and exceptions in paragraphs (a)(1) through (3), extraordinary circumstances may dictate or a responsible Commission official may decide to prepare an environmental document to assist with decision-making.

(b) Environmental Assessment (EA) (40 CFR 1508.9). Procedures regarding preparation of an EA are addressed in subpart C of this part.

(c) Finding of No Significant Impact (FONSI) (40 CFR 1508.13). A FONSI will be prepared as a separate document based upon analysis of an EA and a determination that the proposed action will have no significant environmental impact.

(d) Notice of Intent (NOI) (40 CFR 1508.22). A NOI will be prepared as soon as practicable after a decision to prepare an environmental impact statement and shall be published in the FEDERAL REGISTER and made available to the affected public in accordance with 40 CFR 1506.6. Publication of a NOI may be delayed if there is proposed to be more than three (3) months between

## 43 CFR Ch. III (10–1–08 Edition)

the decision to prepare an environmental impact statement and the time preparation is actually initiated. The Commission will periodically publish a consolidated list of these notices in the FEDERAL REGISTER.

(e) Environmental Impact Statement (EIS) (40 CFR 1508.11). Decisions/actions which would normally require the preparation of an EIS are identified in subpart G of this part. Procedures regarding preparation of an EIS are addressed in subpart D of this part.

### § 10010.11 Lead agencies.

(a) The Commission will serve as lead, or, as appropriate, joint-lead agency for any NEPA procedure that is sponsored by or otherwise significantly involves the Commission.

(b) The Commission will inform the Office of the Solicitor of any agreements to assume lead or joint-lead agency status.

(c) A non-Federal agency may be designated as a joint lead agency if it has a duty to comply with a local or State environmental review requirement. Any non-Federal agency may be a cooperating agency by agreement. The Commission will consult with the Office of the Solicitor in cases where such non-Federal agencies are also applicants before the Commission to determine joint-lead agency responsibilities.

### § 10010.12 Cooperating agencies.

(a) The Commission will adhere to CEQ directives both in the designation of cooperating agencies for Commission sponsored NEPA procedures and in seeking designation as a cooperating agency for procedures sponsored by others. Any non-Federal agency may be a cooperating agency in Commission NEPA proceedings by agreement. The Commission will consult with the Office of the Solicitor in cases where such non-Federal agencies are also applicants before the Commission to determine cooperating agency responsibilities.

(b) The Commission will inform the Office of the Solicitor of any agreements to assume cooperating agency status or any declinations pursuant to 40 CFR 1501.6 (c).

**§ 10010.13 Scoping.**

(a) The invitation requirement in 40 CFR 1501.7(a)(1) may be satisfied by including such an invitation in the NOI.

(b) If a scoping meeting is held, consensus is desirable; however, the lead agency is ultimately responsible for the scope of an EIS. In the case of procedures involving joint-lead agencies, all joint-lead agencies share this responsibility.

**§ 10010.14 Time limits.**

When time limits are established to prepare an environmental document they should reflect the availability of personnel and funds.

### **Subpart C—Environmental Assessments**

**§ 10010.15 Purpose.**

This subpart provides supplemental instructions for implementing those portions of the CEQ regulations pertaining to environmental assessments (EA).

**§ 10010.16 When to prepare.**

(a) An EA will be prepared for all actions, except those categories of action excluded from documentation or addressed adequately by a previous environmental document, or for those actions for which a decision has already been made to prepare an EIS. The purpose of such an EA is to allow the responsible official to determine whether to prepare an EIS.

(b) In addition, an EA may be prepared on any action at any time in order to assist in planning and decision making.

**§ 10010.17 Public involvement.**

(a) The public may be involved in the EA process when appropriate. Public notification will be made of the availability of an EA document (40 CFR 1506.6).

(b) The scoping process may be applied to an EA (40 CFR 1501.7).

**§ 10010.18 Content.**

(a) At a minimum, an EA will include brief discussions of the need for the proposal, of alternatives as required by section 102(2)(E) of NEPA, of the envi-

ronmental impacts of the proposed action and such alternatives, and a listing of agencies and persons consulted (40 CFR 1508.9(b)).

(b) In addition, an EA may be expanded to more fully describe the proposal and a broader range of alternatives if this facilitates planning and decision making.

(c) The level of detail and depth of impact analysis should normally be limited to that needed to determine whether there are significant environmental effects.

(d) An EA will contain objective and credible analyses which support its environmental impact conclusions. It will not, in and of itself, conclude whether or not an EIS will be prepared. This conclusion will be made upon review of the EA by the responsible official and documented in either a NOI or FONSI.

**§ 10010.19 Format.**

(a) An EA may be prepared in any format useful to facilitate planning and decision making.

(b) An EA may be combined with any other planning or decision making document; however, that portion which analyzes the environmental impacts of the proposal and alternatives will be clearly and separately identified and not spread throughout or interwoven into other sections of the document.

**§ 10010.20 Adoption.**

(a) An EA prepared for a proposal before the Commission by another agency, entity or person, including an applicant, may be adopted if, upon independent evaluation by the responsible Commission official, it is found to comply with this part and relevant provisions of the CEQ regulations.

(b) When appropriate and efficient, a responsible Commission official may augment such an EA when it is essentially, but not entirely, in compliance in order to make it so.

(c) If an EA or augmented EA is adopted, the responsible Commission official must prepare his/her own NOI or FONSI which also acknowledges the origin of the EA and takes full responsibility for its scope and content.

**Subpart D—Environmental Impact Statements**

**§ 10010.21 Purpose.**

This subpart provides supplemental instructions for implementing those portions of the CEQ regulations pertaining to environmental impact statements (EIS).

**§ 10010.22 Statutory requirements.**

NEPA requires that an EIS be prepared by the responsible Federal official. This official is normally the lowest-level official who has overall responsibility for formulating, reviewing, or proposing an action or, alternatively, has been delegated the authority or responsibility to develop, approve, or adopt a proposal or action. Preparation at this level will ensure that the NEPA process will be incorporated into the planning process and that the EIS will accompany the proposal through existing review processes.

**§ 10010.23 Timing.**

(a) The feasibility analysis (go/no-go) stage, at which time an EIS is to be completed, is to be interpreted as the stage prior to the first point of major commitment to the proposal.

(b) An EIS need not be commenced until an application is essentially complete; e.g., any required environmental information is submitted, any consultation required with other agencies has been conducted, and any required advance funding is paid by the applicant or other appropriate party.

**§ 10010.24 Page limits.**

An EIS should be as brief as possible and still convey the required information. Normally this should be accomplished in less than 150 pages, though documents of up to 300 pages are acceptable for more comprehensive issues. Where the text of an EIS for a complex proposal or group of proposals appears to require more than the normally prescribed limit of 300 pages, the Commission will ensure that the length of such statements is no greater than necessary to comply with NEPA, the CEQ regulations, and this part.

**§ 10010.25 Supplemental environmental impact statements.**

(a) Supplement Environmental Impact Statements (SEIS) are only required if such changes in the proposed action or alternatives, new circumstances, or resultant significant effects are not adequately analyzed in the previously prepared EIS.

(b) The Commission will consult with the Office of the Solicitor prior to proposing to CEQ to prepare a final supplement without preparing an intervening draft.

(c) If, after a Record of Decision has been executed based on a final EIS, a described proposal is further refined or modified and if there are only minor changes in effects or they are still within the scope of the earlier EIS, an EA and FONSI may be prepared for subsequent decisions rather than a SEIS. As identified in Sec. 10010.61(b)(1)(i), changes having no potential for significant environmental impact are categorically excluded from environmental documentation requirements.

**§ 10010.26 Format.**

(a) Proposed departures from the standard format described in the CEQ regulations and this part must be approved by the Executive Director.

(b) The section listing the preparers of the EIS will also include other sources of information, including a bibliography or list of cited references, when appropriate.

(c) The section listing the distribution of the EIS will also briefly describe the consultation and public involvement processes utilized in planning the proposal and in preparing the EIS, if this information is not discussed elsewhere in the document.

(d) If CEQ's standard format is not used or if the EIS is combined with another planning or decision making document, the section which analyzes the environmental consequences of the proposal and its alternatives will be clearly and separately identified and not interwoven into other portions of or spread throughout the document.

**§ 10010.27 Cover sheet.**

The cover sheet will indicate whether the EIS intended to serve any other environmental review or consultation requirements pursuant to 40 CFR 1502.25.

**§ 10010.28 Summary.**

The emphasis in the summary should be on those considerations, controversies, and issues which significantly affect the quality of the human environment.

**§ 10010.29 Purpose and need.**

The purpose and need section may introduce a number of factors, including economic and technical considerations and Commission statutory missions, which may be outside the scope of the EIS. Care should be taken to insure an objective presentation and not a justification.

**§ 10010.30 Alternatives including the proposed action.**

(a) As a general rule, the following guidance will apply:

(1) For internally initiated proposals; i.e., for those cases where the Commission conducts or controls the planning process, both the draft and final EIS shall identify the Commission's proposed action, or preferred alternative.

(2) For externally initiated proposals; i.e., for those cases where the Commission is reacting to an application or similar request, the draft and final EIS shall identify the applicant's proposed action and the Commission's preferred alternative unless another law prohibits such an expression.

(3) Proposed departures from this guidance must be approved by the Executive Director and the Office of the Solicitor.

(b) Mitigation measures to offset adverse effects of the proposed action or its alternatives are not necessarily independent of these actions and should be incorporated into and analyzed as a part of the proposal and appropriate alternatives. Where appropriate, major mitigation measures may be identified and analyzed as separate alternatives in and of themselves where the environmental consequences are distinct and significant enough to warrant separate evaluation.

**§ 10010.31 Appendix.**

If an EIS is intended to serve other environmental review or consultation requirements pursuant to 40 CFR 1502.25, any more detailed information needed to comply with these requirements may be included as an appendix.

**§ 10010.32 Tiering.**

An environmental document prepared by or for the Commission may incorporate by reference, either in part or in its entirety, an earlier environmental impact statement or environmental assessment when the subject matter of the earlier document is directly applicable. The Commission may also choose to prepare, or cause to have prepared, a broad environmental document to cover an entire program or, alternatively, a series of projects within a distinct geographic area, with the intent of later undertaking project-specific documentation and "tiering" to the more general statement or assessment.

**§ 10010.33 Incorporation by reference of material into NEPA documents.**

Citations of specific topics will include the pertinent page numbers. All literature references will be listed in the bibliography.

**§ 10010.34 Incomplete or unavailable information.**

The references to overall costs in 40 CFR 1502.22 of the CEQ regulations are not limited to market costs, but may also include other costs such as social costs due to delay.

**§ 10010.35 Methodology and scientific accuracy.**

Conclusions about environmental effects will be preceded by an analysis that supports that conclusion unless explicit reference by footnote is made to other supporting documentation that is readily available to the public.

**§ 10010.36 Environmental review and consultation requirements.**

(a) The Commission will maintain a list of applicable environmental review and consultation requirements pursuant to other federal or state laws and regulations and will make this available to interested parties.

#### **§ 10010.37**

(b) If the EIS is intended to serve as the vehicle to fully or partially comply with the requirements of other federal or state laws and regulations, the associated analyses, studies, or surveys will be identified as such and discussed in the text of the EIS and the cover sheet will so indicate. Any supporting analyses or reports to the NEPA documents will be incorporated by reference or included as an appendix and shall be sent to reviewing agencies as appropriate in accordance with applicable regulations or procedures.

#### **§ 10010.37 Inviting comments.**

(a) Comments from State agencies will be requested through procedures established by the Governor pursuant to Executive Order 12372, and may be requested from local agencies through these procedures to the extent that they include the affected local jurisdictions.

(b) When the proposed action may affect the environment of an Indian reservation, comments will be requested from the Indian tribe through the tribal governing body, unless the tribal governing body has designated an alternate review process.

#### **§ 10010.38 Response to comments.**

(a) Preparation of a final EIS need not be delayed in those cases where a Federal agency, from which comments are required to be obtained (40 CFR 1503.1(a)(1)), does not comment within the prescribed time period. Informal attempts will be made to determine the status of any such comments and every reasonable attempt should be made to include the comments and a response in the final EIS.

(b) When other commentors are late, their comments should be included in the final EIS to the extent practicable.

#### **§ 10010.39 Elimination of duplication with state and local procedures.**

The Commission will incorporate in its appropriate program regulations provisions for the preparation of an EIS by a State agency to the extent authorized in section 102(2)(D) of NEPA.

#### **43 CFR Ch. III (10–1–08 Edition)**

#### **§ 10010.40 Combining documents.**

Incorporating documentation requirements of other environmental regulations into an EIS is both acceptable and desirable. If the EIS is combined with another planning or decision making document, the section which analyzes the environmental consequences of the proposal and its alternatives will be clearly and separately identified and not interwoven into other portions of or spread throughout the document.

#### **§ 10010.41 Commission responsibility.**

A Commission sponsored environmental document may be prepared by the Commission, a joint-lead agency, a contractor selected or approved by the Commission, or, when appropriate, a cooperating agency. Regardless, the Commission has the responsibility to independently evaluate and draw appropriate conclusions. Following the Commission's preparation or independent evaluation of and assumption of responsibility for an environmental document, an applicant may print it provided the applicant is bearing the cost of the document pursuant to other laws.

#### **§ 10010.42 Public involvement.**

The Commission will adhere to CEQ requirements regarding the use of public notices, public meetings, public review of NEPA documents, and other techniques to ensure that the public has ample opportunity to provide input into the proceedings and to ensure that the Commission will give due consideration to this input.

#### **§ 10010.43 Further guidance.**

The Commission may provide further guidance concerning NEPA pursuant to its organizational responsibilities and through supplemental directives.

#### **§ 10010.44 Proposals for legislation.**

(a) When appropriate, the Commission shall identify in the annual submittal to the Office of Management and Budget of the Commission's proposed legislative program any requirements for and the status of any environmental documents.

(b) When required, the Commission shall ensure that a legislative EIS is

## Utah Reclamation Mit. and Con. Com.

## § 10010.53

included as a part of the formal transmittal of a legislative proposal to the Congress.

### § 10010.45 Time periods.

(a) The minimum review period for a draft EIS will be sixty (60) days from the date of transmittal to the Environmental Protection Agency.

(b) The Commission will be responsible for consulting with the Environmental Protection Agency and/or CEQ about any proposed reductions in time periods or any extensions of time periods proposed by those agencies.

### Subpart E—Relationship to Decision-Making

#### § 10010.46 Purpose.

This subpart provides supplementary instructions for implementing those portions of the CEQ regulations pertaining to decision-making.

#### § 10010.47 Pre-decision referrals to CEQ.

(a) Upon receipt of advice that another Federal agency intends to refer a Commission matter to CEQ, the Commission will immediately meet with that Federal agency to attempt to resolve the issues raised.

(b) Upon any referral of a Commission matter to CEQ by another Federal agency, the Executive Director will be responsible for coordinating the Commission's position.

#### § 10010.48 Decision-making procedures.

(a) Procedures by which the Commission makes decisions are specified in 43 CFR part 10000.

(b) The Commission will incorporate in its formal decision-making procedures provisions for consideration of environmental factors and relevant environmental documents. The major decision points for principal programs likely to have significant environmental effects will be clearly identified.

(c) Relevant environmental documents, including supplements, will be included as part of the record in formal rule making or adjudicatory proceedings.

(d) Relevant environmental documents, comments, and responses will accompany proposals through existing review processes so that Commission officials use them in making decisions.

(e) The decision-maker will consider the environmental impacts of the entire range of alternatives described in any relevant environmental document; the range of these alternatives must encompass the actual alternatives considered by the decision-maker.

#### § 10010.49 Record of decision.

(a) Any decision documents prepared for proposals involving an EIS may incorporate all appropriate provisions of 40 CFR 1505.2 (b) and (c).

(b) If a decision document incorporating these provisions is made available to the public following a decision, it will serve the purpose of a record of decision.

#### § 10010.50 Implementing the decision.

The terms "monitoring" and "conditions" in 40 CFR 1505.3 of the CEQ regulations will be interpreted as being relevant to factors affecting the quality of the human environment.

#### § 10010.51 Limitations on actions.

The Executive Director will notify the Chairman of the Commission and the Office of the Solicitor of any situations where Commission or applicant action would, if taken prior to completion of a NEPA proceeding, potentially have an adverse environmental impact or limit the choice of reasonable alternatives.

#### § 10010.52 Timing of actions.

The Commission will consult with the Office of the Solicitor before making any request for reducing the time period before a decision or action.

#### § 10010.53 Emergencies.

In the event of an unanticipated emergency situation, the Commission will immediately take any necessary action to prevent or reduce risks to public health or safety or serious resource losses and then expeditiously consult with the Office of the Solicitor about compliance with NEPA. The Commission will also be responsible for consulting with CEQ.

**Subpart F—Managing the NEPA Process**

**§ 10010.54 Purpose.**

This subpart provides supplemental instruction for implementing those provisions for the CEQ regulations pertaining to procedures for implementing and managing the NEPA process.

**§ 10010.55 Organization for environmental quality.**

(a) Executive Director. The Executive Director is responsible for providing advice and assistance to the Commission on matters pertaining to environmental quality and for overseeing and coordinating the Commission's compliance with NEPA, Executive Order 11514 as amended by Executive Order 11991, the CEQ regulations, and this part.

(b) NEPA Coordinator. The Executive Director will designate organizational elements or individuals, as appropriate, to be responsible for overseeing matters pertaining to the environmental effects of the Commission's plans and programs. The individual(s) assigned these responsibilities should have management experience or potential, understand the Commission's planning and decision making processes, and be well trained in environmental matters, including the Commission's policies and procedures so that his/her/their advice has significance in the Commission's planning and decisions.

**§ 10010.56 Approval of EISs.**

The Chairman of the Commission (Chairman), acting on the part of the full Commission, is authorized to approve an EIS. The Chairman may further assign the authority to approve the EIS if he or she chooses. The Executive Director will make certain that there are adequate safeguards to assure that EISs and other environmental documents comply with NEPA, the CEQ regulations, this part, and other relevant Commission procedures.

**§ 10010.57 List of specific compliance responsibilities.**

(a) The Commission staff shall:

(1) As deemed necessary, prepare a NEPA handbook or adapt applicable materials prepared by other agencies,

providing guidance on how to implement NEPA in principal program areas.

(2) Prepare program regulations or directives for applicants.

(3) Propose categorical exclusions.

(4) Prepare EAs.

(5) Recommend whether to prepare an EIS.

(6) Prepare NOIs and FONSIIs.

(7) Prepare EISs.

(b) The Executive Director shall:

(1) Approve agency handbooks and other NEPA guidance.

(2) Approve regulations or directives for applicants.

(3) Approve categorical exclusions.

(4) Approve EAs.

(5) Decide whether to prepare an EIS.

(6) Approve NOIs and FONSIIs.

(7) Make recommendations regarding the adequacy of EISs.

(c) The Chairman of the Commission, acting on behalf of the full Commission, shall:

(1) Concur with regulations or directives for applicants.

(2) Concur with EAs.

(3) Approve EISs.

**§ 10010.58 Information about the NEPA process.**

The Executive Director will identify staff contacts where information about the NEPA process and the status of EISs may be obtained.

**Subpart G—Actions Requiring an EIS and Actions Subject to Categorical Exclusion**

**§ 10010.59 Purpose.**

This subpart provides supplemental instruction for determining major actions requiring an EIS and for determining actions that are categorically excluded from NEPA.

**§ 10010.60 Actions normally requiring an EIS.**

(a) The following proposals will normally require the preparation of an EIS:

(1) Establishment of major new refuges or wildlife management areas, fish hatcheries, and major additions to such installations.

(2) Master development and/or management plans for major new installations.

(3) Management plans for established installations where major new developments or substantial changes in management practices are proposed.

(b) If for any of these proposals it is initially decided not to prepare an EIS, an EA will be prepared in accordance with 40 CFR 1501.4(e)(2).

**§ 10010.61 Actions subject to categorical exclusion.**

(a) General categorical exclusions. The following actions are categorical exclusions (CX). However, environmental documents will be prepared for individual actions subject to CX if the exceptions listed in Sec. 10010.62 apply.

(1) Personnel actions and investigations and personnel services contracts.

(2) Internal organizational charges and facility and office reductions and closings.

(3) Routine financial transactions, including such things as salaries and expenses, procurement contracts, guarantees, financial assistance, income transfers, audits, fees, bonds and royalties.

(4) Legal transactions, including such things as investigations, patents, claims, legal opinions, and judicial activities including their initiation, processing, settlement, appeal or compliance.

(5) Monitoring actions, including inspections, assessments, administrative hearings and decisions; when the regulations themselves or the instruments of regulations (leases, permits, licences, etc.) have previously been covered by the NEPA process or exempt from it.

(6) Non-destructive data collection, inventory (including field, aerial and satellite surveying and mapping), study, and research activities.

(7) Routine and continuing government business, including such things as supervision, administration, activities having limited context and intensity, for example, activities of limited size and magnitude of short-term effects.

(8) Management formulation, allocation, transfer and reprogramming of the Commission's budget at all levels. This does not exclude the preparation

of environmental documents for proposals included in the budget when otherwise required.

(9) Legislative proposals of an administrative or technical nature, including such things as changes in authorizations for appropriations, and minor boundary changes and land transactions; or having primarily economic, social, individual or institutional effects; and comments and reports on referrals of legislative proposals.

(10) Policies, directives, regulations, and guidelines of an administrative, financial, legal, technical, or procedural nature; or the environmental effects of which are too broad, speculative, or conjectural to lend themselves to meaningful analysis and will be subject later to the NEPA process, either collectively or case-by-case.

(11) Activities which are educational, informational, advisory or consultative to other agencies, public and private entities, visitors, individuals or the general public.

(12) Cooperative agreements and interagency agreements.

(b) Specific categorical exclusions. The following actions are categorical exclusions (CX).

(1) General:

(i) Changes or amendments to an approved action when such changes have no potential for causing substantial environmental impact.

(ii) Personnel training, environmental interpretation, public safety efforts and other educational activities.

(iii) The issuance and modification of procedures, including manuals, orders and field rules, when the impacts are limited to administrative or technological effects.

(iv) The acquisition of land or water rights in accordance with the Commission's procedures, when the acquisition is from a willing seller, the acquisition planning process has been performed in coordination with the affected public and essentially the existing use will be continued.

(2) Resource management:

(i) Research, inventory and information collection activities directly related to the conservation of fish and

## § 10010.62

wildlife resources which involve negligible animal mortality or habitat destruction, and no introduction of either exotic organisms or contaminants.

(ii) The operation, maintenance and management of existing facilities and improvements (i.e. structures, roads), including renovations and replacements which result in no or only minor changes in the capacity, use or purpose of the affected facilities.

(iii) The addition of small structures or improvements in the area of existing facilities, which result in no or only minor changes in the capacity, use or purpose of the affected area.

(iv) The reintroduction (stocking) of native or established species into suitable habitat within their historic or established range.

(v) Minor changes in the amounts or types of public use on Commission managed land or land acquired with Commission funds, in accordance with existing regulations, management plans and procedures.

(vi) Consultation and technical assistance activities directly related to the conservation of fish and wildlife resources.

(3) Use of Commission-managed or funded lands:

(i) The issuance of special approvals for public use of Commission-managed land or land acquired with Commission funds, which maintains essentially the same level of use and does not continue a level of use that has resulted in adverse environmental effects.

(ii) Permitting a limited additional use of an existing right-of-way over Commission-managed land or land acquired with Commission funds, such as the addition of new power or telephone lines where no new structures or improvements are required, or the addition of buried lines.

(iii) The issuance or reissuance of rights-of-way and special use approvals for Commission-managed land or land acquired with Commission funds that result in no or negligible environmental effects.

(iv) The reissuance of grazing or agricultural use approvals for Commission-managed land or land acquired with Commission funds which do not increase the level of use nor continue a

## 43 CFR Ch. III (10–1–08 Edition)

level of use that has resulted in adverse environmental effects.

(4) Funding for activities by others:

(i) Planning grants or other funding for planning activities and the administrative determination that plans were prepared in accordance with prescribed standards. However, when the plan is submitted to the Commission for implementation, the program proposed by the plan is subject to the NEPA process.

(ii) Grants or other funding for categorically excluded actions listed in paragraphs (b) (1) through (3) of this section.

(5) Inter-agency Initiatives: Actions where the Commission has concurrence or co-approval with another agency and the action is a categorical exclusion for that agency.

(6) Transfer of the operations and maintenance of Federal lands, water, or facilities to water districts, recreation agencies, fish and wildlife agencies, or other entities where the anticipated operation and maintenance activities are agreed to in a contract or a memorandum of agreement, follow approved Commission policy, and no major change in operation and maintenance is anticipated or a proposed major change in operation and maintenance has previously been the subject of an appropriate NEPA document.

### § 10010.62 Exceptions to categorical exclusions.

The following exceptions apply to individual actions within categorical exclusions (CX). Environmental documents must be prepared for actions which may:

(a) Have significant adverse effects on public health or safety.

(b) Have adverse effects on such unique geographic characteristics as historic or cultural resources, parks, recreation or refuge lands, wilderness areas, wild or scenic rivers, sole or principal drinking water aquifers, prime farmlands, wetlands, floodplains, or ecologically significant or critical areas, including those listed on the Department of the Interior's National Register of Natural Landmarks.

(c) Have highly controversial environmental effects.

**Utah Reclamation Mit. and Con. Com.**

**§ 10010.62**

(d) Have highly uncertain and potentially significant environmental effects or involve unique or unknown environmental risks.

(e) Establish a precedent for future action or represent a decision in principle about future actions with potentially significant environmental effects.

(f) Be directly related to other actions with individually insignificant but cumulatively significant environmental effects.

(g) Have adverse effects on properties listed or eligible for listing on the National Register of Historic Places.

(h) Have adverse effects on species listed or proposed to be listed on the

List of Endangered or Threatened Species, or have adverse effects on designated Critical Habitat for these species.

(i) Require compliance with Executive Order 12988 (Floodplain Management), Executive Order 11990 (Protection of Wetlands), or the Fish and Wildlife Coordination Act. However, an action may be categorically excluded following applicable reviews if the action is found to be in conformance with the applicable law or executive order.

(j) Threaten to violate a Federal, State, local or tribal law or requirement imposed for the protection of the environment.

## FINDING AIDS

---

A list of CFR titles, subtitles, chapters, subchapters and parts and an alphabetical list of agencies publishing in the CFR are included in the CFR Index and Finding Aids volume to the Code of Federal Regulations which is published separately and revised annually.

List of CFR Sections Affected

## INDEX TO CHAPTER II

### (As of October 1, 2008)

EDITORIAL NOTE: This listing is provided for informational purposes only. It is compiled and kept up-to-date by the Bureau of Land Management, Department of the Interior.

#### A

Acquired lands:	
Mineral collection permits .....	§§ 3503.32, 3503.38, 3505.12
Mineral leasing (coal only) .....	Part 3400
Mineral leasing (oil and gas) .....	§3101.2-2
Mineral leasing (other than oil and gas, coal, oil shale, tar sand) .....	Part 3500
Acquisitions (donations and purchases) .....	Subtitle A, part 8; part 2130
Acreage limitations (geothermal) .....	§3206.12
Acreage limitations (oil and gas) .....	§3101.2
Activity planning in coal leasing process .....	§3420.3
Public participation .....	§3420.3-1(d)
Adjudication, equitable .....	§ 1871.1
Adjudication principles and procedures .....	Subpart 1871
Adverse claims, mineral .....	Part 3870
Airports:	
Airport and Airway Improvement Act .....	Part 2640
Leases .....	Subpart 2911
Segregative effect of application .....	§2911.2-3, 2641.3
Alaska Native Selections .....	Part 2650
Federal Installations .....	Subpart 2655
General .....	Subpart 2650
Miscellaneous Selections .....	Subpart 2653
Native Reserves .....	Subpart 2654
Regional Selections .....	Subpart 2652
Village Selections .....	Subpart 2651
Alaska Native allotments for certain veterans .....	Subpart 2568
Appeals .....	§2568.120
Applying for an allotment .....	§2568.70 <i>et seq.</i>
Available lands .....	§§ 2568.90-2568.115
Deceased veterans .....	§2568.60
Qualifications .....	§2568.50
Alaska occupancy and use .....	Part 2560
Alaska Native allotments for certain veterans .....	Subpart 2568
Appeals .....	§2568.120
Applying for an allotment .....	§2568.70 <i>et seq.</i>
Available lands .....	§§ 2568.90-2568.115
Deceased veterans .....	§2568.60
Qualifications .....	§2568.50
Alaska Railroad townsites .....	Subpart 2566
Headquarters .....	Subpart 2563
Homesites .....	Subpart 2562
Native allotments .....	Subpart 2561
Native townsites .....	Subpart 2564
Non-native townsites .....	Subpart 2565
Trade and manufacturing .....	Subpart 2562
Alaska Public Sale Act .....	Subpart 3822
Allotment:	
Alaska Native Allotments for Certain Veterans .....	Subpart 2568

Allotment—Continued

Grazing allotment management plan .....	§ 4120.2
Indian allotments .....	Part 2530
Native Allotments in Alaska .....	Part 2650
Segregative effect of application (Alaska) .....	§ 2091.2-1
Antiquities Act .....	Subtitle A, part 3
Appeals .....	§ 1840.1; subtitle A, part 4
Alaska Native Allotments for Certain Veterans .....	Subpart 2568
Coal .....	§§ 3410.3-2(g)(2), 3430.5-2, 3451.2(d), 3486.4
Geothermal	
Drilling operations .....	Subpart 3267
Exploration operations .....	Subpart 3256
Utilization .....	Subpart 3279
Oil and gas .....	§§ 3101.7-3, 3165.4, 3120.1-3, 3000.4
Oil and gas units .....	§ 3185.1
Rights-of-way .....	Subparts 2804, 2884
Special recreation permits .....	§ 2931.8
Wild free-roaming horses and burros .....	§ 4770.3
Applications:	
Alaska Native Allotments for Certain Veterans .....	§ 2568.70 <i>et seq.</i>
General procedures .....	Part 1820
Geothermal Drilling .....	Subpart 3261
Geothermal—unit agreement .....	Subpart 3281
Grazing—Alaska—Livestock .....	§ 4220.2
Grazing—Alaska—Reindeer .....	§ 4300.20 <i>et seq.</i> , § 4320.1
Grazing—Exclusive of Alaska .....	§ 4130.1
Lands in more than one land district .....	§ 1822.16
Minerals—Leases (coal) .....	Part 3400 <i>et seq.</i>
Minerals—Leases (oil and gas) .....	Part 3100 <i>et seq.</i>
Minerals—Leases (other than oil and gas, coal, oil shale, tar sand) .....	Part 3500
Minerals-prospecting permits .....	Part 3500
Oil and gas drilling .....	§ 3162.3-1
Oil and gas unit agreement .....	Subpart 3181
Oil and gas geophysical exploration—Alaska .....	§ 3152.1
Refunds .....	§§ 1823.11-1823.13
Rights-of-way .....	Subparts 2802, 2882
Special recreation permit .....	§ 2932.20 <i>et seq.</i>
Time limit for filing documents .....	Subpart 1822
Archaeological Resources Protection Act .....	Subtitle A, part 7
Areas:	
Critical environmental concern, areas of .....	§ 1610.7-2
Designated national .....	Subpart 8351
Designation, areas and trails (off-road vehicles) .....	Subpart 8342
Developed sites and rules of conduct .....	§ 8365
Management .....	Part 8350
Research natural .....	Subpart 8223
Use authorizations .....	Part 2930
Unsuitable for surface mining .....	§ 1610.7-1
Wilderness .....	Part 8560
Arkansas—erroneously meandered lands .....	Subpart 2543
Asphalt in Oklahoma .....	§§ 3503.14, 3503.37(g), 3504.15(g), 3504.16(b), 3504.20, 3504.21(g), 3504.25, 3505.10(b), 3507.11(c), 3508.11, 3511.24(g), 3514.25(a)
Asphalt leases .....	§ 3503.14, Subpart 3504
Assessments work—annual filings .....	Part 3836
Assignments and/or transfers:	
Coal .....	Subpart 3453
Geothermal .....	Subpart 3216
Grazing preference .....	§ 4110.2-3
Mining claims .....	Part 3833; Subpart C
Oil and gas .....	Subparts 3106, 3135
Other minerals .....	Subpart 3512
Rights-of-way .....	§ 2803.6-3
Authority to bind government .....	§ 1810.3
Authorizations, Recreation Use .....	Part 2930

Availability of official records ..... Subtitle A, part 2

## B

### Bonds:

Coal leases .....	\$3453.2-4, subpart 3474
Geothermal .....	Subparts 3214-3215
Leases and prospecting permits for minerals (other than coal and oil and gas) .....	\$3504.50 <i>et seq.</i>
Nationwide .....	\$3504.56
Oil and gas exploration .....	Subpart 3154
Oil and gas leasing .....	Subpart 3104, §3106.6, subpart 3134
Oil and gas units .....	\$3184.1
Rights-of-way .....	§§2803.1-4, 2883.1-3
Special recreation permits .....	\$2932.44
Statewide .....	\$3504.56
Timber sale payment .....	\$5451.4
Timber sale performance .....	\$5451.1
Bore holes and sample requirements (solid minerals other than coal) .....	Subpart 3593
Burros, wild free-roaming .....	Part 4700

## C

Cabin sites .....	Subtitle A, part 21
Cadastral survey .....	Part 9180
California: Reserved minerals in patented lands .....	Subpart 3584
Casual use:	
Mining .....	§§3802.1-2, 3809.11(a)
Oil and gas exploration .....	\$3150.0-5(b)
Rights-of-way .....	\$2800.0-5
Cave management .....	Subtitle A, part 37
Caves, designation of significant .....	Subtitle A, part 37
Cemeteries .....	§§2650.5-5, 2653.5
Classification, land:	
Criteria and procedures .....	Part 2400
Segregative effect .....	Subpart 2091
Closures .....	Subpart 8364
Coal leases:	
Applications for .....	Subpart 3425
Assignments .....	Subpart 3453
Bonds .....	Subpart 3474
Cost Recovery .....	\$3000.12
Exchanges .....	Subparts 3435, 3436
Fees, rentals, royalties .....	Subpart 3473
Lease terms .....	Subpart 3475
Modifications .....	Subpart 3432
Negotiated sales and rights-of-way .....	Subpart 3431
Qualification requirements .....	Subpart 3472
Readjustments .....	Subpart 3451
Relinquishment, cancellation, and termination .....	Subpart 3452
Coal leasing:	
Competitive leasing .....	Subpart 3420
General .....	Part 3400 <i>et seq.</i>
Preference right leases .....	Subpart 3430
Special leasing opportunities .....	\$3420.1-3
Split estate leasing .....	Subpart 3427, §3400.0-5(kk)
Coal management (General) .....	Part 3400 <i>et seq.</i>
Coal exploration and mining operation rules .....	Part 3480
Coal related planning:	
Hearings (plans involving potential coal leasing) .....	\$1610.5-7
Land use analysis .....	\$1610.5-7
Process (resource management planning) .....	Part 1600
Surface owner consultation .....	\$1610.2(j)
Unsuitability criteria .....	\$3461.5
Unsuitability designation .....	\$1610.7-1
Coal trespass .....	\$3430.7, 9239.5-3
Color-of-Title .....	Part 2540

Combined hydrocarbon leasing .....	Part 3140
Common varieties:	
Disposal of .....	Part 3600 <i>et seq.</i>
Communication sites and lines, rights-of-way for .....	Part 2800
Community pits and common use areas (mineral materials) .....	Subpart 3603
Confidentiality, coal data .....	§§3410.4(b), 3420.1-2(b), 3422.1(a), 3453.2-2(g), 3481.3
Conformity (planning process) .....	§1610.5-3
Conditions of use—off-road vehicles .....	Subpart 8341
Conservation System Units (CSU) .....	§2568.100 <i>et seq.</i>
Consistency requirements (planning process) .....	§1610.3-2
Construction, rules of (words and phrases) .....	§1810.1
Consultation, cooperation:	
Attorney general .....	§§3420.4-5, 3422.3-4, 3435.3-7
Indian tribes .....	§§1610.3-1, 3420.4-4
State .....	§§1610.3-1, 3400.4, 3420.4-3
Surface management agency .....	§§3400.3-1, 3410.2-3, 3420.4-2
Surface owner .....	§§1610.2(j), 3420.6
Contracts—Helium .....	Part 3195
Conveyance—Federally owned mineral interests .....	Part 2720
Conveyancing documents .....	Part 1860
Correction of .....	Subpart 1865
Cooperating agency .....	≤§1610.3-1
Cooperative relations .....	Part 1780
Coordination (planning process) .....	§1610.3-1
Corridors, right-of-way .....	Subpart 2806
Cost recovery—Minerals management .....	§3000.12
Cultural resource management .....	Group 8100, reserved

## D

Decision review by Congress (planning) .....	§1610.6
Desert Land Act .....	Subpart 2520
Segregation .....	§2091.4-1
Designation:	
Areas of Critical Environmental Concern .....	§1610.7-2
Areas unsuitable for surface mining .....	§1610.7-1
Management areas .....	Part 8350
National areas .....	Subpart 8351
Off-road vehicle areas and trails .....	Subpart 8342
Right-of-way corridors .....	§§2802.11,2882.10
Wilderness areas .....	Part 8560
Development contracts (hardrock minerals) .....	Subpart 3517
Diligence requirements (coal) .....	Subpart 3483
Disaster relief .....	Subpart 1815
Disclaimers of interest, recordable .....	Subpart 1864
Disposal:	
Classifications .....	Part 2430
Mineral materials .....	Part 3600
Dispositions—sales of mineral interests .....	Part 2720
Drainage (oil and gas) .....	§§3100.2; 3162.2 <i>et seq.</i>
Drilling and producing obligation:	
Geothermal .....	Subpart 3262
Oil and gas .....	§3162.2

## E

Electric power generation, transmission, and distribution—rights-of-way .....	Part 2800
Emergency noncompetitive sale of mineral materials .....	§3602.31
Employees—interest in lands .....	§20.735-22

Trespass—Alaska—reindeer .....	§ 4300.90, § 9239.3
Unauthorized grazing use—Exclusive of Alaska .....	Subpart 4150

## H

Hardrock minerals, leases and permits .....	§§ 3503.37(f), 3504.15(f), 3504.21(f), 3504.25, 3505.10, 3505.61, 3511.15(f), 3514.25
Headquarters sites, Alaska .....	Subpart 2563
Hearings procedures .....	Part 1850
Hearings:	
General .....	Subtitle A, part 4
Grazing—Alaska—livestock .....	§ 4240.2
Grazing—Exclusive of Alaska .....	§ 4160.4; subtitle A, part 4
Mining claims .....	Subparts 3713, 3870
Multiple mineral development .....	Part 3740
Oil and gas penalties .....	§ 3163.2
Plan involving potential coal leasing .....	§ 1610.2(k)
Helium:	
Conservation .....	Subtitle A, part 16
Contracts .....	Subpart 3195
Ownership and rights .....	§ 3100.1
Horses, wild free-roaming .....	Part 4700

## I

Indemnity selections, State .....	Subpart 2621
Indian allotments:	
General .....	Subpart 2530
Segregative effect .....	\$2531.3
Indian land:	
Exchanges .....	Subpart 2271
Oil and gas lease operations .....	Subpart 3160
Information collection:	
Conveyance of Federally-owned mineral interests .....	\$2720.0-9
Exchanges .....	\$2200.0-9
Geothermal resources leasing and operations .....	Part 3200
Grazing administration—exclusive of Alaska .....	\$4100.0-9
Mining claim assessment work .....	Part 3836
Mining claim recording .....	Part 3833
Mining in powersite withdrawals .....	\$3730.0-9
Onshore oil and gas leasing .....	\$3100.0-9
Onshore oil and gas operations .....	\$3160.0-9
Recreation and public purposes .....	\$2740.0-9
Wild free-roaming horses and burros .....	\$4700.0-9
Inspections, enforcement, and appeals:	
Coal .....	Subparts 3465, 3486
Geothermal	
Appeals—exploration operations .....	Subpart 3256
Appeals—drilling operations .....	Subpart 3267
Appeals—utilization .....	Subpart 3279
Drilling operations .....	Subpart 3265
Utilization operations .....	Subpart 3277
Oil and gas lease sites .....	\$3161.3, subpart 3190
Solid minerals other than coal .....	Subpart 3598
Inventory and information (planning) .....	\$1610.4-3

## K

King Range National Conservation Area:	
Acquisition of lands .....	Subpart 2130
Condemnation .....	Subpart 2137
Exchanges .....	Subpart 2274

## L

Laches .....	\$1810.3
Land classification .....	Part 2400 <i>et seq.</i>
Land use analysis .....	\$1610.5-7
Land use permits .....	Part 2920
Land use planning:	
Coal related .....	\$3420.1-4
General (resource management) .....	Part 1600
Late payment or underpayment of charges (solid minerals other than coal) .....	Subpart 3599
Law enforcement—criminal .....	Part 9260
Land resource management .....	Part 9262
Minerals management .....	Subpart 9263
Range Management .....	Subpart 9264
Timber and other vegetative resources management ..	Subpart 9265
Recreation programs .....	Subpart 9268
Technical services .....	Subpart 9269
Wildlife management .....	Subpart 9266
Leases:	
Acquired lands minerals (coal only) .....	\$3400.2(c)
Acquired lands (oil and gas) .....	\$3101.2-2, 3110.5-3
Acquired lands minerals (other than oil and gas, coal, and oil shale) .....	\$§3503.11, 3503.12, 3503.20, 3503.32, 3503.38
Airports and aviation fields .....	Subpart 2911
Asphalt in Oklahoma .....	\$3503.14, subpart 3504

## Leases—Continued

Cancellations:	
Coal .....	Subpart 3452
Geothermal .....	§3213.16 <i>et seq.</i>
Oil and gas .....	§§3108.2, 3136.3
Coal .....	Part 3400 <i>et seq.</i>
Extensions	
Coal .....	Subpart 3451
Geothermal .....	Subpart 3207
Oil and gas .....	§3105.5-4, subpart 3135
Other minerals .....	§3512.33
Other minerals; cost recovery .....	§3000.12
Filing fees, minerals .....	§3504.11
Fur farms, Alaska .....	Subpart 2916
General .....	Part 2920
Geothermal .....	Part 3200
Gilsonite .....	§§3503.37(e), 3504.15(b)(e), 3504.21(e), 3504.25, 3511.15(e), 3514.25(b)
Grazing—Alaska—livestock .....	Part 4200
Grazing—Exclusive of Alaska .....	§4130.2
Grazing—Pierce Act .....	Subpart 4600
Hardrock minerals .....	§§3503.37(f), 3504.15(f), 3504.21(f), 3504.25, 3505.10, 3505.61, 3511.15(f), 3514.25
Mineral Leasing Act (1920) .....	Part 3100, 3400, 3500
Oil and gas .....	Part 3100
Competitive leases .....	Subpart 3120
General .....	Subpart 3100
Information collection .....	§3100.0-9
National Petroleum Reserve—Alaska .....	Subpart 3130
Noncompetitive leases .....	Subpart 3110
Permits and easements .....	Subpart 2920
Phosphate .....	§§3501.15(g), 3503.37(a), 3503.38(a), 3504.15(b)(a), 3504.16(c), 3504.21(a), 3504.25(a), 3511.10, 3511.15(a), 3514.25(b), 3516.11
Potassium .....	§§3503.37(c), 3504.15(c), 3504.16(b), 3504.21(c), 3504.25(a), 3507.19(a)(4), 3511.10, 3511.15(c), 3514.25(b)
Public domain lands, minerals .....	§§3503.30-3503.36, subpart 3101
Recreation and public purposes .....	Subpart 2912
Relinquishments, minerals .....	Subpart 3108, §§3244.1, 3509.1
Rentals, minerals .....	§§3103.2, 3205.3, subpart 3503
Reorganization Plan #3 minerals .....	§§3513.20-3513.26
Royalty reductions, coal .....	Subpart 3485
Royalty reductions, heavy oil .....	§3103.4-3
Royalty reductions, oil and gas .....	§3103.4-1
Royalty reductions, stripper wells .....	§3103.4-2
Sodium .....	§§3501.15(g), 3503.37(b), 3504.15(b)(b), 3504.16(b), 3504.21(b), 3504.25(a), 3507.11(b), 3507.19(b), 3511.10, 3511.11, 3511.15(b), 3514.25(a), 3516.11
Sulphur .....	§§3503.12, 3503.37(d), 3504.15(b)(d), 3504.21(d), 3504.25(a), 3507.11(b), 3507.19(a)(4), 3511.15(d), 3514.25(a)
Suspensions, coal .....	§§3473.4, 3483.3
Special leasing areas .....	Part 3580
Tar sand .....	Subpart 3141
Royalties and rentals .....	§3141.5-3
Terminations and cancellations, coal .....	Subpart 3452
Terminations and cancellations, geothermal .....	Subpart 3213
Terminations and cancellations, solid leasable min- erals other than coal and oil shale .....	§§3505.70-3505.85
Terminations and cancellations, oil and gas .....	Subpart 3108
Licenses:	
Coal mining .....	Subparts 3410, 3440, §3400.0-5(l), §3400.0-5(u)

Licenses—Continued

Coal exploration .....	Subpart 3410
Location:	
Mining location	
General .....	Part 3800 <i>et seq.</i>
In powersite withdrawals .....	Subpart 3730
In reclamation withdrawals .....	Subpart 3816
Lode claims, General .....	Part 3832;Subpart B
Patent applications .....	Subpart 3862
Logging roads, rights-of-way for .....	Part 2810
Logical mining unit (coal) .....	Subpart 3487
Louisiana, erroneously meandered lands in .....	Subpart 2544

**M**

Mail, communications .....	§ 1810.2
Management areas, recreation .....	Part 8350
Management of designated wilderness areas .....	Part 8560
Maps and plans requirements (coal) .....	Subpart 3482
Maps and plans requirements (solid minerals other than coal) .....	Subpart 3592
Materials trespass .....	§ 9239.6
Milling and mining waste (solid minerals other than coal) .....	Subpart 3596
Millsites:	
General .....	Part 3832;Subpart C;Subpart 3864
In powersite withdrawals .....	Subpart 3737
Patents .....	Subpart 3864
Mineral collection permits—acquired lands uses .....	§ 3505.12
Mineral development impact relief .....	Subpart 1882
Mineral development, multiple .....	§ 3501.16
Mineral lands:	
Review for designation as unsuitable for entry or leasing .....	§ 1610.7-1
State grants .....	Subpart 2623
Mineral leasing:	
Acquired lands .....	§ 3101.2-2
Coal .....	Part 3400 <i>et seq.</i>
Cost recovery .....	§ 3000.12
Geothermal resources .....	Part 3200
Recreation areas and public purpose lands .....	§ 3101.6
Public domain lands: acreage limitations .....	§ 3101.2-1
Oil and gas .....	Part 3100
Oil and gas; National Petroleum Reserve, Alaska .....	Part 3130
Solid minerals .....	Parts 3500 through 3590
Special leasing areas .....	Part 3580
Mineral Leasing Act of 1920:	
Coal .....	§ 3400.0-3(a)(1)
General .....	Part 3100
Rights-of-way for pipelines, oil and gas .....	Part 2880, 3109
National forest lands in Minnesota .....	§§ 3501.1(b)(3), 3503.13(c)
Oil and gas .....	Subpart 3100
Surface protection .....	Subtitle A, part 23
Minerals other than oil and gas and coal, oil shale, and tar sands .....	Parts 3500 through 3590
Acreage limitations .....	§ 3503.37
Cost recovery .....	§ 3000.12
Reorganization Plan #3 .....	§§ 3501.1(b), 3501.2(a), 3503.13(a), 3507.14(d), 3507.19(b)
Rights-of-way .....	Part 2880
Mineral materials .....	Part 3600
Emergency noncompetitive sale .....	§ 3602.31
Confidential and proprietary information .....	§ 3601.8
Cost recovery .....	§ 3000.12
Mineral surveyors:	
Appointment and employment .....	§ 3861.5
Contracts .....	§ 3861.4

Mineral surveyors—Continued

Duties .....	§ 3861.3-1	
Reports .....	§ 3861.2-3	
Mineral trespass .....	§ 9239.5

Stock driveway withdrawals .....	Subpart 3815	
Stockraising Homestead Act lands .....	Part 3838	
Surface management .....	Subpart 3809	
Surveys and plats .....	Subpart 3861	
Tunnel sites .....	Part 3832; Subpart D	
Wilderness Review Program (exploration and mining) Confidential information .....	Subpart 3802 § 3802.6	
Mining methods (coal) .....	§§ 3481.1, 3482.1	

Mining methods (solid minerals other than coal) .....	Part 3590
Minnesota: National Forest Lands .....	§§ 3501.1(b)(3), 3503.13(c)
Motion pictures .....	Subtitle A, part 5
Motor vehicles, off road vehicle standards .....	§ 8341.1
Motor vehicles, developed sites and areas .....	Subpart 8365
Safety belt requirements .....	§ 8365.1-3

## N

Names of claimants .....	§ 1822.10	
National Park Service areas .....	Subpart 3582	
National Petroleum Reserve—Alaska (oil and gas) .....	Part 3130	
Bonding .....	Subpart 3134	
Issuance of leases .....	Subpart 3132	
Leasing program .....	Subpart 3131	
Rentals and royalties .....	Subpart 3133	
Subsurface storage agreements .....	Subpart 3138	
Transfers, extensions, and consolidations .....	Subpart 3135	
Lease renewals .....	§ 3135.1-6	
Termination of BLM administration .....	§ 3135.1-8	
Unitization agreements .....	Subpart 3137	
Consultation with regional corporations .....	§ 3137.11	
Consultation with State of Alaska .....	§ 3137.11	
National Recreation Areas, Whiskeytown-Shasta-Trinity .....	§ 3109.3, subpart	3583,
	§§ 3501.1(c)(4), 3503.13(e)	
National Rivers .....	§ 8351.2	
National Trails .....	§ 8351.1	
National Wilderness Preservation System .....	Subtitle A, part 19	
Native allotments:		
Alaska .....	Subpart 2561	
Alaska Native Veterans .....	Subpart 2568	
Segregative effect .....	§ 2561.1(e)	
Native townsites (Alaska) .....	Subpart 2564	
Natural Areas, research .....	Subpart 8223	
Natural History Resource Management .....	Part 8200	
Nevada: sand and gravel .....	Subpart 3586	

## O

O and C lands:	
General .....	Part 5040
Grazing .....	Part 4100; § 4100.0-3
Mining .....	Subpart 3821
Recreation .....	Subchapter H
Rights-of-way .....	Subpart 2812
Timber sales .....	§ 5400.0-3
Trespass .....	§ 9239.7-1
Occupancy:	
Cabin sites .....	Subtitle A, part 21
Unlawful .....	§ 9239.2
Off-road vehicles .....	Part 8340
Office hours of offices .....	§ 1821.11
Officers—authority to bind government .....	§ 1810.3
Official records, availability of .....	Subtitle A, part 2
Oil and gas:	
Accreted lands .....	§ 3110.5-4
Bond requirements .....	Subparts 3104, 3154
Competitive leases .....	Subpart 3120
Confidential and proprietary information .....	§ 3100.4
Cost recovery .....	§ 3000.12
Drainage .....	§§ 3100.2, 3162.2 <i>et seq.</i>
Drilling applications .....	§ 3162.3-1
Extension of lease terms .....	Subpart 3107
Fees, rentals, and royalty .....	Subpart 3103
General .....	Part 3100 <i>et seq.</i>
Information collection .....	§ 3100.0-9
Issuance of leases .....	Subpart 3101, 3132
Leasing under special acts .....	Subpart 3109

Oil and gas—Continued

National Petroleum Reserve—Alaska .....	Subpart 3130
National Wildlife Refuge System lands .....	§3101.5
Noncompetitive leases .....	Subpart 3110
Noncompliance and assessments .....	Subpart 3163
Onshore oil and gas orders .....	§3164.1
Operations .....	Part 3160
Information collection .....	§3160.0-9
Oral auction .....	§3120.5-1
Pipelines, rights-of-way for (onshore) .....	Part 2880
Qualification of lessees .....	Subpart 3102
Rights-of-way leases .....	§3109.1
Royalty reduction .....	§3103.4-1
Royalty reduction, heavy oil .....	§3103.4-3
Royalty reduction, stripper wells .....	§3103.4-2
Special tar sand areas .....	Part 3140
Transfers .....	Subpart 3106
Unit agreements .....	Subparts 3105, 3180
Oil trespass .....	§9239.5-2
Oklahoma: Asphalt leases .....	§3503.14, subpart 3504
Omitted lands:	
General .....	Subpart 2547
Recreation and Public Purposes Act .....	Subpart 2742
Snake River, Idaho .....	Subpart 2546
Surveys .....	§§9185.2-2, 9185.2-3
Opening orders .....	Subpart 2091
Operations under mineral leases:	
Coal .....	Part 3480
Geothermal	
Drilling .....	Subpart 3260
Exploration .....	Subpart 3250
Utilization .....	Subpart 3275
Oil and gas .....	Part 3160
Solid minerals other than coal .....	Part 3590
Outdoor recreation .....	Subchapter H

**P**

Patents: Errors, correction .....	Subpart 1865
Payments and refunds .....	Subpart 1823
Payments in lieu of taxes .....	Subpart 1881

Leases .....	Subpart 2912
Omitted lands and unsurveyed islands .....	Subpart 2742
Segregative effect .....	§§2091.7-1, 2741.5(h)(2)
Refunds .....	Subpart 1823
Reindeer grazing:	
Permits .....	Part 4300
Trespass .....	§4300.90
Reimbursement of costs (rights-of-way) .....	Subpart 2808, §2883.1-1
Reinstatement of oil and gas leases .....	§3108.2
Related facilities—oil and gas pipelines .....	Part 2880
Reliance upon information or opinion of officer .....	§1810.3(c)
Relinquishments:	
Coal leases .....	Subpart 3452
General .....	Subpart 1825
Minerals, leases (except coal, oil shale, and oil and gas) .....	Subpart 3514

## Relinquishments—Continued

Minerals, leases (oil and gas) .....	Subpart 3108, § 3136.1
Minerals, prospecting permits .....	§ 3505.70
Removal of archaeological resources .....	Subtitle A, part 7
Rentals and royalties:	
Coal .....	Subpart 3473
Solid minerals other than coal and oil shale .....	Subpart 3504
Geothermal .....	Subpart 3211
Oil and gas .....	Subparts 3103, 3133
Rights-of-way .....	§§ 2806.23, 2885.15
Reports, royalties, and records:	
Coal .....	Subpart 3485
Solid minerals other than coal .....	§ 3591.2
Research natural areas .....	Subpart 8223
Reserved minerals, disposal of:	
Act of July 17, 1914 .....	Subpart 3813
Act of September 14, 1960 (Alaska) .....	§ 2627.3
Stockraising Homestead Act .....	Subpart 3814
Reservoirs, ditches and canals, rights-of-way .....	Part 2800
Resource advisory councils .....	Subpart 1784
Resource management plan .....	§ 1610.0-5(k)
Resource management planning:	
Amendments .....	§ 1610.5-5
Approval and administrative review .....	§ 1610.5-1
Conformity .....	§ 1610.5-3
Consistency .....	§ 1610.3-2
Coordination .....	§ 1610.3-1
Decision review by Congress .....	§ 1610.6
Designation of areas .....	§ 1610.7
Guidance .....	§ 1610.1
Inventory and information .....	§ 1610.4-3
Issues .....	§ 1610.4-1
Land use analysis .....	§ 1610.5-7
NEPA policy .....	§ 1601.0-6
Planning analysis .....	§ 1610.8(b)
Planning criteria .....	§ 1610.4-2
Process .....	§ 1610.4
Protest procedures .....	§ 1610.5-2
Public participation .....	§ 1610.2
Restorations and revocations of withdrawals and reservations .....	Subpart 2370
Resurveys .....	§§ 9185.1-2, 9185.3
Revocations of withdrawals .....	Part 2370
Rights-of-way .....	Part 2800 <i>et seq.</i>
Rivers: National Wild and Scenic .....	§ 8351.2
Roads, rights-of-way for .....	Parts 2800, 2810
Rules of construction—words and phrases .....	§ 1810.1
Rules, visitor use:	
Commercial use .....	§ 2932.57
Competitive use .....	§ 2932.57
National wild and scenic rivers .....	§ 8351.2-1
Off-road vehicle .....	§ 8341.2
Recreation sites .....	§ 8365.2 <i>et seq.</i>
Rules of conduct .....	Subpart 8365
Motor vehicle safety belt requirements .....	§ 8365.1-3
Supplementary rules .....	§ 8365.1-6
Wilderness areas .....	Part 8560

## S

Safety belt requirements, motor vehicle .....	§ 8365.1-3
Sales:	
Coal lease .....	Subpart 3422
Competitive oil and gas .....	§ 3120.5, 3131.4
Geothermal; direct use leases .....	Subpart 3205
Mineral material .....	Subpart 3602
Public lands, general .....	Subpart 2710

Sales—Continued

Public lands, procedures .....	Subpart 2711
Timber .....	Part 5400
Timber sales administration .....	Part 5460
Timber sales—preparation .....	Part 5420
Scenic and wild rivers .....	§ 8351.2
School land grants, mineral sections .....	Subpart 2623
Segregative effect .....	Subpart 2091
Shore space .....	Subpart 2094
Simultaneous document filing, procedures .....	§§ 1822.17, 1822.18
Snake River, omitted lands .....	Subpart 2546
Sodium, leases and permits .....	§§ 3501.15(g), 3503.37(b), 3504.15(b)(b), 3504.16(b), 3504.21(b), 3504.25(a), 3505.10, 3505.61, 3507.11(b), 3507.19(b), 3511.10, 3511.11, 3511.15(b), 3514.25(a), 3516.11
Solid minerals (other than coal) exploration and mining operations .....	Part 3590
Special leasing areas (solid minerals other than coal and oil shale) .....	Part 3580
Special recreation permits .....	Subparts 2931 and 2932
State and local government, payments in lieu of taxes .....	Subpart 1881
State director review (oil and gas) .....	§ 3165.3
State grants:	
Alaska .....	Subpart 2627
General .....	Part 2620
Segregative effect, Alaska .....	§ 2627.4
Stockraising Homestead Act—disposal of reserved min- erals .....	Subpart 3814
Sulphur leases and permits .....	§§ 3503.12, 3503.37(d), 3504.15(b)(d), 3504.21(d), 3504.25(a), 3505.10, 3505.61, 3507.11(b), 3507.19(a)(4), 3511.15(d), 3514.25(a)
Surface exploration, mining and reclamation of land .....	Subtitle A, part 23
Surface management .....	Subparts 3802, 3809
Surveys .....	Part 9180
Suspension of operations and production (S.O.P.):	
Coal .....	§§ 3473.4, 3483.3
Geothermal .....	Subpart 3212
Oil and gas .....	§ 3103.4-4

T

Taxes, Payments in lieu of .....	Subpart 1881
Technical services .....	Subchapter I
Television sites, rights-of-way for .....	Part 2800
Telephone and telegraph lines, rights-of-way for .....	Part 2800
Terminations (coal) .....	Subpart 3452
Terminations (geothermal) .....	§ 3213.14 <i>et seq.</i>
Terminations (oil and gas) .....	§ 3108.2
Testimony and proofs .....	§ 2521.6
Testimony of employees of Department .....	Subtitle A, part 2, § 2.82
Timber .....	Part 5400 <i>et seq.</i>
Time limit for filing documents .....	Subpart 1822
Title conveyances .....	Subpart 1863
Tort claims .....	Subtitle A, part 22
Townsite:	
Alaska native townsites .....	Subpart 2564
Alaska Railroad .....	Subpart 2566
Non-native .....	Subpart 2565
Reclamation .....	Subparts 2764, 2765
Trails:	
Exchanges .....	Subpart 2273
National .....	§ 8351.1
Off-road vehicle designation .....	Subpart 8342
Tramroads and logging roads, rights-of-way for .....	Part 2810

Transmission lines, rights-of-way for .....	Part 2800
Tunnel sites .....	Part 3832:Subpart D

## U

Unauthorized use .....	Part 9230
Grazing .....	Subpart 4150
Lands .....	§§ 2801.3, 2920.1-2
Mining materials .....	§§ 3601.70 through 3601.72
Use authorizations .....	Part 2930
Use permits:	
Phosphate .....	Subpart 3516
Sodium .....	Subpart 3516
Unsuitability:	
Coal mining .....	Subpart 3461
Surface mining .....	§ 1610.7-1

## V

Vehicles:	
Developed sites and areas .....	§ 8365.2-4
Off-road .....	Part 8340
Vehicle operation—off-road vehicles .....	Subpart 8343
Veterans, Alaska Native .....	Subpart 2568
Visitor services .....	Part 8360

## W

Water power .....	Subpart 2370
Whiskeytown-Shasta-Trinity National Recreation Area ...	Subpart 3583, 3109.3
Wild and Scenic Rivers .....	§ 8351.2
Wild free-roaming horse and burro:	
Adoption fees .....	§ 4750.4-2
Compliance with Private Maintenance and Care Agreement .....	Subpart 4760
Destruction of wild horses or burros and disposal of remains .....	Subpart 4730
Information collection .....	§ 4700.0-9
Management considerations .....	Subpart 4710
Motor vehicles and aircraft use .....	Subpart 4740
Private maintenance .....	Subpart 4750
Prohibited acts, administrative remedies, and penalties .....	Subpart 4770
Removal .....	Subpart 4720
Wilderness areas .....	Part 8560
Wilderness areas—mining claims .....	§ 3809.11(c)
Wilderness areas—procedures for management .....	Part 8560
Wilderness Review Program: Exploration and mining .....	Subpart 3802
Wildlife policy: State-Federal relationships .....	Subtitle A, part 24
Wisconsin—erroneously meandered lands .....	Subpart 2545
Withdrawals and reservations:	
General .....	Part 2300 <i>et seq.</i>
Restorations and revocations .....	Subpart 2370

## **Table of CFR Titles and Chapters**

(Revised as of October 1, 2008)

### **Title 1—General Provisions**

- I Administrative Committee of the Federal Register (Parts 1—49)
- II Office of the Federal Register (Parts 50—299)
- IV Miscellaneous Agencies (Parts 400—500)

### **Title 2—Grants and Agreements**

#### **SUBTITLE A—OFFICE OF MANAGEMENT AND BUDGET GUIDANCE FOR GRANTS AND AGREEMENTS**

- I Office of Management and Budget Governmentwide Guidance for Grants and Agreements (Parts 100—199)
- II Office of Management and Budget Circulars and Guidance (200—299)

#### **SUBTITLE B—FEDERAL AGENCY REGULATIONS FOR GRANTS AND AGREEMENTS**

- III Department of Health and Human Services (Parts 300— 399)
- VI Department of State (Parts 600—699)
- VIII Department of Veterans Affairs (Parts 800—899)
- IX Department of Energy (Parts 900—999)
- XI Department of Defense (Parts 1100—1199)
- XII Department of Transportation (Parts 1200—1299)
- XIV Department of the Interior (Parts 1400—1499)
- XV Environmental Protection Agency (Parts 1500—1599)
- XXVIII National Aeronautics and Space Administration (Parts 1880—1899)
- XXII Corporation for National and Community Service (Parts 2200—2299)
- XXIII Social Security Administration (Parts 2300—2399)
- XXIV Housing and Urban Development (Parts 2400—2499)
- XXV National Science Foundation (Parts 2500—2599)
- XXVI National Archives and Records Administration (Parts 2600—2699)
- XXVII Small Business Administration (Parts 2700—2799)
- XXVIII Department of Justice (Parts 2800—2899)
- XXXI Institute of Museum and Library Services (Parts 3100—3199)
- XXXII National Endowment for the Arts (Parts 3200—3299)
- XXXIII National Endowment for the Humanities (Parts 3300—3399)
- XXXV Export-Import Bank of the United States (Parts 3500—3599)
- XXXVII Peace Corps (Parts 3700—3799)

Chap.

### **Title 3—The President**

- I Executive Office of the President (Parts 100—199)

### **Title 4—Accounts**

- I Government Accountability Office (Parts 1—99)

### **Title 5—Administrative Personnel**

- I Office of Personnel Management (Parts 1—1199)
- II Merit Systems Protection Board (Parts 1200—1299)
- III Office of Management and Budget (Parts 1300—1399)
- V The International Organizations Employees Loyalty Board (Parts 1500—1599)
- VI Federal Retirement Thrift Investment Board (Parts 1600—1699)
- VIII Office of Special Counsel (Parts 1800—1899)
- IX Appalachian Regional Commission (Parts 1900—1999)
- XI Armed Forces Retirement Home (Parts 2100—2199)
- XIV Federal Labor Relations Authority, General Counsel of the Federal Labor Relations Authority and Federal Service Impasses Panel (Parts 2400—2499)
- XV Office of Administration, Executive Office of the President (Parts 2500—2599)
- XVI Office of Government Ethics (Parts 2600—2699)
- XXI Department of the Treasury (Parts 3100—3199)
- XXII Federal Deposit Insurance Corporation (Parts 3200—3299)
- XXIII Department of Energy (Parts 3300—3399)
- XXIV Federal Energy Regulatory Commission (Parts 3400—3499)
- XXV Department of the Interior (Parts 3500—3599)
- XXVI Department of Defense (Parts 3600—3699)
- XXVIII Department of Justice (Parts 3800—3899)
- XXIX Federal Communications Commission (Parts 3900—3999)
- XXX Farm Credit System Insurance Corporation (Parts 4000—4099)
- XXXI Farm Credit Administration (Parts 4100—4199)
- XXXIII Overseas Private Investment Corporation (Parts 4300—4399)
- XXXV Office of Personnel Management (Parts 4500—4599)
- XL Interstate Commerce Commission (Parts 5000—5099)
- XLI Commodity Futures Trading Commission (Parts 5100—5199)
- XLII Department of Labor (Parts 5200—5299)
- XLIII National Science Foundation (Parts 5300—5399)
- XLV Department of Health and Human Services (Parts 5500—5599)
- XLVI Postal Rate Commission (Parts 5600—5699)
- XLVII Federal Trade Commission (Parts 5700—5799)
- XLVIII Nuclear Regulatory Commission (Parts 5800—5899)
- L Department of Transportation (Parts 6000—6099)
- LII Export-Import Bank of the United States (Parts 6200—6299)
- LIII Department of Education (Parts 6300—6399)

## **Title 5—Administrative Personnel—Continued**

Chap.	
LIV	Environmental Protection Agency (Parts 6400—6499)
LV	National Endowment for the Arts (Parts 6500—6599)
LVI	National Endowment for the Humanities (Parts 6600—6699)
LVII	General Services Administration (Parts 6700—6799)
LVIII	Board of Governors of the Federal Reserve System (Parts 6800—6899)
LIX	National Aeronautics and Space Administration (Parts 6900—6999)
LX	United States Postal Service (Parts 7000—7099)
LXI	National Labor Relations Board (Parts 7100—7199)
LXII	Equal Employment Opportunity Commission (Parts 7200—7299)
LXIII	Inter-American Foundation (Parts 7300—7399)
LXIV	Merit Systems Protection Board (Parts 7400—7499)
LXV	Department of Housing and Urban Development (Parts 7500—7599)
LXVI	National Archives and Records Administration (Parts 7600—7699)
LXVII	Institute of Museum and Library Services (Parts 7700—7799)
LXVIII	Commission on Civil Rights (Parts 7800—7899)
LXIX	Tennessee Valley Authority (Parts 7900—7999)
LXXI	Consumer Product Safety Commission (Parts 8100—8199)
LXXIII	Department of Agriculture (Parts 8300—8399)
LXXIV	Federal Mine Safety and Health Review Commission (Parts 8400—8499)
LXXVI	Federal Retirement Thrift Investment Board (Parts 8600—8699)
LXXVII	Office of Management and Budget (Parts 8700—8799)
XCVII	Department of Homeland Security Human Resources Management System (Department of Homeland Security—Office of Personnel Management) (Parts 9700—9799)
XCIX	Department of Defense Human Resources Management and Labor Relations Systems (Department of Defense—Office of Personnel Management) (Parts 9900—9999)

## **Title 6—Domestic Security**

I	Department of Homeland Security, Office of the Secretary (Parts 0—99)
X	Privacy and Civil Liberties Oversight Board (Parts 1000—1099)

## **Title 7—Agriculture**

	SUBTITLE A—OFFICE OF THE SECRETARY OF AGRICULTURE (PARTS 0—26)
	SUBTITLE B—REGULATIONS OF THE DEPARTMENT OF AGRICULTURE
I	Agricultural Marketing Service (Standards, Inspections, Marketing Practices), Department of Agriculture (Parts 27—209)
II	Food and Nutrition Service, Department of Agriculture (Parts 210—299)

## Title 7—Agriculture—Continued

Chap.	
III	Animal and Plant Health Inspection Service, Department of Agriculture (Parts 300—399)
IV	Federal Crop Insurance Corporation, Department of Agriculture (Parts 400—499)
V	Agricultural Research Service, Department of Agriculture (Parts 500—599)
VI	Natural Resources Conservation Service, Department of Agriculture (Parts 600—699)
VII	Farm Service Agency, Department of Agriculture (Parts 700—799)
VIII	Grain Inspection, Packers and Stockyards Administration (Federal Grain Inspection Service), Department of Agriculture (Parts 800—899)

XXVII	Office of Information Resources Management, Department of Agriculture (Parts 2700—2799)
XXVIII	Office of Operations, Department of Agriculture (Parts 2800—2899)
XXIX	Office of Energy Policy and New Uses, Department of Agriculture (Parts 2900—2999)
XXX	Office of the Chief Financial Officer, Department of Agriculture (Parts 3000—3099)
XXXI	Office of Environmental Quality, Department of Agriculture (Parts 3100—3199)
XXXII	Office of Procurement and Property Management, Department of Agriculture (Parts 3200—3299)
XXXIII	Office of Transportation, Department of Agriculture (Parts 3300—3399)
XXXIV	Cooperative State Research, Education, and Extension Service, Department of Agriculture (Parts 3400—3499)

<b>Title 7—Agriculture—Continued</b>	
Chap.	
XXXV	Rural Housing Service, Department of Agriculture (Parts 3500—3599)
XXXVI	National Agricultural Statistics Service, Department of Agriculture (Parts 3600—3699)
XXXVII	Economic Research Service, Department of Agriculture (Parts 3700—3799)
XXXVIII	World Agricultural Outlook Board, Department of Agriculture (Parts 3800—3899)
XLI	[Reserved]
XLII	Rural Business-Cooperative Service and Rural Utilities Service, Department of Agriculture (Parts 4200—4299)

## **Title 8—Aliens and Nationality**

I	Department of Homeland Security (Immigration and Naturalization) (Parts 1—499)
V	Executive Office for Immigration Review, Department of Justice (Parts 1000—1399)

## **Title 9—Animals and Animal Products**

I	Animal and Plant Health Inspection Service, Department of Agriculture (Parts 1—199)
II	Grain Inspection, Packers and Stockyards Administration (Packers and Stockyards Programs), Department of Agriculture (Parts 200—299)
III	Food Safety and Inspection Service, Department of Agriculture (Parts 300—599)

## **Title 10—Energy**

I	Nuclear Regulatory Commission (Parts 0—199)
II	Department of Energy (Parts 200—699)
III	Department of Energy (Parts 700—999)
X	Department of Energy (General Provisions) (Parts 1000—1099)
XIII	Nuclear Waste Technical Review Board (Parts 1303—1399)
XVII	Defense Nuclear Facilities Safety Board (Parts 1700—1799)
XVIII	Northeast Interstate Low-Level Radioactive Waste Commission (Parts 1800—1899)

## **Title 11—Federal Elections**

I	Federal Election Commission (Parts 1—9099)
---	--

## **Title 12—Banks and Banking**

I	Comptroller of the Currency, Department of the Treasury (Parts 1—199)
II	Federal Reserve System (Parts 200—299)

Chap. **Title 12—Banks and Banking—Continued**

- III Federal Deposit Insurance Corporation (Parts 300—399)
- IV Export-Import Bank of the United States (Parts 400—499)
- V Office of Thrift Supervision, Department of the Treasury (Parts 500—599)
- VI Farm Credit Administration (Parts 600—699)
- VII National Credit Union Administration (Parts 700—799)
- VIII Federal Financing Bank (Parts 800—899)
- IX Federal Housing Finance Board (Parts 900—999)
- XI Federal Financial Institutions Examination Council (Parts 1100—1199)
- XII Federal Housing Finance Agency (Parts 1200—1299)
- XIV Farm Credit System Insurance Corporation (Parts 1400—1499)
- XV Department of the Treasury (Parts 1500—1599)
- XVII Office of Federal Housing Enterprise Oversight, Department of Housing and Urban Development (Parts 1700—1799)
- XVIII Community Development Financial Institutions Fund, Department of the Treasury (Parts 1800—1899)

**Title 13—Business Credit and Assistance**

- I Small Business Administration (Parts 1—199)
- III Economic Development Administration, Department of Commerce (Parts 300—399)
- IV Emergency Steel Guarantee Loan Board, Department of Commerce (Parts 400—499)
- V Emergency Oil and Gas Guaranteed Loan Board, Department of Commerce (Parts 500—599)

**Title 14—Aeronautics and Space**

- I Federal Aviation Administration, Department of Transportation (Parts 1—199)
- II Office of the Secretary, Department of Transportation (Aviation Proceedings) (Parts 200—399)
- III Commercial Space Transportation, Federal Aviation Administration, Department of Transportation (Parts 400—499)
- V National Aeronautics and Space Administration (Parts 1200—1299)
- VI Air Transportation System Stabilization (Parts 1300—1399)

**Title 15—Commerce and Foreign Trade**

SUBTITLE A—OFFICE OF THE SECRETARY OF COMMERCE (PARTS 0—29)

SUBTITLE B—REGULATIONS RELATING TO COMMERCE AND FOREIGN TRADE

- I Bureau of the Census, Department of Commerce (Parts 30—199)

## **Title 15—Commerce and Foreign Trade—Continued**

Chap.

- II National Institute of Standards and Technology, Department of Commerce (Parts 200—299)
- III International Trade Administration, Department of Commerce (Parts 300—399)
- IV Foreign-Trade Zones Board, Department of Commerce (Parts 400—499)
- VII Bureau of Industry and Security, Department of Commerce (Parts 700—799)
- VIII Bureau of Economic Analysis, Department of Commerce (Parts 800—899)
- IX National Oceanic and Atmospheric Administration, Department of Commerce (Parts 900—999)
- XI Technology Administration, Department of Commerce (Parts 1100—1199)
- XIII East-West Foreign Trade Board (Parts 1300—1399)
- XIV Minority Business Development Agency (Parts 1400—1499)  
SUBTITLE C—REGULATIONS RELATING TO FOREIGN TRADE AGREEMENTS
- XX Office of the United States Trade Representative (Parts 2000—2099)  
SUBTITLE D—REGULATIONS RELATING TO TELECOMMUNICATIONS AND INFORMATION
- XXIII National Telecommunications and Information Administration, Department of Commerce (Parts 2300—2399)

## **Title 16—Commercial Practices**

- I Federal Trade Commission (Parts 0—999)
- II Consumer Product Safety Commission (Parts 1000—1799)

## **Title 17—Commodity and Securities Exchanges**

- I Commodity Futures Trading Commission (Parts 1—199)
- II Securities and Exchange Commission (Parts 200—399)
- IV Department of the Treasury (Parts 400—499)

## **Title 18—Conservation of Power and Water Resources**

- I Federal Energy Regulatory Commission, Department of Energy (Parts 1—399)
- III Delaware River Basin Commission (Parts 400—499)
- VI Water Resources Council (Parts 700—799)
- VIII Susquehanna River Basin Commission (Parts 800—899)
- XIII Tennessee Valley Authority (Parts 1300—1399)

## **Title 19—Customs Duties**

- I Bureau of Customs and Border Protection, Department of Homeland Security; Department of the Treasury (Parts 0—199)

	<b>Title 19—Customs Duties—Continued</b>
Chap.	
II	United States International Trade Commission (Parts 200—299)
III	International Trade Administration, Department of Commerce (Parts 300—399)
IV	Bureau of Immigration and Customs Enforcement, Department of Homeland Security (Parts 400—599)

### **Title 20—Employees' Benefits**

I	Office of Workers' Compensation Programs, Department of Labor (Parts 1—199)
II	Railroad Retirement Board (Parts 200—399)
III	Social Security Administration (Parts 400—499)
IV	Employees Compensation Appeals Board, Department of Labor (Parts 500—599)
V	Employment and Training Administration, Department of Labor (Parts 600—699)
VI	Employment Standards Administration, Department of Labor (Parts 700—799)
VII	Benefits Review Board, Department of Labor (Parts 800—899)
VIII	Joint Board for the Enrollment of Actuaries (Parts 900—999)
IX	Office of the Assistant Secretary for Veterans' Employment and Training Service, Department of Labor (Parts 1000—1099)

### **Title 21—Food and Drugs**

I	Food and Drug Administration, Department of Health and Human Services (Parts 1—1299)
II	Drug Enforcement Administration, Department of Justice (Parts 1300—1399)
III	Office of National Drug Control Policy (Parts 1400—1499)

### **Title 22—Foreign Relations**

I	Department of State (Parts 1—199)
II	Agency for International Development (Parts 200—299)
III	Peace Corps (Parts 300—399)
IV	International Joint Commission, United States and Canada (Parts 400—499)
V	Broadcasting Board of Governors (Parts 500—599)
VII	Overseas Private Investment Corporation (Parts 700—799)
IX	Foreign Service Grievance Board (Parts 900—999)
X	Inter-American Foundation (Parts 1000—1099)
XI	International Boundary and Water Commission, United States and Mexico, United States Section (Parts 1100—1199)
XII	United States International Development Cooperation Agency (Parts 1200—1299)

 Alphabetical List of Agencies Appearing in the CFR

## Alphabetical List of Agencies Appearing in the CFR

(Revised as of October 1, 2008)

Agency	CFR Title, Subtitle or Chapter
Administrative Committee of the Federal Register	1, I
Advanced Research Projects Agency	32, I
Advisory Council on Historic Preservation	36, VIII
African Development Foundation	22, XV
Federal Acquisition Regulation	48, 57
Agency for International Development	22, II
Federal Acquisition Regulation	48, 7
Agricultural Marketing Service	7, I, IX, X, XI
Agricultural Research Service	7, V
Agriculture Department	5, LXXIII
Agricultural Marketing Service	7, I, IX, X, XI
Agricultural Research Service	7, V
Animal and Plant Health Inspection Service	7, III; 9, I
Chief Financial Officer, Office of	7, XXX
Commodity Credit Corporation	7, XIV
Cooperative State Research, Education, and Extension Service	7, XXXIV
Economic Research Service	7, XXXVII
Energy, Office of	2, IX; 7, XXIX
Environmental Quality, Office of	7, XXXI
Farm Service Agency	7, VII, XVIII
Federal Acquisition Regulation	48, 4
Federal Crop Insurance Corporation	7, IV
Food and Nutrition Service	7, II
Food Safety and Inspection Service	9, III
Foreign Agricultural Service	7, XV
Forest Service	36, II
Grain Inspection, Packers and Stockyards Administration	7, VIII; 9, II
Information Resources Management, Office of	7, XXVII
Inspector General, Office of	7, XXVI
National Agricultural Library	7, XLI
National Agricultural Statistics Service	7, XXXVI
Natural Resources Conservation Service	7, VI
Operations, Office of	7, XXVIII
Procurement and Property Management, Office of	7, XXXII
Rural Business-Cooperative Service	7, XVIII, XLII
Rural Development Administration	7, XLII
Rural Housing Service	7, XVIII, XXXV
Rural Telephone Bank	7, XVI
Rural Utilities Service	7, XVII, XVIII, XLII
Secretary of Agriculture, Office of	7, Subtitle A
Transportation, Office of	7, XXXIII
World Agricultural Outlook Board	7, XXXVIII
Air Force Department	32, VII
Federal Acquisition Regulation Supplement	48, 53
Air Transportation Stabilization Board	14, VI

## List of CFR Sections Affected

All sections in this volume of the Code of Federal Regulations that were affected by documents published in the FEDERAL REGISTER since January 1, 2001, are enumerated in the following list. Entries indicate the nature of the changes effected. Page numbers refer to FEDERAL REGISTER pages.

For the period before January 1, 2001, see the "List of CFR Sections Affected, 1949–1963, 1964–1972, 1973–1985, and 1986–2000" published in 11 separate volumes.
